Universal 2nd Generation SKVM

Belkin's Universal 2nd Generation Secure KVM series combines cutting-edge cybersecurity provisions, video performance, and user experience to deliver a no-compromise solution for the most demanding applications. Compatible with a unique KVM Remote with Integrated Keyboard, combining the KVM channel selection with a backlit, mechanical USB keyboard reduces operator error and declutters the desktop.

The color of efficiency

Customizable port coloring and naming on the front panel of the Universal 2nd Gen facilitates channel identification and reduces operator errors.

- Available in 2-, 4-, 8-, and 16-channel ports with a choice of single or dual monitors for 1-8 port models, single monitor for 16-port model

- Future-proof design supports current and upcoming video standards at up to 4k@60Hz with optional passive and active TAA compliant cables

- Optional SKVM remote with integrated keyboard supports full KVM switching control for the ultimate operator experience

- Certified for NIAP Protection Profile 4.0 to meet the highest security standards

- USA-based free technical support

Control the KVM from the keyboard

The industry-first Belkin KVM Remote with Integrated Keyboard provides full control of the SKVM, allowing it to be located off the desk for a clean and decluttered workstation. The keyboard's LED backlighting and status indicators mimic the SKVM's front panel configuration to reinforce the security enclave the operator is working on, minimizing operator error while enhancing workspace ergonomics.
