## Welcome to Larson's Lost River Livestock 14th Annual Production Sale

Welcome to our 14th Annual Production Sale. We are honored that you will consider us as your seedstock supplier. Again, we appreciate all past, potential, and future buyers. As we continue to push on the flywheel of progress, it turns a little easier every year. Each sale season we see new and repeat commercial bull and heifer buyers. Our fellow seedstock producers are also taking note and sales in that arena continue to grow. I believe our success is in large part due to a relentless pursuit of the contemporary genetics the market demands. There are three words that describe our goals, and this year's sale offering: consistency, quality, and longevity.

This is perhaps the most consistent set of bulls we have ever produced. While there are certainly standouts in all three breeds, we strive for the last bull in the catalog to sire calves equally as profitable as the first. The group of bred heifers is also very uniform and will be a super set of cows. The quality of these cattle continues to improve. Gelbvieh cattle have come a long way since the mid 80's, both in terms of performance on the rail and in eye appeal. Stop and see for yourself. Our bulls rank in the top 44% for calving ease, top 31% for marbling score and top 24% for post weaning growth (YW). Longevity is also especially important to us. We have a very youthful cowherd at this point, but that is only because we challenge our cowherd to be better and are ruthless in our culling decisions. This group of bulls is the leanest set we have produced. Since the early winter was so warm, they were fed on a large pasture and got a lot of exercise. Consequently, they will likely cover more cows and last longer in your pasture.

Please join us on Saturday February 24, 2024 on the farm. We had the opportunity to move our sale date to a Saturday and we took it, so please note the sale is a week later than years past. We have an open house the preceding Saturday for those of you who can't make it sale day and visitors are welcome at any time before the sale as well. We look forward to seeing you on the 24th.

Dan and David Larson

### Larson's Lost River Livestock 2024 Sale Day Drawing

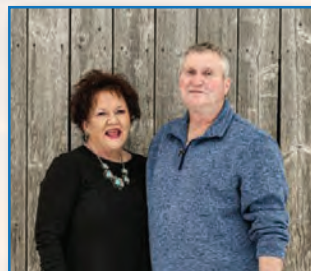

Everyone present at the sale who registers for a bidder's number will be entered to win a Pneu-Dart Air Pump Rifle at the conclusion of the sale. Must be present to win.

# 14th Annual Production Sale

**NEW SALE DATE**

**Saturday, February 24, 2024 2:00 pm (CT)**  
**At the Farm, Clearbrook, Minnesota**

**Open House - Saturday, February 17, 2024 - All day at farm**

## SALE DAY PHONES

David cell 218-766-3323  
Dan cell 402-560-4052  
Mark cell 218-766-3690  
Matt cell 701-371-8305  
Chris Mitchell 334-695-1371

## AUCTIONEER

Eddie Burks, Park City, KY 270-991-6398

## DIRECTIONS TO SALE FACILITY

3 miles south of Clearbrook on Hwy. 92 and 5 miles west on Hwy. 18 or 10 miles east of Fosston on Hwy. 2, 4 miles north on Hwy. 7 and 3/4 east on Hwy. 18

## SALE FORMAT

The auction will be held in a heated building, with video monitors set up and each animal's video played while the animal sells. There will be no live lots in the building. All lots will be penned outside for viewing prior to the sale.

## VIEWING OF CATTLE

Cattle will be available for viewing at the ranch anytime prior to sale day and on sale morning starting at 9:00 am.

## VIDEOS AND SUPPLEMENTAL DATA

Videos will be posted online at [www.lostriverlivestockmn.com](http://www.lostriverlivestockmn.com), [www.mms.bz](http://www.mms.bz) and [www.dvauction.com](http://www.dvauction.com). Current weights, scrotal circumferences, carcass data and any other supplemental data will be posted the week before the sale.

## ONLINE VIEWING AND BIDDING

The sale will be broadcast live online with DV Auction. [www.dvauction.com](http://www.dvauction.com) See page 3 for more information.

## LIVESTOCK PRESS REPRESENTATIVES

Andrew Swanson, Farm & Ranch Guide 507-829-4133  
Kelly Schmidt, Special Assignment 406-599-2395

## SALE DAY LUNCH

11:00 A.M. on sale day

## LODGING

LePier Lodge, Fosston, MN 218-435-1088

## HEALTH

Bulls and heifers have received all common calffood vaccinations. See page 2 for a more detailed breakdown of fall 2023 vaccinations.

## TRANSFER OF REGISTRATION PAPERS

Registration papers will be transferred to the buyer on all registered animals.

## INSURANCE

We recommend everyone insure any animal left at our farm after the sale date. We can recommend multiple options for insurance depending upon the level of risk you want to assume. Due to the nature of livestock, we will not be held liable for the death or injury of any uninsured animal left in our care after the sale date.

## TERMS AND CONDITIONS

Each animal will be sold to the highest bidder. The auctioneer will settle any bid disputes. Animals must be settled for on sale day with cash or check. All animals are the purchaser's risk as soon as sold. Anyone attending the sale does so at their own risk. Lost River Livestock, sale management and/or sale staff will not be held responsible for any accidents, injury, damages or stolen items. Lost River Livestock will retain a 50% semen interest in all bulls sold.

## ANNOUNCEMENTS

Any necessary corrections to the sale catalog will be made sale day. Announcements made sale day and from the auction block take precedence over any printed material in the catalog or otherwise associated with the sale.

# Larson's Lost River Livestock Sale Information

## LRL Discounts

**Total purchases of \$15,000 or more qualify for free nationwide trucking to central locations**  
**5% discount on purchases of 4 or more bulls**  
**\$50 discount on all bulls hauled within 5 days of the sale**

### DELIVERY AND BOARDING OPTIONS

BULL buyers will have the choice of selecting ONE option from the following list.

1. \$50 off the purchase price of bulls taken home within 5 days of the sale.
2. Delivery options available based on the map on page 3. Deliveries will start as soon as possible after the sale.
3. Free keep until May 1, 2024. Bulls remaining at our farm after May 1, 2024 will be charged \$2/day yardage. Delivery options are available if this option is chosen but trucking costs will be the responsibility of the buyer and will be based on distance from the farm.

All females must be taken home within 5 days of the sale unless arrangements have been made with Lost River Livestock.

### BREEDING GUARANTEE

All bulls are guaranteed as reproductively sound and females are sold as bred. The guarantee does not extend to non-reproductive injuries sustained between sale date and turnout. We strongly encourage all purchases to be insured. For bulls, in the event of unsatisfactory breeding performance during the first breeding season, either a replacement animal or a future sales credit will be provided with the defective animal is returned to the seller in good health and acceptable body condition or a bull of sale for the culled animal is presented to the seller. All disputes must be presented on or before November 1, 2024. All females sold as "safe in calf" will be examined and declared bred by a licensed veterinarian within 3 weeks of sale date.

