**POWER VISION**

- The quickest, most powerful flash tuner on the market
- The sophisticated, yet easy-to-use, 3.5" full-color touch-screen display mounts to handlebars with integrated Amps 4-hole threaded inserts; also mounts to most aftermarket accessory mounts that feature AMPS 4-mounting options
- The display's interface cable plugs directly to the bike's diagnostic connector
- NO COMPUTER REQUIRED; simply select the tune and follow the on-screen prompts
- to flash the bike; tunes can also be edited directly from the Power Vision
- Utilizes WinPV (Windows PC-based tuning application)
- Stores up to six different tunes that can be flashed to the bike
- Downloads and stores the stock calibration in case OEM restoration is needed; stock calibration can also be saved as an editable copy and used as a starting point
- Dynojet preconfigured tunes are preloaded on the unit; Power Vision will identify the bike's information and automatically sort hundreds of applicable, dyno-proven tunes
- Custom tunes can be loaded by a tuning shop or received via email and loaded onto the device
- Displays all J1850 H-D vehicle data, wide-band air fuel ratio<sup>2</sup> and various calculated channels (including MPG instant and trip MPG)
- AutoTune Basic and Pro<sup>3</sup> calculates and stores fuel trims to optimize fuel curve
- Checks and clears diagnostic codes
- Features adaptive trims and idle offset (with bike running)
- Black series features a flat black outer case
- See Dynojet website <http://www.dynojet.com/power-vision-tune-license-programs.aspx> for information about purchasing additional Power Vision tune licenses.

**MANUFACTURER'S NOTE:** All Power Vision returns and/or adjustments must be made directly with Dynojet Research. The Power Vision may be used on any bike to read and clean trouble codes.

**POWER COMMANDER V**

- Fuel and timing control
- Rev Xtend increases Rev limit
- The Power Commander V can read the exact engine temperature through the bike's ECM, which allows the tuner to choose how much fuel to add during cold starts
- Cold starting on heavily modified engines should be more controllable and easy to adjust
- USB powered from computer
- Two position map-switching function built-in (switch not included)
- Can add any SPST switch and toggle between two different fuel/timing maps
- Gear/speed input allows for map adjustment based on gear
- Analog input allows user to install any 0-5 volt sensor
- Build an adjustment table based on analog input, such as boost or temperature
- Power Commander V is capable of allowing each cylinder to be mapped individually and for each gear with the gear position input connected
- Ten throttle position columns
- World's largest dyno tested map database
- Enhanced "accel pump" utility
- Made in the U.S.A.

**AUTOTUNE KIT FOR POWER VISION**

- Plugs directly into the Power Vision with a single cable
- Includes 18mm O<sub>2</sub> sensors and power connector that plugs into the bike's harness
- Provides real-time AFR feedback to the Power Vision
- Allows for semi-automated fuel corrections
- User can specify what air/fuel ratio to make each rpm and throttle position percentage combination
- Makes it possible to adjust cruise for best fuel economy as well as larger throttle openings for peak power
- Base settings included for air/fuel ratios, but are fully adjustable if need be
- Made in the U.S.A.

**NOTE:** Because of possible clearance issues, some aftermarket exhaust systems may require modifications or relocation of their sensor bungs.

**MULTI-FUNCTION HUB ACCESSORY FOR POWER COMMANDER USB/USB-EX**

- The Multi-Function Hub allows access to advanced expansion features of the Power Commander USB
- Compatible with the LCD display, but the display is not required
- Four separate functions can be accessed with the Multi-Function Hub
- The Map Selection Switch (7/8" bar mount) allows the rider to switch between two different maps in the Power Commander; this allows a map for economy, and a separate map for performance
- The Gear Position/Speed function allows fuel and timing adjustments to be made depending on the gear selected and the position of the throttle, up to +/-50% fuel and +/-10 degrees of timing
- Pressure input allows the fuel to be increased, along with the boost level on turbocharged installations; the change of boost level does not require a re-mapping of the Power Commander
- Relay outputs allow up to two warning lights or relays to be triggered independently to activate items such as shift lights, nitrous systems, or air shifter; the trigger can be by throttle percent, rpm, or both
- Comes complete with installation instructions, wiring diagrams and CD with the required software updates
- Made in the U.S.A.

