Statutory Authority

ND Constitution Article V; North Dakota Century Code Titles 20.1, 37, 44, 50, 54, 55, 56 and 61.

Agency Description

The Governor is the chief executive office of the state of North Dakota and serves as the spokesperson for North Dakota state government. The Governor coordinates the policies of executive branch agencies, submits the executive budget, gives the State of the State report, makes recommendations on programs requiring legislative approval and is mandated by law to serve on and make appointments to boards, commissions, and committees. The Lt. Governor assumes the duties of the Governor if the Governor is unable to serve. The Lt. Governor also serves as President of the North Dakota State Senate as well as other boards outlined by Century Code.

Agency Mission Statement

The mission of the Governor’s Office is to Empower People, Improve Lives and Inspire Success, while effectively and efficiently performing the duties of the Governor as outlined in the Noth Dakota Constitution and Century Code.

Major Accomplishments

-
- 1 Ushered in several of the largest economic development project announcements with a focus on diversifying the economy and adding value to the state’s raw commodities including ADM’s \$350 million soybean crush and refinery in Spiritwood, ND and Cerilon Inc’s plans to build a \$2.8 billion gas-to-liquids complex in Williams County.

 - 2 Assisted in facilitating the sale of Coal Creek Station and transmission line to Rainbow Energy and Nexus Line, saving 650 jobs and preserving reliable, affordable electricity while also incorporating renewable power and innovative carbon capture, storage and utilization. Introduced three economic development projects based around data centers and cryptocurrency mining, adding a new industry and potentially millions of dollars in tax revenue and job growth in the state.

 - 3 Joined officials from ADM and Marathon Petroleum Corp. (MPC) at the Spiritwood Energy Park to help break ground on the Green Bison Soy Processing plant, North Dakota’s first dedicated soybean processing plant, highlighting the project as an example of how partnerships between agriculture and energy are growing both sectors in North Dakota.

 - 4 Sought support for our agriculture industry through the request of Presidential disaster declarations due to spring storms and subsequent flooding, which knocked out power to more than 10,000 residents and caused more than \$57M in damages across the state.

 - 5 Broke ground on the FM Area Diversion flood channel, after approving \$435.5M in bonding that increased the state’s total pledge to \$870M. The diversion will protect more than 235,000 people, over \$25 billion in property value and nearly 20% of our state’s sales tax collections and reducing the need for flood insurance. Other water resources projects included \$74.5 million for Mouse River Flood Control at Minot and a \$50 million revolving loan fund for water projects.

 - 6 Urged the National Credit Union Administration Board to revise its strategic plan to clarify that the agency won’t discourage or micromanage local credit unions for lending activities related to agriculture and fossil fuel industries.

 - 7 Signed a historic \$680M bonding package, investing in major infrastructure projects which are making the state more resilient against drought and flooding, enhancing transportation systems and further establishing North Dakota as a national leader in broadband access - all without raising taxes.

Major Accomplishments

-
- 8 Partnered with lawmakers to pass a tax credit that will save taxpayers an estimated \$211 million on their 2021 and 2022 tax bills. Also introduced a historic plan to slash individual income taxes, which would save North Dakota taxpayers \$250M per year.
-
- 9 During special session of the Legislature in November 2021 invested hundreds of millions of dollars of federal funding into infrastructure, including economic development programs and energy projects; workforce development including career centers where high school students can pursue high-demand careers; and health care and behavior health enhancements.
-
- 10 Signed executive order to create Red Tape Reduction Working Group to bolster ongoing efforts to identify antiquated, unnecessary and burdensome regulations, rules and policies that could be changed or eliminated to reduce burdens and lower costs for North Dakota citizens and the private sector and make state government more efficient, effective and nimble.
-
- 11 As commander-in-chief of the North Dakota National Guard, visited Guard soldiers at the southwestern U.S. border, getting a first-hand look at their border mission and thanking them for their service in support of U.S. Customs and Border Protection.
-
- 12 Appointed statewide officials for the positions of Tax Commissioner, Public Service Commissioner and Attorney General.
-
- 13 Continued building on the previous five years, advancing our five strategic initiatives: Main Street Initiative, Behavior Health and Addiction, Transforming Education, Tribal Engagement and Reinventing Government - driving towards a more efficient, responsive and transparent state government.
-
- 14 Inducted Dr. Merton Utgaard into the Rough Rider Hall of Fame.
-
- 15 Created a partnership with Western Governor's University and North Dakota community colleges to provide graduates and staff with an affordable pathway to earning bachelor's or master's degrees from WGU.
-
- 16 Continued efforts to transform the culture of state government with a leading focus on team member engagement. In the fall of 2020, Team ND partnered with Gallup to assist with measuring engagement and facilitating development opportunities for managers to develop their skills to better lead team members. Annual team member engagement surveys have occurred in November/December 2020, October 2021 and is scheduled again in October 2022. From 2020-2021 Team ND's engagement grew from 3.72 on a 5.0 scale to 3.80.
-
- 17 Launched website for improved citizen experience and internal efficiencies for our hundreds of annual appointments to boards and commissions with members serving across all ranges of topics.
-
- 18 Hosted the fifth and sixth annual Summit on Innovative Education, held the sixth annual Recovery Reinvented, and the fifth annual Main Street ND Summit.
-
- 19 Welcomed tribal members and other attendees to the fourth Strengthening Government to Government Partnerships and Relationships Conference, highlighting progress made through collaboration between state and the five tribal nations with whom North Dakota shares geography over the last two years and outlining challenges and opportunities to address in the upcoming legislative session and beyond.
-
- 20 Signed an agreement along with MHA Chairman Mark Fox and ND Highway Patrol that allows the closest available peace officer to respond to an emergency call for service until the agency with primary jurisdiction arrives and assumes the lead.
-
- 21 Became the first state in the nation to allow electronic posting of private land with the passage of Senate Bill 2144, giving the landowners and hunters alike a convenient option for posting private land and checking its status for hunting, while also leaving the traditional physical posting process in place for those who wish to continue using it.
-
- 22 Worked with state lawmakers to approve \$28M funding for a new Mission and Network Operations Center for Vantis, helping to attract UAS technology research, development and commercialization to North Dakota.
-
- 23 Signed legislation unlocking \$250 million in workforce investment, including required matching funds, during November's special session of the 67th Legislative Assembly.
-

Major Accomplishments

-
- 24 Presented strategic budget guidelines for the 2023-25 biennium, highlighting the need for continued innovation, cost containment and efficiencies in state government as well as additional investment in employee compensation to address a highly competitive workforce environment and the highest inflation in more than 40 years.
-

Critical Issues

-
- 1 Recruitment and retention of workforce to fill more than 18,300 open and available online job openings as of September 2022.
 - 2 Ensuring an adequate statewide supply of available, affordable and quality childcare services.
 - 3 Federal policies which overreach and threaten the 10th Amendment and in turn the rights of North Dakota residents and businesses.
 - 4 Continued support for leaders across the state in creating healthy, vibrant communities to attract a 21st century workforce while building financially solvent communities using smart, efficient infrastructure.
 - 5 Continued support for programs and efforts to erase the shame and stigma of the disease of addiction and expand treatment and recovery options for North Dakotans struggling with substance abuse and behavior health issues.
 - 6 Strengthen engagement with the five sovereign tribal nations with whom North Dakota shares geography.
 - 7 Transforming education to prepare students to succeed in the 21st century economy.
 - 8 Harnessing technology to reinvent government to make it as efficient and responsive as possible for the benefit of taxpayers.
-

Performance Measures

The Governor meets on a regular basis with staff, cabinet directors, elected officials and many other industry stakeholders to ensure the state’s policies are advanced.

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Gain efficiencies in tracking constituent requests, complaints and inquiries.

Necessary resources for implementation (including FTE's)*: Funding

Are resources being redirected or are they new or additional (including FTE's)*: One Time funding request of new resources

Who is served and impact of not funding*: Constituents. Delayed response times, duplication of efforts which creates lack of efficiency.

Transition In / Transition Out (Priority: 03)

Statutory Authority

North Dakota Constitution Article V, Section 2, Article III, Article IV Section 12, Article IV Section 12 and 13, Article V Section 5, Article V Section 11, Article IX Section 3, and Article X Section 17. North Dakota Century Code Title 10 and Title 16.1 North Dakota Century Code Chapters 15.02, 35-01, 35-05, 35-17, 35-21, 35-29, 35-30, 35-31, 41-09, 43-07, 44-06, 45-10, 45-10.1, 45-11, 45-22, 45-23, 47-22, 47-25, 50-22, 53-01, 54-05.1, 54-09, 54-16, and 55-01.

Agency Description

The Secretary of State’s is the office of record for certain legal documents generated by the executive and legislative branches of state government; public records and notices including various business entities; performs a wide range of licensing, regulatory, and registration and administrative functions with five operating units . The agency performs these functions in accordance with the requirements of the state constitution and laws.

Agency Mission Statement

The office will:

- Serve the people of the State of North Dakota and its guests;
- Execute with integrity the duties required by the North Dakota Constitution and the North Dakota Century Code;
- Collect and preserve the records of the State as defined by the law; and
- Act as an ambassador for the State of North Dakota, its people, and its way of life.

This mission will be dispatched effectively, efficiently, expeditiously, courteously, and with financial responsibility.

Major Accomplishments

-
- 1 FirstStop has modernized how businesses meet their requirements with our office, and our ability to file those documents. The vast majority of business documents are completed on FirstStop, and the majority of those are filed online. o 97% of business-related documents are completed on FirstStop. o 90% of those are also submitted online with a credit card payment. The turn-around time for submitted business-related documents has significantly decreased from an average of three to four weeks to an average of one week or less.

 - 2 Business Services Reorganization: Business Services is undergoing a reorganization, phased in over the past two-plus years, primarily necessitated by the changes brought by FirstStop. Following analysis of workflow and outcomes, physical relocation to support co-location of staff occurred; workflows were modified; system enhancements were deployed; duties were, and continue to be, redefined and reassigned; job descriptions were, and continue to be, updated; position classifications were, and continue to be, reviewed; cross-training has occurred; and succession planning is underway.

 - 3 Business Services Legislation: A key piece of legislation, drafted by the Secretary of State’s office, was passed by the 2021 Legislative Assembly. SB 2210, a business services bill affecting 15 NDCC chapters streamlines processes, clarifies requirements, promotes consistency among entity and filing types, and supports automation.

 - 4 Elections implemented exhaustive election law passed during the 2021 legislative session.

Major Accomplishments

- 5 Elections, using the Teams collaboration tool, the training provided by the Secretary of State to the 53 counties has increased from periodically each year (when staff members could physically travel to each county) to weekly for all counties.
- 6 Accessible and accurate elections have been conducted with integrity by the state and counties even while a handful of loud voices have been claiming without proof that the 2020 election was stolen from one of the presidential candidates.
- 7 Continued use of the North Dakota Central Indexing System (NDCIS), which was launched on March 1, 2016. All central indexing filings and searches are completed online and all reports from the lending community of the state indicate the system is greatly appreciated.
- 8 Continued to be ranked as one of the top states for election administration by The PEW Charitable Trusts and the Massachusetts Institute of Technology in the Election Performance Index that has been conducted since it was first launched in 2008.
- 9 Continued to enhance election applications accessible from Vote.ND.Gov to make them web responsive so they format appropriately depending on the size of the computer, laptop, tablet, or smartphone being used to access them.
- 10 Maintained the necessary security clearances for Secretary Jaeger, Deputy Secretary Jim Silrum, and State Elections Director Brian Newby to receive cybersecurity updates and notices from the Department of Homeland Security (DHS), FBI, and other agencies responsible for cybersecurity to protect our elections infrastructure, which has now been classified by DHS as critical infrastructure.
- 11 Nearing completion of the FirstStop software system through which most of the office functions are handled and available to the customers of our office in an online environment. The system handles such things as registering new businesses for operation in the state, the filing of the various amendments and annual reports of these businesses, the licensing of occupations such as contractors and home inspectors, issuing and maintaining notary commissions, registering and regulating the activity of lobbyists, registering charitable organizations and professional fundraisers, and providing lists, subscriptions, and information that is available to the public.

Critical Issues

- 1 Ensure a staffing level that will allow us to respond to economic growth that results in an increase of new businesses.
- 2 Support movement toward a "one-stop" to streamline business' interactions and transactions with state agencies.
- 3 Obtain adequate legal resources.
- 4 Ensure adequate funding for the support, maintenance, and enhancement of FirstStop.
- 5 Ensure staff are appropriately compensated, to be able to recruit and retain qualified staff.
- 6 Transparency in elections, balanced against protection of election security.
- 7 The need for adequate resources to work with all 53 county auditors to ensure consistent compliance with election laws and best practices.
- 8 To provide services in a cost effective and efficient manner for the public, it is vitally important that the agency receives support for technology initiatives and maintains its current FTE authorization to handle the workload. The Secretary of State's office continues to encounter challenges with adequate FTE and the ability to offer competitive salaries. The agency must be able to offer competitive salaries to address compression issues and pay competitive salaries for agency staff.
- 9 Ensure that the office's website is updated and maintained utilizing a website content management system so that relevant information can be obtained by citizens of North Dakota, businesses, licensees, candidates, elected officials, and others utilizing the services of the Secretary of State's office in an effective and efficient manner.

Critical Issues

10 Ensure adequate funding for the support, maintenance, and enhancement of all Secretary of State software applications related to business, licensing, elections, and combative sports, whether existing or new applications are required. (FirstStop, Central Indexing, ND Public Meeting Notices, Campaign Finance, ND Voices, etc.)

Performance Measures

Although the Secretary of State’s Office does not have a formalized performance program and metrics, the agency’s Leadership Team uses significant data and metrics for tracking productivity, effectiveness, efficiency, quality of customer service, and compliance with laws.

The agency is currently working on a module for FirstStop that will provide statistical tracking of information in the form of dashboards for enhanced review of agency productivity to allow the creation of performance measures for agency personnel.

With respect to the NDCIS, the agency boasts of a system availability greater than 99% and that, except for the Internal Revenue Service, all filers use the online capabilities of the system at all hours of the day and night.

Over the past dozen years, North Dakota election administration has been ranked as the best in the country and never less than the top three according to the MIT Election Performance Index.

Program Statistical Data

History of Revenue and Expenditures for past budget cycles

Revenue

Biennium	Total	General	Special	% Increase
2001-2003	\$6,241,028	\$5,869,160	\$371,868	6.0%

2019-2021	\$6,969,758	-5.4%
2021-2023	\$8,869,506	27.3% (estimate)

Explanation of Program Costs

For the 21-23 biennium, the appropriated salary line represented approximately 88% of the agency's total general fund spending authority.

The appropriated operating line for the 21-23 biennium represented approximately 7% of the agency's total general fund spending authority. With the remaining 5% for Tribal Grants, Petition Review, and Public Printing all of which are designated for specific purposes for which Secretary of State has no discretion.

The agency also has a General Service Fund, into which revenue is deposited for statutorily approved fees for services provided to the public. The General Services Fund is approximately 50% of the office's spending authority from state sources and is currently responsible for funding 90% of the expenses for office operations instead of only being used for technology maintenance and enhancements for which the special fund is intended by law.

Federal funds make up approximately one-third of the agency's budget and support 90% of Elections Administration costs.

Extensive technology is being used by the agency to provide better and faster services to the public, improve processing time, and to maintain thousands of records associated with over 100 diverse categories of business transactions that relate to the duties of the Secretary of State.

Examples of how budget dollars are utilized:

- 1) The agency's budget supports the statewide Central Indexing System), which includes approximately 350,000 files. On March 1, 2016 the North Dakota Central Indexing System (NDCIS) was launched allowing all filings related to various personal property liens to be completed online. The budget supports ongoing costs and maintenance of the NDCIS.
- 2) The agency's budget supports FirstStop, which is software for the business and licensing functions of the Secretary of State's office. FirstStop provides customers with the ability to submit and update business filings, licenses, and records online.
- 3) The agency's budget supports the existing office website and covers associated expenses.
- 4) The agency budget supports an elections website, Electronic Poll books, and Voting System Equipment across all counties, and the election management system used by the state and all counties.

Program Goals and Objectives

To increase office efficiency and accessibility to the public in all ways possible.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Secretary of State requests additional general fund dollars for salary to fund the repurposing, reclassification, and responsibility level increases of existing positions (FTE) to carry out duties as described in the State Constitution and NDCC 54-09. The Secretary of State is going through a multi-phase reorganization that includes more than half of our 33 business operations and administrative positions within the office. Since the implementation of online systems in 2016 and 2019, the duties of office employees have shifted from data entry to customer service and compliance-based services for agency customers. Leadership positions are being restructured to reallocate administration of program areas and functions of approximately 40 duties assigned to the Secretary of State for more value-added job responsibilities as we continue to automate and enhance the online business and licensing filings along with the administration of elections.

108 Secretary of State

Agency 108

Necessary resources for implementation (including FTE's)*: The resources needed to implement these changes are \$300,000 additional general fund salary appropriated dollars along with HRMS Resources to work through the technical aspects of reviewing the rewrite of job descriptions, repurposing staff positions, and processing reclassification requests.

Are resources being redirected or are they new or additional (including FTE's)*: The Secretary of State is unable to redirect existing resources to work through these organizational changes. Given our current salary budget and allocation of 33 FTE, the office does not have capacity to leverage the reorganizational changes through vacancies and attrition over time. Any vacancies that the Secretary of State has or will have in the future cannot be used for the purposes of redirecting appropriated funds because those staff positions are critical for the completion of the responsibilities assigned to the office.

Who is served and impact of not funding*: All North Dakota citizens, businesses, and organizations that conduct business in the State of North Dakota are served by the Secretary of State. The agency has made major accomplishments over the past decade in better serving constituents with online services and the modernization of election equipment and administration across all 53 counties.

The impact of not funding this request will have a long-term effect to the level and timeliness of services provided to our citizens and customers. It is imperative for the office to recruit and retain staff with adequate qualifications. Currently, nearly 50% of the Secretary of State staff earn less than \$46,000 per year and 36% have less than 5 years of service. Services have the potential to be delayed along with plans for the next phase of continuous improvement, enhanced online services, and integrity of the election process is subject to additional risk if we are unable to retain and hire qualified staff. Without the ability to implement the necessary organizational changes, the office will struggle to maintain services at the current level and will not be positioned to allocate resources to gain future efficiencies.

Election Modernization (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	602,850	-	602,850	3.00	213,608	-	213,608	1.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	602,850	-	602,850	3.00	213,608	-	213,608	1.00

State Initiative*: Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Expectations upon county election administrators (the 53 North Dakota County Auditors) and the Secretary of State's office have increased significantly since the Help America Vote Act passed in 2002. While the state has had meaningful reform—Central Voter File and Election Management System, new voting equipment approved and funded by the legislature in 2019, and electronic pollbooks, also purchased after legislative approval in 2019—more is needed to standardize the voting experience in North Dakota.

No doubt, while the independent autonomy of 53 county election processes can itself be a deterrent to the potential for wholesale election fraud, voters should expect generally the same voter experience regardless of where they vote in the state. Often, interpreting statutes is a process rightfully left to the counties' State's

Attorneys, but these same officials look to the Secretary of State for clarification as to an understanding of these laws. In fact, NDCC §16.1-0-01 makes the top election administration duty of the Secretary of State to, "Develop and implement uniform training programs for all election officials in the state." The statute also requires, among other items, the Secretary of State to prepare information for voters on voting procedures and require such reports from county auditors on election matters as deemed necessary.

While the Secretary of State's office can provide many proof points of effective execution against these duty requirements, more can and should be done. The State has federal funds to utilize in this manner, and an investment in election standardization and compliance will have a direct correlation to improving voters' confidence in election results.

Necessary resources for implementation (including FTE's)*: Resources are needed to improve the election process across North Dakota's 53 counties. Having three additional FTE resources centralized, supporting all counties, will be more cost-efficient than counties being expected to hire more resources individually. In addition, the centralized resources will ensure better standardization of procedures across all counties.

The administration of elections is a year-round job for the state and the 53 counties. The county auditor is the position that administers elections for each county, but this position also oversees many responsibilities in addition to elections. The other reality is that 45 of the state's counties have a population of less than 20,000 people, 38 less than 10,000 people, and 30 less than 5,000 people which makes it difficult for these counties to employ enough staff positions to properly handle the required workload of elections. The entire state would benefit tremendously by the hiring of the three FTEs being requested. These positions will be able to support all counties to ensure the administration of elections continues with the integrity that North Dakotans expect and help to reduce the chance of burnout of county election officials.

Are resources being redirected or are they new or additional (including FTE's)*: This request relates to only one component of a suggested three-pronged approach:

1. Using \$330,000 of the federal HAVA funds already appropriated and received by the state to hire three employees focused on compliance, development of standards, training of auditors and development of an election certification curriculum, and voter education and outreach.
2. Designate a North Dakota Election Administration Modernization Committee, chaired or co-chaired in a non-partisan manner, to evaluate the election administration landscape, and North Dakota specifically, bringing forth recommendations to the Secretary of State and legislature for changes, if any, in North Dakota election administration Century Code. This would include a "statute review," to determine if procedures listed in statute, as written, result in the expected outcomes or, if not, if additional clarifications at times might be needed. The scope of the statute review should include the possibility for the writing of a new Elections Title and a repeal of existing statutes for the purposes of standardization of all elections, e.g., statewide, county, city, school, etc. This Committee would also look at the election service delivery model and determine if additional investment is necessary at the county or state level to further improve North Dakota election administration.
3. Develop an Election Experience Center, emulating a polling place and the canvassing room of a North Dakota election. This would allow visitors to see the equipment and processes utilized in North Dakota's elections, allow for sample elections (favorite foods, movies, etc.), and hopefully demystify activities and equipment involved in voting, thus raising voter confidence.

While this request is related to the first item, the work of these three individuals will lay the groundwork and support the ongoing efforts of the other two items, if approved. Federal funding, already accepted by the Secretary of State's office, sufficiently funds these positions for at least the next two biennia. These are new positions.

108 Secretary of State

Agency 108

Who is served and impact of not funding*: These positions simply match resources to the expectations voters, members of the legislature, the Secretary of State, and other stakeholders have related to the North Dakota election process.

Public Printing (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	-	-	-	0.00	-	-	-	0.00
Total	13,404	-	13,404	0.00	13,404	-	13,404	0.00

State Initiative*: Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Under state law the agency is responsible for the distribution of publications known as "public printing" that includes North Dakota Century Code, the North Dakota Administrative Rules, Session Law Books, etc. Although the appropriation to cover the cost of publishing and distribution is included in the agency's budget, it is based on the recommendation from the Legislative Council, which has the legal responsibility for preparing, supervising, contracting, and communicating, with the various publishers and vendors regarding these publications.

Necessary resources for implementation (including FTE's)*: The request is based upon know increased costs obtained via the competitive bid process

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources are being requested to carry out existing responsibilities.

Who is served and impact of not funding*: The agency distributes the publications to elected officials, legislators, legislative council, state agencies, county agencies, judicial system, and libraries as prescribed by law. Not funding the proposal would impact the availability of these resources to the users.

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Secretary of State requests general fund dollars to support technology investments for:

1) Replacement of the online Campaign Finance System. The software will be 10 years old by the time it could be replaced in the next biennium. It was initially built on a minimal budget. The vendor that built the system no longer offers campaign finance software and North Dakota is the company's only customer. This circumstance adds risk for the continued operation of the current system. In addition, the current system has limitations for future modifications that could result from potential legislative changes that may become adopted and have been discussed over the past several sessions.

2) Ongoing software support/maintenance FirstStop, Central Indexing, and other office software systems.

3) Increased NDIT application hosting costs

4) One-time enhancements for FirstStop, Central Indexing System and other systems to accommodate legislative changes that can and do come out of every legislative session and for improvements that will benefit the state's business owners and lending authorities.

5) Website upgrade and conversion to new platform

a) The Secretary of State's office will be moving its existing website to the State Website Platform. During this transition, the website will also be redesigned. It would be beneficial to the office to retain the services of a consultant to assist with best practices, usability, accessibility standards, and incorporation of user focus groups to determine the best layout, design, and content for our customers. With the office's wide variety of duties and services it provides, it is imperative that its website be organized in a manner that is accessible and user-friendly to the public so that information can be found effectively and efficiently. Engaging a skilled consultant would help the office meet this goal. Through this redesign process, the office may also incorporate the content of its elections website so that the office has one unified website for users to find valuable information regarding the services provided by the office. Utilizing the State Website Platform for all website content will allow the office to make changes to its website content in a more streamlined manner, which ensures that the public has accurate and up-to-date information.

b) In addition, as part of the redesign and to assist the citizens of North Dakota, businesses, licensees, candidates, elected officials, and others utilizing the services of the Secretary of State's office, the office desires to implement a text message notification system. Users would be able to opt-in to the service and receive important notifications, such as filing deadlines, voter information, candidate information, and periodic newsletters. This would again allow the public to have access to information in an effective and timely manner and alert them to important deadlines or news items, thus enhancing transparency in and access to government.

Necessary resources for implementation (including FTE's)*: The Secretary of State is requesting \$2,015,000 in general fund fiscal resources including 1 FTE to implement the technology investments as outlined above. For the implementation, the SOS will need resources and collaboration from several NDIT teams related to website development, hosting, IT project management, security team, and others.

Are resources being redirected or are they new or additional (including FTE's)*: The Secretary of State does not have existing financial resources to redirect and is requesting increased general fund dollars. The Secretary of State generates approximately 14-16 million dollars for the state each biennium. According to NDCC 54-09-11 a portion is deposited in the general services fund and available for the programming and maintenance of information technology systems. As SOS general fund dollars are required to cover more salary and a very limited portion of operating expenses, the Legislative Assembly has directed more day-to-day operating expense to be allocated to the general services fund. 8% of general fund is available for operating expenses with the remaining 92% being covered by the special fund, which is intended for technology maintenance and enhancements.

The fees that build that special fund are not able to support the office Operating line item and additional investments in technology to help us reinvent the office's portion of state government. Increased general fund dollars are needed to cover the anticipated costs for these expenditures.

Who is served and impact of not funding*: All North Dakota citizens, businesses, and organizations that conduct business in the State of North Dakota are served by the Secretary of State's Office. The Secretary of State has made major accomplishments over the past decade in better serving constituents with online services and modernization of election equipment across all 53 counties.

The impact of not funding this request will have a direct outcome regarding the level and timeliness of services provided to our citizens and customers. Services have the potential to be delayed along with plans for the next phase of continuous improvement, enhanced online services, and integrity of the election process is subject to additional risk. Important notifications from the Secretary of State's office will continue to only be available by mail or via the Secretary of State's website. Software systems will be subject to cyber security threats if systems aren't maintained and upgraded. Opportunities to make government services more efficient and effective will be delayed or lost.

Start Date (MM/DD/YYYY): 07/01/2023

108 Secretary of State

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? Yes

Upgrade existing application? No

Development of new application? No

Anticipated Benefits:* 1) Enhanced, efficient, and intuitive customer experience to allow users greater self-sufficiency.

2) Greater use of configuration tools rather than custom development to accommodate changes required by new or amended laws.

3) Expedited access to and portability of information maintained in the database.

4) Increased security for filers and less risk of cybersecurity breaches.

Project Risk:* The Secretary of State’s office has estimated that the replacement of our existing online campaign finance system at \$700,000 from a conversation had with one potential vendor. It is possible that the system this vendor would provide might not fit the needs of the state and the options that would work are more expensive than what is budgeted.

Issue/Solution:* If the desired solution is more expensive than what has been allocated through one-time funding by the legislature, the Secretary of State’s office would continue to use our existing system until enough resources are appropriated.

Statutory Authority

North Dakota Century Code 54-44.

