Master License Agreement (MLA) Price List - June 2004 with Additions/Deletions through February 2005 Product Availability and Price List	Pricing		
Product Description	Class	Part Number	US Dollar

While every effort is made to ensure the price list is as current as possible at time of publication, Novell Product Announcements (NPAs) may be issued which supersede information found within the price list. Please refer to NPAs for the most updated information regarding product information and pricing.

Special Note: A column has been added to the price list showing the lead time classification for each product. This classification system indicates the expected average number of days for product to be shipped from Novell after receipt of customer order. Products are classified into three main categories:
- **"e" – electronic/billing parts, 1 day average lead time**
- **"1" – physical parts, 3 day average lead time**
- **"2" – physical parts, 5 day average lead time**

Certain products require a longer lead time for delivery depending upon ordering location. *For EMEA customers*: please expect a 3 - 4 week lead time for the following language-specific products: Chinese, Korean, Japanese and Portuguese; all Volera Excelerator, Controller, and Accountant products. For NALAAP customers: please expect a 3 - 4 week lead time for the following products: All 56 bit (regardless of language) and Japanese, Russian, Polish, Czech, Hungarian, Dutch, Scandinavian, Hebrew, Arabic, and German languages.

---

*878-xxxxxx-001 e-Software Media Kits:

ISO Image eMedia Kits require the download of one or more ISO images. These ISO images are electronic duplicates of the CDs that are included in the physical software media kit. After downloading the ISO image(s), you will be required to "burn" that ISO image onto a CDR in order to install the product. Once the CDR is burned, you can proceed to install the product as if you had received CDs in a physical software media kit. If the description of the media kit does not specify Executable File (EXE) then the files to be downloaded are ISO Images.

Executable File eMedia kits require the download of one or more executable files. Unlike the "ISO Images" eMedia kits, you will not be required to "burn" CDRs in order to install the product. The software is installed by simply running the executable file(s) you have downloaded. These eMedia kits will have "Executable Files" or "EXE" in their descriptions.

Network Operating Systems

**The Local Currency column should not be used with US Dollars.

NetWare 6.5

NetWare 6.5 is the most reliable services platform for delivering secure, non-stop access to network and information resources; engineered to deploy business critical, open source-enabled services. With NetWare, Novell provides customer choice and flexibility, greater application interoperability, continuous availability, and tools that deliver new levels of productivity. NetWare 6.5 provides the customer with an open gateway and ideal path for adopting the NetWare strategy that includes future support for Linux.

Network Operating Systems

NetWare® 5.1

NetWare 5.1 offers the most robust, scalable platform for deploying Web-based centralized management of heterogeneous networks, including desktops, resulting in dramatic savings in administration costs over systems that are not directory based. NetWare 5.1 is the most trustworthy server operating system available, delivering high reliability, fast performance, and the tightest possible security across public networks. Built-in scalability lets you expand your network to Internet proportions involving millions of users and network resources, while realizing maximum value from your current network infrastructure.

Novell® Upgrade Wizard

Novell Upgrade Wizard is available for free download from Novell's Internet Web site at http://www.novell.com/download Novell Upgrade Wizard is an easy-to-use migration tool that allows you to quickly and easily upgrade your existing NetWare 3 infrastructure. The utility makes migrating your NetWare 3 bindery and file system as easy as dragging and dropping an object from one location to another. Key features include: Drag and drop modeling capability, ability to migrate both the NetWare 3 bindery and file system in a single GUI utility, password migration functionality, simple print component migration, option to establish migrated users' rights based on existing user template, option to create new user templates for migrating users, ability to create new containers and subdirectories in the existing Directory tree, notification of possible errors and ability to correct these errors before migration, and progress bar indicating percent completion. Novell Upgrade Wizard runs on both Windows 95 and Windows NT workstations.

Network Operating Systems

NetWare® 4.2

NetWare 4.2 is a proven network solution that gives Internet-enabled businesses more effective management and control of their increasingly complex networks to lower the cost of network ownership. It is built on the field-proven NetWare 4 with NDS and includes all reliability updates for increased dependability. Plus it is fully compatible with NetWare 5. The Z.E.N.works Starter Pack enables more efficient, centralized administration of network workstations. In addition, the Netscape FastTrack Web server, a new version of the Multi-protocol Router, and new versions of the Perl and NetBasic scripting tools make NetWare 4.2 an outstanding network for Internet and intranet integration.

Novell Native File Access Pack

The Novell Native File Access Pack overcomes the need to install special client software on Windows, Macintosh, and Unix systems for access to storage on NetWare 5.1 servers. This server-based solution allows a broad range of clients to access NetWare storage right out of the box. Virtually any client can securely access their data from any location and user management for disparate client operating system is simplified through Novell Directory Services® (NDS®).

