# Catalogues from Zystm

## Zystm Care · Hospital design

Modular furniture range for hospitals and clinics.

- Cabinets
- Equipment for cabinets
- Tables, fixed and height adjustable
- Microscopy and microtome tables
- Fume cupboards and exhaust boxes for pathology

## Zystm Lab · Laboratory design

Modular laboratory equipment for laboratories and hospitals

- Furniture systems 3, 5, 7
- Fume cupboards, exhaust boxes
- Chemical cabinets
- Fume cupboards and exhaust boxes for pathology

## Zystm Learn · college design

Modular furniture for educational institutions and classrooms

- Equipment for Science
- Equipment for High Schools, HTX, adult education
- Inventory and equipment for Physics rooms
- Inventory and equipment for Chemistry rooms

## Zystm Detra · Shelving systems

• DetraLet, Aweso, Hyllteknik

- Wardrobe racks
- Coat racks

## Zystm A/S

Based on many years of industry experience, we offer a proven product line based on holistic solutions. In collaboration with selected suppliers, users, builders and architects, our goal is to further develop the range regularly so that we always meet market requirements and customer expectations. Continuous development work is done in our own development department, which also develops customised solutions for customer-specific requirements.

Zystm is one of Scandinavia's largest suppliers of equipment for laboratories and hospitals. This catalogue details the laboratory product inventory grouped under the ZystmLab product group range.

The Zystm Group's laboratory program is produced in our own factories in Herning and Bjerringbro and sold by our sales offices in Denmark, Norway and UK as well as partners abroad.

We consider the design phase as very important in our efforts to live up to customer expectations. We therefore have an organisation of industry specialists who combined have more than 100 years of experience working with layout and design of laboratory solutions.

Zystm has a modern furniture production. The machinery includes new CNC machines which increase flexibility and quality of the products. This ensures a flexible performance for the customer and that the products are always a very high quality.

## Furniture systems for laboratory

**Zystm 3**

Loose table frames able to withstand heavy bench loads

**Zystm 5**

Easy to clean furniture system without legs

**Zystm 7**

Stationary furniture system on plinths

# Product specification

Cabinet sides, top and bottom are constructed in 19 mm durable melamine, backboard is an 8 mm melamine-coated board.

Addition and cover are made in standard body colour and material, but can be made with a laminate surface for an additional charge.

All cabinet and surfaces of the cabinets are non-porous and crevice free for hygiene purposes. The carcass front is fitted with a concave sealing strip that allows doors or drawers to close softly and tightly providing a dust seal.

Plinths are made in waterproof sheet cladded in 0.9 mm high-pressure laminate on both sides finished in colour dark grey. Plinths come as joint or individual plinths.

Shelves are made in 12 or 19 mm particleboard with melamine or high pressure laminate surface all edges are sealed with 1 mm synthetic banding for optimal hygiene.

Light pelmetstrips under top cupboards are manufactured from melamine-coated board with all edges sealed. They can also be supplied in laminate-coated board with a front colour for an additional charge.

Zystm's cabinet hinge is specifically designed for hospital and laboratory use. The anodised aluminium quality hinge comes with self lubricating washers to the moving part. The hinge has been rigorously tested to 200,000 opening and closings with a maximum opening of 270 degrees.

As standard, all cabinets come with an adjustable magnetic lock.

Doors and drawer fronts are made from 16 mm chipboard with 0.7 mm laminate to both the front and back. Edges are sealed with impact resistant 2.0 mm 3D alloy/synthetic lipping for optimal hygiene.

Glass doors are manufactured in MDF with a laminate surface. The glass is glued into a frame construction, making it both stable and very easy to clean.

Zystm light panel mounted to the underside of wall cupboards. This closed light duct has been specially developed for areas where there are high demands for hygiene.

Laminate tabletops are manufactured from 28 mm chipboard complete with 0.7 mm surface laminate and relief laminate on the back. All edges are closed by post-formed edges or 2 mm ABS synthetic edge banding. Other tabletop materials are available, please contact Zystm.

The telescopic pull-out can be positioned in the perforated rail mounted in the cabinet side, the pull-out can be fitted with shelves and modules as required by the user.

Module side in plastic with built-in stop and relief wheel. Straight, angled and tilted insert is fitted to the side of the cupboard. The insert side can be easily replaced, cleaned or changed for different work functions.

Label bridge handle in cast material. The handle is designed for numbering and description, affixed using 12 mm Dymo.

The protected functional handle is made from solid aluminium and follows the length of the door/drawer front. An information label can be affixed to the full length of the handle, allowing the possibility for the cabinet content to be displayed.

Cabinet fronts can be delivered with magnetic laminate for an extra charge.

Ventilation of chemical cabinets. The cabinets are equipped with a ventilation extract spigot at the top of the cabinet. Ø100 mm

Ventilated base cabinets are supplied with screw-mounted grey plastic extract spigot and flex hose supplied in standard lengths.

Lighting in cabinets consist of LED lighting with an on/off switch on the door.

Drawer for module action constructed from solid front and cleanable powder coated steel frame with 100% telescopic extension.

Conventional drawers are constructed with powder-coated steel sides, melamine with the bottom and back 100% telescopic extension and soft-close. Tall drawers are provided with rails matching the depth of the cupboard.

Drawers 100% extension and soft-close.

Drawers 80% extension.

