

Masons Fasteners Ltd

LEADING BRANDS | INNOVATION | VALUE FOR MONEY

All available from the experts

Welcome to the METALMATE®Fastener Product Guide

This guide lists the depth of range and choice across common fasteners such as Hexagon Bolting, Socket Screws, Nuts and Washers, which are available in Metric or Imperial, with a choice of materials and finishes, and in different international standards.

METALMATE® always strives to achieve the highest ideals demanded by customers. Quality Standards are of the highest priority and to METALMATE® this means we do what we promise, in the best and fastest way possible.

The METALMATE® brand is one of 3 MATE® brands, which along with MASONMATE® and TIMBERMATE® create a group of leading products that will not let you down in any fastening or fixing application.

The only choice for the true professional!

Finish & Materials

Products are normally available in a choice of finish; bright zinc plated, zinc and yellow passivated or self colour (plain), all options are listed within this range guide. Stainless steel and brass ranges are also included whilst further lines are stocked and are available upon request.

Packaging – Boxes and Labels

Products listed are offered in the small box quantities shown in either branded boxes or plain card. Outer boxes normally weigh no more than 20Kg. Box quantities may differ slightly from batch to batch.

Most products are also available in Bulk quantities, further details are available via our office.

Every box is well labelled with our product descriptions, codes and standards. All labels contain traceability codes that link to batch identification.

Zinc Plating Finish

The process has begun on stock received from our quality assured suppliers to be free from Hexavalent Chromium (CR6). However certain product lines may contain CR6, labelling of the boxes has been amended to reflect this.

For a service charge, batch samples can be laboratory tested for the presence of CR6 but if applicable, the customer must satisfy themselves that the product ordered is CR6 free.

E. & O. E.

Sizes in Stock

All sizes listed are regularly stocked items, please contact our sales office with enquiries for current stock levels.

General Terms

All transactions are subject to our conditions of sale.

Notification of shortages or faulty goods must be made within seven working days of receipt.

No responsibility can be accepted for goods that have to be re-packed or processed by the buyer.

Whilst every care has been made in preparing the information in this guide, customers must satisfy themselves that the products offered and the technical information about them is correct and suitable for their application. Masons Fasteners cannot warrant the information and accept no liability from its use.

QUALITY STANDARDS

All METALMATE® products are sourced from accredited manufacturers in order that only the highest quality threaded fasteners are supplied. Exacting inspection control throughout the supply chain ensure that the METALMATE® commitment to quality of product is never compromised.

ISO 9001.. quality assured!

Quality assurance is extremely important to the METALMATE® brand. The entire purchasing and logistics process complies with international standards.

The extensive range of fastenings offered in the METALMATE® range has naturally prompted emphasis on quality.

Premium socket products supplied by the premier global provider.

The Metalmate ranges of Socket Screws and allied products are sourced from the world leader YFS, Fang Sheng Screw Co., Ltd in Taiwan.

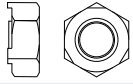

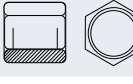

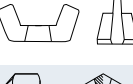

YFS quality is second to none with their management systems credited by ISO9001, ISO/TS16949, ISO14001 and ISO 17025. Full batch traceability to source with PPAP and 3.1b certification is available.

Metalmate-YFS products are manufactured from high tensile Alloy Steel, Class 12.9 and ASTM A574 for industrial machinery, electric appliances, automotive vehicles, military equipment and many other industrial products.

Metalmate Self Drilling 'Tech' Screws are ideal fixings for traditional Cladding Applications such as single skin and insulated panel sheeting used in many agricultural buildings and industrial units.

**METAL
MATE**[®] SELF DRILLING SCREWS

Metalmate Self Drilling 'Tech' Screws are ideal fixings for traditional Cladding Applications such as single skin and insulated panel sheeting used in many agricultural buildings and industrial units.

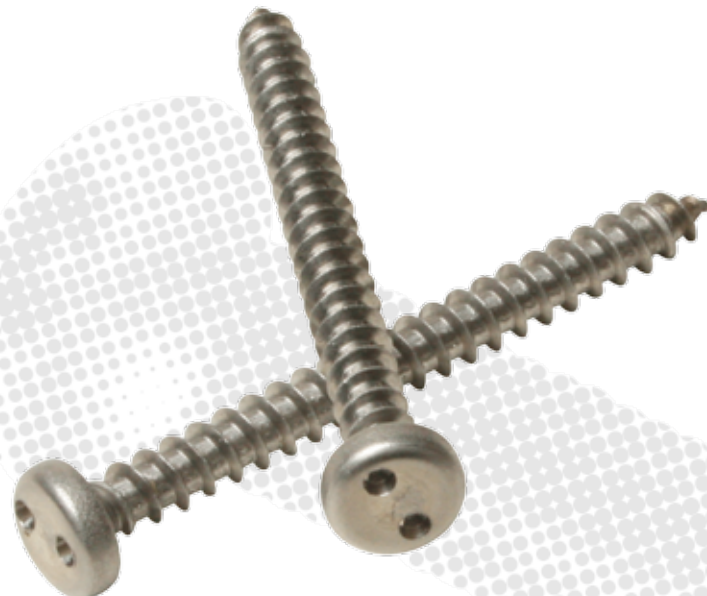

Metalmate Self Drilling 'Tech' Screws are ideal fixings for any application where pre-drilling of the fixing is not desirable or feasible.

Metalmate Self Drilling Screws provide a very fast installation solution for Roofing and Heating & Venting Contractors.

Metalmate Self Drilling Screws come assembled with required 16, 19 or 29mm bonded washers for watertight sealing.