Red Carpet Enterprise 2.0

Red Carpet" Enterprise" is a powerful and secure Linux software management solution that provides IT administrators and managers with centralized control over Linux software configurations across their server and workstation infrastructures. Red Carpet Enterprise provides automated and intelligent Linux package dependency analysis and conflict resolution for smoother software installations; plus unprecedented control features for scheduling updates of Linux software to user-defined groups of systems across an enterprise. The result is a complete Linux software management system that helps to cut IT costs by dramatically reducing the required overhead needed to manage Linux software package updates.

Advanced Network Services

Novell Cluster Services 1.7

Novell Cluster Services (NCS) 1.7 is a cost-effective storage area network (SAN) management solution that ensures secure, non-stop access to mission critical data and resources from both server based applications and databases (Groupwise, Apache, MySQL, PHP and other J2EE Web Applications) and those using native file access protocols of client workstations including Novell, Windows, UNIX, Linux, Macintosh, Web and Internet clients and servers. NCS 1.7 easily scales up to meet expanding service and storage requirements by allowing up to 32 NetWare 6 servers in a cluster and up to 32 processors per server.

Note: Because the software for NCS 1.7 is included in NetWare 6.5 there is no separate software media kit for NCS 1.7. All of the necessary documentation and media for NCS 1.7 is included in the NetWare 6.5 Software Media Kit.

Advanced Network Services

NetWare Cluster Services 1.01 for NetWare 5 or 5.1

NetWare Cluster Services 1.01 allows from two to 32 NetWare 5 or 5.1 servers to be joined into a single all-active cluster providing higher levels of availability, manageability, and scalability for all servers. Leveraging the power of NDS, and Novell's Java based ConsoleOne, NWCS 1.01 provides a single point of administration for installing, configuring, and administering the cluster. By storing all cluster-related information in NDS, NWCS 1.01 allows for the failover of any server to any or all of the other servers in the cluster. NWCS 1.01 allows for the implementation of a storage area network to maximize hardware investments and reduce the costs of data storage management.

NWCS 1.01 improves on version 1.0 by allowing the dynamic addition of servers to the cluster without taking the cluster down or even reconfiguring cluster resources, improved volume management capabilities and safeguards, and multiple ConsoleOne enhancements. In addition, NWCS v1.01 is localized to the following languages: English, Portuguese, French, German, and Spanish.

Advanced Network Services

Novell Replication Services 1.21

Novell Replication Services (NRS) 1.21 is a scalable software application for synchronized replication and distribution of information across wide area networks. NRS replicates critical corporate information, providing local access and a consistent view to all users. Replication is secure and manageable because NRS leverages Novell Directory Services (NDS). NRS protects against file corruption and data loss due to equipment failure. Its two-way synchronization automatically detects and resolves file discrepancies, so no files or updates are lost. By optimizing available bandwidth and scheduling replication and synchronization during off hours, NRS lowers WAN communication costs. NRS eliminates manual replication and provides central-point administration with NetWare Administrator, which lowers administration costs. NRS runs on NetWare 4.x and 5.x servers.

Internet/Intranet Security

Novell BorderManager 3.8

Novell® BorderManager® is one of the premier firewall & VPN technologies that enable secure identity management solutions. With its powerful directory-integrated features, you can control your users' access to corporate resources and monitor their Internet activities. Novell BorderManager leverages identity-based access control to ensure that your mobile employees have secure, role-based remote access to non-Web applications from any location. Moreover, forward proxies enable you to safeguard your network against undesirable Internet content.

Novell BorderManager 3.8 replaces the following products on the Novell Price List:
 - Novell BorderManager 3.7
 - Novell Modular Authentication Services (NMAS) Enterprise Edition 2.1

Note: BorderManager 3.8 no longer requires the separate license flopy. The license is included on the product CD.

Related Service Offerings

Novell offers a wide-range of Consutling, Education, and Support Services to enable you to tap the full potential of your Novell products. For a detailed listing of Novell Services, please see the "Novell Customer Services" section found within this Price List.

NetWare® NFS Services 3.0

NFS v3.0 delivers open, Internet-standard file services, including Web NFS, to mixed NetWare and Unix environments, integrating PCs, minis, mainframes and clients. The NFS Server and Gateway allow bi-directional file sharing between NetWare and Unix Platforms.

NetWare NFS Gateway

NFS Gateway for NetWare 6.0 provides the ability for NetWare servers to access Unix/Linux NFS exported file systems. The Unix/Linux exported file system appears as an NSS volume on the NetWare Server to NetWare applications and workstation clients. Building on the NFS Gateway technologies delivered in NFS Services for NetWare 3.0, the NFS Gateway for NetWare 6.0 integrates with the NSS file system as opposed to prior versions which integrated with the NetWare Traditional file system. This leads to greater performance and scalability of the NFS Gateway service; handling more files and directories with better performance than previous versions.