MAXIMUS

MAXIMUS TUNER

- Most advanced, easy-to-operate single-user flash tuning tool for ALL fuel-injected Harley-Davidsons
- User-friendly Android smartphone and tablet app allows users an easy-to-use display in real time that wirelessly communicates via Bluetooth
- Utilizes advanced hardware and software specifications to combine the most commonly used features from the Centurion Pro professional diagnostics tool as well as the Direct Link professional flash tuning tool
- Easy hookup with included cables
- Once tuning is complete, the kit is simply unplugged until the next tune
- Maximus allows backing up and restoring original maps, as well as re-flashing stock ECUs and performing routine diagnostics
- Fast data acquisition and many hours of data storage provides accuracy and saves time
- Provides power from the motorcycle for wideband O<sub>2</sub> sensors and will record/monitor wideband O<sub>2</sub> sensors
- Tuning features include the ability to modify front and rear cylinder fuel/spark tables separately, air/fuel ratio, warm-up fuel, cranking fuel, closed loop, acceleration/deceleration, rev limiter and the ability to restore original map
- Easy-to-use auto mapping feature
- Diagnostic features include key fob coding, speedometer calibration, read and clear diagnostic trouble codes (DTC), and system relay testing
- Requires the use of Windows-based PC, laptop or tablet
- Made in the U.S.A.

NOTE: Can be used on one motorcycle an unlimited amount of times, but not multiple bikes.

CENTURION SUPER PRO AND SUPER PRO PLUS PROFESSIONAL TUNING AND DIAGNOSTIC TOOLS

- The industry's only complete professional diagnostic tool system designed for independent professional repair facilities
- Communicates with ALL 97-17 Harley-Davidson and Buell models using the included proprietary VCM-TR3 Communication Module with included cables
- Re-flash blank ECU, program VIN, BCM and Key Fobs
- Centurion recovers locked security modules (TSSM/BCM) without costly replacements of TSSM or BCM
- Perform radio, speaker, lighting and navigation system configuration on all models
- Easily perform speedometer calibration on all models
- ABS bleeding and solenoid testing
- Read and clear Diagnostic Trouble Codes (DTC)
- Reset air/fuel values and adjust idle rpm
- Perform active tests on tachometer, speedometer, fuel pump, idle rpm, system relays, cooling fans, alarm, IAC, ACR compression, injector coils, coolant pump, left or right turn signals and other systems
- Centurion Super Pro Plus equals in functionality with OEM Indian and Victory diagnostics
- LED indicator tests for 6th gear, ABS service, battery, check engine, cruise control, high and low beam, neutral, oil, security and coolant temp
- View real-time data in strip chart or digital dashboard formats
- Requires use of a Windows or Android-based PC, laptop or tablet; connect using either included cable or Bluetooth® wireless connection
- Fast data acquisition and many hours of data storage provides accuracy and saves time
- Can easily update software online through Technoresearch to stay current on all features, years and model types
- Included VCM-TR3 Communication Module is fully compatible with Direct Link & Tune Builder keys (sold separately)
- Includes Mobile Dyno with Android app that provides more than 20 hours of data logging