## Zystm 3

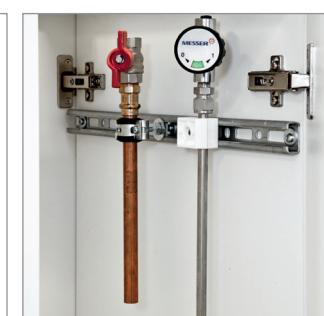

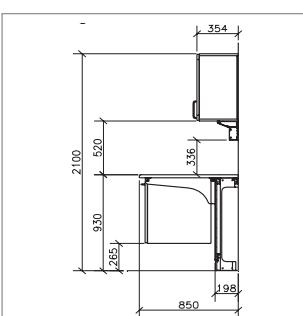

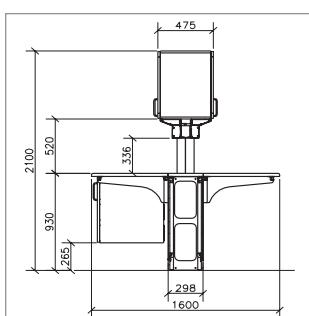

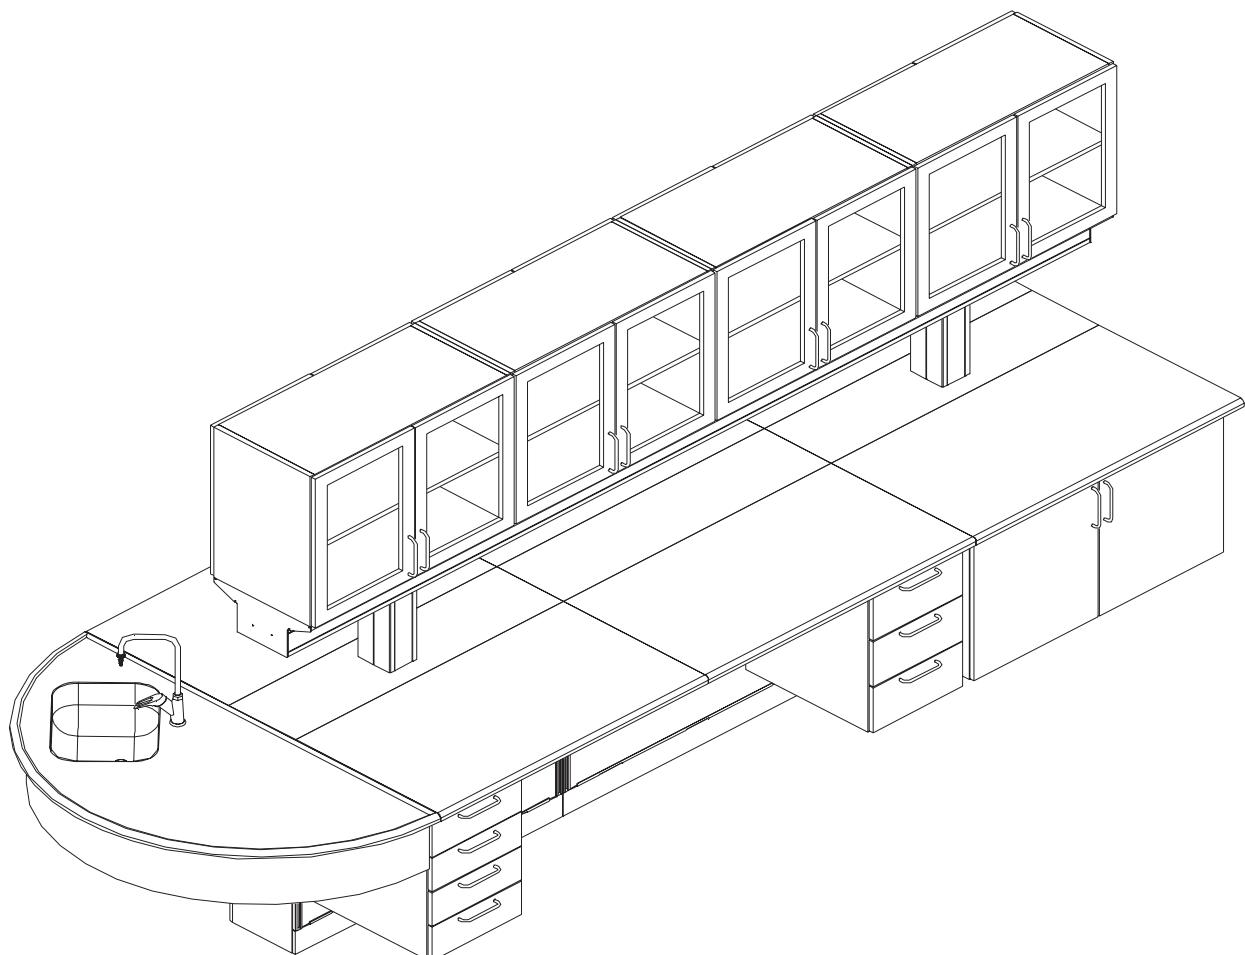

Loose table frame that can withstand heavy bench loads. Suspended cabinets can be moved from side to side within each module. The superstructure is optional.

## Furniture system with free-standing table frames

## Zystm 5

Service dropper boxes with concealed hinges

## Laboratory cantilever furniture without legs

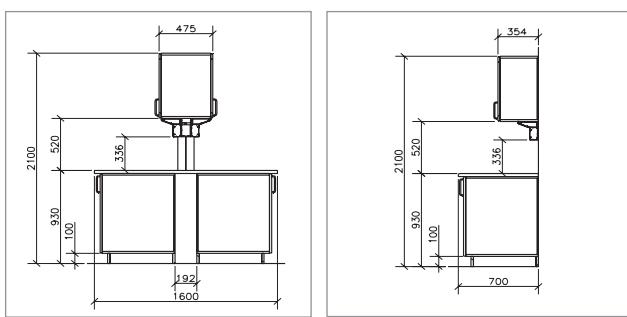

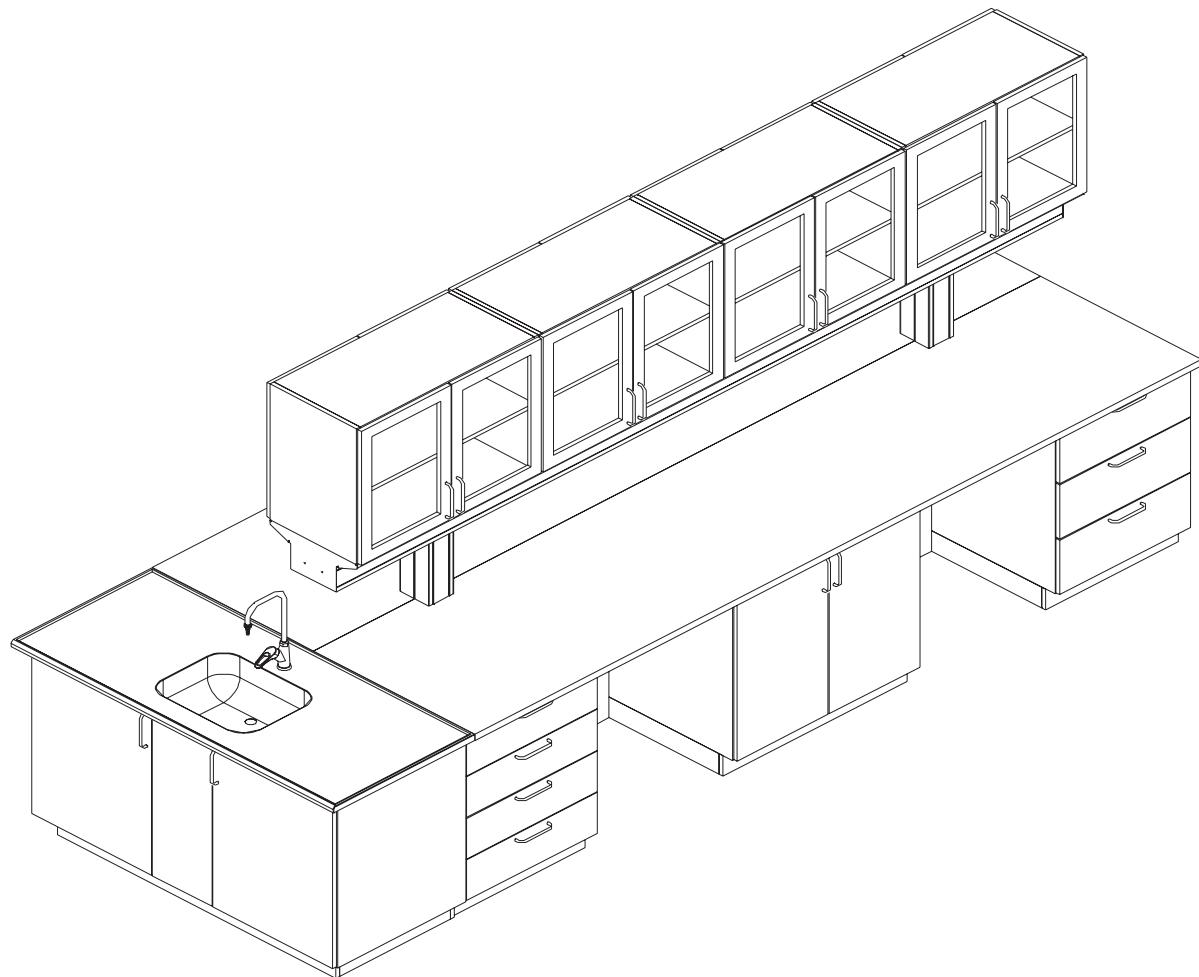

Leg free cantilever furniture system providing concealed services distribution for mechanical and electrical supply lines. Suspended cabinets can be moved from side to side within each module which is mounted to the technology module using manually height-adjustable or electrically height-adjustable support frames. A very flexible and easy-to-clean system.

### GMO

The system is prepared for GMO and can be very easily upgraded for this requirement.

## Zystm 7

## Stationary furniture system

A stationary furniture system mounted on plinths.  
Base cabinets on plinths provides more storage space, and  
100% stability.

