# **Introduction**

## **Golden Gate National Recreation Area**

### **Park Description**

Golden Gate National Recreation Area (GGNRA), a unit of the National Park Service, was established by an Act of Congress on October 27, 1972. The 80,000-acre park encompasses a great diversity of cultural and natural resources in and around the Bay Area of San Francisco, California. It includes Muir Woods National Monument and Fort Point National Historic Site.

The park holds almost five million three-dimensional and documentary artifacts dating from the time before European contact to the present. They are preserved and maintained for the public by the Division of Cultural Resources and Museum Management, which includes the Park Archives and Records Center (PARC).

### **Park Archives and Records Center**

#### **Historical Note**

GGNRA and the sites within it have been collecting records since their inception. The PARC was established in 1994 to receive records and archival collections from the U.S. Army and the Presidio Army Museum after the closure of the Presidio of San Francisco as an Army base. The collections continue to grow through the donation of materials by private individuals, transfer of inactive park records by staff, and acquisition of relevant documentary materials.

#### **Scope of Collections**

The archival collections in the custody of the GGNRA document the history and activity of the various sites and groups associated with the park, described in the park's Scope of Collection Statement (2009).

The PARC contains U.S. Army and National Park Service facility records for the Presidio of San Francisco, forts and coast defense sites in the area, and various GGNRA sites. Subjects and sites documented include the United States Army (Bear Flag Revolt, Civil War, Spanish-American War, Mexican War, World War I, Army Air Service, Coast Artillery, Army medical facilities and issues, World War II, Army support during natural disasters, Viet Nam War, and Operation Desert Storm); Alcatraz Island (Army fortress, Army Disciplinary Barracks, U.S. Penitentiary, and Indian Occupation); the natural resources conservation movement resulting in the establishment of Muir Woods National Monument; agriculture in the Marin Headlands; Point Reyes Peninsula and Bolinas Lagoon areas; U.S. Lifesaving/Coast Guard Services; San Francisco Earthquake and Fire of 1906; Panama Pacific International Exposition of 1915; natural resources and environmental issues; and preservation of open space in the Bay Area. Also

included in the PARC are many of the GGNRA administrative records that document the development and expansion of this park.

### **Visiting the PARC for Research**

The PARC is located in an historic brick building, formerly a cavalry stable, on the Presidio of San Francisco. Collections and archives support services are available for walk-in research during open hours or by appointment. Please contact the PARC (see below) for the current schedule of reference hours.

### **Copy Services**

Black and white photocopy services for standard and oversize materials are available on-site. Color photocopying, photographic duplication, and duplication of other media are available by special arrangement. Researchers are charged for all duplicates on a cost-recovery basis.

### **Rights and Publications**

Copies are provided under the Fair Use provisions of the Copyright Law (Title 17, U.S.C.). Researchers must complete a Permission to Publish Contract form with the Park Archivist for any other intended use of these materials (such as publication or exhibit). Researchers should consult with staff regarding their needs for commercial or public use of materials.

### **Legal Status of Holdings**

Many holdings of the PARC were acquired/transferred prior to the establishment of the archives program, and have little documentation on their provenance (source/chain of custody). All materials received after 1994 have been accessioned and documented. If provenance cannot be determined, the PARC assumes that it owns the property rights, but does not own the copyright. Staff will provide assistance, but it is the responsibility of the researcher to acquire permission from the copyright holder to cite, quote, or reproduce collection materials.

Collections developed by or for government organizations or operations are in the public domain and may be used, cited, and quoted without restriction, provided they are properly credited to the PARC. The archives contain no national security classified materials.

### **Donations to the Collections**

The PARC welcomes donations of a variety of historic materials that meet the criteria in the Scope of Collections Statement and do not duplicate existing holdings. Collections are maintained for research use in perpetuity; there is no guarantee that items will be exhibited. If you own materials that may be relevant to the themes of GGNRA and would like to deposit them in the PARC, please consult with an archivist.

### **How to Use This Finding Aid**

This document contains information on the contents and significance of an archival collection. It includes descriptive information; repository information; collection history; biographical or historical information on creators of the collection; and a container or folder list of everything in the collection. After reviewing the finding aid, please discuss your specific needs with the archivist who will locate and retrieve the relevant materials.