Directory Services

Novell Nterprise Branch Office 2.0

Novell is pleased to announce Novell Nterprise Branch Office 2.0. Novell Nterprise Branch Office is server software that lets you securely centralize control, reduce costs, and deliver a consistent, reliable user experience regardless of location. Nterprise Branch Office 2.0 licensing is available on a per-server basis. Each server license supports up to 250 branch office users.

Novell Nterprise Branch Office takes the "Remote" out of the Remote Office by delivering employees the same level of service regardless of location. Nterprise Branch Office delivers a fault tolerant, enterprise-class experience while reducing costs and increasing productivity. Nterprise Branch Office lets enterprises simplify directory management, deliver improved experience, automate branch office back up, eliminate onsite IT, and leverage standards and low-cost Internet connections.

Novell Nterprise Branch Office 2.0 Promotion

Novell is pleased to announce a new promotion for Novell Nterprise Branch Office 2.0 for customers that received Nterprise Branch Office 1.0 with NetWare 6.5.

NetWare 6.5 customers can upgrade to Nterprise Branch Office 2.0 by purchasing a single upgrade license and maintenance part number for the price of maintenance.

Novell Nterprise Branch Office is server software that lets you securely centralize control, reduce costs, and deliver a consistent, reliable user experience regardless of location. Nterprise Branch Office 2.0 licensing is available on a per-server basis. Each server license supports up to 250 branch office users.

Promotion end date: July 31, 2004

Nsure Audit 1

Novell Nsure Audit collects security and system and application event data and filters the collected information to trigger real-time notifications, provide real-time monitoring and perform centralized logging to a single data store in a non-repudiative manner. Nsure Audit is a key component of the Novell Nsure secure identity management solution family.

Note: The Nsure Audit 1.0 license and maintenance part numbers are valid for use with the Nsure Audit 1.0.1 media.

Novell Nsure Identity Manager 2.0
Novell DirXML has been renamed Novell Nsure Identity Manager to reflect the comprehensive identity management capabilities delivered in the product.

Nsure Identity Manager is a comprehensive identity management suite which streamlines user administration processes to help organizations reduce their management costs, increase productivity and security, and comply with industry regulations. Nsure Identity Manager provides capabilities for managing the full user life-cycle, including provisioning/deprovisioning, password management, and metadirectory capabilities.

All Nsure Identity Manager 2.0 products listed here use the single e-Software media kit listed below. Product requires activation. Software installs as a 90-day evaluation unless activated.

Nsure Identity Manager Driver Groups do not include activation for the DirXML Engine. In order to run a driver group past the 90-day evaluation, you must also activate the DirXML Engine which is contained in either the Nsure Identity Manager 2.0 Professional Suite or the Nsure Identity Manager 2.0 Server product.

DirXML 1.1a

DirXML is a data sharing service that provides integration capabilities for universal connections between disparate resources, so they work together as one Net. DirXML creates XML-based pathways that allow identity-based information to flow freely between applications, data stores and network platforms, regardless of technical or organizational boundaries – inside or outside firewalls. This creates streamlined administration and control of identities, as well as uniform data integrity and automated efficiency that spans all network resources. As a result, DirXML enables effective communication between applications, data stores and network platforms; ensures data consistency within and between organizations; and powers enterprise and eBusiness transformations by accelerating the flow of information throughout the extended enterprise.

Note: The DirXML 1.1a software will be available for download at: http://download.novell.com/sdMain.jsp. Product requires "activation" prior to installation and use in a production environment. See http://www.novell.com/products/nds/dirxml/ for details.

DirXML Driver 4.0 for PeopleSoft

With the DirXML Driver 4.0 for PeopleSoft, customers can bi-directionally share and synchronize data between Novell eDirectory version 8.6x and a PeopleSoft application running on the latest version of PeopleTools. This driver is designed as a functional upgrade to prior releases of the PeopleSoft driver.

DirXML is a flexible data sharing service that allows data to be freely shared between applications, databases, and directories and with business partners and customers outside the firewall. DirXML extends the data replication and synchronization capabilities of Novell eDirectory™ to other data sources, eliminating the isolation of data. With DirXML, enterprises can reduce administration costs and improve productivity, build customer relationships through highly customized services, and remove interoperability barriers that inhibit eBusiness success.

The DirXML Driver 4.0 for PeopleSoft software is available for download at: http://download.novell.com/sdMain.jsp This product requires "activation" prior to installation and use in a production environment. See http://www.novell.com/products/nds/dirxml/ for details.

DirXML Driver 1.0 for SAP HR

The DirXML Driver 1.0 for SAP® HR synchronizes personnel data between the SAP HR database and Novell eDirectory. This driver technology enables data to flow within a business enterprise based on its own unique requirements, and eliminates the labor-intensive and error-prone practice of re-entering the same data into multiple databases. Since the SAP HR system is the authoritative source of personnel information, the driver allows administrators to propagate this data to other non-SAP business applications and databases without the need for custom integration solutions. Administrators can decide what data will be shared and how the data will be presented within their enterprises.