## Module sides

### Module sides

Prepared with pull-out stop. Hygienic seal between module wall and the cabinet carcass.

Assortment of trays and baskets for cupboards with module sides can be found in our section of the Care logistics catalogue.

## Weighing tables

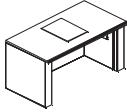

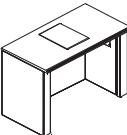

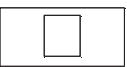

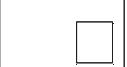

### Weighing table

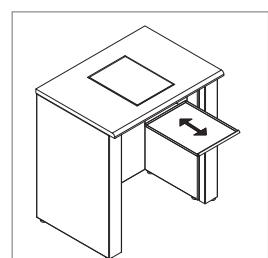

Available in three widths: 900 mm, 1200 mm and 1500 mm. Or as pillar with a stone platform for the weighed item. Available in two heights: 730 mm and 930 mm.

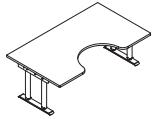

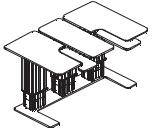

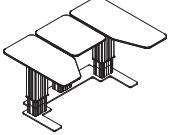

**Suction box for exhaust ventilation**  
see p. 46

Symo locks are used when there is no requirement for suiting.

Ruko lock 1614 is a six-pinned drop-shaped lock used on all cabinets with the exception of staff cabinets.

Ruko lock 1514 is a five-pin drop-shaped lock used on all cabinets with the exception of staff cabinets.

Ruko lock 1608 is a round six-pin cylindric lock used on staff cabinets.

Ruko lock 1508 is a round five-pin lock for use in staff cabinets. All Ruko locks are available as suited or independently locking.

Independent locking: Each lock has its own key.

Suited locking: The same key for each lock.

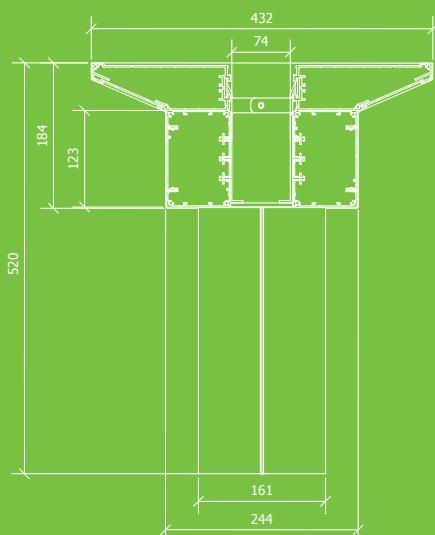

# Product specification • Installation bridge, electrical duct and light channel

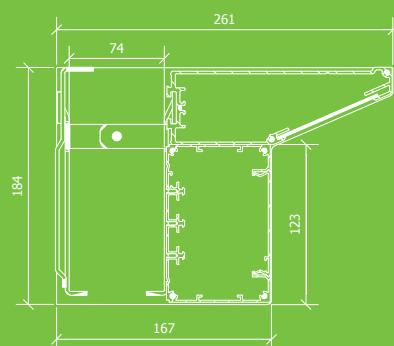

When ordering installation bridges, electrical ducts or light ducts, the following stated selections/need to be considered: Model number, length, choice of colour and light

Bridges	Colour	Luminaire	
	Freestanding installation bridge	 White Ral 9016	 HF light 83
	Wall-mounted installation bridge	 Alu Ral 9006	 LED light Ra80 3000 kelvin
	Light channel		 LED light Ra90 4000 kelvins
	Electrical duct Available with or without light		

**Freestanding installation bridge**

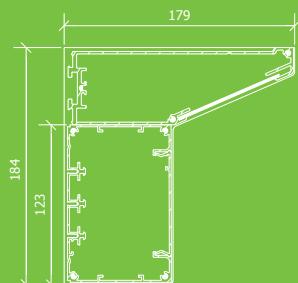

**Wall-mounted installation bridge**

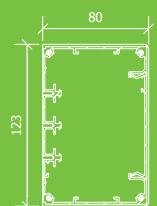

**Light channel**

**Electrical duct with light**

**Electrical duct without light**

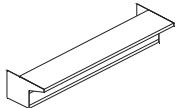

Installation bridge with light and HF-performers. for mounting of sockets and var. media. Easy cleaning solution with easy access to the replacement of lighting fixtures.

## Zafe 12

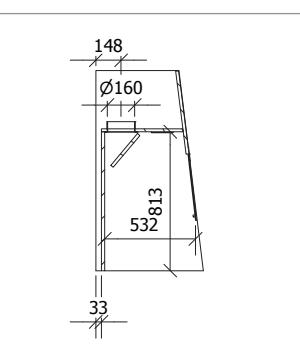

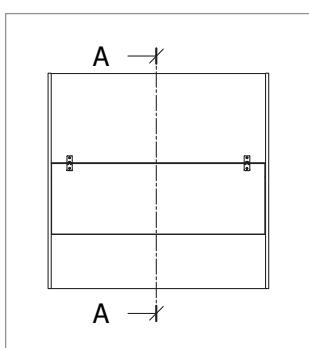

Zafe 12, height 1170 mm.

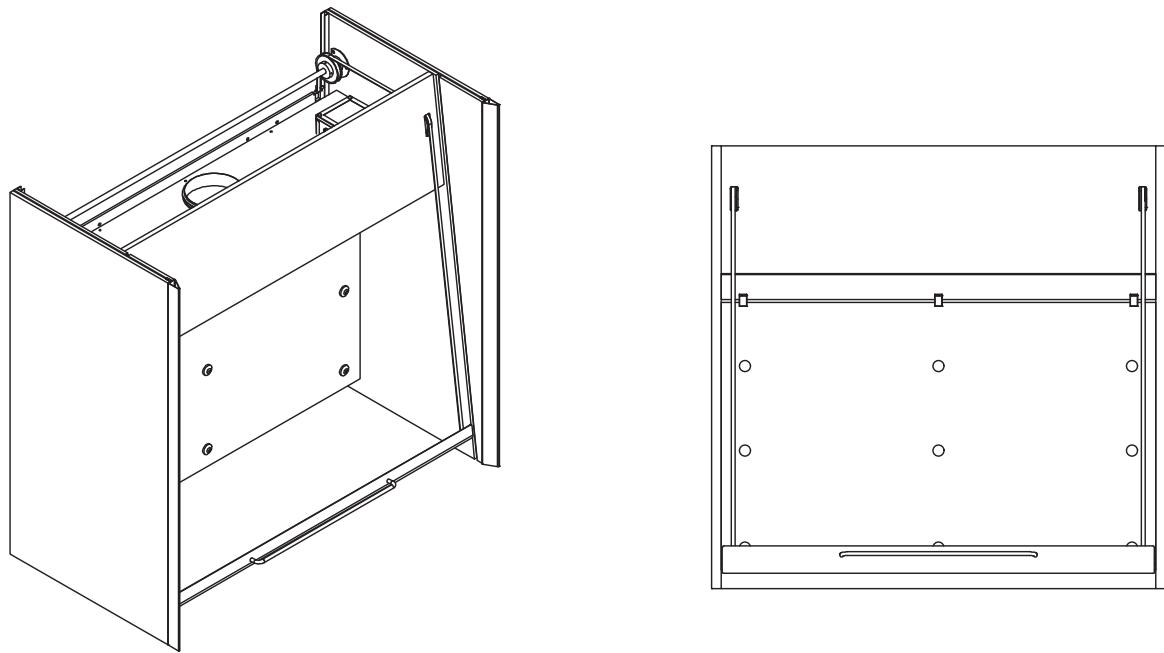

Flap lid, hinged at top.