Agency Description

- Fiscal Management oversees the budgeting, accounting, payroll, purchasing card program and financial reporting functions for North Dakota state government entities.
- Human Resource Management Services (HRMS) provides human resource guidance and assistance, promotes consistent HR practices, maintains the state classification and compensation plan, and provides training and mediation services to state agencies.
- Central Services provides procurement services, printing services, a central mail room service, and commonly-used office supplies to state agencies; Surplus Property disposes of state-owned fixed assets and distributes federal surplus property to eligible entities.
- Facility Management maintains the state capitol complex, plans for future growth requirements and provides tours.
- Risk Management promotes safety and reduces loss resulting from claims by identifying and measuring risks of loss to the State and implementing appropriate measures to address those risks.

Agency Mission Statement

The Office of Management and Budget provides innovative leadership and support to state government. OMB will set the standard for leadership and expertise in state

110 Management and Budget

government.

We will:

- Provide consistency in policies and practices.
- Set the standard for state agency operations.
- Be an agency with whom others choose to work.
- Provide competitive compensation and benefits.
- Establish performance measures.
- Communicate in a seamless and ongoing manner.
- Guarantee continuum of government.
- Be respected and trusted by customers.
- Strive for overall customer satisfaction.
- Be the employer of choice.
- Improve functionality of automated systems.

Our Core Values are:

- Respect
- Integrity
- Excellence
- Resourcefulness
- Responsiveness

Major Accomplishments

- 1 Fiscal Management: Implemented GASB 87 along with Lease Administration module in PeopleSoft. Converted from IBARS to new budget management system—Sherpa. Completed major patch/upgrade to PeopleSoft/PeopleTools. Implemented PTF, an automated testing framework that will reduce work effort for testing PeopleSoft patches/updates. Developed a tool for agencies to automatically create vendors from their program management systems. Securely enabled direct deposit updates for employees in Employee Self Service.
- 2 HRMS: HRMS continues to serve as thought leaders, change agents, and resourceful partners who build talent, drive results, and work as one. The overarching accomplishment of this biennium for HRMS is the design, development and implantation of HR 2.0, a redesign of how HR services are more effectively and collaboratively deployed to Team ND. HR 2.0 is structures services into five core areas: HR Business Partners, Operations and Digital, Talent Acquisition, Talent Management and Development, and Total Rewards. Design and development of the new operating model took place from June-October of 2021, with a launch of cohort 1 in November of 2021. Cohort 1 consisted of modeling this decentralized shared service approach with four agencies: OMB, DHS, DOH and NDIT. After a successful implementation of HR 2.0 to cohort 1, the deployment of HR 2.0 expanded out to all agencies in the summer of 2022 through the launch of communities of practice for each of the five areas. HRMS continues to provide all state team members with PeopleSoft Total Rewards statements, showing the value of the entire state package of compensation and benefits. HRMS developed and implemented Update Team Member Information (UTMI) through manager self-service in PeopleSoft, automating everyday team member updates. UTMI allows delivery of a uniform process for managers state-wide to update their team members' information such as: reports to, department, location or compensation changes. The team has continued to lead the ongoing effort in the development of universal employment policies. To date, 37 universal employment policies have been developed, enacted in cabinet agencies, and made available for non-cabinet statewide agency use. HRMS centralized the shared leave program, developed, and implemented a technology solution to automate the notification and approval workflow through PeopleSoft, and worked to update Administrative Rules. HRMS continues to update the ELM learning library to make courses available for cross-agency use. HRMS deployed an interagency mentorship program as part of a targeted talent development approach and building channels for team members to work as one across agencies. HRMS launched a comprehensive enterprise change management program in the fall of 2020, that has continued to grow and evolve into three intensive courses, 4 e-learning offerings, communities of practice and project advisory services.
- 3 Facility Management: Completed projects include the 2010 Americans with Disability Act project. During FY2022 the tour guides provided tours to 6,713 visitors.
- 4 Central Services: Provided procurement support to major information technology projects and established many new state contracts. Central Duplicating and the North Dakota Department of Transportation collaborated to transition NDDOT printing equipment and printing/mail operations to Central Duplicating, resulting in cost savings for both agencies. Vendor Registry section was transitioned to OMB Fiscal.
- 5 Risk Management: Maintained the state's actuarially projected funding needs for the 2023-25 biennium at \$2.750 million. Third party claims remained consistent with an average of 86 claims, down from a high of 351 claims in FY2001. State entities have overall reduced their required contributions to the fund by \$2.4 million by participating in the discount program. Provided resources and training to assist approximately 85 percent of state entities to develop Continuity of Operations Plans and implement procedures for emergency notification. Assumed responsibility for state entity cyber liability exposures (except BND).

Critical Issues

- 1 Continued funding for the statewide systems maintained by OMB. Retention of state employees - continued and increasing turnover due to growing economic opportunities. Recruitment of new employees due to vacancies resulting from the many retirements of baby boomers and increased competition for qualified staff. Maintaining the capitol infrastructure while the costs of operating and extraordinary repairs continue to increase.

Performance Measures

Goal 1: Fulfill OMB's Statutory Requirements

110 Management and Budget

Agency 110

Goal 2: Inform and Engage Stakeholders

Goal 3: Provide Training to State Employees

Goal 4: Inform and Engage OMB Workforce

Goal 5: Improve, Upgrade, and Leverage Technological Capabilities

Program Statistical Data

Fiscal:

- Fiscal Management serves 92 state agencies.
- The division processes over 916,000 accounting transactions and over 114,000 payroll deposits each year.
- The division manages the statewide Purchasing Card Program. The program includes 78 state agencies, 13 colleges and universities which includes the ND University System and Core Technology Services, 77 school districts, 24 counties, 11 cities, 10 state board and commissions. This program has 5,764 active procurement cards, which results in approximately 336,075 transactions totaling just under \$175 million for the past year.
- The division has received the GFOA's (Government Finance Officers Association of the United States and Canada) Distinguished Budget Presentation Award for its past 16 biennial budget documents.
- The division has received the GFOA's Certificate of Achievement for Excellence in Financial Reporting for the past 29 years.

HRMS:

HR Business Partner

- HRMS HR Business Partners supported 31 agencies on Human Resource related issues, including but not limited to talent acquisition, team member engagement, team member relations, performance and talent management, training, policy application, organizational development, workforce planning, and compensation.
- HR Business Partners have developed a Community of Practice (CoP) with HR leaders and HRBPs who are responsible for serving as a strategic partner aligning HR strategy with business objectives within an agency and implementing HR programs throughout Team ND, focusing on the transformation of HR. This offers HR leaders and HRBPs the opportunity to provide input regarding HR initiatives from the Operations and Digital, Talent Acquisition, Talent Management, and Total Rewards Centers of Excellence for quality, effectiveness, and efficiency and drives the ability to impact change, while sharing the work with a team and empowering HR professionals to be proactive rather than reactive. The HRBP CoP has 35 members representing 23 agencies.
- A workforce planning strategy and template for all agencies to utilize in the strategic planning process has been developed and implemented. The workforce planning process assists agencies with forecasting and planning for gaps in talent supply and demand to ensure the organization has the workforce needed to achieve its goals. Workforce plans were submitted by 33 cabinet and non-cabinet agencies.
- ePerformance (PeopleSoft) has been used to complete 11,063 performance evaluations in 43 state agencies.

Operations & Digital

- The Update Team Member Information (UTMI) through manager self-service in PeopleSoft was implemented, automating over 1,332 everyday transactions to-date to create a uniform process for managers state-wide. This change has allowed the manager to request changes in the system to trigger the appropriate approval chain eliminating the need for managers to complete a paper form, electronic form, or email. Our Payroll or HR partners are no longer burdened with manual time-consuming changes.
- The ability for hiring managers to score and modify existing scores of open-ended questions in one location in PeopleSoft has been implemented, driving consistent scoring and reducing the time commitment to score open-ended questions.
- Remote Worker was introduced state-wide as a solution in PeopleSoft to create or submit electronic remote worker requests for those team members that are currently or plan to work outside a State Facility. This aids agencies to systematically track the physical location that team members are working.
- With the implementation of Remote Worker, Risk Management notifications have been automated for team members working outside ND. The notification aids Risk Management in obtaining the most accurate information and decreases the number of manual notifications sent by HR and Payroll partners throughout the state, insuring team members have the appropriate workers comp coverage.
- Electronic Acknowledgements were developed and implemented to HR partners in the agencies to assign team members acknowledgments on a one time or recurring basis. Team members no longer need to complete electronic or paper acknowledgement forms outside the system, increasing the team member experience and minimizing record keeping.
- The automated transfer of performance documents when a team member's manager changes has been developed and implemented. This Automates the transfer of In Progress performance documents and will help facilitate the completion of the performance document and eliminate the manager or HR partner having to manually transfer them.
- Implementation of team member's and manager's performance document email notifications are created when any In Progress performance documents are nearing the due dates of the different steps of the performance document.
- Community of Practice (CoP) with HR partners throughout Team ND has been developed and focuses on the transformation of HR Operations. This

Explanation of Program Costs

Administration: Major program costs include funding for Prairie Public Broadcasting, state contingency fund, Boys and Girls Clubworks, statewide dues, and salaries for 9 employees. In addition unemployment benefits, which are paid from special funds.

Statewide dues include:

Commission of Uniform State Laws (CUSL) - \$162,800

Council of State Governments (CSG) - \$240,125

Western Governor's Association (WGA) - \$83,160

110 Management and Budget

Agency 110

National Governor's Association (NGA) - \$79,590

Education Commission of the States - \$117,882

National Conference of Lt. Governor's - \$2,100

Fiscal: Eighty-one (81) percent of the budget for the Fiscal Management Division falls into two categories--data processing and salaries. All functions of the division depend on technology and people. Other large expenses include IT consultants and other professional consultants. Consultants are hired for revenue forecasting, cost allocation, updating and maintenance of Sherpa, implementation of PeopleSoft accounting and payroll modules, and assistance in completing the Statewide Annual Comprehensive Financial Report (ACFR).

HRMS: Eighty-one (81) percent of HRMS program costs are for salaries. Operating expenses account for nineteen (19) percent of HRMS program costs with IT and professional development being the costliest expenses. The operating expenses incurred are directly related to providing services and support to other agencies.

Facility Management: Approximately 48 percent of Facility Management's budget is for salaries due to all the functions of the division depend on personnel to provide services. The second highest budget item for the division is for utilities for the Capitol Complex. This expense accounts for 58 percent of the division's operating line item.

Central Services: Cost of the special funded programs of Central Duplicating, Central Supply, and Surplus Property include the salaries, facilities, materials, and equipment necessary to deliver these services. Costs incurred by Central Duplicating and Central Supply are recovered from using agencies. Surplus Property's operating costs are recovered from the proceeds generated from the distribution and sales of state-owned and Federal surplus property. Services from the State Procurement Office are provided with general funds.

Risk Management: The request is all special funds: Salary represents 4.0 FTE's who provide administrative support and loss control services. The operating funds are needed to administer the program. The most significant costs of the program are for excess liability coverage premium, IT services for maintenance of Risk software programs, and actuarial fees required to determine the financial viability of the funds and amount of required contributions or premium.

Program Goals and Objectives

Administration: The Office of Management and Budget provides innovative leadership and support to state government.

Fiscal: The mission of Fiscal Management is to provide our customers responsive guidance and knowledgeable management in fiscal operations.

HRMS: Human Resource Management Services mission is to provide leadership and expertise in human resource management.

Facility Management: The mission of Facility Management is to provide a clean and safe environment with friendly, respectful, and efficient service to all who use the North Dakota Capitol Complex.

Central Services: The objective of Central Services Division is to support state government by providing our customers with quality products and services, enabling them to accomplish their mission.

Risk Management: The mission of the Risk Management Division is to coordinate efficient functions that promote safety and reduce loss resulting from tort liability or employee injury claims.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Learning and Development Manager is responsible for the development and implementation of a statewide learning and development strategy, curriculum and training programs aligned with our values that meet the many different professional development needs of Team ND. The role will develop, facilitate, and oversee training programs that contribute to the state's success by strengthening, coaching, and developing our Team ND talent.

Necessary resources for implementation (including FTE's)*: 1 FTE and funding

Are resources being redirected or are they new or additional (including FTE's)*: New FTE

Who is served and impact of not funding*: If this request is not funded, we will experience enterprise level gaps in training and developing team members to meet agency level business needs and strategy, and ultimately citizen's needs. This role is also critical to our statewide efforts for retention of team members. Continual growth and development is a fundamental part of our total rewards package.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Talent Acquisition Manager is responsible for planning, developing, and implementing the statewide Talent Acquisition strategy in alignment with Team ND strategies. This role will utilize innovative talent acquisition efforts to build talent pipelines for Team ND. This position will be key in building a strong state-wide employer brand, identifying, and leveraging multiple sourcing channels and working with talent management and agency leadership to define selection criteria and successfully bring top talent to Team ND.

Necessary resources for implementation (including FTE's)*: 1 FTE and funding

Are resources being redirected or are they new or additional (including FTE's)*: 1 new FTE

Who is served and impact of not funding*: If this request is not funded, we will experience an enterprise level impact in not evolving our talent acquisition systems and processes to allow the state to compete in attracting top talent necessary to fulfill agency needs. Talent acquisition was identified as a priority for all agencies in their 2022 Strategy Reviews. HRMS needs to be able to staff appropriately to meet this need and support our agencies in their ability do deliver services to citizens.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Total Rewards Specialist is instrumental in advancing Team ND's total rewards initiatives. The Total Rewards Specialist is responsible for assisting the development and administration of strategies and programs that serve to align compensation, benefits, well-being, development, recognition, and rewards to attract, motivate, engage, and retain talented team members. This team member will be essential in monitoring and analyzing market, workforce, and regulatory trends as critical inputs in program development.

Necessary resources for implementation (including FTE's)*: 1 FTE and additional funding

Are resources being redirected or are they new or additional (including FTE's)*: 1 new FTE

Who is served and impact of not funding*: If this request is not funded, we will be constrained in our ability to conduct thorough market analysis and quality, enterprise level program development. We will also experience impactful delays in developing an advanced total rewards package to attract and retain employees to continue to advance Team ND in meeting citizens' service needs. This position also allows HRMS to build a knowledge transfer system to share the knowledge held by the Total Rewards Manager (currently the only Total Rewards team member), to provide back up, and to reduce our risk due to potential turnover in the manager position.

Total	198,444	-	198,444	0.00	198,444	-	198,444	0.00

State Initiative*: State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Request an FTE for a lease administrator to review all current state agency leases, review all lease form requests, negotiate all leases for state agencies and to ensure that all state agencies, and boards and commissions are utilizing their space efficiently.

Necessary resources for implementation (including FTE's)*: additional funding

Are resources being redirected or are they new or additional (including FTE's)*: Repurpose position 118.

Who is served and impact of not funding*: Agencies that lease space.

Korn Ferry Architect (Priority: 17)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

110 Management and Budget

Agency 110

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
General	12,000	-	12,000	0.00	12,000	-	12,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	12,000	-	12,000	0.00	12,000	-	12,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: "Team ND utilizes the Hay Methodology to administer the classification system. Korn Ferry Architect is tied to the ability for Team ND to continue to utilize the Hay Methodology for the administration of the classification system. The Korn Ferry Architect solution is also being evaluated for modern functionality to create and maintain team member job information in the future.

NDAC 4-07-03; NDCC 54-44.3"

Necessary resources for implementation (including FTE's)*: Funding

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*: If this request is not funded, we will experience enterprise level impact and may no longer be licensed to utilize the Hay Methodology to administer the current Team ND classification system. The purchase of Korn Ferry Architect is a requirement to apply/use the Hay Methodology and it would be a massive disruption to the statewide classification system if this request is not supported.

HR Project Manager (Priority: 22)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	255,452	-	255,452	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	255,452	-	255,452	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

110 Management and Budget

Agency 110

Request explanation and justification (include any statutory authority)*: The HR Project Manager will be key in managing enterprise level HR initiatives by managing of interdependencies between HR projects and/or related activities within the scope, quality, time and budget.

Necessary resources for implementation (including FTE's)*: 1 new FTE and additional funding

Are resources being redirected or are they new or additional (including FTE's)*: 1 new FTE

Who is served and impact of not funding*: If this request is not funded, HR initiatives will be impacted due to limited resource capacity or lack of enterprise understanding of all initiatives underway. This position is key to timely, sequenced delivery of HR services to our agencies through a multitude of initiatives currently underway. Without this position, project management is greatly limited and necessary project elements are more likely to slip through the cracks or timing may unintentionally compound on deployment of initiatives, thus overloading the enterprise level system with too many HR driven changes at one time.

LinkedIn Recruiter (Priority: 24)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The HR Advisor is responsible for ensuring the development and delivery of effective, integrated, and innovative HR services, initiatives, systems, solutions, policies, and procedures across the different areas of HR. This position will be essential in continuing to maintain the classification system, administering centralized LOA and shared leave programs, data analytics, aiding in the development of team and enterprise HR infrastructure and working to carry out core human resources operational activities with the objective of maximizing efficiency and team member satisfaction, while utilizing best HR practices.

Necessary resources for implementation (including FTE's)*: 1 new FTE and additional funding

Are resources being redirected or are they new or additional (including FTE's)*: 1 new FTE

Who is served and impact of not funding*: If this request is not funded, we will experience program, policy, and operational gaps in core enterprise level HR activities.

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Procurement Automation Project, continuation of project started in 2021-2023 biennium with initial budget over approx \$2 million. System replacement of State Procurement online solicitation system and new additional systems for enterprise contract management, eMarketplace for ordering from state contracts, and other workstreams with integration to PeopleSoft.

Necessary resources for implementation (including FTE's)*: Funding to cover the cost

Are resources being redirected or are they new or additional (including FTE's)*: Will be handled with current staff

Who is served and impact of not funding*:

Start Date (MM/DD/YYYY): 07/01/2021

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits:* Procurement Automation Project, continuation of project started in 2021-2023 biennium with initial budget over approx \$2 million. System replacement of State Procurement online solicitation system and new additional systems for enterprise contract management, eMarketplace for ordering from state contracts, and other workstreams with integration to PeopleSoft.

State Initiative:* State Facility Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Continuation of the upgrade to Exostruxure software. This phase will include the Heritage Center and Liberty Memorial Building

Necessary resources for implementation (including FTE's)*:

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*: Occupants of the building are served. Not funding would eliminate the use of the existing software to control setting for the mechanical equipment.

Start Date (MM/DD/YYYY):

End Date (MM/DD/YYYY):

Replace existing application? No

Upgrade existing application? No

Development of new application? No

Anticipated Benefits*: One system in all buildings on the grounds. Capitol and Judicial Wing will be on Exostruxure by the end of the current biennium.

Project Risk*: None when funded. Loss of consistency throughout Capitol complex if not funded.

110 Management and Budget

Issue/Solution:* Outdated software that should have been upgraded this biennium.

Explanation / Justification: Provide funding for a deferred maintenance pool that agencies could use for repairs/upgrades based on the Sitolagic report.

Space Utilization (Priority: 50)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	110-8220	11050	-	-	-	-	-	-	5,500,000
Total				-	-	-	-	-	-	\$5,500,000

State Initiative:* State Facility Investment

Explanation / Justification: Provide funding to be used to reconfigure and better utilize space in the Capitol and allow for agencies to move into the capitol to save money on rent. This would require a statutory change to allow the Capitol Grounds Planning Commission to set a space utilization standard for the Capitol complex.

Equipment > \$5,000 Summary

Total					-	-	-	-	76,800	-	76,800	-	76,800

State Initiative:* Technology Investment

Justification: This software will allow Central Duplicating to have an online presence. Agencies will be able to place their print and Supply orders online instead of having to fill out the SFN form. This software will also tie into our MIS system allowing us to complete our monthly billing and track our financials.

New copier (Priority: 21)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Statutory Authority

North Dakota Century Code Chapters 54-44.6, 54-46 and 54-46.1, 54-59.

Agency Description

The Information Technology Department (ITD) is managed by the Chief Information Officer who reports directly to the Governor. ITD is responsible for all wide area network services for all state agencies, including institutions under the control of the State Board of Higher Education, as well as counties, cities, and school districts. ITD is also responsible for providing computer hosting and support services, software development services and state-wide communications services. ITD coordinates the deployment of information technology in state government by developing information technology standards, setting guidelines for technology planning and providing oversight on large information technology projects.

In addition, the appropriations for the following entities and programs are within ITD's budget: EduTech, the Longitudinal Data System initiative, K-12 Network Connectivity, the Geographic Information System program, the Health Information Exchange, and the State Interoperability Radio Network.

Agency Mission Statement

ITD has adopted the Governor's three pillars as our guiding purpose.

- Empower People
- Improve Lives
- Inspire Success

ITD's mission is to efficiently empower citizens with trusted information.

Our vision is a question. How might we provide world class technology and services?

Our goals are to deploy a world class government experience, secure all government held data in North Dakota, and deliver the most efficient government services in America.

Major Accomplishments

-
- 1 IT Operations Accomplishments · Enabled a 24/7 service desk supported by live agents. This augmentation of live agent support improves the service provided to the 24/7 operations of our stakeholders. · Improved deployment of end user devices by an average of 50% using a highly automated process. · Deployed and augmented technologies resulting in a 30% reduction in labor associated with contact tracing and testing.
-

Major Accomplishments

-
- 2 Statewide Longitudinal Data System Accomplishments (11271) Digital Credentials: Bismarck State College has created stackable credentials in cybersecurity and defined them as Badges and defined their credentials in the Credential Engine. Joining BSC is LRSC and UND to defined cybersecurity credentials. LRSC is defining its cybersecurity pathways including apprenticeships along with UND defining its master program in cybersecurity in which BSC bachelor's degree can be used as a precursor to acceptance. The Bismarck Career Academy and Bobcat are working with the SLDS to publish stackable credentials as welding certificates recognized by industry. Open Badges v3.0 standard has been spawned from the ND project to include badges as verifiable credentials along with Comprehensive Learner Record which will hold badges as individual assertions to a learners/worker's journey and accomplishments. ND efforts to publish a ND high school electronic transcript utilizing blockchain for students to own their own digital credentials has released V1.0 in production pilot. ND high school students may publish their transcript to digital wallets enabling them to share their verifiable credentials. The ND digital credentials now accept Open Badges as assertions to course and credential completion as a Comprehensive Learner Record with linked data back to the taxonomy of the courses defined in the ND Open Salt server (<https://case.nd.gov>). - The SLDS will continue to engage employers, licensing providers and training partners into developing recognized and verifiable digital credentials and skills needed to fulfill ND employment needs.
-
- 3 EduTech/K-12 Network Accomplishments (11273 & 11274) EduTech has begun managing the purchase of Microsoft EES licenses on behalf of ND PK-12 school districts and educational institutions. 45 have signed up or committed between July 1 - Sept 1, 2022 with more joining each month. During this window 61,000 licenses have been purchased by districts, at a cost of \$337,000. By purchasing through EduTech, ND K12 institutions have saved more than \$90,000. EduTech was the first organization in the nation to be certified as an official training partner of CYBER.org (funded by the Department of Homeland Security), enabling EduTech to deliver \$40,000 of training per year and to date and nearly \$200,000 worth of equipment to ND PK-12 educators. Merged education service desk with overall enterprise service desk. Replaced all end-of-life video collaboration within the K-12 environment. STAGEnet currently delivers network and security services via a 100-gigabit highly available backbone to all ND PK-12 public school districts, providing a minimum bandwidth of 1 gigabit for all schools, with capabilities up to 10 gigabit connections, depending on school need.
-
- 4 Geographic Information System Accomplishments (11276) Bridge Conditions Map: Allows the public to view the condition of any bridge in the state. Users can easily filter bridges based on condition, ownership or geographical area. Additional details about a bridge can viewed by simply clicking on the bridge location. It also provides the user educational information on what is rated on a bridge and how it is rated. The data is updated on a weekly basis, so the user has current information about a bridge any time they access the application. Oracle to SQL Server Migration: The GIS Hub had used Oracle since 2002. Datasets from the multiple databases were copied over, resulting in cleaning out old items no longer used. Imagery datasets were moved to the platform used by other imagery datasets since 2006. SQL Server provides reduced cost (approximately \$14,000 per year) and improved self-service by state agency GIS data stewards. SQL Server is also familiar to more vendors. Migration to New Open Data Platform: The GIS Hub Data Portal is used for the cataloging and discovery of state agency geospatial data and information. With this new platform, state agency data stewards can now publish and manage their own data. Data can be downloaded and streamed via web services. Data streamed via web services can in many cases, replace accessing the data from the enterprise geodatabase. This is a great benefit for remote workers hampered by reduced home internet speeds and VPN throttling.
-
- 5 Health Information Network Accomplishments (11277) The NDHIN expansion project has provided a platform shift to enable improved health information exchange, population health analytics and care coordination. NDHIN has over 400 health care locations participating across the state with over 4,000 clinical users participating in the system. The master patient index now houses over 1.4 million unique patient records. NDHIN completed COVID-19 Electronic Lab Reporting (CELR) for the state. CELR data comes into the Department of Health for ELR reporting, which sends a copy of these messages to NDHIN. Prior to and throughout COVID, NDHIN implemented Electronic Test Orders & Results (ETOR) with large integrated delivery networks and out-of-state reference labs. This allowed test orders to go out and come back electronically with the capability of being imported to the electronic health record. The North Dakota Healthcare Directive Registry development has been completed and is available at <https://apps.nd.gov/itd/hin/hdir/login>. This system allows citizens to store, maintain, and retrieve important healthcare documents, such as advance directive documents that are key when determining proper patient care. Users can share documents with providers and family as they choose. NDHIN is integrated with the ND Immunization Information System/Registry with bidirectional exchange of data. NDHIN is also providing data to the Autism Registry; syndromic surveillance and electronic laboratory data to Department of Health systems to support public health initiatives.
-

Major Accomplishments

- 6 State Interoperability Radio Network Accomplishments (11278) The first public safety official's website went live on the statewide interoperable radio network (SIRN). The SIRN effort is to modernize and provide public safety with a feature rich and highly available network to meet the mission critical communication needs of the public safety community. Over the next three years, the entire state will be migrated to this network. The first users of SIRN went live with new, feature rich and resilient network providing the public safety community with a communications network they require. Implemented a new computer aided dispatch solution provided for the state public safety officials enabling a feature rich platform for years to come. Upgraded the next gen 911 core infrastructure to ensure the highly reliable and resilient requirements of the 911 solution are maintained.
-

Critical Issues

- 1 IT Operations Critical Issues: NDIT is making important strides to lay a foundation for North Dakota's future, including making significant investments in our team members and our state's 21st century technology infrastructure. Through investments in the people, processes and technologies that enable the business of government, we are also creating a strong framework for future growth across all industries. Workforce gaps will be one of largest critical issues facing ND government agencies in the upcoming biennium. We continue to lose resources to private industry for better pay, more flexibility and a better work/life balance. The demand for new IT services as well as the burden of maintaining legacy technology creates a backlog of work exceeding the current staffing levels. We also continue to make significant investments in our team members. Our emphasis on training, professional development, and upskilling is part of a holistic approach to ensure we can compete in one of the most in-demand career fields in the world. With an 18-month half-life – meaning that within IT industry, half of the knowledge an IT person has is no longer relevant 18 months from now – we are building a culture of continuous improvement and learning. In order to support that continued growth and our national leadership in precision agriculture, Unmanned Aerial Systems, energy and the economy writ large, we have to be able to secure the increasingly interconnected technology backbone. And we can't expand this 21st century critical infrastructure if we can't secure it, which is why Legislative leadership this past session in terms of cybersecurity investments and IT unification were so instrumental. These investments were made in a pre-pandemic time, prior to supply chain issues, record setting inflation and unprecedented high costs across the country effecting every industry and business sector. The high cost of IT consumables like hardware and software will be a critical issue in the upcoming biennium. Finally, with employers across the country striving to handle the "Great Resignation", NDIT faces the critical issue of knowledge management. Developing the means to capture institutional knowledge before it is gone is key to mitigating the interruption of services. Documentation, job rotation among team members, and regular process review are some of the ways NDIT will attempt to tackle this. A statewide initiative around knowledge management would help provide resources and training to all agencies facing this issue
-