### **How to Use the Collections**

Please follow all rules and regulations regarding research, the use of the research facility, and the handling of collection materials. This will protect the collections so they continue to be available for generations to come. If anything appears to be out of order or damaged, please notify a staff member.

## Scope and Content

### Title

United States Army Project Records

### Dates

Inclusive: 1910-1999

Bulk: 1964-1995

### Collection Number

Catalog number GOGA 37252

(Accession numbers GOGA-2345, GOGA-2347, GOGA-2348, GOGA-2404, GOGA-2408)

### Creator

The creator of the records was the United States Army stationed at the Presidio of San Francisco and its sub-installations, specifically including the Sixth U.S. Army and the U.S. Army Corps of Engineers.

### Volume

361.3 Linear Feet

-339 records boxes (338.5 LF)

-1 document box (1 LF)

-7 media boxes (6.5 LF)

-18 20x24-inch oversize storage boxes (4.4 LF)

-108 36x48-inch oversize map folders (10.8 LF)

-1 mega-map folder (0.1 LF)

### Provenance

The records were created and maintained by the United States Army and were transferred to the National Park Service (NPS) upon the deactivation of the Presidio and the transfer of the Army's property to the NPS in 1994. The U.S. Army Project Records were amassed from the various bodies of records that were transferred from the Army. Areas of the transferred records were reviewed prior to this project and some material that was unrelated to the Golden Gate National Recreation Area's scope was discarded or transferred.

*Background information about the records transfer from the U.S. Army to NPS*

Negotiation for the transfer of the Sixth U.S. Army's relevant U.S. Army Records to the NPS was ongoing as of 1993. In April of 1993, Susan Ewing Haley, GGNRA Park Archivist, prepared a DEH Records Management Plan outlining the policy and plan for the U.S. Army Records during the transition from the U.S. Army to the NPS.

In May of 1994, a document entitled *Request for Transfer of Army Garrison and Presidio-Related Records: Presidio of San Francisco to Golden Gate National Recreation Area* was composed with the goal of having all valuable documentation reviewed and professionally handled for transfer to the GGNRA prior to October 1, 1994.<sup>2</sup> The NPS was requesting the transfer of files pertaining to Presidio infrastructure management from the Sixth U.S. Army and Presidio Garrison Office of Internal Review. The NPS requested the transfer for facility and utility maintenance and management of information purposes. A Golden Gate Army Records Working Group was formed in April of 1994 in order to provide an opportunity for NPS staff to discuss their needs and concerns regarding the Army Records that were under negotiation for transfer to the NPS. Surveys of the Army Records were carried out in May of 1994.

On September 9, 1994 Presidio Building 667 was identified as the Army Records Service Center and was the designated location for the transfer of all the Army Records from Presidio Garrison Directorates. The records were to be available for all NPS and Army staff requiring access to the information.

Since the Army Records are official federal records with permanent value, they are subject to the authority of the National Archives and Records Administration (NARA), but it was decided that the transferred records were to remain onsite at the Presidio of San Francisco under NPS control due to their high activity level.

The procedure used for transferring the Army Records was decided in April of 1994. NPS staff and Army Garrison staff reviewed the records in their existing locations for materials of interest to the NPS and were tagged for transfer. NPS, NARA staff, and Army staff created inventories of the record groups to be transferred and created a proposal for transfer. After the records were approved for transfer, Standard Form 135s was used to list the transferring records to the folder level and the records were packed and transferred to the designated NPS facility (Presidio Building 667). NPS staff

accessioned the transferred records, re-housed, and rearranged the records as needed in order to make them available to both NPS and Army staff. Once the records were transferred to the NPS, none could be returned back to the Army without written approval of both NPS and Garrison staff.

## Scope and Content Note

The United States Army Project Records, dating from 1910-1999, is organized into five series: Contracts, Work Orders, Post Requests, Project Lists, and Additional Material. The bulk of the material dates from 1964-1995. The project records originated from the various directorates and offices of the U.S. Army stationed at the Presidio of San Francisco and its sub-installations. These materials contribute to the documentation of changes, additions, and conditions of lands and structures that are now within the domain of the Golden Gate National Recreation Area.

