Curriculum Vitae

Oceanographer with extensive experience in regional climate modelling and statistical methods, with a 20 year working experience in joint research projects.

Born on the 19th September 1968 in Hamburg

Current position

started 11/2014

Research Scientist at the Climate Service Center Germany (GERICS): I am conducting regional climate simulations within the EURO CORDEX framework to derive robust climate change information on high spatial resolution for Germany and the large river catchments draining into Germany, to provide consistent and user-tailored information for the federal agencies and climate impact and adaption research.

Research interest

Statistical methods for the analysis of simulated and observed climate data, applied in projects dealing with climate change impact and adaptation.

Research experience

09/2011 -10/2014

Research Scientist at the Federal Maritime and Hydrographic Agency (Prof. Dr. Hartmut Heinrich):
 I analysed climate-induced changes in currents and water levels using model simulations of regional coupled ocean atmosphere models. This work is part of the research program KLIWAS.

06/2001 - 08/2011

Research Scientist at the Max Planck Institute for Meteorology (Prof. Dr. Daniela Jacob):
 My research focused on the occurrence of extremes like severe rainfall and droughts and their possible changes in the future. Therefore I analysed regional climate model results in the projects GLOWA-ELBE, KLIWA, KLIWAS and ENSEMBLES.

02/1997 - 04/2001

Research Scientist at the Helmholtz Centre Geesthacht (Prof. Dr. H. von Storch):
 I validated a nutrient model for the river Elbe against observations. I performed sensitivity studies of the model parameterization by using the adjoint code of the model.

07/1996 - 12/1996	Research Scientist at Helmholtz Centre for Ocean Research Kiel (Planktology Department, Prof. Dr. B. Zeitschel): Measuring the physical properties of the ocean on a JGOFS cruise and evaluating these observations.
04/1996 - 06/1996	Internship at the University of Rhode Island, U.S.A. (Prof. Dr. M. L. Spaulding): Prepared the integral real time estuarine monitoring and modelling system COASTMAP to Greenwich Bay, performed simulations of the tidal currents in the bay and compared them to observations.

Academic studies

12/2009	Received a PhD at the University of Hamburg Advisor: Prof. Dr. D. Jacob und Prof. Dr. H. Graßl Topic: Time series analysis of regional temperature and precipitation simulations for Germany.
04/1990 - 02/1996	Oceanography at the University of Hamburg Diploma thesis at the Federal Maritime and Hydrographic Agency (BSH), Advisor: Dr. G. Becker Topic: Currents, stratification and fronts in the German Bight - Comparison of model simulations with observations of an experiment in the summer 1994.
10/1989 - 02/1990	Geology at the University of Berlin

Computer Skills	Python, Matlab, R, CDO, shell scripting, Fortran, Latex, MS Office
------------------------	--

Languages	German (native speaker), English (fluent)
------------------	---