Door opening: 294-680 mm.

Optional light source. E.g. fluorescent, LED Ra90 4000k, UV, etc.

## Zafe 13

Zafe 13, height 1170 mm.

Available with 1xdouble 230V internal socket,

Optional placement, right or left.

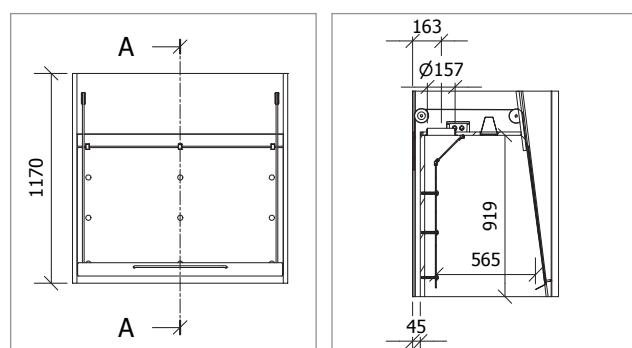

Upwards-sliding door with belt drive for added security.

Ready for scaffold bars which allow high  
setups or shelves.

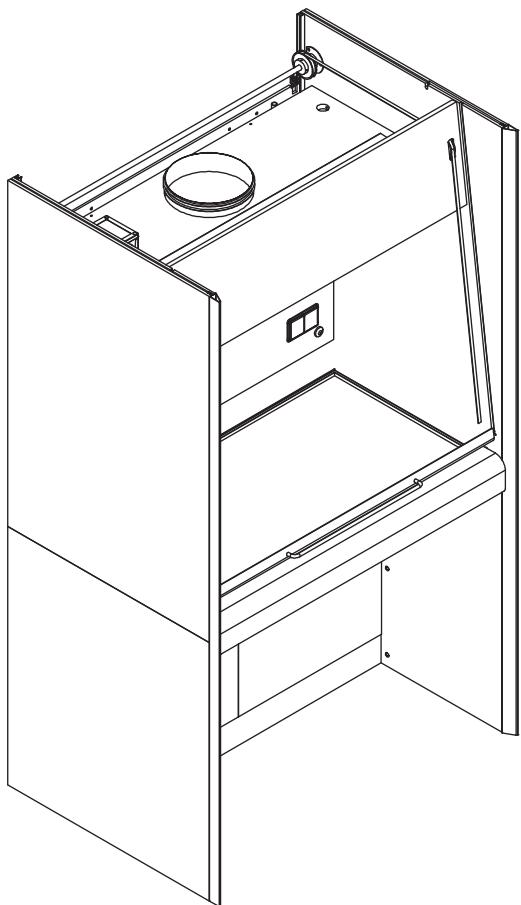

Sash opening: 40-653 mm.

Max. top edge of glass sash: 1470 mm.

Optional light source. E.g. fluorescent, LED Ra90 4000k, UV, etc.

## Zafe 15

Zafe 15, height 2100 mm.

Available with 1xdouble 230V internal socket, optional placement, right or left. Upwards-sliding door with belt drive for added security.

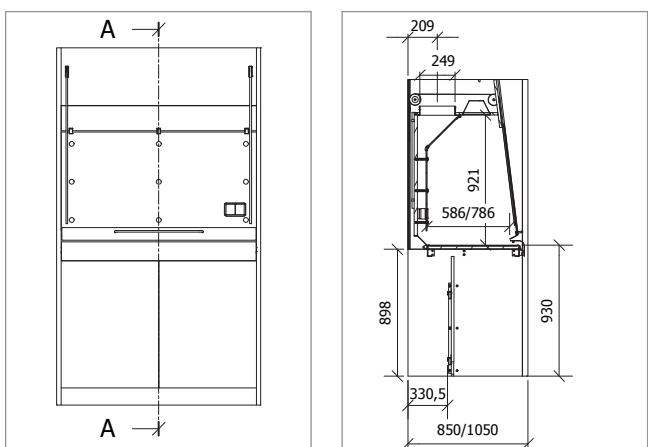

Ready for scaffold bars which allow high setups or shelves.

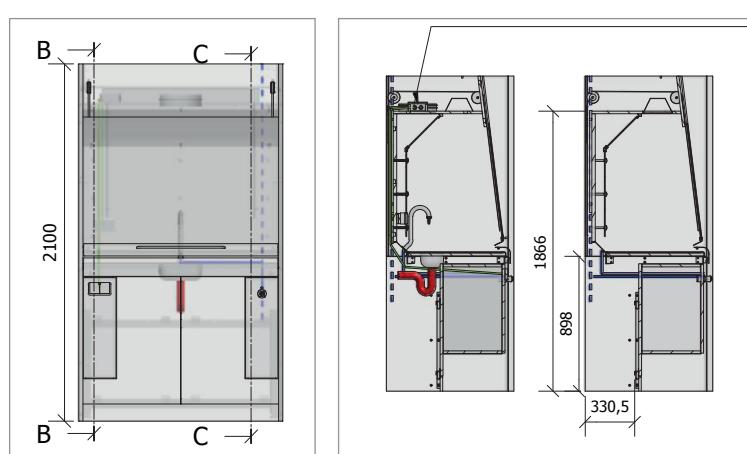

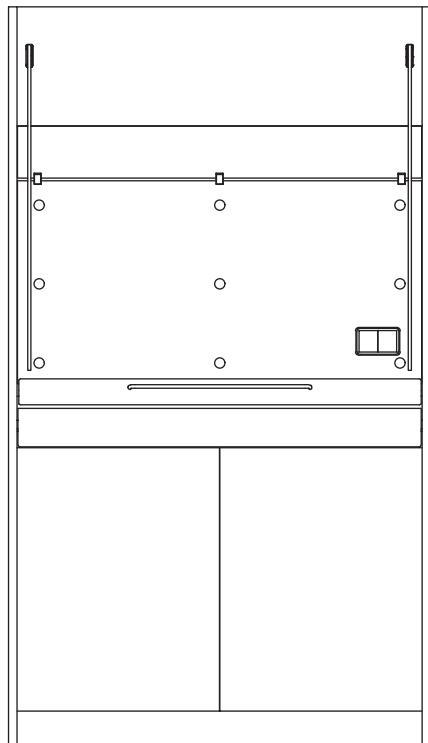

Sash opening: 50-784 mm.

Max. top edge of glass sash: 2427 mm.

Downflow extract can be additionally selected.

Optional light source. E.g. fluorescent, LED Ra90 4000k, UV, etc.

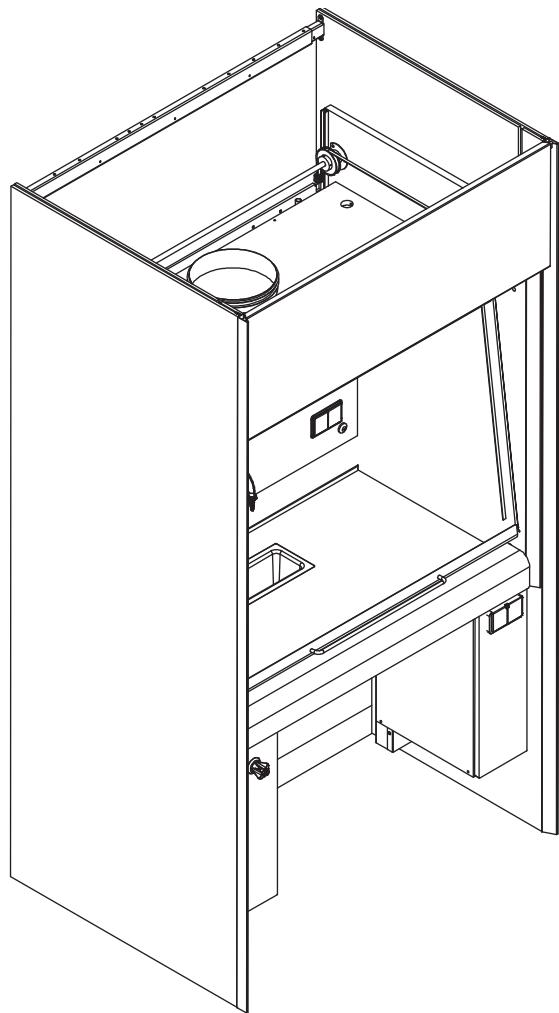

Approx. 2 metre cable for electrical connection

Routes

Green = Electrical  
Blue = Plumbing  
Red = Drain

## Ergo Zafe 15

Ergo zafe 15, height 2400 mm.