### BULL PREPARATION, FEED PROGRAM AND

#### AVERAGE DAILY GAIN

Bulls were fed a forage-based ration designed to target 3.25 lb/day gain. The test was conducted for approximately 90 days and the bulls exceeded their expected performance even through some unseasonable conditions. Please refer to the page 3 to learn more about our bull development strategies this year. All bulls left on the farm after sale day will be placed on a lower energy diet to harden up prior to pasture conditions. We encourage all buyers taking bulls home before turnout to continue to feed the younger bulls appropriately to ensure continued growth and development.

### Purchases made on DVAuction

If you make a purchase through DVAuction, Larsons Lost River Livestock will send out invoices. DVAuction does not handle invoicing. Please contact Calli Larson at (701) 430-6868 after the sale with any questions about payment.

### CALVING EASE RANKING

Calving ease rankings are listed for all bulls in the sale book. The recommended calving ease for each bull in the sale is based on the recommendations below.

- 1: for use on cows with little to no calving difficulties under standard conditions.
- 2: for use on cows with little to no calving difficulties under standard conditions.
- 3: for use on young cows and mature cows with little to no calving difficulties under standard conditions.
- 4: for use on growthy heifers with little to no calving difficulties under standard conditions.
- 5: for use on heifers with little to no calving difficulties under standard conditions.

### INTERNATIONAL PURCHASES

We are experienced with exporting cattle and will work with any buyer to expedite the process in a timely manner. All purchases are for bid price in US funds. Buyer is responsible for all exporting expenses. Please use the following information for your import permit:

### LRL VACCINATION PROGRAM

#### Spring Bulls

At birth: Nasalgen III, Calvary 9, Type A Clostrial, Bose  
At one month old: Vista Once  
May 2023: Vision 8  
August 2023: Vista Once, Calvary 9, Ivermax pour-on  
September 2023: Bovi Gold 5 L5, Cydectin pour-on  
January 2024: Vision 8, Ivermax pour-on

#### Fall Bulls

At 2 months old: Vista Once, Vision 8, Ivermax pour-on  
February 2023: Vista Once, Vision 8, Promectin pour-on  
March 2023: Bovi-Gold 5, Promectin pour-on  
January 2024: ViraShield 6 VL5, Vision 8, Ivermax pour-on

#### Bred Females

August 2023: ViraShield 6 VL5, Vision 8, Intersect Gold  
November 2023: ScourBos 9 (dose #1), Ivermax pour-on  
January 2024: ScourBos 9 (dose #2), Fusogard, Ivermax pour-on

# Some background about the LRL bulls and our selection process

If you study the data provided on the bulls in the sale book you can see our average bull can provide strength in several different stastical categories. And there are also bulls within the group that excel in specific areas such as calving ease or growth. However, we don't rely solely on EPDs to make our selections; we try to use them as a tool in a broad approach to produce the best bulls we possibly can.

Our selection process starts with our breeding strategy and how we determine to mate our cows with sound and functional bulls that compliment them on a phenotype basis as well as on an EPD basis. Then, once calves start hitting the ground, we can evaluate the actual bull calf. At birth, we start with an evaluation of their dams based on udder quality, feet, and disposition. We strive to eliminate as many problems as possible starting with our mama cows and anything we see as a problem is sent to our commercial herd where they can raise embryo transfer calves or feeders. Any bull calf born out of a cow we see as a problem is put on the cut list. Also, birth weight and calving ease is recorded and any bull calf with a large birth weight or a difficult birth is put on the cut list. Next, we closely watch these bulls over the summer as they develop so disposition and overall conformation can be evaluated. We are striving to produce bulls with sound and attractive conformation, depth of body, width, stoutness, and overall power. When we wean, underperforming calves, calves with poor dispositions and calves that don't meet the eye test are cut, as are anything that has previously been put on the cut list. About a month after weaning, we again evaluate the bulls based on disposition, performance and confirmation and then make another cut. The final cut comes when our veterinarian performs breeding soundness exams prior to the sale and any bull that shows significant issues that will likely prevent him from settling cows during the breeding season is culled.

So in conclusion, the bulls that make it to sale day represent the top 45% of all the bull calves born here in a given year and have jumped through many hoops to do so. Not to say we have eliminated all problems from our herd or this group of bulls, but we have done everything we can to provide you with a sound, functional, quiet and healthy set of bulls ready to breed your cows and produce easy calving and growthy offspring. If you have any questions about our management or selection process, please don't hesitate to contact either David or Dan.

---

## LRL 2024 Bull Development Strategies

### SPRING BORN BULLS

The warmer than average temperatures, including numerous stretches of wet weather, kept our bulls out of the main lots to keep them clean. They stayed out on pasture until January 5 when the pens froze up and were no longer at risk of turning into a mud pit. They stayed clean and healthy, but their intakes tended to vary based on grass intake and to a greater degree, the wild swings in temperature. As a consequence, our bulls didn't gain quite as well as they have in previous years on test. However, we will present you with a hard, very physically fit group of bulls. While they are a touch greener, they still weighed on average 25 pounds heavier than last year's bulls at the same time in mid-January.

Those gains in performance over last year can be traced back to a number of different factors:

- Excellent early calf health during the trying months of April and May.
- Timely rains during a drier than normal summer helped us in 2 ways:
  - o Enough grass to avoid needing to supplement cows or calves.
  - o Drier grass with a high nutrient density led to good cow body condition scores and increased weaning weights.
- The most important factor in increased performance is using genetics from the top of the genepool, pushing our performance higher while not sacrificing calving ease or maternal traits. This added to the performance of our calves which will in turn add pounds and value to our customers calves because at the end of the day, we are only as successful as the producers who use our genetics.

### FALL BORN BULLS

Our fall born bulls have been developed more slowly than our spring bulls because their added age makes this development strategy very easy to implement. They are born on grass with no assistance, nurse the cow while eating TMR at her side and are supplemented with second crop dry hay during the coldest winter months, weaned in March and then are placed on a slow growth ration until summer grass is available. During the summer, they roam the pastures around the main farm getting plenty of exercise and staying lean. This last summer we opted to hand feed these bulls about 5 lbs of a corn/oats/DDGS mix to help interact with them on a daily basis, which has led to really good dispositions. This fall, starting in October, these bulls were slowly introduced to the spring bull ration and that's what they've been on since.

They have been culled through on 4 separate intervals for all of the necessary factors: performance, disposition, foot structure, confirmation and fleshing ability. We feel this is the highest quality group of long yearling bulls we have produced to date and as they will be 20-22 months old at the time of turnout this summer. They will be able to cover a greater number of cows, saving you significant bull resources that can be devoted elsewhere.

# LRL Bull's Average EPD Percentile Rank

There are two ways to rank bulls you intend to buy, within a herd and between herds. Within our herd, the ratios we print allow you to rank bulls on their own performance. Take weaning weight for example, a bull with a ratio of 105 means his own weaning weight was greater than the average in our herd.