A “project” refers to a funded activity related to the military construction and maintenance of buildings, facilities, infrastructure, utilities, and lands in the Presidio of San Francisco and its sub-installations. The Presidio’s sub-installations included Fort Baker, Fort Barry, Fort Cronkhite, Fort Funston, Fort Mason, Fort Miley, Fort Point, Fort Winfield Scott, Letterman Army Institute of Research, Letterman Army Medical Center, Letterman General Hospital, Public Health Service Hospital, and various Nike Sites including SF-51 in Pacifica and Nike Site SF-88 at Fort Barry. The projects were funded by a variety of sources. The U.S. Army Engineering Plans and Services Division (EP&S) was the office responsible for administration of contract work for construction and services. The Engineering Services Branch, Project Management Section was the office within the EP&S Division responsible for project coordination.

Projects include contracts, work orders, and post requests. Depending on the nature of the project, the work qualified as a contract or work order (also known as an Individual Job Order or IJO). A post request was the beginning proposal for a project, which then may evolve into a work order or a contract depending upon the requirements of the project.

The topics in this collection are many and concern construction, fabrication, replacement, repair, maintenance, service, installation, de-installation, rehabilitation, and renovation in and among multiple sites. The collection includes information on the cultural landscape, grounds maintenance, roads and transportation, hazardous material storage and disposal, historic preservation, routine and preventive maintenance, project summaries, project reports, project specifications, regulations and policies, building use and tenant activity, and building history. The project topics include repairs to the following systems: mechanical, electrical, structural, plumbing, gas, water, sanitary sewers and storm drains, communication lines, computers, intrusion detection systems, fire alarms, HVAC systems, playgrounds, stairways and walkways, and storage tanks. Additional project topics include fencing, roofing, painting, security, equipment service, parking, excavation, seismic upgrades, earthquake damage repair, fire damage repair, asbestos abatement, accessibility modifications, erosion control, pollution control, NPS projects, GGNRA work, pest management, land management, mapping projects, and emergency preparation. Document types include contract documents, specifications, environmental assessments, environmental impact statements, test reports, compliance, project lists, work plans, design documents, and feasibility studies.

## **Organization and Arrangement**

The United States Army Project Records are organized into five series: Contracts, Work Orders, Post Requests, Project Lists, and Additional Material.

Series I, Contracts, is arranged chronologically by contract number. The contract number format is “2-digit year – Letter – Sequential 4-digit number for that year,” for example, 72-C-0153 was a 1972 project.

Series II, Work Orders, is arranged alphabetically and sequentially by work order number. The work order number format is “2-digit alpha code – 5-digit number – 1-digit number sometimes followed by 1 letter,” for example: AB-01345-1J or PE-81002-1. The 2-digit alpha code refers to the location of the work [See Appendix 5 for the Work Order Geographical Codes].

Series III, Post Requests, is arranged chronologically and sequentially by post request number. The post request number format is “PR – 4-digit number – 2-digit year,” for example, PR-3657-84 was a 1984 project.

Series IV, Project Lists, is arranged chronologically by the date the list was printed or, if the date the list was printed is unknown, chronologically by the range of project dates contained in the list.

Series V, Additional Material, is arranged into ten subseries that are each arranged chronologically unless otherwise noted.

Subseries A: Projects without number and Project Specifications  
Arranged chronologically by project, then by area within each year.

Subseries B: General Specifications and Regulations

Subseries C: Reports and Planning Documents

Subseries D: Studies and Surveys

Subseries E: Administrative

Subseries F: Correspondence

Subseries G: Base Realignment, Closure, and Transfer

Subseries H: GGNRA Information

Subseries I: Plans and Maps

Subseries J: Photographs

The media in the collection is separated into seven media boxes. The separated media includes VHS videotapes and Betamax videotapes of sanitary sewer and storm drain television surveys.

All series contain oversize material. The oversize material of the U.S. Army Project Records consists of plans, drawings, and other material housed in 108 oversize map folders, 18 oversize flat 20x24-inch boxes, and 1 mega-map folder. The oversize material is arranged in the order it was separated from the files, i.e., in the series order of Contracts, Work Orders, Post Requests, Project Lists, and Additional Material. The text files originally included the oversize material, but for preservation purposes, the oversize material is now housed separately. A separation note was placed in each folder to note the original location of the item and also to note the oversize storage location. The plans document projects related to construction and maintenance of buildings, facilities, infrastructure, utilities, and lands in the Presidio of San Francisco and its sub-installations. The vast majority of documents were created by the U.S. Army Corps of Engineers, consultant and contracted engineers, and other contracted vendors and companies. Also included are construction submittals which are plans and materials that required approval prior to installation and construction. Some of the plans and other oversize material contain original photographs or photocopied photographs. Many of the plans are annotated with project specific information. Duplicate material was discarded, except for plans that contained annotations.

