Intel® RSTe

Intel® RSTe (also known as Intel® Rapid Storage Technology-Enterprise) is an embedded software RAID solution based on the Intel Chipset RAID Stack for on-server board SAS and SATA ports. It provides pass-through drive support as well as host based RAID 0/1/10 support and RAID 5 support for the SATA ports.

Intel® ESRT2 (LSI*)

Intel® ESRT2 (also known as Intel® Embedded Server RAID Technology 2) is an embedded software RAID solution based on the LSI MegaRAID* Stack for on-server board SAS and SATA ports. It supports RAID 0/1/10 and optional RAID 5 with the proper Intel® RAID C600 upgrade keys (must be purchased separately).

Intel® Integrated RAID Modules

Intel® Integrated RAID Modules connects to the on-board SAS Module Connector or a module enabled PCI-E slot. This is a cost-effective RAID solution providing more system design flexibility.

Must be purchased separately

RAID Adapters

Standard SAS or RAID HBA available from Intel® or 3rd Party suppliers. See Intel® Server Configurator Tool (<http://serverconfigurator.intel.com>) for the most up-to-date adapter support list for your system.

Must be purchased separately