However, compared with EPD's, the ratio doesn't do a great job predicting how his calves will perform. This is where EPD's come into play. Using the weaning weight example (WW), a bull with a WW EPD of 75 should produce calves that wean off 7 lb. heavier than the average bull within the breed, because the average WW EPD in the Gelbvieh breed is 68. As a result, when studying the EPD's in this catalog, the fact many of our bulls rank above, or well above, breed average means they will produce more pounds and make you more money on your calf crop.

To summarize the data, we will compare it to the last 2 years of percentile rankings. Compared to the last 2 crops of bulls, the bulls on this year's sale moved closer to breed average for calving ease traits while significantly improving for growth traits and remaining steady to improving for carcass traits. Maternal traits remained steady while our milk production EPD's continued moving towards breed average which we have made a concerted effort to achieve over the last few years.

These bulls represent a detailed vision of producing cattle where we strive to minimize calving difficulties while pushing for increased performance in real world conditions. We also keep in mind many producers retain replacement females so strong maternal traits are a priority in our breeding philosophy with udder quality, foot structure and overall longevity being factors we place a great deal of emphasis on. Another important factor leading to cows staying in the herd for many years is keeping milk production of those females at reasonable levels. For us, too much milk can be just as big of a problem as too little because a cow that milks herself down to nothing in the first year or two of production and then comes open is a huge loss to a producer's bottom line. These cattle need to be working for us, not the other way around and we are constantly trying to make them more suitable for our customers while increasing the return per acre for producers using our genetics.

## LRL Gelbvieh/Balancer Average EPD Percentile Rank

CE	BW	WW	YW	M	CEM	HPG	PG30	ST	YG	CW	RE	MB	FPI
46%	62%	23%	26%	33%	40%	38%	26%	50%	38%	37%	32%	46%	33%

## LRL Red Angus Average EPD Percentile Rank

34%	39%	35%	30%	48%	29%	37%	35%	84%	21%	58%	18%	19%

## Genomic Enhanced EPDs

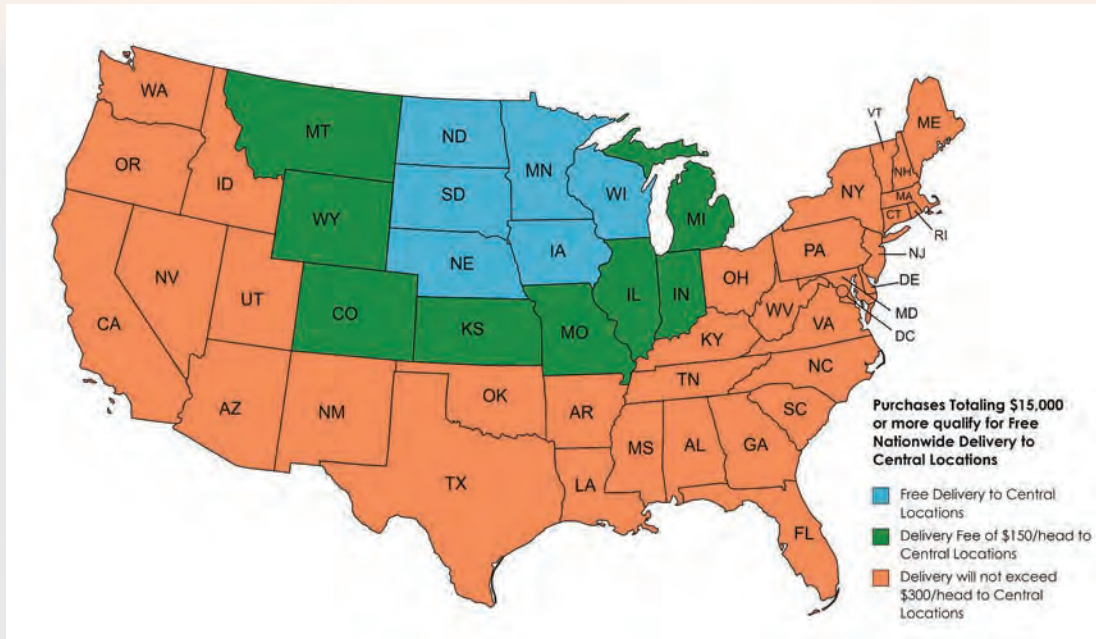

All cattle selling with Genomic Enhanced EPDs have the GGP logo located at the top right of each respective pedigree. DNA testing is a huge priority in our program to better help the buyer with selection process of the animals in the sale. It also helps us with our genetic progress and breeding selections for future animals offered in our annual production sale.

In addition to the pedigree, performance and progeny data utilized to breed the best and most prolific cattle we can, the Genomic Enhanced EPDs (GE EPDs) add reliability and accuracy to an animals EPDs to offer another selection tool to the sale offering. The DNA testing verifies the genetic merit and predictability in all breeds of cattle.

The true breeding value of animal is not 100% known, however with the advancement of GE EPDs, it does give us a strong indicator of what to expect from the genetic values of the cattle. The GE EPDs give us a fair evaluation and comparison of animals within the same breed to help breeders make a selection of animals that will fit best in a breeding program. Comparisons should be made Gelbvieh/Balancer to Gelbvieh/Balancer, Red Angus to Red Angus and Simmental to Simmental within this sale book.

Welcome to the 14th Annual Larson's Lost River Livestock Annual Production Sale. 2023 was a year for the record books, selling bulls to many top seedstock producers and larger commercial producers throughout the U.S. The quality of LRL bulls is becoming one of the strongest in the Gelbvieh/Balancer breeds with some of the top genetics at the highest of quality.

The 2024 sale offers a wide range of genetics that continues to produce quality at the highest level with more advanced data and predictability than previous sale offerings from Larson's Lost River Livestock Production Sale. LRL continues to use top AI sires and an extensive embryo transfer program to produce a product that excels in all facets of the industry. As you study the bulls you will find these bulls represent calving ease, performance, high carcass values and eye appeal. I take the opportunity to get through the cow herd every year to see the dams and sisters to these bulls and females selling. The factories you find in the pastures here are truly amazing females with high volume, soundness and milk that converts to the calves.

The selection criteria is as strenuous as any in the country. Only 45% of the bulls born at LRL make the sale. Take time to read the selection process on page 3. The strategic plan to produce better quality in each next year is working here with the hard work, culling and planned breeding as you will see in the sale offering.

When you purchase a bull or female from LRL, you are getting the program with a high quality product. Past sale offerings are working for breeders nationwide with excellent success. These bulls and females are bred to acclimate and work in many weather climates with very little maintenance. We are proud of the success breeders are having with the LRL product. Seedstock and commercial producers are giving us reports throughout the year of the success they are having with Larson's Lost River Livestock genetics.

Feel free to call or text with for any updated information or an evaluation of any animals in the sale offering.