## DIRECT LINK TUNING KEYS

- Provide the most extensive, professional, easy-to-use flash tuning capabilities available
- For use with any Technoresearch VCM-TR3 (Centurion Pro, Pro Plus or Tune Builder)
- Direct Link's included Auto Mapping feature greatly reduces the user's need to do cell-by-cell tuning calculations
- Allow tuners to modify fuel and spark tables (front and rear cylinders), air fuel ratio, warm-up fuel, cranking fuel, closed loop, acceleration and deceleration, rev limiter and knock control
- Fuel, spark and AFR real-time cell tracing
- Simultaneous modification of both front and rear cylinder fuel and spark tables
- View data using Strip Chart or Digital Dashboard
- Data logging and data analysis features
- Save back-up with calibrations and restore the original map
- Wideband O<sub>2</sub> sensor controller interfacing
- Motorcycle's VIN is assigned to one key and can be used for multiple tunes

## TUNE BUILDER

- Tune Builder is an easy-to-use, professional tuning aid that saves up to 50% of the time needed to create mapping
- Quickly combines current map information with using its powerful data collection and sophisticated algorithms to automatically create tables that allows users to copy/paste completed maps into flash tuning software
- After data is collected from a motorcycle ECU, Tune Builder's Auto Mapping feature automatically generates fuel tables to create the most efficient map possible
- Can be used with all flash tuning software regardless of brand, including OE and aftermarket products
- Effortlessly tune Volumetric Efficiency (VE) tables, detect and remove spark knock and evaluate engine usage areas
- Log up to 16 channels simultaneously and at high frequency
- Record and seamlessly integrate any O<sub>2</sub> sensor device into data collection
- Can utilize the motorcycle's stock narrow band O<sub>2</sub> sensors (if equipped)
- View 3D plots in a grid or in color and view statistics on collected data
- View and adjust tables simply
- Easy to apply manual corrections of VE and spark tables
- Can apply changes to front and rear tables simultaneously
- Keys are available with either 5 or 10 licenses; one license used per motorcycle
- Made in the U.S.A.

**NOTE:** Must be used in conjunction with a fuel management system previously installed on the bike.  
**NOTE:** PART #1020-2409 includes VCM-TR3 communication hardware and cables. License keys need to be purchased separately.  
**NOTE:** If you have a Centurion Super Pro or Centurion Super Pro Plus, PART #1020-2409 is NOT needed.

## TRO<sub>2</sub> WIDEBAND AIR/FUEL RATIO SYSTEM

- Essential tuning assistant designed to be used with data logging systems such as a dyno or the Mobile Dyno feature from TechnoResearch found in Centurion Pro, Centurion Pro Plus and Tune Builder
- Includes two Bosch LSU 4.2 O<sub>2</sub> sensors with 7-foot long cables for easy and versatile usage
- Interfaces directly with any TechnoResearch VCM-TR3 communication module found with products such as Tune Builder, Centurion Pro, Centurion Pro Plus
- No calibration required with digital precision
- 12 volt DC power input required
- Made in the U.S.A.

**NOTE:** Use PART #3807-0378 to install O<sub>2</sub> sensor sensor bungs.

**FUELPAK FP3**

- The Fuelpak FP3 has revolutionized fuel management for all new Harley-Davidson models using the HDLAN system
- Connecting wirelessly by Bluetooth® to any iPhone® or Android Smartphone, Fuelpak FP3 uses Flash technology to recalibrate engine parameters and mapping for exhaust systems and other performance upgrades downloaded from the expansive library of calibrations developed by Vance & Hines
- Also standard for the Fuelpak FP3 is an Autotune feature, making use of all factory sensors to add another layer of precision tuning for specific requirements, whether tuning for unique components or different grades of fuel
- With the Fuelpak FP3 module plugged-in, Live Sensor Data can be viewed through the smartphone to display speed, RPM, cylinder head temperature, voltage, gear selection and other vital information
- Features smartphone app user interface
- Displays live sensor data; PART # 1020-2538 excludes fuel economy, average fuel economy, gear and odometer

