Statutory Authority

North Dakota Century Code Chapters 10-30.5, 54-34.3, 54-34.4, 54-44.5, 54-60, 54-62.

Agency Description

The North Dakota Department of Commerce has four legislatively created divisions: Community Services, Economic Development & Finance, Tourism and Workforce Development and a Director of Initiatives that work together with our stakeholders to expand and diversify the economy of North Dakota, support community development, raise awareness of North Dakota state brand/image in the national and international ecosystems and provide services to low income people. Our challenge is to make North Dakota a better place to live, work, do business and play, for all people that choose to make North Dakota their home which, in turn, will entice non-residents to consider becoming North Dakotans.

Agency Mission Statement

The Department of Commerce's Mission is to be the lead agency responsible for attracting, retaining and expanding wealth in North Dakota.

The Department of Commerce's Purpose Empower people, improve lives and inspire success.

The Department of Commerce's Values are Courage, Curiosity, Humility and Gratitude.

Major Accomplishments

- 1 The administrative staff holds a supporting role in the Department of Commerce's accomplishments. Whether through increased efficiency by utilizing or building existing information technology software, creating innovation by being the one of the first North Dakota state agencies' to remotely process all our financial data, or willing to have a growth mindset; the administrative department is truly reinventing government.
- 2 Economic research showed 21.71 million visitors to ND who spent \$2.61 billion in 2021. The estimated state and local tax revenue was \$237.9 million.
- 3 Currently \$40B worth of projects in the economic pipeline that ED&F is actively working to locate to North Dakota, which is 40X what it was last biennium.
- 4 Re-launched Find the Good Life in North Dakota talent attraction initiative with new ability to generate and track leads. Two months after launching this program, 400 leads are in the pipeline with more than 200 expressing interest in moving within three months or less.
- 5 Successfully closed deals for two major soybean crush plants, a \$5B downstream oil and gas facility, and many more high profile economic development projects.
- 6 2021 marketing reached record numbers: (202M TV/video, 12.3M print, 255M OOH, 314M digital, 17.5M Social) resulting in 1.4 million incremental trips to ND as a result of the marketing. These trips alone generated \$241.9M.
- 7 Matched \$520,000 in skilled workforce training programs that prepared workers for jobs in IT, transportation and logistics, aviation, welding, and more.
- 8 Successful rollout of capital through the LIFT program and ND Development Fund which has spurred significant early and mid stage business growth.
- 9 Tourism state marketing programmed \$6 million CARES funding in Q3-4 2021- targeting shoulder season, niche travelers and new markets that align with workforce recruitment.
- 10 Developed new grant programs promoting innovative, locally-led workforce solutions, in addition to workforce training, using \$20 million in ARPA funds.
- 11 2021 Arrivals in state were up 15.2% reaching 16.7 million adult road trips.

Major Accomplishments

-
- 12 231 earned media placement reached an audience of 1.34 billion.

 - 13 Main Street Initiative - Two Summits with total of over 2000 people registered Summit 2021: Hybrid model in new facility

 - 14 Partners in Planning: 21 communities grants funded \$416,811.80 local match \$10,654,988.31 total project costs (25:1 match) Vibrancy grants: 30 communities funded grants \$44,543.70 Local match \$429,417.03 (9:1 match)

 - 15 EDA Grant kick off: \$1 million for statewide placemaking education and projects AARP Partnership in housing and placemaking master class Launching Leadership Pilot program

 - 16 Manufactured Housing: 160 total installers and inspectors trained and licensed the past biennium. DOE Weatherization 280 units \$1,155,138.52 LIHEAP Weatherization 352 units \$1,368,770.54 LIHEAP Emergency Furnace and Cooling 1671 units \$2,538,734.97 State Energy Program: 31 grants totaling \$936,500 in federal funds to political subdivision, educational institutions and non-profits in the state. 20 building retrofit projects were completed with \$579,000 4 grants \$182,000 provided for energy education \$126,000 for electric vehicle training maintenance, advertising for ethanol utilization, an electric vehicle charging station and ebike for a state park. \$50,000 to fund rural, solar powered water systems needed for agricultural applications.

 - 17 ESG 2021 funded a total of \$581,372.45 (federal funds and state funds combined) in awards 27 agencies NDHG 2021 Funded a total of \$665,106 27 agencies CDBG 2021 Funded a total of \$2,113,073 between 8 regions 15 projects Funded \$1,689,983 towards the Governor's set aside ESG-CV \$3,646,475.49 drawn to date \$1,496,104.51 obligated but not drawn yet 24 agencies

Critical Issues

-
- 1 The Administrative department is working under extreme pressure while processing three times the number of transactions due to millions of additional federal funding added to the agency. If more federal funds are allocated during this session to the agency, there is a need for more Full-Time non-temporary employees to be obligated to the Department of Commerce in administrative services. Due to the heavy workload of fiscally managing federal programs and audit requirements involved with federal funding.

 - 2 It is vital that we invest in marketing the State to enhance the positive image of North Dakota! The shifting of American's priorities as a result of COVID impacts provides an unprecedented opportunity to showcase North Dakota's small and mid-sized cities and wide-open spaces. North Dakota has advantages to attract visitors, businesses, workforce, new residents and investment but if we don't showcase our state, other states (most notably our neighbors) will continue to rank higher than we do in the minds of consumers. 2020 image research shows that destination marketing dramatically impacts the state's image across all economic development areas. It also shows that North Dakota lags competitors in awareness, in some areas as much as 22%. We need to look at marketing our state as an important investment to help us diversify our economy.

 - 3 North Dakota continues to have more jobs available than people to fill them. To address this multifaceted issue, we need to attract workers into the state, retain the workers and students are already here, pursue opportunities to automate and reskill employees, and tap into underutilized talent pools. We must increase our investment in workforce to match the emphasis we place on this issue and remain competitive in a global competition for talent.

 - 4 Need for more infrastructure throughout the state (pipelines, water, rail, etc) or more energy parks (i.e. Spiritwood).

 - 5 North Dakota does not have consistent funding sources or incentives to support building, attracting or recruiting destination tourism attractions.

 - 6 Funding programs such as PACE, Flex PACE, and NDDF lack major effect for larger projects.

 - 7 Funding needed for Clean Sustainable Energy Authority - CSEA.

 - 8 Revision of corporate farming laws needed.

 - 9 Compliance with federal regulations on limited administrative budget

 - 10 Continued rural depopulation

Critical Issues

11 Limited funding to meet the rural community needs

Performance Measures

3000 State Marketing & Tourism

Performance will be measured by a variety of metrics including but not limited to: visitor trips; overnight stays; visitor spend; social media traffic; communities, partners, & agencies served; information provided; public relation contacts; research; conference numbers; grants; program participants, & media placement.

4000 Workforce Development

Operation Intern will be measured by the number of companies & interns served by the program, & by tracking how many interns obtain full-time employment with their internship host-site after completing the program

AmeriCorps will be measured by tracking the number of new members, & by implementing new programs in state

Non-Resident Nursing Employment Program will be measured by increasing use of program after legislative expansion to allow nursing graduates from North Dakota post-secondary participation

Technical Skills Training grant will be measured by the number of programs supported by the program, in addition to the number of trainees who participate in new programs.

Find the Good Life in ND will be measured by number of leads that enter, leads converted to employees & residency & job placements

Workforce Development Council's state plan will be measured through the successful implementation of scalable workforce solutions

5000 Economic Development & Finance

Measurements associated with programs within ED&F paint a picture of how well ND performs from a business recruitment and retention/ expansion perspective. This will highlight how well the programs appropriated by the legislature have worked, how robust the finance team has attracted new types of venture & angel capital as well as private equity & the accelerated efforts led by the business development team.

New metrics with the Economic Development Foundation will be used to measure success within ED&F.

6000 Community Services

- Timely distribution of all DCS program funds in accordance with federal guidelines.
- Promotion & increased community engagement in Renaissance Zones with consideration of legislative changes to support communities.
- Enhanced quality of site-built, manufactured and modular structures in North Dakota through training and program implementation.

- Increase awareness of program on Native American Reservations.
- Implement the EDA Place making grant through partnerships and community engagement.
- Expand and engage the Main Street Initiative across the state.
- Collaborate with new economic development growth areas and businesses.
- Work with other agencies to share opportunities in community development with the end goal of lowering property taxes.

Program Statistical Data

*Please see attachments for more detailed and historical statistical data for each division.

2000 Administrative Services

Administrative services provides exceptional support for our \$258 million-dollar appropriated budget. This includes a near \$60 million dollars of Corona Virus Relief Funding which was added to the budget without an increase in full time employees.

3000 State Marketing & Tourism *Statistics reflect available numbers at time of budget preparation

- ND had 21.70 million visitors. • Visitor spending was \$2.61 billion. • ND received \$237.9 million in state & local tax revenue through visitor activities (+8.6%). • 35,561 jobs are supported by the travel industry (down from 45,640 in 2019).
- Tourism-related taxable sales & purchases totaled \$1,481,200,894. • 2,900 businesses rely on tourism activity • 4.5 million hotel room nights. • 887,804 million airport arrivals. • 1,700 plus partner listings in annual Travel Guide. • 281,712 referrals sent to partner websites through NDtourism.com. • ND Travel Industry Conference served 200 attendees. • Personal service & enhanced technology like live chat, which served 1,500 users in the first year. • 58,181 traditional inquiries fulfilled. • 462,720 subscriber newsletters sent. • 116 participants in rest area brochure program. • Quarterly & Annual reports available online - 2,000 copies distributed to partners, policymakers, & state leaders.

State Marketing Additional Metrics:

- Media outreach & coverage – public relations efforts garnered 718 media instances reaching 2.78 billion with an ad equivalency value of \$25.57 million.
- Workforce recruitment strategic planning efforts included research, partner meetings to build system, new Find the Good Life 2.0 website & marketing plan.
- State brand management- multiple state agency updates, brand guidelines, writers guide, virtual meetings, photo library, social skins.
- Inter-agency cooperation – meeting registration training (Eventbright), website support, graphic design, video production, communications, & social media training.

601 Commerce

Agency 601

- State conferences & promotional events support, most notable MS Summit, Recovery Reinvented, TIC, Workforce.
- Grants: 24 travel & tour operator grants distributed, totaling \$1.4 M./ 28 events & support service grants distributed, totaling \$2 M./ 5 Tourism planning grants, totaling \$1 M.

4000 Workforce Development

2021-2023 Operation Intern as of July 19, 2022 (Numbers reflect program years 1 and 2 for the biennium)

- Businesses participating - 146 (43 new)
- Internship positions this biennium: 461 internships
- \$1,844,000 obligated to interns in 2021-2023 biennium
- \$6,591,668 funds have been disbursed to program participants since inception

2021- 2023 AmeriCorps

• Fiscal Year 2020

5 Projects with 113 AmeriCorps members / 71,091 hours / \$425,250 amount of education assistance awarded to members

• Fiscal Year 2021

6 Projects with 123 AmeriCorps members / 90,123 hours / \$460,096 amount of education assistance awarded to members

Technical Skills Training Grant

• Total appropriation in 2021: \$1,000,000 (CRF) • Number of programs approved: 8 • Total awarded: \$673,222.96 • Total reimb: \$509,170.78

Non-Resident Nurse Recruitment Program

- 2019-2021 general funds allocated \$500,000 • 2021-2023 reduced general funds to \$320,000
- Facilities participating: 5 • Nurses benefiting from program: 11
- Total award to date: \$44,000 under contract • Total reimbursement to date: \$19,279.67

Tribal College Grant • Total award: \$500,000 • Recipient: Turtle Mountain Community College • Term ends June 2023

601 Commerce

Agency 601

5000 Economic Development & Finance

InnovateND: assisted 402 entrepreneurs as of June 2022, Innovate ND program has: • Paid Projects Total: \$665,522.30 • Graduated Projects: 22

Business Development 2021-2023 Biennium to-date (to June 1, 2022) • New Active Business Development Projects: 181/• New Primary Sector Projects Developed: 43

LIFT Program: 2021 legislative session, LIFT fund was appropriated an additional \$15 million. To date, \$12,548,790 awarded to 18 companies.

6000 Community Services

MSI Summits (two) with over 2,000 people registered/ Partners in Planning Grant: 21 communities funded/ Vibrancy Grant: 30 communities funded/ EDA Grant: 1 million for education & projects/ AARP partnership/ Launch of Leadership Pilot Program

MHP Housing: 160 installers & inspectors trained & licensed this biennium to date/ DOE Weatherization: 280 units/ LIHEAP Weatherization: 352 units/ LIHEAP Furnace & Cooling: 1671 units/ State Energy Program: over 55 grants and projects

ESG & NDHG 2021: 27 awards each/ CDBG 2021: 15 projects/ ESG-CV: 24 awards

Explanation of Program Costs

The ND Department of Commerce consists of administrative services and four divisions. For narratives purposes administration and each division is identified as 2000 Administrative Services / 3000 State Marketing & Tourism / 4000 Workforce Development / 5000 Economic Development & Finance / 6000 Community Services. Please see attachments for detailed explanation of program costs.

2000 Administrative Services

The costs associated with agency Administrative Services are dedicated to supporting the overall functions of the agency which encompasses fiscal, information technology, human resources, and administrative functions. These functions support the ND Department of Commerce's mission of attracting, retaining, and expanding wealth in North Dakota.

3000 State Marketing & Tourism

The State Marketing and Tourism Division is the agency responsible for marketing North Dakota to the world.

The budget includes dollars in the following major categories:

Destination Advertising/Marketing

Information Technology and Telecommunication

Printing and postage

Public / Media / Influencer Relations

Travel required to promote North Dakota to target markets.

4000 Workforce Development

Costs for the Workforce Development Division include Technical Skills Training grant, Operation Intern; apprenticeship programming; statewide biennial strategic planning, performance accountability, and activities related to support implementation of the Workforce Development Council's state workforce strategy, in addition to administration of the State Commission on National and Community Service, which serves as the required match for receipt of AmeriCorps Program funds. Grants developed using ARPA funds are also included in this budget; however funds have not been disbursed to any applicants at time of this budget preparation.

5000 Economic Development & Finance

(Includes: InnovateND/Research/ Business Dvlp/NDDF/Partner Programs)

The program costs are primarily for administration and support of the Census Office and State Data Center, liaising with the university system to provide effective technology transfer that is cohesive with statewide intellectual property and commercialization needs, recruiting and expanding private sector opportunities, providing economic and market research for economic development efforts, and attracting new wealth and capital to the state. In addition budget dollars support the following categories:

Innovation & Entrepreneurship Programs

Unmanned Aircraft Systems (UAS) program development and oversight

Comprehensive business retention and expansion program

*The ND Development Fund continues to be a revolving fund and remains a self-funded, continuing appropriation.

6000 Community Services

Approximately 90% of the funds in the DCS base budget are passed on to sub-recipient grantee agencies. The remaining 10% is used for salaries, fringe and operating expenses. Over 93% percent of the division's base budget is from federal and other sources and is subject to federal and other judicially imposed regulations. It is necessary that DCS maintain a programmatic and administrative staff to ensure compliance with regulations and to account for the numerous grants and sources of funds. Six percent of the DCS base budget request is for general funds. These funds are used for administering state programs and to meet the matching requirements imposed by some federal sources. This base rate has not kept up with inflation and increasing demand of administration from the federal program. Additionally, DCS will have administered over \$35 million in COVID grant funds on top of the regular allocation. Efforts continue to input existing CDBG documents & records into a form documentation system to provide for quicker access to sub-grantee information at a reduced cost. Also, due to HUD Findings, the processes for applications & administration has shifted to the state. Starting 2022, recipients will be required to bid for administration of the project. This has increased the workload for the DCS staff, but has created a process that eliminates concerns about potential conflict of interest.

Program Goals and Objectives

The ND Department of Commerce consists of administrative services and four divisions. For narratives purposes administration and each division is identified as 2000 Administrative Services / 3000 State Marketing & Tourism / 4000 Workforce Development / 5000 Economic Development & Finance / 6000 Community Services. Please see attachments for detailed explanation of program goals and objectives.

2000 Administrative Services

Provide incomparable support services to the Department of Commerce & world class assistance to our stakeholders.

3000 State Marketing & Tourism

Market North Dakota through image development, brand building, storytelling, and advertising: Inspire travel through compelling advertising; increase awareness of the state through consistent brand messaging, logo use and merchandising. Overview of goals:

- Increase the number & reach of positive earned national media placements/mentions showcasing the state as a premier destination for visitors, businesses, employees, and investment.
- Increase the state's image and average halo lift by 2% to 15%
- Increase visitor incremental trips motivated by advertising by 15% & post-COVID Canadian traffic by 25%
- Increase visitor spending by 25%
- Workforce baseline research & marketing

4000 Workforce Development

Ensure implementation of statewide strategic workforce goals & initiatives. Overview of goals:

- Support the Workforce Development Council in developing & implementing the state's workforce strategy
- Serve as the convener of the state's workforce system, including state agencies, higher education, K-12, CTE, & industry
- Lead the state's talent attraction strategy
- Develop comprehensive recommendations and projects that will:
 - Increase early career exposure
 - Address the technical skills gap and connect employers with a skilled candidate pool

Remove barriers to employment

Lead occupational licensing reform efforts

Recruit and retain workforce

- Identify ongoing enhancements to programs that assist in addressing state workforce development, including AmeriCorps, Operation Intern, talent attraction initiatives, Non-Resident Nursing Employment Program, Technical Skills Training Grant, Regional Workforce Impact Program, and Workforce Innovation Grant.

5000 Economic Development & Finance

(Includes: InnovateND/Research/ Business Dvlp/NDDF/Partner Programs)

ED&F works to grow an innovative entrepreneurial footprint in ND & further development of the state's economy. Overview of goals:

- Official source of population & social economic data and leads the state's efforts for reviewing and providing this information
- Advance economic development & optimum growth in the majors areas of: Value Added Agriculture; Areospace/UAS/Defense; Energy & Advanced Manufacturing; & Intellectual Property & Commercialization thru IT development.
- Innovate ND Program & continued work with the state's entrepreneurial centers
- Implement relevant & effective strategies, programs & services to support business & community growth in ND

6000 Community Services

The Division of Community Services was established to provide technical assistance to local governments & state agencies in the areas of community & rural planning & development, policy research & development, & grant program implementation. DCS programs directly help to assist & facilitate the Department of Commerce mission to improve the quality of life of the people of North Dakota. DCS works to provide the people of North Dakota with goal orientated community development. This includes supporting the four pillars of the Main Street Initiative and effective, efficient & customer-oriented administration of federal & state programs for:

- Community Development
- Energy Efficiency in communities and in homes
- Housing
- Self Sufficiency

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Currently the Workforce Division operating fees and services line is completely federal; we have no general funds in our operating budget and need to significantly increase this to adequately lead the State's efforts in addressing our workforce needs.

To meet the required base budget amount, we cut Operation Intern funding and are asking to replenish this program with an increased ask for a total of \$1.5M to support the growing demand for this business resource. Internships and Apprenticeships are an effective workforce pipeline, and businesses around ND depend on this program to providing these work-based learning opportunities.

Necessary resources for implementation (including FTE's)*: Additional funding is needed to sustain daily operation of the workforce division.

Are resources being redirected or are they new or additional (including FTE's)*: New and additional resources.

Who is served and impact of not funding*: Operations of the workforce division include, but are not limited to technology/equipment for team members to perform daily tasks; travel to communities, employer meetings, and conferences; etc.

Economic Development & Finance Division (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Economic Development/Diversification

601 Commerce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The increase in additional staff to the ED&F team has increased the salary line available for ED&F to operate on which limits the amount of general funds available for operational expenditures.

Necessary resources for implementation (including FTE's)*: additional general funds are needed to maintain operational functions of ED&F division.

Are resources being redirected or are they new or additional (including FTE's)*: new resources are needed.

Who is served and impact of not funding*: will fund the ED&F department operational expenditures for the next biennium and on.

Tourism and Marketing Division (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	250,000	-	250,000	0.00	100,000	-	100,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	250,000	-	250,000	0.00	100,000	-	100,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Tourism’s salary line has increased due to prior Commissioner requested that Tourism/Marketing did not fill the tourism visitor support position and the marketing assistant position to order to provide salary dollars for a new manager of tourism development. The gaps in duties were to be absorbed and contracted out. After meeting with AG, OMB and Dept. of Labor it was determined we could not contract for the visitor support and customer service work so we have pushed those duties onto existing staff. We shifted the mailing duties done internally to a vendor.

Necessary resources for implementation (including FTE's)*: Provide dollars to support operational changes

Are resources being redirected or are they new or additional (including FTE's)*: New resources are needed in the form of general funds for Media costs, postage, vendor costs have all risen dramatically since the 2019-2021 budget.

Who is served and impact of not funding*: The dollars would support increased costs from ITD, Presort and other vendors as well as dollars to support the decrease in operations – which will result in fewer dollars marketing North Dakota at a critical time.

Administrative Services (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	465,000	-	465,000	0.00	348,750	-	348,750	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	465,000	-	465,000	0.00	348,750	-	348,750	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The administrative department is currently processing three times more fiscal information and payments due to the influx of federal programs as well as the general needs of the organization. Their has also been additional strain on our information technology department in how to become more efficient with limited staff to manage all of these additional program’s These reason along with the need to increase the operating expenditures in budget is due to the rising cost of inflation and how it relates to operating expenditures.

Necessary resources for implementation (including FTE’s)*:

More general funds are needed to aid in the success of the administrative department. The administrative department is attempting to add back general funds from last session where we were instructed to cut our budget by 15% . We also are requesting temporary salaries amounts to aid with the increase in federal funding we are expecting and existing workload due to a multi-million dollar budget with ongoing audit request and compliance factors. We are also asking for additional monies in the salary line to support an equity increase throughout the Department of Commerce.

Are resources being redirected or are they new or additional (including FTE’s)*:

With the increase of new federal funding the administrative department added a full time employee in the fiscal department in a position that was previously underfunded due to these reasons our department has less operating funds due to more funds were allocated to the salary line thus why we are needed more general funds for our operating line in the upcoming biennium.

Who is served and impact of not funding*:

The general public as well as current stakeholders will be negatively impacted due to the administrative team is the behind the scenes workers of assist the other divisions in Commerce.

601 Commerce

Agency 601

Community Services (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	550,000	-	550,000	0.00	225,000	-	225,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	550,000	-	550,000	0.00	225,000	-	225,000	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Division of Community Services has been delivering services in both federal distribution of dollars in HUD, Department of Energy and Health and Human Services. These programs help deliver services and support for citizens and communities across the state. The programs, delivered to community action agencies, regional councils, emergency shelters and communities/counties, provides both direct funding and technical support. Funding has been consistent through the years, but the federal requirements have increased and the staff time to manage the programs consistently demand more expertise and time.

The decrease adjustment in the budget includes the move of the Emergency Shelter Grant (ESG) and the North Dakota Homeless Grant (NDHG) to the North Dakota Housing Finance agency. This transition will ultimately benefit the ultimate clients who are recipients of this grant by transitioning from shelter, to rent to potentially home ownership. The increase in funding for the staff which manage the federal programs is to deliver salary equity for the staff capacity and increased travel required to meet the federal monitoring demands.

Necessary resources for implementation (including FTE's)*: additional operating expenditures for Division of Community Services

Are resources being redirected or are they new or additional (including FTE's)*: new resources

Who is served and impact of not funding)*: The additional resources in the Division of Community Services will benefit the entire state including Main Streets across the state and nonprimary sector businesses, rural communities who desire technical support for workforce and placemaking growth, organizations and communities/counties who support low to moderate households and individuals and nonprofit and educational entities who support our rural communities.

Strategy and Transformation (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	50,000	-	50,000	0.00	50,000	-	50,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Requesting an increase of \$50,000 (521000) in travel budget for 23-25 biennium due to increasing gas prices, hotel fees, and airline costs. Additionally, the Strategy and Transformation division will be increasing direct engagement of the economic researchers with MSI, primary sector industry projects, and impacts of global development on North Dakota.

Necessary resources for implementation (including FTE's)*: Increase of \$50,000 in travel budget will require no additional resources.

Are resources being redirected or are they new or additional (including FTE's)*: new resources

Who is served and impact of not funding*: This travel budget will serve individual communities (and business owners) in the state as they develop their existing industries and diversify to emerging industries that best fit the community's resources and competencies.

Workforce Division: Talent Attraction (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	15,000,000	-	15,000,000	1.00	216,571	24,797,060	25,013,631	1.00
Special	-	-	-	0.00	-	-	-	0.00
Total	15,000,000	-	15,000,000	1.00	216,571	24,797,060	25,013,631	1.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: With a more jobs available than people to fill them, the Workforce Development Council has recommended that they state invest a minimum of \$10 million into a large scale talent attraction initiative. Activities within this project may include, but are not limited to marketing, contracting with companies to support pipeline creation and management, incentives for employers, etc.

Necessary resources for implementation (including FTE's)*: Contracts with talent attraction company, marketing firm, possible development of program(s) to support employer recruitment/retention incentives

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources and then the addition of a permanent FTE

Who is served and impact of not funding*: This funding will support a comprehensive effort to attract workers to ND. Impace will be seen through number of workers in the workforce, labor participation rate, and in companies that are filling their vacancies.

Rural Renewal Workforce Housing (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	21,361,400	-	21,361,400	2.00	-	5,500,000	5,500,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Rural Renewal Workforce Housing Need

Rural communities face multiple unique workforce housing challenges. The lack of housing options, age of housing stock, construction costs, lack of builders and contractors, limited financing capabilities, and lower appraisal values negatively impact local economies.

Outreach efforts between the Dept. of Commerce, communities across the state and a rural housing taskforce have verified the need for a state-funded, flexible program that can bolster housing development, community revitalization and economic development.

The Rural Workforce Housing Proposal is a solution to effectively re-use existing infrastructure while engaging the private sector. When communities have affordable and attractive housing options, individuals and families can relocate to rural communities which will increase workforce numbers and support long-term sustainability of communities.

How It Will Work

This grant program targets workforce housing for the displaced, blight and unsafe properties and the effective reuse of existing infrastructure for in-fill housing development. The cost to construct is lower by eliminating lot acquisition and demolition costs and utilities are in place. Any housing type from tiny homes,

single family homes to 8-plexes and mixed-use properties are eligible.

Businesses located on properties that are part of the program will be eligible for an additional grant award of up to \$10,000 if they are “workforce friendly”. Workforce-friendly businesses may include childcare facilities and restaurants.

Step One: The city, with grant assistance, conducts a housing study with a focus on workforce housing needs while identifying all blighted property and vacant lots in the community. The requirement to conduct a housing study is waived in our smallest communities.

Step Two: The city also must identify private sector partner(s) who are willing to build on the parcels.

Step Three: City prioritizes the type of housing and prioritizes the parcels on the blighted list that are best suited to build the prioritized housing or to best accommodate the identified need.

Step Four: Grant funds acquire the property (if needed), remediate any hazards, remove the blighted structure, unless it has historical significance to the community. If there is historical significance, the adaptive reuse of the structure will be reviewed.

Step Five: Land is gifted to the private sector partner to build housing prioritized by the city to sell/rent at a not-to-exceed price OR gifted to a person who does not currently live in ND and is willing to build a home and work full-time in the community or within 30 miles of the community.

No more than 10% of the properties included in the blighted properties list can be razed and a bare lot created, even if the lot is not of sufficient size to build upon. Those lots provide the community the ability to meet a need such as community gardens, pocket parks, veterans memorial or other community betterment need. The cost to construct is lower because acquisition and demolition costs are alleviated, and utilities/infrastructure are already on-site.

Statewide Community and Workforce Benefits

1. Provide targeted, much needed workforce housing in rural communities
2. Eliminate blight and hazardous buildings in communities
3. Utilize existing infrastructure
4. Provide jobs in rural ND communities, such as plumbers and electricians
5. Drive local consumer purchasing
6. Increase vibrancy with such things as parks or other public spaces
7. Public/Private Partnership
 - a. State Government – Commerce, Housing Finance, Bank of ND, Health Dept.
 - b. Local Government
 - c. Private Sector

8. Preserve Historical Structures
9. Focus on underserved areas with current or potential economic vitality
10. Property value increase in communities
 - a. Increase in local government property tax collections
 - b. Potential reduction in appraisal gaps for participating cities
11. Incentivizes workforce friendly businesses such as daycares and restaurants

Program Implementation and ROI

According to the ND League of Cities there are 356 cities in ND. The target would be to try and provide grants in over 50 of these cities, spread all across ND.

Tier 1: Cities with population under 999 (307)

Goal – 25 Communities participate with no more than 5 properties per community (1 can be public place) for a potential total of 125 improved properties and an average cost of \$25,000 per property to acquire, remediate, demolish, or refurbish.

Tier 2: Cities with population between 1,000 and 2,499 (32)

Goal – 20 cities participate with no more than 12 properties per community for a potential total of 240 improved properties and an average cost of \$35,000 per property to acquire, remediate, demolish or refurbish and \$10,000 for housing plan subsidy.

Tier 3: Cities with population over 2,500 and under 20,000 (9)

Goal – 6 cities participate with no more than 20 properties per community and an average of \$55,000 per property to acquire, remediate, demolish or refurbish and \$15,000 for housing plan subsidy.

Necessary resources for implementation (including FTE's)*: We expect to hire two team members for four years of operations. We anticipate that the process from a city being accepted into the program to new home occupancy will take approximately 30 months per property.

50% anticipated to be spent in 2023/25 biennium.

Are resources being redirected or are they new or additional (including FTE's)*: New Resources and 2 FTEs

Who is served and impact of not funding*: The Rural Workforce Housing Proposal is a solution to effectively re-use existing infrastructure while engaging the private sector. When communities have affordable and attractive housing options, individuals and families can relocate to rural communities which will increase workforce numbers and support long-term sustainability of communities.

Community Development Education/Convenings (Priority: 09)

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Main Street Initiative has historically been housed in the economic development and administrative divisions in Commerce. The program outlined in this request continues the planning and vibrancy development in the communities across the state. These programs have provided a return on investment (25:1 and 10:1) on private and nonprofit funding. Additionally, the staff in this division has visited and provided technical assistance to over 90 communities across the state and are in the process of delivering over \$1 million in economic development association funding to provide planning, technical assistance, and education. The additional resources will support staff who will specialize in Community

Development Planning and New American/Native American community and economic development. With the staff, who will augment the economic and community development efforts in place and growing, the Main Street Initiative will be able to support rural communities who have the desire to recruit and retain workforce and families.

Necessary resources for implementation (including FTE's)*: - 2 MSI FTE

- 800k MSI Grants
- 200K in Education/Convenings
- 100K in operating

Are resources being redirected or are they new or additional (including FTE's)*: Resources for this request are new

Who is served and impact of not funding*: The additional resources in the Division of Community Services will benefit the entire state including Main Streets across the state and nonprimary sector businesses, rural communities who desire technical support for workforce and placemaking growth, organizations and communities/counties who support low to moderate households and individuals and nonprofit and educational entities who support our rural communities.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Request to expand the foreign direct investment initiative to a formal Global Engagement Office (GEO). The GEO will serve as the center point for all Commerce foreign growth initiatives (including foreign direct investment, foreign workforce attraction, and tourism); the connection point with the foreign growth initiatives of partnering agencies (North Dakota Trade Office, US Department, and the North Dakota University System); and a liaison with the state decision makers.

The GEO will create and maintain critical global relationships with consulates, embassies, and foreign governments for the realization of global growth in an ever-evolving geopolitical environment. This will be done through regular economic research into global market opportunities to identify priorities, quarterly trips to meet with foreign consulates and embassies within the US, monthly multiagency meetings for alignment on global priorities, and formal trade and investment missions alongside our partners in the North Dakota Trade Office.

Necessary resources for implementation (including FTE's)*: Requesting 1 FTE (\$250,904), increased travel budget for 4 foreign market trade missions per biennium and 8 domestic consulate/embassy missions per biennium, \$50,000 for a software service to access detailed foreign economic information and updated foreign contacts, \$15,000 for professional development for team as we take on an ever evolving foreign marketplace, increased printing for presentation materials, and increased postage cost for foreign locations.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are needed and addition of a Full Time Employee.

Who is served and impact of not funding*: The creation of GEO will provide understanding of markets and opportunities for growth in capital and workforce for North Dakota businesses. It will also create a formalized structure for multi-agency partnership and create efficiencies around efforts by multiple groups attempting to build critical global relationships.

Theodore Roosevelt Presidential Library Promotion (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	2,500,000	2,500,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	2,500,000	2,500,000	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Support broad awareness of North Dakota as the home to the new Theodore Roosevelt Presidential Library.

Targeted marketing to support the opening of the Theodore Roosevelt Presidential Library and position North Dakota as the place to celebrate America’s 250th Birthday.

The Presidential Library will be North Dakota’s first internationally significant museum and library and the first major attraction to open in decades. The library will be one of 16 presidential libraries in the U.S. This attraction will capture national and international attention based on its placement into the landscape, architecture, the quality, and caliber of the story telling and programming, BUT we will use it to also elevate North Dakota as the place Theodore Roosevelt developed his love of the land, interest in business and political fortitude. By positioning the state as TR’s proving ground, we will recruit and align media attention to catapult our state’s image in leadership, citizenship, and conservation. This will in turn open doors for new economic development projects, investment in other similar destination attractions, like the International Peace Garden, and bring new high-value visitors to North Dakota.

The awareness will also spur interest in additional tourism development opportunities in and around Medora. Additional offerings are needed to sustain a 12-month tourism season.

Key strategies:

- Coordinate and sponsor a road show featuring Joe Weigand (TR reprinter) and highlighting how North Dakota influenced TR.
- Host tier one National Media – for soft opening fall 2025 and leverage broader ND story. Goal would be to get a feature story on History or Travel Channel.
- Attend major events TBD (some in coordination with library staff and leaders) to sell broader story lines.
- Paid media strategy to influence more regional trips that would include Yellowstone, Mt. Rushmore, Glacier Park, and the Tetons.

601 Commerce

Agency 601

? Target history enthusiasts nationally as part of our niche efforts

? Partner with premium partners like the History Channel – custom content, paid digital and traditional TV buys and print placement in History Channel Magazine

? Nationwide Smithsonian magazine buy (and others too, like History Today, National Geographic, Magazine of American History, etc.)

? Enhanced presence at national group tour associations like National Tour Association and American Bus Association.

State statue 54-34.4-01-03 provides the authority to the tourism division to market the state.

Necessary resources for implementation (including FTE's)*: Budget: \$2.5 million to support national media attendance and travel

No additional staff required

Are resources being redirected or are they new or additional (including FTE's)*: We will leverage existing media relations contracts as well as current partners and events for targeted outreach.

Who is served and impact of not funding*: Medora area, Western ND and the entire state. All of North Dakota should take pride in this major attraction and how our state influenced the leadership of Theodore Roosevelt. This is a one-time opportunity that should not be missed.

Destination North Dakota - Awareness Marketing (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	-	-	-	0.00	-	-	-	0.00
Total	40,250,904	-	40,250,904	1.00	-	5,000,000	5,000,000	0.00

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Most Americans know very little about North Dakota and often what they do know is not accurate and does not help North Dakota's image as a young, progressive, vibrant, and scenic place. The state also has a substantial workforce shortage hampering economic development, community and business sustainability, and entrepreneurship. There is a timely and vital need to develop a broad, holistic approach to improving the state's image, motivating visitation, and steering resident recruitment. The Department of Commerce has deployed national perception research and is developing strategies tied to these needs, building on the success of the regional tourism campaigns and enhanced Find the Good Life effort. According to recent research, 76%

of new residents visited North Dakota prior to relocating to the state, confirming that today's visitors are tomorrow's talent. Additional resources will enable the state's workforce strategies, economic development, tourism, and community development efforts to be more successful.

We must invest in marketing our state. We have driven good results with our skimpy budget but cannot expect to see dramatic change without a dramatic investment. A national image research study is currently underway to capture the general awareness and perception of North Dakota. We expect the research (estimated completion on Oct. 1, 2022) to confirm that North Dakota is a mystery to most Americans. This benchmark research will define the current perception of our state and help with insight on best tactics, messaging, and markets to deploy in addressing this problem.

State statute 54-34.4-01-03 provides the authority to the tourism division to market the state and all its resources.

o The opportunity to elevate awareness and the image of North Dakota has never been higher. The ability to improve awareness, change perceptions and drive interest in visiting, moving

- The holistic workforce strategy is working to remove barriers and improve North Dakota's competitiveness for talent. While some of the strategy is long term, the time is now to drive potential new workforce to our Find the Good Life program that connects potential workers to communities.

Goal: Targeted national media campaign – showcasing ND's quality of life. This would allow the addition of traditional media and include premium placements on streaming platforms like Paramount (home to Yellowstone and 1883).

Budget: \$15 million for marketing

Results: 520 million digital impressions. The addition of TV would triple our impressions and resulting conversions.

- The strategy for economic development is to reposition North Dakota as a leader and showcase the State's new economy: Clean, green, diversified, connected and a proving ground for innovation.

Goal: Secure national media prominence on topics such as: carbon neutrality, clean energy, sustainable agriculture, automation, and innovation and support with a strong marketing campaign and storytelling efforts. The strategy could include features in targeted mailings of the Wall Street Journal, Fortune or advertising tied to Shark Tank.

Budget: \$5 million to support robust media relations efforts and marketing campaign to position and serve up ND leaders for keynoters on these topics. These profiles will also be featured in paid media.

Results: Tier one national media placements. An example of a tier one placement and five keynote addresses at national or international conferences.

- The strategy for tourism marketing is to expand the geographic reach of paid advertising that is not limited to spring/early summer and closer to an "always on" campaign.

Goal: Broader campaign to increase awareness of the uncrowded outdoor recreation opportunities, small town offerings and city experiences. Increase share of voice by extending campaign length and expanding our geographic targets. To make a bigger impact we need to add premium placements, national sponsorships, and national event exposure. For example, featured content on premium streaming services across CTV/OTT and audio like Pandora and SiriusXM. Additional travel portals would also be considered to target travelers nationally – like Kayak and booking.com.

601 Commerce

Agency 601

Budget: \$20 million to support expanded premium marketing in key growth markets that align with visitor and workforce recruitment data. Our best chance of success will be to supercharge the destination marketing program to support all efforts.

Results: 1.88 billion impressions, 4X arrivals of 2021, and 4.9 million website visits across traditional, digital, social, and organic marketing. Assuming the same ROI as 2021 (1:34) this would result in \$680 million in spending to support local businesses and \$60 million in taxes to support state and local government. This investment will elevate success for workforce efforts for those who have seen the advertising by 12%-18% and for those who have visited by 20%-25%.

Necessary resources for implementation (including FTE's)*:

- \$15 million workforce
- \$5 million economic development
- \$20 million visitors (the budget is highest for visitor strategy based on data which shows this investment is mostly likely to return results.)
- 1 FTE (\$250,904 all inclusive) to manage campaigns and measure results

Are resources being redirected or are they new or additional (including FTE's)*: requires new resources

Who is served and impact of not funding*: Key beneficiaries:

Employers- fewer vacancies

Businesses – more economic opportunity, more employees, more customers, ability to expand and grow

Communities – increased vibrancy, local taxes generated

State of ND – elevated image and higher tax base to sustain operations

If we continue to underinvest in marketing our state, we will continue to struggle with growth and prosperity. North Dakota is drastically outspent by our regional competitors. Comparative budgets are available upon request.

Workforce Investment Funding (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Agency 601

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The need for this funding is twofold- North Dakota needs a sustainable funding mechanism to support locally-led workforce initiatives. This initial investment is meant to start the fund which will have a request for continuing authority and biennial requests for additional funding. Most of this funding will be granted to communities, with a smaller portion reserved for the WDC to direct for investments in innovative workforce solutions. This request is aligned with a recommendation of the WDC.

Necessary resources for implementation (including FTE's)*: A permanent FTE is needed to manage the development and implementation of this funding resource for local workforce initiatives.

Are resources being redirected or are they new or additional (including FTE's)*: New additional resources with a added permanent FTE position.

Who is served and impact of not funding*: Some of the most impactful workforce solutions are initiated at the local level; however, many communities do not have the financial resources to implement these projects. This fund will be a resource for projects that will impact communities of all sizes, while also enabling the Workforce Development Council to invest in innovative workforce solutions.

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Tourism is a leading industry in North Dakota, yet few incentives or support programs exist to help build tourism infrastructure or support experiences that utilize our public land. The tourism industry, like agriculture and energy, has potential to not only benefit the state economically but also has substantial impacts on our resident's quality of life.

There is a need for additional attractions to motivate trips to North Dakota and to entertain residents and recruit and retain workforce.

State statute 54-34.4-01-03 provides the authority to the tourism division to plan for and support development of additional tourism offerings throughout the state.

Necessary resources for implementation (including FTE's)*: We are in the process of hiring for the newly created manager of tourism development position.

We need to provide incentives and resources to support this focused development effort. Based on the large number of grant applications from previous smaller grant programs, there are many projects that would proceed if funding was available. By creating a dedicated fund for the purpose of launching new destination tourism attractions or expanding existing attractions, communities and the state would benefit by expanded visitor revenue and increased community vibrancy. We would need to define which destination attractions are eligible, but gaps identified to be considered include:

- 1- Cultural and historical attractions
- 2- Themed education and entertainment offerings
- 3- Agri tourism experiences
- 4- Outdoor recreation offerings tied to our most scenic and natural landscapes
- 5- Focused niche projects unique to North Dakota

Request \$25 million to be granted to qualified projects with matching fund requirements TBD.

Are resources being redirected or are they new or additional (including FTE's)*: With a \$25 million dollar grant program, an administrative FTE (or shared FTE within Commerce) would be needed for management. Full FTE estimate: \$250,904.00

Who is served and impact of not funding*: The growth of new destination attractions throughout North Dakota will benefit most North Dakotans, specifically:

- Citizens and families looking for entertainment options
- Businesses who will benefit from increased customers attracted by the new offering
- Employers who will have more to showcase potential recruits
- Communities and state – by increasing vibrancy and appeal to current residents and new recruits.

Not funding these grants will result in few additional destination attractions in North Dakota and loss of revenue to other states investing in tourism operations. Research on the ROI of Georgia's program is available upon request.

Workforce Division: Apprenticeship Coordinator (Priority: 19)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	300,000	-	300,000	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	300,000	-	300,000	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: North Dakota is missing out on opportunities to secure federal funding to advance apprenticeship. Succeeding in this area requires the full attention of an employee, which we are not able to provide with our current team. Additionally, employers interested in and/or operating Registered Apprenticeship Programs need assistance navigating the complex federal Department of Labor system as these programs carry a heavy administrative burden. This request is a recommendation of the WDC.

Necessary resources for implementation (including FTE's)*: If ND is going to do a better job of utilizing apprenticeships as a workforce training and pipeline development tool, we need a permanent FTE who can prioritize and focus on this work. This employee will need standard issued equipment to perform daily functions of this role.

Are resources being redirected or are they new or additional (including FTE's)*: Permanent FTE and resources for operating expenditures.

Who is served and impact of not funding*: The apprenticeship coordinator will lead application and management of federal apprenticeship grants, help employers navigate the complex federal registered apprenticeship system, and promote apprenticeship to students and jobseekers.

Internship Program (Priority: 20)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	105,000	-	105,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	105,000	-	105,000	0.00	-	-	-	0.00

State Initiative:* Employer of Choice

601 Commerce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The ND Department of Commerce is pursuing an internship program that can aid both our agency in the form of work completion and provide work experience in the form of an internship for college students in all the divisions throughout Commerce.

Necessary resources for implementation (including FTE's)*: General fund dollars for temporary salaries

Are resources being redirected or are they new or additional (including FTE's)*: New resources would need to be added.

Who is served and impact of not funding*: Area college students who are needing to fulfill their internship program will be able to gain experience in a government agency which will hopefully spark their interest to apply for a ND state government job upon completion of their degree.

					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-6100	60160	-	-	-	-	-	-	10,000,000
Total				-	-	-	-	-	-	10,000,000

State Initiative:* Workforce

Explanation / Justification:

Rural Renewal Workforce Housing (Priority: 8)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-5100	60160	-	18,415,000	-	18,415,000	-	-	5,000,000
Total				-	18,415,000	-	18,415,000	-	-	5,000,000

State Initiative:* Workforce

Explanation / Justification: Rural communities face multiple unique workforce housing challenges. The lack of housing options, age of housing stock, construction costs, lack of builders and contractors, limited financing capabilities, and lower appraisal values negatively impact local economies.

Outreach efforts between the Dept. of Commerce, communities across the state and a rural housing taskforce have verified the need for a state-funded, flexible program that can bolster housing development, community revitalization and economic development.

The Rural Renewal Workforce Housing Proposal is a solution to effectively re-use existing infrastructure while engaging the private sector. When communities have affordable and attractive housing options, individuals and families can relocate to rural communities which will increase workforce numbers and support long-term sustainability of communities.

Agency 601

Workforce Investment Funding (Priority: 13)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-4200	60160	-	50,000,000	-	50,000,000	-	-	20,000,000
Total				-	50,000,000	-	50,000,000	-	-	20,000,000

State Initiative:* Workforce

Explanation / Justification: This need for this funding is twofold- North Dakota needs a sustainable funding mechanism to support locally-led workforce initiatives. This initial investment is meant to start the fund which will have a request for continuing authority and biennial requests for additional funding. Most of this funding will be granted to communities, with a smaller portion reserved for the WDC to direct for investments in innovative workforce solutions. This request is aligned with a recommendation of the WDC.

Emergency Shelter Grant (Priority: 14)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-6100	60160	-	(240,000)	-	(240,000)	-	(240,000)	-
	E3519	601-6100	60160	-	(1,000,000)	-	(1,000,000)	-	(1,000,000)	-
Total				-	(1,240,000)	-	(1,240,000)	-	(1,240,000)	-

State Initiative:* Other

Explanation / Justification: The decrease adjustment in the budget includes the move of the Emergency Shelter Grant (ESG) and the North Dakota Homeless Grant (NDHG) to the North Dakota Housing Finance agency. This transition will ultimately benefit the ultimate clients who are recipients of this grant by transitioning from shelter, to rent to potentially home ownership. The increase in funding for the staff which manage the federal programs is to deliver salary equity for the staff capacity and increased travel required to meet the federal monitoring demands.

Agency 601

Destination Development Fund (Priority: 18)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-3000	60160	-	25,000,000	-	25,000,000	-	-	-
	499	601-3000	60160	-	-	-	-	-	-	50,000,000
Total				-	25,000,000	-	25,000,000	-	-	50,000,000

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: We are in the process of hiring for the newly created, manager of tourism development position.

We need to provide incentives and resources to support this focused development effort. Based on the large number of grants applications from previous smaller grant programs, there are many projects that would proceed if some funding was available. By creating a dedicated fund for the purpose of launching new destination tourism attractions or expanding existing attractions, communities and the state would benefit by expanded visitor revenue and increase community vibrancy. We would need to define destination attractions eligible, but gaps identified to be considered include:

- 1- Culture and historical attractions
- 2- Themed education and entertainment offerings
- 3- Agri tourism experiences
- 4- Outdoor recreation offerings tied to our most scenic and natural landscapes
- 5- Focused niche projects unique to North Dakota.

Request \$25 million to be granted to qualified projects with matching fund requirements TBD.

Area Health Education Center (AHEC) (Priority: 21)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

Total				-	878,571	-	878,571	-	-	878,571

State Initiative:* Other

Explanation / Justification: Volunteer Generation Fund grant is a federal grant through AmeriCorps Agency that will be used to develop and/or support community-based entities to recruit, manage, and support volunteers. AmeriCorps seeks to fund effective approaches that expand volunteering, strengthen the capacity of volunteer connector organizations to recruit and retain skill-based volunteers, and develop strategies to use volunteers effectively to solve problems. The requested amount is the required state match that includes 20% of overall award in Year 1, and 30% of award amount in Year 2.

Community Development Grants (Priority: 23)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-5100	60160	-	800,000	-	800,000	-	-	800,000
Total				-	800,000	-	800,000	-	-	800,000

State Initiative:* Health, Vibrant Communities

Explanation / Justification: Community Development through the Main Street Initiative has historically been housed in the economic development and administrative divisions in Commerce. The program outlined in this request continues the planning and vibrancy development in the communities across the state. These programs have provided a return on investment (25:1 and 10:1) on private and nonprofit funding. Additionally, the staff in this division has visited and provided technical assistance to over 90 communities across the state and are in the process of delivering over \$1 million in economic development association funding to provide planning, technical assistance, and education. The additional resources will support staff who will specialize in Community

601 Commerce

Agency 601

Development Planning and New American/Native American community and economic development. With the staff, who will augment the economic and community development efforts in place and growing, the Main Street Initiative will be able to support rural communities who have the desire to recruit and retain workforce and families.

Automation Workforce Transition Training Program (Priority: 24)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-4200	60160	-	5,000,000	-	5,000,000	-	-	5,000,000
Total				-	5,000,000	-	5,000,000	-	-	5,000,000

State Initiative:* Workforce

Explanation / Justification: With more companies investing in automation as a solution to their workforce challenges, there is an increased need and opportunity to support the investment through the Automation Tax Credit and upskill workers to adapt to new jobs within the companies in which they're working. Upskilling creates opportunities for higher income and advancement throughout a company for workers. This request is aligned with a recommendation of the WDC.

Homeless Grant Program (Priority: 25)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-6100	60160	-	(1,330,212)	-	(1,330,212)	-	(1,330,212)	-
Total				-	(1,330,212)	-	(1,330,212)	-	(1,330,212)	-

State Initiative:* Other

Explanation / Justification: The decrease adjustment in the budget includes the move of the Emergency Shelter Grant (ESG) and the North Dakota Homeless Grant (NDHG) to the North Dakota Housing Finance agency. This transition will ultimately benefit the ultimate clients who are recipients of this grant by transitioning from shelter, to rent to potentially home ownership. The increase in funding for the staff which manage the federal programs is to deliver salary equity for the staff capacity and increased travel required to meet the federal monitoring demands.

601 Commerce

Agency 601

Literacy Grant (Priority: 26)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-4000	60160	-	200,000	-	200,000	-	-	-
Total				-	200,000	-	200,000	-	-	-

State Initiative:* Health, Vibrant Communities

Explanation / Justification: The Southeast Education Cooperative (SEEC) receives federal funding to operate the ReadingCorps program, which supports literacy in schools throughout North Dakota. The federal AmeriCorps grant they receive requires a 1:1 state match. This is a biennial request that meets the federal requirement for this program.

Workforce Enhancement Grant (Priority: 27)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-4300	60160	-	2,000,000	-	2,000,000	-	-	2,000,000
Total				-	2,000,000	-	2,000,000	-	-	2,000,000

State Initiative:* Workforce

Explanation / Justification: The Technical Skills Training grant has successfully been supporting accelerated skilled workforce training and upskilling of incumbent workers using ARPA funding received during the special session. Commerce is requesting statutory adjustments to the Workforce Enhancement Grant and the investment of funding to continue supporting workforce training through non-degree programs and incumbent worker training within companies.