Sincerely,  
Chris Mitchell  
MMS

JOB Danell Pay Pal 12H Sire of lots 1-16

As always, we try to select one of our most impressive and balanced bulls to represent the title of being “Lot 1” and we feel Sundown L130 is that bull. From an early age, he displayed the power and stoutness Pay Pal progeny have become known for and he always knew he was a pretty cool dude. As he’s grown and matured, he’s maintained that same level of thickness and width while developing the other traits necessary to become a top end herdsire prospect. He’s very athletic on the move, easy to handle and is soft made for a high percentage purebred Gelbvieh bull. His dam is also a top producer for us, entering our donor pen this past spring and featuring an outstanding lifetime WW ratio of 108 on 6 calves. All of her sons have made our past sales and all of her daughters have been retained as replacements. And as she stems from the Nellie line of cows, you can rest assured she has the utmost level of maternal strength. When you add all of those traits together, you get this powerful stud and we can’t wait to share him with you.

## Larson's Lost River Livestock Spring Gelbvieh Bulls

Here's a couple of bulls we are extremely excited about. Both of these bulls are full brothers to our second high selling bull last year, LRSF Voyageur K182 who sold for \$22,000 to Lone Oak Cattle in IA. With that sort of value already being produced by this mating, don't miss out on adding one or both bulls to your rotation for some added punch and eye appeal. And don't forget about their tremendous donor cow, Rylee F71 ET. F71 has been as close to a no-miss cow as we've ever had and I think even if we bred her to a goat, we'd get a pretty good calf just because of her unmatched maternal potency. In her lifetime, she's produced 6 bulls, all making our sale and most being sale features. Check out her natural twin bull calves as lots 30 & 31 and even as she had natural twin bull calves this past spring, we conventionally flushed her on June 9, she produced 7 grade 1 embryos and bred back AI on her first cycle after being flushed. Every sign with this cow points to greatness so don't miss out on the opportunity to add her and Pay Pal to your herd.

## Larson's Lost River Livestock Spring Gelbvieh Bulls

Another set of full ET brothers sired by Pay Pal and out of another outstanding donor of ours, Melanie A20. We unfortunately lost the A20 cow this past spring to a heart infection so these 2 bulls will be her last to sell but man did she save some of her best for last. Both bulls are long bodied, clean fronted and have a really cool design which was what A20 did the best. She was the epitome of what a cow should be; elegant, perfect footed, sound uddered and maintained an outstanding track record of production. She has a very distinguished list of progeny including 7 bulls making our sale and 8 daughters being retained as replacements, 1 of which sold for \$10,750 on the 2022 ND Golden Rule. These two sons of hers will make an outstanding set of female producing bulls while not sacrificing growth.

Mama Tried L156 is a full brother to our lead-off bred heifer, Rylee K224 and with a female like her backing up this bull, you can bet he's going to produce some outstanding daughters while siring long, stretchy bull calves. And as a purebred Gelbvieh herdsire prospect, his versatility of use in making purebreds or Balancers will pay significant dividends especially when you factor in his added frame size and length of body combined with his outstanding numerical values of top 4% WW, 5% YW, 20% CW, 3% REA, 10% MARB and 2% FPI all while remaining at breed average for CED.

Here's yet another Pay Pal son with the added frame, power and length of body needed to produce heavy, eye appealing calves that will put more dollars in your pocket when it comes to time to sell his progeny. Walk the Line L145 can do all of these things while not causing problems at calving which is what we're really striving to do with our breeding program. This guy's dam is a cow that really sorts herself towards the top of herd for maternal strength. She's produced 2 excellent replacement females with her last 2 calves and is a daughter of one of our top donors, Arianna 77B.

Silver Wings L177 is out of a really promising young cow who has hit it out of the park with her first 2 calves. L177 is a maternal brother to lot 27 in last year's sale, a bull we retained to use back on our black heifers. You'll see his service on several of the females selling and we're very excited about what he brings to the table. L177 does a lot of the same things as his brother in terms of profile as you can see from his picture, he's an absolute stunner of a bull. And then when you add in the power and muscle of Pay Pal, you really get a special sort of bull.

Pay Pal strikes again with a bigger framed, tremendously powerful bull that is absolutely going to put pounds on calves while remaining adequate for calving ease, which can be seen with his 14 for CED. Branded Man L68 really shines in terms of overall performance and like many of the other cattle in the sale is backed up by a really solid mama cow, Blackstar C28. C28 is a 2-time Dam of Merit award winner, maintains absolutely perfect feet and a nice tidy udder.

60	85	20	30	50	25	60	20	15	60	15	75	50

Guitar Town L84 is a very well-balanced Pay Pal son tracing back to our Melanie A20 donor, who is the donor dam to lots 6 & 7 in this sale. Refer back to those lots to read about many of A20's accomplishments but one of her best daughters might just be the dam of this guy. The F208 female has been a really strong producer for us producing 2 bulls that both made the sale and 2 daughter who were both kept as replacements. One daughter is actually the mother of another bull in this sale lot 28. If you're looking for top end maternal strength, make sure to give this guy a hard look.

25	80	35	40	4	10	30	85	10	60	30	80	55

As you can see from his picture, El Paso L108 is a very striking individual from the side profile but don't think he's a 1 trick pony, he's equally as impressive when you get behind him and see the patented Pay Pal thickness and dimension. He's very athletic on the move and as he stems from the line of Nellie cows, you can bank on maternal superiority of the cows on the bottom side of his pedigree. His dam is also an up-and-coming producer for us raising a bull who sold last year to Jason Morris of Little Falls, MN.

It's beginning to become a theme here early in the catalog, but with Highwayman L173 we have another stout Pay Pal son backed by an outstanding cow with a very strong production record. Her last 3 sons have all made the sale with the first selling to Dean Speck of Bemidji in 2022, the second going to Bryan Grove of Thief River Falls in 2023 (K132 photo adjacent) and the third being L173 in this sale. That sort of consistency is what we strive for and as you study the rest of the catalog, it hopefully becomes evident with other bulls and their respective dams.

Wagon Wheel L75 is one of the few heterozygous polled bulls in the offering and it was such a bummer when that result came back. L75 is one of the top bulls in the pen when it comes to his physical traits; he possesses a very desirable blend of attractiveness from the side combined with tremendous power and dimension. He's one of the most easily identifiable bulls in the pen and I often find myself studying him and appreciating him from a different angle each time he passes by. He's definitely going to add pounds to calves while making them eye appealing and stout.

10	65	1	1	20	1	10	4	85	4	40	20	1

In our bull selection process, we try to use all of the tools in the toolbox; a bull's actual performance, his overall conformation, his dam's feet, udder and production ability and the strength of his EPDs as a whole. We feel this guy does maybe as good of a job as any we have and he has a ton of good to offer the Gelbvieh breed. Plato L174 really puts the pieces together from his BW ratio of 97, to his WW ratio of 113, to his young dam's stellar production record and sound design, to the strength of his EPDs, he's a bull that sorts himself towards the top of our group. If you take his EPDs against the rest of the Gelbvieh breed, he's the only active purebred Gelbvieh bull in the entire database with his combination of CED, WW, YW, STAY, CW, REA, MARB and FPI. The only thing that matches the strength of his individual EPDs is his balance between them. Don't miss out on adding this truly unique breeding piece to your operation.