Critical Issues

-
- 2 Health Information Network (11277) NDHIN has received funding from the Centers for Medicare and Medicaid (CMS) under the Health Information Technology for Economic and Clinical Health (HITECH) program which sunset at the end of the federal fiscal year 2021. CMS has directed states to work together to transition funding for these programs, such as NDHIN, to the State Medicaid Agency. Recent CMS guidance indicates that federal support of HIEs can continue dependent on collaboration between the State Medicaid Agency and HIE to determine value/benefit and the appropriate cost allocation. NDHIN has been having discussions with ND Medicaid on a cost allocation methodology but has not yet arrived on a sustainable option. One issue with establishing cost allocation is that NDHIN benefits all North Dakota citizens, not only Medicaid beneficiaries. In the 2020-21, legislative session, language was updated to allow NDHIN to transfer \$6 Million from the Health Information Technology loan fund to use for operations. While generous, this amount barely allows NDHIN to maintain operations for the biennium with minimal staff. Such a drastic reduction on such short notice jeopardizes the future of NDHIN. Funds are necessary to ensure there is not a gap or discontinuation of the services that NDHIN provides to benefit citizens of North Dakota. NDHIN provides many valuable services that benefit the citizens of North Dakota. NDHIN benefits all North Dakota citizen with a mission to advance the adoption and use of technology to exchange health information and improve healthcare quality, patient safety, and the overall efficiency of healthcare and public health services in North Dakota. NDHIN currently contains 1.5 million unique patient IDs. NDHIN aggregates patient electronic health information from participating healthcare systems into a cumulative patient medical record. NDHIN connects over 333 organizations representing diverse providers, hospitals, clinics, and labs to make electronic health information available on demand at the point of care. Appropriate, timely sharing of vital information can better inform decision making at the point of care and allow providers to avoid readmissions, avoid medication errors, improve diagnoses, and decrease duplicate testing improving care for citizens. NDHIN is used by providers as can be evidenced in the month of July, 2022, over 26,000 patient records were accessed through the NDHIN. In the month July 2022, over 36,000 web-based direct secure messages and over 89,000 XDR messages were sent between providers and payers. NDHIN continues to recruit and onboard additional participants. NDHIN has completed connectivity to national networks via the eHealth Exchange hub which provides provider query access to key organizations such as the Mayo Clinic, as well as HIEs in other states and networks such as Carequality and Commonwell Health Alliance. Although NDHIN has continued to operate and make some progress over the past year there are many opportunities for the state of North Dakota in leveraging this secure statewide network that has now collected over 10 years of clinical patient information. The state of North Dakota is very fortunate to have a statewide network in NDHIN to support this critically important work. A lack of funding to sustain NDHIN risks erasing the progress made during the past decade and reverting to less efficient methods of sharing health information between providers and the state which would increase provider burden, be less secure, and potentially more costly. Many states are working to identify quality, value and cost of care across their population in order to improve overall citizen health and well-being. Data warehouses, data lakes and All-Payer Claims Databases (APCD) are prime opportunities for this endeavor, and the HIE can provide the essential clinical data that is needed
-
- 3 Statewide Interoperable Radio Network (11278) During the 66th Legislative Assembly via HB 1435 the Statewide Interoperable Radio Network (SIRN) received appropriations. SIRN is an effort to build a statewide public safety communications network for the entire public safety community within North Dakota that will provide public safety grade communications with a modern and supported technology and provide sufficient coverage required by the community. HB 1435 included budget authorization and funding of this network. Section 7 of HB 1435 included the sum of \$20,000,000 from the current earning and accumulated undivided profits of the Bank of North Dakota. Due to the multi-year effort required to build this network, the funding from the Bank of North Dakota was not placed into the SIRN fund during the 2019-2021 biennium. As such, the OMB and NDIT included language in the 67th Legislative Assembly SB 2021 that would allow those funds to continue into the 2021-2023 biennium. Unfortunately, that effort resulted in language that failed to meet the intent and those funds were lost. In order to complete this project, the \$20,000,000 that was appropriated and assumed to be continued into the 2023-25 biennium will need to be reinstated from whatever fund as deemed appropriate. Public safety communication will not be sufficient to meet the requirements of the public safety community and response by that community will be significantly impacted and potentially resulting in the loss of life and property throughout the state. Partial completion of this project would leave communications un-encrypted, when connecting diverse and unsupported existing VHF communications systems. Partial completion of this project may leave some communities without the ability to communicate, or at a minimum, severely degraded or unsafe communications with other first responders.
-

Performance Measures

ITD publishes an annual report that discusses our performance measures in more detail. The report can be found at <https://www.ndit.nd.gov/about-us/annual-report/2020-2021-annual-report>

Program Statistical Data

IT Operations

NDIT currently provides information technology services for over 600 customers including state agencies, higher education, political subdivisions, libraries and the K-12 education community.

In the past six months we have defended against:

187,000,000 threats prevented or detected; Greater than 72,000,000 vulnerability attacks blocked; More than 7,000,000 spam and phishing messages; Over 20,000 security incidents resolved. In 2021, the state of North Dakota detected and prevented 4.5 billion different threats. That is double the 2019 number.

- Processed on average 12,000 incidents per month.
- Service desk achieved a 96% satisfaction rating related to incident management.
- Service desk achieving 71% first call resolution.
- First call resolution time of 0.12 days.
- Average incident resolution time of 1.4 days.
- Met service level objectives related in incident management 92.9% of the time.
- Increased service management process maturity from a rating of 1.1 to 1.8.

Statewide Longitudinal Data System (11271)

State Longitudinal Data System (SLDS) public interactive dashboards and data site, Insights of North Dakota (<https://Insights.nd.gov>), expanded to include more data domains including Career and Technical Education (CTE) and additional K12 data along with Workforce Supply and Demand in post-secondary institutions.

EduTech/K-12 Network (11273 & 11274)

Provides PowerSchool, the PK-12 student information system, for 175 school districts (168 public and 7 non-public) as well as 3 CTE Centers, 4 REAs and 1 ITV Consortium.

23,400 Office365 Teams are currently in use to enhance collaboration and communication.

112 Information Technology

Agency 112

E-Rate workdays were held with over 300 participants in more than 250 public and private schools. EduTech also worked with schools with the Emergency Connectivity Program. ND schools applied for \$8,589,524.04 during application windows 1, 2 & 3. For 2022, STAGEnet was funded for \$2,072,519.90. ND schools had 70 applications and 109 funding requests.

Geographic Information System (11276)

There are more than 325 publicly available data layers on the GIS Hub with an average of over 900 data downloads per month and over 370,000 web service hits per month.

Health Information Network (11277)

NDHIN currently contains 1.5 million unique patient IDs. NDHIN aggregates patient electronic health information from participating healthcare systems into a cumulative patient medical record. NDHIN connects over 333 organizations representing diverse providers, hospitals, clinics, and labs to make electronic health information available on demand at the point of care.

NDHIN is used by providers as can be evidenced in the month of July, 2022, over 26,000 patient records were accessed through the NDHIN. In the month July 2022, over 36,000 web-based direct secure messages and over 89,000 XDR messages were sent between providers and payers.

State Interoperable Radio Network (11278)

The State's current public safety radio networks are comprised of approximately 900 public safety and other public sector agencies comprised of 20,000 users and devices and 22 Public Safety Answering Points ("PSAP", "Dispatch", or 9-1-1 Call Centers") distributed across all 53 counties and several state agencies. This includes city, county tribal and public safety radio networks.

Explanation of Program Costs

Programs for NDIT are laid out as IT Operational work and appropriations by line item (71,73,74,76,77, & 78) These programs will have a mixture of general funds and other funds.

IT Operations

General fund salaries and operating expenses for three FTE positions for maintaining statewide e-government initiatives, enterprise communications and enterprise architecture initiatives. Salaries and operating expenses for 31 FTE positions for maintaining statewide cybersecurity functions. These services are provided for state government, higher education, K-12, cities, political subs and boards or commissions.

Other fund appropriations this program are people costs, software costs and the cost of the network and computing infrastructure. The demand for more bandwidth continues to grow as we expand the delivery of services via the e-government model and see an increasing move towards cloud based services. The industry continues to see year over year increases in software maintenance costs. In addition we are seeing a continued growth in the demand for managed storage services which will require additional hardware purchases. The core operations of NDIT provide computer hosting and support services, software development services and state-wide communications services. The costs for these services are tracked as an internal service fund. Accordingly, these services are funded through a process of defining and assessing a fair and equitable billing structure for services that provides for payback of the initial investments and ongoing operations. This is accomplished by determining the actual cost of providing a specific service and establishing a unit rate for that service. NDIT is committed to quality service in a timely manner for a reasonable cost.

112 Information Technology

Agency 112

Statewide Longitudinal Data System (11271)

The costs in this program consist of salaries for seven FTE and operating expenses to drive the Statewide Longitudinal Data System.

EduTech/K-12 Network (11273 & 11274)

The costs in the EduTech program (11273) include salaries and operating expenses for 27 FTE positions who provide IT training, consulting, coaching and outreach to the PK-12 community, including educators, administrators, staff, students, and parents. In addition, this staff provides IT services, consulting and support for centralized e-mail hosting, identity management, Azure Active Directory, device management, and E-Rate for PK-12 schools. This staff also provides the hosting and support services for the statewide PowerSchool Student Information System which provides students and parents the capability to access grades and attendance along with other features needed to provide efficient school management.

The majority of costs in the K12 Network program (11274) cover the portion of circuit and infrastructure costs for K-12 schools and libraries that are not covered by reimbursements from the federal E-Rate program. It also includes salaries and operating expenses of four FTE's who directly support the K-12 customer base for network services.

Geographic Information System (11276)

The costs in this program support the deployment and operation of the GIS hub and include salaries and operating expenses for one FTE.

Health Information Network (11277)

The ND Health Information Network (NDHIN) is the name of the state health information exchange. The appropriation in this program covers salaries of four FTE and the operating expenses of NDHIN. The anticipated funding model for NDHIN is state funds, augmented by subscription fees paid by the provider and payer community.

State Interoperable Radio Network (11278)

This program appropriation covers costs associated with two initiatives for the public service community including the salary of 1 FTE, the operating, and the equipment expenses of Enhanced 911 and the State Interoperability Radio Network.

The Statewide Interoperable Radio Network initiative is to conduct a comprehensive update of systems based on an integrated, interoperable trunked Association of Public-Safety Communications Officials (APCO) Project 25 standard (P25) system. The 2019-2021 appropriation included \$20.0M of SIF funding, \$80.0M in line of credit authority from Bank of North Dakota and \$20.0M of Bank of North Dakota profits. Capital Construction carry over was used in the 2021-23 biennium to maintain the appropriation authority for the line of credit. Authority will need to be appropriated in the 2023-2025 biennium for the bank profits.

Program Goals and Objectives

IT Operations

In efforts to work with all customers of North Dakota across the legislative, judicial, and executive branches, as well as our customers in Higher Education, K-12, cities, and counties, our organization has adopted three top level objectives:

112 Information Technology

Agency 112

- 1.) Deploy a world class government experience
- 2.) Secure all government held data in America
- 3.) Deliver the most efficient government services in America

These objectives will guide our work for years to come as we attempt to meet our purpose to empower people, improve lives, and inspire success across the state of North Dakota.

As a state, we are pursuing technology solutions that enable more efficient service delivery. Technologies that once were thought of as “bleeding edge” now are increasingly ubiquitous, enabling government agencies to become more customer-centric in myriad ways, from answering billing queries to proactively identifying when customer data is being targeted by cybercriminals. We are also taking a more citizen-centric approach, with a goal of having a 360-degree view of citizens that will help provide the right services, at the right time.

Cybersecurity, and the protection of our state’s and citizens’ data remains a critical priority. We continue to work closely with the Legislature to enhance our cybersecurity posture. Moving to shared technology platforms, like the state website platform, also enables a standard, streamlined approach to our operational security. In addition, unifying the hundreds of disparate IT team members and processes from across agencies will help ensure clear priorities and a uniform approach to North Dakota’s Information Technology goals, priorities and approaches, including and especially with regards to cybersecurity. Aligning the people, processes and approaches that span our IT enterprise will ultimately enhance service delivery, efficiency and security.

Statewide Longitudinal Data System (11271)

Statewide Longitudinal Data System (SLDS) is a P20W data warehouse that integrates data from Pre-K, K-12, postsecondary, and workforce training programs. This system allows state and local entities to leverage approved data from education and workforce training programs for use in reporting, program evaluation and research for the purpose of improving participant outcomes of education and workforce training programs. The SLDS will continue to engage employers, licensing providers and training partners into developing recognized and verifiable digital credentials and skills needed to fulfill ND employment needs.

EduTech/K-12 Network (11273 & 11274)

This program is used to track expenditures for PK-12 related initiatives in the Information Technology Department’s budget. Line 11273 is the EduTech program which provides technical support and services to the PK-12 community and is responsible for professional development of PK-12 administrators and educators in the use of technology to improve teaching and learning.

Line 11274 is K-12 Network which provides for the deployment and operation of STAGEnet to PK-12 schools throughout the state. The general funds cover the costs of providing internet and wide area network services for the PK-12 community that are not funded by the Federal E-Rate Program.

Geographic Information System (11276)

The core of the North Dakota GIS Program is the GIS Hub which leverages the State’s existing data, infrastructure, and geospatial expertise to share core geographic datasets to state agencies and the public. The State Geospatial Committee (formerly the GIS Technical Committee), consisting of 15 state agencies, enhances the GIS Hub by adding data and applications and increasing awareness of the GIS Hub by promoting its use, value, and functionality. There are more than 325 publicly available data layers on the GIS Hub with an average of over 900 data downloads per month and over 370,000 web service hits per month.

112 Information Technology

Agency 112

Health Information Network (11277)

This program is used to track expenditures for Health Information Technology (HIT) planning and coordination and for operating the NDHIN.

NDHIN goals are to coordinate HIT initiatives as noted in North Dakota Century Code 54-59-25, 54-59-26 and 54-59-27. This code established a Health Information Technology Advisory Committee (HITAC), to help implement a comprehensive system to manage health information. HITAC consists of representatives from the Governor's Office, ITD, Department of Health, and Department of Human Services, as well as stakeholders appointed by the Governor, who represent providers, consumers, and trade associations. NDHIN promotes innovative approaches to the secure exchange of health information within and across state lines. This allows providers to have accurate and complete information about a patient's health, allows for better coordination of care, and provides information to help doctors diagnose health problems sooner, reduce medical errors, and provide safer care at lower costs

State Initiative:* Technology Investment

112 Information Technology

Agency 112

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The customer success program is an integral part of the enterprise approach to technology. Having adequate resources available for state government is important to the success of this program. Each agency should have a central IT resource that assists with strategic planning, technology research and updates, and communications within NDI and amongst other agencies to understand challenges and opportunities holistically.

This package is to establish the resources in a similar manner as OMB budget analysts or Legislative Council’s legislative analysts assigned to each agency. Current FTE would be general funded for all of state government to benefit. This package adds two additional FTE to the resource pool.

Necessary resources for implementation (including FTE’s)*: Current FTE plus 2 additional.

Are resources being redirected or are they new or additional (including FTE’s)*: 6 current FTE would have funding transitioned and 2 FTE would be added.

Who is served and impact of not funding*: All of state government is served. Not funding this will leave the CSM program drastically short of resources which will lead to dissatisfaction from customers with IT needs.

Governance, Risk & Compliance (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	771,906	1,350,000	2,121,906	3.00	320,289	1,350,000	1,670,289	1.00
Special	2,431,596	10,000,000	12,431,596	10.00	857,148	10,000,000	10,857,148	3.00
Total	3,203,502	11,350,000	14,553,502	13.00	1,177,437	11,350,000	12,527,437	4.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request is to obtain the appropriation needed to work on the Lighthouse Project. This funding was awarded to DPI as general funds, however NDI did not receive any special fund authority.

The state of North Dakota has launched Project Lighthouse (Lighthouse) to transform how data on citizens, initially children, and related analytics are leveraged for social good. Lighthouse will pave the way to:

- o Provide a single / Citizen-centric repository of Citizen related data eliminating duplication and redundancies that exist across multiple systems.

112 Information Technology

Agency 112

- o Provide a security structure that ensures that access to Citizen data and related trends are properly segregated and viewable
- o Access all data that is secured and available for analytics and decision making by policy makers.
- o Provide a roadmap for all data management to enable analytics and AI at scale
- o Deliver robust reporting, advanced analytics and ethical use of AI by policy makers.

One of Lighthouse's main requirements is to focus on solving for the primary needs within DPI and DHS datasets such as the early childhood analysis (in progress), SLDS and STARS. When completed Lighthouse will provide a single data repository of truth that can be used by all related agencies thus eliminating the need for the myriad of data stores that comprise feed systems like SLDS and STARS.

The Department of Public Instruction (DPI), Department of Human Services (DHS) and North Dakota Information Technology (NDIT) are collaborating on the scope and direction of this effort. The project is expected to run multiple years and will utilize leading edge technologies including but not limited to cloud, process automation and analytics. Lighthouse is envisioned as the framework for how data is governed and managed for all subject centric repositories within North Dakota.

Necessary resources for implementation (including FTE's)*: Several roles are requested to support (a) Project Lighthouse - transformation effort to modernize our data and analytics systems (b) Automation and engineering transformation.

- Data Steward
- Data Governance Lead
- Data Architecture Manager
- Data Architect
- Data Engineer
- Scrum Master(s)
- Robotic Process Automation (RPA) Lead
- Kubernetes Lead

Are resources being redirected or are they new or additional (including FTE's)*: The Lighthouse Project is new work for DPI, DHHS and the SLDS platform. New resources will be needed.

Who is served and impact of not funding*: Multiple state agencies including but not limited to DPI and DHHS. Without these resources, all knowledge of systems will reside with contractors (risk) and will not allow NDIT to mature in our development practices.

112 Information Technology

Agency 112

Operational Inflationary Increases (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	2,850,000	-	2,850,000	0.00	-	2,850,000	2,850,000	0.00
Special	5,675,000	-	5,675,000	0.00	-	5,675,000	5,675,000	0.00
Total	8,525,000	-	8,525,000	0.00	-	8,525,000	8,525,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDCC 54-59 establishes NDIT as being responsible for a wide range of IT services for state agencies, K12, Higher Education and political subs. These services range from network access, desktop support, and hosting services to telecom and cyber security. To provide these services effectively, NDIT relies on numerous third party vendors for hardware, software and associated support.

All of these vendors have increased the cost of their products anywhere from 8% - 20% in the current biennium and have indicated that such increase will continue annually over the next two years. NDIT has very limited bargaining power against these cost increases as switching technology solutions will often cost the state millions of dollars.

To maintain adequate service levels for the technologies deployed across the state, NDIT needs additional appropriation authority to cover the increases in vendor costs due to inflation nationwide.

In our general fund programs for education, NDIT has absorbed 10% budget cuts for the 2019-21 and the 2021-23 biennium. Total reductions over this period have ranged from \$750,000 - \$1,000,000 per program. NDIT would like to reinstate a portion of those reductions to offset the inflationary increases in providing services in these areas.

Necessary resources for implementation (including FTE's)*: Resources needed will be to increase appropriation authority. No FTE are a part of this package.

Are resources being redirected or are they new or additional (including FTE's)*: These will be new resources.

Who is served and impact of not funding*: All of State government, K-12, Higher Education, Political Subs, tribal nations and potentially other states that have joined the JCSOC are served and affected.

Not funding this will likely create a situation where NDIT does not have the appropriation authority to procure necessary third party hardware, software and associated support.

112 Information Technology

Agency 112

NDIT Additional Resources (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	444,258	-	444,258	2.00	474,636	-	474,636	2.00
Special	3,276,508	-	3,276,508	24.00	3,650,545	-	3,650,545	18.00
Total	3,720,766	-	3,720,766	26.00	4,125,181	-	4,125,181	20.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Technology expertise and support services from NDIT are continually growing. While staff continue to maintain existing applications and support mainstream devices, they are also asked to explore the next technologies on the horizon for our State. A competitive hiring market requires NDIT to be able to offer a suitable work/life balance. Being understaffed becomes a major concern following the recent pandemic.

Unification efforts in the past two biennium have increased the number of IT technicians within NDIT, however many of these individuals were a single point of failure for support of applications. The backlog of IT work and demand for new technologies from the agencies cannot be accomplished by the same individuals tasked with maintaining existing workloads.

Necessary resources for implementation (including FTE's)*: To build and train a pipeline of employees, NDIT is asking for 10 FTE to be used as apprenticeships with local colleges in technology fields. This is currently being used in Cyber Security, but NDIT would like to expand this in other verticals. This modern apprenticeships model will build a highly skilled and customized flow of talent, preparing workers who typically stay around for the long term. Building upon the Career and Technical Education platform, it organizes classroom and work-based learning around knowledge and skills that specific IT occupations demand and offers deeper and more extensive on-the-job training. For NDIT as the employer, it creates a feeder pool of talent in hard to fill areas and would include a sign-on agreement. Apprenticeships are a win/win for the employer and the employee.

NDDOT has asked for us to add support staff for the increasing support of roadside technologies. The State Interoperability Radio Network (SIRN) will be nearing completion at the end of next biennium. Support staff are needed to maintain the public safety network, primarily with Highway Patrol as they let two temp staff go in anticipation of unification in the 2019-21 biennium which did not happen.

With the continual growth of our Cyber Security efforts through memorandums of understanding (MOUs) with tribal nations and the Joint Cyber Security Operations Center (JCSOC) NDIT is seeing an increased attack vector which will require additional analysts. The Cyber Security team has also grown their tool coverage by over 200% in the last 18 months. The decision by the North Dakota Insurance Relief Fund (NDIRF) to reduce insurance costs for those Political Subs that adopt our security tools has also increased the cyber teams work. While much of the increased work has been offloaded via automation, in-depth analysis requires many hours of work by an analyst.

112 Information Technology

Agency 112

Focusing on our customer's satisfaction, NDIIT strives to have a good interaction between front line support staff and the end user. Responsiveness is a big factor in satisfaction. Adding front line workers to desktop and the help desk will ensure availability. Current efforts to accomplish this work with contractors proves to be a continual churn of training and retraining.

The Data division manages a gamut of software development activities - ranging from ERP to automation to app development to data management. While we have several individual projects happening, what's missing is cohesive program management & coordination for data specific projects. This role will support strategic projects e.g. Project Lighthouse as needed, and will assist with grant writing & administration support, and agency-industry collaboration.

Are resources being redirected or are they new or additional (including FTE's)*: Two positions will transfer from DOCR, the rest are new.

Who is served and impact of not funding*: All of State government, K-12, Higher Education, Political Subs, tribal nations and potentially other states that have joined the JCSOC are served and affected.

Not funding additional staff to meet the work demand results in adding to an already overworked staff, inevitably leading to more work separations. Unplanned work still needs to be completed, but with out proper staffing levels, all customers suffer.

SLDS Growth & Enhancements (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	3,000,000	1,075,000	4,075,000	0.00	3,000,000	1,075,000	4,075,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	3,000,000	1,075,000	4,075,000	0.00	3,000,000	1,075,000	4,075,000	0.00

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Statewide Longitudinal Data System (SLDS) leverages stakeholders and partners of education, training, and employment programs to create a system which provides data to support the research and evaluation of programs to improve the outcomes of individuals provided service. SLDS maximizes the usefulness of management information while protecting the privacy and security of personal information.

The SLDS is a series of secured data warehouses comprised of historical education and workforce training data. The objective of the SLDS is to provide data on the outcomes of ND education and workforce training programs. All 50 states are currently building similar systems and are intended to enhance the ability of States to efficiently and accurately manage, analyze and use education data, including individual student records.

Through the data warehouses, critical education and policy questions begin to be addressed such as:

112 Information Technology

- Are North Dakota students being prepared for success in post secondary education and the workforce?
- Do post secondary graduates find employment in North Dakota?
- Are North Dakota employers finding a well trained workforce within North Dakota for current and emerging jobs?

The budget ask for this effort is made up of three major elements:

- With the budget cuts absorbed over the past several biennium, the SLDS is no longer able to sustain the hardware and infrastructure refresh that is required to ensure the system continues to function on supported technologies and is able to maintain a stable and secure environment.
- The program has been extremely fortunate to fund a great deal of effort over the past several biennia with various grant programs. As those grant program expire and new grants become increasingly smaller or non-existent, we are requesting general fund resources in order to maintain existing system and be able to respond to new demands on the system
- In an effort to bring more transparency to the overall cost of the program, resources that formerly were included in other budgets have been moved into this single ask.

Necessary resources for implementation (including FTE's)*: Financial resources are articulated in the budget materials which includes hardware, software and labor that is sources from existing FTE's within NDIT and supported by third party contractors.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are redirected from grant dollars that were appropriated to Department of Public Instruction to the SLDS budget since the grant has expired.

Who is served and impact of not funding*: The entire K-12 community will benefit including teachers, technologist, administrators, and K-12 policy and decision makers. Policy makers at the state and local level including legislators, agency heads, program directors, school board members, superintendents, and principles.

If not funded, aging infrastructure will result in poor performance, more outages and provide for an increased risk of a cyber event.

SIRN Project - BND Profits (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	4,992,588	20,000,000	24,992,588	4.00	4,200,000	20,000,000	24,200,000	0.00
Total	4,992,588	20,000,000	24,992,588	4.00	4,200,000	20,000,000	24,200,000	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

112 Information Technology

Agency 112

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: During the 66th Legislative Assembly via HB 1435 the Statewide Interoperable Radio Network (SIRN) was authorized. SIRN is an effort to build a statewide public safety communications network for the entire public safety community within North Dakota that will provide public safety grade communications with a modern and supported technology and provide sufficient coverage required by the community.

Within HB 1435 including budget authorization and funding of this network. Section 7 of HB 1435 included the sum of \$20,000,000 from the current earning and accumulated undivided profits of the Bank of North Dakota. Due to the multi-year effort required to build this network, the funding from the Bank of North Dakota was not placed into the SIRN fund during the 2019-2021 biennium. As such, the OMB and NDIIT included language in the 67th Legislative Assembly SB 2021 that would allow those funds to continue into the 2021-2023 biennium. Unfortunately, that effort resulted in language that failed to meet that intend and those funds were lost. In order to complete this project, the 20,000,000 that was appropriated and assumed to be continued forward be reinstated from whatever fund as deemed appropriate.

In addition to reinstatement of the lost project funds, NDIIT is seeking funding to support the operational aspects of this network. As this network continues to be built out the associated operational expenses are occurring. Thus far, the operating expenses are being funded by the SIRN fund that was established in the 65th Legislative Assembly. This funding for this fund acquired whereby \$0.50 of the 911 is deposited and is available to NDIIT to support the network. That fund accumulates roughly \$4.5M per year. As the network is built out combined with the loan payments associated with this project additional resources of \$4.2 will be required during the 23-25 biennium.

Necessary resources for implementation (including FTE's)*: This heavily support through contract resources however to effectively manage and operating this network local resources are required that include 3 public safety network administrators and 1 public safety facilities engineer

Are resources being redirected or are they new or additional (including FTE's)*: The resources will be new.

Who is served and impact of not funding*: The entire statewide public safety community including but not limited to law enforcement, fire response, and emergency medical response are the direct beneficiaries while every citizen and resident of the state equally benefit. Without the appropriation authority, NDIIT will not be able to receive the BND funds and finish the project.

ARPA Broadband Appropriation - Federal (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	45,000,000	45,000,000	0.00	-	45,000,000	45,000,000	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	45,000,000	45,000,000	0.00	-	45,000,000	45,000,000	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

112 Information Technology

Agency 112

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: House Bill 1505 from the 67th Legislative Assembly’s Special Session appropriated federal funds for broadband development in North Dakota. NDIT is to administer a grant program for applicants.

Applicants applying for grant dollars must provide broadband services. Areas qualifying for grant projects are those lacking access to terrestrial broadband speeds of 100 megabits per second download and 20 megabits per second upload.