Northern Plains Unmanned Aircraft Systems Test Site (NPUASTS) (Priority: 28)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

Total				-	-	38,000,000	-	38,000,000	-	30,000,000

601 Commerce

State Initiative:* Other

Explanation / Justification: To support the agricultural and energy industries, commercializing intellectual property and operationalizing federal requirements.

- Test Site Appropriations (general operations of the Test Site): \$8 million.
- Vantis Appropriations: ~\$30 million

Enhanced Use Lease - Grand Sky (Priority: 29)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	601-2500	60160	-	-	22,000,000	-	22,000,000	-	-
	499	601-2500	60160	-	-	-	-	-	-	7,000,000
Total				-	-	22,000,000	-	22,000,000	-	7,000,000

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: Development and expansion of critical infrastructure and safety measures at test site.

Statutory Authority

North Dakota Century Code Chapters 4.1-01, 4.1-01.1, 4.1-02, 4.1-03, 4.1-04, 4.1-05, 4.1-06, 4.1-07, 4.1-08, 4.1-09, 4.1-10, 4.1-11, 4.1-12, 4.1-13, 4.1-14, 4.1-15, 4.1-16, 4.1-17, 4.1-18.1, 4.1-19, 4.1-20, 4.1-21, 4.1-22, 4.1-23, 4.1-25, 4.1-26, 4.1-27, 4.1-28, 4.1-30, 4.1-31, 4.1-32, 4.1-33, 4.1-34, 4.1-35, 4.1-36, 4.1-37, 4.1-38, 4.1-39, 4.1-40, 4.1-41, 4.1-43, 4.1-44, 4.1-45, 4.1-47, 4.1-48, 4.1-52, 4.1-53, 4.1-54, 4.1-55, 4.1-56, 4.1-57, 4.1-72, 4.1-73, 4.1-74, 4.1-75, 4.1-83, 4.1-88, 6-09.10, 10.06.1, 11-33-02.1, 36-01, 36-14, 36-14.1, 36-15, 36-21.1, 36-25, 36-26, 58-03, 60-01, 60-02, 60-02.1, 60-04, 60-05, 60-06, 60-10, and 61-31.

Agency Description

The agriculture commissioner is statutorily responsible for enforcing laws and regulations pertaining to pesticides, fertilizers, anhydrous ammonia, livestock sales, dairy production, noxious weed control, plant export certification, and beekeeping. The commissioner is also responsible for the registration of pesticides, fertilizers, animal feeds, and veterinary medicines; the administration of fair and timely mediation services to agriculture producers, creditors, and energy related issues; the collection and elimination of unusable pesticides; the promotion and marketing of North Dakota products; and the administration of a state meat inspection program. The responsibilities have expanded to include a leadership role in the formation of policies affecting the state's agricultural industries; the advocacy of the needs and concerns of farmers and ranchers on state and national levels; and the distribution of information concerning agricultural issues to the governor, legislature, and the general public. The agriculture commissioner works collaboratively with the board of animal health to protect the health of domestic animals and nontraditional livestock of the state.

Agency Mission Statement

The department of agriculture fosters the long-term well-being of North Dakota by serving, advocating for, protecting, and promoting agriculture to benefit everyone. To carry out this mission, the department of agriculture supports agriculture by embracing diversity, innovation, research, and trade while adhering to the values of transparency, respect, integrity, and consistency. To fulfill these mandates, the department of agriculture:

- Serves as an advocate for farmers and ranchers and for the rural community.
- Provides services that ensure safe, high-quality, and marketable agricultural products.
- Develops and expands markets for agricultural commodities and value-added products.
- Reduces the risk of financial loss to agricultural producers and to buyers and sellers of agricultural commodities.
- Safeguards livestock and other domestic animals from communicable diseases.
- Ensures compliance with laws administered by the department through understandable regulations, information, education, and even-handed enforcement.
- Ensures human safety and a healthy environment through proper use of pesticides.
- Verifies the contents of fertilizers, soil conditioners, animal feeds, and veterinary medicines.
- Reduces agricultural losses from noxious weeds, predatory animals, insects, and diseases.

- Gather and disseminates information concerning agriculture to the general public.
- Provides fair and timely mediation services to agricultural producers, creditors, and energy related issues.

Major Accomplishments

- 1 Continued to assist producers working through drought, flood, and excessive snow with the Emergency Feed Transportation Program and Interactive hay map.
- 2 Issued 4,646 phytosanitary certificates in 2020 and 4,322 in 2021, assisting in the export of North Dakota commodities to countries worldwide.
- 3 Collected 258,115 pounds of old and unwanted pesticides in 2020 through Project Safe Send. There were 114,597 pounds collected in 2020
- 4 Continued to promote North Dakota agricultural products in the global marketplace. North Dakota is the fifth leading agriculture exporter in the nation. North Dakota exports to 124 different countries; up from 56 in 2005.
- 5 Continued to advocate for state agriculture. Agriculture comprises 25% of the state's total economy, contributing considerably over 30 billion dollars in economic activity annually and generating some eight billion dollars in cash receipts each year. North Dakota has roughly 26,000 farms and ranches. These farms and ranches comprise nearly 39.3 million acres or almost 90% of the state's total land area. North Dakota is the leading producer of at least 14 different commodities as well as a close second of a great many more. More specifically, North Dakota farmers and ranchers lead the nation in the production of more than a dozen important commodities, among them spring and durum wheat, rye, food grains, assorted beans, barley, flaxseed, canola, honey, sunflowers, pulse crops and more. North Dakota is also a hotbed for emerging crops like industrial hemp, hops, fava beans, and carinata. Additionally, North Dakota agriculture extends well beyond crops and livestock. Agritourism; agribusiness; food manufacturing and processing; agriculture equipment manufacturing and dealerships; ethanol production; innovative agriculture technology and cutting-edge farming practices; local food and farmers markets; IPA, wine, and cider production; and agricultural education all contribute to the state's thriving agriculture industry and economy. Of North Dakota's approximately 760,000 residents, only two percent are farmers and ranchers. Nonetheless, agriculture broadly supports one fourth of the state's workforce, which is much higher than the national average of nineteen percent. North Dakota agriculture remains the leading industry in North Dakota.
- 6 Continued administering the Pipeline Restoration and Reclamation Oversight Program to connect landowners and tenants experiencing pipeline reclamation and restoration issues with an independent ombudsman to help reach a reasonable solution. Since the program began in 2015, there have been 80 cases assigned to ombudsman across 15 counties in North Dakota.
- 7 Conducted education and outreach to 12 producers on the Food Safety Modernization Act Produce Safety Rule.
- 8 Federal Environmental Law Impact Review Committee continued to defend North Dakota against federal overreach, as well as funding a study on bees and pollinators, a study on bat populations, and defending the state against onerous federal WOTUS regulations.
- 9 Administered the APUC Program, awarding \$1,803,385 to 29 Projects since July 2021.
- 10 Implemented the law changes of the Grain Warehouse Inspection Program as specified in HB 1026.
- 11 Administered the Bioscience Innovation Grant Program, awarding \$5.5 million to 10 projects since July 2021.
- 12 Implemented the Environmental Impact Mitigation Fund under the oversight of the Federal Environmental Law Impact Review Committee
- 13 Administered the Grassland Grazing Grant Program, awarding \$4,786,184.28 to 228 projects since July 2021.

Critical Issues

- 1 Agriculture is one of the most important components of North Dakota's economy and society. Future critical issues include development of national and international agricultural policies, especially; the ability of producers to contend with complex federal regulations; the growing demand for agriculture-based renewable energy, including ethanol, biodiesel, wind and biomass; environmental concerns and policies including the Endangered Species Act, Clean Water Act, Clean Air Act, climate change, livestock waste/nutrient management, worker protection, food safety, and on-farm petroleum product storage; tax code changes; developing new and better risk management tools to enable producers to protect their investments; the increasing demand for marketing assistance through the Pride of Dakota program; the increasing public concern about the use of agriculture chemicals needed by farmers to control pests and diseases; the growth and development of livestock infrastructure, the increasing public concern over animal welfare standards, supply chain security, global market share, and commodity transportation.

Performance Measures

Administrative Services Division; The achievement measure is the successful oversight of developing and tracking the agency's budget, processing of payroll, paying of bills, developing and tracking contracts, and depositing of revenue. The Pipeline Program the performance measure of success is the number of cases ombudsmen assist in reaching reasonable resolutions and the number of landowners and tenants reached through educational outreach efforts. Performance measures for Wildlife Services includes the reduction of economic damage caused by wildlife, hazards at airports, and removal of beaver dams responsible for flooding of roads and cropland.

Business, Marketing and Information Division; Due to the diversity of the Business, Marketing & Information Division, the programs rely on various performance measures to manage success. Metrics for many programs are built into media spending, website, and social media engagement on a daily, weekly, monthly, or annual basis. Employees also maintain the Department's websites and social media sites in order to obtain feedback.

Pesticide & Fertilizer Division; Project Safe Send Success is measured by pounds of old, unused pesticides collected, and the number of farmers and homeowners participating in the program. For Pesticide, Fertilizer and Anhydrous Ammonia success is measured by the rates of compliance and reduction of repeat violations to state and federal statutes and regulations related to use, storage, and security. Success is also measured by the number of formal complaints responded to and successfully resolved.

Livestock Industries Division; The dairy program measures its success through federal and state surveys taken at plants and farms and the high quality and demand of products produced in North Dakota. The meat and poultry program measures its success through the development and maintenance of eleven official establishments, seven CISP establishments, the continual improvement of custom exempt establishments, and the assurance from processors and producers that the program creates for them several benefits and opportunities.

Plant Industries Division; For the noxious weed program, success is measured by the number of weed boards and landowners participating in the cost share programs and reduction in weed infestations. Apiary success is measured by the number of bee colonies registered and the number of inspections conducted at the request of the beekeepers for migratory movement. It can also be measured by licenses, and health certificates issued.

Animal Health Division; Performance is measured by preservation of North Dakota's disease-free status with regards to program diseases, the prevention of emerging/reemerging and foreign animal diseases, and the ability to effectively diagnose and respond to diseases diagnosed in North Dakota. The animal industry is comprised of over 1.9 million head of livestock with a valuation of well over \$1 billion; an industry that has annual sales exceeding \$1.1 billion dollars. The Animal Health division coordinates and communicates with practicing veterinarians in the state, as well as other state veterinarians and USDA-APHIS-Veterinary Services.

Grain Inspection Division; The feed program measures its success from increased number of product registrations and licensing and knowing there have been very few feed issues within the state. The grain program measures its success from the increased number of licensed buyers, increasing inspection frequency and reducing the number of insolvencies within the state. The livestock program measures success from the increasing number of livestock dealers and knowing there have been very few livestock issues within the state.

Program Statistical Data

Administrative Services Division; Fiscal Management tracks expenditures and files reports for over 36 grants. It also tracks 250 contracts during the biennium. Fiscal Management processes payroll for 80 FTEs and up to 30 temporary employees and oversees personnel responsibilities such as workforce safety training. The division's ombudsmen working in the pipeline program have assisted in 80 pipeline reclamation cases in 15 counties. Wildlife Services provides active predator and beaver control to ensure that the states valuable livestock, wildlife, and the environment are being protected.

Business, Marketing, and Information Division; Employees assigned to this division provide leadership, training, and advocacy for the owners and operators of the 26,100 farms and ranches in the state and stakeholders in North Dakota agriculture. The division also oversees the Pride of Dakota program and activity of over 500 members. Another notable program is the Ag in the Classroom program, which focuses on critical agriculture education to more than 6,000 school- aged children throughout the year. Business, Marketing & Information employees also provide support for the 14 state commodity councils, as well as all the other associations and boards that represent North Dakota's crops and livestock growers and producers.

Pesticide and Fertilizer Division; During 2020 and 2021, Project Safe Send collected roughly 372,712 pounds of waste pesticides and properly disposed of them. There were 255 Safe Send participants in 2020, and 347 participants in 2021. During the 19-21 biennium, the division licensed 987 fertilizer distributors, 288 anhydrous ammonia facilities, 6,749 fertilizer products registered and 13,250 pesticide registrations. From 2019-2021, there was 150 official storage facility inspections performed with an average compliance rate of 92.48% per storage facility.

Livestock Industries Division; The Dairy program inspects 44 dairy farms three times per year. Haulers/samplers, mild trucks, wash station, transfer stations, and distributors are also inspected. The program inspects all plants four times per year. Approximately 500 raw and finished dairy products are sampled and tested yearly. The Meat and Poultry Inspection program inspects eleven official state slaughter/processing establishments and seven CISP establishments, on a daily or weekly basis, depending on volume. The program also inspects 73 custom exempt establishments three to four times a year for sanitary operations and structure of facility.

Plant Industries Division; Export certificates were issued to facilitate movement of North Dakota agriculture commodities to other countries and states. Total number of certificates issued for 2020 and 2021 was 6,578 and 5,292 respectively. During 19-21, biennium the Landowner Assistance Program (LAP) distributed \$937,023.58, and the Targeted Assistance Program (TAG) distributed \$214,209.62. In 2020, 300 beekeepers were licensed with 691,665 colonies located on 18,193 apiary sites. In 2021, 323 beekeepers were licensed with 742,547 colonies located on 19,086 locations. Pre-inspected and certified 77,804 colonies for shipment into California in 2020 and 80,949 in 2021. In 2020, the hemp pilot program had 81 growers and 21 processors growers who planted a total of 3,392 acres, while in 2021, 23 processors and 49 growers planted a total of 911 acres of hemp.

Animal Health Division; Disease investigations included 8 cases of vesicular lesions of horses and livestock, 15 cases of Highly Pathogenic Avian Influenza, involving over 165,300 birds, and 6 trace-outs of 19 animals to 4 premises due to CWD affected herds in other states. 312 staff hours were required to issue and maintain records of 338,000 bovine brucellosis tags, 141,000 official USDA metal tags, and 68,240 USDA radio-frequency identification (RFID) tags for animal disease traceability and program disease activities. 11,708 farmed cervids have been tested for Chronic Wasting Disease since the state program began. 428 Nontraditional Livestock, Farmed Elk, and permitted gamebird facilities have animal inventory audits conducted annually by Animal Health Division staff. 1,689 livestock medicines are registered representing 91 animal health companies.

Grain Inspection Division; The grain program licenses 356 state warehouse and 111 roving grain buyers. All state warehouses and roving grain buyers are inspected annually. The livestock program licenses 112 livestock dealers, 195 livestock dealer agents, 12 auction markets, and 7 representatives for satellite/video auctions. The Feed program licenses 250 feed retailers and 479 companies as manufactures of feed. The program has over 3,943 feed labels and 12,320 pet food labels on file.

Explanation of Program Costs

Administrative Services Division; The funds requested are the necessary funds to carry out the functions of the division. Information technology costs are a significant amount due to the fee structure for services provided by NDI and daily contact with constituents, department staff, and others are the major means of providing the services for this division. Travel is a significant amount because the agriculture commissioner is active in outreach, education, and marketing. Office lease is a significant operating expense as the department leases office space for 11 FTEs to ease overcrowding issues in the Capitol Building.

Business, Marketing and Information Division; The funds requested are the minimum funds necessary to carry out the functions of the division. The division provides public information and outreach for the agriculture commissioner, by researching, writing, and publishing department content on a variety of platforms, and responding to questions and request from the public. The division is the marketing and communications resource for the entire department including strategic planning, creative execution, media placement, event planning, online engagement, and conducting promotional activities for the Pride of Dakota program and other program areas. Grants are a significant part of this division as the Division oversees the Bio-Science Innovation Grant, APUC, and the Agricultural Diversification and Development Fund. The SCBG Program alone accounts for over \$10 million dollars of federal grant line expenditures.

Pesticide and Fertilizer Division; The funds requested are necessary to carry out the pesticide program, project safe send, fertilizer program, anhydrous ammonia, and risk management program. The pesticide, fertilizer, and anhydrous ammonia programs each have a registration and/or licensing component that occurs primarily in the office, and a complimentary field regulatory component that involves inspecting regulated entities and sampling products to ensure compliance with regulatory requirements. These efforts have dramatically increased levels of compliance, although they do require significant investments in salaries, travel, and IT.

Livestock Industries Division; The funds requested are necessary to carry out the duties of the dairy, meat, and poultry inspections programs. From 2020-2021, meat and poultry inspections costs increased by approximately 14% due to an increase in the number of establishments. Dairy costs remain neutral; however, as farm numbers go down, the department is faced with increased federal regulation. More consumer protection programs will increase our costs for finished product testing and drug residue screening. As farm numbers drop, per-farm inspection costs increase because of greater distance between farm inspections. The dairy program is responsible for the inspection and licensing of egg dealers.

Plant Industries Division; The funds requested are necessary to carry out the duties of the hemp program, nursery inspection program, plant pest prevention, detection, evaluation, phytosanitary export certification program, apiary, and noxious weeds program. Major noxious weed budget items include funding for the Landowner Assistance Program (LAP) and the Targeted Assistance Grant (TAG), and salaries and operating expenses associated with communication and travel. The division serves as a liaison between the public and beekeepers. Program costs include salaries for adequate personnel to inspect colonies, associated travel, and motor pool costs.

Animal Health Division; The funds requested are the minimum funds necessary to carry out the functions of this division. The funds are used for salaries for three veterinarian positions, three support staff positions, one field investigator position, one avian influenza coordinator, which is approximately 60% of an FTE, supplies, work related travel, and other operating expenses necessary to carry out animal health regulations, the Board's policies, and orders as prescribed in statute. In addition to general funds, funding sources include monies from ND Game and Fish Department, and when available, USDA-APHIS cooperative agreements and other federal grants.

Grain Inspection Division; The funds requested are the minimum funds necessary to carry out the functions of the division. Necessary functions include regulating and licensing grain warehouses, grain buyers, feed manufactures, retailers, livestock dealers, auction markets, representatives of video livestock auction markets, and

other activities pertaining to grain, livestock, or feed. Insolvency costs are reimbursed from trust fund assets after all revenues have been collected and payment has been accounted for. Grants are a significant part of this division as the livestock pollution prevention program receives federal EPA 319 grant funds to cost share waste-water projects on livestock operations.

Program Goals and Objectives

Administrative Services Division; Establish and maintain proper fiscal management controls. Assist the agriculture commissioner in carrying out legally mandated responsibilities. Provide fiscal management and research support services to the various divisions of the department, and to provide coordination and efficient delivery of various agency services. Address pipeline and wind energy reclamation and restoration problems in the early stages to have a higher degree of resolution. In cooperation with USDA Wildlife Services, prevent predator damage, protect livestock, manage bird damage to crops, and mitigate beaver damage to roads, crops, and trees.

Business, Marketing and Information Division; Provide services to Department divisions to include event planning, research, marketing, communications, public information, creative talent, design, marketing plans, and social media oversight. Develop activities which initiate and/or expand effective promotion of North Dakota and its agriculture products. Educate and inform the public on North Dakota agriculture products, production practices, and build connections between farmers, ranchers, and the non-agriculture audiences. Administer and implement the Pride of Dakota program.

Pesticide and Fertilizer Division; Ensure compliance of pesticide laws and administrative rules through education and regulation to better mitigate the risk of pesticides to human health and the environment. Distribute copies of the state pesticide laws and rules, informational brochures, and other references to the public, provide outreach to the regulated community through presentations at public meetings and news releases. Act as a liaison between EPA, North Dakota pesticide users, and other stakeholders on pesticide issues. License fertilizer distributors and anhydrous ammonia facilities. Register fertilizers and pesticides to ensure compliance with state laws.

Livestock Industries Division goals and objectives; Ensure that all dairy, meat, and poultry products are safe from contamination. The Dairy program is responsible for the promotion, improvement, and growth of the dairy industry in North Dakota. It is responsible for the enforcement of state and federal rules and regulations pertaining to the production of milk and milk processors, distributors, and wholesalers. The Meat and Poultry Inspection program is responsible for ensuring that meat and poultry products produced in the state and sold to consumers comply with the required standards for safety, purity and wholesomeness set by the state and federal governments. All products produced in a state-inspected plant must meet or exceed standards set by USDA.

Plant Industries Division goals and objectives; Protect agronomic crops, horticultural crops, and native and tame grasses used for livestock production from losses caused by plant pests. Participate in programs to prevent introduction of invasive pests (e.g. Emerald ash borer). Implement a hemp program. Assist in the development and implementation of effective, integrated, environmentally sound management practices for noxious weeds on all land within the State of North Dakota. Maintain a healthy beekeeping environment by inspecting colonies of migratory beekeepers and non-migratory beekeepers' bees upon request. To continue to strive for compliance with statutes. Conduct inspections of nursery stock to ensure the public is aware of nursery stock that cannot survive our harsh climate.

Animal Health Division; Protects the health of domestic animals and nontraditional livestock in the state by ensuring the humane treatment of animals and prevention of infectious and contagious diseases. While maintaining a comprehensive animal health database used for multiple programs and purposes. The division also licenses facilities that sell virulent products, approves all modified live vaccines that are sold in North Dakota, and registers Livestock medicines sold in the state.

Grain Inspection Division; Inspect and license all grain warehouses and grain buyers, eliminating losses to sellers of grain in North Dakota. License various livestock marketing agencies to eliminate losses to sellers of livestock in North Dakota. Provide effective education of stakeholders regarding the goals of the grain/livestock inspection program to create buy-in and cooperation. The feed program ensures the health and well-being of the ND livestock and companion animals by protecting the integrity of feed. It also protects the consumer by ensuring truth in labeling and ensuring that the industry is competing on a level playing field.

Budget Request Summary

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This position would coordinate information gathering and storage system development and maintenance, including work orders for IT Vendors, coordinate server deployments and UAT (User Acceptance Testing) for vendor or department initiated changes, act as primary contact for NDDA divisions; including End User Compute and Collaborate, Email, Server, Database and other divisions related to NDDA Staff equipment and electronic systems requests or incidents, attend NDDA trainings or other events to learn about new deployments or other features, support Department owned staff assigned assets including printers, scanners and other non-NDDA supplied assets, monitor agency compliance with NDDA policies including staff and vendor

602 Agriculture

Agency 602

required trainings, work with the GIS specialist to maintain plotters and wide format scanner in working ready condition and work with vendors on contracts and service as needed, as well as perform records and forms management.

Necessary resources for implementation (including FTE's)*: New FTE; Salary and operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE; Salary and operating expenses.

Who is served and impact of not funding*: The department employees and citizens of North Dakota. Not funding this position as program systems become more complex would require more employees, inspectors, and veterinarians to continue to become experts in their data collection and storage systems. This time spent coordinating and visioning for their systems, will take away additional time with the industries we serve creating the potential for slower customer service and increased staffing needs across various programs in the department.

North Dakota Trade Office (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	500,000	-	500,000	0.00	-	500,000	500,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	500,000	-	500,000	0.00	-	500,000	500,000	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request is for an additional \$500,000 for the North Dakota Trade Office in regards to their trade missions for the state of North Dakota. The increase request is to have the ability to do at least two additional self-funded trade missions with an estimated cost of approximately \$80,000. Domestic travel has been a limiting factor in operations, due in part to the high costs of travel and limited budget, which includes; airline, hotels, registrations, mileage, etc. Estimated costs are approximately \$40,000. Reverse trade missions and hosting request of an additional \$50,000. Engagement with global partners to assist in raising awareness, identifying potential customers/partners, arranging meetings, etc. estimated costs for this of \$180,000. Part of this request for the additional amount is to add one additional employee who would assist in operations on the Western side of the state. In addition, the North Dakota Trade Office is moving to a new location where it has a partnership with NCI to share a building receptionist. The additional funding request would bring the total for the North Dakota Trade Office to \$2.1 million.

Necessary resources for implementation (including FTE's)*: The department has a contract with the North Dakota Trade Office.

Are resources being redirected or are they new or additional (including FTE's)*: Additional Funding Request, no additional resources would be required to implement.

602 Agriculture

Agency 602

Who is served and impact of not funding*: Producers of North Dakota doing domestic or international trade. Not funding would limit new opportunities for North Dakota companies to promote their value added products.

Bioscience Innovation Grants (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	12,000,000	12,000,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	5,500,000	5,500,000	0.00
Total	-	12,000,000	12,000,000	0.00	-	5,500,000	5,500,000	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The request is for an appropriation of \$12,000,000 for the Bioscience Innovation Grant fund. Last biennium the department was appropriated \$5,500,000. Ten grants were awarded to various companies and the ND Bioscience Association. Two more companies have relocated to the state and one that is considering opening operations. Eastern North Dakota has become known nationwide as a leader in the bioscience industry. Companies located within the State already are showing tremendous growth. Since the inception of the funding, 136 jobs have been added to the state with an average salary of \$75,531 a year. The department continues to receive high interest in the program and feels the funding is critical to capturing the emerging opportunities and diversifying our economy.

Necessary resources for implementation (including FTE's)*: A competitive solicitation process to award company(s) a grant.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding request, no additional resources would be required to implement.

Who is served and impact of not funding*: Bioscience industry, companies, and employees.

Marketing Specialist FTE (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

602 Agriculture

Agency 602

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This position would be to assist the department in setting up domestic trade shows, recruiting companies for international trade missions, increase department interaction with Commodity groups as well as assist with marketing of the department and its many programs. The department has seen a significant interest in company participation in domestic tradeshow, a desire from commodity groups to assist and participate with marketing activities to promote ND agricultural products and needs to continue strong promotion of programs and services offered by the department.

Necessary resources for implementation (including FTE's)*: New FTE; Salary and operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE; Salary and operating expenses.

Who is served and impact of not funding*: Companies and producers of North Dakota looking to expand their marketing efforts, increase sales and increase awareness of North Dakota commodities and products made in North Dakota. Not funding would limit new opportunities for North Dakota companies to promote their value added products.

Wildlife Services (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	200,000	-	200,000	0.00	200,000	-	200,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	200,000	-	200,000	0.00	200,000	-	200,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The increase request is to offset increased aerial costs (aerial contract aircraft per hour). USDA-Wildlife Services uses highly effective and target-specific aerial operations to protect livestock from depredation in vast, open, and remote locations. USDA-Wildlife Services provides capable, mission ready aircraft with professionally trained crews in the aircraft as well as on the ground. Increased employee awareness of agency policy, procedures and safe practices are the highest priorities. There is a downward trend in overall aerial hours flown in ND, primarily due to the cost of aerial contract aircraft per hour. If this trend continues the direction it is going, ten years from now there will be significantly less aviation assistance available to ND livestock producers.

602 Agriculture

Agency 602

Necessary resources for implementation (including FTE's)*: The department has a contract with USDA-Wildlife Services. USDA-WS contracts with the aerial contractors.

Are resources being redirected or are they new or additional (including FTE's)*: The request is to add additional resources to the aerial contract services to mitigate wildlife conflicts with humans and human activities and wildlife damage to agriculture, natural resources, property, and human health and safety caused by coyote, red fox, other state-managed species.

Who is served and impact of not funding*: Provide high quality wildlife damage management services for the farmers, ranchers, producers, and citizens of North Dakota that result in the protection of agriculture, wildlife and other natural resources, property, and human health and safety. The impact of not funding would increase coyote damage to livestock, along with the threat of injury, damage, or resource loss due to wildlife.

Funding for Rent Model (Priority: 06)

Continuing Appropriation Summary

Turkey Fund

	2021-23	2023-25
Statutory Authority NDCC Chapter 4.1-12-08		
Beginning Fund Balance	16,119	17,120
Revenues and Transfers In	25,001	25,001

602 Agriculture

Agency 602

	2021-23	2023-25
Total Financing	41,120	42,121
Expenditures and Transfers Out	(24,000)	(24,000)
Ending Fund Balance	17,120	18,121

Honey Promotion Fund

	2021-23	2023-25
Statutory Authority NDCC Chapter 4.1-08-05		
Beginning Fund Balance	267,612	267,612
Revenues and Transfers In	160,000	165,000
Total Financing	427,612	432,612
Expenditures and Transfers Out	(160,000)	(165,000)
Ending Fund Balance	267,612	267,612

State Waterbank Fund

	2021-23	2023-25
Statutory Authority NDCC Chapter 61-31-10		
Beginning Fund Balance	41,211	41,211
Revenues and Transfers In	54,000	54,000
Total Financing	95,211	95,211
Expenditures and Transfers Out	(54,000)	(54,000)
Ending Fund Balance	41,211	41,211

Minor Use Pesticide Fund

	2021-23	2023-25
Statutory Authority NDCC Chapter 4.1-39-07; NDCC Chapter 4.1-39-08		
Beginning Fund Balance	141,297	91,297
Revenues and Transfers In	325,000	325,000
Total Financing	466,297	416,297
Expenditures and Transfers Out	(375,000)	(375,000)
Ending Fund Balance	91,297	41,297

602 Agriculture

Agency 602

Credit Sale Contract Indemnity

	2021-23	2023-25
Statutory Authority NDCC Chapter 60-10-02		
Beginning Fund Balance	3,869,648	3,899,648
Revenues and Transfers In	30,000	30,000
Total Financing	3,899,648	3,929,648
Expenditures and Transfers Out	-	-
Ending Fund Balance	3,899,648	3,929,648

Federal Environmental Law Impa

	2021-23	2023-25
Statutory Authority NDCC Chapter 4.1-01-21		
Beginning Fund Balance	1,064,085	4,067,745
Revenues and Transfers In	5,000,000	-
Total Financing	6,064,085	4,067,745
Expenditures and Transfers Out	(1,996,340)	(2,500,000)
Ending Fund Balance	4,067,745	1,567,745

Bioscience Innovation Grant fu

	2021-23	2023-25
Statutory Authority NDCC Chapter 4.1-01-20.1		
Beginning Fund Balance	151	151
Revenues and Transfers In	5,500,000	-
Total Financing	5,500,151	151
Expenditures and Transfers Out	(5,500,000)	-
Ending Fund Balance	151	151

Statutory Authority

North Dakota Century Code Chapter 54-53

Agency Description

The Upper Great Plains Transportation Institute(UGPTI) was created by the North Dakota legislature in 1967 as part of North Dakota State University to foster a better understanding of the role of transportation in the economy and state. UGPTI provides timely information to state and local governments regarding the condition of transportation infrastructure in the state and expected road and bridge investment needs. Moreover, UGPTI provides transportation expertise that helps North Dakota businesses compete nationally and globally.

Agency Mission Statement

Providing innovative transportation research, education and outreach that promote the safe and efficient movement of people and good.

UGPTI conducting applied and advanced research in highway, transit, rail, air and waterway transportation that addresses the critical issues of the state, region and nation.

Educating the transportation workforce of tomorrow through multidisciplinary curricula that focus on transportation economics, management, infrastructure planning, mobility and logistics.

Improving the skills and knowledge of the existing workforce through training, technical assistance and the transfer of research results to practitioners.

Major Accomplishments

-
- 1 Completed 47 research projects under the regional University Transportation Centers grant from USDOT on preserving the existing transportation system, transportation safety, and advanced transportation technologies.

 - 2 Completed 12 research projects under the Tier 1 University Transportation Centers grant from USDOT related to small urban, regional, and transit mobility needs.

 - 3 Conducted 1370 training and professional development events for roadway managers, city planners, and transit operators in North Dakota and the nation.

 - 4 Disseminated research results and transferred applied knowledge to 10,870 transportation practitioners in North Dakota and the nation during the previous biennium.

 - 5 Provided state agencies, agricultural industries, and investment groups with important insights into grain marketing and patterns and trends, including the publication of 8 UGPTI reports.

 - 6 Provided essential services to North Dakota's Metropolitan Planning Organizations to help them predict future traffic levels, update their transportation planning procedures, and deploy intelligent transportation systems.

 - 7 Provided counties throughout the state with technical support including: on-site training and technical assistance, online roadway inventory tools, and online road and bridge planning assistance.

 - 8 Provided oil and gas producing counties with technical assistance regarding roadway challenges stemming from oil traffic and movements of drilling-related inputs and equipment.

Major Accomplishments

-
- 9 Provided tribal leaders and planners with insights in roadway management, safety, and transportation planning issues, solutions, and methods
-

Critical Issues

-
- 1 Federal Programs: The passage of the Bipartisan Infrastructure Law (BIL) in the Infrastructure Investment and Jobs Act (IIJA) reauthorized the surface transportation program for five more years. The University Transportation Centers (UTC) program was reauthorized in the BIL and other discretionary research programs were established, creating potential opportunities for UGPTI, as well as uncertainties. The UTC program is being re-competed and it is essential that UGPTI win several of these competitions to continue to provide at least the same level of federal funding the agency has enjoyed in the past.
 - 2 Federal Match Requirements: Many federal programs require a 100% match, which increases the amount of state and non-federal funds needed to compete for grants. The UTC program (a key source of funding for UGPTI) requires a substantial "institutional commitment" from the university and state. It is critical that UGPTI have enough non-federal source dollars to match federal grant opportunities.
 - 3 Rising Travel and Procurement Costs. Inflation and supply chain issues have impacted the cost and supply of many electronic and office goods. Increases in travel costs (particularly airline fares and vehicle operating costs) pose budget challenges and may limit some professional development opportunities for staff in the future.
 - 4 Employee Recruitment and Retention. Finding qualified applicants with the appropriate technical backgrounds and skills is a major challenge. The smaller regional labor pool is resulting in fewer qualified applicants for open positions. In addition, UGPTI is frequently at a competitive disadvantage with respect to other universities in the United States, where the pay scales are often higher, and have been increasing in response to the tight labor market. Many of the most qualified applicants for research positions are foreign nationals. Immigration policies often make it difficult to recruit and retain foreign nationals.
-

Performance Measures

The agency has not established a formal performance measure and results oriented reporting system at this time because over 85% of the budget is contract in nature. As a result of this, the terms of the contracts become the performance measures for UGPTI.

Program Statistical Data

1. Contracts/Grants Revenue
2. research Reports/Staff Papers/Journal Articles published
3. Presentations/Seminars presented
4. Courses/Workshops/Seminars taught
5. Number of Student Research Assistants

Explanation of Program Costs

The primary costs of this program are for faculty and staff necessary to develop and operate a program of excellence that is among the top university transportation programs in the United States. A large contract research program requires travel for selling the Institute's capabilities, identifying and securing contracts, and serving

the clients once the contracts have been successfully procured. State-of-the-art computers, office, communications, and traffic monitoring equipment is also crucial to remaining competitive and continuing to improve performance.

Program Goals and Objectives

The Upper Great Plains Transportation Institute's primary goals are to (1) provide government and private industry with essential knowledge about transportation infrastructure, operations, safety and logistics; and (2) prepare existing and potential workers to manage complex transportation systems. These overarching goals give rise to several strategic objectives, including:

1. Contribute to informed decisions at the state and national level through cutting-edge interdisciplinary transportation research.
2. Improve the knowledge and skills of transportation workers through training, technical assistance, and the transfer of research results to practitioners.

An abbreviated list of operational objectives follows (drawn from the strategic objectives).

1. Support urban planning by offering expertise in: a) traffic analysis software (e.g., traffic signal timing and simulations), b) metropolitan travel demand modeling, and c) the automation of traffic data collection.
2. Improve mobility by providing transit stakeholders, users, providers, suppliers, and agencies with the information and human resources needed to deliver cost-effective services in rural areas and small urban centers.
3. Enhance the competitiveness of North Dakota producers and businesses through freight transportation, supply chain, and logistics research.
4. Improve transportation infrastructure management through statewide models of economic production, truck traffic generation, and road and bridge deterioration and through the development of asset management systems for county roads and bridges.
5. Support Vision Zero through an improved understanding of safety risks and mitigation strategies for rural areas and tribal communities and through motor carrier safety research.
6. Enable the transfer of technology and information to local and tribal units of government through technical assistance, training and workforce development.
7. Facilitate the deployment of Intelligent Transportation Systems that use sensors, automated controls, and integrated communication systems to inform travelers and improve highway safety and efficiency.
8. Inform infrastructure investment decisions by providing the state with estimates of investment needs in county/local roads and bridges on a biennial basis.
9. Provide decision makers with critical knowledge about emergent technologies and their impacts on transportation operations, programs, and services.

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: North Dakota’s economy is dependent on freight transportation and logistics services. Comprehensive and current information is needed to monitor rapidly changing industry activity levels and logistics patterns and identify trends, issues, and needs in the State. If this request is funded, UGPTI will conduct surveys and publish reports each biennium that will benefit State agencies, business associations, and transportation carriers, including surveys of agricultural processors, grain elevators, manufacturers, and motor carriers. Each biennium, UGPTI will provide reports to State agencies, the Legislature, and the public about the transportation patterns and needs of agricultural processors, shipments from farms to elevators, trucks owned or leased by farmers, farm truck utilization rates and variable operating costs, inbound and outbound shipments to and from manufacturing plants by mode and shipment type (as well as assessments of the quality of transportation services provided), and information on commercial trucking in North Dakota, including the sizes of firms, the commodities hauled, the types of equipment used, equipment ages and utilization rates, fuel consumption rates, and operating costs. In addition to this detailed information, the reports will include assessments of the transportation challenges and needs facing each sector. This request for \$408,134 in base funding includes two FTEs, which will be accommodated by redefining and filling two currently open positions. Consequently, this program will not require an increase in UGPTI’s total FTE count.

627 Upper Great Plains Transportation Institute

Agency 627

Necessary resources for implementation (including FTE's)*: The budget for this request includes the cost of travel to gather and present information, along with the equipment and supplies needed to conduct the surveys and analyze them. Also the cost of 2 FTE's which are currently vacant position allocated to be used with federal funds. If this request is approved those positions will be repurposed to general funds.

Are resources being redirected or are they new or additional (including FTE's)*: Overall UGPTI will not increase the FTE count since the two FTE positions can be accommodated by filling and redefining two current open positions.

Positions 00020967 and 00021727 are currently budgeted to use federal funds but will be used for this package if approved.

Who is served and impact of not funding*: Who is Served?

North Dakota's economy is dependent on freight transportation and logistics services. UGPTI's biennial reports on freight transportation and logistics will benefit State agencies (especially the Departments of Agriculture, Commerce, and Transportation; the Wheat Commission; and the Soybean Council), agricultural processors, grain dealers, manufacturers, and motor carriers. The information provided in these reports will allow agencies to monitor trends in freight traffic; identify bottlenecks, obstacles, and supply-chain capacity issues; and develop short- and long-run plans, including contingency plans for procurement and distribution. The strategic information provided in these reports might be pivotal to economic growth and market diversification.

Impacts of Request Not Being Funding

Legislators and State agencies are lacking specific and comprehensive information about dynamic and rapidly changing supply chains and freight transportation issues. The current turbulence and recurring problems are likely to continue in future years, impacting imports, exports, goods movements, and logistics costs. With UGPTI's biennial reports, legislators and State agencies would be apprised of freight transportation and logistics conditions affecting the State and better equipped to take informed and timely actions to benefit North Dakota's economy. The database and reports will become even more valuable over time, as histories of freight transportation and logistics data are available for analysis, enabling improved forecasting and transportation performance assessment. Without comprehensive, quality data, decision makers must depend on disparate and unconnected sources that are less specific and insightful. The value of the significantly improved information that would be made possible by this program cannot be precisely quantified. However, it is of high value to economic development and planning in North Dakota.

Transportation Data Intelligence Center (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Workforce

Is this a Large IT project? No

627 Upper Great Plains Transportation Institute

Agency 627

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: One-time funding is requested to repurpose and equip a room in the Quentin Burdick Building at North Dakota State University to receive, process, archive and analyze data from a wide variety of field sensors, vehicles and other sources. The Transportation Data Intelligence Center is needed to support the deployment of advanced transportation technologies in the State and enable research in artificial intelligence and automation that will benefit the state for years to come. The programs made possible by this one-time investment will support initiatives such as the State Transportation Management Center and enhance UGPTI’s capability to compete for federal grants in the field of advanced transportation technologies.

UGPTI’s one-time funding request for the Transportation Data Intelligence Center (TDIC) will enable the training and mentoring of students and staff in data mining, machine learning, and artificial intelligence solutions for traffic and transportation planning. With the capabilities and data offered by the TDIC, the learning and mentoring experiences gained by students will be comparable to on-the-job training. In the TDIC, students will work with real world traffic and environmental data in near real time. These experiences will prepare them to manage the complex transportation systems of the future, therefore filling an emerging and critical workforce need in North Dakota and the surrounding area.

Necessary resources for implementation (including FTE’s)*: The request is for the cost of repurposing an existing room and the equipment needed for set up. No new FTE's are required for this request.

Are resources being redirected or are they new or additional (including FTE’s)*: The room is an existing room in the Quentin Burdick Building at North Dakota State University.

Who is served and impact of not funding*: The Transportation Data Intelligence Center will service the entire State, including state agencies such as the NDDOT. Metropolitan Planning Organizations will also benefit from the data analytics and services offered by the new center. The traveling public will benefit from the near real-time information and intelligent transportation solutions that can be developed at the center- which, in turn, will improve the reliability of the highway and transportation services offered by the NDDOT and private providers. Specifically, the Transportation Data Intelligence Center will enable or improve Traveler Information Systems, Road Weather Management, Emergency Management, Arterial and Freeway Management, Crash Prevention and Safety, and Commercial Vehicle Operations. The center will support Vision Zero. In addition, the Transportation Data Intelligence Center will provide workforce opportunities to students interested in transportation careers, allowing them to explore state-of-the-art technologies and become proficient in data science. With the Transportation Data Intelligence Center, students will learn how to apply machine learning and artificial intelligence methods to transportation problem solving.

If the request is not funded, benefits to transportation agencies and travelers will not be realized. Congestion will grow. Road safety will not improve to the extent possible. Winter traveling options and information will not be as good. Overall freight and passenger mobility will be hampered. Students will miss out on work study and training opportunities. The future transportation workforce of the State will be less enlightened about new and emergent technologies.

Statutory Authority

North Dakota Century Code Chapter 15-12.1

Agency Description

Dickinson Research Extension Center (DREC)- The NDSU Dickinson Research Extension Center has an established record of service to the people in the 13-county region south and west of the Missouri River. The DREC operates 6,506 acres of owned land within the region as well as annual land leases needed to accommodate ongoing projects. The land base provides opportunities for a broad perspective in evaluating various agricultural systems that can serve as engines for economic development. This is a continuation of what has taken place for over 100 years. Six major areas are served: agronomy, beef management, bio-security, range management, soil health, and sustainable agricultural practices. Faculty and staff are committed to engaging people of the region and to the identification of current economic opportunities, while sustaining natural resources for future generations as directed by the mission statement and Advisory Board. Research data and producer ideas are continually considered so the DREC can leverage the latest knowledge to best benefit the people of North Dakota.

Central Grasslands Research Extension Center (CGREC)- The CGREC conducts research for the Coteau region of North Dakota, an area bounded by the Missouri River on the west and the James River on the east, and extends from Divide and Burke counties in northwestern North Dakota in a southeasterly direction through Dickey County.

Research objectives should 1) increase or maintain carrying capacity of native range while emphasizing conservation and preservation, 2) create resiliency in grass production to compensate for the vagaries of the weather and precipitation as it influences forage production in the dryland agriculture, 3) identify the impact of different management strategies on beef production in the central region, and 4) explore the increased use of cover crops, annual forages and byproducts for the maintenance of the cow herd. CGREC's primary focus is management of grasslands, which occupies about one-third of the agricultural land in the state and aims to improve economic value to the natural resources while enhancing soil health and habitat for pollinators, birds, and mammals.

Hettinger Research Extension Center (HREC) -The HREC is a semi-arid site located in southwest North Dakota, providing the most southerly NDSU location in the non-glaciated portion of North Dakota as a site for its agronomy research program. The HREC also is located at the center of the North Dakota sheep industry, the focus of one of its animal research programs, and in an area of rapidly growing livestock feeding ventures, another focus of animal research at the HREC. Research at HREC involves the disciplines of animal science, range science, wildlife science, agronomy, and agri-business and applied economics. Collaboration is with Main Station scientists, Branch Station scientists, U.S. Forest Service, grazing associations, university scientists from WY, SD, and MT, and USDA research entities in these research disciplines to improve productivity of livestock, grazing, and cropping systems, and to improve economic development of the region.

The Langdon Research Extension Center (LREC) is located one mile east of Langdon on US highway five. The agricultural land base at the station consists of 549 owned acres and an additional 206 acres under lease agreement. The LREC serves a nine-county region located in northeast North Dakota and has North Dakota's highest precipitation rates, coolest temperatures, and richest productive soils. The climate supports diverse crop production and recurring disease problems.

The LREC has a strong tradition of assisting the region's producers to meet agricultural production challenges throughout the course of its existence since 1909. In 1993, the LREC redirected much of its research programming to focus on the significant increase of disease and insect pressure associated with its climate. This redirected applied research programming has provided producers with information regarding disease minimizing cultural farming practices and trusted information regarding chemical applications and other inputs that minimize disease and insect pressures that give growers the best return on investment for all crops grown in ND. The recent addition of extension specialists in cropping systems and soil health allows the LREC to be a full service research and extension center for local growers, families and communities..

628 Branch Research Centers

Agency 628

North Central Research Extension Center (NCREC)- The NCREC was established in 1945 and is located one mile south of Minot on Highway 83. The NCREC conducts research to increase agricultural productivity, with a focus in the north central region of ND. The NCREC serves agriculture producers in the region and state through crop research, Foundation seed production, and Extension education programs. Research and Extension programs at the NCREC focus on crop variety and new germplasm evaluation, weed control, cropping systems, crop pest management, reduced tillage, and soil fertility. Research is conducted on cereal grains, oilseeds, legumes, forages, grapes, and emerging specialty crops.

The Williston Research Extension Center, established in 1907 and relocated to the present site in 1954, is an 800-acre rain-fed farm located in northwest North Dakota near the city of Williston. In 2001, an additional 160 acres were purchased in the Nesson Valley and an irrigated research and development project was established. WREC research studies are conducted on crop variety evaluation, herbicide performance and other cultural management research, cropping systems and soil and water conservation practices. The main dryland crops are spring wheat and durum, barley, oats, safflower, pea, lentil, chickpea, canola, flax, alfalfa, and other alternative crops are also grown as cash crops or for livestock feed.

WREC research is intended to increase the producer's net profit, support crop diversification, and encourage more intensive cropping and irrigation development. Research on soil and crop management systems for sprinkler irrigation, on alternative irrigated high value and value-added crops are conducted. WREC also conducts variety development research on, winter wheat, spring wheat, durum, oats, peas, lentils, flax, canola, and other crops in cooperation with NDSU main station scientists cooperating state/federal agencies and private companies. WREC produces and supplies foundation seed to area farmers of new and adapted crop varieties adapted to our Mon-Dak region.

Carrington Research Extension Center (CREC) The Carrington Research Extension Center was established in 1960. CREC operates on a land base of around 2,100 acres and has infrastructure to irrigate about 260 acres with center-pivot systems and 120 acres by surface methods. The balance of the acreage is managed as traditional dryland and is utilized primarily for dryland field crop research activities and foundation seed production.

The CREC conducts research and educational programs to enhance the productivity, competitiveness, and diversity of agriculture in central North Dakota. Research activities at the CREC include scientists and support staff trained and implementing programs in these disciplines: Agronomy, Plant Pathology, Soil Science, Precision Agriculture and Animal Science.

Agency Mission Statement

Dickinson Research Extension Center (DREC): The Dickinson Research Center must be located at or near Dickinson in Stark County. The Center shall conduct research on increasing the carrying capacity of native rangeland, with emphasis on conservation and preservation for future generations. The Center shall conduct research on grass production to determine how to best compensate for the vagaries of the weather as it influences forage production in the dry land agriculture of western North Dakota. The Center shall conduct research at the ranch location in Dunn County with beef cattle breeding, feeding, management and disease control for the benefit of livestock producers of western North Dakota and the entire state. The Center shall conduct research designed to increase productivity of all agricultural products of the soil by maintaining or improving the soil resource base in the dry land agricultural region of southwestern North Dakota by the identification of adapted crop species and superior crop cultivars; propagation and distribution of selected seed stock; and development of profitable cropping systems that achieve the necessary balance between profitability and conservation of all natural resources. The Center shall disseminate research results and information for the benefit of this state.

Central Grasslands Research Extension Center (CGREC): The legislated mission of the CGREC is as follows: "The CGREC shall conduct research designed to fulfill needs within an area bounded by the Missouri River on the west and the James River on the east with research objectives as follows:

Increase the range-carrying capacity of native range with emphasis on conservation.

628 Branch Research Centers

Agency 628

Stabilization of grass production to determine how to best compensate for the variability of the weather as it influences forage production.

Identification of different management systems on beef production in the central region of the state.

Exploration of increased use of crop residues and by-products for the maintenance of the cow herd.

Disseminate research results and information for the benefit of the state of North Dakota.

Hettinger Research Extension Center (HREC): The Hettinger Research Extension Center, an outreach of North Dakota State University, provides applied research and education in agriculture and environmental sciences that will enrich the lives of North Dakotans and support economic development.

Langdon Research Extension Center (LREC): The Langdon Research Extension Center will conduct applied agricultural research that enhances the quality of life for the regions citizens with a responsive, flexible and accessible overall agricultural based research program. This programming will combine the concepts of agricultural research, information technology and community/economic development while conserving the regions natural resources.

North Central Research Extension Center (NCREC): The North Central Research Extension Center conducts research to increase agricultural productivity in north central North Dakota. The center serves agricultural producers in a 12- county region surrounding Minot through crop research, foundation seed production and dissemination, and extension education programs in crop and livestock production. Studies at the center focus on crop variety and new germplasm evaluation, weed control, cropping systems, crop pest management, reduced tillage, and soil fertility. Research is conducted on cereal grains, oilseeds, legumes, forages, and new specialty crops.

Williston Research Extension Center (WREC): The Williston Research Extension Center conducts research to increase agricultural productivity in the semi-arid region for northwestern North Dakota while achieving a necessary balance between profitability and conservation of natural resources. Research on soil and crop management systems for sprinkler irrigation and alternative irrigated high-value/value-added crop production at the Nesson Valley site are conducted in cooperation with the Montana State University Eastern Agricultural Research Center at the USDA-ARS Northern Plains Agricultural Research Laboratory in Sidney, Montana and other cooperating NDSU and University of Minnesota scientists.

Carrington Research Extension Center (CREC): The Carrington Research Extension Center conducts research that will lead to the enhancement of agriculture and improve the quality of life across the central region of North Dakota. Specifically, the Carrington Center conducts research on both dryland and irrigated crop production methods and systems, improved crop cultivars, feeding of beef cattle, cow/calf nutrition, sustainable agricultural production, and produces foundation seedstocks. The objective is to discover the balance between farm enterprise profitability and conservation of the natural resource base. The results of these studies are disseminated to the entire state through an on-going extension educational program.

Major Accomplishments

-
- 1 Continued to build strong research partnerships with agricultural input companies, commodity groups, regional crop improvement associations, growers, and others.

 - 1 Developed a new online spatial layout for live crop scout reporting to indicate pest severity hotspots in North Dakota.

 - 1 Established and continue a long-term no-till dryland research project in 2013 with the objectives of developing agricultural systems to improve soil health, precipitation use, and economic stability of no-till farming systems.

