Finish

A N D O V E R

LAMINATE COLLECTION 7462

Construction - Constructed of thermally fused laminate and engraved wood materials. Desks, credenzas, cabinets and bookcases feature mortise and tenon, glued, stapled and screwed construction for maximum strength and durability. Chasis feature a UV top coat to protect against stains and scratches.

Styling - Essential elements of traditional design; shaped top edges and base mouldings, picture frame mouldings, recessed modesty panels, black drawer interiors and brass finish hardware along with a Sherwood Mahogany finish, are incorporated in the Andover Series.

Function - All cases are equipped with easy to adjust floor levelers. All drawers are suspended on metal ball-bearing slides. File drawers are fully extending; box drawers are 3/4 extending. File drawers accept front-to-back or side-to-side letter or side-to-side legal hanging files.

Computer applicable furniture feature cable grommets or other openings allowing for neat and easy cable management.

Combine traditional styling with Andover's matte finish for ultimate comfort in your work environment. Thermally fused surfaces prevent nicks and scratches and showcase a beautiful Sherwood Mahogany finish. Large executive desks feature a 10" overhang for in-office conferencing.

EXPANDABLE TABLES PROGRAM

DMI Office's Expandable Conference Table program offers exceptionally handsome veneer and laminate conference tables with the flexibility of size to suit your conference needs. Not only are the tables designed for flexibility of size but they are also engineered to neatly accommodate cable management*. The program consists of ten basic components that allow you to create tables starting at 8' or 10' and expanding in 4' increments.

FEATURES:

- Each top has a pre-installed grommet.
- Veneer tables constructed of veneer, wood solids and wood product. Tops feature a UV finish for added protection.
- Laminate tables constructed of laminate on wood product with PVC vinyl edges.
- Included mending plates ensure proper top alignment and secure assembly (1).
- Each base has six adjustable levelers that also assist in correct alignment and assembly.
- Designed with rails providing stability, adding style and helping to conceal the functional wire management troughs (2).*
- Wire management troughs or trays provide aesthetically pleasing means to safely manage cables (3).*
- Base component designed with cable opening at the top (4) and vertical channel within the base to guide cables out through bottom of the base.*
- The cable opening in the top components are also positioned and sized to facilitate the installation of optional data ports/power centers (4).*

*Features (2), (3), and (4) do not apply to Fairplex Expandable Tables.

DATA PORT INSTALLATION LOCATIONS

RECTANGULAR CONFERENCE TABLES

Does not apply to expandable tables.

- DMI will offer data port installations for Power and Data ports(P&D ports) sold by DMI, in standard existing grommet locations on Expandable Tables, for a set installation price listed in our price list.
- DMI will provide installations of P&D ports not sold by DMI in the existing grommet holes for a 35% up charge to standard installation cost in price list, provided the client supplies detailed drawings of direction the ports are to be installed and exact dimensions of the port.
- While DMI Standard Conference tables outside of the Expandable Table program are not engineered for data ports, DMI may agree to install ports to these tables for a 50% up charge to standard installation charge if the client provides detailed, signed off drawings for dimensions and locations of ports. In these cases, DMI reserves the right to move data port locations if the desired location will interfere with table base support.

Note: Non-Expandable conference tables and the Fairplex Expandable tables do not feature cable management support on the tables nor their bases.

- IN all cases, table orders with installed P&D ports are not cancellable.

FABRIC INFORMATION

CARDED FABRIC

Flexsteel offers customers an extensive carded program to help achieve the look and feel desired. Fabrics are offered in a variety of grades, patterns, and colors. Flexsteel also has the capability to grade in fabrics upon request. All fabrics are warranted for one year.

FLAME RETARDANT TREATMENTS

Many upholstery materials stocked by Flexsteel typically meet more stringent fire codes and test methods. Current information about a specific pattern is listed on the individual fabric cards, textile binder, and textile price list.

If materials, as stocked, do not meet your specific flame-retardant requirements, please contact Flexsteel to see if further treatment is available.

Most flame-retardant treatments are salt solutions. Cleaning these fabrics with water or water-based foams will result in salt ringing. Solvent-based fabric cleaners or dry cleaning are alternate methods of cleaning. However, you are cautioned to test proposed cleaning procedures on a small portion of fabric before proceeding with the cleaning of the entire installation.

Flexsteel Industries, Inc. is using state-of-the-art, fire-retardant materials that provide a product that will comply with California Technical Bulletin 133. Each product is produced using TB 117 treated HR foam and a fire-retardant barrier material. The upcharge for TB 133 is \$25 per yard (net), based on the yardage shown in the price list. If a written certification is required, a complete burn test is needed. It will cost half of the price of the piece of furniture with exact fabric used, freight, and \$450 (half the cost of the test). Styles that have buttons, sewn pulls, or any sewn type of detail may not be able to meet California TB 133.

No order will be accepted using any fabric containing more than 10-percent olefin.

Repairs and replacements will be free of charge on all qualified products.
2. Applies to furniture manufactured with web seat foundation. FLEXSTEEL CONTRACT warrants the web seat foundation and hardwood seat frame against breakage under conditions of normal use. Warranties not expressly stated herein, including without limitations any implied warranties or merchantability and fitness for purpose, are excluded and disclaimed by FLEXSTEEL CONTRACT. FLEXSTEEL CONTRACT will make every effort to make on-time deliveries; however, we are not responsible for loss of revenue due to late delivery.