**FUELPAK**

- Available in original version which is not legal for sale or use in CA or California A.R.B; approved version with all the same features as the original
- Throttle position sensor-based system simplifies the process of fuel-injection tuning
- Enables you to fine-tune the fuel mixture throughout the entire rpm range with the touch of a button
- Increases power and improves throttle response
- Very user friendly; plugs into the existing harness on the bike
- No computer or software is required; simply punch in the values provided on the V&H website
- Values provided are for use with Vance & Hines exhaust systems
- Fuelpak will also work with other exhaust systems (contact V&H tech support for tuning information)
- Includes all necessary mounting hardware

### Fi2000 POWRPRO BLACK

- Requires no dyno tuning – plug it in and ride
- PowrPro Black analyzes, tunes and adjusts your air/fuel ratio for peak performance instantaneously
- Tunes acceleration fuel delivery in every gear for peak performance
- Works with stock or modified engines, air cleaners and exhaust systems
- Can fine-tune the non-acceleration air/fuel curves using the Bluetooth® app
- Can tune engine fuel delivery in specific ranges, check rpm, read fuel injector pulse width and duty cycle, and add or remove fuel in low- or mid-range rpm

**Fi2000R PLUG-IN FUEL PROCESSOR**

- Proven Fi2000R comes with leads that snap directly into the bike's injector bodies
- Standard open-loop design for 06 Dyna and all 07-08 models can use exhaust systems that do or do not have O<sub>2</sub> sensor bungs
- More advanced tuning for modified bikes
- Think of third tuning pot as an electronic main jet while thinking of the entire Fi2000R as a digital jet kit
- Full range of fuel adjustment (0-10 settings) across all rpm ranges
- Three easily identifiable lights: green – Fi2000R is adding more fuel to the air/fuel ratio approx. 14:1; green and yellow lights – these lights will be on in unison when throttle is open more quickly and air/fuel mixture is approx. 12.5:1; red – light comes on and stays on as long as the Fi2000R follows the fuel curve while adjusting to approx. 12.8:1 air/fuel ratio, which is where the engine will produce its best full-throttle power
- Step-by-step instructions
- Improves rideability by smoothing out the powerband and giving the bike more throttle response
- Corrects lean air/fuel mixture problems; eliminates overheating, hesitation on acceleration or an uneven cruising rpm
- Waterproof circuit board
- No fuel map adjustments or computer downloads required

**Fi2000R O<sub>2</sub> STANDARD MODEL FUEL PROCESSORS**

- The Fi2000R O<sub>2</sub> digital fuel processor is designed to work with all H-D exhaust systems (stock or aftermarket) equipped with oxygen sensors in place (closed-loop design)
- Works much like a carburetor jet kit with adjustments similar to the air-mixture screw, the needle and clip positions and the main jet
- The Fi2000R increases horsepower and torque by optimizing stock lean air/fuel mixtures (helps cool the engine temps as well)
- Quick and simple installation with plug-and-ride technology with OEM-style connectors
- No confusing computer downloads to install
- No expensive dyno-testing required
- Pre-configured from the factory for your make and model, but easy to adjust should your specific application need it
- Improves overall rideability

**Low-Speed Screw**  
This control functions similar to the air mixture screw on a carburetor, controlling off-idle fuel demands and steady cruising.

**Mid-Speed Screw**  
This is the equivalent of the needle and clip position on a carburetor. Two increments correspond to dropping the clip on a needle one position. One increment is the same as adding a shim. This is where you get the proper fuel mixture under load and acceleration.

**High-Speed Screw**  
This is the electronic counterpart to your main jet. Each numbered increment is the same as going up one main jet size starting with the stock size at zero. This adjusts your fuel at full throttle.