 - 1 Initiated a large landscape level research project that compares innovative grazing strategies on livestock performance; livestock production; habitat for pollinators, birds, and mammals; soil health; and microbiology of the soil.

Major Accomplishments

- 1 Produced, conditioned, and distributed foundation seed of seven crops grown in the region consisting of 24 unique varieties.
- 1 Soil acidity a growing soil health issue in western North Dakota that impacts all plants. Extensive research and outreach have been conducted to improve soil acidity management.
- 1 Variety testing of crops to find the best performing cultivars for SW North Dakota. Conducted weed science research evaluating new herbicides for weed control and crop safety for crops grown in SW North Dakota.
- 2 Assisted in development of new varieties of economically important crops and evaluated production strategies for alternative crops.
- 2 Evaluated the effects of patch-burning in post Conservation Reserve Program lands on livestock, vegetation, pollinators, and wildlife in western ND.
- 2 Expanded winter grazing research to include grazing of corn residues, cover crops, and bale grazing projects.
- 2 Hosted over 2500 guests to CREC through workshops, plot tours, and site visits.
- 2 Introduced a drone based (UAS) precision agriculture research project.
- 2 Produced and distributed the highest quality foundation grade seed of the major crops grown in our region.
- 2 Researched soil health research and education to demonstrate how soil health is improved by the microbial action of microorganisms.
- 3 Beef feedlot trials were conducted to evaluate more avenues to utilize soybean crush bi-products (hulls).
- 3 Conducted honeybee research evaluating shelter belt use in western North Dakota.
- 3 Developed and utilize a 160-acre irrigated site in Nesson Valley 27 miles northeast of Williston to identify improved irrigated cropping and tillage systems, water use efficiency, and soil health of irrigated lands.
- 3 Provided dependable support for main station crop breeding programs and other cropping system research programs including crop scouts throughout the growing season in northeast ND.
- 3 Researched crop production products in order to improve efficiencies and maximize economic return for minor and major acreage crops grown in ND.
- 3 Shifted research and educational efforts to explore new forage and cattle resources and inputs.
- 3 Studied impacts of supplementing enhanced mineral and energy feeds to grazing developing heifers on pasture using radio frequency identification technology and GPS technology.
- 4 Continued to expand on collaborative research efforts evaluating the impacts of management on reproductive performance of beef cows and bulls.
- 4 Continued to foster and strengthen two new Extension Specialists outreach programs in cropping systems and soil health.
- 4 Developed a multidisciplinary research project evaluating an integrated crop-livestock system using annual forages, winter wheat, and sheep.
- 4 Established and completed a pipeline reclamation research project.
- 4 Evaluated grass cultivars, soil mineral nitrogen, prairie ecosystems, grassland restoration and integrated grazing systems.
- 4 Optimized sulfur fertility recommendations for canola to improve fertilizer use efficiency
- 4 Provided transformational, Extension education in the areas of livestock, soil health, crop protection, and cropping systems.
- 5 Applied research at Langdon in agronomy, pathology and soil health is providing growers with answers they need to become more profitable.
- 5 Conducted a nationally recognized sheep research program evaluating alternative technologies for increasing reproductive efficiency in both males and females and feedlot nutrition.

Major Accomplishments

-
- 5 Conducted residue trials that lead to registration of new agricultural pesticides.

 - 5 Established and continue a high tunnel research project with vegetable crops and cut flowers.

 - 5 Expanded and initiated annual forage trials to assess varieties and explore economic return by forage species and systems.

 - 5 Provided crop performance information to farmers and industry for 26 different crops annually.

 - 5 Reduced soil disturbance, increased plant diversity, added animal diversity, maintained living roots to feed soil organisms and covered soil with plants and plant residues.

 - 6 Established and continue a saline seep reclamation research and demonstration project in collaboration with the Montana Salinity Control Association.

 - 6 Generated novel mechanisms for improved fungicidal disease suppression in multiple broadleaf crops, while simultaneously maintaining or reducing input costs.

 - 6 Initiated a project evaluating the potential of a genetic marker for structurally deformities in Rambouillet rams.

 - 6 Secured funding to enhance the livestock facilities, both within the pasture trials and the livestock handling facilities and laboratory. These new facilities will allow the center to conduct innovative, cutting edge research in the future to allow for growth of the animal science research program with animals that come off the range and forage research projects.

 - 7 Secured funding to replace the director's residence.

 - 7 The WREC seed conditioning plant built in 1954 was antiquated and posed considerable safety issues. A new horizontal seed conditioning plant with optical color sorter and higher bushel per hour capacity was constructed in 2021 that will efficiently allow WREC to condition Foundation seed of a wide array of new crop varieties to provide pure seed to growers.

 - 7 Trained extension agents certified in Nitrate QuikTest Certification Program for annual forages, assisting in the statewide drought response for NDSU Extension. Trained M.S. and Ph.D. students in the fields of Natural Resource Management and Animal Science.

 - 8 Developed an exchange program with the University of Puerto Rico to give their students experience in sheep production, management, and research.

 - 8 Dr. Charlemagne (Charlie) Lim joined the WREC staff as the new NDSU Extension Weed Specialist.

 - 9 Beginning construction on two state-of-the-art livestock facilities that will incorporate "smart feeding technologies" and digital data collection for both sheep and cattle.

Critical Issues

-
- 1 Continue soil-plant-livestock-air research emphasizing soil health, agronomy, range management and livestock production. The current research focus and long research history provide a firm foundation to continue cutting edge research to match goals and objectives for work related to the agricultural biome.

 - 1 Deferred maintenance and other repairs that affect both safety and use of facilities continue to be a critical issue.

 - 1 Increased base funding to support research and Extension efforts. Additional technical support, operating funds and equipment replacement

 - 1 Increasing operating costs and higher labor costs for research activities continue to impact WREC abilities to carry out our research programs vital to the improvement of the economic and environmental performance of our agricultural lands. Deferred maintenance funding continues to be an important need for WREC to maintain its facilities.

 - 1 Land currently being utilized by both the livestock and range & wildlife research programs is going to be sold within the next 2 years. The potential purchase of this land would solidify the land base for these research programs. The Hettinger REC currently owns only 28% of the land it operates on.

Critical Issues

-
- 1 The CREC Oakes Irrigation Research Site has served south central North Dakota since 1970. This site has provided needed high productivity data on corn and soybean production and varieties on dryland and irrigated sites, as well as information on dry beans and specialty crop performance. This site will need operational support to continue to serve the region at this uniquely positioned location.
-
- 1 The primary issue currently for the NDSU Langdon Research Extension Center is to maintain a level budget and hopefully provide an increase based on inflation through the 2023-25 biennium based on the 2021-23 budget. This is essential to support the research and extension programming at its current level. The LREC is experiencing first hand inflation (and other) constraints as the recently funded greenhouse addition came in way over budget. Re-bidding will occur early in 2023 so an extension of the funding would be needed. Looking ahead, an upgrade on the LREC's 1960 seed cleaning plant will be needed for continuation of the foundation seedstocks program that provides local growers with new NDSU crop varieties.
-
- 2 A facility is badly needed at the Nesson Valley Irrigated Research and Development site for office/lab space/conference room, and a heated shop at the irrigation site located 27 miles from Williston. The irrigation research staff currently work out of a small office in a chemical storage and handling facility used to store chemicals and handle pesticides and other hazardous chemicals. The new facility will support research and educational efforts for irrigated growers and to support expansion of irrigation, food processing and livestock industries in western North Dakota.
-
- 2 All research and extension programming are supported by all facilities at the Langdon REC, most built prior to 1960. Many are becoming outdated and unsafe. Acquiring additional funds for extraordinary repairs, including upgrades to minimize the spread of covid19, will help to shore up these facilities to support the level of research and extension programming currently supported at Langdon.
-
- 2 Drain tile NCREC main yard
-
- 2 Replace old equipment with new equipment that uses present day technology. Some of our equipment and machinery is 25 years old or older.
-
- 2 Soil acidity research is needed to find more and better solutions to this important soil health issue. Current research is geared to determine soil liming needs. Future soil acidity research will evaluate cropping systems, agronomy practices, and their impacts on soil acidification.
-
- 2 The beef research unit requires a series of enhancements to the facilities that support research on optimizing nutrition and management of beef cattle. An expansion of feedlot pens will expedite making research results available to producers and expand projects investigated. Associated facility needs include bulk feed commodity storage, pens within a hoop or mono-slope structure and a smart-feed technology system. This project is being implemented currently.
-
- 2 The demand for apiary research has exceeded the time and resources that the range & wildlife management research program can devote to this industry. Southwest North Dakota has become a 4 state regional hub for the apiary industry, and a research program that is dedicated to their needs has been supported by the ND Beekeepers Association.
-
- 3 An equipment storage building is needed for WREC farm and plot research equipment to allow all WREC high-cost farm and research equipment to be stored indoors from the elements.
-
- 3 Encroachment from city of Minot
-
- 3 It is important that grant fund opportunities continue to be widely available in future years. Funds that support crop and livestock production or agricultural related issues in general are needed to leverage public funding. The CREC research programs must continue to have a diversity of opportunities to compete for grant funds that, when successful, allow us to most effectively empower current research programs.
-
- 3 Provide an increased salary packet to bring employee salaries back to average levels for similar employment found in private industry. Over the past five years, the station staff have averaged a 1.2% annual pay increase. Average US inflation rate over the same 5-year period is 2.46%, with the rate being 4.7% in 2021. It will be difficult to retain current staff without a major pay increase in the next biennial, with recruiting being even more difficult at the current salaries.
-
- 3 Technical support for the livestock research program is needed to provide all research programs with a full time technician. This position is needed to meet the research needs of producers in SW North Dakota.
-

Critical Issues

-
- 3 There is a need to develop agro-ecosystems that optimize the balance between forage-based and grain-based crop/livestock systems reflective of the many individual ecosystems. These integrated systems must be synergistic to, or enhance the native and agronomic plant communities, thus providing the base for future beef production. In addition, enhanced value for commodities produced from forage-based systems is key.
-
- 3 With appropriated funds becoming less and less Langdon has become more dependent on research grant opportunities. Supporting an atmosphere that readily accepts private funding to leverage public funding will be essential to continue employing problem solving applied research for growers.
-
- 4 A \$500,000 capital campaign was authorized, and fundraising raised \$500,000 for a WREC greenhouse but higher than budgeted costs for greenhouse will require additional funds.
-
- 4 Operating support for additional prescribed equipment such as UTVs, pumper, drop torches, and PPE.
-
- 4 Petroleum fuel alternatives that have been cultivated from North Dakota crops are becoming more important and extensive. Bi-products from fuel refinement are available that may serve as livestock feedstuffs. Research is needed to evaluate these value-added agricultural by-products as livestock feed.
-
- 4 Sale and purchase of additional land for Foundation seed production
-
- 4 The programs of the CREC are supported by a diversity of facilities that include not only the primary buildings like headquarters and laboratory but also feedlot pens, feed and seed storage, animal shelters, water supply features, storage buildings, parking lots, roadways and waste containment. Current support for maintenance of these facilities is inadequate to address the current deferred maintenance costs.
-
- 5 Deferred maintenance and safety issues are over \$1,000,000. Specifically, due to a past wet cycles and heavier than normal traffic, the road to the office is unstable and needs to be replaced. Additional needs include mechanical system renovation of the 1992 office, and parking lot re-paving.
-
- 5 Deferred Maintenance Increase – The April 2022 blizzards demolished many miles of fence. The fence has been patched, but several fence miles need replacement. The DREC Ranch Headquarters near Manning underwent a feedlot expansion project in 2008. However, this was not completed. During the April 2022 Blizzards, dedicated staff camped at the ranch shop and removed snow daily for nearly three miles to care for cattle. Despite the harsh conditions, no cattle died as a result of the ranch team’s efforts. Finishing this feedlot project will improve animal welfare as all cattle can be contained near the ranch headquarters, protected from the elements, and better accessed during inclement weather. Finishing the feedlot will open new livestock feeding opportunities. The Old original DREC office has been used as storage for years. This building could be repurposed as a single-family dwelling to house post-docs to conduct short-termed research projects.
-
- 5 Equipment storage capacity at the CREC is critically limited resulting in a number of high-value pieces of equipment being stored outside year-round and exposed to the elements. This exposure has resulted in repair costs and rodent infestations that would not have been experienced if the equipment was stored indoors and faster depreciation especially on the higher-value equipment.
-
- 6 A secure (owned or long-term leases) land base is critical to sustain the current and future research mission of the Carrington Center. The diverse programs of the CREC operate on a relatively small land base. The Carrington REC operates on a land base of around 2,140 acres with the state owning around 840 acres. The 1,300 acres not secured by state ownership must be sourced by annual rental agreements with multiple landlords. This heavy reliance upon a willing group of land owners to annually rent a significant portion of the acreage required to support the CREC puts these programs at risk. If any one parcel of rented land were not made available in a given year, the CREC would be forced to reduce or eliminate program contributions that are depended upon by North Dakota producers and are basic to our department mission.
-
- 6 Capital Projects - A new machinery shed is needed to store and repair farm and research equipment and contain agricultural pesticides. A machinery shed with a heated bay will increase equipment longevity and help with equipment maintenance during the winter.
-
- 7 Programmatic Needs - Maintain adequate operating funds. Fund an agronomy research specialist to allow us improve our efforts in cropping systems and soil science. Fund a research specialist with a master’s level education to facilitate research and data collection. The Center needs annual support for a multitude of research projects, which require a broad understanding of various research techniques and data analysis related to the agricultural biome.
-

Performance Measures

Per North Dakota Century Code 15-12.1-17 the State Board of Agricultural Research and Extension (SBARE) presents a status report to the budget section of the legislative council. SBARE's most recent presentation to the budget section was on June 28, 2022. The report they gave and provided in written form included the status of the North Dakota Agricultural Experiment Station and the NDSU Extension Service. A copy of the information is on file in the legislative council office.

Program Statistical Data

See Agency Description

Explanation of Program Costs

The base budget request for this agency is \$39,369,588. Of this total, 47.3% is general fund and the remaining 52.7% is made up of gifts, grants, contracts and the sale of agricultural products. Salaries and wages represent 56.7% of the total budget. Operating expenses represent 32.3% and equipment > \$5,000 represents 11%. Major operating expenses include travel, repairs, professional services, buildings and grounds, and miscellaneous research supplies.

Program Goals and Objectives

See Agency Description/Future Critical Issues.

Statutory Authority

North Dakota Century Code Chapter 11-38.

Agency Description

North Dakota State University (NDSU) Extension is part of a nationwide, university-based educational system that provides research-based educational programs to advance the lives and livelihoods of citizens in all 53 counties and four American Indian reservations in North Dakota. Programs focus on addressing current needs and issues affecting the state’s agriculture, youth, families, communities and natural resources. In an effort to provide extensive reach and share knowledge and resources across North Dakota, NDSU Extension staff are located at state, area and local/county offices. NDSU Extension combines funding from federal, state, county and grant sources to specifically address local concerns and make a positive impact on our land and our people.

Agency Mission Statement

Empower North Dakotans to improve their lives and communities through science-based education

NDSU Extension believes:

In lifelong learning through transformational education

That all people belong and deserve respect

In stakeholder input to guide program development

In science-based, locally relevant information

In the value of partners and collaboration

Major Accomplishments

-
- 1 Provided more than 6,620 educational sessions in 2021 reaching 764,078 individuals. A total of 64% of programing was delivered face-to-face, while 36% was online or hybrid.

 - 2 Issued 5,089 private certification and 2,117 commercial certifications in 2021 for farmers and ranchers on best management practices and legal requirements when using pesticides.

 - 3 Screened 1,541 water samples for total dissolved solids during the drought of 2021, saving approximately 40,000 head of livestock and leading to management changes at 134 locations. Changes included additional monitoring of water sources, water hauling, and development of alternative water sources.

 - 4 Provided timely information to farmers and ranchers as they developed drought management plans in the fall of 2020 through 2021 with webinars viewed by more than 2,300 individuals.

 - 5 Completed weekly observation reports to update the national Drought Monitor. Data from the Drought Monitor is used to assist in the Emergency Relief and Livestock Indemnity Programs for farmers and ranchers.

Major Accomplishments

-
- 6 Assisted more than 21,000 North Dakota 4-H youth to develop life skills of teamwork, decision making, critical thinking and public speaking by engaging in a variety of learning experiences.

 - 7 Engaged 6,200 youth in a deeper, sustained 4-H youth development experience through enrollment in different types of club experiences with the direct support of 2,122 registered adult volunteers. Over 1,100 youth participated in day and residential camping experiences with many participating at the ND 4-H Camp near Washburn during the last reporting year.

 - 8 Mentored over 387 youth who competed in state 4-H judging contests including livestock, meat, horse, dairy and consumer decision making, which require oral reasons to defend their placings. Judging experiences teach youth team work, effective communication skills, analytical thinking, confidence, and exposes youth to exciting career fields. Twenty of these youth went on to represent North Dakota at the national level.

 - 9 Engaged more than 5,000 people in leadership and civic engagement programs in 2021 to help them gain confidence to serve on boards, councils and committees.

 - 10 Reached more than 22,000 people in 2021 through Extension nutrition education programs, helping participants learn to eat healthfully and decrease health-care costs.

 - 11 Provided parent education to approximately 2,400 North Dakota parents in 2021 to strengthen families, resulting in reduced costs spent on child welfare and incarceration.

 - 12 Provided farm stress educational programming, which reached over 1,000 ND citizens and professionals. Also leveraged federal grant dollars to provide support of counseling services for stressed farm and ranch populations through a referral partnership with Together Counseling, which resulted in 192 counseling sessions for farm and ranch families in 2021.

 - 13 Increased leadership capacity of 316 conservation leaders in North Dakota from 2018-2021 through the Soil and Water Conservation Leadership Academy. These academies have reached participants from 52 of ND's 54 soil conservation districts across the state.

 - 14 Expanded social media presence for Extension work. In the second quarter of 2022, NDSU Extension-related Facebook posts reached over 1.458 million pages, and engagements (those clicking on the page for more information) totaled 88,793.

Critical Issues

-
- 1 Cropping Systems North Dakota is a dominant force in agriculture, generating more than \$7.6 billion annually and leading the United States in the production of multiple commodities. However, there is room to grow. To help maximize the financial impact that NDSU Extension has on the state, additional expertise and educational programs are needed in response to the rapid expansion of soybean and corn acreage, new and emerging plant diseases and fungicide-resistant pathogens that limit crop yields, controlling the spread of noxious and invasive weeds, and advancing cropping systems that sequester soil carbon, increase plant growth, retain water and build soil health. Five FTEs and operating support are needed. Western crop production specialist, soybean pathologist, weed specialist, carbon credit specialist, on-farm research coordinator.

 - 2 Livestock Development Livestock production in North Dakota accounts for approximately \$1.5 billion in gross revenue annually, and there is ample opportunity for growth. North Dakota lags its neighboring states in livestock production, and livestock integration has been identified as a top priority to utilize and add value to North Dakota agricultural products. Three FTEs and operating support are needed. Veterinary epidemiologist, swine specialist, off-campus livestock development specialist.

Critical Issues

-
- 3 Farm and Ranch Health and Safety The health and safety of those involved in agriculture is of utmost importance. When stress, adversity or trauma occur, having the ability to adapt to difficult situations allows individuals and communities to continue to function. Prevention efforts help build coping skills that can reduce the need for expensive, crisis-level services. Farmers and ranchers regularly experience uncertainties throughout the year, such as extreme weather, fluctuating commodity prices or trade disruptions. Extension personnel across the state offer prevention resources, and Extension is uniquely positioned to coordinate additional efforts and critical resources related to farm and ranch stress. There is a need for operating support for farm and ranch health and safety resources.
-
- 4 Program Support for 4-H North Dakota is facing a workforce crisis, with a particularly high demand for individuals with strong science, technology, engineering, math and entrepreneurial skills. These technical skills, combined with teamwork, decision-making, critical thinking and communication can help build a strong and effective workforce for the state. North Dakota's natural resource-based economy and increasingly diverse population require future leaders who have critical life skills. Expanding and developing quality youth development programs and experiences, such as 4-H, is essential. Support for 4-H youth development programs will advance North Dakota's future workforce, growing leaders through positive youth development experiences, club involvement, year-round camping opportunities, school enrichment, and after-school programs to promote youth who thrive with workforce readiness skills. There is a need for a 4-H entrepreneurship specialist and operating funds to include support for camping, clubs and after-school programs.
-
- 5 Extension and State Soil Conservation Committee Operating Support Operating support allows Extension specialists to develop innovative programming in a timely fashion, reach audiences as the need arises, or develop new methods to connect with local communities, and leverage resources needed to address larger issues facing our citizens. Operating support for the State Soil Conservation Committee provides an increase in direct assistance funding to be distributed to local Soil Conservation Districts for technical assistance and conservation planning support. There is a need for operating support for Extension for the SSCC.
-
- 6 Increased Food Security Agriculture continues to be a cornerstone of North Dakota's economy in both rural and urban communities. With the increased emphasis on agricultural processing capacity within North Dakota, there is a need for continued education on the food supply chain. Support for food processing efforts and activities, particularly for value-added food products, can enhance nutrient dense foods. The pandemic facilitated an increased interest in locally-produced and sustainable food, gardening and horticulture. This initiative would provide funding for enhanced support of Extension agents with expertise in horticulture to support this growing interest across the state. There is a need for an Urban ag/value-added food technologies specialist and operating support to include two county-based horticulture agents in partnership with counties.
-

Performance Measures

Per North Dakota Century Code 15-12.1-17 the State Board of Agricultural Research and Extension (SBARE) presents a status report to the budget section of the legislative council. SBARE's most recent presentation to the budget section was on June 28, 2022. The report they gave and provided in written form included the status of the North Dakota Agricultural Experiment Station and the NDSU Extension Service. A copy of the information is on file in the legislative council office.

Program Statistical Data

See Agency Description.

Explanation of Program Costs

The total base budget request for this reporting level is \$58,078,526. Of this total 51% is general fund, 15% is federal funds and the remaining 34% is special funds. Salaries and wages represent 87% of the total base budget, and operating expenses represent 13%. Major operating expenses include travel, utilities, operating fees and service, professional services, office supplies, printing, and professional supplies. Soil Conservation grants total 2.1% of the budget request.

Program Goals and Objectives

The NDSU Extension Service, through its research-based educational programs, strives to:

1. Enhance the profitability of North Dakota's crop and livestock producers by focusing on production, marketing and risk management issues.
2. Conserve and enhance the natural resources of our state.
3. Develop life skills within North Dakota's youth through 4-H youth development programs that focus on decision-making, communication skills, career development and healthy lifestyles.
4. Strengthen individual and family skills relating to parenting, financial management, workforce preparation and communication.
5. Maintain a healthy food system at the production, distribution and consumer levels while promoting healthy lifestyles for all age groups.
6. Provide leadership for communities and community leaders to identify strengths, enhance local expertise and increase the rural economic base while creating an environment that fosters entrepreneurship.
7. Guide communities through processes that relate to public issues.
8. Serve as educational leaders in the adoption and utilization of technology for economic, community and individual benefit.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: North Dakota is a dominant force in agriculture, generating more than \$7.6 billion annually

and leading the United States in the production of multiple commodities. However, there is room to grow. To help maximize the financial impact that NDSU Extension has on the state,

additional expertise and educational programs are needed in response to the rapid expansion of soybean and corn acreage, new and emerging plant diseases and fungicide-resistant pathogens that limit crop yields, controlling the spread of noxious and invasive weeds, and advancing cropping systems that sequester soil carbon, increase plant growth, retain water and build soil health.

The cropping rotation mix across the state is changing as new and emerging crops move into western growing regions. While the crop rotation is changing, herbicide-resistant weed

populations are also expanding in North Dakota. The combination of these changes creates a challenging environment for managing weeds. Best management practices for noxious weeds are also necessary to maximize crop yields in this region of the state.

Soybean acreage continues to increase in North Dakota; however, between 2015 and 2019,

an estimated 1.1M bushels, worth well over \$10 million, was lost to soybean diseases,

and additional diseases and pathogen variants. As examples, the diseases Sudden Death

Syndrome and Frogeye Leaf Spot were first reported in North Dakota in 2018 and 2020,

respectively, and new variants of the soybean cyst nematode were reported. An NDSU

Extension soybean pathologist is needed to develop and deliver disease management

information to growers and their industry partners to help prevent or mitigate economic loss to the North Dakota soybean crop.

Increasing interest in carbon contracts from a variety of entities means farmers and ranchers are being asked to sign long-term contracts and utilize practices that will help sequester carbon in soils. It is critical that we provide education and assistance around these carboncapture practices so producers are fully informed as they consider using them on their farms.

Innovative farmers contribute to the development of best management practices for the

commodities they grow. On-farm research programs serve as a bridge between the field-scale problems and novel plot-sized concepts and/or research-based solutions. On-farm research is an effective way to validate research advances while helping farmers envision the value those advances bring to their farm.

Necessary resources for implementation (including FTE's)*: Five FTEs total. Western crop production specialist, soybean pathologist, weed

specialist, carbon credit specialist, on-farm research coordinator. \$400,000 operating

630 NDSU Extension Service

Agency 630

support that includes \$200,000 operating for on-farm research.

Total: \$1,400,000

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota agriculture

Livestock Development Initiative (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Livestock production in North Dakota accounts for approximately \$1.5 billion in gross revenue annually, and there is ample opportunity for growth. North Dakota lags its neighboring states in livestock production, and livestock integration has been identified as a top priority to utilize and add value to North Dakota agricultural products.

The health of livestock is also imperative to the state's economy. NDSU Extension continues to serve as a key technical resource that helps protect the health of North Dakotans and their livestock by enhancing the monitoring and surveillance of zoonotic diseases common to animals and people. Educational programming related to livestock production and management, business and economics, and animal health and biosecurity is needed to enhance existing opportunities and develop new opportunities to grow this industry in the state.

Necessary resources for implementation (including FTE's)*: Request: Three FTEs total. Veterinary epidemiologist, swine specialist, off-campus livestock development specialist.

\$120,000 operating support.

Total: \$770,000

Are resources being redirected or are they new or additional (including FTE's)*: New

630 NDSU Extension Service

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The health and safety of those involved in agriculture is of utmost importance. When stress, adversity or trauma occur, having the ability to adapt to difficult situations allows individuals and communities to continue to function. Prevention efforts help build coping skills that can reduce the need for expensive, crisis-level services.

Farmers and ranchers regularly experience uncertainties throughout the year, such as extreme weather, fluctuating commodity prices or trade disruptions. Extension personnel across the state offer prevention resources, and Extension is uniquely positioned to coordinate additional efforts and critical resources related to farm and ranch stress.

Necessary resources for implementation (including FTE's)*: Request: \$250,000 operating support for farm and ranch health and safety resources.

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota agriculture

Program Support for 4-H Initiative (Priority: 04)

630 NDSU Extension Service

Agency 630

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: North Dakota is facing a workforce crisis, with a particularly high demand for individuals with strong science, technology, engineering, math and entrepreneurial skills. These technical skills, combined with teamwork, decision-making, critical thinking and communication can help build a strong and effective workforce for the state.

North Dakota’s natural resource-based economy and increasingly diverse population require future leaders who have critical life skills. Expanding and developing quality youth development programs and experiences, such as 4-H, is essential.

Support for 4-H youth development programs will advance North Dakota’s future workforce, growing leaders through positive youth development experiences, club involvement, year-round camping opportunities, school enrichment, and after-school programs to promote youth who thrive with workforce readiness skills.

Necessary resources for implementation (including FTE’s)*: Request: One FTE total. 4-H entrepreneurship specialist. \$120,000 operating funds to include support for camping, clubs and after-school programs.

Total: \$320,000

Are resources being redirected or are they new or additional (including FTE’s)*: New

Who is served and impact of not funding*: North Dakota agriculture, 4-H Youth Development, and North Dakota community growth through leadership and civic engagement

Extension and State Soil Conservation Committee Operating Support Initiative (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? Yes

630 NDSU Extension Service

Agency 630

Request explanation and justification (include any statutory authority)*: Operating support allows Extension specialists to develop innovative programming in a timely fashion, reach audiences as the need arises, or develop new methods to connect with local communities, and leverage resources needed to address larger issues facing our citizens. Operating support for the State Soil Conservation Committee provides an increase in direct

assistance funding to be distributed to local Soil Conservation Districts for technical assistance and conservation planning support.

Necessary resources for implementation (including FTE's)*: Request: \$300,000 in operating support for Extension and \$300,000 in operating support for the SSCC.

Total: \$600,000

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota agriculture

Increased Food Security Initiative (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	400,000	-	400,000	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	400,000	-	400,000	1.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Agriculture continues to be a cornerstone of North Dakota's economy in both rural and urban communities. With the increased emphasis on agricultural processing capacity within North Dakota, there is a need for continued education on the food supply chain. Support for food processing efforts and activities, particularly for value-added food products, can enhance nutrient dense foods.

The pandemic facilitated an increased interest in locally-produced and sustainable food, gardening and horticulture. This initiative would provide funding for enhanced support of Extension agents with expertise in horticulture to support this growing interest across the state.

Necessary resources for implementation (including FTE's)*: Request: One FTE total. Urban ag/value-added food technologies specialist.

\$200,000 in operating support to include two county-based horticulture

agents in partnership with counties.

630 NDSU Extension Service

Agency 630

Total: \$400,000

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota agriculture

Statutory Authority

North Dakota Century Code Chapter 4.1-15

Agency Description

The Northern Crops Institute (NCI) is a collaborative effort between North Dakota, Minnesota, Montana, and South Dakota to promote, develop, and market crops grown in the four-state region, and value-added agriculture, both internationally and domestically. NCI is an international meeting and learning center that brings together customers, commodity traders, technical experts, agricultural producers, and food and industrial processors for education, discussion, and technical services. NCI provides technical and marketing assistance through specialized training programs and technical services that facilitate domestic and international market development and expand the sale of northern grown crops. Representatives from more than 130 countries have visited NCI since its inception in 1979.

Agency Mission Statement

NCI's mission is to support regional agriculture and value added processing by conducting educational and technical programs that expand and maintain domestic and international markets for northern grown crops.

Major Accomplishments

- 1 NCI transitioned to online and hybrid programs in 2021 and 2022. The number of course participants is set to more than double in this biennium versus the prior biennium. NCI has been able to reach geographies that have proven difficult to reach in the past. NCI is transitioning to a combination of online, in person, and hybrid course offerings which is transforming how and where we grow markets.
- 2 NCI has more than doubled the number of technical service clients and projects in the last biennium. This has helped to grow markets for crops grown in North Dakota and the surrounding states, but also assisted in growing value added agriculture in the region.
- 3 NCI's webinar series (Market Update, Cereal Innovators, and Future of Feeding) have had over four thousand views in 2021 and 2022 year to date. The webinar series has acted as a spring board for other market development opportunities with courses, handbooks, and conferences.
- 4 NCI has been collaborating with our core commodity groups to work on some ground breaking market studies that show the potential to grow export markets for US crops, and also add value for North Dakota farmers.
- 5 NCI is transitioning its brand from one of being a service provider, to being an industry thought leader for regional crops. Through our programs, our services, how we approach market development, and collaboration with our partners, it is changing how we approach market development and how people approach us.
- 6 Continued work with the Northern Crops Council to carry out our strategy, and increase our impact, by conducting new and innovative courses, programs, and other educational activities, as laid out in century code with the goal of building capacity to maximize our potential.

Critical Issues

- 1 NCI's five-year strategic plan was to increase our educational efforts to better fit the changing world, while fulfilling our purpose as laid out in North Dakota Century Code. Producing high quality educational content online, in person, and hybrid presents many opportunities, in addition to costs and challenges. Our ability to grow and adapt in this area will be a critical component of our success for the next decade.

Critical Issues

- 2 With changing market dynamics within the United States and internationally, the region we serve has the potential to see one of the most dramatic opportunities for change and development of any region in the country or the world. Renewable fuels, sustainability policies, and global supply chains are all going to create opportunities. NCI is in a good position to help facilitate that growth.
 - 3 NCI has continued to grow our strength in feed and feed milling programs and tech services. However, the NCI feed mill has some serious deficiencies in space and equipment. Some of the current equipment is well beyond its useful life and is in serious risk of critical failure.
 - 4 NCI has developed a very strong team over the last several years. The impact of inflation is very real for the employees of NCI and there is increasing pressure from the private sector trying to hire our employees away.
-

Performance Measures

NCI provides status reports to the Northern Crops Council (per North Dakota Century Code Chapter 4.1-15). The last meeting was held on June 27 2022.

Program Statistical Data

See Agency Major Accomplishments.

Explanation of Program Costs

The total budget request for this agency is \$9,342,875. Of this total, 63.2% is general fund and the remaining 36.8% is made up of gifts, grants, contracts and the sale of agricultural products. Salaries and wages represent 45% of the total budget. Operating expenses represent 13%. Major operating expenses include travel, repairs, professional services, buildings and grounds, and miscellaneous research supplies. Capital and equipment requests represent 42%.

Program Goals and Objectives

See Agency Description.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Special funds has continued to grow allowing for growth of staff and programs to fulfill their mission. NCI provides status reports to the Northern Crops Council (per North Dakota Century Code Chapter 4.1-15). The last meeting was held on June 27 2022. The budget presented to the NCC included \$2.3 mil in special funding for FY 23. This is made up of programs (short courses, conferences, webinars, handbooks), technical services (produce development grants, contract work), and general support dollars.

Necessary resources for implementation (including FTE's)*: \$1,500,000 special funds increase

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota agriculture

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: The Northern Crops Institute operates the NCI Feed Center on the campus of NDSU. The mission of the center is to produce feeds for NDSU and other regional Land Grant Universities, to fulfill the mission of NCI to expand markets for crops grown in this region. Ideally, this facility is to host both domestic and international guests and give them hands on training on producing feed using crops grown in the region, including Minnesota, Montana, North and South Dakota. In addition, NCI does product development work for the growers in the region helping them prove the value of the crops grown.

The feed mill was designed and built over thirty years ago, and feed science has changed in that time period. The Northern Crops Institute would like to invest in upgrading the facilities to include:

- Expanded educational facilities – current facilities do not have proper educational spaces, especially as we host international course participants. There are no breakout rooms, no place to serve meals (today participants eat outside, in a conference room, or are taken offsite).
- No room for new feed technology – more animal feeds, especially aquafeed utilize extrusion processing and NCI doesn't have the space or equipment to fulfill that mission effectively today.

638 Northern Crops Institute

Agency 638

- The current facility does not have adequate warehouse space for ingredients and finished feed storage. We have donated equipment that is inaccessible most of the time due to lack of space.
- Current bin storage space limits what NCI can do from a product development standpoint, and are also 30+ years old. These bins will need to be replaced or major repairs will be needed in the near future.
- Current facility is not ADA compliant. This project will include an elevator to allow access for all to our educational facilities
- Parking lot, approaches and service drive are near impassable in the spring due to a clay underlay, this will allow paving of the parking lot (and prevent incidences where equipment and trailers sink into the lot).

Current funding for programs at NCI comes from appropriated funding (roughly 30%) and the balance from commodity group funding, technical service fees, and course fees. No additional full time employees will be needed as a result of these upgrades.

The impact will be an updated feed mill that will serve NDSU and NCI well for the next 30 years or more. As a result of NCI's courses, our participants state they increased purchases of commodities grown in North Dakota by 51%. This results in increased demand and increased markets for North Dakota producers.

State Initiative:* State Facility Investment

Justification: Upgraded equipment including the current pellet mill. The pellet mill was an original piece of the NDSU Experiment Station and was transferred to NCI in 1990; it is approximately 70 years old and while it has been maintained, it is beyond its useful life, parts are difficult to obtain, and it is in danger of critical failure.

Statutory Authority

ND Constitution Article XIX; North Dakota Century Code Chapter 15-12.1.

Agency Description

The North Dakota State University Main Research Station is located on the campus of the North Dakota State University of Agriculture and Applied Science. The station is the administrative location of the North Dakota Agricultural Experiment Station. The station conducts research and coordinates all research activities of the Agricultural Experiment Station. The purpose of the research is the development and dissemination of technology important to the production and utilization of food, feed, fiber, and fuel from crop and livestock enterprises. The research provides for an enhancement of economic development, quality of life, sustainability of production, and protection of the environment. The Main Research Station keeps detailed records of all activities and publishes the information that will be of value to the residents of this state.

Agency Mission Statement

The agricultural experiment station shall develop and disseminate technology important to the production and utilization of food, feed, fiber, and fuel from crop and livestock enterprises. The research must provide for an enhancement of the quality of life, sustainability of production, and protection of the environment.

Major Accomplishments

- 1 Livestock exercise and diet improves pregnancy outcomes of mother and offspring, like improved colostrum quality in milk that ensures newborns get vital antibodies necessary for fighting disease.
- 2 Veterinary pathologists performed foreign animal disease testing for high pathogenic avian influenza as part of the USDA National Animal Health Laboratory Network.
- 3 Collaborations with Emerging Prairie continued to grow. NDSU is now a Sky Tiere Partner on Grand Farm, their top level of partnership, a testament to the high degree of collaboration.
- 4 Microbiologists studying plant root microbiome developed a novel tool to identify nitrogen-fixing rhizobia in fields, providing a way to evaluate inoculants necessary for improved crop yields.
- 5 NDAES scientists determined water use needs of different industries and municipalities and assessed requirements for growing municipalities under normal and drought conditions.
- 6 New plant varieties developed by NDSU can realize an almost \$70 million increase in annual revenues to North Dakota's economy. A new low cadmium durum wheat was released. Also, the NDSU Dakota Russet was selected by McDonalds as one of only seven varieties for their French fries.
- 7 Pathologists advanced crop protection through new chemistries, new tools, and monitoring for new diseases. Collaborations with industry fostered the development of new chemistries, and improved application timing and amounts. Scientists developed new tools, such as disease risk models and molecular diagnostics, as means to manage plant diseases. Furthermore, pathologists constantly scout for new diseases that threaten production, including the recent sudden death syndrome and frog-eye diseases in soybean, and tar spot and bacterial leaf streak in corn.
- 8 New models were implemented in the North Dakota Agricultural Weather Network that provide pest emergence predictions, like for the sugarbeet root maggot that can cause up to 45% yield loss.

Major Accomplishments

-
- 9 Precision agriculture projects advanced fertilizer efficiencies and the control of weeds. On-the-go optical sensors measured in-season plant nutrient status and prescribed fertilizer delivery to improve nitrogen use efficiency. Researchers also developed autonomous weed control systems to rapidly detect and eliminate weeds using robots and UAS data to inform commercial sprayers.

 - 10 Rangeland scientists determined conservation reserve programs for North Dakota grasslands increased grassland bird abundance by 2-7% and increased beekeeper revenue by \$30 per acre. They also developed unique grazing strategies to simultaneously increase pollinator habitat and livestock forage quality in rangeland ecosystems.

 - 11 Researchers completed a large 5-year pollinator monitoring study across all 53 counties of North Dakota, establishing a foundation for species conservation. Over 200,000 individuals were collected and 68 butterfly and 317 bee species were identified and located.

Critical Issues

-
- 1 Plant Production and Protection Crops and cropping systems account for more than 80% of the gross agricultural receipts in North Dakota. Each year, new challenges and research questions emerge, especially related to crop rotations, agronomic practices, varietal selection and disease. Crop rotations in North Dakota are diverse and complex, and new and emerging diseases continually arise. To maintain the success of the state's agricultural operations, the need for specialized research is critical for a wide variety of crops and cropping systems, and for new bacterial and viral diseases. Research that addresses many of the most challenging problems in cropping systems generates almost immediate return on investment by improving agricultural productivity. There is a need for seven FTEs and operating support. An agronomist at the Dickinson REC, plant bacteriologist and plant bacteriologist technician, plant virologist and plant virologist technician, pulse breeding technician, and technician for clubroot fungus at the Langdon REC.

 - 2 Operating support is requested for the Oakes Irrigation Research Site (OIRS), which provides important research on irrigation strategies, farming practices in the southeast part of the state and high value crops. The additional operating support will ensure the OIRS maintains its critical research activities. Additionally, operating support to enhance collaborative opportunities between the Main Station and REC network is vital to bringing additional scientific collaboration to key projects, facilitate collection of preliminary data and enhance competitiveness for grant funds. Scientists have become progressively more reliant on grant funds to conduct research, and consequently their time spent on administering the grant process has greatly increased. The complexity of many grant applications has expanded significantly and scientists find themselves spending increasing amounts of time on administrative functions related to grant applications. Administrative support staff dedicated to assisting scientists to identify sources of grant funds, navigate complex submission requirements and gather paperwork would improve efficiency and increase the ability of our scientists to identify, submit and compete successfully for grant funds. Graduate students enhance research programs by providing key labor to complete research activities, collect field data and conduct various analyses associated with research projects. Graduate students also enhance collaborations between the main campus and the REC network by providing a vital link between scientists. These same graduate students are the next generation of scientists that will be hired into important roles in the public and private sector in the future. There is a need for three FTEs to provide administrative support for grant development work. Graduate student funding to hire graduate research assistants (no FTEs). Operating support is needed for Main Station, RECs and the Oakes Irrigation Research Site.

Critical Issues

-
- 3 Big Data Agricultural research activities have become much more data intensive. Advances in UAVs, agricultural sensors, computational speeds and networking technologies produce massive volumes of data, and advances in precision agriculture will only increase data production at a rapid pace. The demand for data storage, management and analysis within agriculture and food production is greatly needed to provide the producer with meaningful management outputs that will improve their operations. Large volumes of data are part of every conceivable field of agricultural research, including plant varietal selection, soils, livestock production, weather and climate, economics and agribusiness, and food production. In addition, weather is the primary factor that impacts all fields of agriculture, and the ability to monitor, process and analyze weather data is essential to improve producer management and reduce risk. The North Dakota Agricultural Weather Network (NDAWN) is a mesonet of more than 150 stations and generates a tremendous amount of data multiple times per hour. The value of this data and its uses can greatly improve agricultural operations through more timely applications of crop inputs, determining planting and harvesting dates, minimizing risk, etc. There is a need for operating funds and one-and-a-half FTEs to support research related to data analytics, management and curation; one-and-a-half FTEs to support enhancements to NDAWN.
-
- 4 Climate Smart Agriculture There is little room for error in producing a crop during a "typical" North Dakotan growing season, and extreme variability exasperates this challenge of producing a successful crop. For example, the harvest of 2019 was the wettest autumn since 1895 and resulted in prevent plant enrollment of 3.7 million acres in 2020. This record wetness was then followed by one of the worst droughts experienced in North Dakota during the growing season of 2021. Climate Smart Agricultural (CSA) practices provide land management strategies to help deal with such problems, and research is needed to implement CSA strategies that enhance resiliency for North Dakota producers. Climate Smart Agricultural practices include water- and soil-conservation practices such as strip- or no-till, cover crops, rotation diversity and livestock integration, all of which increase carbon levels in the soil. Additionally, producers are increasingly being offered contracts to enter private sector carbon markets if they implement CSA practices. Producers need science-based information that helps them realize the benefits of CSA practices and the potential economic benefit from private sector carbon markets. There is a need for a climate smart agricultural scientist, a climate smart agricultural technician and operating funds.
-
- 5 Bee and Apiary Research North Dakota is the number one producer of honey in the United States. As a state, the total number of bee colonies is 495,000 or 18% of all colonies in the United States. These colonies contribute to 26% of all honey produced nationally, which is valued at approximately \$67 million. Although North Dakota produces more honey than any other state, we have no research program supporting beekeepers. North Dakota honey producers need apiary research to address pressing issues such as colony collapse and improve honey production by developing greater winter hardiness, improved mite resistance, and increased hygiene. Additionally, research can improve interactions with other agricultural systems of the state while benefitting native pollinator populations and ecosystem services through improved land use. There is a need at the Hettinger REC for a bee and apiary scientist, bee and apiary research technician and operating funds.
-
- 6 Precision Agriculture The need for intelligent systems, such as sensors, artificial intelligence, robotics and automation, is greatly increasing across all aspects of agriculture, from farm to plate. Additional resources can provide researchers with equipment and tools needed to build capacity and incorporate advanced agriculture applications for improving cropping systems and livestock operations of the state. There is a need for operating funds.
-

Performance Measures

Per North Dakota Century Code 15-12.1-17 the State Board of Agricultural Research and Extension (SBARE) presents a status report to the budget section of the legislative council. SBARE's most recent presentation to the budget section was on June 28, 2022. The report they gave and provided in written form included the status of the North Dakota Agricultural Experiment Station and the NDSU Extension Service. A copy of the information is on file in the legislative council office.

Program Statistical Data

At the Main Station, research functions are organized in 7 departments and one school in the college. This faculty generated significant external funding. Research was conducted in at least 16 different buildings/facilities on the main campus. Faculty published increasing levels of peer-reviewed publications, national or international presentations, and a large number of technical/popular articles that service the needs of North Dakota clients. External program reviews have shown

strengths of departments, and equivalencies of faculty to those of other institutions. Chairs and/or faculty from each of the departments provided critical inputs to the State Board of Agricultural Research and Education as the board reviewed progress, determined priorities for efforts, and distributed the SBARE Agricultural Research Funds. Faculty, together with those in the Extension Service, work closely with commodity/consumer groups to assure that research provides outputs useful to North Dakota users and to position North Dakota agriculture in a globally competitive market. For example, NDAES released several new crop cultivars during the biennium; while most were for general use by the state's farmers, several of these cultivars were for specific purposes and /or specialty areas. In addition to breeding and crop production practices for 14 major crops, NDAES scientists are developing information on new crops, high cash value crops, and on the economic opportunities in biofuels/bioproducts, and animal/crop systems throughout the state. NDAES provides direct services to North Dakota agriculture through its soil testing laboratory, maintaining the North Dakota Ag Weather Network (NDAWN), and the veterinary diagnostic laboratory.

Explanation of Program Costs

The base budget request for this agency is \$112,008,027. Of this total, 49% is general fund and the remaining 51% is made up of gifts, grants, contracts and the sale of agricultural products. Salaries and wages represent 76% of the total budget. Operating expenses represent 20% and equipment > \$5,000 represents 4%. Major operating expenses include travel, repairs, professional services, buildings and grounds, and miscellaneous research supplies.

Program Goals and Objectives

See Agency Description.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Crops and cropping systems account for more than 80% of the gross agricultural receipts in North Dakota. Each year, new challenges and research questions emerge, especially related to crop rotations, agronomic practices, varietal selection and disease. Crop rotations in North Dakota are diverse and complex, and new and emerging diseases continually arise. To maintain the success of the state’s agricultural operations, the need for specialized research is critical for a wide variety of crops and cropping systems, and for new bacterial and viral diseases. Research that addresses many of the most challenging problems in cropping systems generates almost immediate return on investment by improving agricultural productivity.

Research that addresses agronomic conditions in western North Dakota at the Dickinson Research Extension Center (REC) is critical to helping farmers address issues related to crop rotations, drought concerns and other issues specific to southwest North Dakota.

640 NDSU Main Research Center

Agency 640

In addition, more emphasis on plant breeding, especially with pulse crops, is needed as pulses have become an increasingly important part of crop rotations throughout the state.

Plant diseases are a constant concern for producers. Over the past twenty years, over twenty new diseases have arrived in North Dakota. Several of these are caused by bacterial plant pathogens that are now major diseases on the crops they affect. Examples include Goss' wilt of corn, bacterial leaf streak of wheat and barley, and Dickeya soft rot of potatoes, all of which can cause tens of millions in damage in the state. Other, longer-established bacterial diseases in the state, such as common blight of dry bean and ring rot of potato, reduce producer profitability and can limit seed production in the state. New virus diseases in the state, such as pea seedborne mosaic virus, and new variants of existing viral diseases, such as potato virus Y, have emerged and hamper efforts to breed new crop varieties and reduce producer profitability. Expertise in these new and emerging diseases caused by bacteria and viruses are needed to reduce the risk associated with these diseases, ensure farm profitability, and reduce expense.

Necessary resources for implementation (including FTE's)*: Request: Seven FTEs total. One agronomist at the Dickinson REC, one plant bacteriologist and one plant bacteriologist technician, one plant virologist and one plant virologist technician, one pulse breeding technician, and one technician for clubroot fungus at the Langdon REC. \$120,000 in operating support.

Total: \$1,580,000

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota agriculture

Operating Support (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Operating support is requested for the Oakes Irrigation Research Site (OIRS), which provides important research on irrigation strategies, farming practices in the southeast part of the state and high value crops. The additional operating support will ensure the OIRS maintains its critical research activities.

640 NDSU Main Research Center

Agency 640

Additionally, operating support to enhance collaborative opportunities between the Main Station and REC network is vital to bringing additional scientific collaboration to key projects, facilitate collection of preliminary data and enhance competitiveness for grant funds.

Scientists have become progressively more reliant on grant funds to conduct research, and consequently their time spent on administering the grant process has greatly increased. The complexity of many grant applications has expanded significantly and scientists find themselves spending increasing amounts of time on administrative functions related to grant applications. Administrative support staff dedicated to assisting scientists to identify sources of grant funds, navigate complex submission requirements and gather paperwork would improve efficiency and increase the ability of our scientists to identify, submit and compete successfully for grant funds.

Graduate students enhance research programs by providing key labor to complete research activities, collect field data and conduct various analyses associated with research projects. Graduate students also enhance collaborations between the main campus and the REC network by providing a vital link between scientists. These same graduate students are the next generation of scientists that will be hired into important roles in the public and private sector in the future.

Necessary resources for implementation (including FTE's)*: Request: Three FTEs total. Three FTEs will provide administrative support for grant development work, \$594,000. Graduate student funding to hire graduate research assistants (no FTEs), \$720,000. Operating support for Main Station and RECs, \$480,000. Operating support for the Oakes Irrigation Research Site, \$400,000.

Total: \$2,194,000

Are resources being redirected or are they new or additional (including FTE's)*: New

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Agricultural research activities have become much more data intensive. Advances in UAVs, agricultural sensors, computational speeds and networking technologies produce massive volumes of data, and advances in precision agriculture will only increase data production at a rapid pace. The demand for data storage, management and analysis within agriculture and food production is greatly needed to provide the

640 NDSU Main Research Center

Agency 640

producer with meaningful management outputs that will improve their operations. Large volumes of data are part of every conceivable field of agricultural research, including plant varietal selection, soils, livestock production, weather and climate, economics and agribusiness, and food production.

In addition, weather is the primary factor that impacts all fields of agriculture, and the ability to monitor, process and analyze weather data is essential to improve producer management and reduce risk. The North Dakota Agricultural Weather Network (NDAWN) is a mesonet of more than 150 stations and generates a tremendous amount of data multiple times per hour. The value of this data and its uses can greatly improve agricultural operations through more timely applications of crop inputs, determining planting and harvesting dates, minimizing risk, etc.

Necessary resources for implementation (including FTE's)*: Request: Three FTEs total. One-and-a-half FTEs to support research related to data analytics, management and curation; one-and-a-half FTEs to support enhancements to NDAWN. \$200,000 in operating.