Available with 1xdouble 230V internal socket,  
Optional placement, right or left.

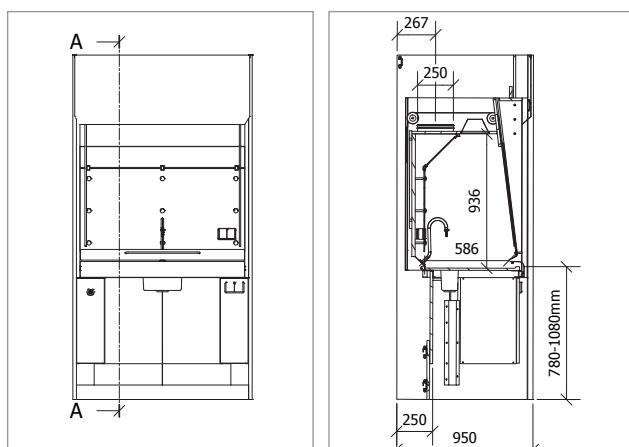

Upwards-sliding door with belt drive for added security.  
Ready for scaffold bars which allow high  
setups or shelves.

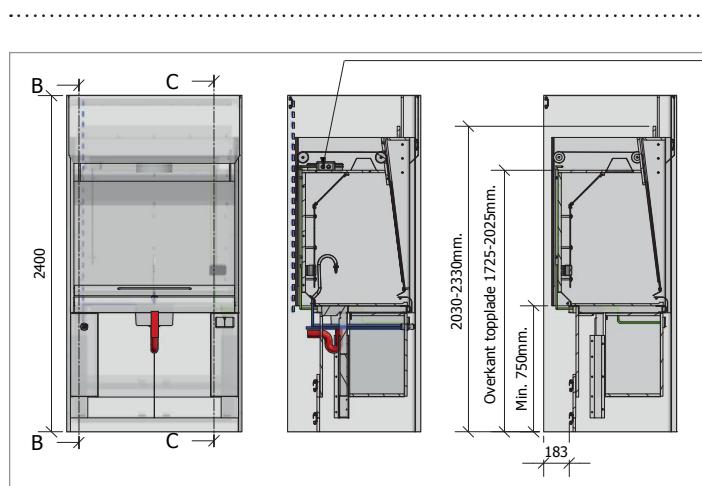

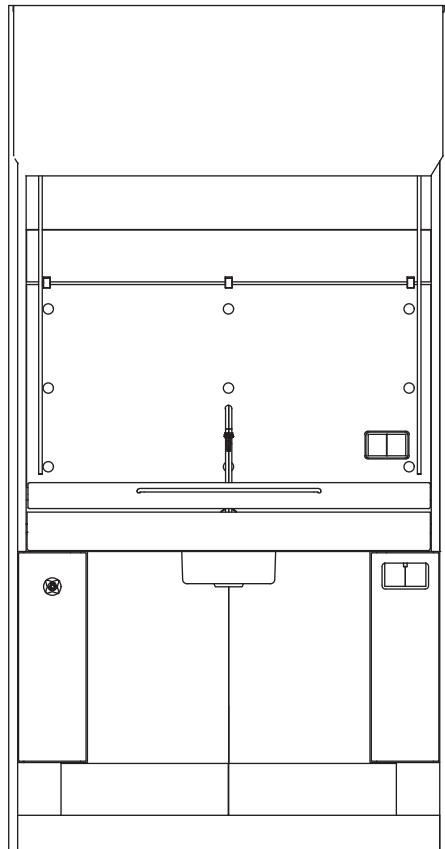

Sash opening: 50-784 mm.

Max. top edge of glass sash: 2681 mm.

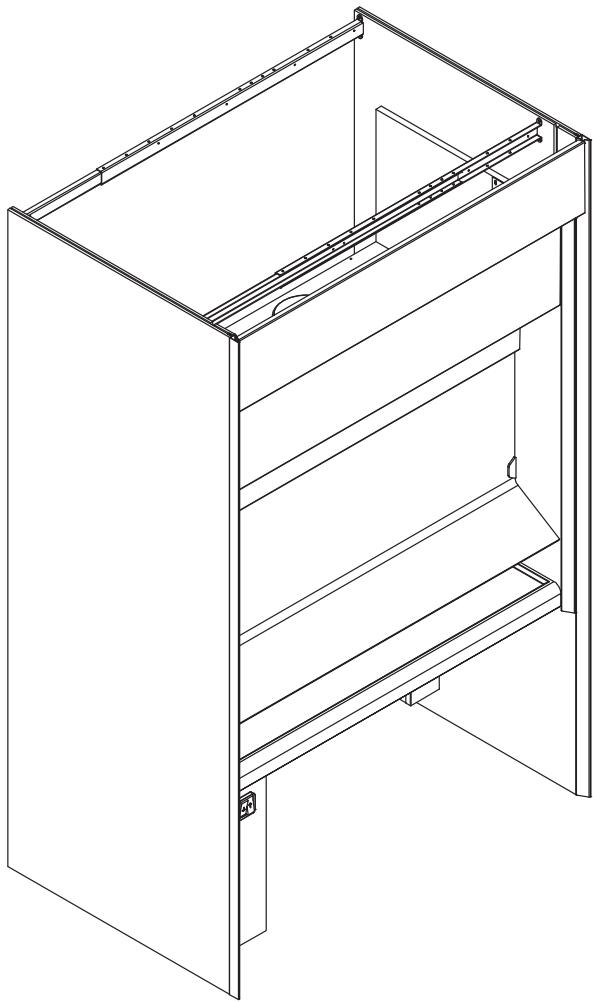

Downflow extract can be additionally selected.

Optional light source. E.g. fluorescent, LED Ra90 4000k, UV, etc.

## Ergo Zafe Pathology 19

The fume cupboard is height adjustable and can be used advantageously in situations where there is a need for cutting and freeze cutting.

When arranging tabletops, Zystm standard modules, e.g. for cutting, special dyeing, liquid, solid and sharp waste, can be placed almost freely in the tabletop's depth in the longitudinal direction. This ensures that the user has the best possible workplace.

The synthetic material front is designed to allow maximum visibility of the workplace and back wall, where it is also possible to suspend a flat screen mounted on the equipment rail.

The synthetic material door is operated via up/down button mounted on the control panel just below the tabletop.

When using photographic equipment, this can be mounted outside the enclosure above the cutting zone, giving the best possible images.

The workplace is optimally and evenly illuminated, but may be supplemented by spotlighting if this is required.

Ergo Zafe Pathology 19, height 2500 mm.

Available with 1xdouble 230V internal socket,

Optional placement, right or left.