Flexsteel shall not in any event be liable for the cost of any special direct, indirect, incidental, or consequential damages to anyone due to the breach on any warranty hereunder. FLEXSTEEL CONTRACT's sole obligation shall be to repair or replace any product that proves defective during the warranty period.

Whenever a special wood finish is requested, FLEXSTEEL CONTRACT will attempt to match for color but does not assume responsibility for color variation resulting from this finish being applied to various hardwoods.

The above warranties do not apply to damage resulting from accident, alteration, misuse, negligence, abuse, or abnormal wear.

WARNINGS

Users are urged to make PERIODIC INSPECTIONS to look for damages or signs of structural fatigue incurred in daily handling, use, and abuse. Examinations must include structural joints, corner blocks, and other points of stress. If defects are found, the product should be taken out of service.

CONSTRUCTION INFORMATION

Frame Construction

The Flexsteel frame is precision engineered, combining select kiln-dried hardwoods and laminates, using up-to-date materials and technology to create a stronger, more durable, integral frame structure that is solid, stable, and long lasting. This technology not only helps conserve precious tree resources but also uses hardwood materials that might otherwise be wasted. Standard product, unless otherwise specified, meets CAL TB117.

Seat Construction

The following types of constructions are engineered for each item and are not interchangeable.

FLEXSTEEL SPRING: DUALFLEX® SYSTEM

Features a blue steel banded platform and helical coil springs to enhance seat comfort and durability.

SINUOUS WIRE SPRING

Resilient sinuous high-carbon steel wire construction provides firm comfort.

WEB SEATING SUPPORT SYSTEM

Web is especially suited for incontinence management. It is unaffected by mildew, fungus, bacteria or urine. It has excellent strength and durability and has passed the BIFMA Cycling & Drop Test. It also meets flammability standards of UFAC Class I, NFPA 260A Classes and California TB117.

FLEXSTEEL CONTRACT DROP-IN ZIGGER UNIT

The FLEXSTEEL CONTRACT drop-in zigger unit features a unitized frame made of tubular steel.

CUSHIONING

Seat Cushions

FLEXSTEEL CONTRACT uses the highest quality urethane foam to provide comfort as well as durability. Our Design and Engineering Team determines the standard foam to be used at the time of product development. Designers select from either a 2.5-density (HR) urethane foam or a 1.8- density (LC) luxury comfort, high-density urethane, both meeting California TB117. Optional seat cushion is the 2.75 combustion modified, high-resiliency foam (CMHR).

Loose-Back Pillows

A core of pure, polyurethane foam with layers of polyester fibers bonded to both sides of the core providing comfort and shape.

Flame-Retardant Foams And Fabrics

For questions concerning flame-retardant foams and fabrics contact the Customer Care Department or your Flexsteel Hospitality Sales Representative.

Flame-Retardant Mattresses

All innerspring mattresses are manufactured to meet the requirements of U.S. Flammability Specification DOC FF4-72 as revised and California Technical Bulletin 1633. The DreamFlex mattress is UL approved. If this does not meet your specific flame-retardant requirement, innerspring mattresses can be manufactured with FireGuard, a special fiberglass, fire-blocking ticking. This ticking is manufactured by Springs Industries, which certifies that it passes NFPA 701 Small Scale and MVS 302 tests. A net upcharge of \$55.00 per mattress will be applied.

GENERAL PRODUCT INFORMATION

The descriptions and pictures contained in all catalogs or sales literature are based upon construction techniques in use at the time of publication. From time to time, new methods and materials become available which can improve quality and durability. FLEXSTEEL CONTRACT reserves the right to incorporate new materials or make changes in tailoring or frame without prior notice.

All weights and sizes shown in this price list are approximate. Special Note: Regarding recliners, if the recliner is being purchased for installation in a fire house Flexsteel will only warrant the Fire Fighter Recliners for use in this environment.

CHAISE INFORMATION

Flexsteel determines left from right by standing at the foot end of the chaise and facing the length of the piece. This determines the standard for left (-25) and right (-26).

ARM CAPS

List Price

Arm caps are not standard but are available upon request on items with fully upholstered arms.

The list DPG (Difference per Grade) is \$15.00 per pair.

For example: one pair of arm caps in a Grade 6 fabric = \$50.00 + \$30.00 (2 DPG x \$15.00) = \$80.00 list price.

One pair arm caps Grade 4 fabric list price \$50.00.

Installation Policy

- DMI will offer data port installations for Power and Data ports (P&D ports) sold by DMI, in standard, existing grommet locations on Expandable Tables, for a set installation fee listed in our price list.
- DMI will provide installations of P&D ports not sold by DMI in the existing grommet holes for a 35% up charge, provided the client supplies detailed drawings of direction the ports are to be installed and exact dimensions of the port.
- DMI Standard Conference Tables, outside the Ex-table program, are not engineered for data ports. There is no wire management support on the table or table bases. DMI may agree to install ports to these tables for a 50% up charge to standard installation charges if the client provides detailed signed off drawings for dimensions and locations of the ports. In these cases, DMI reserves the right to move data port locations if the desired location will interfere with table base support.
- In all cases, table orders with installed P&D ports are not cancellable.