Total: \$838,000

Are resources being redirected or are they new or additional (including FTE's)*: New

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: There is little room for error in producing a crop during a “typical” North Dakotan growing season, and extreme variability exasperates this challenge of producing a successful crop. For example, the harvest of 2019 was the wettest autumn since 1895 and resulted in prevent plant enrollment of 3.7 million acres in 2020. This record wetness was then followed by one of the worst droughts experienced in North Dakota during the growing season of 2021. Climate Smart Agricultural (CSA) practices provide land management strategies to help deal with such problems, and research is needed to implement CSA strategies that enhance resiliency for North Dakota producers.

Climate Smart Agricultural practices include water- and soil-conservation practices such as strip- or no-till, cover crops, rotation diversity and livestock integration, all of which increase carbon levels in the soil. Additionally, producers are increasingly being offered contracts to enter private sector carbon markets if they implement

640 NDSU Main Research Center

Agency 640

CSA practices. Producers need science-based information that helps them realize the benefits of CSA practices and the potential economic benefit from private sector carbon markets.

Necessary resources for implementation (including FTE's)*: Request: Two FTEs total. One climate smart agricultural scientist, and one climate smart agricultural technician. \$40,000 in operating.

Total: \$458,200

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: North Dakota agriculture

Bee and Apiary Research (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	458,200	-	458,200	2.00	458,200	-	458,200	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	458,200	-	458,200	2.00	458,200	-	458,200	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: North Dakota is the number one producer of honey in the United States. As a state, the total number of bee colonies is 495,000 or 18% of all colonies in the United States. These colonies contribute to 26% of all honey produced nationally, which is valued at approximately \$67 million. Although North Dakota produces more honey than any other state, we have no research program supporting beekeepers.

North Dakota honey producers need apiary research to address pressing issues such as colony collapse and improve honey production by developing greater winter hardiness, improved might resistance, and increased hygiene. Additionally, research can improve interactions with other agricultural systems of the state while benefitting native pollinator populations and ecosystem services through improved land use.

Necessary resources for implementation (including FTE's)*: Two FTEs total at the Hettinger REC. One bee and apiary scientist, and one bee and apiary research technician. \$40,000 in operating.

Total: \$458,200

Are resources being redirected or are they new or additional (including FTE's)*: New

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: Field agronomic, plant disease and soils research address the pressing questions and important issues needed by state producers. Unfortunately, the current field facilities used by scientists are no longer adequate to address these critical research needs. Waldron Hall, Widakas Laboratory, the Potato Research Laboratory, and the Horticulture laboratory were all built between the 1940s and 1960s prior to the advent of personal computers and other modern equipment commonly used in field research, and at a time when field crop production yields in North Dakota were much lower and consisted largely of small grains. The future of North Dakota’s successful agriculture depends on modern field facilities that will allow researchers to address the needs of the industry with improved access to varieties that are adapted to the climate of North Dakota, better fertility recommendations, improved weed control, and improved responses to plant disease challenges.

A modern field laboratory requires space that facilitates collaborations between scientists and their teams, is safe, eliminates contamination from soilborne and insect pests, and provides better processing, cleaning and storing of seed. Additionally, this facility must support research in tuber and root crops, such as potato, and horticulture, including controlled-environment growing rooms that allow precise environments for plant development.

Start Date (MM/DD/YYYY): 07/1/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: The last time the 1940s era NDSU dairy barn was updated was in 1978, when cows were producing 11,000 pounds of milk. Today the average dairy cow produces over 23,000 pounds of milk (over 2,600 gallons) in one year. The North Dakota State University dairy herd is recognized consistently by the Holstein association of the United States as one of the top university herds in the country. The current unit needs substantial renovation to the cow barn to modernize it with robotic milking and automatic calf feeding, improve worker safety, and increase animal welfare. This renovation would support the state’s dairy industry and help it grow.

State Initiative:* Other

Justification: Microbiological sciences can best contribute to the future of North Dakota agriculture through the development of microbial inoculants and the microbial valorization of agricultural residues. Broader research interests exist across the NDAES surrounding the microbial transformation of agrifood products and bioproducts. NDAES scientists engaging in this research would benefit from a core facility where they could access specialized equipment and skilled technical support.

Funding would be used to purchase laboratory equipment needed to establish a core biotech facility. Equipment needed includes an array of bioreactors to support high throughput and scale-up experiments and metabolomics equipment including a GC MS/MS mass spectrometer.

Statutory Authority

North Dakota Century Code Chapter 15-12.1.

Agency Description

The Agronomy Seed Farm (ASF) is a 590 acre farm located near Casselton, which has been a part of the North Dakota Agriculture Experiment Station (NDAES) since it was gifted to the state in 1950. It was the result of a fund drive conducted by the North Dakota Crop Improvement Association, which solicited farmers, seed companies and many others throughout the state to help establish a farm whose main purpose is to increase seed of new varieties as they are developed by the plant breeding and supporting departments of the NDAES. The ASF also propagates seed of older but still desirable varieties for the seedsmen of the area.

Agency Mission Statement

To produce an adequate supply of foundation-grade seed for the seedsmen of the state and area at a reasonable price and to support the varietal development research of the NDAES.

Major Accomplishments

-
- 1 Produced 35,000 to 50,000 bushels of seed for availability to the seed industry annually.
 - 2 Conditioned 35,000 to 50,000 bushels of seed for availability to the seed industry annually.
-

Critical Issues

-
- 1 The critical issues facing the ASF are a continued demand for foundation-grade seed, favorable weather for growing seed and a good supply of varieties that are in demand by the seed industry. If these three conditions are present and good commodity prices accompany them, the future of the ASF is secure.
-

Performance Measures

Per North Dakota Century Code 15-12.1-17 the State Board of Agricultural Research and Extension (SBARE) presents a status report to the budget section of the legislative council. SBARE's most recent presentation to the budget section was on June 28, 2022. The report they gave and provided in written form included the status of the North Dakota Agricultural Experiment Station and the NDSU Extension Service. A copy of the information is on file in the legislative council office.

Program Statistical Data

Nearly 100 seed customers purchase an average of 31,000 bushels of seed of approximately 25 to 30 varieties annually.

Explanation of Program Costs

The base budget request for this agency is \$1,579,655. Of this total, 100% of funding is made up of gifts, grants, contracts and the sale of agricultural products. Salaries and wages represent 37% of the total budget. Operating expenses represent another 44%, and the remaining 19% is for equipment. Major operating expenses include travel, repairs, professional services, buildings and grounds, and miscellaneous research supplies.

Program Goals and Objectives

The Agronomy Seed Farm is a self-supporting facility designed to increase breeder and foundation grade seed of new varieties. The agency also maintains supplies of pure seed of older varieties and increases experimental lines with potential release as new varieties. The facility is unique in the state and region in that it combines the practical and efficient production of high quality seed stocks with the maintenance of research lands used extensively by the NDSU Main Station researchers for basic and applied research projects.

Statutory Authority

North Dakota Century Code Chapter 4.1-45-01 to 4.1-45-24.

Agency Description

The North Dakota State Fair Association produces the State Fair for North Dakota. This nine day event includes the production of horse, cattle, goats, sheep and swine shows, 4H State Championship competitions, FFA State Championship competitions, several junior stock shows, and open class competitions for hundreds of categories. The annual budget for the State Fair and All Seasons Arena complex is over \$10 million.

State Fair provides the facilities, administration, staffing judges, equipment, prizes and recognition for those who bring over 40,000 entries from every community in North Dakota.

The Association provides educational and entertaining exhibits along with special attractions that bring North Dakotan’s together to celebrate their heritage and lifestyle each year.

Agency Mission Statement

To meet the needs of North Dakota Fair goes through program changes determined by surveys of patrons and non-patrons.

To keep the association financially solvent.

To continue to fund the Fair’s general operations through user fees.

To solicit private, corporate, city and county support for general operations and capital assistance.

To retain the support of state government through accountability for awards/prizes and assistance with one-time capital improvements.

To enhance security with multi cameras installed on the grounds.

To coordinate with the State, City and County law enforcement, fire departments, ambulance service and security personnel to implement plans in case of disaster during fair days/nights.

To follow CDC guidelines for appropriate procedures during a pandemic.

To seek a flood risk management system to reduce the State’s risk of financial loss due to flooding on the State’s fairgrounds and buildings.

Major Accomplishments

-
- 1 Generated revenues to operate facilities through admissions, rents, and gifts from friends.

 - 2 Solicited \$29.5 million in capital construction from non-state revenues for capital improvements.

 - 3 Generated revenue of \$19.4 million for capital improvements from admissions and rents.

Major Accomplishments

-
- 4 Hosted 94,056 entries in a biennium.

 - 5 Received entries from 52 counties in North Dakota.

 - 6 Recognized nationally, regionally and statewide as a great attraction as the "Showplace of North Dakota".

Critical Issues

-
- 1 Flood Control. Current flood mitigation projects in the Minot area will not protect the State Fairgrounds from a flood such as the one that occurred in 2011. The North Dakota State Fair would like to be included in the City of Minot flood protection projects. The North Dakota State Fairgrounds are located within the floodplain of the Mouse River in northeast Minot. The Souris River Joint Board and the City of Minot are working together to advance enhanced flood protection for the region, but funding has been committed by the State of North Dakota to assist in the construction of levees and floodwalls only in north and west Minot. The southern and eastern portions of Minot will remain at risk to flooding for an estimated 20 years, unless financial assistance is offered from the State for construction of flood risk reduction features to protect the State's assets on the North Dakota State Fairgrounds. The 2011 flood caused the cancellation of that year's North Dakota State Fair. Heroic efforts saved the State Fair Center and the main grandstands, but several buildings suffered significant damages. Additionally, the ND State Water Commission and the Federal Emergency Management Agency are in the process of remapping the regulatory floodplain in Ward County, which will significantly increase the costs of providing flood insurance to mitigate the State's risk against flooding.

 - 2 Security. Another future risk is the need for additional security measures for all patrons during the nine days of the fair where over 300,000 people are on the grounds. With the pandemic now as one of the front security concerns, new steps must be in place to also continue to make security include these concerns.

Performance Measures

See major accomplishments.

Program Statistical Data

The State Fair prizes and premiums need to be increased to further encourage participation of the youth in the 4-H and FFA program and to build additional open class participation. Fair exhibit numbers have grown from 15,128 exhibits in 1976 to 93,000 in the 17-19 biennium. The cash premiums and prizes have not kept pace with other state fairs or with the cost of living. Increasing the premiums is an important step in continuing to support the youth participation in these critical state fair programs, as well as to help offset the investment made by them as they learn by participating. Increasing premiums will help the fair build on this base of entries and strengthen the future of the fair.

Explanation of Program Costs

The State Fair offers hundreds of competitive divisions where state champions are named. Our exhibitors are limited to one or two entries per person/per competition. 4-H and FFA members cannot show the same project in both departments. 4-H exhibits must either first win a blue ribbon at a county achievement day or as in the case of FFA, or where counties have a late achievement day, worthy competitors are determined by the agent. The State Fair publishes 4-H, education, FFA, horse show, and open class award books. These books offer competitions for North Dakotans with a wide variety of interests. Exhibitors displayed over 93,000 competitive exhibits at the 17-19 biennium. The award funds are used to buy ribbons, trophies, and to provide cash prizes to the winners of 4-H, FFA, and open class exhibitors. These funds cannot be used to pay for any related services such as buildings, maintenance, staff, judges, advertising, rule books, etc.

Program Goals and Objectives

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Premium dollars requested each biennium by the North Dakota State Fair are used solely as prizes for individuals competing at the North Dakota State Fair in 4-H, FFA and Open Class. Every dollar appropriated from the State is 100% paid out to exhibitors. No appropriated money is paid towards the production of the competitions. This request would restore funding for premiums to the 2015-17 biennium appropriation amount.

Necessary resources for implementation (including FTE's)*: Additional funding for state fair premiums.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding for state fair premiums.

Who is served and impact of not funding*: This request is for additional state fair premiums for exhibitors competing at the North Dakota State Fair in 4-H, FFA and Open Class.

Impact of not funding is less money available for prizes awarded to the State Fair exhibitors.

Statutory Authority

NDCC 53-06.2-01 to 53-06.2-16

Agency Description

The North Dakota Racing Commission is the regulatory body in charge of regulating live and simulcast racing, and account deposit wagering companies. The Commission administers three special funds for the benefit of the horse racing industry in North Dakota. The Commission is made up of five members appointed by the Governor and has an office staff of a Director and an Administrative Officer.

Agency Mission Statement

The mission of the North Dakota Racing Commission is to ensure pari-mutuel wagering and live horse racing are viable and productive within North Dakota.

Major Accomplishments

- 1 Developed tax revenue to the General Fund sufficient to offset Commission Biennial appropriation for the past four biennium and have additional revenues over our allocated dollars making the Racing Commission a net positive revenue agency.
- 2 Revised tax requirements for live horse racing, simulcast wagering, and account deposit wagering has been advantageous to the companies engaged in simulcast and account deposit wagering. As a result, we have seen a few new companies begin operating under our license as well as the growth of those already established, contributing to an increase in revenue the past two years (2020 & 2021).
- 3 Remained open and operational during the COVID-19 era, and we were able to maintain our tax revenues and have seen increases in some areas despite all the closures.
- 4 Continued to work with Horse Race North Dakota in Fargo to establish a long term financially viable business plan, including payment of debts to the City of Fargo, and re-establish racing in the region with a sustainable business model.
- 5 Continued to work with Outdoor Recreation Development Association and the Turtle Mountain Band of Chippewa to maintain their race meet season. We have also seen an increase in both special fund and Tribal funding to the racetrack to make structural and infrastructure improvements at the track.
- 6 Regulated live horse racing, simulcast, and account deposit wagering industry in North Dakota.
- 7 Worked with an independent accounting agency to strengthen oversight and review of all pari-mutuel activities including audits.
- 8 Provided support for developing and maintaining account deposit wagering companies accounting for wagering and tax revenue increases.
- 9 Worked with both racetracks on capital improvements and hiring a FT General Manger at the ND Horse Park in Fargo.
- 10 Promoted and supported live horse racing and horse racing breeding programs in North Dakota.
- 11 Supported Lutheran Social Services problem gambling program when they were open. Awaiting word on their reopening so we can again support them.
- 12 Executed the duties required by the North Dakota Century Code.
- 13 Approved and licensed live racing via licenses provided to tracks, associations, owners, trainers, and jockeys.
- 14 Worked with the Turtle Mountain Gaming Division and the National Indian Gaming Commission to ensure compliance with all Federal and Tribal Laws.
- 15 Approved and licensed simulcast racing, including account deposit wagering companies, totalizators, service providers, site operators, and simulcast employees.

Major Accomplishments

-
- 16 Monitored live racing by contracting to provide veterinarians, stewards, compliance investigator, and other individuals required to assure compliance with the Administrative Code.

 - 17 Administered the promotion fund monies to promote live racing and provided oversight to ensure compliance with promotion awards.

 - 18 Approved and disbursed the purse fund grants to live horse racing associations.

 - 19 Contracted with an independent contractor to administer the North Dakota Breeders' Fund Horse Registry for awards for both in-state and out-of-state live race meets.

Critical Issues

-
- 1 The continued appropriation of adequate general fund dollars for the Racing Commission in the 2023-25 biennium to conduct statutory responsibilities and to grow the industry to support its continuing financial self-sufficiency.

 - 2 The Commission must continue to receive legislative support and the necessary financial resources to protect North Dakota from criminal activity, fraud, and money laundering in the racing industry.

 - 3 The Commission must have the continued ability to recruit and retain account deposit wagering companies to underwrite the Breeders, Promotion, Purse, and Horse Racing Administrative Funds to support the racing industry and horsemen in the state. To accomplish this, we will need to expand the events allowed under statute to allow for the licensing, regulation, and taxation of all pari-mutuel wagering events (not only horse and greyhound) around the world through our licensed service providers.

 - 4 To allow for the licensing, regulation, and taxation of sports betting and all pari-mutuel wagering activities in legally licensed jurisdictions through our ADW and Service Provider licensees.

 - 5 The Racing Commission must also have continued resources through racing taxation to contract for services to assist in the administration of live racing and the auditing of the wagering process.

 - 6 The continued upgrading of the regulations of live racing is a primary effort by the Racing Commission to elevate the standards of horse racing in North Dakota and to remain in compliance with national regulating requirements.

 - 7 The agency needs to transition to a more paperless format by expanding our licensing and payment process to include digital applications and online payment capabilities.

Performance Measures

A formal performance measures system is not utilized by this agency.

Program Statistical Data

Account wagering activity regulated by the Commission has continued to provide significant funding for live racing and the horse industry throughout the State and the Turtle Mountain Nation. In 2021-2022, the Commission has or will pay out nearly \$2,500,000 to horsemen, horsewomen, racetracks, breeders, jockeys, and horse racing organizations with support from our Promotion, Purse, and Breeders Funds. These payouts include the following:

- Breeders Fund: \$600,000

- Promotion Fund: \$1,192,700

670 Racing Commission

Agency 670

- Purse Fund: \$668,000

1. The 2016 NDSU Economic Impact Study showed a direct financial impact on the State of almost \$25,000,000 per year from a department general fund budget of roughly \$200,000 for the calendar year. A small investment with a large return to our State. This includes the creation of over 500 full and part-time jobs in ND and the Turtle Mountain Tribal Community.
2. The Commission currently licenses 14 ADW's, 7 Totalizator Companies, 5 Site Operators (charities) and 2 racetracks during 2022.
3. During the current fiscal year through May 2022, the Commission has paid back \$277,499.09 to the General Fund, or almost 75% of our General Fund allocation in the first 11 months.
4. During the first 11 months of the fiscal year, the Commission has assessed ADW tax value totaling \$1,081,671.77 and an additional collection of \$64,610 in licenses and other fees to our administrative fund.

Explanation of Program Costs

The Racing Commission is the agency responsible for regulating live racing and wagering through companies and associations licensed by the Racing Commission.

To enhance the monitoring and accounting of wagered funds, the Racing Commission entered a contract with an accredited accounting and auditing firm on July 1, 2011. The Commission has continued to work with this firm to enhance the effectiveness of its regulatory and auditing functions.

In 2020, the racing commission instituted an Internship Program for college students. Each year we hire 2-3 Interns that work both with the NDRC and track racing official positions. The goal is to help educate and expand interest in horse racing with our younger citizens. Our first Intern Jessica Benson (NDSU AG Graduate) was recently appointed by the Governor as one of our Racing Commissioners.

The Racing Commission hires and contracts with several individuals and organizations each year to monitor and enhance racing in North Dakota. These positions include a State Veterinarian, State Steward, Safety Steward/Investigator, Licensing Staff/Interns, independent Testing Lab, Breeders Fund Administrator, and an independent Breeders Fund Auditor.

The Racing Commission contracts with the Association of Racing Commissioners International to enhance our individual licensing program as well as create consistency with many other jurisdictions.

The Racing Commission has adopted the Uniform Classification Guidelines for Foreign Substances and Recommended Penalties and Model Rules developed by the ARCI as well. These rules require the use of a credentialed and accredited lab for all testing including split sample tests. North Dakota is currently not subject to the new Federal HISA Regulations.

The Racing Commission continually works on upgrading and making recommendations for changes to State Statutes, Administrative Rules, forms, licensing procedures and costs associated with all programs.

All the above items help ensure that we provide the best live racing programs as well as provide protection for all horses and humans involved in our racing programs.

Program Goals and Objectives

The North Dakota Racing Commission's primary objective is to regulate and promote the pari-mutuel wagering and live horse racing industry in North Dakota.

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: During 2020, the Attorney General’s Office asked us to relocate our office at 500 N. 9th St. Bismarck, ND, to another location as they needed the space. Additionally, this was not an ideal location for us as it had no client parking and was not HC accessible.

We worked with Director John Boyle with Facilities Management and were able to secure our current location at 4501 Coleman St., Suite 100, Bismarck, ND. This site is on the main floor, HC accessible, has ample parking and easy access. The rent increase amounted to \$11,409 per biennium and will remain the same during our 5-year contract. All utilities are included including snow removal. The agreement was approved by both Facilities and the Attorney General’s Office.

Necessary resources for implementation (including FTE’s)*: Increase of \$11,409

Are resources being redirected or are they new or additional (including FTE’s)*: new

Who is served and impact of not funding*: The General Public is better served as their is ample parking and is handicap accessible.

670 Racing Commission

Agency 670

The impact of not funding would result in a hardship on the Racing Commission office as there would be budget cuts for other office needs.

Increase for Coverage of Salaries and Benefits (Priority: 02)

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Our current General Fund appropriations do not cover the amount required to pay for our staff's salaries and benefits. We currently have a FT Administrative Officer, FT Executive Director, and PT Safety Steward/Investigator.

We would also like to have the Internship program funding added to our yearly funding as we believe it has been very successful.

Necessary resources for implementation (including FTE's)*: The current appropriation in the General Fund is \$407,894, which includes one-time funding for Interns at \$20,000. The balance of \$387,894, does not fully cover the salaries and benefits for the Executive Director and Administrative Officer, which is at \$204,112 through June 2022.

The current cost for the Safety Steward/Investigator is \$13,000 annually.

The current cost for the Internship program is \$10,000 annually.

Are resources being redirected or are they new or additional (including FTE's)*: new

Who is served and impact of not funding*: Interns provide licensing staff and assist many other positions at the racetracks including veterinarians and stewards.

Impact of not funding would require funding from Promotion Fund thereby reducing amounts available for racetracks and horsemen.

General Fund Collections Summary

Account	Account Name	2019-21 Actual Collections	2021-23 Estimated Collections	2023-25 Estimated Collections
416000	Gross Receipts-Business Tax	518,302	421,000	525,000
Total		518,302	421,000	525,000

Continuing Appropriation Summary
Horse Racing Breeders Fund

	2021-23	2023-25
Statutory Authority 53-06.2		
Beginning Fund Balance	924,668	723,262
Revenues and Transfers In	424,000	530,000
Total Financing	1,348,668	1,253,262
Expenditures and Transfers Out	(625,406)	(670,000)
Ending Fund Balance	723,262	583,262

Horse Racing Purse Fund

	2021-23	2023-25
Statutory Authority 53-06.2		
Beginning Fund Balance	132,556	154,556
Revenues and Transfers In	422,000	528,000
Total Financing	554,556	682,556
Expenditures and Transfers Out	(400,000)	(500,000)
Ending Fund Balance	154,556	182,556

HORSE RACING FUND

	2021-23	2023-25

Statutory Authority

North Dakota Century Code Chapters 55-01, 55-02, 55-03, 55-05, 55-06, 55-09, 55-10, 55-11, and 55-12.

Agency Description

The State Historical Society of North Dakota is responsible for identifying, preserving, interpreting, and promoting the heritage of ND and its people. The agency was founded in 1895 and accomplishes its mission through four departments, as follows:

Administration is headed by the Assistant Director and is responsible for overall agency support, budgeting and fiscal matters, personnel management, security, and concession sales and inventory control.

The Audience Engagement & Museum team strives to provide engaging, entertaining and memorable learning experiences for the public. This team oversees museum exhibitions, plans public events and educational opportunities, produces publications and ND history curriculum, manages space rentals, collects and preserves artifacts, coordinates our volunteers, and manages the marketing, branding, and digital presence of the agency.

The State Archives manages, preserves, and ensures access to permanent historic records that document the history, heritage, and culture of North Dakota and the northern Great Plains. Historic records and documents managed by the State Archives include state and local government records, manuscript and photograph collections, newspapers, microform, maps, moving image, and publications. These resources are accessible to the public through in-person and virtual reference services. Archivists provide technical assistance to constituencies.

Agency Mission Statement

To identify, preserve, interpret, and promote the heritage of North Dakota and its people.

Major Accomplishments

- 1 The State Historical Society partnered with the Turtle Mountain Band of Chippewa to research boarding school students at Fort Totten. The Turtle Mountain Band of Chippewa, the Spirit Lake Tribe, and the State Historical Society pursued a Memorandum of Understanding to search for missing students from the boarding school era. In support of these efforts, the Historical Society acquired additional drone cameras and geophysical equipment. The Historical Society Foundation assisted the equipment purchased by funding a Ground Penetrating Radar cart.
- 2 A new partnership between the State Historical Society of North Dakota and the University of Mary created a work-study program that provided participating students with the opportunity to receive hands-on archival, library, and research experience in the State Archives. The State Historical Records Advisory Board received a grant from the National Historical Publications and Records Commission (NHPRC) to fund an intern to create subject guides featuring the collections of the State Archives. The subject guides were designed to lead North Dakota students to North Dakota topics and sources for use in National History Day projects.
- 3 The North Dakota State Archives offered numerous behind-the-scenes tours to several state agencies, school groups, youth groups, and associations. The North Dakota State Archives met with the North Dakota Newspaper Association to discuss the current and future workflows and obstacles of the preservation of newspapers.
- 4 The North Dakota State Archives assisted with programming for two different Little Kids, Big World programs, increasing the breadth of knowledge about Archives to burgeoning patrons.

Major Accomplishments

-
- 5 The processing team of the North Dakota State Archives increased access to collections by 29% through data cleanup and processing new and existing collections. 111 new master negatives of microfilm were created of 109 newspapers and 2 catalogs.
-
- 6 The Orin G. Libby Memorial Reading Room was updated with new furniture, updated window coverings, new carpet, and new arrangement of the space to allow for more streamlined use.
-
- 7 Over 1500 pre-1930 maps were scanned for preservation and accessibility.
-
- 8 The North Dakota State Archives team scanned hundreds of photographs, documents, and other archival resources and published a complete guide to these resources that are available to assist researches related to Indian boarding schools. This material is available online to communities and researchers free of charge.
-
- 9 With continued fiscal support from the 2021 Legislative Session, SHSND was able to leverage more robust and secure technology solutions for the management of objects, artifacts, cultural resources, and digital curations. We moved our digital curation system (Preservica) from an on-premise based environment to Preservica Enterprise Private Cloud. Doing so has provided us with a more stable and scalable solution for the compliant protection of long-term digital assets.
-
- 10 The North Dakota State Archives ingested over 100,000 digital files into the State Archives digital repository. These files included state and local government records and digital surrogates of analog items in the State Historical Society's collections.
-
- 11 Teamed up with ND Parks and Recreation to produce North Dakota Passport, a guidebook to state historic sites and parks. Visitors inked or embossed a unique stamp at each of 37 destinations around the state.
-
- 12 Hosted the Whitestone Hill Memorial Ride, a group from multiple Dakota nations who rode on horseback from Crow Creek, South Dakota to Whitestone Hill State Historic Site, in memory of their ancestors who were killed there on September 3-5, 1863.
-
- 13 Recreated the historic U.S. Weather Bureau offices at Camp Hancock State Historic Site. This immersive, hands-on exhibit showed how meteorology helped North Dakota prosper.
-
- 14 Installed a new visitor services area at the Chateau de Morès as a partner project with ND Commerce and partnered with the Theodore Roosevelt Presidential Library to preview the TRPL exhibits.
-
- 15 Installed a new playground at Writing Rock State Historic Site in partnership with Divide County, with grants from the John and Elaine Andrist Fund and the ND Outdoor Heritage Fund.
-
- 16 Both the Comprehensive State Plan (Historic Preservation in North Dakota, 2022-2027: A Statewide Comprehensive Plan) and the State Plan for Archaeology (Historic Preservation in North Dakota: A Statewide Comprehensive Plan Archaeological Component) were updated for the upcoming five-year plan period (2022-2027). The Comprehensive State Plan was updated and accepted by the National Park Service as a review of its future efforts, needs, and objectives as stewards of the cultural resources of North Dakota. The Historical Society updated the State Plan for Archaeology to include new data and resources gathered for 13 geographical units across the state.
-
- 17 The Highland Acres Historic District in Bismarck, with original planning and development by the Bismarck Veterans Homes Owners Cooperative Association, was first surveyed and then nominated for the National Register of Historic Places. The nomination included 350 properties built primarily between 1948 and the early 1970s, resulting in an enclave of Mid-Century and Contemporary residential architecture that fits in with the natural topography and incorporated a park, school, and churches.
-
- 18 The North Dakota Preservationist, a semi-annual digital newsletter, debuted in 2021 and shared highlights from the North Dakota State Historic Preservation Office.
-

Major Accomplishments

-
- 19 In 2021, the Grand Forks Historic Preservation Commission, funded by the Historical Society, hosted the ND CLG Conference. Traditionally been a yearly event hosted by and in a CLG Community, brought together preservationists, government leaders, local planning officials, and everyday citizens to explore preservation topics. Instead of one centralized all-day conference, the conference consisted of single-day, single-topic Zoom sessions the last week in March. Topics included Mid-Century in North Dakota, Pioneer Mother Monuments, preparing a National Register Nomination, and celebrating the successes of the CLG program in ND.
-
- 20 The Abner O'Neal steamboat was built in 1884 and transported freight and passengers between Bismarck and Washburn, North Dakota. The ship was hauling a load of grain when it struck a rock or perhaps snagged a tree on the Missouri River and began to sink. The cargo on board and the boat itself were a total loss. Aided by low Missouri River water levels, Historical Society staff documented the wreckage with drone aerial photography. Later, in 2021 Society archaeologists and Frontier Precision personnel returned to the Abner O'Neal to record the boat using a submersible drone.
-
- 21 The North Dakota State Archives produced ten Archives in Action videos. These videos provided a behind-the-scenes look at the work and collections of the State Archives.
-
- 22 The Historical Society partnered with the Archaeological Conservancy and PaleoCultural Research Group to conduct excavations at Harmon Village. The fortified earthlodge village dates 16th and 17th centuries and is located north of Mandan near the confluence of Square Butte Creek and the Missouri River.
-
- 23 Our audience engagement grew each year. The Audience Engagement & Museum team has effectively more than doubled our website users from 303,970 in 2017 to 626,088 users in 2021.
-
- 24 In 2021, the ND Studies websites had their highest visitation to date, with approximately 1.3 million page views.
-
- 25 In 2020-2021, the Audience Engagement & Museum Department created and installed eight exhibitions including Fashion & Function: ND Style, which used the most artifacts ever (400+) in one of our agency's exhibits.
-
- 26 Due in part to an expanded marketing budget, we reached a broader audience and more than doubled attendance at certain state historic sites.
-
- 27 Audience Engagement & Museum staff completed the Native American Hall of Honor exhibition and honoring ceremony in September 2021. Staff also became involved in housing Indigenous history curriculum on the agency website created due to Senate Bill 2304.
-
- 28 Staff worked with ND Geological Survey staff and an exhibit developer to create a fresh Dakota the Dinomummy exhibition featuring the state's valuable and beloved dinomummy.
-
- 29 Staff worked with a Chamber of Commerce group to offer guidance on themes and inspiration for a Heritage Art Tunnel outside of the ND State Museum, featuring themes from the Grade 4 North Dakota Studies content.
-
- 30 We moved and continue to move disparate data sets and completed migration of the museums object collections from its standalone system to our comprehensive agency wide collections management system, ReDiscovery. This move allowed for all collection types in the agency (archives, artifacts, archaeology) to be managed by one more robust system. This unified management allowed for a wider toolset for "relating" collections together and positions the data for easier public consumption. More work needs to be done on this, but a firm foundation has been built.
-
- 31 Our museum stores across the state benefited from technology improvements. A new Point of Sale system was implemented across all sites. Before this we had three different sales processes at sites. By adopting all into one system, we have better access controls as well as better inventory management and reporting.
-

Critical Issues

- 1 While the Society has made advancements with the implementation of its collections management and digital repository software, it continues to identify and migrate data as well as work on the development of policy and procedures for data acquisition. Data acquisition is generally defined in two broad categories: the digitization of traditional mediums, such as film and paper, and the acquisition of digital data, which is either born digitally at the originating agency or is digitized at the originating agency before transfer to the State Archives. Critical issues related to data acquisition are the ongoing cost of digital storage as increased capacity is needed and the refinement of data governance and records management policy across state government.
- 2 Archiving the state's electronic records is a very big issue that needs continuous and meticulous effort to be addressed. The number of electronic records grows exponentially. Terabytes of electronic data needs to be archived. While the Society and the Information Technology Department will play a significant role in addressing this issue, there will need to be an ongoing effort of all state agencies to ensure the state's permanent records are not lost.
- 3 The Society receives newspaper issues directly from publishers, according to state law NDCC 46-05-01, and a Microfilm Specialist converts these issues to microfilm for long-term preservation. The Society's microfilming equipment, and consequently, processes for microfilming newspapers has not changed since the 1970s. Newer overhead camera/scanner equipment has become available which allows operators to quickly capture digital images of printed newspapers, without the need to first inventory and arrange issues, iron newspapers, or post-digitize from existing microfilm rolls. Overhead camera/scanners can also be used to digitize maps, posters, and printed material of any size quickly and efficiently. While both the transfer of born-digital files to the Society and the Society's scanning of printed materials are constantly increasing, microfilm continues to be the preferred method for long-term preservation. To continue this preservation practice, an Archive Writer could be used to create microfilm directly from electronic files (whether from scanned or born-digital files). An Archive Writer would also save time, allowing the Microfilm Specialist time to take over the newspaper digitization project, making the historic and contemporary newspaper collections more accessible and searchable online. In order to increase access and ensure preservation of historic newspapers, advancing the technologies to the digital age are crucial. Several technologies, such as a large format overhead camera/scanner and Archive Writer, would greatly increase the efficiencies in the microfilm process and workflow.
- 4 Hiring adequate staffing, especially in the current labor market. Some sites, like the ND Lewis & Clark Interpretive Center and Fort Mandan, have been forced to reduce services this season.
- 5 Tourism in North Dakota continues to be hampered by portable toilets at some of our most stunning locations. Modern travelers require modern sanitary amenities such as flush toilets and running water. By eliminating the use of portable toilets at State Historic sites, we can entice all visitors to stay in ND and spend more money during their visit.
- 6 As North Dakota's major history agency and home of the largest museum in the state, as well as 58 additional state historic sites and museums, additional marketing dollars are needed to build awareness of these special places to learn the state's history. As more options become available for learning, entertainment, and at-home options, it is critical for our agency to continue to attract and engage new audiences and reach them both physically and digitally.
- 7 The National Historic Preservation Act (1966) tasks the State Historical Society of North Dakota (SHSND) with maintaining a statewide cultural resource database. The nature of the database has changed since its implementation, starting with paper files and maps to a fully digital database incorporating Geographical Information Systems (GIS). North Dakota Century Code 55-02-07.1 protects site location data and is of the utmost importance. Therefore, permitted cultural resource personnel, including private contractors and academic researchers, only access the database in-house at the SHSND's Heritage Center. Because the access is limited, qualified individuals must live or travel to Bismarck, which often increases project costs that are then passed on to their clients. The SHSND intends to develop a remote access system that balances the need to protect sensitive cultural resource information with the need for efficient and timely cultural resource reviews.

Critical Issues

-
- 8 North Dakota owns some of the most important historic sites in the Northern Great Plains. In the last legislative session the agency was awarded 4.2 million to address prioritized statewide need. It is now time to continue addressing these prioritized needs and investing in these buildings and sites so that they are attractive and welcoming for visitors, maintaining at a level that they can be leveraged to attract entrepreneurial partnerships, and positioning so that they can become contributing factors to the local economy. Continued investments in these sites will strengthen the economic climate of North Dakota and contribute to the State's overall attractiveness for the retention of new businesses and residents.

 - 9 Storage at our two outlying buildings is beyond capacity. Both buildings do not meet current codes, have pest control issues, leakage issues, and environmental control issues. To best preserve and protect the state's precious large artifacts stored at these facilities, it is critical to look at options for new storage buildings.

 - 10 Technology at our museums and state historical sites is failing. The impact is felt more greatly each year. To retain the interest and visitation of a younger audience, it is critical that our museums and sites remain relevant and fresh with emerging technologies. As the Gateway to Science Center and Theodore Roosevelt Library open soon, as well as other new venues, our agency's places and services need to remain appealing for continued visitor engagement.

Performance Measures

Program performance measures relate to activities enumerated in work plans based on the agency Strategic Long Range Plan and include quantitative measures of services provided and time of response. The major goals in the Strategic Long Range Plan are: Create Inspiring Educational Opportunities, Establish Deeper Connections with Core Constituencies, Optimize our Assets, and Embrace Technology. Specific strategies, tactics, action steps, metrics, and the staff responsible are identified under each of the major goals.

Program Statistical Data

Administration

1. Reviewed 2,623 leave requests.
2. Completed over 16K payable time entries and made 161 pay rate changes.
3. Made over 5K voucher payments.
4. Completed a review of records previously held in the State Archives, freeing up 5.5 linear feet for future use.

State Archives

1. Responded to approximately 5K requests for reference services.
2. Acquired materials including more than 1.2K published books and reports; over 1.5K linear feet of government records and private manuscript collections; issues from 77 state-wide newspapers; and thousands of digital files.
3. Maintained materials that included more than 40K linear feet of archival records, 350K digital files, 112.5K cataloged and accessioned publications, 13K volumes of selected federal publications, 2.3K titles of periodicals, 1.5K titles of newspapers, 4.5M feet of motion picture film, 2M photographic images, and 19.5K rolls of microfilm.

4. Digitized over 500 video files, 50 audio files, 2K photographs, and 3 complete newspaper runs for access by patrons.

Historic Sites

1. Provided visitor services with visitation exceeding 373K visitors. We also provided programming, interpretation, preservation, and maintenance to 59 state historic sites.
2. Welcomed 169 school field trips with a total of 4,654 students.
3. Reached more than 10K viewers with blogs and social media posts.
4. Added two additional State Historic Sites (Menoken and Huff) as National Historic Landmarks.
5. Assumed management of the Lewis & Clark Interpretive Center and Fort Mandan on July 1, 2021 and have welcomed over 137K visitors.
6. Completed 32 capital improvement projects at 16 sites.
7. Brought 9 major historic sites online with virtual interpretive programs that supported ND Studies. 10 of these interactive programs were delivered live to 107 attendees this spring term.
8. Brought Red River Rendezvous, a popular outreach program developed by Pembina State Museum, to over 600 students around the state.
9. Updated interpretive signs at Double Ditch Indian Village and received over 103K visitors in FY22.

Archaeology and Historic Preservation

1. Maintained data on approximately 69K cultural resource sites. Historic Preservation staff processed over 2K new site forms and updated over 2.1K existing forms.
2. Increased the cultural resources manuscript collections by approximately 950 reports.
3. Maintained and enhanced the GIS system for cultural resources site forms and reports with an interface for state and federal agencies, tribal governments, and cultural resource specialists.
4. Increased the 430 National Register of Historic Places listings in North Dakota by 10.
5. Rehabilitated 81 historical buildings using the federal investment tax credit program at a cost of over \$107M. These projects have created 2,055 new housing units.
6. Reviewed approximately 4,750 federal or state-assisted projects in the last biennium.
7. Granted over \$185K to certified local governments.

8. Managed the archaeological collections, numbering over 12M artifacts. Curated historic and prehistoric archaeological collections from over 2.5K sites in North Dakota with assemblages from 13.5K years ago.
9. Accepted and processed into collections 360 boxes of archaeological collections.
10. Provided access to approximately 900 researchers and the public cultural resource records.

Audience Engagement and Museums

1. Served approximately 10K school children at the ND Heritage Center & State Museum. Led the development of digital history education resources for students and classrooms through ND Studies and provided in-service training opportunities for state teachers.
2. Preserved and protected more than 80K artifacts in the museum collection.
3. Provided visitor information services at the ND Heritage Center & State Museum for 210K local and international visitors per year and provide marketing materials for 513,150 visitors to all of our historic sites and museums.
4. Collaborated with more than 100 state agencies, organizations, and private businesses to provide enhanced programs, exhibits, and projects for the citizens of North Dakota and all visitors.
5. Managed and/or developed content for agency websites, socials media channels, e-newsletters, and agency blogs. The agency has more than 46K social media followers, agency websites have more than 625K digital users; and about 2K individuals subscribe to our e-news and blog page.
6. Published the state's academic history journal and 2 monthly e-newsletters.
7. Managed and created fresh exhibitions for 80K square feet of exhibit spaces at our museums and sites.

Explanation of Program Costs

Funding for the Administrative Department covers the operating and salaries and wages expenses for the director, business office team, custodial team, IT personnel, and security staff. The Administration Department makes the business processes flow smoothly, provides the public with clean facilities at the Heritage Center, keeps up with the all IT needs specific to museums, and provides protection to not only the Heritage Center, but all remote historic sites.

Funding for operating costs and wages associated with State Archives staff is to collect, preserve, catalog, arrange, describe, and provide public access to all documentary resources of the agency. Through this program, North Dakota state and local government analog and electronic records, manuscripts, newspapers, books, film, maps, photographs, audiovisual recordings, and other historical materials are made available to the general public and other state agencies.

The salary and operating request for historic sites is to fund staff and operations located at historic sites throughout the state and provide the best opportunities for tourists to come . Grounds staff out of Bismarck maintain the significant sites without visitor centers. The staff is responsible for the operation, programming, interpretation, maintenance, restoration, and development of the 59 historic sites located throughout the state.

Funding for the Archaeology and Historic Preservation department is for staff members and their operating expenses that address the agency's responsibilities for the administration of the federal historic preservation program within the state; implementation of state law related to the identification and protection of the state's

significant cultural resources; development, maintenance, and enhancements for the Geographic Information System for Cultural Resources and reports for the state; and responding to burial calls on state and private property (NDCC 23-06-27). The agency must comply with federal requirements for the Historic Preservation Grant, which funds the majority of this program.

Expenses in the Audience Engagement and Museum department are for staff-related costs such as salaries, training, production of materials for all departments, and supply costs as well as programming and advertising costs. Department staff perform activities that relate to the entire agency and our 59 state historic sites and museums. These include statewide communications and branding, media relations, marketing, building visitor awareness of our sites and many services for the public and contractors, overseeing education programs for the agency, writing and editing educational curriculum for students, teacher training, overseeing the agency's volunteer program, and managing rental spaces. Department staff also collect, preserve, and manage the state's museum artifact collection, oversee loans for educational exhibits, fabricate exhibitions statewide, and provide technical assistance and resources to local and county historical societies and museums. We also partner with private businesses and organizations to bring North Dakota history to an expanded audience.

Program Goals and Objectives

The goals for the Administrative department are to keep the Heritage Center and historic sites safe and clean for all visitors; to provide a large selection of North Dakota inventory products available for sale to the public; and to provide business and technology support to all staff effectively and efficiently.

The goal for the State Archives is to ensure the identification and preservation of North Dakota governmental records of continuing value and to acquire, preserve, and make available to the public and to staff all documentary resources, including state and local government records, books, periodicals, newspapers, photographs, motion picture film, video and sound recordings, manuscripts, and other historical materials.

The goal for historic sites is to preserve unique, original structures, sites and other "in situ" prehistoric and historic features that illustrate the major themes in North Dakota history through the acquisition, preservation, research and interpretation of these resources for the inspiration, enjoyment and education of the people of the state of North Dakota and its visitors.

The goals for the Archaeology and Historic Preservation department are to identify, evaluate, register, and maintain and manage information on the state's significant cultural resources and help assist in the preservation of these cultural resources by awarding grants to private and public entities; to maintain and update a statewide plan for historic preservation along with encouraging and assisting with economic development and expansion of historic preservation efforts by rehabilitating historic buildings using federal tax incentives, administering covenants and maintenance agreements on historic properties, and authoring and reviewing National Register nominations to submit to the National Park Service for final approval; and to manage archaeology collections and maintain and update the Archaeology Component of the State Plan every five years.

The goals for the Audience Engagement and Museum Department is to continually create inspiring and inclusive educational opportunities for state citizens and global visitors by providing a broad variety of educational services, exhibitions, programs, events, publications, and activities of excellence that fulfill the needs of our diverse audiences and promote the state of North Dakota; to help the agency optimize our assets by encouraging professional development, managing a vibrant volunteer program, preserving museum artifact collections, and collaborating with our diverse audiences; to establish deeper connections with core constituencies through proactive educational partnerships with local, state, federal, and private businesses and schools to increase our reach; by striving to provide the best visitor experiences at museums, historic sites, events, and through our digital offerings; and by providing assistance to local and county historical organizations and museums. These key collaborations assist us with continuing to grow and share the state's history, ethnology, and natural history collections; and to oversee and increase the use and impact of our digital products and services, staying current with technology developments that will help us provide improved, engaging guest experiences for digital and physical users.

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In the past few bienniums, the agency has managed to shift resources in order to maintain the costs of utilities at our historic sites. However, with the current economy continuing to rise, the agency will find itself falling behind with the trend of significant increases that we have been experiencing.

Necessary resources for implementation (including FTE's)*: An increase in general funds is needed in the operating line to keep up with the rising costs of utilities.

Are resources being redirected or are they new or additional (including FTE's)*: The agency estimates that an additional 17% increase in resources is needed to keep up with the costs to continue paying for our utilities.

Who is served and impact of not funding*: This increase would be at each of our staffed historic sites that are located remotely throughout the state. These historic sites bring tourism to these remote locations, which affect both the local communities and the people that visit the sites.

GIS Remote Access and Upgrade (Priority: 02)

State Initiative:* Technology Investment

Is this a Large IT project? No

701 Historical Society

Agency 701

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The National Historic Preservation Act (1966) tasks the State Historical Society of North Dakota (SHSND) with maintaining a statewide cultural resource database. The nature of the database has changed since its implementation, starting with paper files and maps to a fully digital database incorporating Geographical Information Systems (GIS). North Dakota Century Code 55-02-07.1 protects site location data and is of the utmost importance. Therefore, permitted cultural resource personnel, including private contractors and academic researchers, only access the database physically in-house at the SHSND’s Heritage Center. Because the access is limited, qualified individuals must live or travel to Bismarck, which often increases project costs that are then passed on to their clients. The SHSND intends to develop a remote access system that balances the need to protect sensitive cultural resource information with the need for efficient and timely cultural resource reviews.

Necessary resources for implementation (including FTE’s)*: Funding to develop processes and workflows to allow remote access to Cultural Resource Investigation Resources (CRI) data. CRI data consists of geospatial data, sites, manuscript data (pdfs), and various database (sql) level data sets complimenting the previously mentioned data elements. These processes and resources include the development of a secure sign-on that leverages at a minimum Multi-Factor Authentication.

Additionally, the development of workflows and processes to verify researcher to permit holder, capture project data and intent, audit data usage, improve reporting and fee collection, package and extract relevant research results. As this system is rolled out, we will need complementary software modules to leverage further existing investments and minor upgrades to our server environment hosted with NDIT.

Are resources being redirected or are they new or additional (including FTE’s)*: Additional resources would be needed to update the GIS and implement remote access.

Who is served and impact of not funding*: Any North Dakotan who applies for federal or state assistance, permitting, or working on public lands that initiate a cultural resource review would benefit from remote access to cultural resource data, as it would reduce costs and decrease time to conduct the records searches. Additionally, all qualified individuals, including tribal and federal partners and academic and independent researchers, could reduce travel and time costs while protecting the sites’ locational information. If the upgrades are unfunded, researchers will only continue to access the site databases at the Heritage Center in Bismarck.

Updating Newspaper Preservation Workflow (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	12,045	236,044	248,089	0.00	12,045	236,044	248,089	0.00

Total	12,045	236,044	248,089	0.00	12,045	236,044	248,089	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

701 Historical Society

Agency 701

Request explanation and justification (include any statutory authority)*: Under NDCC 46-05-01, the owner or publisher of each legal newspaper in the state shall send to the State Archives one copy of each issue of the newspaper. To properly preserve the newspapers, one FTE on our staff captures individual photographs of every page of each hard-copy newspaper that comes into the Archives. This is then used to process to microfilm for proper preservation. Our current microfilm practices and equipment have not changed over the last few decades, despite advances in these technologies, which makes it difficult to find replacement camera and lighting parts. Microfilming is the safest way to preserve our newspapers for current users and future generations. The way newspapers are created and printed has changed dramatically. Currently, most publishers create a PDF version of the newspaper and electronically send a copy to the printers. Having digitization equipment, like a high-performance color scanner and microfilm plotter, would save time and would produce the highest level of images on our microfilm. In addition, this equipment would allow the digital capture of large or irregular sized records.

Necessary resources for implementation (including FTE's)*: A high performance color scanner and microfilm plotter, along with the software and maintenance contracts, would replace the current microfilm camera and current processes in use and would allow the State Archives to take electronic files of the newspapers and create microfilm electronically from these files.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources would be needed to purchase a high performance color scanner and microfilm plotter, along with the software and maintenance contracts.

Who is served and impact of not funding*: Current and future generations of North Dakotans seeking to learn and preserve personal and general history would be served by this upgrade. The quality and efficiency of newspaper preservation going forward will be impacted if not funded. The agency's outdated, manual processes create the possibility of human and mechanical errors, which could be eliminated with upgraded equipment. In addition, our employee could spend more time working on the newspaper digitization project, making historic and contemporary newspaper collections publicly accessible, keyword searchable, available online, and easier to access for all.

Digital Interactive Initiative (Priority: 04)

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The State Historical Society is planning to create innovative digital history content on various platforms to attract new customers and help keep existing ones engaged in an increasingly digital-savvy world. Our agency currently offers mostly static exhibit experiences and outdated technology that is rapidly failing. With an ability to refresh static exhibitions by adding new digital features (such as augmented reality), our museums and sites would be able to bring to life works of art, science concepts, historical figures, and amazing details of artifacts by revealing them in expanded

701 Historical Society

Agency 701

perspectives. This capability would not only help tell the stories of our state’s artifacts, significant people, and important spaces, but would also allow users to intensify their personal discovery. By adding a digital layer of fresh interactive content on top of certain existing physical displays, we could offer visitors attractive contemporary reasons to visit and revisit our historic sites and museums.

New digital technologies have the potential to change many aspects involved in cultural site visitation. The State Historical Society needs to stay current, offer meaningful history experiences, and meet the expectations of today’s digital and physical visitors to remain relevant and grow a younger audience of visiting families and supporters.

This digital interactive strategy involves adding a full-time permanent position of a Digital Specialist to create and oversee new digital technologies at our sites across the state. An additional \$300,000 in one-time funding would help our staff replace failing technologies at several sites, purchase new software and equipment, and begin creating new digital technologies at the State Museum, Lewis & Clark Interpretive Center, Chateau de Mores State Historic Site, and Pembina Museum. This would also fund a new digital “history trail” pilot project in Bismarck, highlighting a digital tour of Capitol Grounds artwork and geography that leads through downtown historically significant buildings and ends at Camp Hancock State Historic Site. We request \$125,000 for consultant fees and services to help research, plan, and design these technologies.

Necessary resources for implementation (including FTE’s)*: One FTE addition. Purchase of software, technology, projectors, and other equipment. Digital technology consultants to help research and plan fresh technologies to meet evolving customer expectations.

Are resources being redirected or are they new or additional (including FTE’s)*: New

Who is served and impact of not funding*: Present and future North Dakotans are served by engaging them with expected and latest technologies that showcase the innovative nature of the State Museum and additional historic sites. The impact of not funding is already being felt and will deepen with each passing year. State Museum and other sites’ technology purchased eight or more years ago is rapidly failing. Kiosks, video screens, projectors and assorted visitor interactives are failing, with little funding for replacements or more innovative options. Within a few short years, North Dakota’s mothership museum will become a static place of objects and artifacts. We will not draw the attention or engagement of our younger demographic and target audience, and we are almost certain to experience a sharp decline in relevance and visitation. We are especially in need of staying relevant and fresh with the upcoming opening of both Gateway to Science and the Theodore Roosevelt Library. These tourist destinations and others across the state plan to offer a plethora of appealing digital engagement options for visitors.