# THUNDERMAX

## THUNDERMAX ECM WITH INTEGRAL AUTO TUNE SYSTEM

- ThunderMax ECM with Auto-Tune module mounts conveniently in place of the factory ECM and plugs in to the existing harness
- Utilizes wide-band O<sub>2</sub> sensors and works as a closed-loop control system to continuously self-adjust and properly tune the motorcycle's air/fuel ratio for all riding conditions
- Easy installation: replace the factory ECM, install new O<sub>2</sub> sensors and harness, load the correct map for your bike, and ride
- Includes ThunderMax ECM with Auto-Tune Module, plug-in harness and two wide-band sensors, TMax software and communication USB cable, Quick-Start Easy Install and Comprehensive User's Manual, technical support and free software and updates
- Hundreds of maps available to download for your bike (based on model, engine size, exhaust system air cleaner, pistons, cams, etc.) – load the map of your choice and the integral auto-tune will do the rest
- Improves throttle response, exhaust sound and driveability
- Does not require dyno tuning
- Rider can adjust idle speed, rev limit and speedometer calibration
- Adjustable front and rear cylinder AFR maps, ignition timing (spark) maps, and startup maps
- Works with all popular exhaust systems and is compatible with high-performance camshafts
- Supports turbo, nitrous and supercharger applications
- Software program allows live monitoring, recording and examination of diagnostic codes and datalogs including number of starts, engine temperature and rpm operation
- New maps, software, firmware updates, map analysis and tech support available online at no charge
- Made in the U.S.A.

**NOTE:** Because of possible clearance issues, some aftermarket exhaust systems may require modifications or relocation of their O<sub>2</sub> sensor port bungs.

## THUNDERMAX 50 ECM

- California ARB-compliant complete replacement engine-management system for Delphi®-equipped EFI model Harleys
- Integral auto-tune system utilizes wide-band O<sub>2</sub> sensors and works as a closed-loop control system to continuously self-adjust and properly tune the motorcycle's air/fuel ratio in all conditions
- Easy installation – replace the factory ECM, install new O<sub>2</sub> sensors and harness, and ride
- Improves throttle response and increases horsepower and torque
- Maintains excellent fuel economy
- Includes Thundermax 50 ECM, plug-in harness, two wide-band O<sub>2</sub> sensors, software, communication USB cable, comprehensive user's manual, full technical support and free software updates
- Software allows examination of vehicle diagnostic codes
- 01-06 models will require the exhaust system to be equipped with or modified for O<sub>2</sub> sensor bungs
- Made in the U.S.A.

**NOTE:** Because of possible clearance issues, some aftermarket exhaust systems may require modifications or relocation of their O<sub>2</sub> sensor port bungs.

## THUNDERMAX PIGTAIL HARNESS

- Allows a second port for the communication cable connection to the ThunderMax
- It is installed to the bike's wiring harness at the 36-pin ECM connector (connection requires harness plug disassembly; two terminated wires are inserted into two unused ports in the 36-pin connector, and a ground wire added)
- Handy for motorcycle models with tight clearances around the ECM such as Dyna, Softail Rocker and 02-05 V-Rod models
- Made in the U.S.A.

**TWIN SCAN COMPLETE KIT**

- Includes both a Twin Scan II ABS unit for 01-16 models with J1850 data bus and a Twin Scan 3 ABS unit for 11-15 Softail/Dyna models with CAN data bus
- Uses Windows® 7-8-10 PCs for display
- Reads and clears diagnostic trouble codes from ECM, BCM, ABS, speedo and tach
- Real-time display of engine data on PC instrument panel-type display
- Built-in data logging; stores up to one hour of data
- Triggers when trouble code is set and shows data before and after data is set
- Includes two analog inputs with 0-20V or ±200V range; Twin Scan 3 features two-channel scopemeter capability for waveform display
- Analog inputs can also be used for air/flow ratio (AFR)
- Complete kit includes WEGO IIID Interface for tuning capability with both Twin Scan versions, two Bosch LSU 4.2 wide-band oxygen sensors, two 18 x 1.5mm weld nuts, two 18 x 1.5 mm hex socket plugs, USB cable, the Twin Scan 3 Probe Kit for use with the scopemeter feature of the Twin Scan 3 ABS, and software (on CD ROM)
- Made in the U.S.A.