Tiger L100 comes to you as a maternal brother to our all-time high selling bull, Dynamic J164 who sold back in 2022 for \$38,000 to J&K Gelbvieh of IL and Coles Bend Cattle Co. of KY. The traits that made Dynamic valuable are some of the same that make Tiger L100 a very interesting breeding piece. Tiger features top 10% CED, 20% WW, 10% YW, 10% CW, 1% MARB and is one of the few purebred bulls who has an FPI value over 90, putting him beyond the top 1% of the purebred Gelbvieh gene pool. And when you analyze his EPDs as a whole, he is 1 of 3 purebred Gelbvieh bulls born in 2023 who can match his combination of CED, MARB and FPI. He's a bull that can really do it all and will have some friends come sale day.

Our second Just Do It son, Jordan L80 is as long bodied as you can make one and backed by an outstanding Leverage daughter. His dam raised our lot 1 bull in 2022, selling for \$8000 to Ledgerwood Gelbvieh of WA and from what I've been told by Samee, he's continued to improve and thrive in their range conditions. He's gotten his cows bred, maintained condition and remains very sound and eye appealing. Expect similar things from this guy and don't miss his outstanding blend of EPDs led by top 1% CED, 20% BW, 25% MARB and 20% FPI.

**LRSF High Life H64** Sire of lots 19 - 20

Our lead-off High Life son, Genuine L59 is a special bull. The amount of middle this guy features is extremely difficult to compete with but don't think of him only as a belly dragger. When you get behind him, he's square off his hip, wide set and comes down on a wonderful set of feet and legs. He's as calm as you can make one and was raised by an outstanding cow who has stood the test of time. She's coming 11 years old and this guy marks her fourth son to make our sale. She remains absolutely perfect footed and for a cow of her age, her udder has maintained strength. Genuine L59 is our best High Life son to date and as a 5-star calving ease prospect with top 2% WW and top 10% YW, you can be assured he's going to produce the kind of progeny that are easy to calve out, easy to make grow, easy to handle and easy to market. He's "genuinely" an easy choice to use in your herd.

**DDGR Abby 3A** Dam of lot 19

Another son of the powerhouse High Life bull, Miller L43 really shines when it comes to the maternal prowess of his cow family and his individual performance traits. His dam is a lovely first calver out of a terrific 8-year-old cow who is a 2-time Dam of Merit winner. That cow has been a solid producer for us landing 1 bull in the sale and 4 daughters in our replacement pen. When you combine that maternal strength with L43's top 10% growth EPDs, you should end up with heavy calves across the board with excellent daughters.

More than ever, the market is currently rewarding high performance cattle that grow fast and hang a heavy carcass. If you're looking for an option to add frame, power and high rate of gain to your calves, make sure you put Roadrunner L21 on your list. When we weighed bulls in mid-January, he was the heaviest spring bull in the pen by nearly 50 pounds and was within the top 5 bulls for ADG over the last 3 months. And he can back up his incredible performance on paper as well with an outrageous combination of top 35% CED, top 1% WW & YW and top 5% FPI, a feat matched only by 4 other Balancer bulls who will sell this spring. He's a bull we think the world of and can't wait to share him with you.

Sidewinder L101 marks the last calf out of a tremendous cow, Sarah B46. B46 was stifled right before calving last year but was still able to raise this tank of a bull over the summer. If she hadn't gotten hurt, she'd most definitely still be in our herd because her recent production record had been outstanding, landing sons with Joel Stenseng of Clearbrook in 2021, Jerry Larson of Hines in 2023 and this stud with her last calf. Look for Sidewinder to be very useful on a set of heifers and produce eye appealing daughters with added maternal strength and longevity.

Zeus L25 is our lone Patriarch son this year and I really wish we had more bulls out of this breed leading sire. Patriarch has been the top selling bull for ABS in both 2022 and 2023 and it's easy to see why. His high accuracy calving ease, muscular progeny, beautiful daughters and ability to sire cattle with outstanding foot quality are all extremely valuable traits. Zeus L25 fits that mold and as an added benefit, he's homo black, homo polled and Top Dollar qualified. He'll give you the 5 star calving ease, solid growth, excellent daughters and highly valuable feeders that will add profitability to any operation.

An absolute tank, Blitz L236 brings a ton of mass and density to the table in a compact package. If you're looking to add some width and depth of body to a group of calves, give this guy a hard look. He's built much the same as his maternal brother who sold last year for \$8,500 to Ertel Cattle Company of MO and from all reports has adjusted very well to his new environment and did a terrific job breeding heifers. Don't miss out on this guy's strong carcass EPDs either as he ranks in the top 10% for CW, 10% for MARB and 25% for FPI all as a homo black, homo polled purebred Gelbvieh bull.

While one of the youngest bulls in the offering, Hail Mary L237 doesn't give up any ground to the older bulls in the pen. He has the frame, muscle and depth of body to compete with any and when you factor in his performance data, he really impresses. 111 WW ratio, top 35% WW & YW, top 35% CW, top 15% REA, top 10% MARB and top 20% FPI. And just like many other bulls in the sale, his dam has been a strong producer for us landing her first calf in our bull pen, selling in 2021 to Rick Stormo and she's also the dam to bred heifer lot 80 in this sale.

Guinness L116 comes to you as a full brother to our all-time high selling red bull, Chevelle J112. When a cow can produce a calf like Chevelle, you know she's good; when she can produce 3 full siblings who all excel in terms of phenotypic excellence and genotypic strength, she's elite. We first mated the B40 cow to Finnegan back in 2019 and she produced a very attractive, very productive daughter who has already raised a sale bull and one of our top replacements born in 2023. Then B40 raised Chevelle who sold for \$14,500 in 2022. And now she brings you Guinness L116, another high-quality individual in a long line of excellent progeny.

Just like a bull before him in this catalog, Shamrock L87 has a full brother who previously sold to another seedstock producer. His full brother sold last year to Chris Muegge of IN and just like the Guinness L116 bull earlier in the catalog, L87 is a Finnegan son backed by a productive cow who has a knack for landing sons in our sale. His dam is long bodied and attractive, very sound footed and sets down a perfect udder year after year. And when you add in the female producing ability of Finnegan, you end up with a bull who is going to sire some extremely valuable daughters.

Dublin L38 is a really interesting breeding piece. First off, his dam is an outstanding young Gunner daughter out of a beautiful cow we purchased on the Schroeder Ranch dispersal. The W960 cow was a picture-perfect mama cow with superb foot structure and a wonderfully constructed udder. She epitomized what a production cow should look like and the longevity she possessed is what we are striving for with our cowherd. Look for Dublin to supply those same robust maternal traits along with his tremendous blend of calving ease, growth and carcass strength.