Historical Structure Building Improvements (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative*: State Facility Investment

Is this a Large IT project? No

701 Historical Society

Agency 701

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Under NDCC 55-10-01, It is to be in the public interest to provide for the preservation of historic sites, buildings, structures, and antiquities of state and national significance for the inspiration, use, and benefit of the people of the state of North Dakota.

The State Historical Society of North Dakota manages 59 state historic sites with a total of 96 standing structures. We wish to continue to modernize and repair state structures and sites so that they are welcoming and attractive to all ND residents and visitors. Only after our structures are inhabitable and usable can they be leveraged for purpose of interpretation and brought into the local economy for use as a business venture (adaptive reuse). Simply put, state owned facilities should be clean, safe, welcoming, and inhabitable. The same goes for state historic sites. These need to be fully welcoming to residents and visitors. Real toilets instead of portable toilets, gates, fence boundaries, all need to be welcoming and inviting. Our historic sites all serve 3rd space functions similar to parks and must be equally as welcoming. A list of preservation projects has been established and prioritized with the intent that the projects will be completed in the next three bienniums. In addition, there are unforeseen projects in which extraordinary repair funding is needed.

Necessary resources for implementation (including FTE's)*: In the 21-23 biennium, \$4.2 million in ARPA funds was appropriated to the agency for historical structure building improvements. We have now identified all of our remaining building improvement needs and have prioritized them into three phases. We are asking for additional resources in the form of either General, Legacy, or SIF funds to work on completing high priority building improvements. In addition, we are asking for ongoing resources to maintain an Extraordinary Repairs budget for repairs that may come up that are not listed on our identified list of building improvements.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources would be needed to hire the appropriate design professionals and/or contractors as needed. No additional FTE's will be required..

Who is served and impact of not funding*: All North Dakotans and the entire tourism industry as well as local economies are served. When state buildings, historic sites, and buildings that are part of state historic sites are allowed to crumble and decay all North Dakotans suffer. People want to visit beautiful, important welcoming sites that make them feel connected to the land. If we don't invest in our historic sites, it reflects poorly on us as a state. Our sites should all be places that local businesses want to invest in and we should always look for ways to partner with our facilities and land with local entrepreneurs for new economic opportunities for North Dakota.

Medora Area Planning (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	-	150,000	150,000	0.00	-	2,150,000	2,150,000	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

701 Historical Society

Agency 701

Request explanation and justification (include any statutory authority)*: – In 2026 the Theodore Roosevelt Presidential Library (TRPL) will open in Medora. This library and museum will be the most technologically advanced attraction in the United States when it opens. Early estimates are that it will attract 1.5 million visitors a year. The State of North Dakota is uniquely situated in immediate proximity to the TRPL through the Chateau de Mores State Historic Site which is a collection of authentic historic buildings dating to the 1880s and the exact time that Theodore Roosevelt himself lived in the area. Comprised of more than 120 acres of pristine Little Missouri River bottom lands and high bluffs above the river this land represents and incredible opportunity for the State Historical Society of North Dakota to work in conjunction with the TRPL to develop this land in a way that is complimentary to the visitors of the library. The State Historical Society is already investing financial resources in their properties to make them welcoming, and desirable as a place to visit, live, or do business. This funding will allow the state to leverage its property for the highest possible good, creating new business partnerships, educational, and recreational opportunities by outlining all possible development for this property. The State Historical Society sees this as a perfect place for public private business partnerships to be realized in the same manner as concessionaire companies in other National Parks and similar attractions.

Necessary resources for implementation (including FTE's)*: One time funding for site planning

Are resources being redirected or are they new or additional (including FTE's)*: The State Historical Society already has considerable operations in Medora as the Chateaus de Mores State Historic Site including existing FTEs. As the site is developed these FTEs can be leveraged to support more robust operations at this site.

Who is served and impact of not funding*: All potential visitors to Medora in the future. Impact of not funding is a missed opportunity by the state to leverage a one-of-a-kind resource with a new National attraction.

Branding Marketing (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	148,574	-	148,574	0.50	154,547	-	154,547	0.50
Special	-	-	-	0.00	-	-	-	0.00
Total	148,574	-	148,574	0.50	154,547	-	154,547	0.50

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Additional marketing funding will help our team build awareness and visitation to our 59 museums and sites as well as increase visitor use of our vast array of public services. We request increased marketing funding. Each year our agency continues to add more customer-centric services--planning more regional programs and learning opportunities for children and adults, adding new exhibitions to historic sites and museums, taking in greater numbers of public donations for the state's artifact collections, and offering new products to the Museum Stores. Our agency museums and sites are also competing with an increasing number of tourism venues, entertainment options, and engagement opportunities for potential visitors' time. In addition, the Lewis & Clark Interpretive Center and Fort Mandan were recently added to our agency's management as two new state historic sites. These two sites both need updated branding with new State Historical Society logos, publicity materials, signage, and more to match agency the State Historical Society branding

701 Historical Society

Agency 701

and graphics. The branding, marketing materials, wayfinding signage, and engagement options for the Chateau de Mores in Medora should be upgraded to a similar professional quality of the upcoming Theodore Roosevelt Library to attract similar visitors using the same road. By strengthening the impact of our major visitor centers, the return on investment will be an increase in digital and physical visitors. Growing visitation in statewide historic places and spaces adds to the livability, commerce, and vibrancy of our Main Streets.

With additional state historic sites and increasing programs and services to market, our staff would benefit from having additional public information specialist assistance. We would like to increase a half-time permanent staff position in this specialty area to become a full-time employee.

Necessary resources for implementation (including FTE's)*: New software, printing and fabrication materials, advertising contracts, and upgraded technology are needed to help our staff grow awareness and engagement with our agency's many services and facilities. A half-time position would also help us grow our marketing capacity.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources would be needed.

Who is served and impact of not funding*: Current and future generations of North Dakotans will be served by showcasing history destinations in their own communities. State residents knowing of statewide history destinations will also travel to these destinations and spend dollars in these communities, adding to local commerce and vibrancy. The ability to keep doors open at our state historic sites will be significantly impacted without funding opportunities to build awareness and visitation. By increasing ticket sales at historic sites with admission fees, our agency has the potential to generate income for additional facility uses.

Engaging Exhibits (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	595,000	595,000	0.00	-	-	-	0.00
Special	-	75,000	75,000	0.00	-	670,000	670,000	0.00
Total	-	670,000	670,000	0.00	-	670,000	670,000	0.00

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: To continue to showcase the best of North Dakota's history through the agency's exhibitions areas, we request funding to create new exhibitions and to repair those that are failing after many years and use by hundreds of thousands of visitors. In order of importance, these new exhibition initiatives and repairs include:

1. \$200,000 to update interpretation, architectural design, and artifacts of the Inspiration Gallery: Yesterday & Today, located in the State Museum in Bismarck. This gallery, open since 2014, needs additions of newer stories of inspiring people, places, and activities showcasing the state's impact on local citizens and the world.

701 Historical Society

Agency 701

2. \$90,000 to update Pembina State Museum exhibits and the observation tower with fresh, inclusive interpretive stories of the fur trade era involving partnerships with the Turtle Mountain Band of Chippewa, Canadian tribal nations, and Minnesota tribal nations. These updates also include adding a permanent geological time exhibit with fossil casts of creatures from the area.
3. \$80,000 for consultant fees including assistance with research, interpretive design, and writing of new text for updated exhibits.
4. \$150,000 to repair or replace failing audience attractions and technology of major interest: Agricultural tractor cab and flight simulator at the State Museum, informational kiosks, video wall screens, theater components, and monitors.
5. \$120,000 for Washburn's Lewis & Clark Interpretive Center updates to exhibitions, new exhibit equipment, materials, and interpretive panels, and creation of a "Guns of the Expedition" exhibit.
6. \$15,000 to create, design, print, and mount Welk Homestead State Historic Site exterior interpretive panels for visitors to learn about the buildings.
7. \$15,000 for exhibit for Chateau de Mores State Historic Site after the Theodore Roosevelt Library temporary exhibit is removed in 2026.

Necessary resources for implementation (including FTE's)*: Consultants, purchase of supplies and materials. New technology to replace unsupported and broken components.

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: The citizens of North Dakota now and into the future would be served by gaining valuable opportunities to learn about objects that have impacted our state. Exhibit spaces help visitors make connections with their own histories and cultures. The impact of not funding would mean that will continue to turn away most large objects to the museum collection due to lack of space. Those stories and events unfortunately will not be preserved by the State Historical Society of North Dakota. In addition, artifacts in both facilities will continue to deteriorate due to inadequate storage conditions.

America's 250th Celebration (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation

Is this a Large IT project? No

Is this request for a new program or service? Yes

701 Historical Society

Agency 701

Request explanation and justification (include any statutory authority)*: Funding is being requested as for the ND state committee on the commemoration of the 250th founding of the United States. The state commission will explore the topics of freedom, individual liberty, democracy and civic responsibilities by leveraging state funds for grant programs in communities across the state and also to the commission related to projects to explore their journey since 1776. In addition, an “North Dakota’s America 250” exhibition will be created by in-house staff as part of a nationwide commemoration of the 250th commemoration of the United States of America, open from early 2025 to early 2027 in the Governors Gallery of the State Museum in Bismarck.

Necessary resources for implementation (including FTE’s)*: We expect Federal funds to significantly impact this program, but are not aware of Federal funding available as of the date of this budget. Funding is also needed for a communications position to help handle the design of a website which will maintain all 250th celebration events.

Are resources being redirected or are they new or additional (including FTE’s)*: New

Who is served and impact of not funding*: All ND Residents and communities. Not funding would result in a less than robust 250th US commemoration.

Authorization for .25 FTE (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	-	-	-	0.00	-	-	-	0.00
Total	64,814	-	64,814	0.25	67,244	-	67,244	0.25

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: With the transfer of the Lewis and Clark Interpretive Center and Fort Mandan from ND Parks and Rec to the State Historical Society, the agency gained 3.75 FTE. The position that was an .75 FTE turned over. Once the turnover occurred, we reevaluated the positions needed at the Lewis and Clark Interpretive Center and identified there was a need for a full FTE in an interpretive resource specialist position. Without having an additional .25 FTE authority, the agency was able to identify there were special funds with continuing appropriations under NDCC 55-02-04 from facility rentals that could be supplemented for the salaries of our facility rental manager position. This request would give this position a full 1 FTE authorization and fully fund this position.

Necessary resources for implementation (including FTE’s)*: Additional authorization and funding of a .25 FTE would be needed.

Are resources being redirected or are they new or additional (including FTE’s)*: Additional authorization and funding of a .25 FTE would be needed.

701 Historical Society

Agency 701

Who is served and impact of not funding*: The Heritage Center has a lot to offer the public when it comes to facility rentals. With our beautiful atrium to handy classrooms and an auditorium to entertain stage performance, this position is responsible for coordinating all events.

Paul Bruhn Historic Revitalization Grant (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

New Storage Facility (Priority: 9)

	2023-25 Agency Request	2023-25 Executive Recommendation	Total Estimated Project Costs	2025-27 Operating Costs	2027-29 Operating Costs
General	20,400,000	-	20,400,000	-	50,000
Federal	-	-	-	-	-
Special	-	-	-	-	-
Total	20,400,000	-	20,400,000	-	50,000

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY):

End Date (MM/DD/YYYY):

Description: EAPC architects and engineers completed an architectural facilities assessment and schematic design in 2020. Their assessment of the building reveals that both storage facilities are in "poor condition." EAPC's final report included cost estimates for constructing a new 70,000 square-foot storage building to consolidate the two buildings into one facility (office space, collections space, large open storage, two classrooms, a public exhibition area, and climate controls) on 10-acres of land at an estimated \$1.1M cost, for a total of \$10.5M. This newly constructed facility would better serve the public and protect priceless large state artifacts in much-improved environmental conditions and adequate storage space. The new site would also offer the public a museum exhibition area in the building to view these artifacts and provide the agency with a larger space to continue collecting valuable histories representing North Dakota for another 30 years into the future.

Extraordinary Repairs for Historic Structures (Priority: 5)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Ongoing Extraordinary Repairs	001	701-8100	70150	-	500,000	-	500,000	-	500,000	-
Total				-	\$500,000	-	\$500,000	-	\$500,000	-

Explanation / Justification: The State Historical Society of North Dakota manages 59 state historic sites with a total of 96 standing structures. Although we have requested funding for building improvements, there are unforeseen projects that are necessary. Several examples in our current biennium are a sink hole at the Chateau, and a vehicular gate at Fort Totten that was demolished by an uninsured impaired driver. There have also been mechanical equipment replacements necessary at sites, such as an asbestos abatement project and a window replacement in one building. We have completed Site Condition Reports for our major sites, these will assist to minimize the number of unanticipated repairs.

701 Historical Society

Agency 701

Explanation / Justification: We continue to modernize and repair state structures and sites so that they are welcoming and attractive to all ND residents and visitors. Only after our structures are inhabitable and usable can they be leveraged for purpose of interpretation of brought into the local economy for use as a business venture (adaptive reuse). Simply put, state owned facilities should be clean, safe, welcoming, and inhabitable. The same goes for state historic sites. These need to be fully welcoming to residents and visitors. Real toilets instead of portable toilets, gates, fence boundaries, all need to be welcoming and inviting. Our historic sites all serve 3rd space functions similar to parks and must be equally as welcoming.

Total									120,065		120,065		120,065

Justification: Under NDCC 46-05-01, the owner or publisher of each legal newspaper in the state shall send to the State Archives one copy of each issue of the newspaper. To properly preserve the newspapers, we currently have an employee taking pictures of every page of each newspaper that comes in to process to microfilm for proper preservation. These microfilm practices and equipment go back decades, which makes it difficult to find replacement camera and lighting parts.

701 Historical Society

Agency 701

Microfilming is the safest way to preserve our newspapers for now and future generations. The way newspapers are created and printed has changed dramatically. Currently, most publishers create a PDF version of the newspaper and electronically send a copy to the printers. Having digitization equipment, like a high performance color scanner and microfilm plotter, would result in time savings producing the highest level of quality of newspapers on microfilm. In addition, this equipment would allow the digital capture of large or irregular sized records.

Microfilm Plotter (Priority: 3)

701 Historical Society

Agency 701

Explanation / Justification: Funding is being requested as for the ND state committee on the commemoration of the 250th founding of the United States. The state commission will explore the topics of freedom, individual liberty, democracy and civic responsibilities by leveraging state funds for grant programs in communities across the state to explore their journey since 1776. We expect Federal funds to significantly impact this program.

Paul Gruhn Grant Program (Priority: 12)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

Statutory Authority

North Dakota Century Code Chapter 54-54.

Agency Description

The North Dakota State Legislature created the North Dakota Council on the Arts “to ensure that the role of the arts in the life of our communities will continue to grow and will play an evermore significant part in the welfare and educational experience of our citizens.” Our purpose is to bring that commitment to life.

WHAT WE DO -

We are a grant-making agency. Our role is to support creators, art providers, and participants. We use grants, convening, education, and partnerships to:

- Seed new ideas and activity
- Build resilient capacity for the long-term

To do this well, we must balance our investments:

- In organizations and communities, with artists and educators
- For broad geographic reach with deep engagement
- That sustain ongoing work and build new capacity
- For flexible response to ongoing and emerging needs

BELIEFS & VALUES -

Inspiring our mission are these deeply held beliefs:

- Art tells our stories – individually and as a state
- Art and culture, by and for the community, have the power:
 - To inspire and enhance lives
 - To build community and transform its spaces
 - To lift up, heal, and unite across divides

Everyone deserves equal access to a full, vibrant creative life, which is essential to a healthy and democratic society We hold ourselves accountable to the people of North Dakota and the trust placed in us. Because of this we:

- Pursue excellence and innovation in all things
- Pursue cultural equity throughout the state
- Engage our state through fair and transparent processes

Agency Mission Statement

We strengthen the creative capacity of North Dakota for all who live or visit here. . .honoring our cultural traditions, empowering excellence and innovation, and inspiring arts and culture opportunities for all.

Major Accomplishments

- 1 NDCA reinvention from solely a funding agency to community partner and economic driver of the arts Arts Across the Prairie: Placemaking in Rural North Dakota, NDCA's newest Statewide program began; a first-of-its-kind, statewide, public art program creating large-scale rural installations that reflect the unique history, landscape, and cultural heritage of the eight regions. This program is in collaboration with the ND-DOT (a first) and North Dakota Tourism/Commerce. The Legislature allocated \$1 Million to NDCA's Endowment Fund specifically for the purpose of funding maintenance in all eight regions from the interest earned. Recent funding for Region 1 at Writing Rock, a State Historical Society site, received through the National Endowment for the Arts 'Our Town' program, and the Andrist Charitable Fund to Divide County and Meadowlark Arts Council.
 - 2 Internal Capacity Growth • Shifted internal workflows and systems to better accommodate rhythms of grantees. • Converted to telework in response to COVID-19 while planning for office accessibility and visibility. • Creatively stretched staff capacity while providing hands-on education and experiences for students. • Hired new FTE Public Information Officer. • Launched a new, more user-friendly grants management system that facilitates data-gathering and sharing.
 - 3 Breaking Attendance and Building Audiences • Accessibility Convening Online in fall 2020 - with record attendance and modeled in several other states as well as at a National Endowment for the Arts Conference. • In 2021, NDCA moved its exhibition program to the 18th Floor Observation Deck at the Capitol with more visitorship viewing ND artists; • NDCA participated in a nationally telecast program, "Arts Across America", produced by the Kennedy Center highlighting diverse artists and styles; • NDCA Exhibit at the Heritage Center: Narrative Geometry: The Art of Warli by Vaishali Mohite featured Indian traditional folk painting, and then traveled to several ND sites.
 - 4 Awards and Recognition: • A \$60,000 Leveraging State Investment in Creative Aging grant for the Tiny Print Press Project. • The Folk Arts and Art for Life Programs were featured in the Smithsonian Institution's Folklife Magazine. • In the last year, NDCA stewarded the Densmore Lakota Song Repatriation project with Dakota Legacy with funds from The Bush Foundation.
 - 5 DEI and Special Partnerships • NDCA made significant progress toward cultural equity, accessibility, inclusion, and reaching communities traditionally underserved by the arts. • Tribal partnerships developed, including United Tribes Technical College and the Northern Plains Oyate. The Native American Development Center and First People's Fund of South Dakota partnered with NDCA to host "Train the Trainers" in February 2022. • Hosted a Curated Cohort (25 participants) in a three-month DEI training online and has progressed to incorporate accessibility into guidelines and application language for NDCA grant programs. Many participants served as panelists in FY23 grant reviews.
-

Critical Issues

-
- 1 State appropriations have kept up with NEA requirements but haven't shown investment for innovation and demand from citizens. NDCA's Creative Placemaking Initiative and expanded Art for Life Program are models being replicated in many other states and require additional program funding and visibility. This is also true in the Arts Ed, Community Arts, and accessibility programs.

 - 2 NDCA's operating line has been cut repeatedly over the past decade. Funding levels for operating must increase to accommodate inflation and use of new professional systems. Additional operating funds will support increases to several processes lines that affect NDCA's professional stature and build back operational funds due to prior cuts as well as inflation. This includes several contractors and consultants as well as new investments in technical and operational systems.

 - 3 NDCA's salaries line has stagnated for some time and increases are necessary to meet demand. Specifically, NDCA is seeking Increased salaries to support professional level of programs and workload that is currently in place: FTE Arts Program Administrator II, and a FTE Administrative Assistant III; three FT Staff will be retiring – compensation package payouts are needed, and increased wages for new hires and crossover training.

Performance Measures

NDCA will measure program performance in the 2023-25 Biennium against the following:

1. Progress on specific initiative work plans, including external funding as appropriate;
2. The number of fundable applications received in each cycle and ability to fully fund grantee excellence;
3. The local matching dollars each NDCA grant dollar generates as stated in grantee's final reports;
4. The individuals benefiting from each grant program with a subset of a) children, b) artists c) adults;
5. Final reports to determine underserved areas of the state and any increases in counties served

In addition to qualitative measures, valuable quantitative information is collected from all NDCA grantees as well the communities they serve often through site visits. With the help of Peterson Consulting over the last year, NDCA staff is learning to utilize the data being collected and create more-in-depth reports with the current online grant system, Foundant. Looking forward, a new technology initiative has been requested to build NDCA's evaluation capacity, with CRM software and related systems.

Program Statistical Data

NDCA's grants support four main program categories:

Institutional Support -

Institutional support programs comprise the largest volume of NDCA grant activity, primarily through federal funds from the NEA. Maintaining steady funding at the federal level is always a priority for NDCA. Those dollars are important to economic stability in communities across the state. Grant funds enhance an organization's ability to generate local match dollars, increase its ability to pay administrative and artistic staff, and impact quality of life in the community while enhancing the local economy.

During the last Biennium:

1. 110 grants supported institutions across all 8 of the state's regions
2. Grants leveraged an equal amount through cash-match requirements
3. While many grantees' planned professional development activities were cancelled, NDCA did fund several who were able to pivot to online learning opportunities.
3. Program dollars support creative partnerships with Humanities ND, Prairie Public Broadcasting, ND Parks and Recreation, Arts Midwest and many more to tell the ND story, promote ND artists and authors, artist-in-residence programs, and support vibrant communities

Arts in Education -

Arts in Education grants support K-12 arts education programming and partnerships. This is done primarily through Artist in Residence, Teacher Incentives, and professional development workshops for classroom teachers and teaching artists. Remaining funds support additional programs to increase art education opportunities across the state through professional development, community/education special projects, after school programs, and to promote and administer the arts education program.

During the last Biennium:

1. 24 Arts in Education Collaboration grants supported teachers and students in K-12 school districts across the state.
2. 22 artist residencies supported by NDCA took place in North Dakota schools.
3. The national Poetry Out Loud program reached 4,676 students and 77 teachers in ND's public and private high schools.

Community Services -

Community Arts Access grants are awarded to communities and individuals in less than 6,000 or to special constituencies in communities of all sizes. These programs were matched 1:1 through cash and in-kind contributions. Professional Development grants for artists, educators, and organizations are also a part of this program.

During the last biennium:

1. 48 grants supported programming in cities, towns and rural areas of North Dakota, this despite numerous cancellations and rescheduling made by grantees to accommodate participants' health and safety in the era of COVID.

Folk & Traditional Arts –

A major component of Folk and Traditional Arts is the apprenticeship grant program, which offers direct financial support for master traditional artists to teach apprentices, ensuring the continuation of traditional art forms. Some of the cultural traditions preserved include Norwegian Hardanger fiddle construction, Arikara beadwork, Bhutanese dance, West African storytelling, saddle making, Sioux hide tanning, and much more. Another project is Art for Life, which pairs local arts organizations with elder-care facilities.

During the last biennium:

1. Grants supported 46 master artist/apprentice teams throughout the state
2. 442 artworks were created/learned
3. 42 concerts, performances, readings, or demonstrations were produced
4. 107 artists were involved, 714 children were reached along with 2,454 adults benefiting

Summary

Art tells our stories – individually and as a state. Art and culture, by and for the community, have the power to inspire and enhance lives, to build community and transform its spaces, and to lift up, heal, and unite across divides. As a whole, NDCA averages more than 200 grants per year (with many more COVID-relief grants also awarded during the past biennium) in all 8 regions of the state and touching the lives of nearly every North Dakotan in ways big and small.

Explanation of Program Costs

The NDCA's biennial appropriation is comprised of three lines - salaries, operations, and grants. In the last biennium, expenditures broke out as follows:

1. Salaries: 23% of budget
2. Operations: 9% of budget
3. Grants (Programs): 68% of budget

These in turn support:

1. Ten Grant Programs - for artists (Fellowships, Folk & Traditional Arts Apprenticeships & Professional Development, arts organizations (Institutional Support & Special Projects), K-12 education (Arts in Education Residencies & Collaborations), residents of care facilities (Art for Life), North Dakota communities (Community Access Grants), and Partnership grants with numerous nonprofits and state agencies to address targeted issues in a way that multiplies impact and reach;
2. Six Additional Statewide Programs - Poetry Out Loud (the nation's annual arts education program), Statewide Arts Convening (biennial capacity-building for North Dakota) in conjunction with Main Street, Governor's Awards for the Arts (biennial celebration the arts in North Dakota), public exhibitions at the State Capitol, Accessibility training for organizations, and community fieldwork to build capacity; and
3. Strategic Initiatives such as Statewide Creative Placemaking, Native artist professional development training and the incorporation of DEI and Accessibility principals across the agency.

Program Goals and Objectives

NDCA pursues four long-term goals that drive programs aligned with Governor Burgum's five strategic initiatives:

1. Art and Creative Process for All: Working toward a North Dakota in which all can experience arts and culture – diversity of tradition, of genre, of exposure. All can participate. All are welcome.
2. Vibrant Communities: Regions, cities, communities, and networks across the state appreciate the power of the arts. They use that power to enhance the vitality of North Dakota. They celebrate the vibrant communities that result, each with arts and culture at their core.
3. Thriving Arts Ecosystem: NDCA, communities, organizations, artists, and educators thrive in an interdependent, mutually supported, system. Each has resilient capacity aligned for impact.
4. Excellence and Innovation: NDCA models excellence and innovation for the field. It sustains its gains through self-reflection, evaluation and continuous improvement. Its innovative partnerships open doors to greater influence and impact, increase its efficiency, and leverage its resources. 3) Promote arts learning by advancing the arts in Pre-K through 12 education, and by providing lifelong learning in and through the arts in North Dakota.

Each goal includes 3-5 categories of activity encompassing the following, with specific objectives to be pursued over at least five years:

1. Cultural equity, accessibility, and inclusion for all, with special attention to rural and geographically underserved communities.
2. Creative placemaking coupled with community development and celebration of the arts.
3. Capacity-building at the policy-level, in the arts community, for organizations, for artists, and for creative arts education.
4. Reinvention toward a culture of excellence and innovation, built on transformative relationships, and effective allocation of internal resources.

NDCA's operating model is based on granting that is quite labor-intensive for a small staff. The programs must be as efficient and effective as possible both for NDCA staff and for those in the field.

Art Program Administrator (Priority: 01)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	156,222	-	156,222	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	156,222	-	156,222	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Primary duties of a new Arts Program Administrator will include:

* Facilitating three statewide community grant programs - Community Arts Access, Special Projects, and Professional Development.

* Updating and maintaining NDCA’s online grants system, Foundant, annually (for new FY grant cycles) and as needed throughout the year. Will also serve as NDCA’s primary liaison with Foundant and main point of contact for staff concerning Foundant questions and issues, and will provide staff training as needed.

* Serving as NDCA’s Wellness Coordinator.

In addition to grant programs, services and programs offered by NDCA have grown to include work in the areas of Accessibility; Diversity, Equity, and Inclusion; Statewide placemaking in rural communities (Arts Across the Prairie initiative); Native programming in schools; after school programs; Repatriation efforts; and Agency Partnership projects, etc.. This is in direct response to constituent needs and ongoing societal issues, but it has strained already limited resources. Additionally, NDCA’s Executive Director has been focused on grant writing and fundraising related to Arts Across the Prairie.

NDCA is a small but mighty state agency that deserves the resources required to continue providing high levels of service to the state.

Necessary resources for implementation (including FTE’s)*: The resources necessary for this request are 1 FTE and increased general funding of \$148,222 to hire an Art Program Administrator II.

Are resources being redirected or are they new or additional (including FTE’s)*: This request is for additional resources.

Who is served and impact of not funding*: NDCA’s grantees and staff will be directly served and positively affected by the addition of a new grant program officer in the form of this new Art Program Administrator position.

Not funding this position keeps all staff overworked by coverage of multiple programs, undervalued, and constantly reactive rather than responsive, which is neither desirable nor sustainable.

Administrative Assistant (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	136,992	2,500	139,492	1.00	144,627	2,500	147,127	1.00
Special	-	-	-	0.00	-	-	-	0.00
Total	136,992	2,500	139,492	1.00	144,627	2,500	147,127	1.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In its entire history, NDCA has never had a ‘regular’ administrative assistant FTE. This is no longer tenable. As the breadth and depth of services, programs, and grant opportunities has grown tenfold, and NDCA increases its offering beyond solely that of a granting agency, and administrative assistant is a justified position as part of our request.

The current professional staff need assistance in order to do their jobs and the expected highest level, and be able to travel the state, meeting and listening to communities and current stakeholders. An individual in this position will have job responsibilities to support the entire staff (Executive Director, Program (Grant) Officers, and Fiscal Officer.

NDCA is a small but mighty state agency that deserves the resources required to continue providing high levels of service to the state.

Necessary resources for implementation (including FTE’s)*: The resources necessary for this request are 1 FTE and increased general funding of \$128,992 to hire an Administrative Assistant III.

Are resources being redirected or are they new or additional (including FTE’s)*: This request is for additional resources.

Who is served and impact of not funding*: NDCA’s grantees and staff will be directly served.

Externally, Statewide constituents are hugely impacted by this position – a knowledgeable voice to answer many general questions about the programs NDCA offers, how to apply via the online system or refer callers to program officers for more in-depth help. And, most importantly, be a listener.

Internally, the impact has been felt by current staff due to the lack of this position over time. The administrative burden has grown 10-fold as additional funds have been received, the level of reporting has increased evident by the higher number of grants, and special projects NDCA is now involved in.

If not funded, NDCA will not be able to thrive as we know we could. We face burnout and continuing on an unsustainable path in terms of workload. It is not acceptable for a State Agency to not have an administrative assistant.

Operating Restoration, Enhancements, & Inflationary Increases (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	111,048	-	111,048	0.00	111,048	-	111,048	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	111,048	-	111,048	0.00	111,048	-	111,048	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDCA is facing inflationary increases across its operating budget. Coupled with prior biennium cuts and new costs in some areas, NDCA’s operating budget needs shoring up.

This request seeks to:

- * Increase Travel budget by \$35,000 - inflationary, restoration, and new
- * Increase Printing budget by \$500 - inflationary
- * Increase Postage budget by \$150 - inflationary
- * Increase Insurance by \$2,000 - inflationary
- * Increase Rentals/Leases - Building/Land budget by \$14,898 - restoration
- * Increase Professional Fees & Services budget by a total of \$58,500 as follows:
 - ** \$5,000 for Statewide Arts Convening (inflationary),
 - ** \$1,500 for the Governor’s Awards for the Arts (inflationary),
 - ** \$3,000 for grant panelists (inflationary),
 - ** \$24,000 for a Contracted Exhibition Coordinator to assist with traveling exhibitions and trainings for statewide Art for Life projects, Capitol Exhibitions installations, and cross agency-programming (new), and
 - ** \$25,000 for professional videographer and video production to interview, record and document a variety of programs given our commitment to measurement and evaluation (inflationary, restoration, and new).

Necessary resources for implementation (including FTE's)*: The only resource necessary for this request is increased general funding of \$111,048.

709 Council on the Arts

Agency 709

No FTEs are needed for this request.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for additional resources.

Who is served and impact of not funding*: NDCA and its constituents are best served by the council having adequate operating funds that keep pace with inflation and address needs and priorities.

If not funded, NDCA would be set-back yet again in terms of what we can accomplish in areas paid from our operating line, For example:

- * We would have to scale back offerings such as the biennial statewide arts convening and Governor’s Awards for the Arts.
- * We would not be able to provide the same level of service to the public via exhibitions and likewise to our elders and their families through the Art for Life program.
- * We would not be able to engage professional videographer services to interview, record and document a variety of NDCA and grantee activities. Visuals bring our work to life and inspire others across the state in terms of what is possible by telling the story of the impact of the arts. Such visibility is a key goal for the organization.
- * Our commitment to measurement and evaluation would be impacted as our ability to obtain and evaluate our activities and data would likely be affected.

Leave Payout for Retiring Staff (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*:

Necessary resources for implementation (including FTE's)*:

Are resources being redirected or are they new or additional (including FTE's)*: NDCA would be unable to meet its obligations

Who is served and impact of not funding*:

Strategic Planning Consultant (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	40,000	40,000	0.00	-	40,000	40,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	40,000	40,000	0.00	-	40,000	40,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: A current strategic plan is a required to be eligible to receive funding from the National Endowment for the Arts (NEA). During its most recent planning process in 2020, NDCA moved from a 3-yr plan to a 5-yr plan. The next strategic planning process will begin in 2024.

This request seeks to:

* Provide \$40,000 within NDCA’s operating budget specifically for strategic planning services that will be needed in the 23-25 biennium.

Necessary resources for implementation (including FTE’s)*: The only resource necessary for this request is increased general funding of \$40,000.

No FTEs are needed for this request.

Are resources being redirected or are they new or additional (including FTE’s)*: This request is for additional resources.

Who is served and impact of not funding*: All residents across North Dakota, from young children to elders, benefit from access to the arts.

NEA funding makes up nearly 1/2 of NDCA’s total budget! If not funded, NDCA would not have resources to engage a strategic planning consultant to develop our next 5-yr plan. NDCA would then risk losing its NEA funding.

Arts Across the Prairie Initiative (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	210,250	100,000	310,250	0.00	193,000	100,000	293,000	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	210,250	100,000	310,250	0.00	193,000	100,000	293,000	0.00

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDCA’s Arts Across the Prairie (AAP) Initiative envisions eight large scale public art pieces to be designed, created, and installed in ND, one in each of the state’s regions.

This request seeks an increase of \$310,250 in general funds for the AAP Initiative in the 23-25 biennium to:

- * Increase NDCA travel budget by \$17,250 for In-state travel by contracted Arts Across the Prairie (AAP) field manager and staff travel specifically related to AAP.
- * Increase NDCA’s 21-23 insurance budget by \$48,000 related to AAP.
- * Increase NDCA’s 23-25 Operating Fees & Services budget by \$100,000 for required permits for AAP (\$16,000) and stipends to ND artists for trainings to take place on site with each of the eight artists selected for AAP (\$84,000).
- * Provide \$145,000 for Professional Fees & Services related to the AAP initiative during the 23-25 biennium for (1) A contracted field/site manager for to provide oversight for all sites regarding installation/maintenance; work with stakeholders and communities, local government entities regarding permits, as well as selected artists, contractors, and fabricators. (\$90,000), (2) Videographer/photographer to document AAP Process. (\$30,000), and (3) Consultant to evaluation AAP Program. (\$25,000).

Necessary resources for implementation (including FTE’s)*: The only resource necessary for this request is increased general funding of \$310,250.

No FTEs are needed for this request.

Are resources being redirected or are they new or additional (including FTE’s)*: This request is for additional resources.

Who is served and impact of not funding*: Opportunities to experience art and culture benefit all. The completed AAP installations will draw North Dakotans and visitors to the "off the beaten path" locations of the artwork, prompting them to visit and explore unique landscapes and places that may not otherwise be on their radar.

If not funded, progress on the AAP Initiative will be negatively impacted.

Technology Needs (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	3,400	58,000	61,400	0.00	51,400	10,000	61,400	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	3,400	58,000	61,400	0.00	51,400	10,000	61,400	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDCA is looking to further enhance aspects of its operation through use of technology. This includes:

- (1) the purchase of a video projector and screen to be installed in NDCA’s downtown office to allow classes, workshops, and meetings to be available and offered in a professional manner,
- (2) increased organizational service contracts (rather than individual accounts) for software services Zoom and Mail Chimp to provide greater capacity for larger webinars, recordings, and increased focused outreach, and
- (3) a CRM software program. NDCA is committed to increased data collection and evaluation as part of its strategic plan. A CRM program will help analyze grantee and community data in order to enhance accessibility and inclusion across the state.

This request seeks to:

- * Increase IT Software/Supplies by \$51,400 for the 23-25 biennium.
- * Provide \$10,000 in IT Equipment Under \$5,000 for the 23-25 biennium.

Necessary resources for implementation (including FTE’s)*: The only resource necessary for this request is increased general funding of \$61,400.

No FTEs are needed for this request.

Are resources being redirected or are they new or additional (including FTE’s)*: This request is for additional resources.

Who is served and impact of not funding*: NDCA staff and constituents will be better served by the technology items requested.

709 Council on the Arts

Agency 709

If not funded, NDCA will continue with its current technologies but will be missing out on an opportunity to enhance its operation through the use of more appropriate licensing levels, new hardware for more professional presentations, and new software to

Maximizing Visibility of Impact (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	15,000	-	15,000	0.00	15,000	-	15,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	15,000	-	15,000	0.00	15,000	-	15,000	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDCA increases visibility of grants and services via social media, print, and online mechanisms that promote the impact, breadth, and value of the arts statewide.

This request seeks to:

* Provide \$15,000 within NDCA's operating budget specifically for marketing initiatives to expand awareness of the opportunities and services available through NDCA.

Necessary resources for implementation (including FTE's)*: The only resource necessary for this request is increased general funding of \$15,000.

No FTEs are needed for this request.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for additional resources.

Who is served and impact of not funding*: Opportunities to experience art and culture benefit all North Dakotans.

If not funded, NDCA will continue its present efforts, but will not have funding to leverage targeted media as a way to further expand awareness and opportunity.

Accessibility (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	16,600	-	16,600	0.00	16,600	-	16,600	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	16,600	-	16,600	0.00	16,600	-	16,600	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: All North Dakotans are better served when we, as a state agency, and our grantees learn about and implement measures that make our offerings more inclusive and accessible. From addressing physical access, to the needs of those with hearing or visual challenges, to sensory-friendly performances, and the many other ways to make participation in and interaction with the arts more inclusive, equitable, and diverse, we must be proactive and lead by example in this area.

This request to:

* Provide \$9,100 in Operating Fees and Services for NDCA to continue providing a regular on-line Accessibility Convening.

* Provide \$7,500 for Accessibility Services (ASL, closed captioning, and interpreters) for events beyond Accessibility Convening.

Necessary resources for implementation (including FTE's)*: The only resource necessary for this request is increased general funding of \$16,600.

No FTEs are needed for this request.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for additional resources.

Who is served and impact of not funding*: All North Dakotans are better served when we, as a state agency, and our grantees learn about and implement measures that make our offerings more inclusive and accessible. While compliance with Accessibility and discrimination laws is required, it is also simply the right thing to do.

If not funded, many small grantees would be left on their own to learn about matters of accessibility and arts patrons may miss out on opportunities to participate in ways that meet their needs. Legal ramifications are also a possibility.

Statutory Authority

North Dakota Century Code Title 20.1.

Agency Description

The North Dakota Game and Fish Department manages publicly the state of North Dakota’s fish and wildlife resources for the benefit of the public. The Game and Fish Department consists of five major divisions, as follows:

- Administrative Services provides policy, planning, and support services and is responsible for all game and fish licensing.
- Fisheries manages the state’s fisheries.
- Enforcement provides enforcement of the laws and regulations governing the use of the state’s wildlife resources and recreational waters.
- Conservation and Communication informs the public of rules, regulations, and guidelines for safe, lawful hunting, fishing, trapping, and boating.
- Wildlife provides for the management of wildlife resources in the state.

Agency Mission Statement

The mission of the North Dakota Game and Fish Department is to protect, conserve and enhance fish and wildlife populations and their habitats for sustained public consumptive and appreciative use.

Major Accomplishments

-
- 1 Continued development and enhancement of 400-plus productive fishing waters across the state; partnered with landowners and local entities on providing fishing opportunities; continued a state/federal partnership allowing for some of the highest fish production stocking in North America.

 - 2 The Department’s Private Land Initiative (PLI) worked with nearly 2,500 private landowners to provide 800,000 acres of private land to hunters through the well-known Private Lands Open To Sportsmen (PLOTS) program. Efforts to increase habitat and expand access to 1M acres of quality habitat are ongoing. PLI developed new habitat on private land enrolled in PLOTS and through conservation partners, soil conservation districts, USDA programs, Outdoor Heritage Fund, Meadowlark Initiative and other partnerships.

 - 3 Implemented electronic, paperless licensing and lotteries and continue to expand digital capabilities.

 - 4 Improved efforts to restrict aquatic nuisance species utilizing automated technology.

 - 5 Expanded education and outreach to the public on Chronic Wasting Disease (CWD) by forming a task force and updating the Department’s CWD plan utilizing the best science available.

 - 6 Continued increase in youth participation in shooting sports programs.

 - 7 Increased emphasis on initiating hunter and angler recruitment, retention, and reactivation efforts.

 - 8 Expanded on-line hunter education opportunities to accommodate demand and to increase efficiency in the certification process.

 - 9 Partnered with local municipalities along Lake Sakakawea and Lake Oahe to increase boat ramp accessibility.

Major Accomplishments

- 10 Expanded the shooting range grant program to fund larger shooting range projects throughout the state.
- 11 Maintained 235 wildlife management areas and developed new acquisitions and donations.
- 12 Continued growth mindset with fish and wildlife research to increase management capabilities.

Critical Issues

- 1 Hunter and angler recruitment, retention and reactivation
- 2 Minimizing the risk of spread of Aquatic Nuisance Species within the state
- 3 Wildlife disease (Chronic Wasting Disease, pneumonia, Epizootic Hemorrhagic Disease)
- 4 Deer and pheasant populations unable to meet public demand
- 5 Decreasing hunter numbers/license sales
- 6 Habitat loss
- 7 Access (hunter, angler, boater)
- 8 Landowner/sportsmen relations
- 9 Lack of ability to provide conservation easements
- 10 Lack of tools to provide habitat/access
- 11 Need customer demographics
- 12 Secure USFWS hatchery funding and inclusion of recreational fishing in their mandates
- 13 Impacts from water management decisions affecting fish & wildlife
- 14 Lack of shooting ranges within 50 miles of some populations greater than 5,000
- 15 Becoming more difficult to find partnerships to maintain fishing access sites
- 16 Create additional Agriculture partnerships
- 17 Education and outreach to newly elected legislators and leadership positions

Performance Measures

ADMINISTRATIVE SERVICES

- 1. Successful completion of state and federal audits.
- 2. Ensure compliance with laws, regulations, and audit requirements.
- 3. Maximum use of available federal funding for department programs.
- 4. Adequate office, shop and office facilities at all major headquarters.

5. Efficient, up to date technology systems for the agency.
6. Adequate secretarial and telephone support for the agency.
7. Efficiently issue hunting, fishing and boating licenses in North Dakota.
8. Provide accurate, timely and quality customer service
9. Oversee the fiscal management of the Department (revenue, expenditures, fund balance)

FISHERIES

Angler participation metrics –

1. Total fishing license sales – 210,000
2. Total angler effort (days) – 1.7M.
3. Active resident angler participation - 132,000
4. Resident adult participation – 25%
5. Angler satisfaction - High

ENFORCEMENT

1. Maintain an enforcement database to track calls for service and violations.
2. Calls reporting violations are responded to in a timely manner and documented in a central reporting system.
3. Boating related fatalities less than 5 per 100,000 registered boats per year, annual reportable accident rate of less than .5% of registered watercraft.
4. Regulate and monitor Guides & Outfitters as well as all other department issued commercial licenses for compliance.
5. Monitor and investigate license fraud.
6. Identify and apprehend persons in violation within our jurisdictional authority.
7. Through enforcement of game and fish laws, rules and regulations, add to the department's ability to manage wildlife life and fisheries within the state.
8. Administer the Boat Safety Program - Provide grants to county law enforcement to assist in the promotion and enforcement of boat and water safety on their local recreational waters.

CONSERVATION AND COMMUNICATIONS

1. Increase public awareness about wildlife management, conservation, wildlife species and the relationships of important habitats to these species. Develop in the public a wildlife stewardship mindset and the ability to make informed decisions, which benefit wildlife and habitat in North Dakota.
2. Introduce and inform North Dakotans about rules, regulations, management and ethics for safe hunting, fishing and boating, as well as recruit, retain, and reactivate hunters, anglers, and trappers.
3. Manage nongame species in a manner that ensures populations will remain healthy and viable by working with private landowners, conservation agencies/groups and the general public
4. Coordinate resource-planning activities with other state and federal agencies, policymakers, and the private sector in order to minimize fish and wildlife habitat losses associated with development or construction activities on public and private land.

WILDLIFE

1. High hunter satisfaction and hunting quality as a result of sufficient populations of big game, waterfowl, upland game, and furbearer species.
2. Reasonable access to quality hunting opportunities on both private and public lands of North Dakota.
3. High hunter recruitment and retention with relatively low level of conflicts with private landowners associated with wildlife damages, noxious weeds, and hunters.
4. High landowner satisfaction of those landowners taking part in the Department's private land access program.

Program Statistical Data

ADMINISTRATIVE SERVICES

Over 800k fishing, hunting, & boating licenses are distributed & processed annually. 100% online licensing, lotteries, watercraft. Over 289,931 customers served. In lieu of tax payments are made as required by law. Federal funding administrative requirements are met.

FISHERIES

Approx 145k resident & 60k non-resident adults purchase licenses in ND annually. Collectively, these anglers fish approx 1.6M days in ND waters. Anglers also generate \$1.7B (including more than \$39M in state tax collections) in gross business volume annually. More than 80% of all angler's target walleye & overall angler fishing satisfaction remains high.

Over the past 10 yrs, ND's fishing waters have been stocked annually w/ approx 1M northern pike, 10M+ walleye, 400k trout & salmon and supplemental stocking of crappie, bluegill, largemouth & smallmouth bass, channel catfish & muskie.

Fisheries mgmt surveys are conducted on many of the 400+ waters annually.

The Development program provides facilities for nearly 70k registered boat owners & facilities for over 200k anglers.

720 Game and Fish

Agency 720

ND's Aquatic Nuisance Species program has led to an increase in statewide inspections of watercraft, development of some protocol & infrastructure for watercraft cleaning stations, intensified educational efforts & increased monitoring.

ENFORCEMENT

The Enforcement division strives to reduce illegal activities that could adversely affect game & fish populations. The division should attend 150-300 public meetings and contact between 40k & 50k people a biennium. Assistance should be given to the public & landowners & all landowner complaints should be investigated.

CONSERVATION AND COMMUNICATIONS

Provided over \$2M in the last 5 yrs to construct shooting complexes in Williston, Bismarck, Velva, Watford City & other locations

Provide \$110k annually to community shooting ranges

Produce & distribute weekly news & press releases to reach 170k weekly & 190k daily newspaper readers, plus radio, television, national/regional magazine audiences. Website views 8.5M/yr. Social media followers 38k, website users 1.2M, a blog & podcast

Produce & distribute weekly audio news releases to state radio stations

Certify 4k-5k hunter education students per year; includes online hunter education

Train & support 800 volunteer outdoor education instructors

Administer the Boating Basics Course to 1k-1,500 annually

Coordinate & manage 10-12 major events annually using volunteers to deliver programs to over 30k youth and adults

Produce 10 issues annually of ND Outdoors magazine for 31k subscribers

Handle 35k telephone calls per year & respond to 13k mail requests

Broadcast 52 television news features & 52 webcasts per year

Design & manage a Dept website that averages more than 708k pageviews per month

Conduct environmental reviews & provide technical input to mitigate impacts on approx 500 development projects annually

Respond to approx 1k phone calls, emails or walk-in inquiries on development projects, regulatory-related issues, or specifics pertaining to rare & declining fish and wildlife

Participate in about 100 interagency or project-related meetings annually to discuss environmental issues assoc w/ developmental projects or habitat loss

Grants & programs designed to educate & engage citizens, boost participation, establish habitat conservation demonstrations, & aid in enjoyment of nongame resources are provided. The workshops, informational meetings, & personal contacts reach over 1k individuals per year

Reach 20k customers during the Department's state fair effort

Organize & coordinate annual events to recruit, retain, and reactivate hunters, recreational shooters, trappers, anglers, and boaters

In 2021, National Archery in the Schools program included 1,121 participants statewide & ND High School Clay Target League participants were 2,738

WILDLIFE

Over 350k user days are spent hunting big game, resulting in annual expenditures of over \$55M. Approx. 65k deer hunters will harvest approx. 50k deer. The Dept expects to issue 400+ moose permits, 550+ elk permits, 4-8 bighorn permits, and approx. 1,700 pronghorn licenses. The pronghorn season re-opened w/ a limited season in 2014 & the population has been continuously increasing. Approx 46k waterfowl hunters will spend 280k days and \$59.5M harvesting 370k ducks & about 240k geese. About 50k upland bird hunters will spend over \$30.7M and over 240k days harvesting an estimated 38k gray partridge, 44k sharp-tailed grouse and about 250k pheasants each year. In an average year fur sales total a minimum of \$900k in ND, but international fur markets have weakened considerably in the last few years & this number is expected to continue to decline. Full & aggressive implementation of the private land initiatives will help maintain or increase recreational opportunities. About 1.5M days are spent hunting each year, generating direct expenditures of approx \$187M annually.

Explanation of Program Costs

ADMINISTRATIVE SERVICES

Salaries for 26 Full-Time Equivalent (FTE) positions and temporary staff.

Operating costs include, but are not limited to, travel, information technology costs, printing/tags for the licensing section, postage, utilities, insurance, legal fees, buildings and grounds maintenance supplies and repairs.

Extraordinary repairs to buildings and grounds for Department owned facilities and shops statewide. In Lieu of Tax payments for all Department lands.

Grants and agreements. A special line for Department Grant-Gift-Donations.

FISHERIES

Salaries for 25 FTE positions. Temporary salary funds for seasonal workers. Operating costs for fish production and distribution, fishery research and surveys, fishing area and boating facility development and maintenance, dam repairs, grant to Garrison Dam National Fish Hatchery for O&M, local entities for boating and fishing access facilities, grant to ND Parks and Recreation to support the operation of boating access facilities in state parks, the Save Our Lakes program, and the Aquatic Nuisance Species special line. Federal Funds are 64% of the Fisheries budget.

ENFORCEMENT

Salaries for 39 FTE and temporary employees. Travel is the major expense. District game wardens drive almost 2M miles per biennium using State Fleet vehicles. Vehicle changeover installation is not part of state fleet rental rates. Other costs are, but are not limited to, professional supplies such as in car video systems, mobile

data computer consoles, binoculars, firearms, boating related items and uniforms. Equipment is replaced at a rate to maintain reliability and cost efficiency. Grants for sheriff's departments and dive rescue teams for recreational boating safety and search and rescue work. The Missouri River Enforcement Special Line for salaries and operating expenses of department employees coordinating or performing Missouri River law enforcement activities and for grants to local law enforcement agencies which are funded 50% with US Coast Guard boat safety federal funds.

CONSERVATION & COMMUNICATION

Salaries for 23 FTE and temporary employees. The division's operating costs are for the communication section, education section and conservation section. Some programs include aquatic and hunter education, boating education, youth mentoring program, national archery in the schools program, ND Outdoors magazine, ND Outdoors weekly television program, web page management, supplying publications to the public, environmental reviews, work involving the Endangered Species Act, etc. Also, natural resource related reviews and recommendations are provided to private and government entities. Federal funds are used for shooting range grants throughout the state. Other grants are State Wildlife Grants, Pollinator Plots Program, expenditures to increase or enhance the Recruitment, Retention, and Reactivation of hunters, anglers, trappers, boaters, and recreational shooters of all ages, genders, and abilities. Also, includes 2 special lines: Shooting Sports Grant Program and Nongame Wildlife.