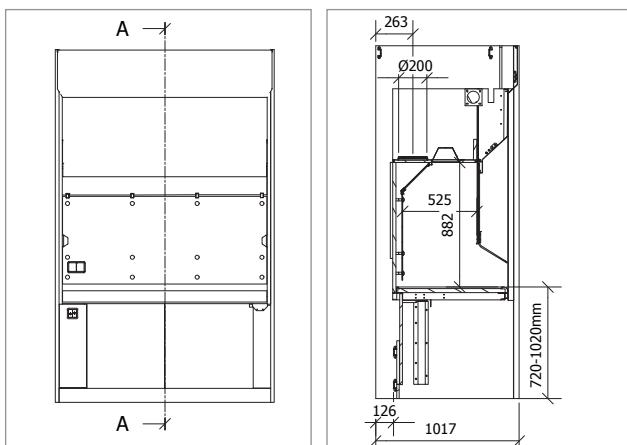

Cover with motorised pulley.

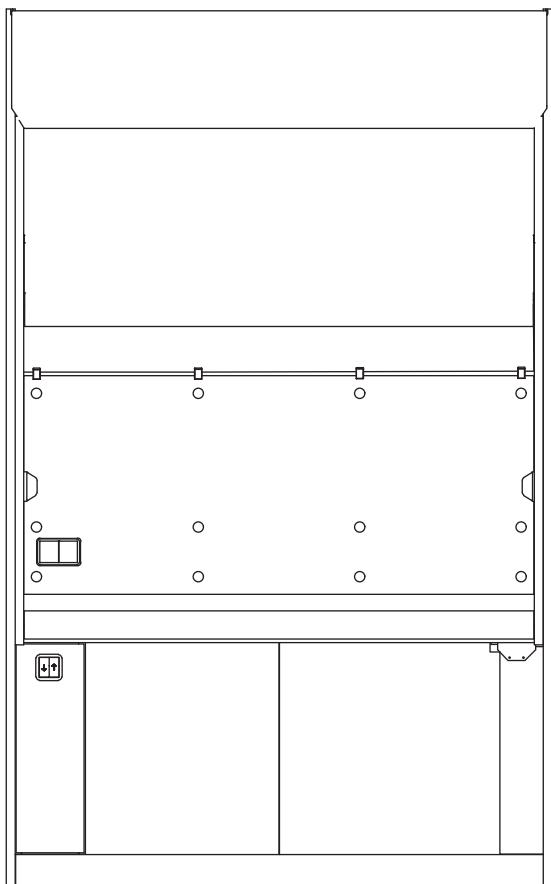

Ready for scaffold bars which allow high setups or shelves.

Sash opening: 180-550 mm.

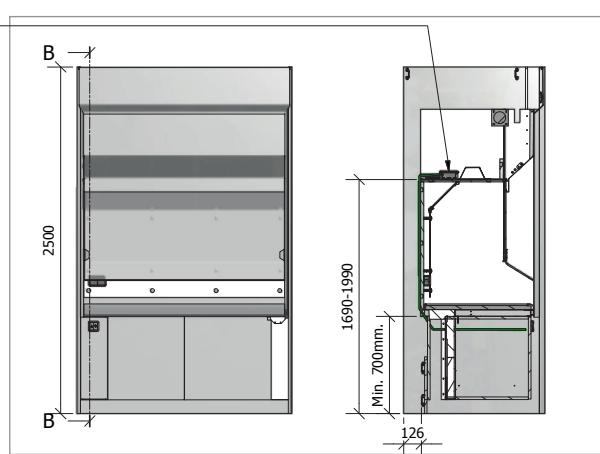

Downflow extract can be additionally selected.

Optional light source. E.g. fluorescent, LED Ra90 4000k, UV, etc.

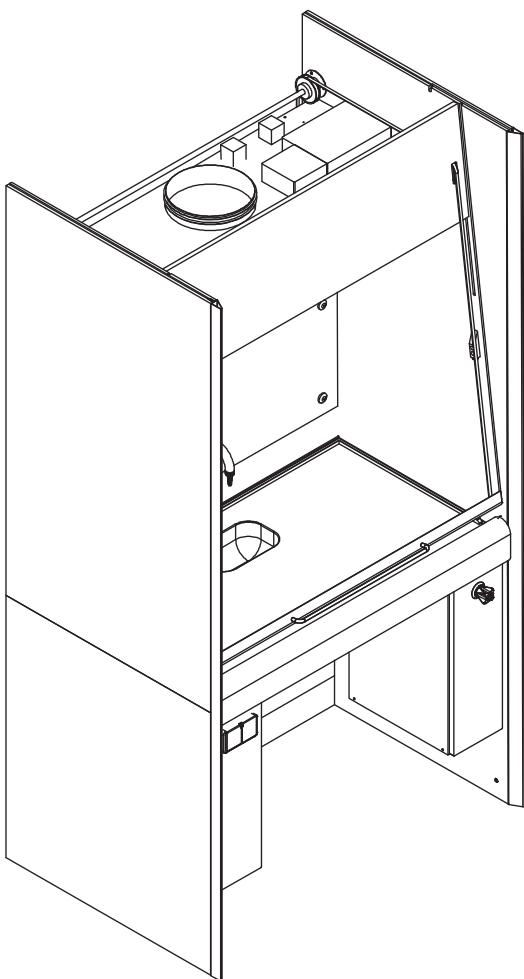

.....  
Approx. 2 metre cable for electrical connection

## Zafe 81 and 82

The fume cupboard is approved and tested in accordance with EN14175 parts 3 and 6. The fume cupboard has been tested and approved with an air speed of 0.3 m/s.

Zafe 81 and 82, 2300 and height 2100 mm.

Available with 1xdouble 230V internal socket, can be positioned to the right or left as desired.

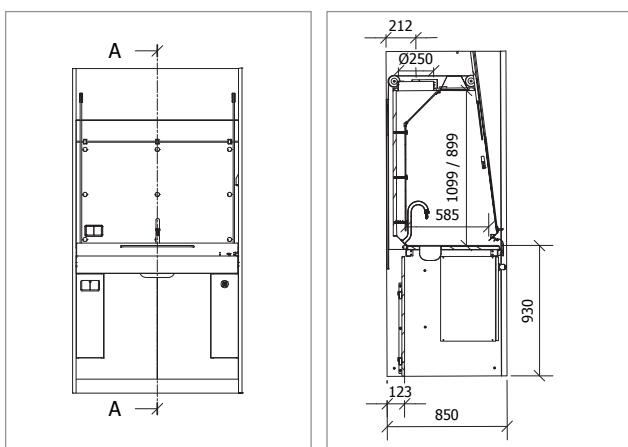

Upwards-sliding sash with belt drive for added security.

Built-in sash stop at 500 mm door opening.

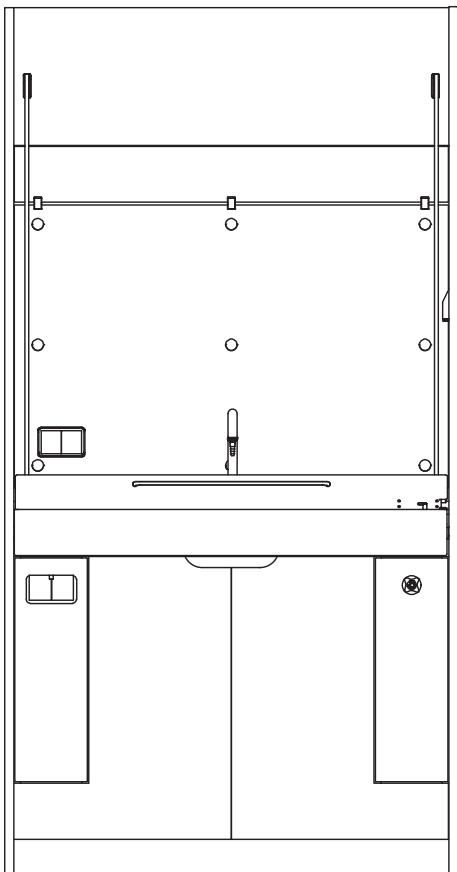

Ready for scaffold bars which allow high setups or shelves.