Note: The DirXML 1.0 for SAP HR software will be available for download at: http://download.novell.com/sdMain.jsp. And product requires "activation" prior to installation and use in a production environment. See http://www.novell.com/products/nds/dirxml/ for details.

DirXML Driver 1.6 for JDBC

The DirXML Driver 1.6 for JDBC provides data integration between Novell eDirectory™ and databases that support Java Database Connectivity (JDBC). Unlike most DirXML drivers that interface with a single, well-defined application, this driver can interface with most relational databases and database-hosted applications.

Note: The DirXML 1.6 for JDBC software is only available as part of the DirXML 1.1a software media. The e-software for DirXML 1.1a is available for download at: http://download.novell.com. Product requires "activation" prior to installation and use in a production environment. See http://www.novell.com/products/nds/dirxml/ for details.

Novell Account Management 3

Novell Account Management 3 is a big step forward in simplifying cross-platform management of user and group accounts. Unlike previous releases of Novell Account Management (NAM), version 3 is completely integrated across all platforms, providing a central point of management for user and group account information stored within the security systems on the various operating systems with an enterprise network.

The software for this product is available as a free download from http://download.novell.com. This product requires activation. If not activated, this product will expire 90 days after installation. For detailed information about Novell's product activation process, please visit http://www.novell.com/partners/partnerplace/epd/product_activation_basics.htm.

Note: The media listed below contains the latest Account Management 3.0.2 software. If you're currently using Account Management 3, no new licenses are required to run/install Account Management 3.0.2.

Directory Services

Novell Secure Access Suite

Novell Secure Access is a suite of access and security products that simplify, secure, accelerate, and extend identity management to applications, platforms, databases, and network resources.

Today's traditional, best-of-breed, access and security solutions often have their own identity stores and security policies. Having to maintain multiple identity stores and security policies introduces significant security vulnerabilities, increases administration and support costs, and reduces the quality of the end user experience. Additionally, such solutions don't provide a mechanism for enforcing a consistent access control and security policy for the many users an organization encounters.

Novell Secure Access enables organizations to remove many of these vulnerabilities, reduce administrative and support costs, and improve the end user experience by unifying the management of identity and access control.

Products Included:

Novell Secure Access has been updated to include of Novell Account Management 3.0 (which replaces NDS-Authentication Services 3.0), Novell Modular Authentication Service Enterprise Edition 2.1, Novell SecureLogin 3.0.4, Novell iChain 2.2, and BorderManager Enterprise Edition 3.7.

File System Factory

File System Factory allows for easy provisioning, management, and cleanup of user home directories and group storage, while providing disk storage to all network users and collaborative storage to working groups.

Using storage management polices stored in eDirectory, the product works with any user provisioning process, including DirXML, LDAP, custom code, batch processes, or manual data entry to automate storage management. File System Factory makes it easy to adapt to newer provisioning processes, and is the perfect tool for customers who are looking for automating and efficiently managing the allocation of group storage resources and home directories for users.

High Availability Messaging Solution

Messaging has become mission critical in most environments. With many businesses e-mail drives the business. If the e-mail stops the business stops.   High availability of the messaging system is no longer a luxury -- it is a competitive business requirement. The Novell High Availability Messaging solution simplifies the move from where you are today to always on messaging. Novell and key partners combine all of the net services software, servers, storage, and services needed to implement a non-stop messaging environment.

Please note that there are no license and maintenance part numbers associated with Novell High Availability Messaging. Customers should purchase license and maintenance using the existing part numbers for NetWare 5.1, Novell Cluster Services 1.01, and Novell GroupWise 6 respectively.

Network Management (NetWare and Windows NT)

ZENworks 6 Suite

Novell ZENworks delivers a comprehensive set of integrated tools that automate IT management processes across the lifecycle of desktops, laptops, servers and handhelds. Novell ZENworks maintains and enforces directory-based policies to dynamically manage the interactions between users, applications and other resources based on their unique identities. With Novell ZENworks, you can dramatically reduce IT costs compared to just "point" tools by managing resources throughout your diverse enterprise and changing work environments. The comprehensive and integrated capabilities of Novell ZENworks provide the technology foundation for organizations to align resources with business objectives while reducing costs.

The DirXML and Handhelds Management components require activation. For detailed information about Novell's product activation process, please visit http://www.novell.com/partners/partnerplace/epd/product_activation_basics.html.

Network Management (NetWare and Windows NT)

ZENworks for Servers 3

ZENworks for Servers is the cross-platform solution for server content and configuration management that helps everything work together as one Net. It provides server consistency by empowering administrators to manage server content, configurations and procedures across server groups that include Windows, Linux, Solaris and NetWare platforms. ZENworks for Servers allows IT professionals to capture and automate key server administrative processes, creating self-managing networks. This increases management efficiency, enabling administrators to securely manage servers with less work and freeing them to focus on strategic initiatives instead of routine server management tasks. As a result, Novell customers get a stable and resilient server environment, embedded network intelligence and a server management solution that pays for itself and more — with an ROI reward in as little as three months and a three-year ROI of up to 2,000% (with ZFD).