WILDLIFE

Includes salaries for 51 FTE. Temporary salary funds are requested for seasonal workers.

Operating costs, include but are not limited to, Department managed lands, wildlife surveys and investigations, grants to organizations on cooperative projects. Extraordinary repairs (e.g. fences, roads, water control structures) on department wildlife management areas (WMA) statewide. Equipment items. Land acquisitions of small tracts near wildlife management areas, possibly in-holding or round-outs that may come up during the biennium. Grant to reimburse the State Veterinarian for costs related to oversight of farmed wildlife producers and the administration of wildlife propagation permits.

The Private Land Habitat and Deer Depredation special line's largest expenditure is landowner payments for Private Land Open to Sportsmen (PLOTS) program allowing walk in access to the public. It also includes costs for big game depredation.

Other Special Lines are: Noxious Weed Control, Lonetree, and Wildlife Services.

Federal funds are 62% of the Wildlife budget and are from various federal agencies, the majority is from US Fish & Wildlife Service.

Program Goals and Objectives

ADMINISTRATIVE SERVICES

To provide Department policy making, planning, and coordination of programs. To have support services for the entire Department. Maintain and monitor all fiscal functions and human resource management of the department. To provide game and fish licensing as established by the Legislature and Governor's proclamations. To make in lieu of tax payments for Department lands as required by law. Maintain and provide guidance so federal administrative requirements are met.

FISHERIES

The mission of the Fisheries Division is to provide diverse and valued fishing opportunities for public enjoyment while safeguarding the fishery resource. Further,

- Maintain and enhance angling opportunities for recreational fishing by application of scientific management, survey, research and culture techniques.
- Optimize fishing and boating oriented recreation activities on North Dakota's lakes, rivers and reservoirs with boating and shore fishing facilities.
- Provide hatchery produced fish needed to stock North Dakota waters.
- Preserve and enhance fisheries habitat in North Dakota.
- Protect North Dakota waters from aquatic nuisance species

ENFORCEMENT

To enforce the provisions of Title 20.1 of the North Dakota Century Code, the Governor's proclamations, and Department regulations to assure an orderly and controlled harvest of wildlife populations and to protect the wildlife resource and the rights of all citizens. To ensure reasonably safe boating use of North Dakota's recreational waters to save lives and protect property. To provide law enforcement on Department Wildlife Management Areas for public safety and intended uses. Provide assistance to other Divisions within the department, to achieve Department objectives. Assist other law enforcement agencies, tribes, and departments within the state when called upon. Perform functions as necessary within the State Emergency action plan. Provide grants to county law enforcement to assist in the promotion and enforcement of boat and water safety on their local recreational waters.

CONSERVATION AND COMMUNICATIONS

- Inform North Dakotans about rules, regulations and guidelines for safe, lawful hunting, fishing, boating and trapping experiences.
- Educate people about outdoor ethics, principles of wildlife management and ecological relationships.
- Enlist and train volunteer instructors in this effort.
- Recruit, retain, and reactivate hunters, trappers, anglers, boaters, and recreational shooters through education and awareness of outdoor opportunities
- Create a stewardship conscience in people and promote the sustainable use of our natural resources,
- Provide assistance programs and incentives for individuals and groups to protect and conserve habitat and enjoy wildlife.
- Provide project review and recommendations to developers in an effort to avoid, minimize, and mitigate impacts to important wildlife habitat in North Dakota.
- Stem declines of our state's rare and declining "Species of Conservation Priority" through implementation of the North Dakota's State Wildlife Action Plan (SWAP).
- Coordinate Department activities with state, federal and private interests.
- Maintain Department habitat base information.
- Formulate Department responses on activities which affect fish and wildlife resources in North Dakota.

-Implement the Outdoor Wildlife Learning Sites (OWLS) program and the Watchable Wildlife Project.

WILDLIFE

This program includes Department responsibilities for the management of wildlife in North Dakota. The manipulation and distribution of wildlife and their habitat on Wildlife Management Areas (approx. 220,000 acres) are accomplished to maintain acceptable populations of these species to provide optimal recreational opportunities for both consumptive and non-consumptive users. There are about 100,000 resident hunters in North Dakota. This program includes the Private Lands Initiative (PLI). It is designed to improve wildlife habitat and foster better working relationships between the agricultural and wildlife communities. The goal of 1,000,000 acres of public hunting access on private land by 2009 was reached two years early in September 2007. The PLI fell below 1M acres due to CRP loss in the state. In 2017, a survey was conducted to ask the users if they wanted quantity over quality. The users chose quality, and quality habitat is more expensive to create and get access too. Thus, PLI has worked to improve existing acres in the program and attract high quality acres while trying to maintain above 800,000 acres. PLI is the Departments main program for implementing the Department's goals on private lands statewide.

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Recovering America’s Wildlife Act (RAWA) presents a new funding opportunity for the ND Game and Fish Department (NDGFD) which is different than traditional funding in which licenses and fees paid by hunters, anglers, shooters, and other sources are used as match for the U.S. Fish and Wildlife Service’s Wildlife and Sport Fish Restoration program. RAWA could potentially invest \$1.4 billion annually in fish and wildlife conservation nationally. If passed by Congress, an estimate of over \$14 million annually could ultimately be allocated to North Dakota, the largest investment in state-based fish and wildlife conservation in history. This funding stream was specifically developed to address the needs of rare and declining Species of Conservation Priority (SCP) and their habitats which are identified in each state’s Wildlife Action Plan. RAWA funding will require a 25% match from states; however, one unique attribute of RAWA is that eligible match can be from any federal agency except the Department of Interior and Agriculture. In addition, RAWA is also eligible to be used for ANS prevention which is a very important issue to ND citizens.

We are requesting approval of, and legislative authority for, RAWA funding as a new Special Line appropriation. The flexibility of a Special Line will most certainly be needed to effectively implement the various RAWA components and nimbly shift between Operating and Grant lines for activities conducted “in-house” and through contracted services which require Operating funds or having the work completed by conservation partners and universities using Grant funds. The purpose and outcome of certain RAWA activities could frequently shift considering the specific method and party doing the work; subsequently, requiring a shift in the funding line.

Program Description:

In 2023-25, based on the latest information, we estimate the NDGFD will receive \$22,775,000 in Federal funds. (Federal funding is estimated to ramp up to \$14M annually by approximately fiscal year 2026.) The match for some expenditures are provided by the NDGFD and some are from partners and indicated below.

Research/Surveys/Inventories are needed to gain knowledge and insight on the status and population trends of new and existing Species of Conservation Priority. The majority of this work initially would be done by universities (Grant dollars) or by contracted consultants (Operating funds) who have expertise in inventorying/surveying for specific and unique species or guilds. As systematic surveys are developed, a shift to some “in-house” surveying by NDGFD staff could occur. In regard to research needs, a year or two of coordination with external species experts, universities, and research units will be needed to identify, frame up, and initiate priority research projects. Therefore, as time goes on the proportion of this particular component could grow.

- Funding requested: \$1,500,000 Grants & \$300,000 Operating (100% federal funds; match from partners)

Habitat (Enhance/Restore/Protect) is the most crucial element impacting species diversity and sustainability. It is this element NDGFD and conservation partners need to address most quickly to sustain game, nongame, and SCP populations. This can only be accomplished by increasing important new diverse habitat while enhancing and protecting existing native habitat across the state. Because North Dakota's landscape is comprised of approximately 94% private land, the bulk of this work and funding would be directed to private landowners and their operations. Extensive funding and manpower to work with ag producers and ranchers to develop, enhance, and protect habitat through new and existing programs will be required to make substantive gains. This would be accomplished through a ramp up of both NDGFD Private Land Initiative (PLI) and conservation partners' programs and staffing. Operating funds would be used for landowner cost share and agreement payments made by NDGFD through our "in-house" habitat programs, while Grant funds would be used to provide our conservation partners with funding to augment and match their or other grant funding for additional habitat delivery work.

- Funding requested: \$12,243,578 Operating - In-house PLI habitat program payments/cost share landowner payments (75% federal funds; 25% match from NDGFD)
- \$2,500,000 Operating - midterm grassland conservation agreement via PLI (75% federal funds; 25% match from NDGFD)
- \$7,000,000 Grants for conservation partner habitat program delivery (100% federal funds; match from partners)

Communication and Marketing is another component of SCP management. Making the public aware of threats and opportunities associated with these species' life cycles, as well as habitat programs available to address their declines, is the role of the NDGFD's Communications Section. As the Section is already providing this function at very high capacity, only a small addition to their budget is being requested, at least initially.

- Funding requested: \$80,000 Operating (75% federal funds; 25% match from NDGFD)

Staffing increases will be necessary to put RAWA funding to work whether it be for research, surveys and habitat improvements. As mentioned above, a large proportion will be used to pay for agreements with private landowners and producers. An increase of five (5) PLI Biologists will be required to manage and deliver this upscale in habitat programs, as this influx of RAWA funding will more than double the existing PLI (Line 70) budget.

Managing research projects, conducting surveys, providing species expertise, and implementing features of the State Wildlife Action Plan is the responsibility of Conservation Biologists. We believe adding four (4) new biologists to the Conservation Section will be needed to address the expansion of this core aspect of RAWA funding.

One (1) additional Administrative Staff Officer, as well as one (1) Account Budget Specialist, are warranted to manage increase contracts, grants, budget preparation, audits, and additional accounting transactions.

In addition to these eleven (11) new FTE positions, there will be a need to address field season surge of all "in-house" aspects of SCP management. Providing temporary staff funding to hire four (4) temporary seasonals to assist full-time staff each year for a four-month duration would be prudent.

- Funding requested: \$2,352,102 Salary & Benefits (11 new NDGFD FTEs); \$100,000 Temp Salary (4 seasonal temps) \$159,320 Operating (new staff expenses); \$65,000 Equipment. (75% federal funds; 25% match from NDGFD)

Grants (Meadowlark Initiative Coordinator & Partner Farmbill Biologists) are needed to provide additional capacity to deliver all habitat programs and features provided by RAWA and subsequent match thus lessening the need to increase NDGFD FTE requests any more than recommended above. NDGFD grant funding to

720 Game and Fish

Agency 720

conservation partner organization to hire and appropriately distribute private land conservation biologists in field locations is an essential strategy. Continuing the existing grant agreement for supporting the Meadowlark Initiative (MI) Coordinator through the ND Natural Resources Trust is an important aspect of carrying out the increased effort and coordination of native grassland conservation.

- Funding requested: \$850,000 Grants (MI Coordinator plus 6 private land conservation biologists) (100% federal funds; match from partners)

Necessary resources for implementation (including FTE's)*: 11 New FTEs, Temp salaries, Operating expenses, Equipment, and Grants

We need new federal and special spending authority.

We need the flexibility of spending these funds as a Special Line to effectively implement the various RAWA components. The purpose and outcome of certain RAWA activities could frequently shift (i.e. between Operating and Grants) considering the specific method and party doing the work.

Are resources being redirected or are they new or additional (including FTE's)*: Recovering America's Wildlife Act (RAWA) presents a new funding opportunity for the ND Game and Fish Department; the largest investment in state-based fish and wildlife conservation in history.

Who is served and impact of not funding*: • Landowners, producers, and ranchers will lose greater opportunities to participate in habitat (grass, wetland/riparian, and woodland) improvement programs and the financial return they provide.

- Hunter and anglers' experiences will be diminished if our opportunity to influence game populations, quality habitat, and good access is reduced

- Communities and Citizen's quality of life will be impacted, as well, if we are less equipped to maintain and make improvements to habitats which provide important ecosystem services such as: water quality and infiltration, soil health, pollinator populations, carbon storage, open space, diverse wildlife, etc.

New FTE-Fisheries Biologist II (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	179,060	2,437	181,497	0.75	194,646	2,437	197,083	0.75
General	-	-	-	0.00	-	-	-	0.00
Special	59,688	813	60,501	0.25	64,884	813	65,697	0.25
Total	238,748	3,250	241,998	1.00	259,530	3,250	262,780	1.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We are requesting one (1) new FTE for a Fisheries Biologist II, District Fisheries Supervisor, in Williston. The funding will be 75% federal and 25% special funds.

720 Game and Fish

Agency 720

The state is divided into six fisheries districts of roughly equal size, with a District Fisheries Supervisor historically stationed in each district. The Northwest and Southwest fisheries districts cover approximately the western one-third of North Dakota, with district offices located in Williston and Dickinson, respectively. When the Northwest district fisheries supervisor retired in 2016, that position was converted to the Department's Aquatic Nuisance Species Supervisor to direct more effort to Department efforts to curb the spread of Aquatic Nuisance Species. Since 2016, the Southwest District Fisheries Supervisor has overseen fisheries management activities in both the Northwest and Southwest. The Southwest District Fisheries Supervisor retired in 2022, and that position was also reprioritized to direct manpower to other areas of the Fisheries Division that were short-staffed. This most recent change left both the Northwest and Southwest fisheries districts without a supervisor.

The District Fisheries Supervisor serves an important role developing fisheries program directives throughout the district, planning and leading biological surveys, overseeing data entry and analysis, developing technical summaries and reports, and conducting applicable research projects as needed. District Fisheries Supervisors provide outreach materials for various media and respond directly to public inquiries for information in their district. They supervise field staff ranging from District Fisheries Biologists (Biologist I), District Fisheries Technicians (Wildlife Technician I) and seasonal fisheries aides. Currently, fisheries staff of the Northwest and Southwest consists of a single Biologist I in each. These staff conduct surveys and management in their respective district, but are limited to available assistance from seasonal aides and other Department staff to fill in. This request is for re-establishing a District Fisheries Supervisor in Williston. This position will supervise both the Northwest and Southwest district biologists and their activities. Although the combined districts cover a large geographic area, the combined number of waters is in line with the management responsibilities of other fisheries districts statewide. Lastly, there is an immediate need for more biological support staff on the upper end of the Missouri River System. If approved by the legislature, this position will assist in addressing these needs.

Necessary resources for implementation (including FTE's)*: New FTE and related operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE

Who is served and impact of not funding*: The local community would lose out as the district supervisor is the eyes and ears of fisheries matters in the area. Without this position, the public (primarily the fishing public) will not have a direct connection to address fisheries management and development (e.g., boat ramps) in northwest North Dakota.

Aquatic Nuisance Species increase - WRDA funding (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	599,294	104,125	703,419	0.50	608,410	104,125	712,535	0.50
General	-	-	-	0.00	-	-	-	0.00
Special	599,295	104,125	703,420	0.50	608,411	104,125	712,536	0.50
Total	1,198,589	208,250	1,406,839	1.00	1,216,821	208,250	1,425,071	1.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

720 Game and Fish

Agency 720

Request explanation and justification (include any statutory authority)*: The 2020 Water Resources Development Act (WRDA) legislation passed by Congress established a new federal cost-share reimbursement program from the US Army Corps of Engineers for watercraft inspection and decontamination (WID) for states in the Missouri River Basin. Therefore, the Department will be eligible to participate in the program that awards states a 50 percent reimbursement for work associated with establishing and operating watercraft inspection stations. Work-related to the monitoring of Aquatic Nuisance Species (ANS) is also eligible for reimbursement. The WRDA WID cost-share program could increase the funds in the ANS Special Line by approximately \$700,000 of federal funds per biennium. The program is expected to be provided to states annually but is dependent on congressional approval.

The WRDA cost share will further support the critical elements of the Department’s ANS program. Additional funds will allow the Department to increase the size of its seasonal watercraft inspection crew and enable the Department to keep seasonals employed later into the fall. Funds will bolster the ANS education/outreach campaign and allow the Department to diversify its current campaign further to reach a broader demographic of water users. Finally, cost-share dollars will help the Department place ANS prevention devices like wash stations, CD3s, and Internet Landing Installed Device Sensors (ILIDS) that help contain the spread of current ANS population and prevent new introductions.

If the WRDA funding is received, then there will be an opportunity to increase the ANS budget substantially using federal monies. If this occurs, one (1) additional ANS FTE will be needed to oversee the bolstered program. As the need for watercraft inspectors (seasonals) continues to grow, the daily supervision and operation of North Dakota’s roving watercraft system will warrant the dedication of a full-time position. Pending legislative approval, a new ANS FTE would serve as the primary manager of temporary seasonal staff during the summer months, including inspector scheduling, daily communication, and decontamination of zebra mussel-fouled watercraft. During the spring and fall, the new FTE would be responsible for the installation and maintenance associated with an ever-growing number of ANS prevention devices, including CD3s, ILIDS, and wash stations. Over winter, the position would assist in the lab with the processing of ANS early detection samples, data entry, and education/outreach duties. Other duties would be assigned by the ANS Biologist and Coordinator throughout the year.

We are requesting an increase appropriation in the Aquatic Nuisance Species (ANS) Special line by \$1,406,839 (50% federal/50% special):

- \$197,648 new FTE and \$13,040 expenses; \$245,000 Temp salaries (seasonal workers); \$678,151 Operating; \$205,000 Equipment (wash stations & ILIDS); \$68,000 Grants

Necessary resources for implementation (including FTE’s)*: New FTE and related operating expenses. Additional spending authority for temporary salaries, operating, equipment, and grants.

Are resources being redirected or are they new or additional (including FTE’s)*: New federal funding, WRDA-see explanation and justification above.

Who is served and impact of not funding*: Additional ANS dedicated funding through WRDA funds will allow the Department to take more thorough protection measures for not only North Dakota outdoor enthusiasts (e.g. anglers) but also the general public and all entities who are engaged with ‘water’ issues. If funding is not available, less ANS monitoring, watercraft inspections, education initiatives, etc. will occur thus increasing the threat of ANS in more North Dakota waters.

Additional emphasis on Wildlife Habitat and Access on private lands (line 70) (Priority: 04)

Total	4,657,974	35,600	4,693,574	3.00	4,715,234	35,600	4,750,834	3.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We are requesting three (3) new FTE positions and \$4,000,000 of appropriation authority in Special Line 70-Habitat & Deer Depredation (Private Lands Initiative). The funding will be 75% federal and 25% special funds.

This request is being made to address the need for a significant change to the Private Lands Initiative (PLI); to adapt to decreasing habitat conditions on the landscape and to be responsive to additional grants and funding opportunities that are not currently pursued due to staff constraints. While the current funding for PLI is substantial, the changes occurring on the landscape are resulting in a higher cost to develop habitat and acquire additional public access. Developing habitat and access together requires significantly more staff time than acquiring access alone. The current funding and staffing arrangement of PLI has been able to steadily maintain around 800,000 acres for several years, but this request is being made to utilize additional federal USFWS Pittman-Robertson (PR) funds to develop additional habitat and increase to one million acres of Private Land Open to Sportsmen (PLOTS).

In the last decade, North Dakota has lost over 2.5 million acres of grasslands, including Conservation Reserve Program (CRP) and native prairie. In addition, nearly 60% of North Dakota’s wetlands have been converted, tree rows, fence lines and abandoned farmsteads have been removed. This is most evident in eastern ND, but central and western ND are experiencing this as well. Some deer units in eastern ND have seen an 85% decrease in deer harvested due to habitat loss. Habitat conditions in North Dakota are at a crossroads. With over 90% of land in North Dakota held in private ownership, the Department must increase efforts on private land by developing critical wildlife habitat without requiring public access as it has done through the Save Our Lakes program for many years.

For landowners wanting to develop habitat there are limited options. USDA programs, such as CRP, provide options for habitat without access, but changes to the program have resulted in many offers not being accepted (63% acceptance). Furthermore, there is hesitancy by some landowners to enter into USDA programs due to lengthy process and requirements. The Department’s Conservation Reserve Enhancement Program (CREP) has struggled because of this. Programs available through various conservation partners provide options but primarily consist of cost share centered around livestock grazing infrastructure. This creates a gap for landowners wanting to develop habitat but not wanting to work with USDA, those not wanting to enroll into PLOTS or those not set up for livestock grazing. The Department’s PLI program can provide habitat development options through private lands biologists across the state. The Department is a trusted source whom landowners are comfortable working with, however, not all are interested in allowing unrestricted walk-in hunting access through PLOTS. The Department must reach beyond the PLOTS program to deliver habitat on to private lands.

The request is for:

- \$3,000,000 for expansion of current PLOTS program (access payments to landowners).
- o Expand existing PLOTS program, increases to existing PLOTS payment rates - \$2,200,000

720 Game and Fish

Agency 720

o Replace USDA funds with PR funds for CREP - \$800,000 (would require OHF revamp)

- Two (2) new PLI Biologist FTEs in the field (i.e. Devils Lake and Jamestown offices) to deliver habitat and access through the Department’s Private Land Open to Sportsmen (PLOTS) program. The primary objective for each of these FTE positions would be to develop habitat and increase public access.

- \$1,000,000 to develop habitat (non-access) and replace Save Our Lakes program.

o 5,000 ac/year @ \$100/ac = \$500,000 X 2 years = \$1,000,000

- One (1) new FTE to manage the partners, grants and habitat program. Examples of Grant opportunities include: USFWS PR, National Fish and Wildlife Foundation, Outdoor Heritage Fund, USDA, etc. This FTE will be in Bismarck to manage the non-access habitat program, obtaining new grants and working with partners.

This additional federal and special spending authority will benefit hunters seeking more habitat and hunting access and private landowners who have expressed interest in developing wildlife habitat on their land.

These federal funds are apportioned to States from USFWS by law and are not dependent on Congress approval. These PR funds have a 2-year window to be obligated by the department; otherwise, we will lose the funds and they will revert back to the USFWS to be allocated to other states.

Necessary resources for implementation (including FTE’s)*: 3 new FTEs and related operating expenses and equipment. Additional spending authority for operating expenditures.

Are resources being redirected or are they new or additional (including FTE’s)*: The Department receives federal funds from excise taxes on the sale of guns, ammo and archery equipment which is allocated to the states by a formula. These funds are from the USFWS and are known as Pittman-Robertson (PR) funds. We have received an increase of these funds over the past years and projections show this increase will continue. These funds are apportioned to States from USFWS by law and are not dependent on Congress approval. These PR funds have a 2-year window to be obligated by the department; otherwise, we will lose the funds and they will revert back to the USFWS to be allocated to other states.

Who is served and impact of not funding*: This additional federal and special spending authority will benefit hunters seeking more habitat and hunting access and private landowners who have expressed interest in developing wildlife habitat on their land.

These funds are apportioned to States from USFWS by law and are not dependent on Congress approval. These PR funds have a 2-year window to be obligated by the department; otherwise, we will lose the funds and they will revert back to the USFWS to be allocated to other states.

National Fish and Wildlife Foundation (Line 70) (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	2,500,000	-	2,500,000	0.00	2,500,000	-	2,500,000	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	277,778	-	277,778	0.00	277,778	-	277,778	0.00
Total	2,777,778	-	2,777,778	0.00	2,777,778	-	2,777,778	0.00

720 Game and Fish

Agency 720

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: \$2,777,778 of appropriation authority in Line 70. The funding will be 90% federal and 10% special funds.

This request is being made to address needs for grassland dependent species and their habitats. The infrastructure law allocated funding to many different programs across more than a dozen federal departments and agencies. Through the Department's Meadowlark Initiative, various programs and options exist for private landowners to enhance or restore native grasslands for livestock grazing. Restoring and sustaining our state's native grasslands is of utmost importance to many species of wildlife, including several species of conservation priority, even our own state bird, the Western Meadowlark. Mid-term protection of these native grasslands is a missing component of the Meadowlark Initiative. The Department is seeking additional spending authority to utilize these grant funds for 25 year conservation agreements.

The federal grant amount is \$5,000,000 over 2 bienniums:

- 2023-25: \$2,777,778 (\$2,500,000 federal/\$277,778 special)
- 2025-27: \$2,777,778 (\$2,500,000 federal/\$277,778 special)

The additional authority will benefit private landowners who have expressed interest in mid-term conservation program agreements on restored native grasslands through the Meadowlark Initiative. Hunters will also benefit from the additional habitat and wildlife on these lands. While public access is not a required component, landowners may also be eligible for PLOTS if they are willing to allow walk-in hunting access.

Necessary resources for implementation (including FTE's)*: Additional spending authority to spend federal funds and required match.

Are resources being redirected or are they new or additional (including FTE's)*: New federal funding.

Who is served and impact of not funding*: • Landowners, producers, and ranchers will lose a new opportunity to participate in longer term grassland conservation agreements and the financial return they provide.

- Hunter and anglers' experiences will be diminished if our opportunity to sustain and protect our native grassland base and its influence game populations, quality habitat, and good access is lost
- Communities and Citizen's quality of life will be impacted, as well, if we are less equipped to maintain and protect native grassland habitats which provide important ecosystem services such as: water quality and infiltration, soil health, pollinator populations, carbon storage, open space, diverse wildlife, etc.

Devils Lake Bunkhouse Improvements (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	350,000	350,000	0.00	-	350,000	350,000	0.00
Total	-	350,000	350,000	0.00	-	350,000	350,000	0.00

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Seasonal employees are essential to the North Dakota Game and Fish Department (Department) to complete necessary work every summer. The Department currently hires 7 seasonal employees to work out of our Devils Lake District Office each year. The Aquatic Nuisance Species program is expanding, and the Devils Lake area is a high priority for this effort. However, we are restricted due to our temporary housing situation. Currently we can accommodate 4-5 seasonal employees in our temporary housing. The number we can house greatly depends on the gender of seasonal employees. We have 3 campers that house 1 employee each and 1 bunkhouse that comfortably houses 2 employees. Additionally, all seasonal employees share one bathroom located in the bunkhouse. This is not suitable for a mixed gender work force. Further, the condition of the campers has deteriorated to the point that spending additional funds for repairs is not in the best interest of the state.

The Department’s proposed solution is to renovate our current bunkhouse which would create 5 separate living quarters and 2-3 bathrooms. Each room could house 2 seasonal employees.

The Department’s proposed solution is to renovate our current bunkhouse which would create 5 separate living quarters and 2-3 bathrooms. Each room could house 2 seasonal employees. The overall dimensions of the bunk house would be approximately 30’ x 40’.

Necessary resources for implementation (including FTE’s)*: Additional spending authority.

Are resources being redirected or are they new or additional (including FTE’s)*: NA

Who is served and impact of not funding*: This project would primarily serve the Department’s Fisheries and Wildlife Divisions at the Devils Lake District Office by providing updated seasonal employee housing. Seasonal employees are essential to the Department to complete necessary work every summer. If this project isn’t funded, the Department will either need to invest considerable funding into purchasing newer campers or hire fewer seasonal employees in this region. However, the Aquatic Nuisance Species (ANS) Program is expanding, and the Devils Lake area is a high priority for this effort so a reduction in seasonal employees would hamper their efforts. Purchasing newer campers isn’t an ideal solution because they cannot be connected to existing water and sewer services without considerable expense. Campers also have a substantially shorter life span than expanding a permanent bunkhouse and wouldn’t address the lack of bathroom space that exists. . If this facility isn’t improved, the Department will continue to be limited to housing a maximum of 4-5 seasonal employees in our aging facilities at the Devils Lake District Office. This number will continue to decrease as our current campers become uninhabitable.

New FTE-Account Budget Specialist III-Federal Aid (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	230,938	7,575	238,513	1.00	251,720	7,575	259,295	1.00
Total	230,938	7,575	238,513	1.00	251,720	7,575	259,295	1.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We are requesting one (1) new FTE for an Account Budget Specialist III. The funding will be 100% special funds.

This biennium, the department has received over \$6M in additional federal funds from USFWS Pittman-Robertson, new federal funds for Chronic Wasting Disease work from USDA-APHIS, and the potential of additional funds from USFWS for CWD, and the Water Resources Development Act funds from the Corps of Engineers for Aquatic Nuisance Species work. There is also the addition of millions of federal funds that the department has the potential to be awarded: National Fish and Wildlife Foundation (\$2.5M) and Recovering America’s Wildlife Act (\$22,775,000).

Currently we have 1 FTE in Administrative Services that is the Federal Aid Manager who handles these duties for all federal funds for the department (approx. \$33M per biennium).

The amount of federal funds the department received in 2013-15 was \$25M and 2015-17 was \$30.2M, an increase in federal revenue of \$5M. In 2015-17, we requested and received an FTE to assist with the growing workload.

Since 2015-17, when we received the additional FTE, federal revenue has again increased approx. \$7M (15-17 \$30.2M to 21-23 est. \$37M). Any addition of federal funds above current levels is not sustainable by existing staff.

The amount of federal regulations, grant application processing requirements, and reporting requirements in the new federal systems have increased and it now takes a lot more time to administer the grants. The workload involved with these federal funds pertaining to understanding and maintaining compliance with federal regulations, keeping up with and implementing changes, processing applications and amendments, monitoring budgets and grant balances, requesting reimbursements, preparing subgrant agreements and monitoring subgrantees, and preparing, reviewing, and submitting financial and performance reports in multiple different federal systems will require another position to manage and perform these duties.

Necessary resources for implementation (including FTE’s)*: New FTE and related operating expenses.

Are resources being redirected or are they new or additional (including FTE’s)*: New FTE

720 Game and Fish

Agency 720

Who is served and impact of not funding*: The Department receives federal funds to help fulfill its mission to protect, conserve and enhance fish and wildlife populations and their habitat for sustained public consumptive and non-consumptive use.

If this request is not funded, the processing of grants will take more time and the backlog and missed opportunities will impact the department/divisions and our mission.

We will not be able to apply for additional funding opportunities that are available or take advantage of a variety of different grant funding sources because we want to avoid having more grants than we can properly manage with current staffing. Having too many grants without additional staffing could result late reporting, decreased monitoring, audit findings, loss of funding, etc.

Also, the benefits of receiving additional grant funds will not be realized. (i.e., Potential additional studies conducted to help make decisions regarding fish and wildlife populations and their management will not occur and additional habitat will not be protected which may reduce populations and potential public hunting and fishing opportunities.)

Some grant funds have a window for applying which will be impacted due to lack of staff time. The timing of receiving federal funds can affect the project (i.e., repairs to wildlife management areas are done in the spring/summer, if the funds are received late, the repairs won't get done until the following year resulting in a year of lost benefits to fish and wildlife, their habitat, and the public's use of them).

New FTE's-Enforcement Warden Investigator (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	45,744	7,392	53,136	0.20	49,900	7,392	57,292	0.20
General	-	-	-	0.00	-	-	-	0.00
Special	567,812	86,588	654,400	1.80	605,216	86,588	691,804	1.80
Total	613,556	93,980	707,536	2.00	655,116	93,980	749,096	2.00

State Initiative*: Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We are requesting two (2) new FTE for a Warden Investigator (one located in Eastern ND and one in Western ND). The majority of the funding will be special funds with a minimal amount from the US Coast Guard for boat safety work.

Looking ahead to future needs for the enforcement division, there is a need for a non-district regional warden/investigator to increase investigative presence for the North Dakota Game and Fish Enforcement Division. An increase in population has increased enforcement activity. Time dedicated to investigations has been on the rise since 2011. Investigations have become more complex involving multiple people, violations, and locations. When more time is spent on investigations time dedicated to patrol suffers. Covering an average of 2400 sq miles of a warden's district becomes even more challenging when long hours are spent on investigations. Work for the wardens is compounded when neighboring districts are empty or the adjacent warden is off work hours. Work level saturations occur with the balance

between investigations, patrol, and reporting fit into a standard hour schedule. If you also include time and distance for travel within a district you have a finite number of tasks that can be accomplished. It should also be noted that keeping staff at extremely high work levels for extended times will cause a drop in productivity.

Time is difficult to track on investigations as each is not completed on a linear timeline. Investigations may stop and start on many occasions over multiple months or even years until completion. The combination of incidents, public outreach, reporting, mandatory training, meetings, biological data collection and wildlife response calls make it extremely difficult to put sufficient time and effort towards long term investigations. Assignment of investigations to the Department's only commercial investigations supervisor causes time and distance issues making the effort less productive and cannot be done in a sufficient manner by a lone investigator.

Other factors we considered when looking at the issue of adding a non-district warden/investigator.

1. Not all officers are top investigators and were hired as field wardens.
2. Field Wardens do not have the specialized training to complete complex investigations that may lead into other jurisdictions.
3. Lack of time for compliance checks (e.g. Guides, Outfitters, Taxidermists, Bait Vendors, etc.) by district wardens that could be better handled by trained commercial investigators.
4. Loss of patrol affecting public safety by district wardens while doing investigations.
5. Increased ability and time for ANS/Wildlife health enforcement.
6. A warden investigator has more freedom to complete investigations as they are not tied to district calls on wildlife and complaints.
7. Warden investigator can assist field wardens on special projects without having to pull other district wardens out of their districts.
8. A warden investigator would give the region more flexibility to fill in when injuries, retirements, and job openings occur in a district.
9. With 29 field wardens currently in the state the volume of work often exceeds the capacity of workers. Many county sheriff's offices employ more deputies for one county than the ND Game and Fish employ Game Wardens in an 11-13 county region.
10. The number of outfitters has increased over time resulting in an increase demand for oversight.

In conclusion the limited number of North Dakota Game Wardens and need for flexibility to do investigations and inspections more frequently should be the catalyst for adding two warden investigator positions.

Necessary resources for implementation (including FTE's)*: New FTE and related operating expenses and equipment.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE

720 Game and Fish

Agency 720

Who is served and impact of not funding*: The addition of two FTE Game Warden Investigator positions will serve all citizens of North Dakota and the large number of non North Dakota residents who hunt, fish, trap, boat, or otherwise enjoy and use the abundant resources in the state.

The addition of two FTE Game Warden Investigators will allow increased protection of wildlife, waterbodies, and public safety in North Dakota.

The addition of two FTE Game Warden Investigators will allow for increased enforcement and education on Department priorities including Aquatic Nuisance Species and Chronic Wasting Disease as field wardens will have more available time to focus on these efforts.

The combination of incidents, public outreach, reporting, mandatory training, meetings, biological data collection and wildlife response calls make it extremely difficult to put sufficient time and effort towards long term investigations.

If not funded the Department will be not be able to provide increased time on complex, time intensive investigations, many of which require specialized knowledge on electronics and technology.

The public and Department will both be impacted in a negative manner as increased wildlife law enforcement services and education that have been requested by the public for protection of North Dakota wildlife and waterbodies will remain at current levels, while the required and/or expected workload increases causing public dissatisfaction along with stress and morale issues for field wardens, decreasing productivity and negatively impacting personal lives.

New FTE-Admin GIS Program Manager (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	230,458	8,055	238,513	1.00	-	-	-	0.00
Total	230,458	8,055	238,513	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We are requesting one (1) new FTE for a GIS Program Manager. The funding will be 100% special funds.

Geographic Information Systems (GIS) is an integral piece to the Department as we are a heavy science, data and analytics agency. The Department has widespread use of GIS throughout divisions and staff.

We produce and distribute a significant amount of data and cartographic products for North Dakota

720 Game and Fish

Agency 720

This position would support the growing needs in the Department and assist divisional staff with GIS projects. This growth includes supporting administrative functions of GIS services, research and development, analytical projects, communications and cartographic products, data sharing and distribution, publications, etc. This position will work with divisional staff to assist with habitat analysis, PLOTS, lake bathymetry, electronic posting, and various publications.

As our footprint in this area continues to grow, the need for a dedicated full time GIS program manager is needed to oversee and assist the individuals within the divisions whose duties include parts of GIS work relevant to their division.

Necessary resources for implementation (including FTE's)*: New FTE and related operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE

Who is served and impact of not funding*: This position serves hunters, anglers and boaters. The Department collects, manages, analyzes and presents a significant amount of geospatial information. This information is used by the Department and public for a variety of citizen services and tools to assist in the outdoors. The impact to not fund this position can limit the Departments ability to deliver these services.

Agency-Motorpool (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	118,350	-	118,350	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	955,192	-	955,192	0.00	1,038,842	-	1,038,842	0.00
Total	955,192	-	955,192	0.00	1,157,192	-	1,157,192	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Increase in motorpool costs due to rising fuel prices based on Department of Transportation Fleet Services Budget Guideline rates.

Necessary resources for implementation (including FTE's)*: Additional spending authority.

Are resources being redirected or are they new or additional (including FTE's)*: NA

Who is served and impact of not funding*: Motorpool costs are incurred during the day to day operations of the Department and are essential in serving our customer base. A reduction in motor pool allocation would result in a reduction of services such as enforcement activities, management of our state's big game, small game, and furbearing resources, management of our Wildlife Management Areas, delivery of our Private Lands Initiative, management and development of the state's fisheries, monitoring and surveillance of Aquatic Nuisance Species and wildlife diseases including Chronic Wasting Disease, and the responsibility of implementing

720 Game and Fish

Agency 720

the Statewide Action Plan for species of conservation priority. Our entire customer base including hunters, anglers, trappers, and watercraft operators would be impacted, at varying levels, by a reduction of motor pool cost allocation.

Total	850,000	850,000	850,000	-	-

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 7/1/2023

End Date (MM/DD/YYYY): 6/30/2025

Description: In 2019, the North Dakota legislature passed Senate Bill 2293, which gave North Dakota's Aquatic Nuisance Species (ANS) Program an estimated \$1.5 million per biennium. These funds were used to hire additional FTE/seasonal staff and bolster education, monitoring, and prevention efforts. Although the total number of FTE/seasonal staff has quadrupled over the past two years, facility size and storage capacity have primarily remained the same. In addition, the Department has purchased and will continue to buy large ANS prevention devices, whose electronics need to be housed in a heated facility in the winter months. Currently, those electronics are housed in shared community areas in regional offices.

ANS staff collect more than 400 water samples per year from waterbodies, hatcheries, and bait vendor facilities to look for nuisance larval invertebrates, including zebra mussels, golden clams, and spiny water flea. These samples are prepared and processed using specialized compound light microscopy to look for nuisance invertebrates. All lab based ANS monitoring takes place in small office rooms that don't have access to running water, or wastewater disposal, which adds considerable time and effort to processing samples. Storage space for water samples and general voucher specimens is limited to the same few heated office rooms.

720 Game and Fish

Agency 720

The lack of workable lab space could contribute to incidental sample contamination. A new ANS facility that doubles as a lab and a heated storage building would allow for the continual accumulation of ANS related assets without seeking additional space to meet storage and lab needs.

The Department currently hires 9 seasonal employees to work out of our Jamestown District Office each year. However, we are restricted due to our temporary housing situation. Currently we can accommodate 4 seasonal employees in our temporary housing. We have 2 FEMA park model campers that house up to 2 employees each (depending on gender).

The Department's proposed solution is to construct a 40'x100' building that will serve as an ANS Lab & Storage Facility. The building will also provide temporary housing for up to 10 seasonal staff. The estimated cost of building construction is \$800,000. The estimated cost for architect and engineering fees is \$50,000.

Devils Lake Bunkhouse Improvements (Priority: 7)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Devils Lake Bunkhouse Improvements	222	720-1800	72050	-	-	350,000	-	350,000	-	350,000
Total				-	-	\$350,000	-	\$350,000	-	\$350,000

State Initiative:* State Facility Investment

Explanation / Justification: Seasonal employees are essential to the North Dakota Game and Fish Department (Department) to complete necessary work every summer. The Department currently hires 7 seasonal employees to work out of our Devils Lake District Office each year. The Aquatic Nuisance Species program is expanding, and the Devils Lake area is a high priority for this effort. However, we are restricted due to our temporary housing situation. Currently we can accommodate 4-5 seasonal employees in our temporary housing. The number we can house greatly depends on the gender of seasonal employees. We have 3 campers that house 1

720 Game and Fish

Agency 720

employee each and 1 bunkhouse that comfortably houses 2 employees. Additionally, all seasonal employees share one bathroom located in the bunkhouse. This is not suitable for a mixed gender work force. Further, the condition of the campers has deteriorated to the point that spending additional funds for repairs is not in the best interest of the state.

The Department's proposed solution is to renovate our current bunkhouse which would create 5 separate living quarters and 2-3 bathrooms. Each room could house 2 seasonal employees.

Fisheries-Dam Repairs (Priority: 13)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Camel Hump and Baukol Noonan	222	720- 2500	72050	-	-	380,000	-	380,000	-	380,000
Total				-	-	\$380,000	-	\$380,000	-	\$380,000

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: Camels Hump Dam: This work will include both a geotechnical study to identify water movements through the dam and solutions to correct these movements as well as partnering with DOT to cure in place and line the principal spillway to correct the rusting steel pipe.

Baukol-Noonan Dam: This work is to repair the failed riser pipe that has rusted through as well as also cure in place line the principal spillway to correct its rusting steel pipe. Cured-in-place pipe (CIPP) lining is one of several methods used to repair existing pipelines that don't require that you dig up the pipes. CIPP is a jointless, seamless, pipe-within-a-pipe with the capability to repair pipes ranging in diameter from 4–110 inches.

Fisheries-Pondliners (Priority: 14)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
State Portion of Pondliners	222	720- 2100	72050	-	-	250,000	-	250,000	-	250,000
Federal portion of pondliners	N3751	720- 2100	72050	-	-	750,000	-	750,000	-	750,000
Total				-	-	\$1,000,000	-	\$1,000,000	-	\$1,000,000

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: As in past bienniums, there is a continued need to invest money at the Garrison Dam National Fish Hatchery by continuing the pond lining program which eliminates water loss issues with the current ponds as well as increases fish production capacity. Depending on the liner cost, the request should line approximately four 1.5 acre ponds (the cost includes engineering fees). There are 40 ponds in the Department owned east rearing unit with 15 of the 40 lined to date.

State Initiative:* Health, Vibrant Communities

Justification: Recovering America's Wildlife Act (RAWA) presents a new funding opportunity for the ND Game and Fish Department (NDGFD) which is different than traditional funding in which licenses and fees paid by hunters, anglers, shooters, and other sources are used as match for the U.S. Fish and Wildlife Service's Wildlife and Sport Fish Restoration program. RAWA could potentially invest \$1.4 billion annually in fish and wildlife conservation nationally. If passed by Congress, an estimate of over \$14 million annually could ultimately be allocated to North Dakota, the largest investment in state-based fish and wildlife conservation in history. This funding stream was specifically developed to address the needs of rare and declining Species of Conservation Priority (SCP) and their habitats which are

identified in each state's Wildlife Action Plan. RAWA funding will require a 25% match from states; however, one unique attribute of RAWA is that eligible match can be from any federal agency except the Department of Interior and Agriculture. In addition, RAWA is also eligible to be used for ANS prevention which is a very important issue to ND citizens.

We are requesting approval of, and legislative authority for, RAWA funding as a new Special Line appropriation. The flexibility of a Special Line will most certainly be needed to effectively implement the various RAWA components and nimbly shift between Operating and Grant lines for activities conducted "in-house" and through contracted services which require Operating funds or having the work completed by conservation partners and universities using Grant funds. The purpose and outcome of certain RAWA activities could frequently shift considering the specific method and party doing the work; subsequently, requiring a shift in the funding line.

Program Description:

In 2023-25, based on the latest information, we estimate the NDGFD will receive \$22,775,000 in Federal funds. (Federal funding is estimated to ramp up to \$14M annually by approximately fiscal year 2026.) The match for some expenditures are provided by the NDGFD and some are from partners and indicated below.

Research/Surveys/Inventories are needed to gain knowledge and insight on the status and population trends of new and existing Species of Conservation Priority. The majority of this work initially would be done by universities (Grant dollars) or by contracted consultants (Operating funds) who have expertise in inventorying/surveying for specific and unique species or guilds. As systematic surveys are developed, a shift to some "in-house" surveying by NDGFD staff could occur. In regard to research needs, a year or two of coordination with external species experts, universities, and research units will be needed to identify, frame up, and initiate priority research projects. Therefore, as time goes on the proportion of this particular component could grow.

- Funding requested: \$1,500,000 Grants & \$300,000 Operating (100% federal funds; match from partners)

Habitat (Enhance/Restore/Protect) is the most crucial element impacting species diversity and sustainability. It is this element NDGFD and conservation partners need to address most quickly to sustain game, nongame, and SCP populations. This can only be accomplished by increasing important new diverse habitat while enhancing and protecting existing native habitat across the state. Because North Dakota's landscape is comprised of approximately 94% private land, the bulk of this work and funding would be directed to private landowners and their operations. Extensive funding and manpower to work with ag producers and ranchers to develop, enhance, and protect habitat through new and existing programs will be required to make substantive gains. This would be accomplished through a ramp up of both NDGFD Private Land Initiative (PLI) and conservation partners' programs and staffing. Operating funds would be used for landowner cost share and agreement payments made by NDGFD through our "in-house" habitat programs, while Grant funds would be used to provide our conservation partners with funding to augment and match their or other grant funding for additional habitat delivery work.

- Funding requested: \$12,243,578 Operating - In-house PLI habitat program payments/cost share landowner payments (75% federal funds; 25% match from NDGFD)
- \$2,500,000 Operating - midterm grassland conservation agreement via PLI (75% federal funds; 25% match from NDGFD)
- \$7,000,000 Grants for conservation partner habitat program delivery (100% federal funds; match from partners)

Communication and Marketing is another component of SCP management. Making the public aware of threats and opportunities associated with these species' life cycles, as well as habitat programs available to address their declines, is the role of the NDGFD's Communications Section. As the Section is already providing this function at very high capacity, only a small addition to their budget is being requested, at least initially.

720 Game and Fish

Agency 720

- Funding requested: \$80,000 Operating (75% federal funds; 25% match from NDGFD)

Staffing increases will be necessary to put RAWA funding to work whether it be for research, surveys and habitat improvements. As mentioned above, a large proportion will be used to pay for agreements with private landowners and producers. An increase of five (5) PLI Biologists will be required to manage and deliver this upscale in habitat programs, as this influx of RAWA funding will more than double the existing PLI (Line 70) budget.

Managing research projects, conducting surveys, providing species expertise, and implementing features of the State Wildlife Action Plan is the responsibility of Conservation Biologists. We believe adding four (4) new biologists to the Conservation Section will be needed to address the expansion of this core aspect of RAWA funding.

One (1) additional Administrative Staff Officer, as well as one (1) Account Budget Specialist, are warranted to manage increase contracts, grants, budget preparation, audits, and additional accounting transactions.

In addition to these eleven (11) new FTE positions, there will be a need to address field season surge of all "in-house" aspects of SCP management. Providing temporary staff funding to hire four (4) temporary seasonals to assist full-time staff each year for a four-month duration would be prudent.

- Funding requested: \$2,352,102 Salary & Benefits (11 new NDGFD FTEs); \$100,000 Temp Salary (4 seasonal temps) \$159,320 Operating (new staff expenses); \$65,000 Equipment. (75% federal funds; 25% match from NDGFD)

Grants (Meadowlark Initiative Coordinator & Partner Farmbill Biologists) are needed to provide additional capacity to deliver all habitat programs and features provided by RAWA and subsequent match thus lessening the need to increase NDGFD FTE requests any more than recommended above. NDGFD grant funding to conservation partner organization to hire and appropriately distribute private land conservation biologists in field locations is an essential strategy. Continuing the existing grant agreement for supporting the Meadowlark Initiative (MI) Coordinator through the ND Natural Resources Trust is an important aspect of carrying out the increased effort and coordination of native grassland conservation.

- Funding requested: \$850,000 Grants (MI Coordinator plus 6 private land conservation biologists) (100% federal funds; match from partners)

Aquatic Nuisance Species Increase - WRDA Funding (Priority: 3)

Agency 720

Justification: The 2020 WRDA legislation passed by Congress established a new federal cost-share reimbursement program for watercraft inspection and decontamination (WID) for states in the Missouri River Basin. Therefore, the Department will be eligible to participate in the program that awards states a 50 percent reimbursement for work associated with establishing and operating watercraft inspection stations. Work-related to the monitoring of ANS is also eligible for reimbursement. The WRDA WID cost-share program could increase the funds in cost center 2700 by nearly \$860,000 a biennium. The program is expected to be provided to states annually but is dependent on congressional approval.

The WRDA cost share will further support the critical elements of the Department's ANS program. Additional funds will allow the Department to increase the size of its seasonal watercraft inspection crew and enable the Department to keep seasonals employed later into the fall. Funds will bolster the ANS education/outreach campaign and allow the Department to diversify its current campaign further to reach a broad demographic of water users. Finally, cost-share dollars will help the Department place ANS prevention devices like wash stations, CD3s, and ILIDS that help contain the spread of current ANS population and prevent new introductions.

Additional emphasis on Wildlife Habitat and Access on private lands (line 70) (Priority: 4)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

State Initiative:* Health, Vibrant Communities

Justification: We are requesting three (3) new FTE positions and \$4,000,000 of appropriation authority in Line 70-Habitat & Deer Depredation (Private Lands Initiative). The funding will be 75% federal and 25% special funds.

This request is being made to address the need for a significant change to the Private Lands Initiative (PLI); to adapt to decreasing habitat conditions on the landscape and to be responsive to additional grants and funding opportunities that are not currently pursued due to staff constraints. While the current funding for PLI is substantial, the changes occurring on the landscape are resulting in a higher cost to develop habitat and acquire additional public access. Developing habitat and access together requires significantly more staff time than acquiring access alone. The current funding and staffing arrangement of PLI has been able to steadily maintain around 800,000 acres for several years, but this request is being made to utilize additional federal USFWS Pittman-Robertson (PR) funds to develop additional habitat and increase to one million acres of Private Land Open to Sportsmen (PLOTS).

In the last decade, North Dakota has lost over 2.5 million acres of grasslands, including Conservation Reserve Program (CRP) and native prairie. In addition, nearly 60% of North Dakota's wetlands have been converted, tree rows, fence lines and abandoned farmsteads have been removed. This is most evident in eastern ND, but central and western ND are experiencing this as well. Some deer units in eastern ND have seen an 85% decrease in deer harvested due to habitat loss. Habitat conditions in North Dakota are at a crossroads. With over 90% of land in North Dakota held in private ownership, the Department must increase efforts on private land by developing critical wildlife habitat without requiring public access as it has done through the Save Our Lakes program for many years.

720 Game and Fish

Agency 720

For landowners wanting to develop habitat there are limited options. USDA programs, such as CRP, provide options for habitat without access, but changes to the program have resulted in many offers not being accepted (63% acceptance). Furthermore, there is hesitancy by some landowners to enter into USDA programs due to lengthy process and requirements. The Department's Conservation Reserve Enhancement Program (CREP) has struggled because of this. Programs available through various conservation partners provide options but primarily consist of cost share centered around livestock grazing infrastructure. This creates a gap for landowners wanting to develop habitat but not wanting to work with USDA, those not wanting to enroll into PLOTS or those not set up for livestock grazing. The Department's PLI program can provide habitat development options through private lands biologists across the state. The Department is a trusted source whom landowners are comfortable working with, however, not all are interested in allowing unrestricted walk-in hunting access through PLOTS. The Department must reach beyond the PLOTS program to deliver habitat on to private lands.

- \$3,000,000 for expansion of current PLOTS program (access payments to landowners).