Note: Many project records that began as a single folder were divided into multiple folders for ease of use and improved preservation. Please take note of this when browsing the collection.

## Significance

The U.S. Army Project Records contain valuable information regarding the construction and maintenance of buildings, facilities, infrastructure, utilities, and lands in the Presidio of San Francisco and its sub-installations. The records provide insight into the historic management of the areas now within the domain of the Golden Gate National Recreation Area and will support further management and preservation of these areas. The collection documents Army life, historic buildings, and the ever-changing cultural landscape. The files are original to site and are not contained or duplicated elsewhere.

## **Condition**

Overall the records are in good and stable condition. The text files, having been working files, contain some soiled and worn documents. Some documents and oversize material have adhesive tape attached, some of which is becoming brittle. Some of the photographs are glued and/or taped to paper.

Many of the text files were originally stored in multi-tabbed folders that grew to be quite large and overstuffed causing distortion to some documents. Moreover, due to the multi-tabbed folders, the text files contain many hole-punched documents. The multi-tabbed

folders were re-folded using acid free folders and each tabbed section is demarcated using acid free paper.

The oversize material was originally stored folded in the text files and therefore have many crease lines, some have rips and tearing along these crease lines. Some of the plans are unreadable in areas due to poor replication.

The contract numbers 93-C-0069 and 95-D-0001 text documents and oversize material have some water damage and residual mold stains, please handle these materials with care.

### **History**

#### *The Army at the Presidio of San Francisco*

The U.S. Army was stationed at the Presidio of San Francisco from 1846-1994, the last Army headquarters being the Sixth U.S. Army. The Presidio of San Francisco military reservation at the Golden Gate developed into the most important Army post on the Pacific Coast. Over time its armaments evolved from smooth bore cannons to modern missiles. It became the nerve center of a coastal defense system that eventually included

Alcatraz and Angel Island and that reached as far north as the Marin Headlands and as far south as Fort Funston. These lands were all incorporated into the Golden Gate National Recreation Area beginning in 1972. Eventually, there were five distinct posts at the Presidio, each with its own commander: the Main Post, Fort Point, Letterman Hospital, Fort Winfield Scott, and Crissy Army Air Field. Also on the 1,491-acre reservation were a Coast Guard lifesaving station and a U.S. Public Health Service Hospital. The Presidio of San Francisco's sub-installations included Forts Baker, Barry, Cronkhite, Funston, Mason, and Miley, as well as various U.S. Army Reserve Centers throughout the San Francisco Bay Area.<sup>3</sup>

### *Transfer to the National Park Service*

In 1972, the Presidio of San Francisco, then an active installation, was included within the boundaries of the Golden Gate National Recreation Area. In 1989, the Presidio of San Francisco was selected to close as part of the Base Realignment and Closure Act that was designed to deactivate excess military bases. On October 1, 1994, after the post became excess to military needs, it was transferred to the National Park Service.<sup>4</sup>

## **Series Description**

### **Series I: Contracts**

Volume: 291.25 linear feet  
Dates: 1924-1999  
Arrangement: The contracts are arranged chronologically by contract number. Oversize material is separated to oversize box and folder storage. Media is separated to media box storage.

#### Description:

The Contracts series is a considerable portion of the collection and documents major projects. Contracted projects involved a non-Army contractor that performed the project work. Projects were contracted out for a variety of reasons including the large scope of the work and manning limitations, or if contracting was more cost effective. Usually projects requiring 300-500 man-hours qualified for a contract. The contracts include various types of construction and maintenance of buildings, facilities, infrastructure, utilities, and lands in the Presidio of San Francisco and its sub-installations. The contracts include authorization documents, design documents, cost history, correspondence, bid

and contract documents and modifications, specification details, plans and drawings, photographs, microfiche, inspection reports, vendor catalogs, vendor submittals and transmittals, and oversize material.