PART #	DESCRIPTION	SUG. RETAIL
3807-0251	For 11-16 models w/ CANbus systems, 01-16 36-pin Delphi fuel-injected, 04-06 carbureted models w/ 12-pin module	\$1,312.00

**TCFI AUTO-TUNING FUEL INJECTION KITS**

- Offers real-time and continuous auto-tuning with monitoring, control and override capability
- Utilizes high end Alpha-N fuel control to eliminate any dependence on manifold pressure; unaffected by long duration and high overlap camshafts
- Programmable user outputs for functions such as shift light, nitrous activation and electric shifter
- Supports all sensors including theft and security module
- User-friendly PC Link software with 3-D graphics and easy spreadsheet editing capabilities for quick cell block changes
- Built in data logging that helps you diagnose real world problems
- Easy to install by simply replacing stock ECM and O2 sensors with those included in kit; detailed instructions included
- Kit includes TCFI plug in fuel injection controller, USB interface for PC, software, WEGO IIID dual channel wide band exhaust gas oxygen sensor interface, two Bosch LSU 4.2 wide band exhaust oxygen sensors and two 18 x 1.5mm weld nuts for exhaust pipes
- See page 599 for replacement weld nuts and socket plugs
- Made in the U.S.A.

GENERAL**Daytona Twin Tec****TWIN TUNER FUEL-INJECTION CONTROLLER**

- Allows easy adjustments to OEM Delphi fuel-injection systems to improve performance and match the requirements of performance parts
- Mode and up/down pushbutton switches make fuel trim adjustments in the rpm and throttle position ranges required by most applications; fuel trim value is displayed on a bright daylight-readable LED display
- Advanced mode (using optional USB Interface PART #2101-0075 and PC Link Tuner software) allows precise fuel adjustments and independent adjustments to the front and rear cylinders
- May be compatible with other controller maps
- Easy plug-in installation and setup
- Compact size – only 4" L x 2" W x .5" H
- Compatible with Twin Scan II+ Tuning Aid – install the Twin Scan II+ and ride the bike, then copy the air/fuel ratio corrections calculated by the Twin Scan II+ into the PC Link Tuner software
- Made in the U.S.A.

**Daytona Twin Tec****TWIN TUNER II**

- Twin Tuner II has all the features of the original Twin Tuner and includes ignition timing control capability
- Easily adjusts the OEM Delphi fuel-injection and ignition to match the requirements of performance parts including high-compression pistons/heads, camshafts, free-flowing exhausts, and low-restriction air filters – add 30% or subtract 20% fuel and retard spark timing up to 10°
- You can use the mode and up/down pushbutton switches to make fuel trim adjustments in the rpm and throttle position ranges required by most applications; the fuel trim value is displayed on a bright daylight readable LED display
- The Twin Tuner also has an advanced mode, using the optional USB Interface and PC Link Tuner software to make precise fuel adjustments and allows independent adjustments to the front and rear cylinders
- May be compatible with other controller maps
- Easy plug-in installation and setup, with no splicing, cutting, crimping or bulky interconnections
- Compact size – only 4" L x 2" W x 1/2" H
- Compatible with Twin Scan II+ Tuning Aid – install the Twin Scan II+ and ride the bike, then copy the air/fuel ratio corrections calculated by the Twin Scan II+ into the PC Link Tuner software

*dyn performance electronics***FI CONTROLLER**

- Plug-in module offers three user-selectable base fuel curves designed to improve engine operation on fuel-injected models
- Can be configured to suit a wide variety of modifications
- Adjustments are made via three potentiometers that adjust the fuel curve in the proper ranges for the application
- Fuel mixture can be enriched or leaned as required
- Uses factory connectors for easy installation – there is no PC required for tuning or adjusting the fuel curves
- No modifications to the stock ECU
- Removing the FI controller returns vehicle to factory configuration
- Made in the U.S.A.