- o Expand existing PLOTS program, increases to existing PLOTS payment rates - \$2,200,000

- o Replace USDA funds with PR funds for CREP - \$800,000 (would require OHF revamp)

- Two (2) new PLI Biologist FTEs in the field (i.e. Devils Lake and Jamestown offices) to deliver habitat and access through the Department's Private Land Open to Sportsmen (PLOTS) program. The primary objective for each of these FTE positions would be to develop habitat and increase public access.

- \$1,000,000 to develop habitat (non-access) and replace Save Our Lakes program.

- o 5,000 ac/year @ \$100/ac = \$500,000 X 2 years = \$1,000,000

- One (1) new FTE to manage the partners, grants and habitat program. Examples of Grant opportunities include: USFWS PR, National Fish and Wildlife Foundation, Outdoor Heritage Fund, USDA, etc. This FTE will be in Bismarck to manage the non-access habitat program, obtaining new grants and working with partners.

The additional authority will benefit hunters seeking more habitat and hunting access and private landowners who have expressed interest in developing wildlife habitat on their land.

New FTE's-Enforcement Warden Investigator (Priority: 9)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

	222	720-3200	72050	691000	7	6	5,490	-	32,940	-	32,940	-	32,940
	N3681	720-3200	72050	691000	7	6	510	-	3,060	-	3,060	-	3,060
Total					-	-	-	-	36,000	-	36,000	-	36,000

State Initiative:* Workforce

Justification: We are requesting two (2) new FTE for a Warden Investigator (one located in Eastern ND and one in Western ND). The majority of the funding will be special funds with a minimal amount from the US Coast Guard for boat safety work.

Looking ahead to future needs for the enforcement division, there is a need for a non-district regional warden/investigator to increase investigative presence for the North Dakota Game and Fish Enforcement Division. An increase in population has increased enforcement activity. Time dedicated to investigations has been on the rise since 2011. Investigations have become more complex involving multiple people, violations, and locations. When more time is spent on investigations time dedicated to patrol suffers. Covering an average of 2400 sq miles of a warden's district becomes even more challenging when long hours are spent on investigations. Work for the wardens is compounded when neighboring districts are empty or the adjacent warden is off work hours. Work level saturations occur with the balance between investigations, patrol, and reporting fit into a standard hour schedule. If you also include time and distance for travel within a district you have a finite number of tasks that can be accomplished. It should also be noted that keeping staff at extremely high work levels for extended times will cause a drop in productivity.

Time is difficult to track on investigations as each is not completed on a linear timeline. Investigations may stop and start on many occasions over multiple months or even years until completion. The combination of incidents, public outreach, reporting, mandatory training, meetings, biological data collection and wildlife response calls make it extremely difficult to put sufficient time and effort towards long term investigations. Assignment of investigations to the Department's only commercial investigations supervisor causes time and distance issues making the effort less productive and cannot be done in a sufficient manner by a lone investigator.

Other factors we considered when looking at the issue of adding a non-district warden/investigator.

1. Not all officers are top investigators and were hired as field wardens.
2. Field Wardens do not have the specialized training to complete complex investigations that may lead into other jurisdictions.
3. Lack of time for compliance checks (e.g. Guides, Outfitters, Taxidermists, Bait Vendors, etc.) by district wardens that could be better handled by trained commercial investigators.
4. Loss of patrol affecting public safety by district wardens while doing investigations.
5. Increased ability and time for ANS/Wildlife health enforcement.
6. A warden investigator has more freedom to complete investigations as they are not tied to district calls on wildlife and complaints.
7. Warden investigator can assist field wardens on special projects without having to pull other district wardens out of their districts.
8. A warden investigator would give the region more flexibility to fill in when injuries, retirements, and job openings occur in a district.
9. With 29 field wardens currently in the state the volume of work often exceeds the capacity of workers. Many county sheriff's offices employ more deputies for one county than the ND Game and Fish employ Game Wardens in an 11-13 county region.
10. The number of outfitters has increased over time resulting in an increase demand for oversight.

720 Game and Fish

In conclusion the limited number of North Dakota Game Wardens and need for flexibility to do investigations and inspections more frequently should be the catalyst for adding two warden investigator positions.

Enforcement Replace in Car Video System & Add Body Cameras (Priority: 11)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	222	720-3200	72050	691000	7	40	13,750	-	550,000	-	550,000	-	550,000
Total					-	-	-	-	550,000	-	550,000	-	550,000

State Initiative:* Technology Investment

Justification: This request is for replacing 40 in car video systems and adding 40 body cameras. The current in car video systems are over 10 years old and are no longer in production. Due to their age they are malfunctioning at increasing rates and are difficult to service due to age/lack of parts. The enforcement division currently does not have body cameras. Body cameras are becoming a normal and expected equipment item for all law enforcement officers. Adding body cameras will improve department credibility and protection against complaints, protect citizens, and help document evidence in criminal cases. The new in car video systems and body cameras are a package that work together for improved efficiency and ease of use for the officer.

State Initiative:* Health, Vibrant Communities

Explanation / Justification: Recovering America’s Wildlife Act (RAWA) presents a new funding opportunity for the ND Game and Fish Department (NDGFD) which is different than traditional funding in which licenses and fees paid by hunters, anglers, shooters, and other sources are used as match for the U.S. Fish and Wildlife Service’s Wildlife and Sport Fish Restoration program. RAWA could potentially invest \$1.4 billion annually in fish and wildlife conservation nationally. If passed by Congress, an estimate of over \$14 million annually could ultimately be allocated to North Dakota, the largest investment in state-based fish and wildlife conservation in history. This funding stream was specifically developed to address the needs of rare and declining Species of Conservation Priority (SCP) and their habitats which are identified in each state’s Wildlife Action Plan. RAWA funding will require a 25% match from states; however, one unique attribute of RAWA is that eligible match can be from any federal agency except the Department of Interior and Agriculture. In addition, RAWA is also eligible to be used for ANS prevention which is a very important issue to ND citizens.

We are requesting approval of, and legislative authority for, RAWA funding as a new Special Line appropriation. The flexibility of a Special Line will most certainly be needed to effectively implement the various RAWA components and nimbly shift between Operating and Grant lines for activities conducted “in-house” and through contracted services which require Operating funds or having the work completed by conservation partners and universities using Grant funds. The purpose and outcome of certain RAWA activities could frequently shift considering the specific method and party doing the work; subsequently, requiring a shift in the funding line.

Program Description:

In 2023-25, based on the latest information, we estimate the NDGFD will receive \$22,775,000 in Federal funds. (Federal funding is estimated to ramp up to \$14M annually by approximately fiscal year 2026.) The match for some expenditures are provided by the NDGFD and some are from partners and indicated below.

Research/Surveys/Inventories are needed to gain knowledge and insight on the status and population trends of new and existing Species of Conservation Priority. The majority of this work initially would be done by universities (Grant dollars) or by contracted consultants (Operating funds) who have expertise in inventorying/surveying for specific and unique species or guilds. As systematic surveys are developed, a shift to some “in-house” surveying by NDGFD staff could occur. In regard

to research needs, a year or two of coordination with external species experts, universities, and research units will be needed to identify, frame up, and initiate priority research projects. Therefore, as time goes on the proportion of this particular component could grow.

- Funding requested: \$1,500,000 Grants & \$300,000 Operating (100% federal funds; match from partners)

Habitat (Enhance/Restore/Protect) is the most crucial element impacting species diversity and sustainability. It is this element NDGFD and conservation partners need to address most quickly to sustain game, nongame, and SCP populations. This can only be accomplished by increasing important new diverse habitat while enhancing and protecting existing native habitat across the state. Because North Dakota's landscape is comprised of approximately 94% private land, the bulk of this work and funding would be directed to private landowners and their operations. Extensive funding and manpower to work with ag producers and ranchers to develop, enhance, and protect habitat through new and existing programs will be required to make substantive gains. This would be accomplished through a ramp up of both NDGFD Private Land Initiative (PLI) and conservation partners' programs and staffing. Operating funds would be used for landowner cost share and agreement payments made by NDGFD through our "in-house" habitat programs, while Grant funds would be used to provide our conservation partners with funding to augment and match their or other grant funding for additional habitat delivery work.

- Funding requested: \$12,243,578 Operating - In-house PLI habitat program payments/cost share landowner payments (75% federal funds; 25% match from NDGFD)
- \$2,500,000 Operating - midterm grassland conservation agreement via PLI (75% federal funds; 25% match from NDGFD)
- \$7,000,000 Grants for conservation partner habitat program delivery (100% federal funds; match from partners)

Communication and Marketing is another component of SCP management. Making the public aware of threats and opportunities associated with these species' life cycles, as well as habitat programs available to address their declines, is the role of the NDGFD's Communications Section. As the Section is already providing this function at very high capacity, only a small addition to their budget is being requested, at least initially.

- Funding requested: \$80,000 Operating (75% federal funds; 25% match from NDGFD)

Staffing increases will be necessary to put RAWA funding to work whether it be for research, surveys and habitat improvements. As mentioned above, a large proportion will be used to pay for agreements with private landowners and producers. An increase of five (5) PLI Biologists will be required to manage and deliver this upscale in habitat programs, as this influx of RAWA funding will more than double the existing PLI (Line 70) budget.

Managing research projects, conducting surveys, providing species expertise, and implementing features of the State Wildlife Action Plan is the responsibility of Conservation Biologists. We believe adding four (4) new biologists to the Conservation Section will be needed to address the expansion of this core aspect of RAWA funding.

One (1) additional Administrative Staff Officer, as well as one (1) Account Budget Specialist, are warranted to manage increase contracts, grants, budget preparation, audits, and additional accounting transactions.

In addition to these eleven (11) new FTE positions, there will be a need to address field season surge of all "in-house" aspects of SCP management. Providing temporary staff funding to hire four (4) temporary seasonals to assist full-time staff each year for a four-month duration would be prudent.

- Funding requested: \$2,352,102 Salary & Benefits (11 new NDGFD FTEs); \$100,000 Temp Salary (4 seasonal temps) \$159,320 Operating (new staff expenses); \$65,000 Equipment. (75% federal funds; 25% match from NDGFD)

720 Game and Fish

Agency 720

Grants (Meadowlark Initiative Coordinator & Partner Farmland Biologists) are needed to provide additional capacity to deliver all habitat programs and features provided by RAWA and subsequent match thus lessening the need to increase NDGFD FTE requests any more than recommended above. NDGFD grant funding to conservation partner organization to hire and appropriately distribute private land conservation biologists in field locations is an essential strategy. Continuing the existing grant agreement for supporting the Meadowlark Initiative (MI) Coordinator through the ND Natural Resources Trust is an important aspect of carrying out the increased effort and coordination of native grassland conservation.

- Funding requested: \$850,000 Grants (MI Coordinator plus 6 private land conservation biologists) (100% federal funds; match from partners)

Aquatic Nuisance Species increase - WRDA funding (Priority: 3)

State Initiative:* Health, Vibrant Communities

Explanation / Justification: The 2020 WRDA legislation passed by Congress established a new federal cost-share reimbursement program for watercraft inspection and decontamination (WID) for states in the Missouri River Basin. Therefore, the Department will be eligible to participate in the program that awards states a 50 percent reimbursement for work associated with establishing and operating watercraft inspection stations. Work-related to the monitoring of ANS is also eligible for reimbursement. The WRDA WID cost-share program could increase the funds in cost center 2700 by nearly \$860,000 a biennium. The program is expected to be provided to states annually but is dependent on congressional approval.

The WRDA cost share will further support the critical elements of the Department's ANS program. Additional funds will allow the Department to increase the size of its seasonal watercraft inspection crew and enable the Department to keep seasonals employed later into the fall. Funds will bolster the ANS education/outreach campaign and allow the Department to diversify its current campaign further to reach a broad demographic of water users. Finally, cost-share dollars will help the Department place ANS prevention devices like wash stations, CD3s, and ILIDS that help contain the spread of current ANS population and prevent new introductions.

Statutory Authority

North Dakota Parks and Recreation were created and governed by NDCC 55-08.

Agency Description

The North Dakota Park Service was created in 1965. In 1977, it was renamed the North Dakota Parks and Recreation Department (NDPRD) when it merged with the State Outdoor Recreation Agency. NDPRD offers a diversity of recreation opportunities and sustainably manages resources. NDPRD currently operates within four major program areas, as follows:

- Administration, which provides support services, such as accounting, human resource management, information technology, media relations, risk management, ADA coordination, budget functions, and policy review and development.
- Grants, Trails, and Planning, which consists of recreation grants coordination, snowmobile and off-highway vehicle trail and safety programs, statewide comprehensive outdoor recreation and trail planning, and master planning for park properties in the state system.
- Natural Resources, which manages land natural resources through planning, implementation of management strategies for improvements and enhancements and provides oversight for state nature preserves.
- Park Programs, which consists of park visitor services, operation and maintenance of infrastructure associated with park properties, and education through natural, cultural, and historical interpretation.

In addition, as trustee for the state of North Dakota, NDPRD has general supervision over the lands comprising the ND portion of the International Peace Garden.

Agency Mission Statement

We offer a diversity of recreation opportunities and sustainably manage resources.

Major Accomplishments

- 1 Successfully obligated all federal and state grant funds for the Recreational Trails Program, Land and Water Conservation Fund, and Park District Grants since the beginning of 2021. \$3.3 million, \$4.5 million, and \$5 million respectfully have been awarded to communities across North Dakota.
- 2 Worked with ND Highway Patrol on enforcement of OHV and snow mobile trails across the state.
- 3 Helped Highway Patrol and other agencies by prepositioning equipment across state prior to major blizzards. This ensured that state agencies could respond to emergencies during adverse conditions.

Major Accomplishments

- 4 Partnered with Department of Public Instruction (DPI), through an ARPA grant, to promote the availability of outdoor education opportunities in the state park system. Year to date we have hosted 2,700 students for educational field trips in six state parks. Hosted 495 students over four field days. When the students return to school, six additional field days are scheduled and we plan to film six online educational videos.
- 5 Transitioned Sully Creek State Park from a seasonal park to a year round destination.
- 6 Parks and Recreation began giving visitors and citizens the opportunity to purchase gift cards to pay for camping or concession purchases in our state parks.

Critical Issues

- 1 Meeting the rising costs of fixed expenses incurred in operating for the biennium, such as motor pool, utility costs (propane, electricity, water, and natural gas), fuel, insurance, rent, and per diem are exceeding inflationary increases.
- 2 Cyclic repairs, extraordinary repairs and deferred maintenance of buildings, staff housing, marinas, lagoons, cabins, utilities, roadways and play grounds will contribute to increased long-term backlog if funding is not maintained at current levels. The average age of structures, in our system, is 41 years. Maintaining historically accurate construction agency wide contributes to a long-term maintenance liability.
- 3 Modernizing park properties due to increased recreational demand requires infrastructure upgrades. The upgrades include adding new facilities such as campground loops, comfort stations, and visitor centers or upgrading systems such as broad band and Wi-Fi access or upgrading utilities in campgrounds to meet the demands of today's modern RV's.
- 4 NDPRD hires 160 - 180 seasonal employees to meet the demands of our customers and maintain our parks. Recruiting and retaining seasonal employees offers a variety of challenges due to the remoteness of some of our properties, lack of available housing and competitive salaries in the job market. The extension of our busy season, to shoulder seasons (pre-Memorial Day and post-Labor Day) increases the demands on our full-time staff because the summer seasonals leave.
- 5 Achieving agency salaries that are competitive with the job market and remove the salary compression of our team members.
- 6 Increasing park offerings with year round cabins and recreational activities is stretching our full-time staff. Seasonal staff works mainly from Memorial Day to Labor Day, so they are not available for the "shoulder" seasons. Full-time staff needs to increase to maintain this new infrastructure to meet our visitors growing demands.
- 7 The operation, maintenance, and repair of our marina facilities and concession management of our properties on Lake Sakakawea continues to increase. We maintain the largest collection of slips available for our visitors. These slips need to be reconfigured to maximize revenue and improve visitor experience with our lake activities.
- 8 Noxious weeds, invasive species, aquatic nuisance species and tree risk are on-going obligations of the department's natural resources program. Every year the natural resources program address these issues. Efforts to potentially reduce staffing, in this area, will lead to undesirable growth in these species, that will cost more to combat in the future biennia.
- 9 Timely equipment replacement and purchasing needs to continue for the park system to maintain grounds and facilities to the standards that our visitors expect.
- 10 Continued coordination with the International Peace Garden on project management and maintenance needs since a capital project budget passes through NDPRD over the last several biennia. Need to ensure that the Peace Garden continues to receive funding to meet their deferred maintenance challenges.

Performance Measures

The Administration Division measures performance by ensuring that the budget is spent following legislative intent without exceeding the budget limits, while ensuring that invoices are paid on time and revenue is transferred to the BND. The recruitment of seasonal employees is tracked to ensure staffing meets park needs to support summer season visitation. The communications department works on marketing to ensure that visitors come to our parks and utilize our offerings. Tracking metrics include visitation (1.29 million in 2021) and camper nights (97,200 in 2021).

Parks & Maintenance measure performance by camper nights and visitation. In addition, they track interpretive programs offered and attendance, fiscal responsibility through delivering the park budget, and maintaining the buildings and infrastructure within the park properties.

Recreation tracks the federal grants awarded and completed by grant cycle. They also track state grants, to ensure that they are completed. The completion of federal grants leaves an inspection requirement every five (5) year for all LWCF projects. Snowmobile and OHV safety training is tracked to show attendance and successful completion. Trail maintenance is completed through a combination of state, federal, private, and tribal partnerships and funding.

IPG tracks admissions and annual memberships, camping nights, volunteer hours, rental and retail revenues and social media interactions. 2022 marked the 90th anniversary of the Gardens and planning is underway both through master planning and event planning for the 100th anniversary in 2032.

Program Statistical Data

The Administration Division supports 7 FTE staff members. Staff supported by the Administration Division includes the following: Administrative Assistant II, Account/Budget Specialist I, Account/Budget Specialist II, Administrative Officer II, Business Manager II, Public Information Specialist III, and the Director of ND Parks & Recreation Department. These positions provide the support needed in customer services, executive services, financial, payroll, and human resource functions for all NDPRD sites and programs. All financial obligations are handled by the Administration Division.

The State Parks program is comprised of 12 (FTE) park managers, 9 (FTE) park rangers, 9 (FTE) maintenance supervisors, 1 (FTE) interpreter, 3.75 (FTE) administrative assistants, 1 (FTE) field operations administrator, 1 (FTE) education and program chief, 2 (FTE) regional operations chiefs, and 15 long-term seasonal employees. Annually, up to 190 summer seasonal/ temporary workers are hired as grounds maintenance, administrative assistant, park rangers, park interpreters and park attendants.

Park operating revenue exceeded \$6 million annually in calendar years 2019 and 2020. Revenue in 2021 exceeded \$5 million dollars and in 2022 is tracking to be approximately \$4.5 million. This compares to revenue that, prior to calendar year 2015, never exceeded \$3 million. The increase is due to increased visitation, increasing rental facilities offerings, and improving basic infrastructure for campers. Park operating revenue comes from user fees including annual and daily entrance passes, camping, camper cabins, marina slip rentals, full-service cabins, yurts, tipis, special events, shelter and group facility rentals, equipment rentals (canoe, kayak, skis, bikes, snowshoes, motorized and non-motorized boats) along with contracts/leases. Dynamic pricing is anticipated to optimize parks revenue moving forward as well as broaden public access in low demand periods.

Reliance on extremely volatile mineral resource revenue, to fund a portion of ongoing NDPRD operational expenses, presents a risk to future sustainability of department operations.

Park revenue can be directly related to the weather. Cool late summers, high and low water levels, extreme heat, slow fishing, damaging windstorms, lack of snow cover, and blizzards all have an impact on revenue throughout the entire year. All revenue is used to help support the operation of our parks, maintenance needs, and extraordinary repairs such as issues in our marinas, cyclic maintenance projects and equipment needs. We continue to request general funds dollars to assist in funding top-quality full-time employee salaries. Low unemployment and higher paying jobs in both public and private sectors in many areas of the state, as well as

the remoteness of some of our sites, have made it difficult to find and retain quality employees. The parks will continue to use revenue to fund operation and maintenance costs and continues to request the use of general fund dollars to assist with funding salaries (both FTE and seasonal/temporary), extraordinary repairs, cyclic maintenance projects, and equipment needs.

The Project Management Program has 2 FTE project managers and 2 FTE carpenters. Seasonal carpenters may be hired as budgets allow. The types of projects that this program oversees is diverse, as many of NDPRD's properties are, in essence, small communities in terms of infrastructure. This Program is responsible for marina repair; underground infrastructure: water, sanitary sewer, electricity, and fiber; historic and modern building exteriors; roads, trails and bridges; building interiors including carpets, windows, diverse HVAC systems, plumbing and more. This program requires the ability to function in multiple areas of knowledge and expertise in addition to construction project and contract management.

According to an April 2018 OMB report, we have over 300 structures with a value of over \$38 million. The average age of the structures is 39 years old in 2022. This value does not include the on-the-ground and underground horizontal infrastructure that exists on our properties.

The Natural Resources Program in the 21-23 biennium includes two (2) FTE: a natural resources chief and a biologist. (Reorganization removed the biologists as an FTE position and changed it to an outreach and engagement chief). When budgets allow, up to four seasonal biological technicians assist during the summer months primarily with noxious weed control.

The Natural Resources Program budget includes funding for:

- Conducting environmental reviews of state-wide biotics and LWCF Section 6(f) lands.
- Responsibility for the management and implementation of the Nature Preserves Act as prescribed in NDCC;
- Mapping and control of noxious weeds through chemical, physical and biological treatments.
- Prairie restorations and monitoring assessments
- Woody species monitoring and restorations, includi

Explanation of Program Costs

The Parks and Recreation Department's 57.75 FTE's are divided among three divisions (Administration, Park Operations and Maintenance, and Recreation) in addition we support the International Peace Garden.

The Administration Division, with 7 FTE's and 2 long-term seasonals, provides department leadership and support to the other divisions through payroll processing, accounts payable, accounts receivable, internal and external communications, marketing, human resources support, recruitment, and procurement.

Park Operation & Maintenance Division manages and maintains all our state properties, with 44.75 FTE's, 15 long-term seasonal, and up to 190 summer seasonal employees, through maintenance operations of our infrastructure and facilities. This division interacts with all visitors to our properties and is the customer facing aspect of our agency. The division also provides the law enforcement, emergency disaster support, risk mitigation, and security at all our properties. This division faces inflationary increases as the fixed costs for electricity, water, gas, IT connectivity and communications rise along with support from third party vendors to maintain the parks to a level that visitors expect. Park Operations & Maintenance is further divided among the field staff, including park managers, rangers, and

interpreters, our project management staff; which are the project managers and department carpenters, and natural resources staff, which are our biologists and technicians.

The Recreation Division, with 6 FTE's and 3 long-term seasonals, is responsible for 3 major programs: i) Federal and State grants, ii) snowmobile and OHV safety, and iii) Planning. The grants program is responsible for managing and distributing federal grants (Land and Water Conservation Fund and Recreational to Trails Program) and state grants per legislative guidance. The planning program is responsible for the Statewide Comprehensive Outdoor Recreation Plan (SCORP), park specific plans, and prioritizing capital and extraordinary repair projects. The snowmobile and OHV programs are responsible to teach youth safety and maintain the trail networks throughout the state through public/private partnerships and working with landowners.

The International Peace Garden (IPG) is a symbol of the peace between the two countries with the world's longest unprotected border. The non-profit manages the grounds and maintains them with cooperation from North Dakota and the Province of Manitoba. IPG supplies all the water to the Department of Homeland Security's Port of Entry Inspection Facility.

Program Goals and Objectives

The Administration Division's program goals relate to provision of responsible government services for internal and external customers. The department strives to deliver cost effective, quality services, provide guidance and oversight of agency fiscal operations, provide system-wide technological infrastructure, and attract and retain high-quality state government employees. Program objectives include internal customer satisfaction, clear communication techniques, and provision of efficient and effective accounting practices.

Maintain and monitor all fiscal functions of the department including accounting, budgeting, payroll, accounts payable, accounts receivable, and revenue tracking.

Oversee all functions related to human resources management including recruitment and performance management.

The Park Operation & Maintenance Division's program goals are to provides users with a quality family-oriented experience in the state parks and state recreation areas. Our main focuses continue to be customer satisfaction, efficiencies and return on investments. Minimal complaints speak to the effectiveness of our efforts. We continue to monitor park users and the public for input into park appearance, customer service, and overall quality of the experience.

The Park Operation & Maintenance Division maintains annual training efforts to keep field staff current on critical safety related certifications including peace officer training, emergency disaster protocol, risk management requirements and fire and pesticide certifications.

The Park Operation & Maintenance Division continues to monitor revenues generated by user fees to meet budget expectations and we report visitation and camper numbers for comparison to department goals.

The Park Operation and Maintenance Division represents natural resource/outdoor recreation interests in multi-agency planning meetings for statewide outdoor recreation initiatives, issues and proposals.

Project management's goals for the 21-23 biennium include implementing process improvements around project tracking, contracting and risk management initiatives. The 21-23 biennium commenced with \$2.3 million in carry over funds from deferred extraordinary repair backlog and received \$17.9 million in capital and extraordinary repair funds for the 2021-23 biennium from the November 2021-23 special legislative session. This funding was in ARPA dollars. Project management goals: by June 30, 2022, to have expended all 15-17 and 17-19 funds. By June 30, 2023, to have expended all 19-21 funds and \$10 million in ARPA funds spent; and by December 31, 2024, have all remaining ARPA funds committed.

The Natural Resources program is primarily responsible for the following areas: environmental reviews, development of site-specific natural resource management plans, the Natural Heritage Program, and the Nature Preserves Program. Noxious weed control on departmental property, tree risk assessments in parks, prairie restoration. Tools used include mapping utilizing geographic information systems (GIS) technology.

The Recreation Division's goals are as follows:

Grants Program:

- Manage grant programs in compliance with federal regulations and requirements.
- Maximize available grant funds for the benefit of ND citizens and communities.
- Utilize data-driven decision making to ensure that grant funding addresses priority needs.
- Continue working with agency partners to ensure grant funds are leveraged to the highest extent possible.
- Improve public access to grant programs through utilizing a web-based grant management system (i.e. WebGrants).
- Facilitate and optimize the Recreational Trails Program (RTP) Advisory Committee through recruiting effective, diverse members, facilitating meetings and providing appropriate education and training to the members.
- Effectively administer the Land & Water Conservation Fund (LWCF) and RTP through appropriating federal dollars, monitoring approved projects and inspecting developed projects and maintaining Title VI non-discrimination compliance.
- Guide grant applicants through the environmental compliance process and serve as the agency liaison through the environmental reviews.
- Sponsor and plan continuing education programs and conferences with a focus on programs in the grants and motorized recreation programs. Serve as the agency's liaison to peer member organizations.

Motorized Recreation Programs:

- Improve access to high-quality OHV and snowmobile safety certification courses, with a special focus on youth ridership.
- Increase access to OHV riding areas not managed by the Department.
- Coordinate law enforcement initiatives for OHV and snowmobile trails.
- Maintain the snowmobile trail system.
- Promote participation in motorized recreation through marketing and outreach.
- Manage the off-highway vehicle (OHV) and snowmobile funds' expenditures in accordance with the North Dakota Century Code.

750 Parks and Recreation

Agency 750

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The request is to add 100 year round full-service cabins to the park system. Cabins would be added to parks to allow a variety of options for visitors to utilize during their stays. Cabins would vary in size based on location of the park and their location within the park. The variety of sizes would cater to different demographics from a single family up to several families or a family reunion. The cabins would be built utilizing low maintenance materials to help reduce the cost of maintenance and allow for ease of cleaning. The cabins would increase revenue brought in by the department.

Necessary resources for implementation (including FTE's)*: 100 year round cabins would cost approximately \$37,500,000 to build and install infrastructure to support. Depending on the number of cabins added, to a park, this could require additional FTE's or money for 3rd party companies to maintain the cleanliness of the cabins between visits. Parks and Recreation may have to purchase property or easements based on the location of the cabin vs. that proximity of neighbors.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are not being redirected. The resources would be new with the additional FTE's being required to maintain the cabins for guests.

Who is served and impact of not funding*: Visitors will not have the variety of options for their stays at our parks. This could reduce the ability of families to enjoy the healthful benefits and creating memories in our state parks. Services a need for accommodation for park users in the 12 month use parks. In a 2022 survey, done for the 2023-2027 State Comprehensive Outdoor Recreation Plan, 55% of respondents indicated a high interest in full-service cabins.

Deferred Maintenance and Capital Projects (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	5,000,000	5,000,000	0.00
General	-	30,000,000	30,000,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	5,000,000	5,000,000	0.00
Total	-	30,000,000	30,000,000	0.00	-	10,000,000	10,000,000	0.00

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request \$30 million dollars to continue to work through the \$70+ million dollar backlog of deferred maintenance and capital projects that Parks and Recreation has. We maintain 130 miles of paved roads, over 330 buildings, multiple under ground utilities and camp sites. Park infrastructure has a life cycle that increases with preventive maintenance, but eventually the infrastructure require significant intervention or removal. Maintenance is a major undertaking, due to having to hire several different trades and companies, based on where the parks are located throughout the state. The

750 Parks and Recreation

Agency 750

continued work to repair and maintain park properties enhances the visitor experiences. In addition, older facilities often do not meet current code requirements, are not ADA compliant or are energy inefficient. Updates to systems, modifications or replacements are necessary to bring them up to current standards.

Necessary resources for implementation (including FTE's)*: \$30 million dollars is necessary to implement this with the ability to use it on deferred maintenance and capital projects.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for new funding. No resources are being redirected. There will be no requirement to hire additional FTE's since we will continue to utilize our Planning Division to conduct the work or hire the vendors.

Who is served and impact of not funding*: Not funding this request will lead to the deterioration of park infrastructure. This will reduce visitors abilities to create lasting memories, across generations. Outdoor recreation, in state parks, will suffer as the parks can't maintain basic infrastructure for visitors to utilize with their families. Potential over time for lost revenue as visitors choose other outdoor recreational options. Poorly maintained facilities increase risk exposure and outdated systems increase ongoing operating costs.

LTS Position Conversion to FTE (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	2,035,090	-	2,035,090	7.00	-	-	-	0.00
Special	-	-	-	0.00	143,086	-	143,086	6.25
Total	2,035,090	-	2,035,090	7.00	143,086	-	143,086	6.25

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Currently, Parks and Recreation is authorized 57.75 full-time employees (FTE) per HB 1018. To ensure that the citizens of North Dakota and all visitors are served the parks utilize long-term seasonal employees. These employees are vital to the operation of our parks performing maintenance, administrative, and law enforcement functions. Our long-term seasonal team members are year round employees that work side by side with our FTE's. They are FTE's in everything but classification. This lack of FTE status has led to large turnover in our long-term seasonal employees. They leave us to receive benefits (vacation/retirement) and higher wages. As they leave we lose their knowledge and abilities. This biennium has seen a 60% turnover (12/20) of the long-term seasonal staff. The long-term seasonals informed us that they are leaving to obtain higher wages and/or benefits (vacation and retirement). Converting 6 long-term seasonal positions and our 0.75 FTE to full-time employees would start the process of reducing the turnover in these positions. It would also allow the team members to develop ownership of their parks and help with improving the services/support offered to the citizens of North Dakota and other visitors when they staff at state parks.

750 Parks and Recreation

Agency 750

Necessary resources for implementation (including FTE's)*: The conversion of 6 long-term seasonals and 0.75 FTE to full-time state employees would require an increase in general fund authorization of FTE positions by 6.25 FTE positions. This will move our 0.75 FTE to a full FTE and transfer 30% of our long-term seasonals to FTE positions. This would require \$996,250 additional general fund dollars.

Are resources being redirected or are they new or additional (including FTE's)*: The general fund dollars would be new resources directed to the department.

Who is served and impact of not funding*: This would allow Parks and Recreation to hang onto our vital workers and serve our visitors who utilize our parks to recreate. If we are not funded, we will continue to have turnover issues which will continue to degredate our ability to meet our visitors demands and maintain our parks. As people turnover, this places more and more work on our already stretched FTE staff, which is starting to lead to turnover in that group. We have a turnover rate 17.3% (10/57.75) in our FTE staff this biennium. This conversion will reduce the time required to recruit and train replacements. It is becoming increasingly difficult to find new hires willing to take on a position that is not an FTE.

Pembina Gorge Campground Construction (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	428,848	15,750,000	16,178,848	3.00	-	-	-	0.00
Special	-	-	-	0.00	-	8,000,000	8,000,000	0.00
Total	428,848	15,750,000	16,178,848	3.00	-	8,000,000	8,000,000	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Currently the Pembina Gorge is a state recreation area. The Pembina Gorge is a "meeting place" of the prairie and the northeastern forest biomes and a lot of species coexist in this area. The construction of a campground would move the Pembina Gorge from a state recreation area to a state park. This would allow people to prolong their stay in the area and help with the economic development and diversification of the Pembina Gorge area. We plan to construct the campground through a combination of public and private funds as well as grants. The department will reach out to secure private funds and federal grants. This will offset the cost of the construction of the campground for the state. The campground will allow visitors to enjoy the beauty of the Pembina Gorge. The construction would entail building park infrastructure, camping infrastructure to include camping pads and full-service cabins, and support infrastructure for park employees. Easements will need to be updated and roads will need to be constructed to handle the expected increase in traffic using the park.

Necessary resources for implementation (including FTE's)*: This will require the investment of \$15,000,000 to develop the campground and support infrastructure. The campground would require staff of 4 individuals. There is currently a manager of the Pembina Gorge. We would have to add a ranger (law enforcement), maintenance supervisor and administrative assistant, these 3 positions would add \$511,432 to the cost of the camp ground construction. Pembina Gorge will also require equipment to maintain the park infrastructure. We estimate that the necessary equipment will cost an additional \$750,000. Road construction/maintenance and easements are estimated at \$600,000.

750 Parks and Recreation

Agency 750

Are resources being redirected or are they new or additional (including FTE's)*: The resources for this would be new funding for the campground and 3 new FTE positions.

Who is served and impact of not funding*: If this is not funded, the area will not be utilized to its full potential. This will result in lost revenue and lost visitation due to not having the facilities to support multi day visits. This also impacts other recreational venues or potential venues in the area thus the impact is a loss to the regional economy.

State Park Matching Grant Program (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	1,500,000	1,500,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	3,000,000	3,000,000	0.00
Total	-	1,500,000	1,500,000	0.00	-	3,000,000	3,000,000	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In the 2021-2023 biennium, the Legislature granted Parks and Recreation \$1,632,800 for a Parks Matching Grant Program. These funds were \$816,400 from state sources and \$816,400 from non-state sources. Parks and Recreation was able to utilize those funds for capital project improvements. We were able to start opening the door to engaging private sector partners. We request \$3,000,000 for a Parks Matching Grant Program for the 2023-2025 biennium. This would be \$1,500,000 from state sources and \$1,500,000 from non-state sources with the funds to be spent on capital project improvements subject to the department obtaining matching funds from non-state sources on a dollar-for-dollar basis.

Necessary resources for implementation (including FTE's)*: The state would provide \$1,500,000 for the state portion of the match, subject to Parks and Recreation finding a dollar-for-dollar match from non-state sources for each capital project.

Are resources being redirected or are they new or additional (including FTE's)*: The funding would be a continuation of the \$816,400 + \$683,600 in new funding. No additional FTE's would be required.

Who is served and impact of not funding*: The citizens of the state of North Dakota would be served, as well as, those people visiting our parks to recreate. If this is not funded, we lose the opportunity to double our money with private individuals that have a passion for our parks and want to improve them.

750 Parks and Recreation

Agency 750

City, County, and Tribal Park System Grants (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	5,000,000	5,000,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	6,000,000	6,000,000	0.00
Total	-	5,000,000	5,000,000	0.00	-	6,000,000	6,000,000	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In the 2021 Special Session, Parks and Recreation received \$5,000,000 for the purpose of providing grants to local park districts. There was a tremendous response from the park districts. This grant left out city, county, and tribal park systems, which also have a need for these grants. We would request to receive \$5,000,000 for the purpose of providing grants to city, county, tribal park systems. The purpose of the grants would be to renovate and upgrade existing facilities with the priority for outdoor facilities for the 2023-2025 biennium. City, county, and tribal park systems would be required to provide a dollar-for-dollar match for any funds received. No city, county, or park system could receive more than \$750,000.

Necessary resources for implementation (including FTE's)*: This would require a grant of \$5,000,000 from the state of North Dakota. No additional FTE's would be required to administer the grants. Parks and Recreation would utilize the current system that it is using for the park district grants.

Are resources being redirected or are they new or additional (including FTE's)*: The \$5,000,000 awarded for park district grants would be redirected to the city, county, and tribal park systems to fund this grant.

Who is served and impact of not funding*: The cities, county, and tribal park systems are impacted along with their citizens. It will ensure residents have an outdoor space to recreate in close to home. If this is not funded, the city, county, and tribal park systems will continue to have deferred maintenance issues to deal with. Many types of recreational facilities are available exclusively at the local level. Deferring maintenance further, will in some communities, mean that certain facilities, such as pools or older artificial turf fields, would to be taken out of service for safety and liability reasons.

Increase Special Spending Authority (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	1,750,000	-	1,750,000	0.00	1,750,000	-	1,750,000	0.00
Total	1,750,000	-	1,750,000	0.00	1,750,000	-	1,750,000	0.00

750 Parks and Recreation

Agency 750

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request an increase in the spending authority of special funds for Parks and Recreation. We are requesting to increase our spending authority by \$1,750,000 over our current base budget. This increase is requested due to the increase in visitation has increased the value of our operating fund. We anticipate this increasing as we add dynamic pricing to our system. Dynamic pricing will help optimize the department’s revenue through adjusting prices based on availability of camping resources. This increased spending authority will give the department added flexibility to take advantage of opportunities as they present themselves. The additional appropriation will help with improving efficiency by allowing us to test new technologies.

Necessary resources for implementation (including FTE’s)*: Parks and Recreation would not require any additional resources to implement this ask.

Are resources being redirected or are they new or additional (including FTE’s)*: No resources are being redirected to accomplish this ask.

Who is served and impact of not funding*: The Parks and Recreation department will be impacted by not approving this funding request.

We will lose the flexibility to react to opportunities that present themselves during the biennium to improve the park system and increase visitor satisfaction.

Way Finding (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	15,000,000	15,000,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	15,000,000	15,000,000	0.00	-	-	-	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Due to the results of multi biennium construction and maintenance of state parks, we have no standardized entrance signs or way finding signs. We are looking to standardize our way finding signs to ensure that all parks have signs that are consistent across the system to direct visitors to our parks. Way finding signs would also be standardized within the parks, to ensure that visitors have an ease of finding trails, infrastructure, and other park amenities while in the park. We would also improve our entrance signage so that visitors can see it as they arrive at their destination.

750 Parks and Recreation

Agency 750

Necessary resources for implementation (including FTE's)*: Due to the amount of signs needed to standardize park way finding and the required improvements to entrance signs, this project is estimated to cost \$15,000,000.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected and this will add no new FTE's.

Who is served and impact of not funding*: The current mix of older sign designs and graphics does not communicate a positive branding of a 21st century North Dakota park system. Visitors are impacted by not standardizing and improving our way finding signage. The improved entrance signage will help identify, to the visitors, that they have reached their destination without having to figure out which sign is the correct one, due to the variety of signs that are currently in use within our park system. The standardization of signs within the park, will allow visitors to more easily reach their desired destination from the visitor center to trail heads.

Ft. Lincoln On-A-Slant Village Rebuild (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	1,750,000	1,750,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	1,750,000	1,750,000	0.00	-	-	-	0.00

State Initiative*: Tribal Partnerships

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request \$1,750,000 to rebuild the On-A-Slant Village located at Ft. Abraham Lincoln State Park. The current village is in need of repair due to deterioration of the wooden support members of the earth lodges. We would use modern materials and techniques to increase the life span of the buildings and reduce the maintenance requirements. We would be able to simulate the village, as it would have been when the Mandan people occupied the site. We would work with the MHA Nation to ensure that the rebuild is true to reality and help us with the interpretation of the site. Our interpretive staff would update the site for self-guided and guided tours to ensure that the Mandan story is portrayed accurately.

Necessary resources for implementation (including FTE's)*: The resources required would be the funding of the project to ensure that we could utilize modern construction techniques to rebuild the village and reduce maintenance requirements.

Are resources being redirected or are they new or additional (including FTE's)*: There are no resources being redirected. The new resources would be for the reconstruction of the On-A-Slant Village.

Who is served and impact of not funding*: The visitors to Fort Abraham Lincoln would be served with a rebuilt village to understand what life was like in North Dakota before the settlers came. It would also help us strengthen our relationship with MHA Nation. If not funded, the village will continue to be maintained in a piecemeal basis. The use of traditional building materials and techniques is getting harder to find and significantly increasing in price. The repairs/rebuilds also have a much

750 Parks and Recreation

Agency 750

shorter life span compared to modern materials and techniques. We will most likely reach a point where even piece-meal fixes wouldn't be enough and we would have to close or remove these structures.

Lake Metigoshe Reimagined (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	329,104	8,000,000	8,329,104	2.00	-	-	-	0.00
Special	-	-	-	0.00	-	750,000	750,000	0.00
Total	329,104	8,000,000	8,329,104	2.00	-	750,000	750,000	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The current layout of Lake Metigoshe State Park is not ideal for the visitor experience. This project would look at relaying out the park to serve the visitors and ensure more efficient use of space and park staff time. The project would conduct a new master plan for the park to ensure that the layout of the park increases visitor interaction with nature and improves their experiences. This would lead to a new entrance road being constructed to help remove the safety hazard from the limited roads into the park. Additionally, a new visitor center would be constructed to allow for the park staff to have adequate space to work and offer programming to the visitors. The reimagining of the park would also require the demolition, movement or building of park buildings to ensure that structures are placed in the correct location to improve park efficiencies. The camp ground loops would have up graded services and the sites would see an increase in size to accommodate today's modern recreational units. Full-service cabins and yurts would be added to the park, to increase the opportunities to use the park to recreate outdoors for our visitors.

Necessary resources for implementation (including FTE's)*: The reimagining of Lake Metigoshe State Park would cost an estimated \$8,000,000 and may require the addition of 1-2 additional FTE positions in the park (\$172,000 - \$343,950 additional general fund dollars). Utilizing modern technologies to improve the visitor arrival and camping experience will improve the efficiencies of the park and reduce the wait for visitors.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected. This would require new resources to be authorized to improve the park operating efficiencies.

Who is served and impact of not funding*: If this is not funded then the park continues to operate as it already does and the visitors are negatively impacted. This is seen in some of the best lake views being taken up by park staff housing, congestion during the busy season at the park entrance, and buildings that need to be removed to allow for more recreation opportunities for visitors. Improvements at Lake Metigoshe would support the improvements being under taken by the International Peace Garden for the United States' 250th anniversary and the 100th anniversary of the Peace Garden. The Turtle Mountain Band of Chippewas are improving recreational trails to improve the recreation and tourism potential of this northern tier strip of the State of North Dakota. The properties flank Lake Metigoshe State Park.

750 Parks and Recreation

Agency 750

Equipment Life Cycle Replacement (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	858,700	-	858,700	0.00	858,700	-	858,700	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request funding to replace equipment that has reached and exceeded its life cycle. Currently, Parks and Recreation is utilizing several pieces of equipment that have exceeded their life cycle. This increases the costs to maintain the equipment and it is getting harder to find replacement parts. This leads to additional time required to perform routine tasks, thus reducing the park staff's efficiency. Replacing aged equipment helps with the retention of staff since they spend more time performing meaningful tasks as opposed developing work arounds to make equipment usable. This improves employee morale and increases efficiency.

Necessary resources for implementation (including FTE's)*: This would require funding of \$1,750,000 to purchase new equipment to replace equipment that has reached or exceeded its lifecycle.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being redirected.

Who is served and impact of not funding*: Not replacing the equipment increases our costs and reduces our ability to maintain state property to the standard that the visitors expect.

Statutory Authority

Chapter 61-03 of the North Dakota Century Code

Agency Description

The North Dakota Department of Water Resources (DWR) was created in 2021 by legislative action through House Bill 1353. DWR was previously called the State Water Commission, which itself was created by legislative action in 1937 for the specific purpose of fostering and promoting water resources development throughout the state. In addition to the creation of DWR, the 2021 legislation also moved functions of the Office of the State Engineer, established in 1905, within the DWR and allows the Governor to appoint a DWR Director, subject to approval by a majority of the members of the State Water Commission per NDCC § 61-03-01.1.

DWR has the authority to investigate, plan, construct, regulate, provide water appropriations, develop water-related projects, and serves as a mechanism to financially support those efforts throughout North Dakota. There are currently six divisions that make up the DWR: Administration, Atmospheric Resources, Planning and Education, Regulatory, Water Appropriation, and Water Development.

Agency Mission Statement

To responsibly manage North Dakota’s water needs and risks for the people’s benefit.

Major Accomplishments

- 1 Continued design, construction, and operation of the Southwest Pipeline and Northwest Area Water Supply Projects.
- 2 Continued to operate two Devils Lake outlets that combined have removed approximately 1.3 million acre-feet of floodwater since 2007.
- 3 Contributed toward the advancement of large-scale community flood control projects in the Mouse, Sheyenne, Missouri, Red, and Park River basins.
- 4 Continued implementation of life cycle cost analyses of water supply projects, and economic analyses of flood control and water conveyance projects. Both result in more efficient allocation of state and local funds.
- 5 Provided financial support to the Garrison Diversion Conservancy District to advance the Red River Valley Water Supply and Eastern North Dakota Alternative Water Supply projects.
- 6 Conducted extensive ground and surface water evaluations in several areas throughout the state that assist with water management decision-making.
- 7 Continued to maintain a strong water right permitting process and worked to find efficiencies that provide for the orderly development of water resources in the state.
- 8 Continued to conduct research and make data available for public consumption from advanced technologies such as Airborne Electromagnetic (AEM) surveys, Pushing REmote SENSors (PRESENS), and drones – all of which support efficient and cost-effective data and imagery collection.
- 9 Administered the cost-share program to provide financial support to political subdivisions for locally led projects that protect public safety, enhance quality of life, and promote economic development.
- 10 Began an extensive review and modification of the Project Funding Policy, Procedure, and General Requirements; and the Project Prioritization Guidance.
- 11 Managed the Drought Disaster Livestock Water Supply Program to mitigate drought related impacts to the state’s livestock industry. Over 1,500 projects were approved for 1,100 producers over the course of the 17-month 2021 activation, with over 870 projects completed as of September 2022.
- 12 Completed a new five-year agency strategic plan following the passage of HB 1353 that created the Department of Water Resources.

Major Accomplishments

- 13 Participated in various international water management initiatives involving the International Souris River Board, International Red River Watershed Board, Assiniboine River Basin Initiative, and Red River Basin Commission.
- 14 Worked with water project sponsors throughout the state to identify water project funding and infrastructure needs for the 2023-2025 biennium and beyond.
- 15 Provided support for water education opportunities involving thousands of grade school students from various grade levels.
- 16 Utilized state-of-the-art technologies to provide hail suppression and rainfall enhancement cloud seeding services to participating counties.
- 17 Continued development and deployment of innovative IT infrastructure to address complex water resource management initiatives.
- 18 Cooperated with other state agencies involved in water project funding to develop a one-stop-shop online application portal through WebGrants.

Critical Issues

- 1 The agency seeks to maintain funding provided through the Resources Trust Fund to advance water infrastructure.
- 2 Following the floods of 2011, there is an ongoing need to assist large and small communities with the advancement of flood-protection studies and projects in the Mouse, Sheyenne, Missouri, and Red River basins.
- 3 Continued advancement of the Pushing REmote SENSors (PRESENS) network is critical to supply much-needed and reliable water resource data at an affordable rate.
- 4 Missouri River water development must be relentlessly pursued to secure North Dakota’s share of water flowing through the state.
- 5 To operate and maintain the state’s emergency Devils Lake Outlets in an environmentally sound manner.
- 6 Technical and funding assistance toward the advancement of large-scale flood control projects for the greater Fargo-Moorhead metro area, Mouse River, Sheyenne River, and Missouri River systems are critical to the protection of lives and the long-term economic well-being of those regions and to assist with flood protection for smaller communities.
- 7 Continued sound management of North Dakota’s sovereign lands and navigable waterways in a sustainable manner.
- 8 Providing reliable, quality water supplies in areas where they are experiencing growing populations or water quality concerns continues to be a challenge.
- 9 A survey of water supply systems across the state suggests that cities and rural water supply systems will have tremendous financial challenges to address aging infrastructure that is at or nearing the end of its useful life.
- 10 Studies to identify opportunities for groundwater recharge will be necessary to support the state’s future options for additional water supplies and resiliency.
- 11 Continued support of dam safety efforts, including Administrative Code improvements related to dam safety classifications, and tracking of emergency action plans and operation plans as required to ensure protection of people and property downstream of these structures.
- 12 Additional resources are necessary to compensate existing and new team members at a level that allows the DWR to adequately retain and attract qualified individuals who support the agency in effectively accomplishing its mission and statutory requirements.
- 13 Identify a suitable long-term location to house the DWR that provides an environment that allows team members to complete necessary job functions and serve constituents.

Performance Measures

The DWR established the following metrics in the July 1, 2022 five year strategic plan.

Quarterly Internal Review

- Conduct internal self-scoring of progress on objectives, goals, and tactics as an agenda item at quarterly DWR Strategic Plan Leadership meetings

Surveys

- External
 - o Use surveys and interviews conducted from January 2022 – April 2022 as baseline
 - o Conduct a simplified annual survey of stakeholders
- Internal
 - o Develop and implement an annual DWR in-house morale and culture survey

Staffing

- Evaluate and compare staff turnover rates on at least an annual basis
- Track number of hours worked in excess of a standard work week

Water Resources

- Quantify water use in the state and track over time
- “Heat map” for areas without quality water access

Projects

- Amount of funding committed to water infrastructure and development
- Percent of project financial needs addressed that are included in the Water Development Plan
- Amount of water put to beneficial use
- Number of overall projects funded
- Number of counties affected by new state investments in rural and municipal water systems
- Number of successful irrigation projects or irrigation acres

770 Water Resources

- Miles of pipeline funded
- Population protected from 100-year flood events
- Cost/benefit ratios for projects
- Model value of protected property/economic impact
- Changes in flood insurance policies and rates
- “Heat map” of area flood risks and changes over time

Missouri River

- Population served by Missouri River water
- Amount of water withdrawn from Missouri River

Cash Management

- Reduction in carry-over funds

Responsiveness

- Turnaround time for public inquires
- Number of applications approved/permits issued
- Track time from application to issuance

Signing of MOUs with Tribal Nations

Program Statistical Data

The Department of Water Resource’s base budget totals \$409,347,227. The budget contains \$348,276,995 of special fund authority and \$61,070,23 of federal fund authority.