The special session appropriated 45M for purposes of improving broadband access across North Dakota via competitive grants provided by NDIT to eligible providers. These funds were part of the ARPA Capital Project Fund. As of August 24, 2022, the U.S Treasury has yet to approve this project which has resulted in the lost opportunity of the 2022 construction season. This appropriation will require an extension of spending authority through the 23-25 biennium to achieve goals of the 2021 special session objectives.

Necessary resources for implementation (including FTE’s)*: NDIT will utilize a contracted resource for project management of this work.

Are resources being redirected or are they new or additional (including FTE’s)*: No new FTEs are needed

Who is served and impact of not funding*: The unserved or underserved citizens of North Dakota will benefit from these ARPA dollars. Not having the federal fund appropriations to spend the federal dollars awarded would halt the granting process.

IIJA Broadband, Equity, Access and Deployment Program (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	149,408,158	-	149,408,158	5.50	-	148,250,000	148,250,000	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	107,468	-	107,468	0.50	-	-	-	0.00
Total	149,515,626	-	149,515,626	6.00	-	148,250,000	148,250,000	0.00

State Initiative*: Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: North Dakota is requesting funding through the Broadband Equity, Access, and Deployment (BEAD) Program to support our pursuit of increasing equitable access to broadband service in our service area. Our proposed program, Broadband North Dakota (BND), includes the creation of a comprehensive Five-Year Action Plan that will identify North Dakota’s broadband access, affordability, equity, and adoption needs; and will serve as a benchmark for adopting strategies, goals, and initial measures for connecting all residents of North Dakota with reliable broadband service.

112 Information Technology

Agency 112

Necessary resources for implementation (including FTE's)*: The North Dakota Information Technology organization will stand-up a separate dedicated team to focus on broadband development that will work in coordination with other federal, regional, and local entities to facilitate the availability of broadband access to every North Dakota citizen. The NDIT is the administering agent for the Broadband North Dakota program and will be the recipient of Initial Planning Funds. As administering agent, NDIT will oversee all pre-planning activities and will directly support the budget development, office expansion, and MOU development activities.

Are resources being redirected or are they new or additional (including FTE's)*: This will represent new work so the resources will be new.

Who is served and impact of not funding*: The Broadband, Equity, Access and Deployment program was created to provide broadband connectivity to unserved or underserved North Dakota Citizens.

Health Information Network Funding (Priority: 14)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	(6,000,000)	-	(6,000,000)	0.00	(6,000,000)	-	(6,000,000)	0.00
General	6,000,000	-	6,000,000	0.00	3,000,000	-	3,000,000	0.00
Special	-	-	-	0.00	3,000,000	-	3,000,000	0.00
Total	-	-	-	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: North Dakota Health Information Network (NDHIN) is the name of the state health information exchange (HIE). The request for general funding is necessary to continue operations of NDHIN. NDHIN is in the North Dakota Information Technology Department and is run by the Health Information Technology (HIT) office with advice from the governor appointed HIT Advisory Committee (HITAC). The anticipated funding model for NDHIN is state funds, augmented by subscription fees paid by the provider and payer community.

The costs in the request for NDHIN include salaries and operating expenses to coordinate and operate the HIT initiatives. The budget request includes funding request to sustain the platform including annual licensing fee of \$1,644,043, along with \$137,500 yearly for ongoing fees with other national organizations for NDHIN operation. NDHIN requests \$72,000 per year for technical onboarding costs of members and to build or replace interfaces. The Prescription Drug Monitoring Program (PDMP) is fully integrated in NDHIN for providers. The budget request includes the annual \$13,050 subscription fee to pay for the service.

Recent Changes in Level of Federal Support. NDHIN has received funding from the Centers for Medicare and Medicaid (CMS) under the Health Information Technology for Economic and Clinical Health (HITECH) program which sunset at the end of the federal fiscal year 2021. CMS has directed states to work together to transition funding for these programs, such as NDHIN, to the State Medicaid Agency. Recent CMS guidance indicates that federal support of HIEs can continue dependent on collaboration between the State Medicaid Agency and HIE to determine value/benefit and the appropriate cost allocation. NDHIN has been having discussions with ND Medicaid on a cost allocation methodology but has not yet arrived on a sustainable option. One issue with establishing cost allocation is that NDHIN benefits all North Dakota citizens, not only Medicaid beneficiaries. In the 2020-21, legislative session, language was updated to allow NDHIN to transfer \$6

Million from the Health Information Technology loan fund to use for operations. While generous, this amount barely allows NDHIN to maintain operations for the biennium with minimal staff.

State Appropriations Needed. Such a drastic reduction on such short notice jeopardizes the future of NDHIN. Funds are necessary to ensure there is not a gap or discontinuation of the services that NDHIN provides to benefit citizens of North Dakota. NDHIN provides many valuable services that benefit the citizens of North Dakota.

NDHIN benefits all North Dakota citizen with a mission to advance the adoption and use of technology to exchange health information and improve healthcare quality, patient safety, and the overall efficiency of healthcare and public health services in North Dakota. NDHIN currently contains 1.5 million unique patient IDs. NDHIN aggregates patient electronic health information from participating healthcare systems into a cumulative patient medical record. NDHIN connects over 333 organizations representing diverse providers, hospitals, clinics, and labs to make electronic health information available on demand at the point of care. Appropriate, timely sharing of vital information can better inform decision making at the point of care and allow providers to avoid readmissions, avoid medication errors, improve diagnoses, and decrease duplicate testing improving care for citizens. NDHIN is used by providers as can be evidenced in the month of July, 2022, over 26,000 patient records were accessed through the NDHIN. In the month July 2022, over 36,000 web-based direct secure messages and over 89,000 XDR messages were sent between providers and payers. NDHIN continues to recruit and onboard additional participants. NDHIN has completed connectivity to national networks via the eHealth Exchange hub which provides provider query access to key organizations such as the Mayo Clinic, as well as HIEs in other states and networks such as Carequality and Commonwell Health Alliance.

As a state based HIE, NDHIN is well positioned to collaborate with sister agencies. NDHIN played a major role in supporting Medicaid providers and hospitals to receive incentives for adopting electronic health records. NDHIN is currently working with Blue Cross Blue Shield to assist in providing technology to assist in care coordination efforts for the Medicaid Expansion population. NDHIN also collaborates with NDHHS to support electronic access to newborn screening results, lab results, syndromic surveillance, and several registries including immunizations and autism.

Public health relies on data reported by health care partners, and information technology makes such reporting easier than ever. NDHIN improves the efficiency and quality of public health reporting, facilitates public health investigation, improves emergency response, and enables the NDHHS to communicate information to the clinical community. NDHHS's public health case management system, Maven, is connected to NDHIN which provides the mechanism for public health reporting including syndromic surveillance and electronic reportable labs. NDHIN has a bidirectional connection with the North Dakota Immunization Information System (NDIIS). NDHIN now turns to the State of North Dakota for support to continue HIE services in North Dakota.

Future of NDHIN. Although NDHIN has continued to operate and make some progress over the past year there are many opportunities for the state of North Dakota in leveraging this secure statewide network that has now collected over 10 years of clinical patient information. The state of North Dakota is very fortunate to have a statewide network in NDHIN to support this critically important work. A lack of funding to sustain NDHIN risks erasing the progress made during the past decade and reverting to less efficient methods of sharing health information between providers and the state which would increase provider burden, be less secure, and potentially more costly.

Many states are working to identify quality, value and cost of care across their population in order to improve overall citizen health and well-being. Data warehouses, data lakes and All-Payer Claims Databases (APCD) are prime opportunities for this endeavor, and the HIE can provide the essential clinical data that is needed.

The future of many HIE's including NDHIN are evolving into a public health data utility model. Health information exchanges, like NDHIN no longer do "just" health information exchange between facilities. HIEs have many critical functions that benefit citizens including public health, social determinants of health, events notifications, emergency management, and other additional uses. Public Health Data Utilities combine and enhance clinical, public health, and other health and healthcare data and serve a purpose to improve and facilitate the secure, real time, interoperable movement of health care data between and among stakeholders.

112 Information Technology

Every state needs a neutral, trusted nonprofit health data utility to securely bridge and connect the data silos and to rapidly provide data and data insights to meet individual, public, and population health.

Necessary resources for implementation (including FTE's)*: No new resources are needed, this is a change in funding appropriation package.

Are resources being redirected or are they new or additional (including FTE's)*: Neither

Who is served and impact of not funding*: NDHIN benefits all North Dakota citizen with a mission to advance the adoption and use of technology to exchange health information and improve healthcare quality, patient safety, and the overall efficiency of healthcare and public health services in North Dakota.

NDHIN has completed connectivity to national networks via the eHealth Exchange hub which provides provider query access to key organizations such as the Mayo Clinic, as well as HIEs in other states and networks such as Carequality and Commonwell Health Alliance.

Public health relies on data reported by health care partners, and information technology makes such reporting easier than ever. NDHIN improves the efficiency and quality of public health reporting, facilitates public health investigation, improves emergency response, and enables the NDHHS to communicate information to the clinical community.

A lack of funding to sustain NDHIN risks erasing the progress made during the past decade and reverting to less efficient methods of sharing health information between providers and the state which would increase provider burden, be less secure, and potentially more costly.

Large IT Project Summary

Priority	Form Name	2023-25 Agency Request					2023-25 Executive Recommendation				
		General Fund	Federal Funds	Special Funds	Total	FTE	General Fund	Federal Funds	Special Funds	Total	FTE

State Initiative:* Reinventing Government

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The enterprise digitization project is an effort that sunset or modernize a portion of the legacy or aging technologies supported by NDIT and utilized by a multitude of state agencies. This effort will not eliminate all the ancient technology across state government however it will focus on some of the oldest technologies including the mainframe. In addition, this effort will introduce technology with a strong focus on eliminating the amount of paper processed by state government. Lastly this effort will allow for the sustainment of a data culture that empowers decision making across all of government including the citizens we serve.

Necessary resources for implementation (including FTE's)*: A significant amount of resources will be secured as temporary contract resource from third party experts. In order to sufficiently oversee and manage the scope and complexity of all these efforts require 7 developers, 1 systems administrator, 1 DBA, 1 Business Analyst and 1 Organization Change Manager and a Dynamics Lead.

Are resources being redirected or are they new or additional (including FTE's)*: Some of these roles can be filled by existing staff, however, they would then need to be backfilled with new FTE.

Who is served and impact of not funding*: All of state government will benefit for this effort. Those agencies that remain the mainframe and associate platforms along with the water commission will be the larger beneficiaries.

The impact of not addressing the technical debt we will be unable to sunset those platforms and those remaining will see significant price increases as we are unable to spread the cost of each platform across a large consumer base. Additionally, as the skillsets continue to diminish in the market the ability to maintain the platform will start to be in jeopardy along with increased cyber risk of unsupported technologies. Worst case scenarios is that the platform fails and we are unable to restore services.

The impact of not moving paper forms to a digital platform is a huge opportunity cost loss in terms of not improving transaction times for citizen services and not having the ability to automate the process and redirect human capital to higher level functions.

Start Date (MM/DD/YYYY): 07/01/2023

112 Information Technology

Agency 112

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? No

Upgrade existing application? Yes

Development of new application? No

Anticipated Benefits:* Ancient technology, technical debt or legacy technologies unfortunately exist throughout the environment which result in a great deal of risk and lost opportunities for the State. Legacy technologies can be barriers enabling a digital experience, automation of simple features that allow for improved efficiencies for the workforce as well as the citizen experience. Legacy technologies also introduce risk in being able to attract and retain skillsets, financial risk as the market to support these technologies lose their economies of scale and cyber risk when systems are no longer able to be properly maintained.

Dozens of smaller applications that continue to have a reliance on the mainframe are within scope of this effort. This will allow the State to remain on schedule for the possible elimination of the mainframe platform in the 25-27 biennium. By replacing or modernizing these applications the State will:

- Modernize the application and be able to introduce improved processes and automation
- Replace the older technology that is challenging to support with modern technologies where support and skillsets are more easily acquired
- Position the state to eliminate an extremely expensive platform

This effort will also have strong focus on the modernization of core technology platforms currently in use by the Water Commission. The platforms currently employed are not aligned with larger statewide standards and technology and is a skillset extremely small within state government and not widely available in the marketplace.

Paper to electronic to digital. A significant element of this project will be a targeted approach to the thousands of paper forms that continue to remain across all of State Government. Replacing these forms with a digital version will enable them to be consumed on any computer or mobile device significantly improving the citizen experience as well as efficiencies associated with interacting with state government. Likewise on a digital platform whereby the data captured by the digital forms is persisted to a database all data entry is eliminated by state government creating massive recovery of human capital time. Furthermore, once data is persisted in a database versus tied up on a piece of paper or pdf form it affords the opportunity to enable a massive automation and process improvement exercise. The automation efforts are not within scope of this effort however position for the enablement is within scope. Finally, this will reduce transaction time and result in improved response time to citizens and business that interact with state government.

The data visualization enablement platform is the resources and technologies required behind the scenes that allow for the consumption of power bi dashboards. The resources are consumed in a highly unpredictable manner based on each page view of an individual dashboard and the varying complexities within the page and datasets. This consumption-based cost model provides for highly unpredictable results for state agencies and ultimately results in a lesser demand for critical services that provide data and information for decision making. The resources in this area would remove this unpredictable billing model allowing state agencies and the citizens consumer to consume the dashboards and enable data driven decision making.

Project Risk:* Appropriate funding and resources to deliver on a project that will generate immediate and significant results and reduce risk for the state

112 Information Technology

Agency 112

Agency staff will be required to acquire requirements and participate in testing and deployment can be challenging for agencies that are already staff constrained. Lack of dedicated resources. Without dedicated resources the risk of budget and schedule challenges are likely, and outcomes will not be achieved.

Issue/Solution:* The enterprise digitization project is an effort that sunset or modernize a portion of the legacy or aging technologies supported by NDIR and utilized by a multitude of state agencies.

Universal Vulnerability Management (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	3,103,614	14,265,000	17,368,614	8.00	765,000	7,132,500	7,897,500	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	3,103,614	14,265,000	17,368,614	8.00	765,000	7,132,500	7,897,500	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The 220% growth of vulnerability assessment scans has led to a large number of vulnerabilities being discovered that were previously unknown. Many of these are on systems that can no longer be patched as the systems are out of date. These items introduce high risk and raise the potential for successful attack.

The Static Analysis Security Testing (SAST) Tools will help drive security testing of development and systems earlier in the process, giving the developers the ability to scan their code and libraries while developing and committing code. This will save time and money in the long run as they will be starting with secure code and will cut down on number of rewrites or updates after the code has been written and tested.

Necessary resources for implementation (including FTE's)*: The remediation efforts will need to be coordinated by a project manager. We will need to gather requirements through business analytics. We will need dedicated staff within the desktop team and the service desk to work on the remediation and test for success.

A number of contract staff will be needed to accelerate this effort over the next biennium. These are needed in both the technology and the data divisions to work individual remediation.

Inevitably, we will find a vendor application with a vulnerability that cannot be remediated. This will require an investment in the replacement or reconfiguration of the application.

Are resources being redirected or are they new or additional (including FTE's)*: These will be new resources as this is work not actively being worked on today.

112 Information Technology

Agency 112

Who is served and impact of not funding*: All agencies receiving application and hardware support from NDIT.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? No

Upgrade existing application? Yes

Development of new application? No

Anticipated Benefits*: NDIT hopes to gain process efficiencies related to the fixing and prevention of security vulnerabilities, along with significantly reducing the number of existing exploitable vulnerabilities.

Goals are to decrease work station critical and high exploitable vulnerabilities by 95%, decrease server critical and high exploitable vulnerabilities by 95%, and decrease the number of applications with critical and high exploitable vulnerabilities by 95%.

Project Risk*:

- 1) NDIT unable to find enough contractors - mitigation would be to prioritize work so that we could devote some NDIT staff to this effort;
- 2) Agencies may not have resources for this work - mitigation would be to work with the agency to explore other timeframes for their work or possibly decrease scope;
- 3) Team may be unable to fix a vulnerability without replacing the application - mitigation would be to request additional funding

Issue/Solution*: Procure contractors to augment existing NDIT staff to remediate as many critical and high exploitable vulnerabilities as possible and reduce the amount of new vulnerabilities.

Proposed scope includes:

- fix workstation vulnerabilities in the top five or six agencies based on quantity of critical and high exploitable vulnerabilities
- fix server vulnerabilities
- fix application vulnerabilities (critical and high exploitable vulnerabilities and as many mediums as possible)
- automating risk scoring; applications included are those that NDIT data team supports, or ones that NDIT receives requests for support or hosts
- current and future state process mapping

Enterprise Customer Relationship Management (CRM) (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	2,827,830	8,700,000	11,527,830	6.00	2,934,326	-	2,934,326	6.00
Special	501,808	-	501,808	2.00	536,859	8,700,000	9,236,859	2.00
Total	3,329,638	8,700,000	12,029,638	8.00	3,471,185	8,700,000	12,171,185	8.00

State Initiative:* Reinventing Government

Is this a Large IT project? Yes

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Customer Relationship Management is a tool that aids in the management, facilitation, and automation of government-to-citizen engagement. This tool will allow citizens to access many services through one central site.

- State of North Dakota staff can better manage relationships and improve public customer service with the people in the communities they serve. This is done through one centralized source of truth for the engagement and communication efforts. CRM allows State of North Dakota staff to effectively manage communication history in one location to better understand needs and provide appropriate support.
- A CRM tool can interface with other agencies, giving the business a one-stop-shop, where they may get all their State of North Dakota services met in one place.
- A CRM tool creates and stores one profile to be used by all agencies. This meets expectations of the State knowing and recognizing them across agencies. This reduces the need to have multiple usernames, passwords, and entering the same data for multiple agencies.
- A CRM tool promotes transparency. The business can use the self-service platform to apply for services, purchase licenses and/or permits, track their progress, and ask questions. It is a real-time connection.
- Businesses would benefit by knowing about
 - o Grants and funding
 - o Resources to help them be successful
 - o How to comply
 - o How to save time, money, and confusion
 - o How to operate more efficiently

- A CRM tool allows for automation of processes and notifications of policies and procedures, stream-lining the government experience.
- The payment portal will be built into the business gateway. Allowing businesses to pay through one system. This saves time for businesses and taxpayers by eliminating duplicate systems.

Who is served and the impact of not doing?

- A CRM tool will be used to build the business gateway serving existing and potential new ND businesses, and State of North Dakota agency employees. The impact of not implementing a CRM tool will impact the efficiency and customer satisfaction doing business with the State of North Dakota. The experience will continue to be disjointed, causing frustration, and added time and energy for businesses, creating a siloed experience, this experience has the possibility of discouraging new business growth in North Dakota.
- Right now, businesses are unaware of the opportunities they have of historic federal grants and resources beyond grants to help them succeed.
- A survey recently conducted showed a possible ROI for over 40k ND businesses of at least \$5 million. Reducing person-to-person interactions has a direct ROI to state agencies. Raising businesses awareness of opportunities (grants, services, etc.) has a potential to produce an incalculable, but substantial ROI.

Necessary resources for implementation (including FTE's)*: 1 Project Manager, 2 Business Analysts, 1 Cloud Administrator, 1 ServiceNow Administrator, 2 Organization Change Managers, 1 Customer Success Team Lead.

This project is a highly complex project, requiring strong collaboration across multiple agencies. There will need to be dedicated resources assigned to this project for it to be successful.

Are resources being redirected or are they new or additional (including FTE's)*: The resources will be new as this is new work NDIT will be taking on.

Who is served and impact of not funding*: A CRM tool will be used to build the business gateway serving existing and potential new ND businesses, and State of North Dakota agency employees. The impact of not implementing a CRM tool will impact the efficiency and customer satisfaction doing business with the State of North Dakota. The experience will continue to be disjointed, causing frustration, and added time and energy for businesses, creating a siloed experience, this experience has the possibility of discouraging new business growth in North Dakota.

Right now, businesses are unaware of the opportunities they have of historic federal grants and resources beyond grants to help them succeed.

A survey recently conducted showed a possible ROI for over 40k ND businesses of at least \$5 million. Reducing person-to-person interactions has a direct ROI to state agencies. Raising businesses awareness of opportunities (grants, services, etc.) has a potential to produce an incalculable, but substantial ROI.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? Yes

Upgrade existing application? Yes

Development of new application? Yes

Anticipated Benefits:* • State of North Dakota staff can better manage relationships and improve public customer service with the people in the communities they serve. This is done through one centralized source of truth for the engagement and communication efforts. CRM allows State of North Dakota staff to effectively manage communication history in one location to better understand needs and provide appropriate support.

- A CRM tool can interface with other agencies, giving the business a one-stop-shop, where they may get all their State of North Dakota services met in one place.
- A CRM tool creates and stores one profile to be used by all agencies. This meets expectations of the State knowing and recognizing them across agencies. This reduces the need to have multiple usernames, passwords, and entering the same data for multiple agencies.
- A CRM tool promotes transparency. The business can use the self-service platform to apply for services, purchase licenses and/or permits, track their progress, and ask questions. It is a real-time connection.
- Businesses would benefit by knowing about
 - o Grants and funding
 - o Resources to help them be successful
 - o How to comply
 - o How to save time, money, and confusion
 - o How to operate more efficiently
- A CRM tool allows for automation of processes and notifications of policies and procedures, stream-lining the government experience.
- The payment portal will be built into the business gateway. Allowing businesses to pay through one system. This saves time for businesses and taxpayers by eliminating duplicate systems.

Project Risk:* • Appropriate funding and resources to deliver a product that will deliver immediate value, creating efficiencies for constituents and agency staff.

- State agencies' time, commitment, and collaboration. This project will require collaboration across agencies to gain the most efficiencies. Lack of time, commitment, or willingness to collaborate will delay the product, create an inferior product that may be unusable, or unable to provide the desired efficiency results.
- Lack of dedicated IT resources. With no dedicated IT resources, staff will need to juggle between operations work and this project. This will likely result in schedule delays.
- Alignment across agencies of what the business and citizen gateway is, how it should look and how it should function. With no alignment, the project will likely stall and delivered project may provide little to no value for the citizens and businesses it was designed to help.

112 Information Technology

Agency 112

Issue/Solution:* The business gateway and payment portal will be accomplished by using a CRM tool. This tool aids in the management, facilitation, automation, and simplified engagement of government-to-business engagement. This one-stop-shop will allow businesses the ability to access many services through one central site, creating efficiencies for North Dakota businesses and State of North Dakota agencies.

Security Expert Building Security & Capitol Fiber Project (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	226,900	1,401,650	1,628,550	0.00	226,900	-	226,900	0.00
Special	-	1,097,817	1,097,817	0.00	-	2,499,467	2,499,467	0.00
Total	226,900	2,499,467	2,726,367	0.00	226,900	2,499,467	2,726,367	0.00

State Initiative:* State Facility Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority):* The current security system software for the State of North Dakota will be end of life within the next 3-5 years and will require upgrades to maintain support and take advantage of much of the functionality we've come to expect of modern solutions. The current system and equipment was built in the 90's and 2000's and support is beginning to become challenging.

The new system will bring many advantages to State Government, including increased security with technology such as single sign-on, more comprehensive reporting for door access, and additional visibility into the enterprise for all State Agencies onboarding to the system. The new system will also be scalable to take on more entities that may have a need for a single and secure physical access solution.

In addition to the modernization of the security systems at the Capitol building, the physical fiber network cabling requires an upgrade to facilitate the additional bandwidth requirements of the customers on the Capitol Grounds.

- The current fiber optic network was built over 20 years ago and is inconsistent with other infrastructure in the enterprise.
- The new infrastructure will support increased bandwidth over longer distances to enable our customer base to continue to embrace on-premise and cloud-based technologies that carry higher bandwidth requirements.
- The new infrastructure will also be "blown" fiber, enabling the State to add additional fiber strands as needs change for the customer base, enabling increased bandwidth over additional strands of connectivity.

Necessary resources for implementation (including FTE's):* One time project dollars will be required for initial purchases along with appropriation for ongoing maintenance and support.

112 Information Technology

Agency 112

Are resources being redirected or are they new or additional (including FTE's)*: These are one time resources for the project and new resources for ongoing maintenance of Security Expert.

Who is served and impact of not funding*: Agencies and entities on the State Capitol grounds are within scope of this funding. Exact scope for the Security Expert funding is defined by the Executive Steering Committee for the OMB-ACES project. This is primarily going to be used to serve the security needs of the Capitol Complex locations and provide the foundation for an Enterprise Service that can provide physical security and automation for State Government.

The Capitol fiber project will support all customers in the Capitol building on the State Capitol grounds. If not funded, the bandwidth will be limited to this customer base and we will be unable to support projects and the needs of this customer base in the Capitol Complex.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits:* • Easier and more effective support of the physical security systems at the Capitol Complex. The current system is end-of-life.

- The new system will be scalable, able to take on new customers to a single enterprise system, instead of multiple disparate systems.
- The new system will be more secure, support modern authentication, more effective reporting, and additional visibility to overall State door security
- Increased bandwidth, reliability, and scalability of the network infrastructure to support our customer base and the ever expanding technology needs that our customer base requires.

Project Risk:* • Security System costs are variable per building and not fixed over time.

- Timelines are short for a project of this scale and the current system is end-of-life soon.

Issue/Solution:* This is the second phase of the building automation project deploying Security Expert to allow Highway Patrol to manage the door locks, cameras and other security sensors within the Capitol Campus as well as other agency locations.

The fiber wiring is to upgrade outdated wiring within the Capitol tower to make it useful with current and future technologies.

112 Information Technology

Agency 112

K-12 ClassLink (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,905,888	-	1,905,888	2.00	1,933,150	-	1,933,150	2.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,905,888	-	1,905,888	2.00	1,933,150	-	1,933,150	2.00

State Initiative:* Transforming Education

Is this a Large IT project? Yes

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: This project will deploy the ClassLink technologies across the K-12 environment which will dramatically improve how digital learning technologies are secured and managed. The solution enables a single-sign on approach that improves the security posture of a multitude of applications deployed across the K-12 community. How the schools manage those applications will be significantly simplified particularly in the manner of which security is provisioned and managed but also how rostering is managed across a multitude of solutions. Lastly, the product provides deep analytics surrounding the usage of the technologies that will enable the K-12 environment better manager software licensing but more importantly will provide much deeper insights into student engagement and learning throughout the various products and solutions.

Necessary resources for implementation (including FTE's)*: Beyond the software licensing 2 FTE of technical analyst positions are required to adequately support and manage the environment for a statewide implementation.

Are resources being redirected or are they new or additional (including FTE's)*: This will be new work for NDIT - EduTech

Who is served and impact of not funding*: The entire K-12 community will benefit including teachers, technologist, administrators, and K-12 policy and decision makers.

If funding is not obtained:

- K-12 community will not have visibility into the entirety of digital learning tools
- Risk of a cyber incident remains high due to complex and disparate authentication capabilities and methodologies
- Risk of over-spending on software licensing remains high

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

112 Information Technology

Agency 112

Replace existing application? No

Upgrade existing application? No

Development of new application? No

Anticipated Benefits:* Personalized instructional experience to improve learning success

The implementation of a personalized instructional experience (single sign-on dashboard) will:

- Decrease teacher 'non-instructional' time wasted assisting students with finding and signing into online resources
- Enable students to learn anywhere: increase access to online resources for students, staff, and parents
- Personalized resources based on course schedule and needs, improving access to

resources for students with unique learning needs

- Improve home access for students and staff for remote learning, regardless of device or network, reducing stress on parents

Cybersecurity and identity management

The implementation of an enterprise level identity management solution will:

- Ease the task of adhering to cybersecurity best practices by eliminating need for easy-to-remember passwords, plaintext distribution of credentials or use of shared credentials
- Improve the cybersecurity of users and their data by enabling secure pathways for modern authentication functionalities (e.g., multi-factor authentication)
- Improve speed and accuracy of identity management and rostering services of students and staff to districts
- More dynamic, automatic, and accurate identification of user accounts deserving of unique privileges

Data driven decision-making

The implementation of an advanced usage statistics solution will:

- Improve data-driven decisions on efficiency and efficacy of technology and educational impact
- Empower districts to dedicate resources to applications based on usage and impact

Flexibility for districts and educational entities

112 Information Technology

The implementation of a flexible and customizable solution will:

- Enable districts to control their own single sign-on and rostering environment without requiring state intervention
- Enable NDDPI to make available shared resources to appropriate dashboards, based on statewide initiatives and activities (e.g., standardized testing links, applications for scholarship)

Project Risk:* • Number of unique SIS instances will impact available connectors that can efficiently be read by rostering system

- Length of SLDS processes to consume and clean PowerSchool data will impact timing of processes involving consolidated data
- OneSync IDM processes must seamlessly replace existing IDM system without loss of service to existing users
- LEAs technical capabilities
- LEAs time capacity to work on the project
- LEAs accuracy of source data

Issue/Solution:* This project will deploy the ClassLink technologies across the K-12 environment which will dramatically improve how digital learning technologies are secured and managed. The solution enables a single-sign on approach that improves the security posture of a multitude of applications deployed across the K-12 community. How the schools manage those applications will be significantly simplified particularly in the manner of which security is provisioned and managed but also how rostering is managed across a multitude of solutions. Lastly, the product provides deep analytics surrounding the usage of the technologies that will enable the K-12 environment better manager software licensing but more importantly will provide much deeper insights into student engagement and learning throughout the various products and solutions.