Product Upgrades:

ZFS3 is the upgrade path for ManageWise; all ManageWise customers may upgrade to ZFS3 at the upgrade price. All ManageWise customers with maintenance may upgrade their licenses to ZFS3 and must purchase ZFS maintenance at the time of their upgrade.

Licensed users of the following products also qualify for upgrade pricing. Computer Associate's Software Distribution Option (SDO), HP OpenView for Windows Professional Suite, HP OpenView Network Node Manager, IBM Netfinity Manager, LANDesk Management Suite, Novadigm Radia Management Suite, Tivoli IT Director, Microsoft System Management Server (SMS).

Note: The media kits listed below contain the new ZENworks for Servers 3.0.2 software. No new licenses are required to use this updated software.

Network Management (NetWare and Windows NT)

ZENworks for Desktops 4

Personality Migration is now available with ZENworks for Desktops 4. Existing ZENworks for Desktops 4 customers can obtain Personality Migration by ordering the media kit.

ZENworks for Desktops 4 provides enterprise Windows desktop lifecycle management regardless of the location of the managed PC or laptop. ZENworks for Desktops 4 delivers workstation and user environment management inside the firewall, outside the firewall, across the public internet, through dial-up and other slow connections or even for totally disconnected users.

ZENworks for Desktops 4 includes Novell eDirectory and DirXML Password Synchronization allowing customers with Microsoft server, NT domain and Active Directory environments to seamlessly integrate their Desktop Management with their existing infrastructure. These DirXML components require activation. If not activated, the DirXML components will expire 90 days after installation. For detailed information about Novell's product activation process, please visit http://www.novell.com/partners/partnerplace/epd/product_activation_basics.html.

ZENworks for Desktops 4 also integrates as part of the product ZENworks Preboot Services providing total hands-off, centralized imaging of the desktop OS.

Network Management (NetWare and Windows NT)

ZENworks for Handhelds 5.1

Novell ZENworks for Handhelds 5.1 automates handheld device management to reduce high ownership costs, strengthen security, and increase user productivity on Palm, Windows CE, Pocket PC, and now RIM Blackberry devices. With ZENworks for Handhelds, IT administrators can enforce the use of passwords, deploy standard images and content, update applications, identify lost devices, lockdown configurations, and monitor license compliance. Novell ZENworks improves workforce productivity and removes the burden of self-support off the individual users by automating set-up and maintenance while reducing help desk calls by ensuring set-up is done correctly

The software for this product is available as a free download from http://download.novell.com. This product requires activation. If not activated, this product will expire 90 days after installation. Novell Customer Services

Novell Premium Service--United States

Novell is pleased to announce the availability of the newly revised Premium Service program to customers in the United States of America. Novell Technical Services is taking service and support to a higher level with the introduction of an improved support and services program to address specific customer needs. Novell has refined and simplified the Premium Service and Net Solutions Support offerings by integrating the two support programs. The new Premium Service program provides a personalized and accessible relationship with Novell's most experienced support engineers.

Novell has created a feature-rich Premium Service program that offers several different degrees of support for your evolving network. Every level of Premium Service delivers reliable response times, offers skilled Technical Support Engineers, and provides valuable support tools and training opportunities, including a site license for the Novell Support Resource Library technical subscriptions, materials to help you resolve any network problem or issue.

Depending on the level of service you select, the following benefits are also available:
24-hour service, seven days a week
Access to a Service Account Manager
Access to an Advantage Support Engineer
Access to a Primary Support Engineer
Access to a Dedicated Support Engineer
BrainShare® Passes

Novell Service Modules

Novell Service Modules are designed to give you additional help with mission-critical projects. Add a Novell Service Module to your Premium Service agreement any time you need additional services or to acquire a higher level of service during a specific period for planned activities. Novell has ascertained the most beneficial and recommended services for the implementation, optimization and scheduled maintenance of your business system-and developed Service Modules to help you with each critical phase. Each module starts with a baseline offering at a baseline purchase price, and each can be customized and scaled to meet your needs.

Net Solutions Services Module: Designed specifically for customers who are implementing Novell's newest and most highly customizable solutions (Nsure, exteNd and Nterprise). This module ensures that you have the right resources at the time you need them to assist you with your unique configuration and ensure that your solution is supportable following implementation.

Net Solutions Services Module-US	e	051-002080-001	$19,000.00

Implementation Services Module: Let the experts at Novell implement upgrades and migrations for you. Getting it right the first time is invaluable when it comes to implementing business systems technologies. Mistakes made here are costly in too many ways to count. To get you up-and-running smoothly, Novell offers the Implementation Service Module-walking you through your upgrade or migration with project management, analysis, and piloting. Novell supports you throughout the entire process, allowing you to quickly take advantage of your new technologies and to leverage all the rich features that can make such a competitive difference for your organization-immediately.

