SUSQUEHANNA STEAM ELECTRIC STATION
SER OUTSTANDING ISSUE 44
ER 100450 FILE 841-2
PLA-900

Dear Mr. Schwencer:

PP&L has identified the power sources for all instruments in the main control room sorted by panel and by power supply. These lists are attached. PP&L has also tabulated those instruments and control devices in the main control room that are required to attain cold shutdown. This listing (also attached) was developed using preliminary emergency operating procedures. We estimate that these preliminary procedures have identified approximately 90% of all I&C devices required to attain cold shutdown.

The remaining work required is to identify those power busses required for necessary interfacing instruments and controls outside the control room and to evaluate the data to determine if either equipment changes or procedure changes are required.

Expected completion date for determining if equipment changes are required is October 15, 1981. If required, these are expected to be no more significant than alarm or indication light additions. Expected completion date for determining whether procedure changes are required is December 1, 1981. Iterations on this work may be required when final emergency operating procedures are prepared. Presently, final procedures are scheduled for December 1981.

Very truly yours,

N. W. Curtis
Vice President-Engineering & Construction-Nuclear

1. THE COMPUTER PRINT OUT OF THIS PROGRAM IS SORTED BY BOTH POWER SOURCE AND PANEL NUMBER.
2. FOR FEEDER BUS, POWER SOURCE NUMBER IS THE SAME AS PANEL NUMBER.
3. CODE "3000001" IN POWER SOURCE COLUMN MEANS "SEE REMARKS".

REPORTED POWER SOURCE

ACR PANELS 120/125V AND 24V FEEDER TABULATION

BY

ELECTRICAL SCHEME GROUP

JUNE 22, 1981

SUSQUEHANNA PROJECT

BECHTEL POWER CORPORATION

JUN 1 310143100

TERMINOLOGY AND NOTES

TERMINOLOGY:

- | | | |
|----------------------|---|--|
| 1. PANEL | - | UNIT 1 AND COMMON PANELS IN CONTROL ROOM |
| 2. DEVICE | - | INSTRUMENTS, SWITCHES AND INDICATING LIGHTS ON THE PANEL |
| 3. POWER SOURCE | - | POWER FEED TO THE DEVICE |
| 4. DESCRIPTION | - | TITLE OF THE DEVICE |
| 5. A | - | LOSS OF POWER SOURCE ALARM |
| 6. REFERENCE DRAWING | - | BECHTEL DRAWINGS OR VENDOR DRAWINGS |
| 7. LOAD | - | CIRCUIT LOAD |
| 8. REMARKS | - | ANY FURTHER EXPLANATION REQUIRED |

NOTES:

1. THE COMPUTER PRINT OUT OF THIS PROGRAM IS SORTED BY BOTH POWER SOURCE AND PANEL NUMBER.
2. FOR FEEDER BUS, POWER SOURCE NUMBER IS THE SAME AS PANEL NUMBER.
3. CODE "3J00001" IN POWER SOURCE COLUMN MEANS "SEE REMARKS".