Total				-	145,000,000	-	145,000,000	-	-	145,000,000

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: North Dakota is requesting funding through the Broadband Equity, Access, and Deployment (BEAD) Program to support our pursuit of increasing equitable access to broadband service in our service area. Our proposed program, Broadband North Dakota (BND), includes the creation of a comprehensive Five-Year Action Plan that will identify North Dakota’s broadband access, affordability, equity, and adoption needs; and will serve as a benchmark for adopting strategies, goals, and initial measures for connecting all residents of North Dakota with reliable broadband service.

Statutory Authority

North Dakota Century Code Chapter 54-10.

Agency Description

The North Dakota State Auditor’s Office (NDSAO) has been operating since North Dakota was first admitted to the Union in 1889. Throughout the years, the office has evolved to better serve the people of North Dakota. The NDSAO takes pride in their commitment to bring transparency to government and is dedicated to generating greater value for taxpayers.

The office is leading the way in providing independent and objective audits in accordance with government auditing standards issued by the United States Government Accountability Office. The NDSAO works to ensure the proper use of public funds and improve the cost savings and effectiveness of the government of North Dakota. This is achieved by performing audits of state agencies, boards, commissions, and political subdivisions. These audits examine financial accountability, waste, and potential fraud. They also check if government organizations and programs are following laws and if they are operating economically and effectively.

Over 50 dedicated team members in Bismarck and Fargo audit billions of state and federal dollars every year. The audits provided result in accurate and reliable information that clarify issues, provide guidance on corrective action for problems, and bring increased accountability to government programs.

Agency Mission Statement

We produce informative audits to improve government.

Major Accomplishments

-
- 1 Planning our first virtual audit summit.

 - 2 Continued to hire and train audit interns with a total of 13 interns in the past 14 months, with more to be posted and filled before June of 2023.

 - 3 Filled 5 of the 8 allotted FTE from last legislative session. The remainder should be filled by the end of the biennium.

 - 4 Auditing ARPA and Cares funding through the Federal Single Audit.

 - 5 Retention rate of 90%.

 - 6 Expanded our Quality Assurance Division to better support small governments.

 - 7 Maximized space in the Capitol to refigure our workspace to 120 sq ft per person including common areas.

 - 8 Design and write audit reports in a way that citizens can easily understand the content our audit team finds. Meet stakeholders where they are at by leveraging platforms such as social media and press releases to better explain what our government is doing with taxpayer dollars.

 - 9 Implemented software system to streamline ability to report financial data for local governments and speed up internal processes.

 - 10 Selected to present at the National Association of Government Communicators because of our communication strategy. Agencies in attendance included the FBI, National Park Service, and other government agencies.

 - 11 Selected to present at the National State Auditors Association, to present on our recruitment strategies. Presented to a national group of auditors on recruitment and retention efforts.

Critical Issues

- 1 Ongoing recruitment of staff to fill position during this unprecedented time when accounting graduates are dropping and employment rates are around 3%.
- 2 Our team is finding it increasingly difficult to retain qualified candidates with the pay we presently offer compared to what private business can offer.
- 3 Training opportunities to stay up-to-date on incredibly complex changing professional standards.
- 4 Education and awareness to local governments about government accounting requirements.
- 5 Unknown effects of changes to independence requirements on the SAO and private firms.

Performance Measures

Business Operations:

The group provides leadership for the agency and assists in creating the strategic plan.

Division of Local Governments:

The group is a special fund that is self-funded by the audit and review fees charged to the local government clients.

Division of State Audits and University System Performance Audits:

The division completes the statewide and NDUS regular biennial audits, ACFR, and Single Audit on a timely basis while receiving a favorable Quality Control Review report from the National Association of State Auditors, Comptrollers, and Treasurers (NASACT).

Division of Mineral Royalty:

The federally funded division ensures significant amounts of revenue are properly paid.

Program Statistical Data

Business Operations:

The business operations team serves team in both the Bismarck and Fargo office locations. The diverse set of skills offered by the team assists the rest of the agency in completing the office's mission of providing informative audits to improve government.

Division of Local Governments:

Each year the division performs 70 audits, 365 reviews of audit reports completed by CPA firms, and 625 reviews of small government annual reports. The NDSA is currently in contact with nearly 1,300 clients, but the potential client base for this division is closer to 1,900. The potential 600 clients are delinquent in sending information to the office and further research and contact needs to be done.

Division of State Audits and University System Performance Audits:

The division is responsible for conducting over 70 operational audits in accordance performance auditing standards each biennium. The group also conducts the audit of the Annual Comprehensive Financial Report (ACFR) of the State of North Dakota and the Statewide Single Audit of federally funded programs.

Division of Mineral Royalty:

Audits and compliance reviews are performed to the highest standards and in accordance with an annual work plan approved by the Federal Office of Natural Resources Revenue.

Explanation of Program Costs

Business Operations:

Budget includes both salaries and operating costs to support office functionality.

Division of Local Government Audits:

The primary costs of the local government division include salaries, travel, professional development, NDIR charges, and rent.

Division of State Audits and University System Performance Audits:

The largest division of the NDSAO and the primary costs for this program include salaries, travel, professional development, NDIR, and rent.

Division of Mineral Royalty:

The majority of costs associated with this federal program are for salaries, but additional costs include travel, professional development, and rent.

Program Goals and Objectives

Business Operations:

The support services offered by the business operations group is essential to the NDSAO. This group is responsible for human resources, accounting, administrative functions, and communications.

Division of Local Governments:

The division of local governments conducts financial statement audits for many types of political subdivisions including counties, cities, school districts, fire and park districts, and others. The group is also responsible for reviewing and approving audit reports issued by private firms for their political subdivision clients. In addition, the group conducts small government reviews for clients that do not meet the audit threshold defined in NDCC.

Division of State Audits and University System Performance Audits:

This division is dedicated to producing informative findings and recommendations to improve state government operations, higher education operations, and overall accountability, while complying with the highest of industry standards.

117 Auditor

Agency 117

Division of Mineral Royalty Audit:

The group conducts audits and compliance reviews on companies who have mineral leases on federal land located within the State of North Dakota. The program ensures that appropriate royalties are paid on oil, gas, and coal extracted from federal leases.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The SAO continues to assist local government clients with required financial statement audits and hopes to continue to build on the previous 8 FTE appropriated to the special fund last biennium. Private firms conduct a significant portion of government audits for political subdivisions, but continue to reduce the amount of government clients. The SAO is hoping to fill the gap as there is already a shortage and the shortage could only compound if more clients are added, such as water resource districts. The need for more staff is very evident. With the request of additional special fund

117 Auditor

Agency 117

FTE, the State Auditor’s Office does not have office space for the additional staff. The SAO currently leases space from WSI at the Century Center and would look to expand it office space there. There are at least 10 additional office spaces available for the SAO to rent.

Necessary resources for implementation (including FTE’s)*: The SAO is requesting 14 additional FTE. Additional resources would include travel, professional development, office furniture, and chairs to setup the new office space at the WSI Century Center office building. The furniture would be purchased with general funds.

Are resources being redirected or are they new or additional (including FTE’s)*: The SAO operating fund is self funded by the political subdivisions that require the financial statement audits. The 14 staff would be supported by audit fees charged to clients. The fees charged to clients continue to be lower than the private sector.

Who is served and impact of not funding*: The need for political subdivision auditors continues to grow and if FTE are not appropriated, the political subdivisions will continue to fall behind on their mandated auditing. In the end, the citizens of the state will not be served by their state government.

General Fund FTE (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,395,924	18,000	1,413,924	6.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,395,924	18,000	1,413,924	6.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The SAO is requesting six new general fund FTE for different reasons. One FTE would be filled as a Training Coordinator for local governments and internal staff. Organizations outside of state government have requested the SAO to assist in training as GASB regulations continue to be implemented each year. The position would focus on developing and conducting training for political subdivisions, but would also assist in ensuring the SAO’s staff are up to date on the new GASB standards.

Two auditor FTE are being requested due to the increase in federal money received pertaining to the COVID pandemic. The money will continue to be spent by agencies through 2026 and the single audit will require more time to ensure the requirements of spending were met.

Two additional auditor FTE are being requested due to the Department of Human Services and Health merger. Staff already spend a good portion of a year on the two agencies, and combining them may require staff to be auditing the agencies year round.

The final general funded position being requested is for a special assistant attorney general for the office. This will require a change to current century code, but with the recent events of the SAO reviewing transactions at the AG’s office, but also having to rely on their advice can create a conflict of interest.

117 Auditor

Necessary resources for implementation (including FTE's)*: Six new positions.

Are resources being redirected or are they new or additional (including FTE's)*: New resources would be required for each position.

Who is served and impact of not funding*: All positions are important to continuing to serve the citizens of North Dakota. If a position is not funded, it will impact the way the SAO operates and could impact the amount of time auditors could spend on an agency, to creating a conflict of interest, or to not providing training to political subdivisions, which many are requesting.

Equity Package (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	98,071	-	98,071	0.00	-	-	-	0.00
General	795,409	-	795,409	0.00	-	-	-	0.00
Special	312,634	-	312,634	0.00	-	-	-	0.00
Total	1,206,114	-	1,206,114	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The SAO realizes the world is changing rapidly and our legislative increases are not keeping up with inflation and cost of living. In addition, the salary gap with private firms has made it tough to retain current staff and recruit new staff. This affects the ability of the SAO to fulfill its mission and serve the citizens of the State. Data provided by the ND LMI from 2021 supports the office and shows employees under five years of service are between 7-10% behind the North Dakota average for accountants and auditors. With the recent inflation and increase in cost of living, the SAO suspects the number to be greater than the 2021 data.

Necessary resources for implementation (including FTE's)*: Additional salary appropriations to be competitive with other employers.

Are resources being redirected or are they new or additional (including FTE's)*: New salary appropriations.

Who is served and impact of not funding*: The NDSA O takes pride in bringing transparency to government and they are dedicated to generating greater value for taxpayers. If the NDSA O is not competitive, they will lose their most important asset, the people that make the office go.

117 Auditor

Temporary Salaries (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	250,000	-	250,000	0.00	250,000	-	250,000	0.00
Special	250,000	-	250,000	0.00	250,000	-	250,000	0.00
Total	500,000	-	500,000	0.00	500,000	-	500,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The SAO has created an excellent internship program with high reward and very low risk/cost. The SAO has converted many interns to full-time staff in the past few years and wants to continue to use the internship pipeline to hire young staff.

Necessary resources for implementation (including FTE's)*: Temporary salaries spending authority.

Are resources being redirected or are they new or additional (including FTE's)*: New resources would be required as the SAO has not had temporary salary spending authority in the past.

Who is served and impact of not funding*: Interns have always been paid for out of vacant FTE savings, but with the potential of being fully staffed, especially in the general fund, the SAO does not want to end its internship program due to lack of funding. The retention rate of interns to FTE is currently 40%.

Travel and Professional Development Inflationary Increase (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	5,000	-	5,000	0.00	-	5,000	5,000	0.00
General	44,000	-	44,000	0.00	-	44,000	44,000	0.00
Special	32,000	-	32,000	0.00	-	32,000	32,000	0.00
Total	81,000	-	81,000	0.00	-	81,000	81,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

117 Auditor

Agency 117

Request explanation and justification (include any statutory authority)*: With the recent inflationary increases, travel and professional development costs have increased drastically and there is a need for additional operating money to continue auditing and training at current levels. Government auditors are required to have 80 hours of continuing education every two years. To achieve this, we attend conferences, participate in webinars, and use online subscription based professional development platforms to adhere to the requirement.

Necessary resources for implementation (including FTE's)*: Additional operating appropriations.

Are resources being redirected or are they new or additional (including FTE's)*: Additional travel and professional development expenditures.

Who is served and impact of not funding*: Government auditors require professional development. If they are not able to attend the appropriate amount of CPE, they cannot conduct audits for the agency; therefore, the citizens and State lose transparency of taxpayer dollars.

TeamMate Upgrade (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	5,442	-	5,442	0.00	5,442	-	5,442	0.00
General	54,298	45,550	99,848	0.00	54,298	45,550	99,848	0.00
Special	55,824	-	55,824	0.00	55,824	-	55,824	0.00
Total	115,564	45,550	161,114	0.00	115,564	45,550	161,114	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: TeamMate EWP, the system the SAO uses for its electronic working papers and essential to each audit, has end of life approaching and will require an upgrade to TeamMate +. End of life was originally December 2023, but has been pushed back a bit due to COVID and other items, but expectations are TeamMate EWP will have no support soon. The costs included in the budget are from a quote received in March of 2022 from TeamMate. Costs may change and an updated quote will be requested closer to the next Legislative Session.

Necessary resources for implementation (including FTE's)*: Spending authority increase for all funds as TeamMate + is more costly to run on a monthly basis, plus the initial migration that will be capitalized.

Are resources being redirected or are they new or additional (including FTE's)*: A portion of the recurring costs will be covered by the current TeamMate EWP costs paid to NDIT, but additional spending authority will be needed to maintain the essential audit software.

Who is served and impact of not funding*: All audits conducted by the SAO, including state agency audits, local government audits, and federal audits are maintained in TeamMate EWP. Upgrading is crucial to the SAO's performance going forward. Other agencies, such as BND, DOT, and Trust Lands have already migrated, but do not have the level of use the SAO does with the software.

117 Auditor

Agency 117

Dickinson Office Space (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	38,000	75,000	113,000	0.00	-	-	-	0.00
Special	114,000	-	114,000	0.00	-	-	-	0.00
Total	152,000	75,000	227,000	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: With the changing landscape of private audit firms, especially in Western North Dakota, the SAO wants to open a Dickinson, ND office. This office could be utilized by general or special fund employees, but the goal is to be closer to clients on the west side of the state.

Necessary resources for implementation (including FTE's)*: Necessary resources would include rent and furniture to setup the office.

Are resources being redirected or are they new or additional (including FTE's)*: Resources required would be new to the agency.

Who is served and impact of not funding*: Many local government clients in Western North Dakota are struggling to find an auditor to conduct their financial statement audit. Some private firms are removing themselves from the government auditing field due to differing reasons, but this is leaving local governments in a tough spot. Opening a Dickinson office would allow the SAO to be closer to clients and assist these clients face-to-face.

Rent (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Statutory Authority

ND Constitution Article V, Section 02; North Dakota Century Code Section 54-11.

Agency Description

The Office of State Treasurer serves as the custodian of all state funds. The agency is responsible for the cash management of the general fund as well as the investment services of special funds and numerous trust funds. The agency is also responsible for distributing accurate and timely tax distributions to over 500 political subdivisions across the state.

Agency Mission Statement

The mission of the Office of State Treasurer is to fulfill our constitutional and statutory responsibilities to assure sound financial oversight and transparency to all public funds, and to promote prudent practices in government.

Major Accomplishments

- 1 Completed implementation of the online reporting system to collect all required Municipal Infrastructure and County Infrastructure Fund ("Prairie Dog") expenditure information from the political subdivisions. This online reporting system also allows for the submitted information to be viewed and searched by all.
- 2 Enhanced agency website to continue providing information regarding specific distributions and other government funds. Also provided for greater transparency of state dollars.
- 3 Expanded and refined remote work policies and procedures to increase efficiencies, reduce downtime, and improve customer responsiveness.
- 4 Provided analysis, data, and explanations of various tax distributions and state laws to legislators, employees of other state agencies, officials and employees of local political subdivisions and the public.
- 5 Maintained and strengthened the line of communication with financial officers throughout state government to address the daily cash needs and expenditures of each agency. Worked directly with the Bank of North Dakota to improve long-term and short-term cash flow management to increase investment returns to the general fund.
- 6 Expanded cross-training for all staff and updated and tested newly implemented procedure manuals for each position. Thus enhancing our backup capability during unexpected absences. This is essential for the success of a small-staffed agency.
- 7 Updated the Tax Distribution Outstanding Check (TDOC) system to accommodate the legislative changes made to the Oil and Gas Gross Production Tax distribution along with several other distributions.

Critical Issues

- 1 As the labor market remains tight and more and more entities in the private market are making flexible work arrangements the norm we, as an employer, need to ensure we are offering a total compensation and benefits plan to remain competitive and retain our highly skilled team members. This includes offering merit raises commensurate with the market, retaining our excellent state employee benefits, and continuing to provide for an excellent work/life balance.

Critical Issues

- 2 As minerals remain to be a vital asset to the state, we must maintain and expand our use of technology to assist in the management of the revenue stemming from those minerals. Oil and gas taxes continue to be distributed by a very sophisticated formula and it is crucial we provide as much information as possible to our political subdivisions. Our agency must continue to stay ahead of the technology necessary to properly distribute these funds, efficiently and effectively. Furthermore, it remains critical we provide timely, informative reports to those who bear the responsibility of distributing funds beyond our office. We have worked to maintain and expand our online tax distribution system (TDOC). Moving forward, we must ensure we can continue to improve this system to best perform the duties of this office and serve the agencies and political subdivisions of the state.
-

Performance Measures

- The Office of State Treasurer provides a daily investment management service for the operating account of the State of North Dakota as well as numerous other trust funds and ag commodity groups.
- The agency is responsible for the distribution of over 1.5 million accounting, human service and payroll checks biennially.
- Daily, our agency manages over \$4 billion of state general and special funds.
- During FY 2022 the Office of State Treasurer performed direct deposit-electronic funds transfer for tax distributions of over \$1.2 billion to nearly 500 political subdivisions, which not only makes the money available to subdivisions in a timely manner, but also enhances government efficiency at both the state and local level.

Program Statistical Data

The Office of State Treasurer processes billions of dollars in receipts and income deposits for over 50 state agencies. We are responsible for the cash management of over \$4 billion in general and special funds. Our agency provides investment services for over 25 state agencies and/or trust funds in numerous individual investment accounts. The Office of State Treasurer distributes over \$1 billion annually in tax distributions to nearly 500 political subdivisions.

Explanation of Program Costs

Salary and wages are used to support seven (7) full-time employees.

Data processing costs are related to programs for tax revenue distribution to political subdivisions, on-line revenue reporting and remittance, batch printing of outstanding checks lists, bank canceled check reports, disk storage and records management fees. It also includes amounts related to the desktop support services provided by ITD for seven employees. Telephone costs support eight (8) telephone lines. Postage costs are for mailing of payroll and other checks to agencies outside of Bismarck and OST correspondence. Lease rental payments are made on the office copy machine. Dues and professional development costs include staff enhancement training via online and in-person learning along with annual national association dues for the treasurer. Operating fees cover service agreements on the printers, scanners, and copy machine. Insurance covers Risk Management Fund contributions and Fire and Tornado Fund.

NDCC 57-62-02(5) requires the Office of State Treasurer to include in its biennial budget request funds for the purpose of reimbursing coal-producing counties for 30% of Coal Severance Tax funds paid to non-coal producing counties from coal-producing counties.

Program Goals and Objectives

To fulfill the constitutional and statutory responsibilities of the Office of State Treasurer in order to assure sound financial oversight and transparency to all public funds, and to promote prudent practices in government.

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Office of State Treasurer removed funding for travel during the 2021-2023 biennium due to the reduced travel opportunities for training and national association conferences during the aftermath of the Covid-19 pandemic.

As the pandemic ended, travel opportunities have returned and we are therefore requesting the appropriation be reinstated into our budget. This will provide our team with the resources to continue their professional development in hands-on environments and will help keep the office up-to-date on any new treasury operations developments.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*: We have redirected a portion of our budget into the professional development area to help account for the increasing cost of national association dues and trainings. This specific requested reinstatement of travel appropriations is to restore the funding needed to travel to in-person conferences and trainings for the biennium.

Statutory Authority

ND Constitution Article V, Section 12, North Dakota Century Code Chapters and Sections 5-02, 12.1-32, 12.1-41, 12-60, 12-62, 12.1-34, 18-01, 18-13, 19-01, 19-03, 23-15-04, 32-12.2-03, 32-12.2-04, 43-31-14, 50-24.8, 51-04, 51-15, 51-28, 53-04.1-03, 53-06.1, 53-12.1, 54-6, 54-12, 57-36-02.

Agency Description

The Office of the Attorney General represents and defends the interest of the citizens of North Dakota by executing the responsibilities charged to the North Dakota Attorney General by the North Dakota Constitution, state statutes and administrative rules, North Dakota and federal case law, and common law. The Attorney General is the chief legal counsel and adviser to state government providing legal representation to all facets of state government, including the Governor, all departments of state government, and all state agencies, boards, and commissions. The office consists of 13 divisions: Administration, Bureau of Criminal Investigation, Civil Litigation, Consumer Protection and Antitrust, Crime Laboratory, Special Prosecution, Finance, Fire Marshal, Gaming, Information Technology and Criminal Justice Information Sharing, Lottery, Medicaid Fraud Control, and General Counsel.

Agency Mission Statement

The Attorney General’s office consists of dedicated professionals providing vital services necessary to ensure quality government in North Dakota. The office efficiently and impartially provides quality law enforcement, regulatory, investigatory, legal and informational services for the benefit of North Dakota’s citizens.

Major Accomplishments

-
- 1 Conducted 1,554 criminal and drug investigations

 - 2 Obtained \$1.95 million in consumer refunds

 - 3 Recovered \$15.1 million for state agencies through civil litigation including \$6.95 million in oil and gas penalties for the Department of Mineral Resources, \$5.7 million in delinquent property and student loans for the Bank of North Dakota, \$1.29 million in unpaid employer tax and benefit contributions for Job Service North Dakota, \$1.07 million in penalties for the Department of Environmental Quality and \$87,119 in unpaid employee wages from employers for the Department of Labor.

 - 4 Processed 10,716 crime laboratory cases

 - 5 Recovered \$882,815 in fraudulent Medicaid billings

 - 6 Investigated 221 fires to determine the cause

 - 7 Completed 108,219 criminal history record checks

 - 8 Published 41 Attorney General Opinions

 - 9 Provided general counsel to 70 state agencies, boards, and commissions.

Critical Issues

-
- 1 Attorney staffing levels and pay schedule - The current attorney pay schedule for the Attorney General's office is significantly less than the attorney pay schedules for some other state agencies and even some political subdivisions, not to mention private law firms and businesses. For example, some counties pay entry-level attorneys \$5000-\$15,000 more annually than this office can pay them under its current budget. Additionally, unlike in other state agencies, there is no tiering system for attorneys to work toward promotions in the Attorney General's office. These factors significantly impair recruitment and retention of legal talent to this office, which is responsible for providing legal services to the state. Increased workloads in civil litigation, general counsel and Medicaid fraud highlight the need for additional qualified attorneys.

 - 2 The Attorney General's office reviewed classified staff members' salaries based on the state's pay schedules established by the Office of Management and Budget. Some staff members, especially some administrative staff, are paid significantly below the midpoints of their relative classes' pay schedules. These staff members' supervisors were consulted on the reasons for their pay inequities and for input on the appropriate salaries based on the staff members' work and years of service.

 - 3 Cyber Crime and criminal investigator work demands - Demands on cyber crime and criminal investigators are increasing due to the complexity of cyber crime, criminal and narcotics investigations and the level of criminal organization in the state. The digital world has greatly increased the speed and complexity of the criminal organizations and allowed crimes to be committed (fraud, theft, intimidation, child luring, etc.) in seconds and across the state, country, and world. Criminal and narcotics cases have continued to become more complex with the need for increased training on criminal and cyber response.

 - 4 Crime Lab - A feasibility study was completed during the 2019-21 biennium by the Office of Management and Budget which indicated additional space needs for the Crime Lab building. The Lab needs to assess its current and future needs by examining the services provided to law enforcement, existing space utilization, and infrastructure. The recommended standard ratio for laboratory space is 1000 ft per staff member. The current ratio is roughly 700 ft. The Lab currently has 25 staff members and more staff is needed. Additional working space is not available in the current building; the space needs to be properly ventilated and secure for evidence processing and storage.

 - 5 Crime lab forensic scientist work demands - The North Dakota State Crime Lab (NDCL) was affected by budgetary cuts after the 2017 legislative session which led to the reduction in force (RIF) of several ND State Crime Lab positions. Two of these positions were the forensic scientists trained in firearms (1 FTE) and friction ridge (fingerprints – 1 FTE). These positions were not returned to the NDCL during the 2019 or 2021 legislative sessions. With the RIF of these positions, the forensic science and accredited discipline of firearms testing and fingerprint processing were directly affected and lost. With the voluntary departure of the second fingerprint technician in 2020, the fingerprint science was also completely lost. The lack of these required sciences has forced political subdivisions to send firearms and fingerprint cases to out of state private labs. The cost has become quite large for these independent tests. Continued increases in criminal activity resulting in evidence for testing has caused a backlog in cases and increased turn around times.

 - 6 IT infrastructure and program needs - The office's BCI and Crime Lab divisions rely heavily on the expertise and skills of the office's IT Division to develop new programs, and maintain and support current and existing projects. It is essential that the IT Division receive the funding, staff, and other resources needed to ensure that critical existing programs function efficiently, that project funding deadlines can be met, and delays in development are kept at a minimum. Some of these systems BCI uses daily are outdated and/or ineffective and need immediate attention in order to ensure continued work productivity. Unfortunately, funding and staff to support and upgrade these systems is not readily available, and as a result, delays in upgrades and support are frequent due to the competing demands for limited IT resources.

 - 7 Reduced federal funding - The general fund cost share for the Medicaid Fraud Control Unit increased from 10 percent to 25 percent in October 2022. The amount available from the High Intensity Drug Trafficking Areas grant is anticipated to be lower during the 2023-25 biennium resulting in a general fund cost share of 20 percent for two attorneys funded through this grant.
-

Critical Issues

- 8 During the 2021 regular legislative session and the November 2021 special session, the legislature authorized equity increases for BCI agents and Crime Lab scientists. The equity increases were funded through the Attorney General refund fund. The refund fund is not able to sustain these increase because most settlements received during the 2021-23 biennium have been restricted for opioid treatment or reimbursements to consumers. The 2021 legislative assembly restored funding for operating expenses for BCI and IT/CJIS but changed the funding source from general fund to the AG refund fund. The refund fund cannot sustain the operating expenses because most settlements received during the 2021-23 biennium and estimated for the 2023-25 biennium are restricted for opioid treatment or reimbursements to consumers.
-

Performance Measures

Performance measures and results reporting are not currently utilized by this office. Services provided by each division are listed below.