Implementation Services -US	e	051-002083-001	$30,000.00

Proactive System Analysis Services Module: If you want to know where your business system stands in relation to peak efficiency, this service module gives you the answers-and a definitive roadmap of how to get your system to its peak. With this analysis, you not only deflect unseen problems proactively, you optimize your existing investment to a fine degree-one that pays productivity and efficiency dividends for your company.

Proactive System Analysis-US	e	051-002074-001	$15,000.00

For more information, visit our web site at http://services.novell.com/premium or to purchase a support contract please contact your Novell Sales Representative.

Premium 1000-US	e	051-002045-001	$5,800.00
Premium 2000-US	e	051-002046-001	$16,000.00
Premium 3000-US	e	051-002047-001	$38,000.00
Premium 3000 ASE-US	e	051-002048-001	$65,000.00
Premium 4000 PSE-US	e	051-002049-001	$155,000.00
Premium 5000 DSE-US	e	051-002050-001	$375,000.00

An MLA Premium Service customer may upgrade to another Premium Service level simply by paying the difference in retail price between the entitled level of service and the level to which you want to upgrade.

Premium Additional 5 Incident Pack-US	e	051-002073-001	$2,375.00

Premium Service customers are entitled to a specific number of Technical Support Engineer (TSE) incidents--assistance with one issue, problem or question relating to the use or installation of a Novell product, regardless of the number of communications required. Additional incidents may be purchased in packages of five or ten and adhere to the response targets of your Premium 1000-5000 package.

Scheduled Standby (4 Hours) US	e	051-000843-001	$1,000.00

Premium Service customers may also purchase Scheduled Standby to ensure an experienced support engineer is standing by to exclusively assist in everything from routine maintenance to updates and major system upgrades. With Scheduled Standby, a Premium Service engineer becomes familiar with the system and planned changes, advises customers on preparation and implementation, and is ready to assist with any unexpected problems. A guaranteed, 15-minute response time ensures that assistance is nearby.

ASE Scheduled Standy (8 Hours) US	e	051-002079-001	$1,500.00

Premium Service customers who have an Advantage Support Engineer (ASE) may want to have access after hours for specific project work and receive assistance from their ASE. Projects where the ASE can provide technical support assistance after hours include patch updates, migrations, upgrades to new versions of Novell software and other maintenance activities associated to the customer's Novell environment. ASE customers can purchase a Scheduled Standby in 8 hour blocks to be used after core Novell business hours including weekends and holidays. Customers should schedule these ASE Scheduled Standby services with their Service Account Manager and their ASE at least two weeks in advance. Subject to availability.

Onsite Support: 1 day (plus Travel Expenses) US	e	051-002075-001	$2,200.00

Novell provides customers with the option of purchasing on-site technical support when necessary.   For each request, Novell sends the most qualified support engineer available. This service is billed on a per-day basis, plus associated air travel expenses.

Additional Primary Support Engineer-US	e	051-002077-001	$82,000.00

A Primary Support Engineer (PSE) is a semi-dedicated resource that is assigned to only a few accounts, handling all customer support calls within his or her area of expertise. The PSE is available during Novell's business hours and after hours for high-severity issues. Think of it as having a Novell expert on staff--someone right there when you need them.

Novell Customer Services

Novell Premium Service--United States (continued from previous page)

Additional Dedicated Support Engineer-US   e   051-002078-001 $275,000.00

Dedicated Support Engineers (DSE) are Novell's top support engineers and are selected based on the technical expertise required by your organization. Their primary function is to be an expert resource, assigned to one Premium Service customer only. The customer works with the DSE to solve technical issues, discuss the status of open incidents, or escalate incidents. The DSE is available during Novell's business hours or after business hours for high-severity issues.

Additional Advantage Support Engineer-US   e   051-002076-001 $50,000.00
An Advantage Support Engineer (ASE) provides the first level of personalized support-a relationship that manages issues from recognition to resolution. ASEs are located in the Novell call center and are available over the phone during Novell Technical Service core business hours of 6:00am to 6:00pm MST.

*Note: Additional copies of the Novell Support Connection CD are available at a discount directly to MLA Premium customers and to customers with CNE/CNI/MCNE certifications. The customer, not the reseller, must contact the fulfillment house directly to get these discounts. US and Canadian customers can get more information by calling (800) 377-4136. International customers can call (303) 297-2725. Inquiries can also be E-mailed to nsc@hibbertco.com.

MLA customers receive a 10% discount off of the retail price on Premium Service purchases.

Novell Customer Services

Novell Premium Services Options - Europe, Middle East, and Africa

Novell is pleased to announce the availability of the newly revised Premium Service program to customers in Europe, Middle East and Africa. As the leading provider of Net services software, Novell is known for its innovative solutions that meet business-critical needs. Now, Novell Support Connection is taking service and support to a higher level with the introduction of a five-level Premium Service program. Completely overhauled and improved to address specific customer needs and improve service offerings, the new PremiumService program is your direct support connection, providing a personalized and accessible relationship with Novell's most experienced support engineers.