These two full brothers come to you from an embryo package we purchased from one of the top maternally focused herds in the country, TJB Gelbvieh of GA. We purchased these eggs based on the incredible phenotype and production record of their donor dam, TJB Anissa 913U 149X. The 149X cow may be one of the most beautiful cows to ever grace the Gelbvieh breed and when we had the opportunity to add her influence to our herd, it was a no brainer to seize that chance. And by studying the bulls, you can see her influence in terms of their striking design and powerful muscle pattern. Don't miss out on these 2 phenotypically dominate purebred red Gelbvieh bulls.

Springfield L148 is our only spring born Gunner son this year but just because he's the only one doesn't mean he lacks the quality of bulls coming from larger sire groups. Gunner is a bull we've had tremendous success with over the years and with as much as we've used him, we are getting limited in when we can utilize him. However, bulls like Springfield are what keep us going back to Gunner as a bull who can sire soft made, wide bodied cattle with the flexibility to last many years in the herd. Look for similar things with this guy.

As you'll see later in the catalog, we are offering the dam to this bull as our featured bred female. With the 94D cow behind this bull, you can be all but guaranteed he's going to be special. Fedex L124 ET is a bull we've been excited about all year. He so well made and is an absolute monster when it comes to maternal traits with top 1% STAY. Then when you factor in 94D's influence, you get a bull who will sire some of the most outstanding females there are. Fedex L124 had an illness shortly after weaning which set him back but he's done a tremendous job catching back up to the other bulls. He's still slightly behind of where he should be however he has done his best catching up, ranking 7th for ADG. He has all the pieces to be a very valuable breeding piece.

Speedee L182 is our other son of the extremely popular Just N Time bull. Just N Time saw extensive use in his first breeding season throughout the Gelbvieh breed and the results look to be outstanding wherever he was utilized. Speedee L182's physical traits are much the same as his siblings; he's as long a train, thick butted and very correct in his structure. His dam is also a top-producer for us, raising a Gunner son who sold last year to Covington Gelbvieh of CO and saw use back in our program. Rest easy knowing you're going to get powerful, high growth, eye-appealing calves out of this bull and beautiful long lasting daughters as described by his STAY EPD of 25, ranking well beyond the top 1% of the breed.

## Larson's Lost River Livestock 2024 Sale Day Drawing

Everyone present at the sale who registers for a bidder's number will be entered to win a Pneu-Dart Air Pump Rifle at the conclusion of the sale. Must be present to win.

## Larson's Lost River Livestock Spring Red Angus Bulls

As our lead off Red Angus bull, Exxon L79 is a really interesting individual. With his sire, Rockefeller being deceased & his semen inventory gone, L79 represents an opportunity to take advantage of Rockefeller's unique and desirable genetic package. Study his EPD values and you'll find a combination of high index values, calving ease, growth, maternal traits and carcass merit that's going to be very difficult to duplicate. Factor in his dam sired by the timeless Hard Drive and out of the breed leading donor Flo-Marie 245-369, you get a bull with the pedigree, numeric strength and overall design to make him a breed leader. Serious breeders take note.

Plain and simple, Chevron L127 is one of the most powerful Red Angus bulls we've ever produced. In every performance measurement, he blows the doors off; 127 WW ratio, top 1% WW, top 1% YW, top 1% CW, top 6% GM and Top Dollar qualified. At the end of the day, we are in the business of selling pounds of red meat and that's exactly what this guy is going to do. And he's going to do it better than almost any bull out there.

Objective L96 is without a doubt one of the most striking bulls in the entire offering and an individual who is found by whoever steps into the bull pen. He's clean fronted, blends flawlessly from his neck into his shoulder, is as bold and expressive through his middle as any and when you get behind him, he's a super square and wide. He's really a terrifically balanced individual backed by an up-and-coming cow in our Red Angus group. His full brother was a featured bull in our Red Angus division last year and sold to Matt Voxland of McIntosh for \$5500.

Jalapeno L16 holds a special place in the heart of our niece Ava as he was the calf at side of her favorite cow this summer and as a pair, they were Ava's top 4-H project. So if you're looking for a bull you'll never have to worry about a disposition issue with, make sure to put this guy on your list. On top of his excellent attitude, he also excels in overall design. Much like our other Relentless progeny, L16 is as angular and striking as we have. He also excels in his numerical data with top 2% ProS, top 2% HB and top 27% GM, a combination that's going to be hard to duplicate.

Our only Stockmarket son this year, Hedge Fund L28 embodies what Stockmarket progeny are known for; fleshing ability, body length, large testicular development and easy-going dispositions. These are all traits where L28 excels. He's also very strong when it comes to other important traits such as calving ease coming to you as a 4-star calving ease prospect, growth ranking in the top 1% of the breed and carcass merit to qualify for the Top Dollar Angus program. He really puts the pieces together and will be a quality addition to any herd.

Quite possibly my favorite Red Angus bull this year, Purdy L207 is why the Quarterback line of cattle have been so popular. L207 is an absolute stud in the pen with no holes in his design. He's stout made with a ton of softness, he's strong topped and is likely one of the soundest bulls to walk around the pen. He really has it all. And when you study him on paper, he becomes even more impressive. 5-star calving ease traits, top 10% growth, top 4% MARB and a 107 WW ratio, he really rings the bell.

Duramax L91 is our only red SimAngus option this year and is a bull that's going to have some friends on sale day. He's out of a lovely cow who maintains excellent feet and a very youthful udder as an 7 year old cow and is sired by the popular Dually bull who adds significant strength to every trait across the board. Take a look at L91's EPDs; every value is above breed average, save for MILK which is only slightly below breed average, a ranking where we feel comfortable. Top Dollar Angus qualified, 5 star calving ease and with extreme EPD strength and balance, like I said before, this guy is going to have some friends.

A-BAG-A-BULL

RedAngus.org • 940-477-4593

RED ANGUS

RANCH TESTED. RANCHER TRUSTED.

If you purchase a bull from us, we will provide you with credit equal to the value of one bag of Feeder Calf Certification Program or Allied Access tags for each bull you purchase. To redeem your credit, bring your receipt for the tags to next year's sale and we will apply it to your bull purchase.

The FCCP provides age, source and genetic verification for calves sired by registered Red Angus bulls. Cattle enrolled in the FCCP are accepted into the exclusive Choice+ and G.O. Red grids. The FCCP yellow tags are recognized by buyers nationwide and return a premium for Red Angus calves enrolled in the program.

The Allied Access program provides age and source verification for commercial cattlemen whose bull battery does not exclusively contain registered Red Angus bulls. Whether you are utilizing multiple sire breeds or half-blood bulls, enrolling in Allied Access demonstrates to buyers that you are taking an extra step in marketing your calves and adding value throughout the production chain.

To enroll in the FCCP or Allied Access, contact the Red Angus marketing department. Enrollment is simple and free of charge.