Contract work was managed by the Facilities Engineer who was responsible for the technical requirements (plans and specifications), technical supervision, engineering, and inspection necessary to administer the project work.

The contract number format is “2-digit year – Letter – Sequential 4-digit number for that year,” for example, 72-C-0153 was a 1972 project. Although “-C-” is the standard contract letter, the letter in the contract number may also be:

- A- Blanket purchase agreement (BPA); for example, 85-A-0050
- B- Invitation for bid number; for example, 86-B-0037. A contract is generally assigned a bid number, then assigned a contract number (-C-) when the contract is approved.
- D- Programming documents; for example, 87-D-0112.
- F- Delivery order number; for example, 88-F-0847.
- Q- Quotation number; for example 89-Q-0013. A contract can be assigned a quotation number, then assigned a contract number (-C-) when the contract is approved.
- R- Solicitation number; for example, 91-R-0029. A contract can be assigned a solicitation number, then assigned a contract number (-C-) when the contract is approved.

Some contract records (contracts with the letter -C-) include the associated bid information (contract records with the letters -B-, -Q-, or -R-). Some bid packages were cancelled and did not go on to become a contract or their associated contract is unknown; these bid records are arranged by their bid number.

Volume: 24.5 linear feet  
Dates: 1968-1994  
Arrangement: The work orders are arranged alphabetically and sequentially by work order number. Oversize material is separated to oversize box and folder storage.

### **Description:**

The Work Order series contains minor projects related to construction and maintenance of buildings, facilities, infrastructure, utilities, and lands in the Presidio of San Francisco and its sub-installations. Work orders were either performed in-house by the U.S. Army or contracted out to a non-Army contractor, at which point they would be considered a contract (these are in Series I).

The work order number format is “2-digit alpha code – 5-digit number – 1-digit number sometimes followed by 1 letter,” for example: AB-01345-1J or PE-81002-1. The 2-digit alpha code refers to the location of the work [See Appendix 5 for the Work Order Geographical Codes].

The primary documents in a work order record are the *Facilities Engineering Work Request* (DA Form 4283) and the *Facilities Engineering Work Order* (DA Form 4284). For use of this form, please see Army Regulation AR 420-17 [see Army Regulations Collection (AREG)] and DA Pamphlet 420-6 [see GOGA 37252, Box 332, Folder 17]. This series also contains photographs, and oversize material.

### **Series III: Post Requests**

Volume: 4.75 linear feet  
Dates: 1946-1980  
Arrangement: The post requests are arranged chronologically and sequentially by post request number. Oversize material is separated to oversize box and folder storage.

#### **Description:**

The Post Request series contains projects related to construction and maintenance of buildings, facilities, infrastructure, utilities, and lands in the Presidio of San Francisco and its sub-installations. Post requests are projects that did not go on to become a contract or work order. A post request was the original proposal for a project using the *Job Order Request* (DA Form 2701).

The post request number format is “PR – 4-digit number – 2-digit year,” for example, PR-3657-84 was a 1984 project.

The primary document in a post request record is the *Job Order Request* (DA Form 2701). For use of this form, please see Army Regulation AR 420-17 [see AREG Collection] and DA Pamphlet 420-6 [see GOGA 37252, Box 332, Folder 17]. This series includes various project documentation, photographs, microfiche, and oversize material.

### **Series IV: Project Lists**

Volume: 6.25 linear feet  
Dates: 1910-1994  
Arrangement: The project lists are arranged chronologically by the date the list was printed, or if the date the list was printed is unknown, chronologically by the range of project dates contained in the list. Oversize material is separated to oversize box and folder storage.

Description:

The Project Lists series contains lists of contracts, work orders, post requests, and other projects. The lists include many reoccurring reports and project status reports that were printed periodically by Army staff. This series also includes log books and record books of work performed by the Army maintenance and operational shops. Also included are Facilities Engineering Annual Work Plans, military construction reports, and contract register cards.

**Series V: Additional Material**

Volume: 12.75 linear feet

Dates: 1940-1995

Note: Undated files are filed in the front of each subseries.

Arrangement: The additional material is arranged into ten subseries that are each arranged chronologically. Oversize material is separated to oversize box and folder storage. Media is separated to media box storage.