**RCX-CELERATOR CLOSED-LOOP FUEL MANAGEMENT SYSTEMS**

- Self-learning computer automatically adjusts the fuel/air mixture as you ride and compensates for changes in engine load conditions
- Automatically recalibrates for modifications to the exhaust system and air intake – mufflers, headers and air cleaner
- Maximizes performance and engine efficiency while decreasing emissions and fuel consumption
- Quick-connect plugs for easy installation
- No downloads or adjustments required
- No dyno tuning required
- Work in conjunction with factory and race tuner downloads
- Quicker throttle response on TBW models
- Made in the U.S.A.

**O<sub>2</sub> SENSORS**

- Precision manufactured with a ceramic body made of stabilized zirconium dioxide, surface coated with gas-permeable platinum electrodes and a porous ceramic to help prevent erosion due to contamination and particulates in the exhaust gases
- Slow reading oxygen sensors can cause a drop in fuel economy of 10-15%, excessive exhaust emissions and poor drivability
- Life expectancy of an average oxygen sensor in a properly tuned engine is typically 30,000-50,000 miles
- Narrow band O<sub>2</sub> sensors available in 12.5", 16.25" and 22.25" overall lengths
- Replacement Wide Band O<sub>2</sub> sensor for aftermarket ignition tuners also available; overall length is 30.25"
- All sensors meet or exceed OE specifications
- Made in the U.S.A.

**SUPER E AND G SHORTY CARBURETOR KITS**

- Each carb kit includes a natural finish S&S Super E or Super G gas carburetor (unless noted) with updated fuel delivery pots and idle screw, S&S teardrop air cleaner assembly, manifold (unless noted), mounting hardware, fuel line, clamps, overflow line, one extra intermediate jet and two main jets, VOES tubing (when applicable), installation and jetting instructions
- Super E has a 1.875" throat at the butterfly and a 1.5625" venturi and is recommended for use on Big Twin or Sportster engines up to 100-cubic-inch
- Super G has a 2.0625" throat at the butterfly and a 1.75" venturi and is recommended for use on 90-cubic-inch and larger high-performance and modified engines
- Super G is not recommended for smaller, lower compression engines
- If there is a doubt as to which carburetor to use, we suggest the 1.875" Super E
- Individual carburetors also available
- Made in the U.S.A.

**NOTE:** S&S Super E & G carburetors require the use of a two-cable, pull open/pull close throttle assembly; S&S kits are compatible with stock cables except as noted.

**BRAIDED HOSE CRANKCASE BREATHER KIT**

- This kit provides the best looking alternative to black rubber hoses when mounting a crankcase breather system
  - Features a 3/8" i.d. stainless steel braided hose crimped onto chrome banjo fittings
  - Outlet side of assembly is long enough to custom-route the hose and mount the breather filter in an inconspicuous location
  - Includes breather filter (with mounting stud), hardware and instructions
  - Air cleaner and carb support bracket must be purchased separately
- NOTE: Not recommended for stock applications. Make sure the braided line does not contact anything (i.e. the gas tank, carb or wiring) as damage may result.**

**AIR CLEANER BREATHER KIT**

- Enables the mounting of most aftermarket air cleaners to late-style engines that breathe through the cylinder heads
- Fittings can be rotated 360° so that hoses can be routed as necessary
- Hose sold separately

PART #	DESCRIPTION	SUG. RETAIL
<b>DS289118</b>	For 93-17 Big Twin custom applications only	<b>\$79.95</b>

**KURYAKYN**

**CHROME CRANKCASE BREATHER**

- With this breather, as oil-laden air condenses in the breather body, the excess oil now runs back down into the engine rather than into the air cleaner
- A really clean setup