Our lead off bull in the Simmental influenced division, Vortex L12 brings many high-quality traits to the table that both the cow/calf and feedlot sector are looking for. Homo black & homo polled, great overall design, outstanding individual performance backed by top 10% growth traits and Top Dollar qualified to help secure a premium for the top end feeder calves he'll produce. Vortex is perfect on his feet and legs and comes from an excellent line of cows who are all good footed and nice uddered cows with great production records. He really hits the high points of a strong, performance oriented herdsire prospect.

Shaker L44 is a bull that catches my eye more and more every day and has really come on since weaning. After his adjusted weaning weight that was just shy of 700 lbs, he's been an absolute monster when it comes to average daily gain, ranking as 3rd high gaining bull on test. And like I said, his terrific gains show when you study him in the pen; he's larger framed, long bodied and is very correct in his overall design. He's also very impressive from a numerical perspective when you factor in his 4-star calving ease rating coupled with top 25% growth traits, top 15% API and top 15% TI.

The lone son of our resident Simmental herdsire Steakholder, Investment L222 has some great qualities to offer any herd. 5 star calving ease, Top Dollar qualified and out of likely the most productive cow we purchased from Strandbergs. The 1714 cow can flat get it done. Her first calf for us is the dam to lot 57 in this sale who is an absolute stud, her second calf sold in 2022 to Elliot Livestock of ND, her third calf sold last year to Rick Schimming of ND as our high selling SimAngus bull and this year she brought you this sharp looking bull. Take this opportunity to add the influence of 1714 to your herd with this bull.

Our only Genesis son this year, Alpha L104 embodies the type of bull we are trying to produce with our Simmental influenced cattle. Acceptable levels of calving ease and birth weight coupled with breed leading performance and carcass traits backed by strong, maternally focused mama cows. Alpha L104 does all of those things well and most importantly, he can back up his strong numerical values on paper with tremendous power and presence in the pen. He's as long as a train, big butted, calm as they come and will sire the type of calves that will put some extra dollars in your pocket.

Barometer L34 has been an eye catcher since day 1. His thickness and power has been evident his whole life and was a favorite of ours out on pasture all summer. He's continued that pattern of growth while remaining moderately framed with the same amount of thickness and mass he's become synonymous with. As a Top Dollar qualified bull with top 10% growth traits, he's going to sire an outstanding set of calves that will be sure to put extra dollars in your pocket when it comes time to sell.

10	10	15	20	85	20	10	55	99	99	20	15

Altitude L11 is very similar to lot 58 in terms of his width, dimension and overall quality. It's not a surprise that these 2 resemble each other so much as they're both sired by GPS and their dams are both sired by High Road. As three-quarter brothers, they should work very well in a pasture together to sire a very consistent, very high-quality group of calves. Both bulls are Top Dollar qualified and Altitude L11 is a 5-star calving ease prospect, making him even more valuable as he can be used on heifers.

By any metric, Centrifuge L67 is one of our highest performing bulls in the offering. He holds the title of highest gaining bull while on test this year and he also holds the title of heaviest adjusted weaning weight in the Simmental division. He flat gets it done when you're talking about performance but still manages to be incredibly eye appealing and sound. He's not overly large framed but might be the widest butted bull in the pen. He's square hipped, big middled and should sire a fast growing, eye appealing set of calves.

With Conviction L133, we have a bull very similar to lot 56. 5 star calving ease rating, Top Dollar qualified and out of a beautiful Angus cow with a strong production record. His dam is one of the most eye appealing, sound and functional cows we purchased from Strandbergs. As a 7 year old, her feet and udder are absolutely perfect and she's extremely easy doing. She always comes into weaning in terrific shape and always brings in a high quality calf, with L133 being one of her very best. Look for him to provide excellent calving ease, strong growth, beautiful daughters and added value when it comes time to sell calves.

## 61 LRL COMPASS L53 GGP

75%SM 25%AN Bull      Homozygous Black      Homozygous Polled

Compass L53 is the larger framed option in the group of bulls sired by GPS with the added stretch to produce the type of calves that pay the bills. His young dam is a wonderfully constructed cow with excellent feet and nice, tight udder that should remain problem-free for many years. She's sired by Cimarron, the same sire to the dam of lot 53 so you can see in both bulls how valuable Cimarron is for making high quality mama cows. Don't forget Compass L53 is Top Dollar qualified, giving you the benefit of feeder calves with added value.

These two powerful studs come to you as maternal brothers to one of the most physically dominant bulls we've ever raised, LRSF High Life H64, and are sired by the perennial breed leader for registrations in the Angus breed, Deer Valley Growth Fund. It's really easy to see why Growth Fund has been so popular when you see his progeny like this in the flesh. They are wide, deep and as easy fleshing as they come with great structure and power. Vanguard K252 ET is very reminiscent of his brother High Life in terms of his overall mass and is a bull we feel could have a significant impact on the breed. Whenever we have visitors come through the cattle, he's the bull that instantly catches their attention when analyzing the group of long yearlings. Both bulls have a lot to offer and we can't wait to share them with you.

With these 2 full brothers, we have a pair of incredibly stout and wide based bulls who are definitely going to stamp their progeny with the same sort of muscle and thickness needed to add pounds to a calf crop. K276 is going to be very useful on a group of heifers while not sacrificing growth and K255 is going to compliment a group of cows with the added power everyone is looking for. Like a number of other bulls in this catalog, their donor dam 319A was a tremendous producer for us and we have 3 full sisters to these bulls retained in our fall group of heifers who are right at the top of the group.

A true sale feature, Generation K300 ET is one of the stoutest and most complete purebred red Gelbvieh bulls we've ever raised. From the moment he hit the ground, we've been impatiently waiting to share him with the world. We were absolutely thrilled when this guy hit the ground and was red since he's sired by the black bull Eminence and out of 94D, there was no guarantee we were going to get a red calf. When you study him in the pen, he's as physically impressive as you'll find in the purebred red Gelbvieh genepool and with 94D being his donor dam, you know he's the real deal out of a cow with a long list of highly sought after progeny. He's wide, deep, soft, sound and comes down on terrific feet and legs. He's fluid in his movement, correct in his lines and doesn't leave much to be desired in terms of phenotype. And when you turn to his data, he continues to impress with top 40% CED, 25% BW, 35% WW, 4% STAY, 30% MARB and 25% FPI, all as a homozygous polled 94% purebred contributing 50% Gelbvieh to his offspring. Generation K300 will likely be one of the top red purebred bulls to sell this spring so don't miss out on adding his tremendous potential to your herd.

	80	50	35	45	60	40	>95	10	80	40	65	25	35

If you're in the market for an attractive, super easy going purebred Gelbvieh bull, take a hard look at this guy. Pinball K263 is a direct son of the outstanding 94D donor and is sired by past Breeder's Choice Gelbvieh Bull Futurity winner, PHG Eminence E02, giving him tremendous power and predictability in his pedigree. And as I stated above, he's about as eye appealing and easy going as you're going to find. For the most part, we handle our fall born calves less than our springs so they tend to be a little more standoffish. However, this guy is the total opposite and is just a big old tomcat. Easy to handle and easy on the eyes, an excellent combination.

