

## **Questions and Answers**

### **For OG&E's 2023 Bridge Capacity RFP**

#### **Question #1**

Would OG&E work under a short-form capacity agreement instead of the form PPA provided by OG&E?

**A:** *OG&E will consider proposed alternative contract structures. However, as stated in the RFP, each Bidder must also substantively address the form PPA document provided by OG&E.*

#### **Question #2**

If a RFP participant is lacking the information necessary to fill out the entire NOI form (primarily missing SPP Point of Interconnection and/or date of Interconnection Agreements), will the NOI still be considered valid?

**A:** *For the purposes of submitting an NOI, please provide as much information as possible at the time of submission. This missing information will not disqualify the NOI submission, however, please keep in mind that each bid will go through a threshold evaluation when evaluating the bids.*

#### **Question #3**

My company cannot agree to certain parameters described in the RFP. Should we call it out on 1) the certification form or 2) the excel document under #10) PPA deviations?

**A:** *Please note all material differences related to terms of the RFP and form PPA agreement on Form B, note #10) PPA Key Information.*