Novell has created a feature-rich Premium Service[SM] program that offers several different degrees of support for your evolving network. Every level of Premium Service delivers reliable response times, offers skilled Technical Support Engineers, and provides valuable support tools and training opportunities, including a license for the Novell Support Connection® CD and LogicSource™ products. You have both outside technical resources and comprehensive reference materials to help you resolve any network problem or issue. Depending on the level of service you select, the following benefits are also available:

     24-hour service, seven days a week
     Access to a Service Account Manager
     Access to a Primary Support Engineer
     Access to a Dedicated Support Engineer
     BrainShare® Passes

Determined to provide the flexibility you need in times of rapid growth, Novell has made it easy to customize your Premium Service agreement. Additional options include on-site technical support, scheduled standby support, Proactive Analysis Team Visits and individual LogicSource CD-ROMs.

Premium Service customers are entitled to a specific number of Technical Support Engineer (TSE) incidents--assistance with one issue, problem or question relating to the use or installation of a Novell product, regardless of the number of communications required. Additional incidents may be purchased in packages of five or ten and adhere to the response targets of your Premium 1000-5000 package.

Novell Service Modules

Novell Service Modules are designed to give you additional help with mission-critical projects. Add a Novell Service Module to your Premium Service agreement any time you need additional services or to acquire a higher level of service during a specific period for planned activities. Novell has ascertained the most beneficial and recommended services for the implementation, optimization and scheduled maintenance of your business system-and developed Service Modules to help you with each critical phase. Each module starts with a baseline offering at a baseline purchase price, and each can be customized and scaled to meet your needs.

Novell Customer Services

Novell Premium Services Options - Europe, Middle East, and Africa
(continued from previous page)

Net Solutions Services Module: Designed specifically for customers who are implementing Novell's newest and most highly customizable solutions (Nsure, exteNd and Nterprise). This module ensures that you have the right resources at the time you need them to assist you with your unique configuration and ensure that your solution is supportable following implementation.

Net Solutions Services Module Standard-EMEA	e	051-002024-001	$13,200.00
Net Solutions Services Module-EMEA	e	051-002025-001	Varies

Proactive System Analysis Services Module: If you want to know where your business system stands in relation to peak efficiency, this service module gives you the answers-and a definitive roadmap of how to get your system to its peak. With this analysis, you not only deflect unseen problems proactively, you optimize your existing investment to a fine degree-one that pays productivity and efficiency dividends for your company.

Proactive System Analysis Standard-EMEA	e	051-002039-001	$12,000.00
Proactive System Analysis Tailored-EMEA	e	051-000202-001	Varies

Onsite Support: Service Account Manager (+Travel Expenses)-EME	e	051-000168-001	$1,500.00
Onsite Support: Premium Support Engineer (+Travel Expenses)-EM	e	051-000169-001	Varies***

Novell provides customers with the option of purchasing on-site technical support when necessary. For each request, Novell sends the most qualified support engineer available. This service is billed on a per-day basis, plus associated travel expenses.

Additional Primary Support Engineer - EMEA*	e	051-000170-001	$87,000.00

A Primary Support Engineer (PSE) is a semi-dedicated resource that is assigned to only a few accounts, handling all customer support calls within his or her area of expertise. The PSE is available during Novell's business hours. Think of it as having a Novell expert on staff--someone right there when you need them.

Additional Dedicated Support Engineer - EMEA**	e	051-000171-001	$285,000.00

Dedicated Support Engineers (DSE) are Novell's top support engineers and are selected based on the technical expertise required by your organization. Their primary function is to be an expert resource, assigned to one Premium Service customer only. The customer works with the DSE to solve technical issues, discuss the status of open incidents, or escalate incidents. The DSE is available during Novell's business hours.

Additional Service Account Manager-EMEA	e	051-002142-001	$14,000.00

Scheduled Standby - EMEA**	e	051-000257-001	Varies***

Premium Service customers may also purchase Scheduled Standby to ensure an experienced support engineer is standing by to exclusively assist in everything from routine maintenance to up dates and major system upgrades. With Scheduled Standby, a Premium Service engineer becomes familiar with the system and planned changes, advises customers on preparation and implementation, and is ready to assist with any unexpected problems. A guaranteed, 15-minute response time ensures that assistance is nearby.

*Customer must have Premium 4000 or Premium 5000 to order.
**Customer must have Premium 5000 to order.

Novell Customer Services

Novell Premium Service - Asia Pacific

Novell Technical Services is taking service and support to a higher level with the introduction of a five-level program - completely overhauled and improved to address specific customer needs and improve service offerings. Existing Premium Service customers will be transitioned to the new program as their current agreement expires. MLA customers qualify for program levels based on paid maintenance. They also qualify for 10% discount on optional services.