Finance:

- Payment of office bills and payroll
- Office budget preparation, implementation, and management
- Office receptionist services, filing, and information processing
- Records and forms management
- Billing for legal, Indian Gaming and Fire Marshal services
- Purchasing and printing services for all office divisions
- Manage federal and other grants and subrecipients

AG Admin:

- Administrative assistance to other office divisions
- Support to the Attorney General and coordination of special projects
- General information and assistance to the general public
- Office representation on various boards and commissions
- Human resource administration services and public information services to other office divisions

MFCU - Medicaid Fraud Control Unit must substantially comply with the requirements contained in the performance standards of HHS-OIG and CMS in order to qualify for continuing federal grants. The performance standards require compliance with section 1903(q) of the Social Security Act, 42 CFR part 1007, 45 CFR part 92, 2 CFR part 225, and OIG policy.

BCI:

- Assisting local law enforcement agencies in investigating cyber-crime, homicides, organized crime, sexual assault, child abuse, human trafficking, arson, terrorism, polygraph, photography and photo-mapping services, digital enhancement services, and crime scene investigations
- Providing specialized crime response teams
- Coordinating intelligence services provided by the SLIC; providing analytical and intelligence services to municipal, county, state, tribal, and federal law enforcement entities; and serving as the intelligence node for the Mid-States Organized Crime Information Center
- Facilitating use of undercover personnel and confidential funds
- Providing special surveillance equipment, intelligence information, and training to local law enforcement agencies
- Dedicating staff to narcotics trafficking investigations through participation in federal task forces (consisting of federal task force officer designation) and 10 narcotics task forces of which BCI supervises 9
- Serving as coordinator for Internet Crimes Against Children (ICAC) in North Dakota; conducting forensic examinations of computers involved in criminal activity for state, local, tribal and federal law enforcement agencies
- Serving as law enforcement coordinator for the OAG Human Trafficking Task Force; conducting multi-jurisdictional investigations and collaborating with victim services for the wellbeing of all human trafficking victims
- Utilizing a case management system to document investigations and provide distribution to appropriate persons
- Utilizing a statewide criminal intelligence system to track tips and leads provided by law enforcement, public and other government entities
- Maintaining a statewide criminal history record information system, and providing this information to the federal criminal history database
- Maintaining and utilizing the National Crime Information Center (NCIC), Central Warrant Information System (CWIS), a Protection and Restraining Order system, and a Criminal History Automated Disposition (CHAD) system
- Maintaining and utilizing an ABIS for identification and criminal investigation purposes
- Providing criminal history record checks to criminal justice agencies and courts, numerous non-criminal justice requesters as permitted by NDCC 12-60-24, and to the general public
- Issuing and tracking concealed weapons licenses

- Coordinating the statewide 24/7 sobriety program
- Collecting and managing uniform crime report (UCR) data in order to provide statistical reports to criminal justice agencies, government agencies, and interested persons
- Providing law enforcement and corrections officers' training
- Providing staff for POST Board responsibilities including maintaining officer training records and issuance of peace officer licenses
- Maintaining a statewide sex offender and offenders against children registration system and a registered offenders' website for lifetime registrants and high-risk offenders
- Offering training to the general public, schools, businesses, and other agencies on a variety of law enforcement issues including drug awareness issues, internet safety and other criminal activity

CPAT:

- Investigating consumer complaints and violations of antitrust, consumer fraud, non profit corporation, transient merchant, data security breach, and do-not-call laws, etc., and taking legal action to obtain injunctive relief, civil penalties, restitution, and other equitable relief
- Investigation, participation, and prosecution referral of criminal violations
- Statewide consumer fraud and education presentations to the elderly, students, civic, and professional groups, etc., and providing consumer warnings
- Coordinating consumer

Program Statistical Data

Finance - This program provides administrative assistance to all of the Office of Attorney General's 13 divisions. This division supports 255 authorized FTEs, two of which are included in a continuing appropriation. In addition to managing state grant funds for criminal justice projects related to human trafficking, narcotics enforcement, and oil impact activities, this division administers up to \$13 million annually in federal grant funds.

AG Admin - This Division has four staff members including the Attorney General. It provides support services to the entire office including review of legal matters, administrative supervision, personnel administration, coordination with public and private sector entities on law enforcement enhancement projects (i.e., the Prescription Drug Take Back program), and provision of information to members of the public, including responses to media inquiries. The Division provides human resource services, including maintenance of office personnel files, preparation of reclassification requests, administration of evaluations, and support for supervisors in disciplinary, human resource administration, and hiring processes. The Division composes, or edits for final publication, the office's various publications, including: the office's Biennial Report, and reports relating to Fire Statistics, Crime & Homicide, and manuals providing guidance on Open Records & Open Meetings, and Concealed Weapons laws, and Lottery Links. The Division also composes or edits content on the office's website, <https://attorneygeneral.nd.gov>. The division responds to thousands of emails, calls and letters from the general public. In addition, Division members are responsible for composing and editing letters to constituents; position papers and correspondence to federal agencies and the Congressional Delegation on matters of interest to the legal and law enforcement communities; letters and other documents prepared in conjunction with the United States Attorney General; and materials for various public seminars and presentations.

BCI:

- 53 sworn agents opened 699 new cases in 2021. As of 5/18/22, 272 new cases were opened.
- In 2021, the NDBCI Cyber Crime Unit (CCU) generated 429 forensic cases with 1,032 items resulting in 899 digital forensic examinations of across a total of 214,554 gigabytes of data.
- The multi-jurisdictional narcotics task forces initiated 1,232 new cases in 2021. As of May 2022 there are 407 cases.
- Methamphetamine related cases investigated by criminal investigators increased from 51% (174) of drug cases in 2020, to 58% (188) of drug cases in 2021. As of May 18th, 2022, there were 42 methamphetamine cases being investigated.
- Heroin and Opioid related cases investigated by criminal investigators resulted in a total of 107 cases in 2017, 64 cases in 2018, 76 cases in 2019, 142 cases in 2020 and 116 cases in 2021. As of May 2022, there were 31 heroin/opioid cases being investigated.
- In 2021, 68,366 criminal record checks were completed, an increase of 30 percent compared to 2020. As of May 2022, criminal history record information is maintained on approximately 216,447 persons.
- The Central Warrant Information System (CWIS) contains a total of 38,704 arrest warrants and 2,128 protection and disorderly conduct restraining orders.
- The ABIS, which North Dakota shares with Minnesota, contains fingerprint images on approximately 4.3 million incident records and continues to grow daily.
- In 2021, a total of 8,187 concealed weapons licenses were issued. This number does not include the denied applications that were processed. A total of 33,106 active licenses are currently held. There are 92 civilian and 50 law enforcement test administrators in North Dakota. In 2021, there was a total of 842 concealed weapons testing courses that occurred in North Dakota.
- As of May 2022, there were 1,601 registered sex offenders in North Dakota; 110 are offenders against children, 251 offenders registered as high, 658 registered as moderate, and 575 registered as low.
- Training and license records are maintained for approximately 2,190 peace officers from 127 law enforcement agencies in North Dakota. In addition, the POST Board maintains certification records for the over 750 instructors who teach the certified law enforcement training courses.
- Since 2007, the 24/7 program continues to be a successful deterrent for continued alcohol and drug abuse. As of January 2022, there were 1,430 participants currently being monitored in the 24/7 Sobriety Program.
- There are currently eleven statewide information systems being operated by the BCI. These systems include:
 - Uniform Crime Reporting (UCR) - Incident Based and Summary Reporting - a statistical system that tracks crime in North Dakota
 - Case Management System - an automated system to aid criminal investigators in generating and maintaining investigative case reports and criminal intelligence
 - Offender Registration

Explanation of Program Costs

The Finance Division includes 14 employees in four sections: finance, payroll, and budget; grants management, word and data processing; and records management and administrative operations. The division staff provide technical, budget, finance, payroll, records management, purchasing, reception, and other administrative services.

AG Admin - The salary and wages line item contains funding for four positions, including the Attorney General, and associated operating expenses.

MFCU - This program contains salaries and wages for 6 FTEs, including the Unit Director, two investigators that are also BCI agents, two auditors and one administrative support staff. The office maintains vehicles for 2 sworn personnel who are on call 24 hours a day. The office maintains all office and investigative files. The office also contains an evidence room that must meet specifications

The Consumer Protection and Antitrust Division staff consists of the Division director, 3 consumer investigators, 2 assistant attorneys general, 1 paralegal and 2 administrative assistants. This budget includes funding for the ongoing operation of the Division. The Division costs include salaries, travel, building rent, consumer education materials, office supplies, etc.

The Lottery's 2021-2023 biennium budget includes salaries and fringe benefits for FTEs, temporary draw operators and Lottery Advisory Commission members, and operating expenses. The Lottery has continuing appropriations for variable expenses of prizes, retailer commissions, on-line gaming system vendor fees, and Multi-State Lottery Association related game group dues which have a direct incremental relationship to sales and are unable to be predetermined. The budget request funds 8 FTE positions in the Lottery Division, 1 FTE position in the Information Technology Division, and 1 FTE position in the Finance and Administration Division. Also, the request funds 2 part-time draw operators and 5 members who serve on the Lottery Advisory Commission.

The state Fire Marshal's Division currently operates with 1 State Fire Marshal, 1 Chief Deputy Fire Marshal, 5 Deputy Fire Marshals and 1 Administrative Assistant for a total of 8 employees. The State Fire Marshal's Division operates out of 5 offices in the state (Minot, Grafton, Fargo, Dickinson and Bismarck). The State Fire Marshal's Division is an assisting agency to local fire departments for fire investigations to approximately 369 fire departments and four reservations throughout the state with fire inspections, investigations, prevention and training services.

Crime Lab - The salary and wages expenses are for 21 forensic scientists, 1 evidence technician, 1 administrative assistant, and a director who log evidence and/or analyze and examine physical and toxicological evidence submitted by law enforcement and coroners. The staff members are responsible for the following: analyzing evidence, preparation of laboratory reports, certified documents, data collection, law enforcement training.

The BCI budget contains salaries and wages for 92 FTEs, including 53 sworn personnel, and 39 support personnel consisting of criminal intelligence analysts (6), administrative services (4), uniform crime reporting and statistics (1), offender registration (3), information processing (4), concealed weapons (4), criminal history (13), CJIS Systems Officers (3), and Peace Officer Standards and Training and 24/7 Sobriety Program (1). The salary for the director is also included. The office maintains vehicles for the 53 sworn personnel who are on call 24 hours a day, and several multi-purpose use vehicles for surveillance and crime scene response.

Funding for the Civil Litigation Division is based upon billings to general and special fund agencies for legal services provided. The salaries and wages line item provides for 14 assistant attorneys general, 5 administrative assistants, and 5 paralegals. Funding also includes tobacco diligent enforcement arbitration costs, a cloud-based discovery program, telephone services, off-site space rent, licensure fees, and necessary training and travel for staff.

The Information Technology/CJIs Division includes 19 FTE positions and related operating expenses including compute equipment and network needs for all divisions of the NDOAG.

Program Goals and Objectives

The Finance Division provides internal administrative services and assistance to the divisions of the Office of Attorney General in a timely and cost effective manner. These support services include finance and budget, administrative operations, information processing, and employee payroll matters. This Division also administers several grants, which support a variety of office and local criminal justice projects across the state, including programs that address victims' services, demand reduction, and narcotics enforcement.

The Administrative Division provides legal, administrative, and human resource support services to the other office divisions, and informational services to citizens and other state agencies.

The Medicaid Fraud Control Unit's goals and objectives are as follows:

- To investigate and prosecute health care providers who defraud the ND Medicaid Program.
- To investigate and prosecute any provider who abuses, neglects or financially exploits a patient in any facility that accepts Medicaid funds.
- To support employees in such a manner as to create an excellent work product and passion and satisfaction for the employees.
- To meet and exceed all performance standards.
- To continue outreach activities throughout the State.
- To continue the work of beginning a brand-new Unit.
- To continue training staff with national level courses.
- To update the website to include FAQ and provide more public information.
- To evaluate and obtain/create a case management system.
- To hire the final Unit employee (auditor).

The Bureau of Criminal Investigation's goals and objectives are as follows:

- Assist local law enforcement agencies with general and specialized investigations including cyber-crime, homicide, sexual assault, human trafficking, organized crime, child abuse, arson, and terrorism
- Provide drug trafficking reduction support through participation in 10 narcotics task forces, including supervision of 9 of the task forces
- Maintain a statewide sex offender and offenders against children registration system and a registered offenders' website for lifetime registrants and high-risk offenders
- Maintain the statewide criminal history record information system and provide this information to the federal criminal history database

125 Attorney General

Agency 125

- Maintain the ABIS for identification and criminal investigation purposes
- Provide training for law enforcement and corrections officers, maintain officer training records, and issue peace officer licenses
- Provide training to children and the general public about the dangers of drugs and criminal activity
- Facilitate the 24/7 sobriety program
- As the Criminal Justice Information Services (CJIS) Systems Agency (CSA), BCI is responsible for planning and providing the necessary hardware, software, funding, quality assurance and training for complete access to all FBI CJIS data services for all authorized agencies within the state.
- The Concealed Weapons Licensing (CWL) Division is the only agency in the state of North Dakota that processes applications for a North Dakota Concealed Weapons License. NDBCI offers two concealed weapons licenses (Class 1 or Class 2).

The Consumer Protection and Antitrust Division objectives are as follows:

- Protect North Dakota consumers from misleading, deceptive, fraudulent, and unfair trade practices in connection with the sale or advertisement of goods or services by enforcing the state's antitrust, consumer fraud (including, among others, false advertising, unfair trade practices, home solicitation sales, pyramid, contest prize notices), do-not-call, consumer credit counseling services, transient merchant, charitable solicitations, nonprofit corporation, data security, and nonprofit corporation laws
- Initiate investigations and pursue legal actions for violations of laws enforced by the Division
- Educate consumers and law enforcement personnel on consumer fraud prevention and enforcement
- Coordinate investigations and legal actions with local, state, and federal law enforcement
- Mediate consumer complaints between consumers and businesses

The mission of the North Dakota Lottery is to maximize net proceeds for the benefit of the state by promoting entertaining games; providing quality customer service to retailers and players; achieving the highest standards of integrity, security, and accountability; and maintaining public trust.

Fire Marshal:

1. Develop and maintain current fire laws, rules, and codes to ensure a consistent and safe built environment throughout the State.
 - a. Adopt a current fire code in coordination with the State Building Code and local fire department code adoptions. A new fire code was officially adopted into Administrative Rules on July 1, 2020.
 - b. Coordinate with local fire departments to continue the Delegation of Authority program where local fire departments may opt to accept responsibility for State Fire Marshal duties within their local jurisdiction

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The current attorney pay schedule for the Attorney General’s office is significantly less than the attorney pay schedules for some other state agencies and even some political subdivisions, not to mention private law firms and businesses. For example, some counties pay entry-level attorneys \$5000-\$15,000 more annually than this office can pay them under its current budget. Additionally, unlike in other state agencies, there is no tiering system for attorneys to work toward promotions in the Attorney General’s office. These factors significantly impair recruitment and retention of legal talent to this office, which is responsible for providing legal services to the state. To improve recruitment and retention, the office plans to adopt a slight increase to the attorney pay schedule and implement a tiering system to promote attorneys based on merit and achievement of specified goals.

Necessary resources for implementation (including FTE’s)*: Funding

125 Attorney General

Agency 125

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is needed

Who is served and impact of not funding*: state agencies, boards and commissions. If funding is not awarded, the office will not be able to recruit and retain highly qualified legal talent.

Staff Equity (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	12,236	-	12,236	0.00	-	-	-	0.00
Total	307,613	-	307,613	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Attorney General's office reviewed classified staff members' salaries based on the state's pay schedules established by the Office of Management and Budget. Some staff members, especially some administrative staff, are paid significantly below the midpoints of their relative classes' pay schedules. These staff members' supervisors were consulted on the reasons for their pay inequities and for input on the appropriate salaries based on the staff members' work and years of service. The office plans to use this equity funding to increase salaries for the staff members whose salaries diverge the most from the appropriate salaries for them.

Necessary resources for implementation (including FTE's)*: Funding

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding

Who is served and impact of not funding*: Divisions within the Office of Attorney General, general public. If funding is not awarded, it would significantly impact the Office's ability to recruit and retain qualified staff.

New Attorney FTE (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Civil Litigation, Natural Resources, and Indian Affairs Division in the Office of Attorney General, provides general counsel services to a number of state agencies and boards and commissions, and also represents the State and state officials in civil litigation, both routine and non-routine, which is frequently complex. While routine cases may follow a similar pattern and timeframe, non-routine cases may last anywhere from a few months to twenty years - our Tobacco settlement is intended to last into perpetuity. This is the norm for the Division.

The Division has experienced quite a few staffing changes during the previous few years including retirements, attorneys leaving for different positions in state government, and attorneys moving into private practice. As a result, most of the non-routine and complex litigation was transferred and continues to be concentrated with the remaining experienced attorneys; occasionally cases are assigned to attorneys with a designated portfolio depending upon availability. Concentration of these complex cases with a few attorneys creates high stress and leads to attorney burnout and potentially more turnover.

Low pay and benefits for a potentially stressful position, in a competitive work environment, is a significant factor in turnover. Other state agencies and the court system frequently advertise positions that pay significantly higher salaries for less experience. In addition, private sector benefits and flexibility frequently match state benefits. Changes to the state defined benefit program, such as the change from Rule of 85 to Rule of 90 for employees hired after 2016, statutory increases to employee retirement contribution, and only two legislative pay increases after 2016 may impact ability to hire.

The Office of General Counsel - North Dakota's State Agencies, Boards, and Commissions are operating in an increasingly complicated world. They seek guidance from their legal counsel on a variety of issues. Currently, most attorneys have to divide their time between numerous clients. More attorneys would allow the Office of General Counsel to provide comprehensive 360° legal services to their clients. Clients need attorneys who have time to provide guidance at the ground level because they are facing increasingly complicated environments. They have multi-million dollar contracts, grants, and procurements that need more than just brief services. By adding attorneys, this office will have the bandwidth to deal with complicated legal issues and the demand of our clients.

Necessary resources for implementation (including FTE's)*: FTE and operating expenses

Are resources being redirected or are they new or additional (including FTE's)*: new

Who is served and impact of not funding*: State agencies. If not funded, other state agencies may see delayed responses to their legal needs.

125 Attorney General

Agency 125

BCI Cyber Crime agents and criminal investigators (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,959,969	650,998	2,610,967	7.00	559,991	185,999	745,990	2.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: BCI's Cyber Crime Unit receives and reviews leads of suspected child exploitation from the National Center for Missing and Exploited Children. In 2021, the CCU forensic agents conducted over 899 forensic examinations totaling over 217,554 gigabytes of data and assisted or investigated 429 cases. To manage the growing number of tips and digital forensics, NDBCI needs four cyber crime agents. The salary request is \$74,000 plus benefits for each agent.

The criminal investigators will assist BIA and tribal law enforcement with narcotics investigations on and off of reservations. The goal will be to start BCI coordinated narcotics task forces in these three areas with local and tribal officers assigned and jurisdiction on and off of tribal lands. BCI agents require equipment assigned to each agent to conduct the investigations they are call upon to assist with.

Necessary resources for implementation (including FTE's)*: New FTE, equipment and vehicles

Are resources being redirected or are they new or additional (including FTE's)*: new

Who is served and impact of not funding*: Citizens, law enforcement agencies and political subdivisions in ND. If funding is not provided, there is further risk of crimes against children and other citizens of North Dakota going undetected.

Crime Lab FTE, Operating, Equipment (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	754,677	754,677	0.00	-	754,677	754,677	0.00
General	2,108,216	5,512,275	7,620,491	8.00	1,076,983	1,072,338	2,149,321	4.00

125 Attorney General

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota State Crime Lab (NDCL) was affected by budgetary cuts after the 2017 legislative session which led to the reduction in force (RIF) of several ND State Crime Lab positions. Two of these positions were the forensic scientists trained in firearms (1 FTE) and friction ridge (fingerprints – 1 FTE). These positions were not returned to the NDCL during the 2019 or 2021 legislative sessions. With the RIF of these positions, the forensic science and accredited discipline of firearms testing and fingerprint processing were directly affected and lost. With the voluntary departure of the second fingerprint technician in 2020, the fingerprint science was also completely lost.

The NDCL was able to contract with the State of SD Crime Lab for approximately a year for firearms cases. The SD Division of Criminal Investigation (SD DCI) ended that contract due to individual state work load at the SD Crime Lab.

The lack of these required sciences has forced political subdivisions to send firearms and fingerprint cases to out of state private labs. The cost has become quite large for these independent tests.

The (4) requested FTE's (forensic scientists) will allow the NDCL to hire, train, and fill the requirement of scientists tasked with re-establishing and regaining accreditation in firearms and friction ridge/fingerprint disciplines. The FTE's will be sent to extensive and unique training sessions to gain the basis and basic understanding of the firearm and fingerprint sciences. These FTE's will allow the NDCL to regain accreditation in both sciences to serve the political subdivisions (Chiefs, Sheriff's and States Attorney's) across the State of North Dakota

Three additional forensic scientists are needed to decrease case backlogs and turnaround time.

One administrative assistant is needed to assist all crime lab staff.

Necessary resources for implementation (including FTE's)*: FTE, equipment, operating, lab expansion

Are resources being redirected or are they new or additional (including FTE's)*: new

Who is served and impact of not funding*: BCI and ND law enforcement agencies across the state. If not funded, BCI and law enforcement agencies will need to go out of state for firearms and friction ridge testing. In addition, the lab will see larger backlogs in evidence testing.

Medicaid Fraud Unit FTE, Operating and Equipment (Priority: 06)

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Currently MFCU only has 1 attorney that is also the Unit’s director. That person now handles all civil, criminal and global cases and all administrative duties. Even though the Unit has only 6 employees the administrative workload is significant for the director. The director’s responsibilities not only include establishing a new Unit and learning all of details associated with that, but the director is required to initiate detailed working policies and procedures that support the 12 mandatory performance standards as set forth by HHS. Compliance with those performance standards is mandatory in order to gain yearly recertification and qualify for the yearly federal grant that currently pays 90% of the MFCU budget. The director also supervises and trains all staff and opens and closes all cases after careful reviews. The director being the only attorney naturally requires that all investigative plans and legal work (search warrants, administrative subpoenas, trial prep, trial, etc.) are also the duty of the director. If the director is preparing for trial, in trial, drafting court documents, writing settlement letters etc., then all director work stops. Conversely, if the director is at a mandatory training, supplying recertification statistics and documents, meeting with the Attorney General, training a new staff member, etc., then all attorney work stops. This large workload and start-stop work process means that cases cannot get reviewed, charged, or settled when appropriate. At times the director/attorney has had almost 40 cases open at one time and now has approximately 15 very large active cases open. When the MFCU was established, the Office of Attorney General recommended 7 MFCU staff which included the additional attorney being requested.

Another Special Agent is also imperative. Currently MFCU is staffed by 2 special agents. The cases being investigated by MFCU are extremely document, claims and medical record intensive. Each case has several thousand documents to review. Most fraud cases take more than 1 year to investigate fully and develop. Medicaid fraud cases and drug diversion cases (investigating providers) are a new type of case for which the agents have a large ‘learning curve’. MFCU currently has two drug diversion/fraud cases that are taking up most of the agents’ time. Additionally, there are more cases being referred. During MFCU’s first year we had to make an informal directive that only felony matters would be charged and fraud cases only if the amounts involved fraudulent billings greater than \$10,000.00. The agents currently carry a larger case load than other traditional BCI agents. When one of our agents is in court, actively investigating a case, at mandatory training, on annual leave, or ill the other agent must maintain his/her own case load and address all new cases and situations that occur.

A paralegal is needed to provide legal assistance to the attorneys and investigators.

Necessary resources for implementation (including FTE’s)*: FTE, equipment, operating expenses and a vehicle

Are resources being redirected or are they new or additional (including FTE’s)*: new

Who is served and impact of not funding*: North Dakota, federal government.

without these resources, Medicaid fraud would go undetected.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: During the 2021 legislative session and the November 2021 special session, the legislature authorized equity increases for BCI agents and Crime Lab scientists. The equity increases were funded through the Attorney General refund fund. The refund fund is not able to sustain these increase because most settlements received during the 2021-23 biennium and estimated settlements for the 2023-25 biennium are restricted for opioid treatment or reimbursements to consumers.

The 2021 legislative assembly restored funding for operating expenses for BCI and IT/CJIS but changed the funding source from general fund to the AG refund fund. The refund fund cannot sustain the operating expenses because most settlements received during the 2021-23 biennium and estimated for the 2023-25 biennium are restricted for opioid treatment or reimbursements to consumers.

Necessary resources for implementation (including FTE's)*: general fund appropriation

Are resources being redirected or are they new or additional (including FTE's)*: additional general fund

Who is served and impact of not funding*: BCI, Crime Lab and IT/CJIS staff and operating. The AG refund fund will not be able to sustain the equity increases provided by past legislative assemblies

125 Attorney General

Agency 125

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As OAG divisions grow, so do the IT needs of the agency. Every year requests for IT projects increase. With every system that is developed, additional maintenance is also needed. In order to sustain the current IT needs of the agency the IT/CJIS division needs to increase staffing levels in IT/CJIS to support and maintain over seventy current systems and with several more in development. By adding two Programmer Analyst III FTE's, we will be able to complete projects more efficiently and maintain the current systems at a more manageable level.

A full-time business analyst is needed within the IT/CJIS division. OAG has several divisions with IT projects and needs. IT/CJIS falls short in the analysis portion of the technical projects, due to staff playing dual roles and limited resources. This causes delay in projects and bottlenecks work. Having this role is vital to provide accurate and efficient IT programs. Doing proper analysis upfront, allows for more details requirements and eliminates the risk of rework due to missed requirements. This role will also assist with project management on small/mid-level projects, eliminating the need to contract additional roles, which reduces project costs.

Necessary resources for implementation (including FTE's)*: FTE, operating and equipment

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: All divisions within the Office of Attorney General. If the funding is not awarded, the IT/CJIS division will not be able to complete projects more efficiently and maintain the current systems at a more manageable level.

Request explanation and justification (include any statutory authority)*: The general fund match for the Medicaid Fraud Control Unit has increased from 10 percent to 25 percent.

Federal funds available under the High Intensity Drug Trafficking Areas grant has decreased requiring additional general funds for two attorneys salaries in the Special Prosecution Unit.

Necessary resources for implementation (including FTE's)*: additional general funds

Are resources being redirected or are they new or additional (including FTE's)*: additional general fund

Who is served and impact of not funding*: State of North Dakota. We need the general fund authority to match federal funds. if not funded, MFCU and SPU will be forced to reduce staff and operating.

Software Maintenance, Subscription Increases (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	489,297	-	489,297	0.00	419,297	-	419,297	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	489,297	-	489,297	0.00	419,297	-	419,297	0.00

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The OAG utilize several software systems across each division as well as part of our server infrastructure. Each software requires support or maintenance agreement. The cost for these systems typically increases each year. To continue to use several application or software tools needed to perform daily tasks, an additional \$16,000 in maintenance costs and an additional \$20,000 in subscription costs is needed. These costs include programs like Adobe Acrobat Pro, Nessus (vulnerability scanner), Windows Server Enterprise, SQL Server Standard, VMWare, Atlassian JIRA, and Visual Studio.

The Technology fee structure with NDIT will be changing. The technology fee is tied to the number of Office 365 Premium Users. IT/CJIS pays the fee for OAG staff and task force employees. The fee has decreased but the number of users will increase slightly. This will result in a savings of \$41,000. However, Office 365 Fee increased at NDIT. The cost increased from 36.00/user to 43.25/user. An increase of \$51,852. The total increase needed for the technology fees is \$12,000.

IT/CJIS provide supports and maintains the legal case management system, currently JustWare, for the OAG and several county state’s attorneys. The maintenance and support for JustWare increases 5% each year, per the current contract. IT/CJIS anticipates this increase to be \$34,000 from the current budget for the next biennium. This cost would be split among the IT/CJIS budgets, which have separate budgets among the two sections.

Atlassian Software subscription recently increased. This is the product AGIT uses for all help desk support tickets and software development tickets, as well as project and document tracking. This product is an essential tool for an IT department to do daily work. The increase of license for this system is \$11,000 a year, \$22,000 a biennium.