**NOTE: Not for use on fuel-injected models.**

PART #	DESCRIPTION	SUG. RETAIL
<b>1012-0200</b>	For 07-17 XL	<b>\$36.99</b>

**KURYAKYN**

**BLUEGRASS BREATHER KITS**

- Kits route the vented gases upward so gravity can keep any expelled oil droplets back into the engine instead of down the sides of the bike
- Vent line can be run up or out, into an optional catch tank (available separately, PART #1012-0217)
- Include vent hose and fittings

PART #	DESCRIPTION	SUG. RETAIL

**AIR CLEANERS**

- Original S&S teardrop air cleaner assemblies
- Include an S&S cover, backing plate and high-quality filter element and hardware kit
- Increase horsepower with no other changes
- Available for most OEM carburetors and S&S performance intake systems
- Made in the U.S.A.

NOTE: Installation of an S&S air cleaner may require re-jetting or engine re-tuning, however tuning within the OEM emissions standards is required to maintain E.O. validity.

NOTE: Some applications exempt per CARB EXECUTIVE ORDER (E. O.) No. D-355-17. E.O. applies 01-16 EFI models only.

**SUPER STOCK™ STEALTH AIR CLEANER KITS**

- For stock and S&S fuel system applications
- Kits include backing plate, filter and hardware
- Built-in stinger cone directs air smoothly into the bore of the carburetor or EFI throttle body and reduces turbulence and increases flow
- Optional high-flow (1" taller) filter and pre-filter/rain sock also available
- Made in the U.S.A.

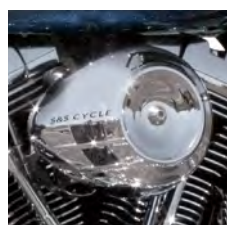

NOTE: Kits do not come with covers. Must use with stock Twin Cam 88®, 96™, or 103™ "football-style" air cleaner cover, or can be used with S&S Stealth air cleaner covers (sold separately). Use PART #1014-0225 adapter to install stock cover on 14-16 Touring bikes.

NOTE: Some applications exempt per CARB EXECUTIVE ORDER (E.O.) No. D-355-17. E.O. applies to 01-16 EFI models only.

NOTE: Stealth air cleaner kits for 01-16 EFI applications come with a special sticker and instructions for applying it to an inconspicuous location on the frame.

**"BILLET SUCKER" AIR CLEANER ASSEMBLIES**

- Available in Stage I and Stage II
- Stage 1 kits give the option to use either your OEM air cleaner cover or to install an Arlen Ness custom cover
- Stage 2 kits feature a 20% larger filter element over Stage 1 for even more airflow and require the use of a custom outer cover
- Both feature an oversized exposed filter design for tremendous airflow
- One-piece aluminum backing plate with patented hidden breather technology and radius air inlet for maximum airflow
- Breather passages exit at the mouth of the carb/throttle body, creating a virtually closed-loop system
- Eliminates the need for any external banjo fittings, hoses, and breather filters for an ultra clean look
- Kits include a high-flow air filter, chrome outer cover, chrome backing plate/support bracket and all necessary hardware
- Made in the U.S.A.

**BIG SUCKER™ STAGE I AIR FILTER KITS WITH COVER**

- One-piece aluminum backing plate features patented hidden breather technology
- Each hidden breather is o-ringed at the heads and exits at the mouth of the injector/crab to provide efficient engine breathing, eliminating the need for any external hoses or hardware
- Radius air inlet provides maximum performance by providing unobstructed airflow
- Backing plates are available in Standard, black powder coat, or chrome finish
- Kits are available with standard red or synthetic black filter elements
- Standard red filters are pre-oiled, washable and feature four-layers of surgical grade cotton for optimum filtration and maximum airflow
- Synthetic filters feature a black synthetic material that is water resistant and never needs to be oiled; just wash and re-use
- All kits include high-performance filter, backing plate and steel outer cover
- All necessary hardware and instructions are included with each kit

NOTE: Kits with Synthetic filter are exempt per C.A.R.B. ref. E.O. # D-639-4, Exhibit A.