Description:

The Additional Material series is arranged into ten subseries that are each arranged chronologically unless otherwise noted. The series contains material relating to projects; specifications and regulations; reports and planning documents; studies and surveys; administration; correspondence; base realignment, closure, and transfer; the Golden Gate National Recreation Area (GGNRA); plans and maps; and photographs. This series consists of the remaining material from Army record groups ADOC, ADPWE, ADPWEC, ADPWRW, ADPWS, and FTLEW. This series contains photographs, microfiche, and oversize material.

**Subseries A: Projects Without Number and Project Specifications**

This subseries contains projects that are not associated with a known contract, work order, or post request. Project specifications and descriptions are also included in this subseries. This subseries is arranged chronologically by project, then by area within each year.

**Subseries B: General Specifications and Regulations**

This subseries contains general procedural specifications and regulations that Army staff used as guidance in their work. Also included are guidelines, protocols, and manuals. Many of the documents are related to project work.

**Subseries C: Reports and Planning Documents**

This subseries contains formal reports and development plans. Also included are Memoranda of Understanding and curriculum guides. Some examples of documents are maintenance plans and inspection reports.

#### Subseries D: Studies and Surveys

This subseries contains studies and surveys that were performed by the Army. Some examples of studies are feasibility studies, facility survey inspections, and structural evaluations. Historic preservation information about the Presidio of San Francisco is also included.

#### Subseries E: Administrative

This subseries contains administrative material from office administration of the various Army directorates. The material includes directories, organizational charts, newsletters, and other employee information.

#### Subseries F: Correspondence

This subseries contains U.S. Army Directorate of Engineering and Housing (DEH) correspondence files.

#### Subseries G: Base Realignment, Closure, and Transfer

This subseries contains information on the Base Realignment and Closure Act and the base closure and transfer during which the Presidio of San Francisco was declared excess to military needs, deactivated, and transferred to the National Park Service.

#### Subseries H: GGNRA Information

This subseries contains information about the Golden Gate National Recreation Area from the Army's perspective including the establishment of the GGNRA in 1972.

#### Subseries I: Plans and Maps

This subseries contains general maps and plans that are not associated with a specific project. Topics include maps of trees, utilities, and GGNRA building occupancy.

#### Subseries J: Photographs

This subseries contains photographs that are not associated with a specific project. Topics include the San Francisco National Cemetery, an Army obstacle course, the Presidio Golf Course, earthquake damage, and various buildings.

## **Container List**

The container list is organized by box and folder number. The project numbers are also listed.

When a record has a contract number, a work order number, and a post request number, then the contract number takes precedent and the record is contained in the Contract series. When a record has a work order number and a post request number, then the work order number takes precedent and the record is contained in the Work Order series.

Note: The folder description does not describe every single document in the folder. Specific documents, formal reports, and document types (i.e., Invitation for Bid or Design Analysis) are listed but there is often more than just these specific documents in the folder.

Note: Many project records that began as a single folder were divided into multiple folders for ease of use and improved preservation. Please take note of this when browsing the collection.

Please see Appendix 2 for the Box Container List by Project Number and Series.

Please see Appendix 3 for the Oversize Container List by Project Number and Series

### Army Records Groups Included in the U.S. Army Project Records

The U.S. Army Project Records were amassed from various bodies of records that were transferred from the U.S. Army to the NPS prior to the Army's retreat in 1994. This section outlines each group of material that is now cataloged in the U.S. Army Project Records and its individual provenance. Within each GOGA accession the original Army records identification numbers are listed with each group's individual provenance and scope.

Please see Appendix 4, Abbreviations and Acronyms, for the Army directorate acronyms.

#### GOGA-2345: ADOC

- Transferred from the U.S. Army Directorate of Contracting on October 1, 1994. Records of completed contracting programs and projects at the Presidio of San Francisco. ## Appendix 5

### Work Order Geographical Codes

The letters below are used as the first letter in the two-digit work order alpha codes to communicate the geographical location of the project. The location listed next to the letter is from the original U.S. Army geographical code list, while the “also includes” locations were gathered during the processing of this collection. As demonstrated, the geographical codes were only used in a general way, and in reality, many more locations were included under each letter.

**A** = Presidio of San Francisco

Also includes FOBK, FOBR, FOCR, FOFU, FOMA, FO SC, LAIR, LAMC

**B** = Fort Baker

Also includes FOBR, FOCR, FOMA, PSF