As the worlds leading networking company, Novell is known for its innovative solutions that meet business-critical needs. Premium Service from Novell is your direct support connection-providing a personalized and accessible relationship with Novell's most experienced support engineers.

Novell Customer Services

Novell Consulting

Novell Consulting provides enterprises worldwide with customer-driven services and solutions based on Novell technologies. Novell Consulting's Practices of IT professionals provide our customers on-site consulting services that meet their business and network needs.

Business Solution Offerings (BSOs)

These offerings are targeted at the business and IT professional, addressing a specific business technology challenge.

All Novell Consulting business solution offerings begin with a Business Solution Requirements Analysis - a due diligence process of evaluating and defining your project expectations and requirements.

This process delivers a solid understanding of your project objectives and enables proper planning, good communication, and the correct application of technology to satisfy your I.T. and business needs. Cost of each Requirements Analysis ranges from $25,000 to $250,000, based on the complexity of thebusiness solution offering. Often the Requirements Analysis cost is credited back to the customer in the formal project deployment proposal. Regardless, you get a detailed evaluation of your project, including what will be required to make it successful.

MLA Customers receive a 10% discount on Professional Resource Suite purchases.

Novell Customer Services

Novell Technical Subscriptions

Novell Product Toolkits

Novell Product Toolkits are the in-depth technical resource for Novell professionals. Developed specifically for Novell eDirectory™, ZENworks® for Desktops, and GroupWise®, these powerful tools are essential in helping you quickly address complex technical issues yourself. Each Toolkit includes product-specific evaluation and beta software, utilities, LogicSource, and detailed consulting reports. They also include applicable files and information from the Novell Support Resource Library™. Novell Product Toolkits are updated at least quarterly on CD and available by annual subscription. Plus, you can access the latest updates via the Web. Novell Product Toolkits give you the most current, comprehensive, and in-depth resources from Novell anytime, anywhere.

Product Toolkit: GroupWise - Activation Kit: Single	2	00662644444574	$249.00

Product Toolkit: eDirectory - Activation Kit: Server	2	00662644444789	$495.00

MLA Customers receive a 10% discount on Novell Product Toolkit purchases.

Software Evaluation Library (SEL)

The Novell Software Evaluation Library, an annual subscription, will now be updated six to eight times a year.

The Standard version of the Novell Software Evaluation Library is now available to everyone. This version provides a 2-server, 5-user license for testing, development, and evaluation. Fully functional, time-restricted versions of Novell software are included. The retail price of the Standard SEL has also been lowered by $50 to $249 for an annual subscription. Discounted pricing is available to participants in certain Novell programs. Shipping, duties, and taxes are not included in the subscription price. See http://support.novell.com/subscriptions for more information.

Software Evaluation Library - Activation Kit: Standard	00662644444413	$249.00
Software Evaluation Library - Activation Kit: Corporate	00662644444451	$495.00

MLA Customers receive a 10% discount off the retail price of the Novell Software Evaluation Library.

Support Resource Library

The Novell Support Resource Library saves you time and money by placing the latest technical resources at your fingertips. Everything from Support Packs and Technical Information Documents to Cool Solutions, Novell Connection magazine articles, Novell AppNotes® and product documentation are available when and where you need them. Powerful searches help you troubleshoot problems quickly and accurately. There's no waiting for large files to download from the Web. Updated monthly on CD by annual subscription and with Web access for daily updates through the new Subscriber Portal, the Novell Support Resource Library ensures you can handle any technical challenge that comes your way.

This replacement to the Novell Support Connection CD contains all the features you are familiar with and more. With the new Novell Support Resource Library you get:

- More content
- More space for more files
- Upgraded CD search engine
- Subscriber portal
- New packaging

Because this is a subscription product, it will just keep getting better. Each month you will receive additional TIDs, files, and other information on the CD. New information will also be added to the Subscriber Portal. The Novell Support Resource Library provides you with a single source for your Novell technical resource needs.

Support Resource Library - Activation Kit: Single	2	00662644444499	$399.00
Support Resource Library - Activation Kit: Server	2	00662644444536	$795.00

MLA Customers receive a 10% discount on Support Resource Library purchases.

Education

Professional Education Programs

Professional Education Programs offer solutions, directly to the customer, designed for the entire organizational infrastructure, with tailored offerings for executives, line of business managers, consultants, project managers, hands-on technical personnel and marketing and sales professionals. Each audience has unique educational requirements. With Novell solutions, we can match education to each person's role, skill level and job requirements, maximizing their investment in training and expanding expertise at all levels of their organization.

To engage these services, please go to: http://www.novell.com/education/pep/custom_training.html and fill out the engagement form. Your local Area Education Manager will contact you.

Application Training
Application Training focuses on software applications. Currently GroupWise training is our primary offering.
$90 per student per half day (up to 12 students per half day)   e   051-000852-001