Sash opening: Zafe 81: 50-670 and Zafe 82: 50-675 mm.

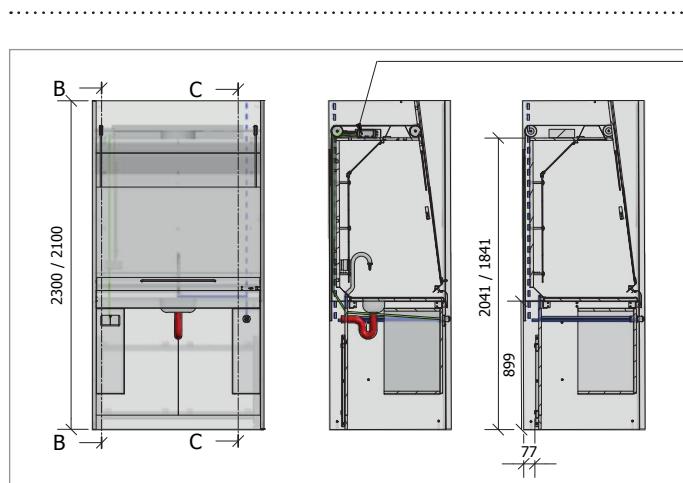

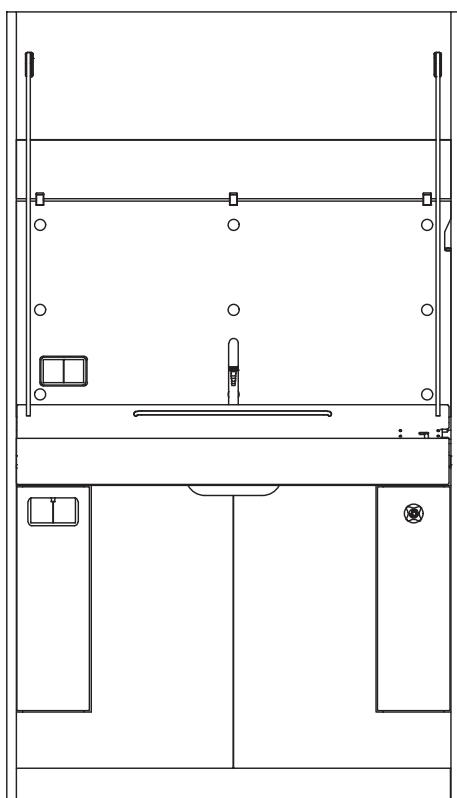

Max. top edge of glass sash: Zafe 81: 2352 and Zafe 82: 2500 mm. Downflow extract can be additionally selected.

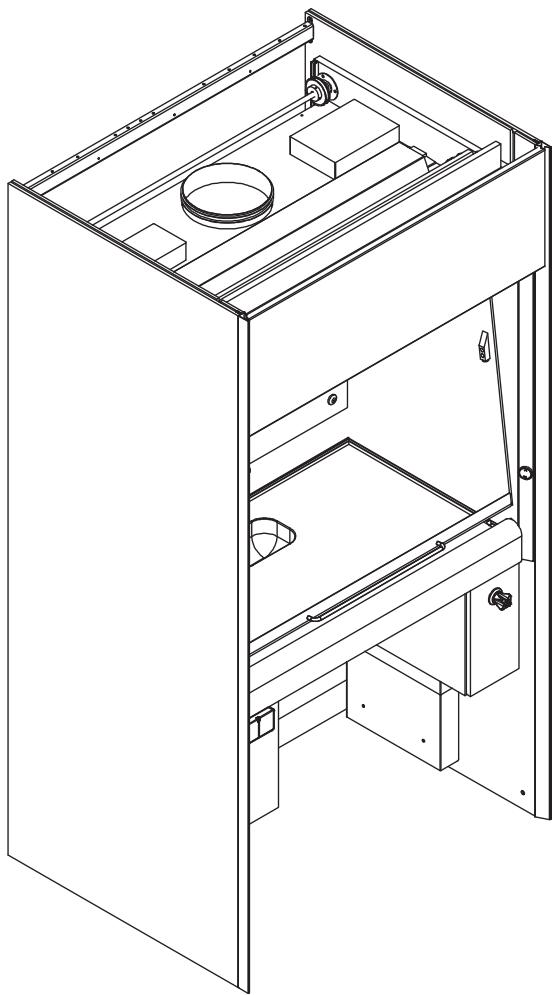

Zafe 81

Zafe 82

## Ergo Zafe 83

The fume cupboard is approved and tested in accordance with EN14175 parts 3 and 6. The fume cupboard has been tested and approved with an air speed of 0.3 m/s.

Ergo zafe 83, height 2300 mm.

Available with 1xdouble 230V internal socket,  
Optional placement, right or left.

Upwards-sliding sash with belt drive for added security.

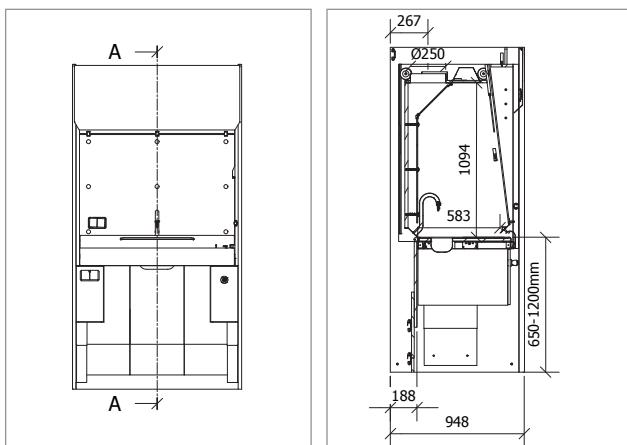

Built-in sash stop at 500 mm door opening.

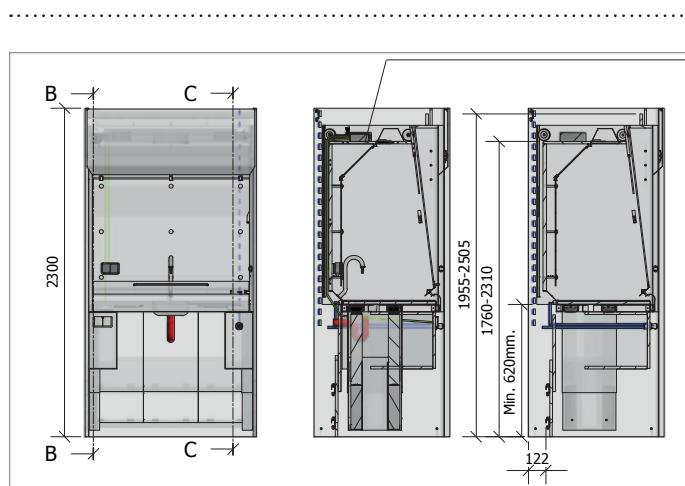

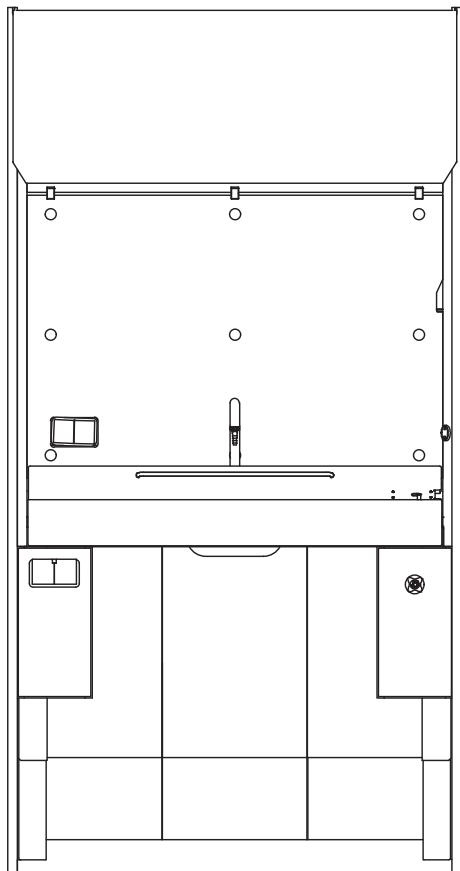

Ready for scaffold bars which allow high setups or shelves.