CJIS provides a statewide law enforcement records management and jail management system. The program is the Premiere One (P1) system. P1 maintenance and support increases approximately 5% each year, per the contract. The estimated increase is approximately \$23,282 for the biennium.

The maintenance and support for ND Statewide Automated Victim Information and Notification system that CJIS supports will increase 5% each year, per the contract. The anticipated increase will be \$38,314.84 for the biennium.

Our conferencing equipment requires maintenance and support. We currently have ten Polycom systems throughout the OAG that were purchased during 21/23 biennium. The maintenance on those ten systems is \$12,000.00.

125 Attorney General

Agency 125

The Crime lab FA LIMS is increasing the cost of their yearly subscription, per the contract. The first year the cost increase by \$4,500 and the second year it will be \$7,200. The total increase for the biennium is \$11,700.

CJIS provides Active Directory (AD) accounts for users who need access to the CJIS systems and would otherwise not need an AD account. NDIT will increase the monthly costs for the AD accounts from 1.35 to approximately 7.10 each. We currently have 1620 accounts for users that have access to CJIS programs only, this number can fluctuate. CJIS will need an increase of approximately \$300,000 to be able to continue to allow agencies to use our systems with no cost impact to the agency.

Necessary resources for implementation (including FTE's)*: Additional funding

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding

Who is served and impact of not funding*: Divisions within the Office of Attorney General, state agencies, citizens, law enforcement agencies and political subdivisions

If funding is not awarded, it would significantly impact the Office's ability to support and maintain systems used by many outside of our agency.

MAFIN, GrayKey and Cellebrite (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	42,000	-	42,000	0.00	144,000	-	144,000	0.00
General	486,000	-	486,000	0.00	384,000	-	384,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The shared Automated Fingerprint Identification System (AFIS) operated through a partnership with Minnesota known as the Midwest Automated Fingerprint Identification Network (MAFIN) is being upgraded to a new Automated Biometric Identification System (ABIS). This system receives, stores and analyzes all fingerprint records for North Dakota and Minnesota. This new system will be completed by approximately August of 2023. Once the new system is completed there are ongoing maintenance costs for North Dakota of \$92,000 per year associated with this cloud based system

Mobile devices are more than two-thirds of the devices the NDBCI Cyber Crime Unit (CCU) receives for data extraction. These devices are frequently locked with facial recognition, fingerprints or pin codes. Opening these devices and extracting the data is paramount to the success of cases. Currently, the two major vendors in this market are Cellebrite Premium and Graykey but they do not do exactly the same thing. GrayKey is the best tool to open and extract Apple iOS devices and Cellebrite Premium is the best tool to open and extract Android devices. The annual cost of GrayKey for our three CCU sites (Minot, Bismarck and Fargo) is \$102,000 and the

125 Attorney General

Agency 125

annual cost of Cellebrite Premium is \$72,000 per year. In order to achieve the maximum capability and coverage for the state will require \$174,000 per year or \$348,000 per biennium.

Necessary resources for implementation (including FTE's)*: additional funding is needed

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: Citizens of North Dakota. Without this funding, it will take significantly longer to obtain information necessary to investigations.

Inflationary Increases (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation

Special	20,000	-	20,000	0.00	20,000	-	20,000	0.00
Total	376,463	-	376,463	0.00	145,000	156,463	301,463	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDBCI uses ammunition for the qualification, training, and effective carrying of handguns, shotguns, and rifles in the performance of field operations and legislatively assigned duties. NDBCI requires each sworn agent to qualify with their handgun on a minimum of two (2) occasions per year; and shoot qualifying scores related to shotgun and rifles on one (1) occasion per year. Qualifications for firearms are required for ND Peace Officer Standards and Training (POST) Licensure. NDBCI is moving to a mandatory quarterly range requirement where the agents have to shoot in every quarter throughout the year. This will assist in keeping the agents proficient in firearms handling and shooting, diagnose any shooting issues, and also verify there are no equipment malfunctions.

NDBCI is responsible for supplying buy funds for NDBCI narcotics investigations and also multi-jurisdictional drug task force operations. The State of North Dakota currently supports ten (10) narcotic task forces related to buy funds. This responsibility, coupled with a decrease in Byrne/JAG funding, has led NDBCI to closely monitor narcotics buy fund transaction across the State.

Lease costs have increased for Civil Litigation and BCI's locations in other cities.

Crime lab costs continue to increase.

Necessary resources for implementation (including FTE's)*: additional funding

125 Attorney General

Agency 125

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: Divisions within the OAG will be forced to cut operating in key areas.

Discovery Software (Priority: 14)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Consumer Protection and Anti-trust Division will reclassify two consumer fraud investigators from a I to a II in the 2025-27 biennium. The cost for the two reclassifications is \$14,430.

The Bureau of Criminal Investigations will reclassify 18 agents and analysts throughout the 202325 biennium as they meet the requirements for the next step in their career. The cost for the reclassifications is \$57,327.

Finance Division will reclassify an account budget specialist II to a III and an admin assistant from a I to a II. The cost for the two reclassifications is \$21,181.

Necessary resources for implementation (including FTE's)*: additional funding

125 Attorney General

Agency 125

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: OAG staff eligible for promotions. without funding to provide reclassifications, the office risks losing highly trained and qualified staff to other entities that can offer more competitive salaries.

BCI Agent Multiplier (Priority: 19)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	27,179	-	27,179	0.00	-	-	-	0.00
General	407,685	-	407,685	0.00	-	-	-	0.00
Special	108,716	-	108,716	0.00	-	-	-	0.00
Total	543,580	-	543,580	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The request is to raise the NDBCI agent multiplier from 2.0 (if in PERS already) or 1.75 (new employee with no PERS history) to 3.0. This would allow NDBCI to hire a new Special Agent at age 34, have them work 20 years and retire from NDBCI at age 54 with a multiplier of 3.0 applied to their PERS benefit. The multiplier would then fall to 1.75 (after 20 years) to promote retirement and safety for the agent related to field operations.

The North Dakota Bureau of Criminal Investigation (NDBCI) requires new applicant "Special Agents" to have a 4 year degree and 5 years of investigative experience. This is due to the fact NDBCI acts as the State of North Dakota's "Detective Division" as seen in police departments and sheriffs departments. The primary duties of NDBCI include the "reactive" support of political subdivisions on felony level crimes to include homicides, sexual assaults, robberies, theft, suicide, etc. NDBCI is also responsible for being "proactive" in the detection, disruption, and dismantling of illegal narcotics trafficking (manufacturing and sale) across the State of North Dakota.

This said, the average age of an NDBCI agent being hired (due to the education and experience required) is 33 to 35 years of age. The average age of an NDBCI today (agency wide) is 44. If a new Special Agent joins NDBCI at the age of 34, that agent will hire under the current PERS system of rule of 90 and age 60 to retire, at a multiplier of 1.75. If the new Special Agent hires with PERS history, they will hire under the current PERS system of the rule of 85, at a multiplier of 2.0.

Necessary resources for implementation (including FTE's)*: funding

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: special agents within the OAG. The practical application is an agent at NDBCI would hire at age 34, and have to work 30 years (2.0 multiplier) to retire from NDBCI at age 64 with 60% of their high 36 months of salary to establish their PERS benefit. This means a 64 year old Special Agent is

125 Attorney General

Agency 125

conducting complicated field actions such as felony level homicide investigations and working as a narcotics agent to execute narcotics search warrants (with an additional 50 pounds of vest and gear) and felony level apprehension of drug traffickers. The safety of a 64 year old Special Agent conducting such arduous operational field actions is a real issue.

BCI National Forensic Academy (Priority: 20)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	50,000	-	50,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	50,000	-	50,000	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The National Forensic Academy (NFA) is training that agents attend in Tennessee. The NFA is a specialized training focused on crime scene processing, evidence collection, and crime scene photography. When the agents complete the training, they will have receive 400 hours of specialized training. The need for this type of training for our agency is becoming more evident each day. Currently, 25 agents have attended and successfully completed this 10-week training in Tennessee. BCI sends two agents each year (\$25,000 x 2 = \$50,000). North Dakota is going through changes we have not seen before. ND/BCI has been involved in murder for hires, body dumps, aggravated assaults, a higher number of officer involved shootings, and violent sexual assaults. While North Dakota has always had a small number of homicides each year, the manner and number of these deaths is increasing.

Necessary resources for implementation (including FTE's)*: additional funding

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: BCI staff. This funding will allow BCI agents to participate in high-level training.

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: BCI has been working with the Fargo area law enforcement agencies to create a regional office for crimes against children investigations. This group is responsible for digital forensic analysis of devices seized during investigations. As officers are assigned to assist with the crimes against children unit, they need forensic lab space in the Fargo BCI office. Currently there is an area in the Fargo BCI building built into two separate digital forensic labs, we plan to remove walls and use modular work surface to allow the space to accommodate up to six forensic labs.

Necessary resources for implementation (including FTE's)*: funding

Are resources being redirected or are they new or additional (including FTE's)*: new funding

Who is served and impact of not funding*: Cyber crime agents and ultimately the State of North Dakota. if funding is not granted, adequate space will not be available for increased cyber crime investigations.

Sex Assault Kit Tracking System Software Support (Priority: 22)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	180,000	-	180,000	0.00	180,000	-	180,000	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	180,000	-	180,000	0.00	180,000	-	180,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The sexual assault kit tracking system will go live 2022. A yearly maintenance fee of 85,000 is required for hosting the software, backups, user support, and updates. A federal grant will cover the cost for the 2023-25 biennium.

125 Attorney General

Necessary resources for implementation (including FTE's)*: funding

Are resources being redirected or are they new or additional (including FTE's)*: new

Who is served and impact of not funding*: Citizens of North Dakota. If the tracking system is not maintained and updated, there is a potential for rape kits to be unaccounted for and not tested.

Litigation Pool from SIIF (Priority: 24)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

	001	125-1011	12550	693000	4	4	13,500	54,000	-	54,000	-	54,000	-
Total					-	-	-	54,000	-	54,000	-	54,000	-

State Initiative:* Other

Justification: IT/CJIS currently support and maintains eight servers. The servers are critical to the operation of the entire agency. The servers must be replaced every four years, on a rotational basis, like the PC's we utilize. The cost to replace these servers has never been funded in our base budget. It is important to get this cost built into our budget, so we do not have to scramble and look for funding or grants each biennium in the hopes to replace one or two servers. The estimated total cost is \$54,000, per biennium. This would allow us to replace two servers a year, to keep on a rotational schedule.

Statutory Authority

North Dakota Century Code Chapters 5-01, 5-02, 5-03, 57-01, and 57-02.

Agency Description

The Office of State Tax Commissioner is responsible for fairly and effectively administering the tax laws of North Dakota and has six separate divisions:

- Commissioners Division – Responsible for the general administration of the tax department and serves as the tax department’s primary research, communication, and public information center. Management planning and human resource administration are under direct control of the Commissioners Division.
- Legal Division – Serves in an advisory capacity to the Commissioner so that the creation of new tax laws and changes in policy, procedures, and administration comply with state laws. In addition, it provides litigation services, legal advice, and is counsel to the State Board of Equalization.
- Fiscal Management Division – Financial center covering revenue accounting, accounts payable, payroll, asset management, purchasing and budgeting.
- Tax Administration Division – Administers individual income, corporate income, sales and use, special taxes, applicable local option taxes, and the collection of delinquent taxes.
- Property Tax Division – Administers property and utility taxes, coal taxes, Homestead Tax Credit and Renter Refund Program, the Disabled Veterans Property Tax Credit Program, and provides administrative and technical support to the State Board of Equalization.
- Information Management and Technology Division - Leads department technology efforts and safeguarding taxpayer data, as well as mail and processing efforts.

Agency Mission Statement

The mission of the Office of State Tax Commissioner is to fairly and effectively administer the tax laws of North Dakota.

Major Accomplishments

-
- 1 Enhancing Citizen Experience - Gentax and ND Taxpayer Access Point – Continued to expand service through ND TAP. Taxpayers can file over 14 tax types and interact with an AI assistant. Items added this biennium include annual alcohol registrations and special event permit applications.

 - 2 Website Enhancement – Moved web platforms and used it to improve citizen experience, understandability and enhance user-friendliness.

 - 3 Single Point of Entry – One-Stop Service - Reconstructed Capitol space to allow for a one-stop entry offering services across all tax areas, which improved customer service, safety and simplified for COVID. Telework now offered on a rotational basis allowed for 18 FTEs from the State Library to move into existing tower office space. Office space was reduced in Fargo by subletting with another agency.

 - 4 Recruitment – Focused on being a workplace that supports talent growth, values employee engagement, and works to be an employer of choice.

 - 5 Audit Activity – Continued compliance work by performing audits and compliance reviews. During the 2019-2021 biennium, over 600 sales and corporate audits resulted in assessments of over \$74 million.

 - 6 Data Security – Partnered with the IRS, tax industry, and other stakeholders to ensure that all confidential information is kept secure. During the last 3-year IRS audit, the department had no critical findings.

Major Accomplishments

-
- 7 Interagency Collaboration – Partners included: WSI, OMB, Bureau of Indian Affairs, Commerce, Secretary of State, DOT, JSND, Child Support Enforcement, BND, and Highway Patrol.
 - 8 Taxation Remote Sales & Use and Marketplace Seller – Collected \$219 million (June 2022) through voluntary submission since the taxation of internet sales was overturned in 2018.
-

Critical Issues

-
- 1 The Office of State Tax Commissioner makes customer service a top priority. Our mission statement and core values emphasize this philosophy stressing the importance of customer-facing service while enhancing compliance. Future critical issues are: Workforce Recruitment, Retention & Development Department employees must have a thorough knowledge of many different tax types. The Office of State Tax Commissioner has several critical positions that have been adversely impacted by lack of salary increases due to revenue shortfalls over the past four biennia. These impacts have put several of our positions, most specifically auditor and compliance positions (revenue producing), at a level that impedes our ability to retain and attract staff. Tax knowledge is a specialized skillset within these position types. Continued risk of losing staff to positions of a similar nature with higher salary, lessens our ability to build and retain knowledge long-term which is critical for success. It is important that salaries and benefit packages remain competitive to retain high quality tax expertise. The turnover our department has faced this last biennium has created a new need for training. Therefore, it is also important that funding for ongoing educational opportunities be available to broaden knowledge and create opportunities for succession planning. As the primary revenue collection agency for North Dakota, it is important that we remain adequately staffed to:
 - Timely deliver exceptional customer service.
 - Process returns in a timely manner to avoid state liability for interest due on refunds.
 - Conduct appropriate audits and compliance activities to maintain revenue collections and ensure compliance with North Dakota tax laws.Budget cuts and staff reductions over the last few bienniums is having customer service impacts. Fewer staff has resulted in the absorption of essential job duties to remaining staff. Current biennium staffing levels require reallocating resources from audit and compliance to processing amended returns, issuing refunds, discovery efforts, updating guidelines, and responding to taxpayer inquiries. This reallocation of staff resources further diminishes revenue potential and puts pressure on our mission of maintaining fairness among taxpayers. It has negative impacts on the state's general fund as it means reductions in the number of audits and compliance checks that can be conducted. Technology changes needed to create better citizen experiences is also impacting employee capacity and repurposing skills needed to perform these duties. As more filings become digital, the department has reached the point where staffing efficiencies have been realized and we need people to process the information gathered digitally. As the need for paper processes is diminished, this results in the need for higher level skills and wages to support repurposing work capacities from these areas. There is also a higher need for discovery efforts with the ability of taxation on internet sales which thus far have been voluntary. The opportunity to repurpose capacity is there but may need salary dollars to support higher skill levels needed.
 - 2 Digital Transformation - Support for Integrated Tax Systems - GenTax and Taxpayer Access Point (ND TAP) Approximately 50 percent of the department's operating budget is dedicated to IT contractual services for the integrated tax system (GenTax) and Taxpayer Access Point (ND TAP), which are the core of our customer service activities and return processing system. The complexity and depth of GenTax require ongoing support from FAST Enterprises (FAST) to maintain GenTax and ND TAP and to ensure we stay current with new technology, tools, and security protocols. Investment in the current service Level 3 has allowed implementation of services such as the Taxpayer Access Point, the addition of an AI assistant (Teddy), upgrades, and other core services at no additional cost. If a change in service levels is made, we will be removed from our grandfathered pricing structure and costs will adjust maintenance costs to market rates over the long-term, a substantial increase in cost to the State. To maintain current support levels, which include upgrades and other technological enhancements, a total of \$4.4 million is needed for the 2023-2025 biennium, this requires an adjustment of \$400,000 to our base budget for planned maintenance cost growth. Adjusting processes using GenTax, and the introduction of new tax types into the system, or citizen experience enhancements, improves customer experience in a digital platform. These types of improvements/enhancements are not covered by our current maintenance contract, so we have asked for a decision package seeking additional funding of \$500,000 to cover 2,500 hours of additional time and labor costs which would allow us to leverage innovations and enhancements to support improving citizen experience, electronic filing, fraud detection, security, and AI assistance.
-

Critical Issues

-
- 3 **New/Changed Tax Types** The potential addition of new tax types or changes to existing types creates two critical issues: 1) the need for additional staff to administer; 2) technology enhancements or customizations to GenTax that wouldn't be covered under our maintenance contract (i.e., marijuana, changes to oil taxation, etc.). The decision package mentioned above would address the need specified in #2.
-
- 4 **Safeguarding Data and Fraud Protection** Safeguarding data is an important piece of the IT infrastructure. With most taxpayers filing electronically, the Department must safeguard its physical documents as well as the IT systems where taxpayer data is stored. In addition, the increase in identity theft and fraud demand that the Department be proactive in continuing to find new ways to protect data. The Internal Revenue Service requires Tax to have log management protocol, as requested in the new NDIR system for Centralized Log Management, to protect federal taxpayer information (FTI). Safeguarding data is an investment in taxpayer trust, as a breach of security would result in damages that would far exceed any costs of implementing additional safety measures. It is critical to have adequate staff dedicated to developing new fraud detection programs, updating business rules necessary to combat the ever-changing fraudulent activities, and researching new ways to prevent identity theft and fraud for the taxpayers of North Dakota. Services provided by FAST are also a critical component of this effort as they provide security updates to help respond to the latest fraud attacks.
-

Performance Measures

The Agency Program Narrative provides information on the outcomes of individual sections.

Homestead Tax Credit

The results of the Homestead Tax Credit program are measured by the number of qualifying applicants and dollars expended. Dollars expended are limited by statutory homestead maximum taxable value reductions for various income levels and a maximum renter's refund of \$400.

Disabled Veterans Tax Credit

The results of the Disabled Veterans Property Tax Credit program are measured by the number of qualifying applicants and dollars expended. Dollars expended are limited by the statutory maximum reduction of \$6,750 taxable value of the disabled veteran's homestead. The credit is limited to the percentage of the veteran's disability rating for service-connected disabilities as certified by the Department of Veterans Affairs for the purpose of applying for a property tax exemption.

Program Statistical Data

The Research and Communication section in the Commissioners Division assists the Office of Management and Budget with the preparation of three revenue forecasts each biennium, responds to over 175 fiscal note requests, prepares 12 statistical publications, and completes numerous ad hoc research projects. In addition, this function answers many requests for research and statistical information each biennium. This area also develops public and media outreach and education; writes press releases and organizes press conferences about state tax issues; designs forms and publications; and maintains the department website.

The Legal Division handles approximately 35 major cases, assists the Office of the Attorney General with opinion requests concerning state and local tax matters, initiates approximately 350 legal actions, and monitors about 150 bankruptcy cases involving unpaid tax liabilities per year. In addition, the Division conducts approximately 75 administrative hearings. During each legislative session, the Legal Division drafts bills, coordinates bill tracking for the department, and monitors up to 200 bills that impact state tax laws. The Division provides legal support services to the department, provides testimony, and offers tax expertise to legislative committees and other interest groups.

The Fiscal Management Division prepares the executive budget each biennium, prepares and monitors the internal budget, along with managing functions covering revenue collections, asset management, insurance overview, payroll, accounts payable, accounts receivable payment application, and purchasing. The revenue accounting function provided the basis for timely certifications of revenue and transfers to the general fund and other special accounts in excess of \$3.7 billion during FY 2021.

Total collections from taxes administered by the Tax Administration Division were approximately \$7.89 billion for the 2019-2021 biennium. Corporate Income Tax conducted 368 audits in the 2019-2021 biennium, resulting in over \$31.3 million in additional assessments. Federal audits, office audits, and compliance reviews conducted for Individual Income Tax resulted in more than \$7.4 million in additional assessments. For Sales and Use Tax, approximately 46,038 taxpayers are registered to collect and remit Sales and Use Taxes. There were 248 audits conducted of in-state and out-of-state businesses which resulted in additional Sales and Use Tax assessments of \$42.9 million for the 2019-2021 biennium. Sales Tax compliance office assessments for the Customs crosscheck program generated an additional \$817,216 in assessments. Motor Fuels Tax assessed an additional \$329,898 in motor and special fuels taxes during 2019-2021 return reviews. The pandemic closed many businesses impacting the department's ability to audit during 2019-2021.

The Property Tax Division administers Coal Severance Tax, Coal Conversion Privilege Tax on electrical generating plants, coal gasification and coal beneficiation plants; Transmissions Line Taxes were approximately \$45 million during the 2019-2021 biennium. This Division also provides instruction and monitors the certification of approximately 300 assessment officials, performs a sales ratio study, which compares true and full value of real estate with the sale price of properties that have been sold and includes approximately 12,000 sales and appraisals. Taxable value of all property as equalized by the State Board of Equalization in 2021 was \$5.296 billion.

The Information, Management and Technology Division processes mail and digitization, data verification, and data governance activities. It maintains the IT infrastructure, including maintenance of Gentax, along with several other software products necessary to administer over 35 different taxes. The Division provides support for computers and technical equipment needed for processing and ensures data security that includes information from state tax returns, federal tax information, and other social and economic data.

Homestead Tax Credit

Payments for 2020 credits made in FY 2021: 9,316 applicants qualified for credit for a total of \$7,629,207 (to counties and state medical center). Payments for 2020 renter's refund credits made in FY 2021: 2,565 applicants qualified for the refund program for a total of \$757,872.

Payments for 2021 credits made in FY 2022: 9,173 applicants qualified for credit for a total of \$7,473,676 (to counties and state medical center). Payments for 2021 renter's refund credits made in FY 2022: 2,480 applicants qualified for the refund program for a total of \$755,235.

Disabled Veterans Tax Credit

Payments for 2020 credits made in FY 2021: 4,375 disabled veterans qualified for credit for a total of \$5,231,637 (to counties and state medical center).

Payments for 2021 credits made in FY 2022: 4,837 disabled veterans qualified for credit for a total of \$5,846,365 (to counties and state medical center).

Explanation of Program Costs

The Office of State Tax Commissioner has 118 authorized FTEs responsible for the administration of State of North Dakota tax laws.

127 Tax Commissioner

Agency 127

- The Travel object includes costs for travel costs for auditing, compliance, litigation of tax cases, continuing education, and training for staff. The agency incurs expenses for employees to participate in Streamlined Sales Tax (N.D.C.C.Ch. 57-39.4), Multistate Tax Commission (MTC) (N.D.C.C.Ch. 57-59) and Federation of Tax Administrators meetings/seminars. Includes spending authority in the amount of \$65,000 for the Motor Fuels Dyed Fuel Enforcement Federal Grant.
- The IT Software object includes costs for audit sampling software, GIS software utilized by taxpayers to determine the sales and use tax rate by location, software to write XML code for electronic filing applications, and general software.
- The Professional Supplies and Materials object includes reference materials and subscriptions to remain current with changes impacting state laws, to conduct research, and property valuation subscriptions necessary for ongoing education for property tax operations.
- The Miscellaneous Supply object includes costs for supplies needed when conducting Dyed Fuel enforcement activities. These costs are covered under the Motor Fuels Dyed Fuel Enforcement Federal Grant of which \$20,000 in spending authority is allocated to this object.
- The Office Supply object includes costs for office supply items.
- The Postage object includes costs for mail service fees, postage for mailing correspondence, billings, statements, tax forms, brochures, refund applications for renters, tax refunds, rate charts, and other tax documents.
- The Printing object includes costs for printing tax forms, rules and guidelines, assessor manuals, envelopes training materials, and statistical publications such as the Red Book.
- The IT Equipment under \$5,000 object includes the replacement cost of computers, monitors, and related accessories. The NDIIT recommended replacement schedule is followed.
- The Office Equipment and Furniture supply object includes the cost of replacement equipment and furniture.
- The Insurance object includes the cost of the Risk Management premium fee and the cost to insure the department's assets.
- The Equipment lease object includes the ongoing cost to lease copiers and scanners.
- The Lease/Rent of buildings object includes the cost to rent offices in Fargo, Grand Forks, Minot, Williston, and Dickinson.
- The Repairs object covers the cost to maintain service contracts and repair equipment.
- The IT Data Processing object includes costs coordinated with NDIIT of the operational data processing costs. This includes the maintenance of programs and automation, scanning, data capture, website, hosting fees, and electronic data storage. Rates provided by NDIIT were used in calculating the budget request.
- The IT Communications object covers the cost for telephone services provided by NDIIT. Rates provided by NDIIT were used in calculating the budget request.
- The IT Contractual Services object covers the ongoing GenTax and Taxpayer Access Point (ND TAP) software maintenance, on-site support, and service packs. This does not cover enhancements or additions of new tax types.

- The Professional Development object includes the cost of dues to continue to be a member of Streamlined Sales Tax and MTC programs and fees for conferences to keep staff educated on tax administration. This object includes \$40,000 of Motor Fuels Federal Grant spending authority.
- The Operating Fees and Services object covers costs associated with background checks, service awards, legal notices, and county Sheriffs fees for serving papers.

Homestead Tax Credit

Property Tax Division administers the Homestead Tax Credit program. Program costs include reimbursement payments to counties for taxes and special assessment installments, payment to the state medical center fund to reimburse it for taxes, and direct payments to qualifying renters. No wages or operating expenses come out of the Homestead Tax Credit appropriation. Responsibilities include certifying homestead tax credits for reimbursement to each county, the state medical center fund, and certifying and paying each qualifying renter's refund application. The original appropriation for the 2021-2023 biennium is \$18,000,000. The budget request for 2023-25 is \$18,900,000.

Disabled Veterans Tax Credit

Property Tax Division personnel administer the Disabled Veteran Tax Credit program. Program costs include payments to counties and to the state medical center to reimburse them for property taxes. No wages or operating expenses come out of the Disabled Veteran Tax Credit appropriation. Responsibilities include certifying disabled veteran tax credits for certification to each county and the state medical center fund. The original appropriation for the 2021-2023 biennium is \$16,300,000. The budget request for 2023-25 is \$18,745,000

Program Goals and Objectives

The Office of State Tax Commissioner is comprised of six divisions: Commissioners, Legal, Fiscal Management, Tax Administration, Property, and Information Management & Technology. The program goals and objectives for the divisions are:

Commissioners Division: Responsible for the general administration and serves as Department's primary research, communication, and public information center. Management planning and human resource administration are under direct control of the Commissioner's Division.

Legal Division: Represent the department and the State Board of Equalization in the litigation of civil tax cases; provide legal advice to department staff, provide input to legislative committees, the State Board of Equalization, and local officials in matters of tax law; to assist state's attorneys in the prosecution of criminal complaints initiated by the Department for violation of tax laws; and to provide essential direction and counsel on the formation and implementation of tax policy for the Tax Commissioner and senior administrative staff.

Fiscal Management Division: Provide financial information and ensure that existing policies and procedures for financial operations are followed, use continuous improvement processes for financial operations for revenue accounting, payroll, accounts payable, accounts receivable payment application, fraud risk, asset management, and purchasing.

Tax Administration Division: Administer and ensure compliance with the state's tax laws for Individual Income, Income Withholding, Royalty Withholding, Corporation Income, Sales and Use, and special taxes

Property Tax Division: Assist county, city, and other local officials in the administration of the assessment and taxation of property. Provide training for assessment officials; annually conduct a sales, market, and productivity ratio study; make tentative valuations of utility, pipeline, railroad, and airline property; certify final valuations to the counties for taxation; and administer the Homestead and Disabled Veterans Tax Credit.

