NRC INFORMATION NOTICE NO. 89-22: QUESTIONABLE CERTIFICATION OF FASTENERS

Addressees:

All holders of operating licenses or construction permits for nuclear power reactors.

Purpose:

This information notice is being provided to alert addressees to a possible problem with the certification of fasteners (bolts, nuts, and studs) furnished by Hardware Specialty Company, Incorporated (HSC) of Long Island City, New York. It is expected that recipients will review the information for applicability to their facilities and consider actions, as appropriate, to avoid similar problems. However, suggestions contained in this information notice do not constitute NRC requirements; therefore, no specific action or written response is required.

Description of Circumstances:

During 1981 and 1982, Ebasco Services Incorporated and Louisiana Power and Light Company issued purchase orders (POs) to HSC for fasteners for use at the Waterford Nuclear Power Plant. Based on a review of certificates of compliance (C of Cs) and certified material test reports (CMTRs), it was determined that HSC purchased commercial grade fasteners from intermediary suppliers who obtained the material from foreign and domestic suppliers and manufacturers. HSC certified that the material met the requirements of Section III of the ASME Boiler and Pressure Vessel Code without performing applicable verification activities or upgrade testing. Additionally, stainless steel fasteners may not have been properly solution annealed as evidenced by the fact that tensile properties in test reports are high for heat treated material and the Brinell hardness numbers exceed the maximum specified for SA-193 B8 Class 1 material. In addition, Charpy impact tests were not performed on fasteners greater than one inch as required by paragraphs NB-2311 and NC-2311 of ASME Section III, 1977 Edition, Summer 1979 Addenda, which were invoked in the pertinent POs. It should be noted that the POs did not contain test temperatures for conducting the impact tests. This material was sold to the Waterford site in the early 1980s. The above information was discovered during an NRC inspection at HSC during the period of February 7-10, 1989. Attachment 1 lists organizations known to have approved HSC as a supplier of fasteners to ASME Section III or Appendix B to 10 CFR 50 requirements during the 1980-1985 time frame. This list is not all inclusive. It is important for licensees to note that HSC reportedly started supplying fasteners to the nuclear industry in 1979, but has been in business since 1932.

8902270158

PDR I & E

890303
Notice 89-022

The NRC inspection at HSC indicates that material supplied by HSC during 1988 met customer requirements. A list of HSC nuclear customers in 1988/1989 is provided in Attachment 2. The documents for the material supplied between 1983 and 1987 were not reviewed in sufficient detail to conclude whether problems exist with the material provided by HSC during this period.

Discussion:

The NRC inspections at the Waterford site and HSC have brought into question the validity of C of Cs and CMTRs issued by HSC for the fasteners that they supplied. Accordingly, licensees may wish to review procurements from this vendor to ensure that appropriate bases exist for the use of HSC supplied material. Licensees and other purchasers may wish also to review the adequacy of audits performed on vendors and vendor approval processes in light of this information. (See also IN No. 88-35, "Inadequate Licensee Performed Vendor Audits").

In addition, it is important for licensees to note that Section III of the ASME Boiler and Pressure Vessel Code requires that, when working with material suppliers and manufacturers that are not Quality System Certificate (QSC) Holders, the only parties permitted to survey, approve, and order Section III material from them are QSC and N-type certificate holders.

No specific action or written response is required by this information notice. If you have any questions about this matter, please contact the technical contact listed below or the Regional Administrator of the appropriate regional office.

Charles E. Rossi, Director
Division of Operational Events Assessment
Office of Nuclear Reactor Regulation