The DWR’s appropriation has increased \$865M or 1,276% since the 1997-99 biennium. During the 1997-99 biennium, the DWR had 82 FTE positions for a total of \$827,253 of appropriation authority per FTE and has since increased to 90 FTE positions in the 2021-23 biennium for a total of \$10,368,470 of appropriation authority per FTE.

The DWR has deployed more than 200 PRESENS sensors at an average cost of \$1,200 per sensor and plans to have 680 units installed by 2025 providing 18 million measurements per year.

The DWR continues to have a regulatory permitting backlog with the average time to complete review of 40 to 811 days depending on the type of permit but has established goals that includes additional FTEs in the DWR's optional requests that would allow the department to establish a goal for average processing time from 14 days to 120 days depending on the type of permit.

The DWR continues to have a water appropriation permitting backlog. Since 2000 the number of temporary water permit applications has increased by 250% while the volume of water being requested has increased 10 fold. The Water Appropriation Division currently has a backlog of 501 permits.

Since the transition from the Office of the State Engineer to the Department of Water Resources, the DWR has had an increase of more than 117% in Director-level presentations and news releases, and media interactions have increased 300% since 2019.

Explanation of Program Costs

The authorizing legislation for the DWR is found in Title 61 of the North Dakota Century Code. Primary DWR functions and statutory responsibilities include:

- Allocation of the state's waters, including obtaining and recording data for the determination, development, and appropriation of the state's waters
- Hydrographic surveys and investigations of each stream system and source of water supply in the state, beginning with those most used for irrigation
- Facilitation of water rights determinations
- Water-related data collection
- Dam safety, including receipt of emergency action plans for high-hazard or medium-hazard dams
- Construction and drainage permits
- Staffing and analysis for the State Water Commission and execution of its decisions
- Rulemaking authority
- Oversight of water storage reservoirs
- Implementation of economic analysis for water conveyance projects and flood-related projects
- Implementation of life cycle cost analysis for water supply projects
- Cooperation with federal agencies in the execution of topographic surveys and maps of North Dakota
- Custodian of all plats, field notes, and similar records provided to the state by a federal government entity
- Inspection or investigation of alleged statutory violations
- Removal or modification of unsafe or unauthorized works

- Sovereign land management
- Removal, modification, or destruction of dangers in, on the bed of, or adjacent to navigable waters
- Hearings for persons aggrieved by an action or decision of DWR
- Cost-Share Program administration
- Floodplain management
- Cloud Modification Program administration
- State Water Development Plan
- Emergency response

Program Goals and Objectives

1. Effectively communicate with the public and stakeholders with a primary focus on collaboration and building partnerships with the following goals:
 - a. Increase public outreach and public relations to inform citizens of the DWR's mission, vision, and values for the purpose of broadening public education, awareness, and support.
 - b. Expand communication efforts to improve opportunities to better inform DWR stakeholders about operations, priorities, projects, programs, and data resources both within and outside the DWR.
 - c. Establish a communication process to regularly update decision makers on the DWR's mission, vision, values, and progress, and to equip decision makers to make informed decisions regarding DWR and water-related issues.
2. Develop world-class, sustainable, and resilient water development and management practices.
 - a. Support smart, efficient infrastructure and improve resiliency to floods and drought.
 - b. Assist and support public entities and citizens.
 - c. Complete water project planning efforts with continued emphasis on short and long-term planning horizons and incorporation of best practices.
 - d. Engage key stakeholders to provide education on water resources, identify needs, and develop policies and projects to support business, industry, and economic development.
 - e. Support efficient allocation of state investments in water infrastructure.
 - f. Support efforts to develop and improve irrigation opportunities where appropriate.

- g. Continue efforts toward resolution of tribal water rights.
 - h. Maintain and operate the Devils Lake Outlets and Tolna Coulee Control Structure.
 - i. Enhance sovereign lands for shore fishing, canoeing, swimming, hiking and other forms of water recreation.
3. Support beneficial use of Missouri River system water and other available water supply sources.
- a. Support smart, efficient infrastructure and improve resiliency to floods and drought.
 - b. Complete construction of the Northwest Area Water Supply Biota Water Treatment Plant Phases I and II, Minot Water Treatment Plant Phase III, and the Souris Reservoir and Pump Station.
 - c. Work with Garrison Diversion Conservancy District in their efforts to advance the Red River Valley Water Supply project, Eastern North Dakota Alternative Water Supply (ENDAWS), and Central North Dakota Water Supply (CNDWS) projects.
 - d. Secure additional allocations for irrigation and industrial water use, including from the Missouri River.
 - e. Collaborate and develop MOUs with tribes for sharing of information, water needs assessments, allocations from the Missouri River, protection of water rights, and access to capital for water projects.
 - f. Collaborate with the Dept. of Commerce to identify and support economic development opportunities that strengthen ND's economy.
4. Implement innovative ideas, technology, and grow analytic capabilities to improve efficiencies in water management and development.
- a. Expand the Pushing REmote SENSors (PRESENS) initiative to a fully integrated solution for hydrologic data collection.
 - b. Enhance data analysis tools, including use of artificial intelligence, to leverage available data and collection technology for improved water management.
 - c. Streamline application processes and make it easier for stakeholders and the public to access services through on-line portals and project dashboards.
 - d. Continue improving automation of warnings, alerts, and pending water use regulatory actions.
 - e. Continue the refined delineation of the state's ground water resources.
 - f. Improve user accessibility of LIDAR and GIS mapping services through the website.
 - g. Support research into irrigation technologies and promote more efficient irrigation practices.
 - h. Continue to support research and identify opportunities for water storage, aquifer recharge, and water reuse.
 - i. Work with NDIT to develop and enhance DWR technology capabilities and initiatives.

5. Improve the DWR's internal resilience and promote a positive culture.

- a. Attract and retain highly qualified team members.
- b. Improve agency-wide communication, increase awareness of department-wide activities, and foster interaction of top DWR leadership with team members.
- c. Empower team members to improve and grow through educational opportunities and professional development.
- d. Modernize software, implement best practices for cyber security, and create redundancy of knowledge necessary to utilize unique DWR business applications.
- e. Build an organizational culture that is fair, objective, accountable, responsive, engaged, and credible.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Market rate increases have been outpacing employee raises resulting in the DWR experiencing salary compression. Currently the department has 63 employees who are below market rate for salary. The department’s budget is based on current salaries which does not leave room to adjust employee compensation to offset compression.

Necessary resources for implementation (including FTE’s)*: The department needs funding to provide flexibility outside of relying on salary savings from vacant positions to adapt to market shifts. The specialized positions within the department are highly competitive and it is more expensive to hire and train new employees than it is to retain them by potentially meeting market rates for salary.

Are resources being redirected or are they new or additional (including FTE’s)*: Redirected

Who is served and impact of not funding*: North Dakota citizens experience delays in services when staff turnover occurs. DWR staff morale and desire to continue working with the department are negatively affected as they are experiencing increased pressures from the private industry, who are providing higher salaries with comparable benefits.

The management of water resources requires unique technical expertise. The department needs to be able to compensate staff at a level comparable to market rate. Retention is extremely important for this agency due to the complex technical nature.

Add FTEs (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	1,120,272	32,200	1,152,472	5.00	753,742	19,320	773,062	3.00
Total	1,120,272	32,200	1,152,472	5.00	753,742	19,320	773,062	3.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Regulatory Division:

North Dakota's water projects have increased in complexity and volume, which in part is correlated closely to the increased funding for flood control and surface water projects. Additionally, the litigious nature of water-related issues such as drainage and water resource board decisions has also increased, thereby increasing the complexity of reviews and lengthening review timelines. In order to stay within reasonable and timely service, this position is needed.

Planning and Education Division:

The passage of House Bill 1353 demonstrated the Legislature and Governor's Office support for fundamental changes to the Water Commission - now DWR. Along with the new name, new leadership, and reorganization of the agency, there was/is also a new and expanded expectation and emphasis on citizen engagement, information dissemination, outreach, transparency, and agency branding - involving internal and external efforts. DWR has one PIO, so additional duties and responsibilities have largely been absorbed by the PIO and a Water Resource Planner. An outreach and engagement director will assist the agency with being open and transparent in order to continue to build trust.

Water Appropriation Division:

The Water Appropriation Division (WAD) is experiencing an unprecedented backlog of work that is adversely impacting the ability of the division to respond to permit application requests and other permitting processes tied to the management of North Dakota's water resources. Historically, there has always been some variation in workload within the division, but over the past 10 years, there have been significant increases in the tasks that are clearly not cyclical and there are no indications that this will be mitigated moving forward without more staff resources to address increased workload. Without this position the backlog will continue to increase.

Data and Technical Services Division:

The PRESENS (Pushing REmote SENSors) datalogger was designed to provide near real-time water resource and environmental conditions data so decisions and actions can be made based on current data. The PRESENS program was created by leveraging the talent of internal staff with the scientific background and knowledge of data needs of the DWR. The PRESENS program so far has been a resounding success. PRESENS has proven to be valuable and adaptable to record new data, such as precipitation, soil temperature, and soil moisture. The program can continue to be expanded, refined, and collaborative for others by adding the position.

Administration Division:

The Administrative Services Division provides the overall direction of the DWR powers. Activities include operations, DWR accounting, budget and fiscal control work, human resources, records management, and support services for all DWR programs. Adding this position will allow the Administration Division to provide better support, ensure the accuracy of accounting and cost-share program records, and facilitate the development of the department's budget.

Necessary resources for implementation (including FTE's)*: FTE authorizations and related funding

Are resources being redirected or are they new or additional (including FTE's)*: Redirected

770 Water Resources

Agency 770

Who is served and impact of not funding*: Delays in receiving permits and water appropriations in a timely manner. The agency will continue to fall behind its mission and responsibilities. In addition, the public, communities, and private landowners should be able to easily understand the role and responsibilities of the department and how to work with the department through education and outreach.

Full time temporary position funding (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	170,000	-	170,000	0.00	170,000	-	170,000	0.00
Total	170,000	-	170,000	0.00	170,000	-	170,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The NAWS system has expanded considerably in the last couple of biennia to 260 miles of pipe and five pumping stations which will serve more than 80,000 customers. Currently NAWS has one operator on the distribution side and one field inspector for construction.

Necessary resources for implementation (including FTE's)*: To evaluate the long-term personnel needs for the distribution side, this temporary position is requested.

Are resources being redirected or are they new or additional (including FTE's)*: Redirect

Who is served and impact of not funding*: Citizens and communities in northwestern North Dakota are served by NAWS. Funding this position will insure streamlined operation of the system as the department works to partner with Minot in operating the biota treatment plant and completing projects necessary to receive and distribute water from Lake Sakakawea.

Increased North Dakota Motor Pool rates (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	118,180	-	118,180	0.00	-	118,180	118,180	0.00

770 Water Resources

Agency 770

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Inflationary pressure is impacting current travel expenses and the North Dakota Motor Pool announced increased rates for the July quarter moving forward that represent an average increase across the vehicle fleet which is between 10% and 15%.

Necessary resources for implementation (including FTE's)*: The current Travel budget includes ND Motor Pool vehicle costs as well as room rental rates and reimbursement for meals, etc. Approximately 55% of the Travel budget is dedicated to Motor Pool vehicle costs.

Are resources being redirected or are they new or additional (including FTE's)*: Redirect

Who is served and impact of not funding*: Travel to locations is necessary to accomplish the tasks of the department. The inability to travel due to budgeting constraints will impact the services provided to the citizens of North Dakota.

PRESENS Installations and temporary salaries (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	1,572,800	-	1,572,800	0.00	1,572,800	-	1,572,800	0.00
Total	1,572,800	-	1,572,800	0.00	1,572,800	-	1,572,800	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As many of North Dakota's water resources begin to approach full appropriation (sustainable yield), more and more effort will be required to manage these systems to push any additional water appropriations forward. Beyond identifying remaining water appropriation that can be achieved to approach sustainable yields, alternatives which could include artificial recharge, temporary wet-cycle appropriation, as well as any number of ideas that may be presented to increase potential yield or improve water use efficiencies will need to be considered moving forward.

This includes the need to develop more comprehensive modeling capabilities with the ability to integrate real-time or near real-time data.

Over the past five years, the Department of Water Resources (DWR) has developed the PRESENS data system for the purpose of providing a near real-time data collection platform and for purposes of expanding the available data to include additional water resource specific data beyond just water levels. This project has

770 Water Resources

Agency 770

moved from the design and development stages to full implementation and deployment over the past five years. By the end of 2022, the DWR will have deployed more than 300 PRESENS data loggers across the state. Currently, the DWR has the capacity to deploy nearly 150 PRESENS data loggers per year which could lead to more than 500 installed devices by the end of this biennium. When considering the more than 3,500 active observation wells along with the additional sites for the purpose of collecting precipitation, soil moisture, and soil temperature, it is currently anticipated that there will be a need for as many as 4,000 to 5,000 active PRESENS devices for deployment throughout North Dakota.

PRESENS data loggers are currently surface water installations, which are temporarily installed in the spring and removed in the fall to avoid damage from ice. Annual installation and removal is labor intensive. Therefore, the plan going forward is to install stilling wells to create permanent locations.

The current volume of temporary permit requests is estimated to consume 50 to 60 percent of the available staff resources, which includes four hydrologists. The permanent installation of PRESENS data loggers in stilling wells will reduce the seasonal need for staff to install the loggers.

Necessary resources for implementation (including FTE's)*: The planned installation schedule requires additional field staff to accommodate the additional field work. The plan is to accommodate the additional work load through seasonal staff or summer interns. The addition of seasonal staff and summer interns will require an additional \$345,000 and materials costs of \$602,800 for a total of \$947,800 for the biennium.

The DWR has identified costs for the drilling of a typical stilling well is approximately \$25,000 per site. Due to time constraints associated with installation, combined with constraints imposed by landowner approval, the DWR to drill and install 25 sites per biennium at a cost of \$625,000 per biennium for a total of \$1,250,000.

Are resources being redirected or are they new or additional (including FTE's)*: Redirected

Who is served and impact of not funding*: North Dakota citizens and water managers across the state requesting water appropriations will experience delays. Near real-time data collection and monitoring provides DWR staff more reliable data for new water appropriations and monitoring of the state's limited and/or near fully appropriated water resources. This is important for the management of water resources state wide.

Drilling supplies inflation cost increases (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	180,000	-	180,000	0.00	-	180,000	180,000	0.00
Total	180,000	-	180,000	0.00	-	180,000	180,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

770 Water Resources

Agency 770

Request explanation and justification (include any statutory authority)*: The Department of Water Resources Water Appropriation Division (WAD) maintains drilling operations to support the on-going delineation and management of North Dakota's groundwater resources. While much of North Dakota's groundwater resources have been fairly well defined over the past several decades, WAD drilling operations are now more focused on refinement of aquifer delineation in critical areas as well as the on-going development and installation of the observation wells necessary to provide the monitoring framework to support the increasing demand for water appropriation from North Dakota's groundwater systems. Many of these systems are now beginning to approach full appropriation, which will necessitate the installation of additional observation wells to provide the near real-time data collection and monitoring to support any new appropriation moving forward.

Necessary resources for implementation (including FTE's)*: Drilling operations include a number of consumables such as drilling mud (bentonite) used for maintaining circulation during the drilling process and PVC pipe used for the installation of observation wells. These consumables have been subject to inflationary pressure with increases that have been two to three times the costs projected for the 2021-23 biennium budget.

In order to maintain operations during the 2023-25 biennium it will be necessary to increase ongoing drilling operation expenditures for drilling mud, cement, and PVC pipe by \$180,000 to provide the necessary base budget to meet operation costs during the 2023-25 biennium.

Are resources being redirected or are they new or additional (including FTE's)*: Redirected

Who is served and impact of not funding*: North Dakota citizens requesting water appropriations will experience delays. Near real-time data collection and monitoring provides more reliable data for new water appropriations and monitoring of the state's groundwater resources.

Navigability study (Priority: 11)

Total	-	180,000	180,000	0.00	-	180,000	180,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: After the passage of House Bill 1202 (HB1202) by the 66th Legislative Assembly (2019), the Department of Water Resources (DWR) was directed to collaborate with the North Dakota State Water Commission (SWC) to develop defensible review of all waterbodies in North Dakota that have been identified as navigable by the DWR but not yet determined as such by a court of law. The review will then be opened to public input and appeal. The DWR has begun this process by providing the SWC a list of all currently claimed navigable waters that are under review.

Necessary resources for implementation (including FTE's)*: Due to staff time limitations, little movement has been achieved on the reviews since 2019. This one-time legislative funding request will provide the DWR with the resources necessary to facilitate the research and gathering of the information necessary upon which to

770 Water Resources

Agency 770

build a defensible navigability determination review for a portion of the claimed water bodies. This study would cover the following 6 waters navigable at the time of statehood:

1. Red River
2. Missouri River
3. Yellowstone River
4. Bois de Sioux River
5. Upper Des Lacs Lake
6. Mouse River

Are resources being redirected or are they new or additional (including FTE's)*: Redirected

Who is served and impact of not funding*: Current residents and visitors to North Dakota who want to access sovereign lands for recreational and other non-consumptive purposes. In addition, navigability determinations help provide clarity to ownership by the state and private landowners. Sovereign lands are managed for the benefit, welfare, and prosperity of all the people of the state.

AEM Survey Technology (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	750,000	750,000	0.00	-	750,000	750,000	0.00
Total	-	750,000	750,000	0.00	-	750,000	750,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: It is clear when looking at the extent of the current Airborne ElectroMagnetic surveys (AEM) data collection that there are additional opportunities to collect AEM data for other regional areas where we see significant demand for groundwater resources. When looking at the state of North Dakota, AEM would prove to be useful throughout much of the glaciated portions of North Dakota. This essentially includes almost all of the state that is east and north of the Missouri River.

770 Water Resources

Agency 770

Necessary resources for implementation (including FTE's)*: Historically, there has been a total area of 2,712 sq. miles of AEM data collected in North Dakota at a total cost of \$1.3 million, which translates to a cost of approximately \$482/sq. mile. In order to complete the region defined above, an additional 50,491 sq. miles would need to be collected, which could translate to a total cost of \$24 million.

Are resources being redirected or are they new or additional (including FTE's)*: Redirection.

Who is served and impact of not funding*: North Dakota citizens and water managers across the state requesting water appropriations will experience delays. Near real-time data collection and monitoring provides the DWR staff more reliable data for new water appropriations and monitoring of the state's limited near fully appropriated groundwater resources.

Groundwater modeling and related hydrologic analysis software (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	22,000	72,665	94,665	0.00	22,000	72,665	94,665	0.00
Total	22,000	72,665	94,665	0.00	22,000	72,665	94,665	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The regulatory role of the Department of Water Resources Water Appropriation Division (WAD) requires the use of advanced software for purposes of performing many of the analytical functions and related modeling activities in support of our directive, which is to provide effective management for North Dakota's water resources.

Necessary resources for implementation (including FTE's)*: Purchase commercial software solutions to address the advanced groundwater modeling and related hydrologic analysis software solutions in an effort to provide a more uniform industry standard analysis platform for WAD staff. The analysis platform would include software to provide groundwater modeling tools, aquifer test and related analysis tools, and 2D and 3D flow modeling and related visualization tools. Currently, the division is considering the addition of AquaVEO GMS modeling tools, HYDRUS from Groundwater Software, and AquiferTest from Waterloo Hydrogeologic.

For each of these software platforms, the purchase cost includes the first year of maintenance. On-going maintenance will be required past the first year. Maintenance is based upon an annual structure and is approximately 30% of the purchase price. This would place the on-going annual maintenance at approximately \$22,000.

Are resources being redirected or are they new or additional (including FTE's)*: Redirected

770 Water Resources

Agency 770

Who is served and impact of not funding*: North Dakota citizens and water managers across the state requesting water appropriations will experience delays. Near real-time data collection and monitoring provides the DWR staff more reliable data for new water appropriations and monitoring of the state's limited near fully appropriated groundwater resources.

Training initiative (Priority: 14)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	80,000	-	80,000	0.00	80,000	-	80,000	0.00
Total	80,000	-	80,000	0.00	80,000	-	80,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The regulatory role of the Water Appropriation Division (WAD) requires the use of advanced scientific analysis. For this reason, basic requirements for project hydrologist positions has historically required a masters degree with some additional experience. Given, the staff turnover and the challenges associated with recruiting tenured experienced staff, it is becoming more and more difficult to maintain the experience base that much of the regulatory work requires. As a result, the department has had to fill the positions with staff that have less experience than desired with the intent to increase training to offset the inexperience.

Necessary resources for implementation (including FTE's)*: Internal staff will be involved with mentoring and guiding junior staff. It will also be necessary for the agency to pursue more formal training options that would provide opportunities for staff for continued growth and development beyond the internal mentoring opportunities within the division at an estimated cost of \$80,000 for the biennium.

Are resources being redirected or are they new or additional (including FTE's)*: Redirected

Who is served and impact of not funding*: The citizens of North Dakota and the Department of Water Resources staff. Training would lead to stronger technical expertise for the department and also benefit retention and recruitment.

Full time temporary to FTE conversion (Priority: 15)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	61,609	-	61,609	1.00	61,609	-	61,609	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department has been able to sustain the current Silver Jackets coordinator as a long-term temporary employee. It is unlikely future Silver Jackets coordinators will be able to be attracted and retained without the full benefits packages associated with the classification as a Full-Time-Equivalent (FTE) employee.

Necessary resources for implementation (including FTE's)*: FTE authorization and additional funding.

Are resources being redirected or are they new or additional (including FTE's)*: Redirected

Who is served and impact of not funding*: Citizens of North Dakota and flood affected communities. In addition this would be a hard to fill position without the FTE status.

RiskMAP federal funding spending authority (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	100,000	-	100,000	0.00	100,000	-	100,000	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	100,000	-	100,000	0.00	100,000	-	100,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Based on the federal spending authority projections related to RiskMap, an increase in federal spending authority of \$100,000 is necessary.

770 Water Resources

Agency 770

Necessary resources for implementation (including FTE's)*: Increase federal spending authority \$100,000.

Are resources being redirected or are they new or additional (including FTE's)*: Additional federal spending authority.

Who is served and impact of not funding*: This will continue to provide federal funds towards RiskMAP opportunities that will assist communities in the state.

State Initiative*: Reinventing Government

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Unification to move state agency IT services under one umbrella.

Necessary resources for implementation (including FTE's)*: Ongoing costs for services and management to include: file services, big data compute infrastructure, big data development/production for various data types, big data administrative costs, costs associated to additional FTE for ITD, ITD business analysis, ITD project management, and ITD project oversight.

One-time costs include: file services installation, big data compute infrastructure, and big data development/production.

Are resources being redirected or are they new or additional (including FTE's)*: Redirected

770 Water Resources

Agency 770

Who is served and impact of not funding*: The Department of Water Resources, water project sponsors, and water users. If funding is not provided the Department of Water Resources will continue to operate at a capacity that currently includes the IT operation managed by one staff member nearing retirement. The agency needs to be unified to ensure operations into the future. Leveraging the enterprise services NDIT already provides may provide more robust solutions to the agency and reduce internal overhead to support these services.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? No

Upgrade existing application? No

Development of new application? No

Anticipated Benefits*: The benefits surround the replacement of services that have been provided by the agency internally which includes identity management and authentication services, big data services, and application and data management services. Leveraging the enterprise services NDIT already provides may provide more robust solutions to the agency and reduce internal overhead to support these services.

The anticipated benefits associated with the identity management and authentications services includes the ability to leverage the current services provided by NDIT that are used to support most state activity. Integration with statewide identity management services will eliminate unnecessary redundancy and provide a unified identity solution to agency staff for all state services which will include agency services.

The department's big-data services and the application and data management services are not used nor supported within the NDIT infrastructure and one of the proposed benefits associated with unification is that a unified architecture may provide an infrastructure that is more easily supported by NDIT and potentially leverage statewide resources.

Project Risk*: The potential risks associated with unification are largely tied to the respective function. The risks associated with the identity management and authentication services are very different than the risks associated with either the big-data services or the application and data management services. The DWR is currently using Apple's Open Directory service, which Apple recently deprecated. This will require the DWR to migrate to another identity management solution. There is little risk associated with integrating within the current solutions that the state provides across the enterprise with the exception of service disruptions in the event that the deployment and migration experience issues. These risks are low when compared to any other solution as NDIT already has an installed and operating infrastructure with significant institutional knowledge.

Potential risks are much greater for the big-data and the application and data services, because the DWR has a very large installed infrastructure that is based upon an entirely different architecture than that currently supported by NDIT. The resulting risks may include higher costs and more time as unification takes place. The agency will face risks associated with migrating the current infrastructure to the new architecture or with attempting to maintain the existing architecture within the NDIT infrastructure. Migrating the current infrastructure to the architecture associated with the NDIT infrastructure will likely require much of the current application base to be re-designed and rebuilt. This will carry significant costs related to disruptions and missed opportunities due to restructuring existing functioning applications but important to the long-term operations of the department.

770 Water Resources

Agency 770

Issue/Solution:* A primary issue that may be addressed through unification is to drive the agency toward an infrastructure that can be better served and supported by NDIT. Clearly, moving the agency identity management solution toward the NDIT supported solution adds value and provides additional options and security beyond what the agency should attempt by itself. Given the fact that Apple will discontinue the current solution in use by the agency, there is tremendous value with little risk to the agency to pursue the solution provided by NDIT.

There may also be advantages in moving the big-data and the application and data services toward the NDIT unification model as well. However, given the size and breadth of the current application and data infrastructure, it may be necessary to adopt an approach with steps that may provide an incremental progression toward this infrastructure rather than simply attempting to re-create everything currently in place within the agency infrastructure.

With the proposal presented by the agency to State IT Advisory Committee (SITAC) and for budget consideration, the agency has adopted this type of incremental approach that will allow the agency to evolve toward the NDIT architecture; while the approach defined by the agency, if implemented successfully, would minimize any risks associated with unification of the application and data infrastructure.

Bowman Radar (Priority: 10)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	397	770-7600	77050	691000	20	1	1,800,000	-	1,800,000	-	1,800,000	-	1,800,000
Total									1,800,000		1,800,000		1,800,000

State Initiative:* State Facility Investment

Justification: The Bowman radar has filled a gap in radar coverage in southwest North Dakota since first being deployed in 1997. Prior to its deployment at the Bowman Airport, the radar was owned and operated by the National Weather Service in Bismarck. The State Water Commission (SWC) purchased the radar from Federal Surplus Property after it was replaced by the NEXRAD WSR-88D radar system. It has been serving the region year-round since 2011, through operations and maintenance agreements with eight surrounding counties. Real-time data are available to the public on the DWR website 24/7. In addition, data are converted to NEXRAD Level2 format and shared directly with regional National Weather Service offices in Bismarck, Glasgow (MT), Billings (MT), and Rapid City (SD).

The radar receiver, signal processor, and power supply were upgraded in 2009, extending the radar’s service life and allowing remote, unmanned operations. With aging components and difficult-to-acquire parts, replacing the rest of the original radar system would provide enhanced surveillance and ensure the capability of continual operations long into the future.

Total					-	-	-	-	1,800,000	-	1,800,000	-	1,800,000

State Initiative:* Other

Justification: The current state-owned drill rig was replaced 15 years ago and there has been significant down-time related to breakage and increased costs due to necessary repairs. There has also been significant technology improvements with modern drill rigs that improve the effectiveness and safety of drilling operations. The new rig is a top-head drive drilling rig which provides finer control over the drilling operation and safer operations due to safety features that are superior to the current drill rig.

Statutory Authority

North Dakota Century Code Sections 24-01 through 24-15, 39-02 and 49-17.1-2.

Agency Description

Originally called the State Highway Department, the North Dakota Department of Transportation (NDDOT) was established in 1917. The NDDOT is an innovative and progressive organization that has a great team of employees that work hard across the state to carry out the Department's mission to safely move people and goods.

The NDDOT strives to build and maintain an efficient transportation system consisting of about 8,624 miles of roadway and 4,865 bridges. It oversees the development of surface transportation including highways, bridges, rail, transit, pedestrian and bicycle paths across the state.

Annually, the Department processes over 1.1 million vehicle registrations and serves over 500,000 licensed drivers at branch offices located across the state. The NDDOT's Central Office is located on the North Dakota State Capitol Grounds in Bismarck and has eight district offices across the state in Bismarck, Devils Lake, Dickinson, Fargo, Grand Forks, Minot, Valley City and Williston.

Agency Mission Statement

The North Dakota Department of Transportation's mission is to safely move people and goods.

Major Accomplishments

-
- 1 Department's biennial budget of \$1.9 billion was utilized to provide transportation and motorist services, as well as maintain and improve state highways.

 - 2 The Reason Foundation ranked North Dakota's highway system first in the nation in overall performance and cost-effectiveness.

 - 3 Increased online appointments and reduced customer wait times for driver license and motor vehicle services from nearly 30 minutes down to under 10 minutes.

 - 4 Increased driver license and motor vehicle kiosks to 52 locations across North Dakota. Citizens are now able to print their motor vehicle tabs, renew or request a replacement license or ID card, schedule a road test, pay a reinstatement fee, change their address, and edit donor registry information without visiting an office.

 - 5 Launched driver license online knowledge tests allowing North Dakotan's an easy and convenient way to get their learner's permit 24/7 from anywhere with internet access.

 - 6 The NDDOT finalized the long-range transportation plan, Transportation Connection. The 25-year plan helps identify future transportation needs in the state.

 - 7 Infrastructure is vital to our economy, commerce, agriculture, tourism, and to North Dakota families – in 2021, the state of North Dakota made an unprecedented \$2.3 billion dollar investment in infrastructure.

Major Accomplishments

-
- 8 Completed major construction projects including: - A full depth reclamation and widening on westbound US 2 from Mauvais Coulee to Devils Lake, on US 281 through New Rockford to the south junction of ND 15, and on US 281 within the Spirit Lake Nation. - A 13-mile westbound interstate reconstruction project near Hebron and the full depth reclamation of US 85 north of Amidon. - A first-of-its-kind modified single-point interchange was added to the Sheyenne Street Interchange at I-94. - Ten miles of northbound 1-29 reconstruction. - Downtown Demers Avenue reconstruction focusing on new pavement, improved lighting, updated traffic signals, IT systems and new storm sewer installation. - The Minot and Williston Districts teamed up on engineering services for a 13-mile overlay on US 2 between Blaisdell and Berthold. - I-94 reconstruction project on the eastbound roadway from Eckelson Interchange to Oakes Interchange. - ND 23, Four Bears Bridge to NW TRR near New Town, mill and asphalt overlay. US 85, Long X Bridge, structure replacement, reconstruction of approach roads and installation of wildlife structure.
-
- 9 Continued Vision Zero initiative which seeks to establish a culture of personal responsibility where motor vehicle fatalities and serious injuries are recognized as preventable and not tolerated
-

Critical Issues

-
- 1 North Dakota's state transportation revenues are heavily dependent on motor fuel taxes and vehicle registration fees. The last time these rates increased was in 2005. Motor fuel taxes continue to decline, returning to historic pre-economic boom levels. Disruptive technology will also continue to decrease such revenues over the coming years. During the 67th Legislative Session the NDDOT indicated during budget testimony that declining motor fuel tax revenues would result in a \$50 million operating shortfall. Future revenue shortfalls will affect funding needed to provide essential services including snow and ice control, roadway maintenance, Driver License and Motor Vehicle, building operations, administration, and information technology.
-
- 2 The Infrastructure Investment and Jobs Act (IIJA) established new project demands, funding opportunities, and expanded existing program by 30%. IIJA has also significantly increased available grant funding opportunities, the NDDOT is aggressively pursuing this funding.
-
- 3 ND's construction program is primarily based on federal funding. This places constraints on the number of "ready" projects, limits the amount of discretionary (grant) funding which can be pursued, and the ability of the NDDOT to assist local government and businesses in a timely manner. More flexible state transportation funding is needed to meet transportation requirements for local government, new federal funding, and the needs of the 10-year infrastructure plan.
-
- 4 ND has prioritized construction over operations for the last several biennia. This has led to a systematic reduction in funding for basic operations, training, needed capital improvements, updated operating equipment, project management systems and software. NDDOT will need to leverage increased federal/state construction funding to begin replacing the former, basic operational capacity.
-
- 5 NDDOT continues to face recruitment and retention struggles and depleted staffing numbers following reductions compounding in increased workloads and other stressors. To combat this, NDDOT will need to undertake significant efforts to increase employee and supplier engagement and happiness.
-

Performance Measures

The NDDOT monitors performance through a wide variety of measures which are largely available on the following website, particularly in the sections titled "District Highway Information", "Plans and Reports", and "Safety":

<https://www.dot.nd.gov/dotnet2/view/publications.aspx?section=yes#plansandreports>

Program Statistical Data

The administration program provides human resource services for 982 permanent FTE's plus approximately 45 temporary employees; processes in excess of 120,000 vendor payments and 31,000 payroll payments; process in excess of 1.8 million pieces of outgoing mail each year; created 944 information posts across all social media channels (Facebook, Twitter, Instagram and LinkedIn).

From July 1, 2019, through June 30, 2021, the driver license program's divisions processed 442,476 permits, licenses, and identification cards; administered 80,874 written tests, 32,564 driving tests, and 283,383 vision screenings. In addition, the division processed 131,077 suspensions, revocations, and cancellations; 236,084 traffic citations; 10,825 Temporary Restricted Licenses; 7,321 implied consent violations; and 4,703 hearings.

The Motor Vehicle division processes in excess of 1.1 million motor vehicle transactions per year. In North Dakota, there are more vehicles registered than there are residents of the state.

Highways Program - North Dakota has more miles of road per capita than any state in the nation. There are approximately 141 miles of road for every 1,000 people. Therefore, we have a very large road network with a small population base to support it. NDDOT maintains approximately 8,622 miles of highway.

- North Dakota has one of the smallest DOTs in the country in terms of number of employees.
- NDDOT maintains more lane-miles of roads per maintenance employee than any other state.

The state fleet consists of approximately 3,350 motor vehicles used by 60 state agencies, 11 state universities, and 11 extension and research center entities. Although operational costs are increasing due to inflationary pressures, monthly depreciation in most groups remains reasonable due to the increased sales proceeds at State Fleet auctions.

Explanation of Program Costs

The NDDOT Administration program encompasses the following NDDOT divisions and areas: Executive, Legal, Financial Management, Human Resources, Communications, and Audit Services. The most significant budget items related to the administrative program are salaries and information technology programs.

The Driver License Division serves approximately 540,000 North Dakota licensed drivers, and the Safety Division also serves other ND residents, infants and children, law enforcement officers, and courts of law. The Driver License Division helps to ensure qualified and competent people are licensed to drive. The Safety Division educates the public about traffic safety issues. The most significant budget items in the driver license program are salaries and traffic safety grants in the Safety Division.

The Motor Vehicle Division administers the programs relating to the titling and registration of vehicles. The division regulates motor vehicle dealers, interstate motor carriers, mobility-impaired parking privileges, and intrastate household goods carriers, and is responsible for maintaining and making available records created by its various activities. The most significant budget items for the motor vehicle program are salaries, license plates, and IT data processing.

The highways program includes the following divisions: Maintenance, Construction Services, Planning and Asset Management, Programming, Local Government, Design, Bridge, Environmental and Transportation Services, Materials and Research, Aviation Services, and Civil Rights. There are eight districts across the state that are also included in this program that provide for the maintenance of roadways, roadsides, rest areas, signing, bridges, drainage, snow and ice removal, and equipment maintenance.

801 Transportation

Agency 801

Over 85% of the DOT's total budget is encompassed by this program. The most significant budget areas are consultant engineers, road materials, and construction contractor payments.

State Fleet Services' mission is to provide motor vehicle transportation to state agencies and institutions at the lowest possible cost. The most significant budget items to the fleet program are the purchases of vehicles, fuel, and repairs.

Program Goals and Objectives

The administration program provides business, internal and third-party audits, communication, and executive support and decisions in support of all divisions and districts of the agency.

The objectives of the driver license program include:

- Provide identification validation, licensing, and driver record management services for all North Dakota drivers.
- Suspend, cancel, or revoke licenses, enforce the points schedule, process hearing requests, collect funds for driver records and abstracts, process reinstatements, verification of insurance, and other actions to ensure the driving record is accurate.
- Develop, implement, and evaluate programs designed to reduce motor vehicle crashes, fatalities, and injuries.

The Motor Vehicle program has the following goals and objectives:

- Administer all programs relating to the titling and registration of vehicles.
- Maintaining all records created by its various activities.
- Provide public services through its central office in Bismarck, three privatized branch offices, seven chamber of commerce offices, one city office and seven county treasurer's offices.

The goals and objectives of the highways program include:

- Review business practices and procedures to improve ride, load, capacity and roadway width service levels.
- Enhance system preservation levels.
- Incorporate performance measures and asset management into the department's decision-making process.
- Provide a safe and secure transportation system and workforce.
- Be proactive and adaptive to provide superior external and internal services, products, and programs.
- Recruit, develop, and retain a high performing workforce that results in everyone working together to achieve our mission and vision.

801 Transportation

Agency 801

- Preserve and enhance assets managed by the DOT.
- Promote a culture of innovation to enhance external and internal services, products, and programs.
- Enhance snow and ice maintenance service levels.

The objective of State Fleet Services is to purchase, manage, operate, maintain and dispose of the state's licensed motor vehicles (approximately 3,350 vehicles). In addition, State Fleet Services conducts defensive driving course training for all state vehicle drivers, manages the alcohol and controlled substance testing for all state agency and university Commercial Driver License (CDL) drivers, the state fuel contract and driver ID program, and the NDDOT insurance programs.

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Most federal funding is provided to NDDOT via formula funding, funding which is allocated to state, tribal recipients, and transit agencies based on a formula set by Congress. The largest formula funding program is the Federal Aid Highway Program, funding from this program is used to construct and maintain roadways and bridges.

Explanation/Justification:

Equipment items greater than \$5,000 include:

801 Transportation

Ductilometer \$20,000

Gyratory Compactor \$30,000

Fused Beads Equipment \$50,000

Necessary resources for implementation (including FTE's)*: Formula funding for the Federal Aid Highway Program requires a state match of approximately 20%. The NDDOT requires \$173 million in state funding to match the Federal Aid Highway Program federal funding.

Are resources being redirected or are they new or additional (including FTE's)*: Given the post pandemic reduction to overall fuel tax revenues, this would be new funding from an alternative funding source. This alternative funding source should not be one-time funding but rather ongoing funding received from a stable source.

Who is served and impact of not funding*: The citizens of North Dakota. If the NDDOT cannot obtain the funds needed to match Federal Aid Highway Program formula funding, the federal funding will be returned to the federal government. Construction and maintenance on roadway and bridges will cease.

State Funded Transportation Program & Local Gov Engineers (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	250,000,000	-	250,000,000	8.00	-	25,000,000	25,000,000	0.00
Special	-	-	-	0.00	115,000,000	-	115,000,000	0.00
Total	250,000,000	-	250,000,000	8.00	115,000,000	25,000,000	140,000,000	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The NDDOT needs to establish a new, more flexible state transportation fund to meet transportation requirements, unique federal funding opportunities, facility and other needs, and to support the 10 year infrastructure plan.

Necessary resources for implementation (including FTE's)*: The NDDOT requests \$250 million in state funding to establish new state transportation fund and add 8 FTE Local Government Engineers.

Are resources being redirected or are they new or additional (including FTE's)*: New, alternative funding and new FTE positions. This alternative funding source should not be one-time but rather ongoing funding received from a stable source.

801 Transportation

Agency 801

Who is served and impact of not funding*: The citizens of North Dakota. A new flexible state transportation fund and Local Government Engineers would allow the NDDOT to respond to local government needs, support economic development, match federal discretionary funds, and other unanticipated priorities. Would also assist in transitioning the state funding policy away from only matching federal formula funds .

FTE (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	800,028	-	800,028	2.47	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	6,130,908	-	6,130,908	31.53	5,801,241	-	5,801,241	29.00
Total	6,930,936	-	6,930,936	34.00	5,801,241	-	5,801,241	29.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The NDDOT is currently one of the smallest DOT in the country. We have optimized our processes, procedures, and use of outside contracted services to achieve award winning efficiencies, unification of services, introduced new technology, and do more with fewer people. However, some limited additional staffing resources are needed to continue services and meet expectations of citizens, the legislature, and other agencies.

Necessary resources for implementation (including FTE's)*: The NDDOT requests appropriation and authorization for an additional 34 FTE positions. These positions would be for IFTA/IRP auditors (4), UAS program director (1), accountants (3), operators (snow and ice control) (14), driver license examiners (8), a pilot (1), GIS (2), and Planning (1).

Are resources being redirected or are they new or additional (including FTE's)*: New FTE positions.

Who is served and impact of not funding*: The citizens of North Dakota. Additional staffing would allow the NDDOT to meet expectations of citizens, the legislature, and other agencies.

Bridge Engineers (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	440,206	-	440,206	1.82	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00

801 Transportation

Agency 801

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	525,158	-	525,158	2.18	-	-	-	0.00
Total	965,364	-	965,364	4.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As a result of an unprecedented increase in state and federal funds dedicated to bridges, these FTE's are necessary to handle a significantly larger bridge program. Additionally, the requirements of and changes to the National Bridge Inspection Program require additional staff to ensure compliance.

Necessary resources for implementation (including FTE's)*: The NDDOT requests appropriation and authorization for an additional 4 FTE positions. The additional Bridge Engineer FTE's are necessary to assist in load rating, bridge management, inspections & preservation, structural design, and hydraulics.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE positions.

Who is served and impact of not funding*: The citizens of North Dakota. Additional staffing would allow the NDDOT to meet expectations and safety of citizens, the legislature, and other agencies.

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Additional funding for RIMS/Construction and Materials Management System (CMMS) large IT project approved during the 2021-2023 biennium. RIMS is an expansive system impacting all aspects of the NDDOT including planning, design, construction, financing, etc. The NDDOT is currently conducting a business process analysis to determine system specifications. This business process analysis is indicating the scope and size of RIMS is such that original funding authorized in the amount of \$9.66 million will not be sufficient.

Necessary resources for implementation (including FTE's)*: None, this project is fully funded and will comply with NDIT large project requirements.

Are resources being redirected or are they new or additional (including FTE's)*: None, this project is fully funded and will comply with NDIT large project requirements.

Who is served and impact of not funding*: The citizens of North Dakota and the employees of the NDDOT.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? Yes

Upgrade existing application? Yes

Development of new application? Yes

Anticipated Benefits:* RIMS is an antiquated system utilizing the mainframe which no longer meets the needs of the NDDOT. A new system is needed.

Project Risk:* The NDDOT will continue to utilize the current system which is costly and does not meet current needs. If the NDDOT is unable to obtain additional spending authority the system replacement may be delayed or terminated.

801 Transportation

Issue/Solution:* Ensure large IT project is adequately funded.

Door Security (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	865,000	865,000	0.00
Special	-	865,000	865,000	0.00	-	-	-	0.00
Total	-	865,000	865,000	0.00	-	865,000	865,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: ETS Security Expert is the upgrade to the current software which controls security badges and door access (badge readers). Includes Central Office Building, Materials & Research, Devils Lake Driver License, Dickinson Driver License, Dickinson District, Grand Forks Driver License, Jamestown Driver License, Williston Driver License, Minot Driver License, Minot District Office, Fargo District Office and Fargo Driver License.

ETS Ecostructure is the upgrade to the current energy control software. Includes the Central Office Building, Bismarck District, Materials & Research, Williston District, Minot District, Valley City District, Grand Forks District, Fargo District, and Dickinson District.

The current software and hardware are no longer being supported. Without this necessary upgrade the environmental systems will not operate efficiently and the door security system will not operate.

Necessary resources for implementation (including FTE's)*: None, this project is fully funded and will comply with NDIT large project requirements.

Are resources being redirected or are they new or additional (including FTE's)*: None, this project is fully funded and will comply with NDIT large project requirements.

Who is served and impact of not funding*: This project relates directly to the safety and security of NDDOT employees.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2024

Replace existing application? No

Upgrade existing application? Yes

801 Transportation

Development of new application? No

Anticipated Benefits:* Environmental systems will operate efficiently and doors will be secure ensuring entry by authorized personnel only.

Project Risk:* Failure to upgrade could lead to a security breach or an environmental system failure causing physical damage to facilities and leaving the building open to entry from unauthorized individuals which would compromise the safety of employees and data.

Issue/Solution:* Upgrade needed software and hardware.

Automated Vehicle Location (AVL) (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	2,010,000	2,010,000	0.00	-	2,010,000	2,010,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	2,010,000	2,010,000	0.00	-	2,010,000	2,010,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority):* Installation of Automated Vehicle Locators (AVL) in NDDOT snowplows. AVLs would help allow NDDOT to realize efficiencies in winter operations. A full featured AVL system would integrate into current NDDOT systems and any future management systems, saving time, money, and effort in data entry, collection, and processing. Data collection leads to analysis and improved operations. AVL equipment installed in the NDDOT snowplow trucks would record their actions, increase transparency, and allow for records automation. The AVL data can be used to generate automated reports which could alert managers and supervisors of deviations from best practices and of other opportunities to increase financial effectiveness in their operations. AVLs would allow NDDOT plow operators to make more informed snow and ice control decisions while on the road leading to more seamless boundaries and a safer driving experience across the state.

Necessary resources for implementation (including FTE's):* Given the post pandemic reduction to overall fuel tax revenues, this would be new funding from an alternative source.

Are resources being redirected or are they new or additional (including FTE's):* Given the post pandemic reduction to overall fuel tax revenues, this would be new funding from an alternative source.

Who is served and impact of not funding:* The citizens of North Dakota.

Start Date (MM/DD/YYYY): 07/01/2023

801 Transportation

Agency 801

End Date (MM/DD/YYYY): 06/30/2024

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits:* Allows the NDDOT to operate more efficiently and effectively provide snow and ice control.

Project Risk:* The NDDOT will simply continue to manage snow and ice control manually rather than utilizing technology for data analysis.

Issue/Solution:* Install AVLs.

Continuing Appropriation Summary
PUBLIC TRANSPORTATION FUND 801

	2021-23	2023-25
Statutory Authority NDCC 39-04.2-04		
Beginning Fund Balance	3,991,470	3,941,470
Revenues and Transfers In	8,150,000	8,600,000
Total Financing	12,141,470	12,541,470
Expenditures and Transfers Out	(8,200,000)	(8,600,000)
Ending Fund Balance	3,941,470	3,941,470

Special Funds Agency Summary
Highway Fund

	2021-23	2023-25
Beginning Fund Balance	350,552,693	62,852,693
Revenues and Net Transfers	398,300,000	547,683,713
Total Financing	748,852,693	610,536,406
Estimated Expenditures	686,000,000	608,143,843
Ending Fund Balance	62,852,693	2,392,563

Motor Vehicle Fund

	2021-23	2023-25
Beginning Fund Balance	7,441,161	2,141,161
Revenues and Net Transfers	19,300,000	29,300,000
Total Financing	26,741,161	31,441,161
Estimated Expenditures	24,600,000	29,947,803
Ending Fund Balance	2,141,161	1,493,358

Abandoned Vehicle Fund

	2021-23	2023-25
Beginning Fund Balance	3,821,657	3,821,657
Revenues and Net Transfers	-	-

801 Transportation

Agency 801

	2021-23	2023-25
Total Financing	3,821,657	3,821,657
Estimated Expenditures	-	-
Ending Fund Balance	3,821,657	3,821,657

MOTORCYCLE SAFETY FUND 801F

	2021-23	2023-25
Beginning Fund Balance	568,486	567,886
Revenues and Net Transfers	580,000	600,000
Total Financing	1,148,486	1,167,886
Estimated Expenditures	580,600	580,680
Ending Fund Balance	567,886	587,206

Unsatisfied Judgement Fund

	2021-23	2023-25
Beginning Fund Balance	401,429	401,429
Revenues and Net Transfers	-	-
Total Financing	401,429	401,429
Estimated Expenditures	-	-
Ending Fund Balance	401,429	401,429

Dealer Enforcement Fund

	2021-23	2023-25
Beginning Fund Balance	310,901	271,901
Revenues and Net Transfers	270,000	270,000
Total Financing	580,901	541,901
Estimated Expenditures	309,000	518,023
Ending Fund Balance	271,901	23,878

State Infrastructure Bank

	2021-23	2023-25
Beginning Fund Balance	3,217,350	3,217,350
Revenues and Net Transfers	-	-

801 Transportation

Agency 801

	2021-23	2023-25
Total Financing	3,217,350	3,217,350
Estimated Expenditures	-	-
Ending Fund Balance	3,217,350	3,217,350

Special Road Fund

	2021-23	2023-25
Beginning Fund Balance	2,219,283	1,619,283
Revenues and Net Transfers	1,100,000	1,100,000
Total Financing	3,319,283	2,719,283
Estimated Expenditures	1,700,000	2,670,000
Ending Fund Balance	1,619,283	49,283

PUBLIC TRANSPORTATION FUND 801

	2021-23	2023-25
Beginning Fund Balance	2,046,980	2,046,980
Revenues and Net Transfers	-	-
Total Financing	2,046,980	2,046,980
Estimated Expenditures	-	-
Ending Fund Balance	2,046,980	2,046,980

State Rehabilitation Fund

	2021-23	2023-25
Beginning Fund Balance	409,601	409,601
Revenues and Net Transfers	-	-
Total Financing	409,601	409,601
Estimated Expenditures	-	-
Ending Fund Balance	409,601	409,601

Snow Mobile Fund

	2021-23	2023-25
Beginning Fund Balance	6,884,751	6,884,751
Revenues and Net Transfers	-	-

801 Transportation

Agency 801

	2021-23	2023-25
Total Financing	6,884,751	6,884,751
Estimated Expenditures	-	-
Ending Fund Balance	6,884,751	6,884,751

State Rail Fund

	2021-23	2023-25
Beginning Fund Balance	4,962,865	5,112,865
Revenues and Net Transfers	150,000	200,000
Total Financing	5,112,865	5,312,865
Estimated Expenditures	-	-
Ending Fund Balance	5,112,865	5,312,865

Highway Tax Distribution Fund

	2021-23	2023-25
Beginning Fund Balance	1,633,694,916	1,633,694,916
Revenues and Net Transfers	-	-
Total Financing	1,633,694,916	1,633,694,916
Estimated Expenditures	-	-
Ending Fund Balance	1,633,694,916	1,633,694,916

State Aid Distribution Fund

	2021-23	2023-25
Beginning Fund Balance	205,771,164	205,771,164
Revenues and Net Transfers	-	-
Total Financing	205,771,164	205,771,164
Estimated Expenditures	-	-
Ending Fund Balance	205,771,164	205,771,164

Drivers License Trust Fund

	2021-23	2023-25
Beginning Fund Balance	13,500	13,500
Revenues and Net Transfers	-	-

801 Transportation

Agency 801

	2021-23	2023-25
Total Financing	13,500	13,500
Estimated Expenditures	-	-
Ending Fund Balance	13,500	13,500

Veterans Cemetary

	2021-23	2023-25
Beginning Fund Balance	792,000	792,000
Revenues and Net Transfers	-	-
Total Financing	792,000	792,000