Sash opening: 50-670 mm.

Max. top edge of glass sash: 2660 mm.

Downflow extract can be additionally selected.

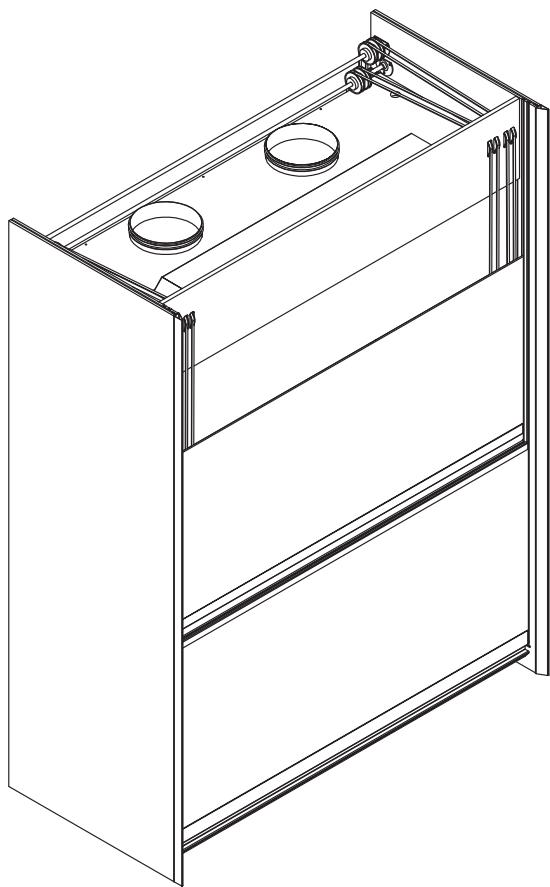

Approx. 2 metre cable for electrical connection

Routes

Green = Electrical  
Blue = Plumbing  
Red = Drain

## Zafe walk in 87 and 88

Zafe Walk in 87 and 88, height 2300 and 2100 mm.

Available with 1xdouble 230V internal socket,  
Optional placement, right or left.

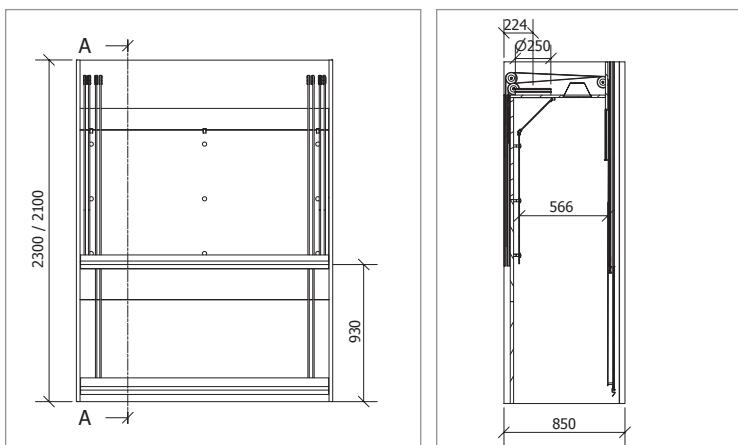

2 lifting sashes with belt drive for added security.  
The front sashes open independently of each other.  
Lower door's upper edge is 930 mm.

Ready for scaffold bars which allow high  
setups or shelves.

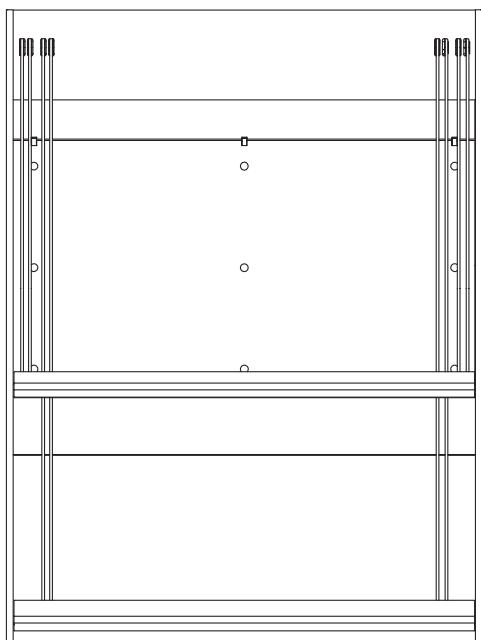

A rolling table can be additionally selected. Standard height is  
930 mm.

Sash opening: 50-1668 mm.

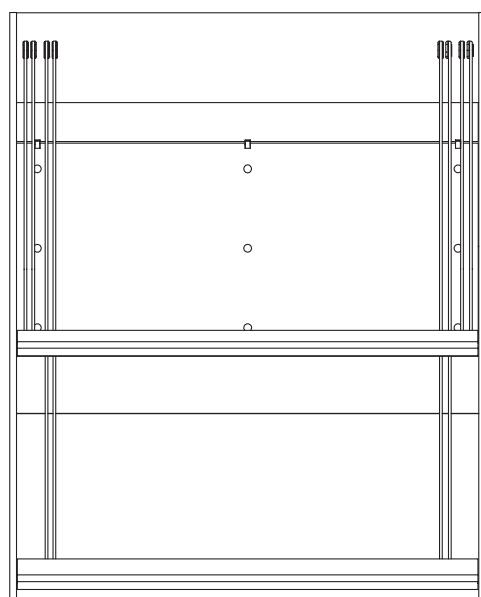

Max. top edge of lower glass sash: 2616 mm.  
Max. top edge of upper glass sash: 2710 mm., 2710 mm.  
Downflow extract can be additionally selected.

Carbon dioxide	2563302
Helium	2563303
Oxygen	2563304
Argon	2563305
Hydrogen	2563306

Output pressures can be selected as follows: 0-1.5 bar. 0-5 bar. 0-10 bar. 0-45 psi. 0-75 psi. 0-150 psi

As a different contractor often provides intermediate and connection hose/tube, these are not included.

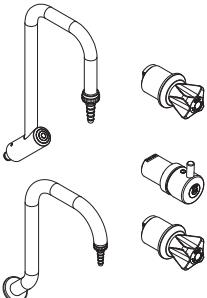

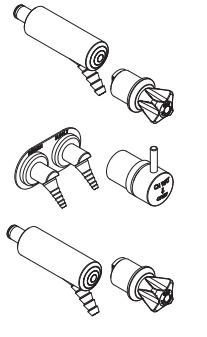

Regulator and discharge spout is provided with mounted fittings for connection of Ø6 pipe-free pipe or hose.

If flex tubing for clean gas are desired, these can be purchased additionally.

# Zystm® · Faucets in fume cupboards

incl. 2 m intermediate hose and 2 m connecting hose

Zystm has a modern metal production, where CNC machines ensure high flexibility and product quality.

In connection with metal production, there is a high-capacity powder coating system. Here, flexibility is paramount yet again.