## Larson's Lost River Livestock Gelbvieh Donor Female

CMR Sunshine 94D Sells as lot 78

There's been many times lately when I've thought we're out of minds for letting this cow go but ultimately our loss is your gain. Sunshine 94D is the epitome of what a production cow should be; tremendous track record of progeny, excellent udder quality, superior foot structure, outstanding overall design from every angle, very easy keeping, wonderful maternal instincts and the list goes on and on. We feel this cow is one of the very best red Gelbvieh females in the country, if not the best and she still has a ton to offer her new owner. We've flushed 94D 9 times over the last 3 years and she's produced 11 embryos on average. We've implanted most of those eggs and with many of her daughters entering production, we feel the time is right for someone else to capitalize on her outstanding production ability as she's still only an 8 year old cow. We flushed 94D back in June of 2023 and she hit her highest production total of 25 grade 1 embryos. We then turned her out with our leading Red Angus herdsire, PIE Quarterback 0109 who sired one of our best Red Angus bulls this year, lot 51. Sunshine 94D sells bred to PIE Quarterback 0109 and ultrasound indicates a due date of May 5, 2024. Selling full possession and 50% embryo interest with the option to double your bid and own 100% embryo interest.

If you're in the market for high performance, visually appealing cattle, put Nellie K32 on your list. Every time through the group of bred heifers, she's one that catches your eye. Long neck, huge middle and sound from the ground up. She traces back on the maternal side of her pedigree to an outstanding SAV Bismarck cow who achieved Dam of Distinction honors in her lifetime. Nellie K32 sells bred to LRSF Cooperation K27 and ultrasound indicates she's due April 21, 2024 carrying a bull calf.

At the end of the day, pounds are what pays the bills and this lady is one of the top performance females in the Gelbvieh/Balancer gene pool. Dawn K101 comes to you with a rare combination of bred average CED coupled with top 1% WW and top 2% YW. She will definitely produce the sort of heavy calves the market demands while keeping calving ease in check. Dawn K101 was AI bred on June 1, 2023 to LRSF Dynamic J164. She sells ultrasound confirmed safe to her AI date and ultrasound indicates she's carrying a heifer calf due March 10, 2024.

Rita K123 is very similar to the K101 female directly ahead of her in the catalog, larger framed with strong growth traits and an excellent line of cows backing her up. Each female tracing their lineage back to the Rita D18 cow has been retained as a replacement and have all made solid, functional members of our herd. Rita K123 was AI bred on May 12, 2023 to LRSF Dynamic J164. She sells ultrasound confirmed safe to her AI date and will have a calf at side on sale day.

Cotton Candy K190 will be one of the first Playbook females to come into production and we are really excited about these females. Just take a look at his long list of sons in this catalog to see why. And when you add in the influence of Leverage on the bottom side of this girl's pedigree, the potential of K190 is really strong. Cotton Candy K190 was AI bred on May 11, 2023 to TAU Night Shift 69H. She sells ultrasound confirmed safe to her AI date and will have a calf at side on sale day.

## Larson's Lost River Livestock Spring SimAngus Bred Heifer

**LRL Crescent K92**      Sells as lot 90

Our only Simmental influenced female on this year's sale, Crescent K92 is an intriguing breeding piece. Sired by the ever-popular Hook's Frontline who has sired some of the breed's best calving ease and maternally focused cattle, this female has a bright future. Her dam is a very productive 10-year-old Angus cow with perfect feet and nice tidy udder. Crescent K92 was AI bred on May 12, 2023 to GIBBS 9114G Essential. She sells ultrasound confirmed safe to her AI date and will have a calf at side on sale day.

This female falls into the same category as the 94D cow and our K224 bred heifer, a female that should probably be staying here. But you can't keep them all and Nellie K81 will have a ton of good to offer her new owners. She's as striking as you can make one with unmatched soundness and structural integrity. She hits the ground on a perfect foot and is setting down an udder that will be a crowd favorite come sale day. Her dam is one of the best cows on the farm, regardless of breed, being named a Dam of Distinction the last 2 years, putting her in the top 1% of all active Gelbvieh cows for maternal ability. With a production record like that, expect this girl to follow in her mama's footsteps and be a top end cow in any herd. Nellie K81 was AI bred on May 11, 2023 to LRSF Benelli K198. She sells ultrasound confirmed safe to her AI date and will have a calf at side on sale day.

Dawn K90 ET leads off our Red Angus division and was an easy pick to do so. She's an absolutely striking female from the side while remaining wide over her top and from behind. She's a direct daughter of our B30 donor who has produced some of our highest valued Red Angus cattle, including Ambition G87 who sold in 2020 to Ressler Land and Cattle in ND for \$13,000 (Ressler's just resold him as a 5 year old bull for \$7750 in January of 2024) and a full sister to K90 who sold on the 2023 Reds on the Prairie Sale for \$10,000 to Schafbuch Red Angus in IA. Dawn K90 ET was AI bred on May 12, 2023 to LSF SRR Diversified 1143F. She sells ultrasound confirmed safe to her AI date and will have a calf at side on sale day which with the combination of K90 and Diversified should be one of the most phenotypically stunning calves of the sale season.

Dawn K91 ET is a full sister to the lot 93 heifer directly ahead of her in the catalog. K91 is a higher performance female than her sister but still maintains the terrific angularity and refined overall structure. She'll definitely raise some heavy calves throughout her career with stamping them with an attractive overall design. Dawn K91 ET sells bred to PIE Quarterback 0109 (RAAA 4390443) and ultrasound indicates a due date of April 30, 2024.

Heidi K97 ET is a direct daughter of our Heidi 7203 donor who we purchased from Jacobson Red Angus. The 7203 cow is the epitome of easy fleshing and that comes through in all of her progeny . A maternal sister to K97 entered our donor program in the spring of 2023 based on that same fleshing ability coupled with a stellar track record of production and excellent maternal traits. Heidi K97 ET sells bred to PIE Quarterback 0109 (RAAA 4390443) and ultrasound indicates a due date of May 5, 2024.

With the US cowherd continuing to remain at historically low levels and with all indications pointing towards a reluctance to expand, feeder calves and bred females are likely to only increase in value over the next 2-3 years. With that being said, these females represent a tremendous opportunity to expand a producers herd at lower prices because if the market holds true over the next few years, they are only going to increase in value and just think of what their calves will be worth.

Like last year, there are group of heifers here that are home raised and a group that was purchased from our longtime customers, the Schimming Brothers in ND. New this year is a group of red heifers purchased from Mike Bode of Bagley. Mike maintained an excellent herd of Red Angus/ Gelbvieh cross cows and his herd has been culled hard over the last few years leaving the mothers to these females as the cream of the crop. Buy with confidence that these females will make excellent mama cows bringing in top notch calves year after year.