127 Tax Commissioner

Agency 127

Information Management and Technology Division: Provide support services including processing mail and digitization, data entry and verification, security and network administration, programming, project management, electronic tax return filing, document retention and management, and ensuring compliance with IRS data security requirements. Responsible for coordinating the hiring of temporary staff needed to assist with return processing at its peak volume.

Homestead Tax Credit

The goal of the Homestead Tax Credit program is to ensure that all North Dakota residents who qualify for the program are made aware of it and receive the benefits to which they are entitled. The objectives are to assist elderly and disabled persons by reducing the property taxes and special assessments on homeowners' homesteads, and by refunding a portion of the rent paid by elderly and disabled persons who rent living quarters.

Disabled Veterans Tax Credit

The goal of the Disabled Veterans Property Tax Credit program is to ensure that all North Dakota disabled veterans who qualify for the program are made aware of it and receive the benefits to which they are entitled. The objectives are to assist disabled veterans or their un-remarried surviving spouses by reducing the property taxes on their homesteads.

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Funding to support equity increases for critical positions that are at retention risk and presenting a hiring challenge due to competitive disadvantages within state government. The specialized knowledge needed to administer the state’s taxes and the ability to retain this knowledge and attract good candidates to positions is critical to tax administration. This agency understands that equity is being addressed by OMB and supports the statewide effort, however we are including it here as we believe it is a critical need for this agency to retain/attract talent.

127 Tax Commissioner

Agency 127

Necessary resources for implementation (including FTE's)*: Additional funding to bring employees in positions such as auditor/compliance and others, which have a high-rate of competition within state government and private sector.

Are resources being redirected or are they new or additional (including FTE's)*: New salary funding.

Who is served and impact of not funding*: Allows the Office of State Tax Commissioner to compete to retain employees and seek quality candidates to lead tax administration efforts.

GenTax Service Needs & Enhancements (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	400,000	500,000	900,000	0.00	400,000	500,000	900,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	400,000	500,000	900,000	0.00	400,000	500,000	900,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Includes all requests related to GenTax® - the primary resource for tax administration.

GENTAX MAINTENANCE CONTRACT - \$400,000 base funding for expected service increase - Funding for the current 2021-2023 biennium is \$4.0 M for Level III maintenance support. An additional \$400,000 is needed to continue Level III for the 2023-2025 biennium – Total of \$4.4 million (\$4 million included in our base budget + an additional \$400,000 expected service increase).

SERVICE CONSULTANT CONTRACT - \$500,000 base funding - Funding provides access to 2,500 hours of time and labor for an experienced service consultant to provide enhancements or additions in GenTax not covered under maintenance agreement. Potential projects planned for this funding:

The GenTax® Maintenance Contract (above request) allows for maintenance on existing tax types within the system and upgrades. It DOES NOT cover enhancements (innovations to existing tax types that require new programming) or the addition of new tax types (such as marijuana) or systems not currently part of the core programming. These are not covered by maintenance level support and require paying for a service consultant at time/labor rates. Access to a service consultant gives us the resource of a knowledgeable programmer with system experience that we simply cannot quickly train in an FTE. This level of experience is critical to help us customize and make updates that improve tax administration and citizen experience in a timely fashion.

The addition of \$500,000 in base funding would give access to up to 2,500 hours of a service consultant to assist with projects and ongoing innovations for enhancements. Tax IT programming staff are able to address some of these needs, but the requests for enhancements and additions has outgrown capacity.

127 Tax Commissioner

Agency 127

Current project logs (July 2022 internal service requests) waiting to be worked include 43 enhancements, 38 new system additions, and 3 legislative related enhancements. Access to an experienced service consultant (time/labor) would help leverage expertise and expedite these and other projects, such as:

Enhancements to oil extraction tax, motor fuel tax systems, adding new tax types – coal tax, provider bed tax – and addressing stakeholder reporting – All of these projects if addressed this biennium, could take upwards of 1,800 hours. Oil extraction tax is using legacy features in the GenTax structure that are no longer maintained in other states. It needs updating into new system structures which requires extensive programming due to the many fixes/updates that have come with legislative changes in this area. Motor fuels tax systems updates would allow for the digital receipt information and the creation of citizen portals for submission of this information. New tax types entering GenTax bring the agency one step closer to a fully digital platform for tax administration, and enhancements to reporting help us further meet stakeholder needs.

Business Credit Manager (BCM) – estimated up to 200 hours – Implementation of the BCM will retire a legacy Access database currently used to track sales tax incentives. This system creates a direct link between a return and credit and would provide greater clarity and expand tracking to all incentive credits, as well as the Homestead/Disabled Veterans Tax Credit programs.

Developer Portal – estimated up to 200 hours – Implementation of the Developer Portal will create a customized, central location for interface partners (TurboTax, TaxAct, etc.) to access available APIs, documentation, certification processes and other resources. It would revamp traditional file sharing processes with external vendors to a web services/API driven model and expands capabilities to allow additional filing options for taxpayers.

Modernized E-File (MeF) Portal – estimated up to 200 Hours – Implementation of the MeF Portal will replace the current MeF testing system. It would allow external vendors to submit e-file returns to a centralized location for testing and validation would allow automation of testing process.

Necessary resources for implementation (including FTE's)*: Additional funding to support.

Are resources being redirected or are they new or additional (including FTE's)*: Resources requested support or enhance current tax administration efforts.

GENTAX MAINTENANCE CONTRACT - additional to support current service levels.

SERVICE CONSULTANT CONTRACT - allows agency to address programming needs without requesting additional FTEs.

Who is served and impact of not funding*: Process improvements and efficiencies, stakeholder modernizations, and improvement of citizen experience.

GENTAX MAINTENANCE CONTRACT - Loss of Level III Service could result in \$9 M or greater increase over the next 4 biennium's and create inefficiencies in tax administration.

SERVICE CONSULTANT CONTRACT - Allows enhancements and additions in GenTax to be handled in a timely manner, enhancing citizen experience, digital transformation efforts, and continuous process improvements.

Centralized Log Management Centralized Log Management Centralized Log Management (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation

Special	-	-	-	0.00	-	-	-	0.00
Total	96,000	-	96,000	0.00	96,000	-	96,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDIT is introducing a new service called Centralized Log Management in 2023-2024. In response to a need for a Centralized Log Management solution, and to avoid having unique logging solutions spread throughout the Enterprise, this new system will meet the complex needs of our infrastructure and business applications. This simplified solution has the capability to ingest logs from many different environments (cloud, on-premise, application logs, etc.), indexes them for operational needs, and can produce reports for consumption by business units. Internal Revenue Service Code - IRC 6103 - Disclosure Of Returns And Return Information To Designee Of Taxpayer - requires logging of various system components.

Necessary resources for implementation (including FTE's)*: NDIT will cover base fees, cost to agency is \$4,000/month.

Are resources being redirected or are they new or additional (including FTE's)*: New funding and existing internal resources will be redirected as needed for implementation/maintenance.

Who is served and impact of not funding*: Logging is a requirement of the federal government, which allows the Office of State Tax Commissioner to access federal tax information (FTI) - which is used frequently in tax administration activities. There would be a huge loss of revenue and lack of ability to verify taxpayer information if access to FTI is removed.

Statutory Authority

North Dakota Century Code Sections 12-59, 37-19.1, 28-32-31, 40-51.2, 40-47-01.1, 54-57-03, and 61-03-22.

Agency Description

The Office of Administrative Hearings (OAH) is an executive branch agency that provides independent administrative law judges to preside over state and local administrative hearings and related proceedings. Hearings are conducted under authority from the Administrative Agencies Practices Act (North Dakota Century Code Chapter 28-32), North Dakota Century Code Chapter 54-57, specific agency statutes, agency procedural rules, and the Uniform Rules of Administrative Procedure for Adjudicative Proceedings (ND Admin. Code article 98-02).

Agency Mission Statement

To resolve administrative disputes through holding fair and impartial hearings and issuing reasoned and timely decisions.

Major Accomplishments

- 1 Continued active participation in national administrative law judge and hearing officer organizations, including the National Association of Hearing Officials, the National Association of Administrative Law Judiciary, and the Central Panel Directors Conference.
- 2 Upgraded our case management and billing system to the newest version.
- 3 Continued work with WSI to jointly report case processing statistical information to the legislative management and state advisory council each quarter.

Critical Issues

- 1 The scope of OAH jurisdiction (expansion of jurisdiction), i.e., whether independent ALJs should be required for other state agencies besides those now under OAH jurisdiction, continues to be an issue. Legislation has been introduced in the Legislative Assembly over the years to require some exempt agencies to use OAH. A successful initiated measure in 2008 required Workforce Safety and Insurance (WSI) to use OAH. Legislation has been passed to expand OAH jurisdiction for some local entities. OAH is not proposing any legislation for expansion of jurisdiction; however, OAH needs to continue to be concerned about whether voluntary agency users will continue to use OAH.
- 2 A continuing critical issue is whether OAH ALJs should issue final decisions for more agency hearings. OAH now issues final decisions for approximately 50.0 percent of its hearings.
- 3 The third critical issue is whether parties to administrative hearings ought to be able to disqualify a designated ALJ or hearing officer once without showing cause for disqualification.

Performance Measures

OAH performance measures are case processing guidelines, measuring the length of time to “process” various components of administrative proceedings and have been implemented for all agencies for which OAH conducts hearings. Although performance measures for conducting administrative hearings are a helpful management tool, because of the inherent variability in hearings, they should be considered as guidelines and not strict performance measures. See 2019-2021 Office of Administrative Hearings Biennial Report for the most recent OAH ALJ performance data.

Effective July 1, 2007, performance measures were implemented for all agencies for which OAH conducts hearings. For WSI cases only, performance measures, based on early July 1, 2006, trial basis performance measures, were put into place on August 1, 2008.

Program Statistical Data

OAH began operations July 1, 1991. OAH received many more requests for agency services in its early years than it does now. OAH averaged about 550 requests per year for 1991-1995 and about 725 requests per year for 1996-2001. Much of this early caseload was the result of an agreement to conduct WSI hearings. There was a large backlog of cases that OAH handled for WSI. This backlog was eliminated.

Since 2012, OAH has averaged 563 requests per year, with the biggest increase being between 2014 (571) and 2015 (671). OAH is currently on pace to reach 375+ requests for the 2022 calendar year, having received 208 requests through June 2022. The breakdowns are as follows:

- 2012 - 510;
- 2013 - 577;
- 2014 - 571;
- 2015 - 671;
- 2016 – 717;
- 2017 – 663;
- 2018 – 646;
- 2019 – 482;
- 2020 – 432;
- 2021 – 364; and
- 2022 - 208 (through June 30, 2022).

Requests from WSI have been decreasing since 2016, with an anticipated 120-130 cases for 2022. Requests from the Department of Human Services peaked at 403 in 2018, decreasing to 164 in 2021, with an anticipated 190-200 cases in 2022. Another frequent user, the Public Service Commission, has remained steady between 10 to 20 cases year. Over the years, OAH has provided administrative law judges for over 100 government agencies and entities. To preside over this caseload, OAH uses three permanent, full-time ALJs and seven temporary, contract ALJs on an as-needed basis.

Explanation of Program Costs

From July 1, 1995, to June 30, 2003, OAH expenditures derived from two cost centers because of its separate handling of the WSI caseload. One cost center reflected the operation of a separate agency and the provision of permanent ALJ services. The other cost center reflected the provision of temporary, contract ALJ services for

140 Administrative Hearings

Agency 140

WSI and support to provide those additional services. In 2003, at the request of WSI, OAH returned to one cost center to provide all hearing officer services to all client agencies, including WSI, primarily with permanent, full-time ALJs. Although OAH again provides services for WSI primarily through temporary, contract ALJs, OAH still operates under one cost center.

Program Goals and Objectives

OAH has only one major program, to provide administrative hearings. The agency's mission, goals, and functions are carried out in this program, which includes ALJ and related support services as well as administration, finance and budget, information systems, personnel, and payroll matters.

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Anticipated rent increase of eight (8) percent for office space.

Necessary resources for implementation (including FTE's)*: Plan is to remain in current office space.

Are resources being redirected or are they new or additional (including FTE's)*: Plan is to utilize current office space.

Who is served and impact of not funding*: OAH serves North Dakota by providing administrative hearings and related services to its citizens, businesses, and other entities, as required by law. Not funding the increase would require OAH to incur relocation costs which would far exceed the amount requested.

Statutory Authority

ND Constitution, Article IV and North Dakota Century Code Chapters 54-03, 54-03.1, and 54-03.2.

Agency Description

The Legislative Assembly is the policymaking branch of state government. The Legislative Assembly meets for organization and orientation purposes during the month of December in the even-numbered years and convenes each odd-numbered year for the regular session which may not exceed 80 days during the biennium.

Agency Mission Statement

The Legislative Assembly's primary goal is to determine policies for the operation of state and local government by making the laws of the state. The Legislative Assembly appropriates funds for the operation of state government and enacts legislation to carry out the policies it establishes. The Legislative Assembly is a bicameral body consisting of the Senate and House of Representatives. There are 47 senators and 94 representatives. Through its interim, special, and standing committees, the Legislative Assembly reviews, debates, and determines legislation encompassing all aspects of government.

Major Accomplishments

- 1 Performed constitutional responsibilities within limited amount of time in an effective manner to meet the needs and expectations of the people of North Dakota.
-

Critical Issues

- 1 None.
-

Performance Measures

Performance measures have not been established.

Program Statistical Data

The 67th Legislative Assembly met beginning in January 2021 for 76 legislative days and 117 calendar days.

Explanation of Program Costs

Salaries and wages:

- The budget request is based on a five legislative day organizational session and a 77 legislative day 2025 Legislative Assembly.
- Salaries for legislators are included at \$203 per day during the legislative session, a \$10 per day increase based on a 2 percent increase the first year and a 3 percent increase for the second year of the 2023-25 biennium.
- Monthly compensation of \$548 per month for the first year of the biennium and \$564 per month for the second year of the biennium based on a 2 percent increase the first year and a 3 percent increase for the second year of the 2023-25 biennium.

- Health insurance coverage for 133 legislators is included.

Operating expenses:

- Lodging for legislators during the 2025 regular session is included at \$1,852 per month, a \$19 increase from the \$1,833 budgeted amount in 2021-23.
- Travel is provided to and from the organizational session and for 16 round trips per legislator during the regular session.
- Funding to maintain and operate legislative computer systems is included.

NCSL:

- The increase in North Dakota's share of NCSL dues is \$11,737, for total dues of \$283,070 for the 2023-25 biennium.

Program Goals and Objectives

The Legislative Assembly's objective is to determine policy and make laws for state and local government, to define crimes and punishments, to create and control state agencies, to tax and spend, to provide for public services, to regulate the affairs of local governments, to regulate many facets of business relations and property rights, and to provide for the licensing of numerous professionals.

Statutory Authority

The principal statutory language authorizing the responsibilities and functions of the Legislative Council is contained in North Dakota Century Code Chapter 54-35. Statutory authority relating to the organizational session of the Legislative Assembly is located in Chapter 54-03.1. Additional statutory references to the Legislative Council are located in numerous places in the North Dakota Century Code.

Agency Description

The Legislative Management consists of 17 legislators. The committee oversees the interim activities of the legislative branch, conducts studies, monitors activities of the other branches of government, provides oversight of matters of interest to the legislative branch, makes arrangements for legislative sessions, and recommends legislation to the Legislative Assembly. The Legislative Council, consisting of a group of professional and clerical staff, provides administrative, research, analysis, drafting, and technical support services for the legislative branch.

Agency Mission Statement

The Legislative Management is to oversee activities of the legislative branch when the Legislative Assembly is not in session, to fulfill its statutory mandates, and to assist the Legislative Assembly in performing its constitutional responsibilities. The Legislative Council is a group of professional and clerical staff working to meet the research, analysis, and drafting needs of the Legislative Assembly and Legislative Management through its general and administrative division, legal division, fiscal division, and information technology division.

Major Accomplishments

1 The Legislative Council assisted the Legislative Assembly in completing its legislative responsibilities within its constitutional limits.

Critical Issues

1 None.

Performance Measures

The Legislative Council has not developed formalized performance measure data.

Program Statistical Data

General and Administrative Services - The administrative services division of the Legislative Council provides administrative, library research, clerical, and other technical support services to the other divisions of the Legislative Council and the Legislative Assembly.

Legal Services - The legal services division consists of the Legal Division Director, Code Revisor, and attorney positions. The legal services division provides legal research, bill drafting, and legal advice for legislators, legislative committees, and other members of the Legislative Council staff.

Fiscal Services - The fiscal services division consists of the Legislative Budget Analyst and Auditor, Assistant Legislative Budget Analyst and Auditor, and fiscal analysts. The fiscal services division provides analyses, research, and other information regarding governmental finance and fiscal policies and processes for legislators, legislative committees, and other members of the Legislative Council staff.

160 Legislative Council

Agency 160

IT Services - The IT services division of the Legislative Council provides information technology services to the other divisions of the Legislative Council and the Legislative Assembly.

Explanation of Program Costs

General and Administrative Services - The salaries and wages for 16 FTE positions; travel expenses for administrative committees and other travel of legislators and staff; information technology expenses for the operation and development of legislative computer systems; and contract costs for professional services to aid committee studies.

Legal Services - The salaries and wages for eight FTE attorney positions and interim committee meeting costs.

Fiscal Services - The salaries and wages for eight FTE fiscal positions and interim committee meeting costs.

IT Services - The salaries and wages for twelve FTE information technology positions.

Program Goals and Objectives

General and Administrative Services - The administrative services division approves payments necessary to finance the Legislative Assembly operation and the operation of the Legislative Council; provides research and library resources to the Legislative Assembly and to the Legislative Council staff; provides the necessary clerical services for the staff to prepare its research, analyses, and bill drafting documents; provides overall management supervision for the division itself and other divisions of the Legislative Council; and makes the administrative preparations for each biennial legislative session.

Legal Services - The goals and objectives of the legal services division include to draft accurately and completely, on a timely basis, all legislation requested by members of the Legislative Assembly, its standing committees, and interim committees of the Legislative Management; provide thoroughly researched memoranda in response to legislative requests for legal research; provide legal advice to persons and organizations in the legislative branch; ensure that the statutes of North Dakota are current and constantly revised as necessity dictates; oversee the publication of the North Dakota Century Code, Session Laws, and Administrative Code; courteously and competently handle requests for interpretation of legislative intent.

Fiscal Services - The goals and objectives of the fiscal division are to provide the Legislative Assembly the assistance it needs to fulfill its responsibilities to appropriate sufficient funds for the operation of state government and to provide by law for the protection and efficient use of public funds and other assets and resources of the state.

IT Services - The IT division provides the necessary information technology systems to the Legislative Assembly and the Legislative Council, upgrades those systems, and develops new systems.

Statutory Authority

ND Constitution, Article 6, Judicial Branch, Sections 1-13, Chapters 27-02, 27-03, 27-04, 27-05, 27-05.2, 27-06, 27-17, 27-20, 27-20, 27-23, North Dakota Century Code; North Dakota Rules of Disciplinary Procedure.

Agency Description

The North Dakota judicial system is comprised of the Supreme Court, district courts, municipal courts and the intermediate court of appeals, when convened. The juvenile court is a division of the district court. These courts provide the forum for the resolution of litigation in an orderly, timely manner.

The North Dakota Supreme Court is the highest court for the State of North Dakota. It has two major types of responsibilities -- adjudicative and administrative. It is primarily an appellate court with jurisdiction to hear appeals from decisions of the district courts. The Court also has original jurisdiction authority and can issue such original and remedial writs as are necessary. In its administrative capacity, the Court is responsible for ensuring the efficient and effective operation of all courts in the state, maintaining high standards of judicial conduct, supervising the legal profession and promulgating procedural rules.

District Courts are the state trial courts of general jurisdiction. Among the types of cases they hear are civil, criminal, domestic relations, small claims, and probate. District Courts also serve as the Juvenile Courts in the state with original jurisdiction over any minor who is alleged to be delinquent, or deprived. In some districts, judicial referees have been appointed to preside over juvenile, child support enforcement and domestic relations proceedings, other than contested divorces. District Courts are also the appellate courts of first instance for appeals from the decisions of many administrative agencies and for criminal convictions in Municipal Courts. There are 52 District Court Judges in North Dakota.

Agency Mission Statement

The mission of the North Dakota judicial system is to provide the people, through an independent judiciary, equal access to fair and timely resolution of disputes under law.

Major Accomplishments

-
- 1 Mandated use of electronic filing.

 - 2 Provided web-based access to court records.

 - 3 Implemented rules to expedite appeals of termination of parental rights cases.

 - 4 Revised the rules of criminal procedure.

 - 5 Mandated greater use of alternative dispute resolution processes in district court.

 - 6 Implemented mediation process in Supreme Court.

 - 7 Collected fines/fees through state tax intercept.

 - 8 Implemented self-help center for litigants.

 - 9 Implemented ethics training for interpreters.

 - 10 Expanded interactive television.

 - 11 Expanded digital audio recording.

Major Accomplishments

-
- 12 Implemented interactive phone payment system.

 - 13 Implemented web payment system.

 - 14 Implemented paper on demand filing system.

 - 15 Implemented expedited pre-filing mediation for custody and visitation issues.

 - 16 Implemented streamlined Supreme Court procedures.

Critical Issues

-
- 1 Developing strategies for delivering judicial services given the changing demographics of the state.

 - 2 Utilizing technology to deliver judicial services more efficiently.

Performance Measures

The Supreme Court Docket System (SCDS) is used to provide management information for all Supreme Court cases.

A Unified Court Information Management System (Odyssey), Juvenile Case Management System (JCMS) and a Jury Management System are all information systems which provide information for managing district court operations.

The judiciary is constantly monitoring its performance regarding delivering judicial services. Some of these performance measures include --

Civil, criminal and juvenile docket currency standards; Jury yield and juror utilization statistics; staffing standards; and case data entry time standards.

Program Statistical Data

Supreme Court:

Total case filings were 346 in 2021 as compared to 337 in 2020.

Total civil cases filed were 238 in 2021 as compared to 236 in 2020 (civil matters accounted for 69 percent of the total caseload).

Family-related appeals increased 56 percent as compared to 2020. Juvenile appeals, including delinquent and unruly and termination of parental rights, increased 71 percent as compared to 2020.

Total criminal cases filed were 108 in 2021 as compared to 101 in 2020 (criminal matters accounted for 31 percent of the total caseload).

Matters involving drugs and driving under the influence decreased 29 percent as compared to 2020. Matters involving assault, homicide, sexually related offenses, and felonies increased 6 percent as compared to 2020.

Oral argument was scheduled in 242 cases. Approximately 30 percent of those arguments were waived, in whole or in part by either parties or the Court, and submitted on the briefs and the record.

The Justices authored 278 majority opinions, a 3 percent increase from 2020. An additional 61 separate concurrences and/or dissents were written.

In 2021, 20 percent of cases disposed included at least one self-represented party.

District Court:

Total district court filings were 159,127 in 2021 as compared to 154,812 in 2020.

Civil filings decreased by 414 or 1.3 percent in 2021 with total case filings of 31,110.

Total criminal filings increased by 0.7 percent from 2020 to 2021 with 27,553 cases filed compared to 27,354. Felony filing increased by 0.6 percent, misdemeanors decreased by 1.2 percent and infractions increased by 19.3 percent. Misdemeanors made up 63 percent of total criminal filings, felonies 29 percent and infractions 8 percent.

Administrative traffic filings increased by 4,498 (4.8 percent) from 2020. These cases make up 62 percent of the overall caseload; however, they require little judicial involvement. The processing time required impacts court clerk personnel almost exclusively.

Total referrals to juvenile court were 9,514 in 2021 compared to 8,877 in 2020.

Judicial Conduct Commission and Disciplinary Board:

The Disciplinary Board System provides information to assist with tracking disciplinary measures against attorneys. In 2021 there were 133 new complaints filed against attorneys, which is a 27 percent increase from 2020.

The Judicial Conduct Commission was established in 1975 to receive, evaluate and investigate complaints against any judge in the state. In 2021 there were 34 new complaints filed against judges. Of this amount 27 were against 22 District Court Judges, 2 were against 1 Municipal Judge, 4 were against 1 Judicial Referee and 1 was against 1 Supreme Court Justice.

Explanation of Program Costs

The requested funds are necessary for the operation of the Supreme Court, district courts and Judicial Conduct Commission and Disciplinary Board.

Program Goals and Objectives

The Supreme Court is the highest court of the state. It has general supervisory and administrative authority over all other courts. This authority covers all judges and every court in the state and all officers serving the courts.

The district court is a trial court where cases are heard for the first time. There are eight judicial districts, and they have original jurisdiction in all cases, both civil and criminal. The district courts also have original jurisdiction over juvenile matters. The district courts also hear appeals and transfer cases from municipal courts.

The Judicial Conduct Commission and Disciplinary Board investigates and addresses complaints against judges and attorneys.

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The court system has a number of computer systems necessary for court operations, including the new juvenile court management system and Supreme Court docket systems. In addition, a significant amount of IT equipment is necessary for court including audio and visual equipment. There has been a significant increase in the cost of hardware, software and maintenance agreements. The budget request reflects these cost increases.

Necessary resources for implementation (including FTE's)*: No few FTEs.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is requested.

Who is served and impact of not funding*: The information technology funding is necessary for the operations of the Judicial Branch.

Is this a Large IT project? No

Is this request for a new program or service? No

180 Judicial Branch

Agency 180

Request explanation and justification (include any statutory authority)*: Adds funding for the Supreme Court Law Library for additional users of the Westlaw District Court and Westlaw Patron Access contracts. Provides \$22,000 to purchase Thomsen Reuters North Dakota and Federal Rules sets and \$46,800 for Bloomberg e-research.

Necessary resources for implementation (including FTE's)*: No new FTEs.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is requested.

Who is served and impact of not funding*: The funding is for legal research subscriptions used in operations of the court system.

Jury costs (Priority: 05)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Payments for the two remaining participants in the old judge’s retirement system pursuant to NDCC Chapter 27-17. The funding increase correlates to the percentage salary increase provided to District Court Judges.

Necessary resources for implementation (including FTE's)*: No new FTEs.

180 Judicial Branch

Agency 180

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is requested.

Who is served and impact of not funding*: There are only two remaining participants within the system. The average age of the participants is 90.

Rural Attorney Recruitment Program (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	36,000	-	36,000	0.00	36,000	-	36,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	36,000	-	36,000	0.00	36,000	-	36,000	0.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Adds funding for the Supreme Court contribution to the rural attorney recruitment program pursuant to NDCC Section 27-02.2-06. An attorney agreeing to practice in rural counties or municipalities is eligible to receive an incentive payment of \$45,000 to be paid in five equal annual installments. The county or municipality served by the attorney is provide 35 percent, the ND State Bar Foundation is to pay 15 percent and the Supreme Court is responsible for the balance. No more than four attorneys may participate in the program at any one time.

Necessary resources for implementation (including FTE's)*: No new FTEs.

Are resources being redirected or are they new or additional (including FTE's)*: This program was established by new legislation in 2021. There was no appropriation provided, thus the recruitment payments were paid from within other budget authority.

Who is served and impact of not funding*: Program serves rural communities.

Department of Justice Grant (Priority: 09)

180 Judicial Branch

Agency 180

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In 2022 the North Dakota Court System was awarded a \$998,302 grant from the Department of Justice for a 3-year study and implementation project to reduce delay in criminal case processing. The National Center for State Courts is serving as the primary consultant and research arm for the project. The request is for one-time funding for the final year of the grant.

Necessary resources for implementation (including FTE's)*: A three year federal DOJ grant was received for the one-time project. No General Fund moneys is requested. A temporary grant coordinator was hired to assist with implementation of the grant.

Are resources being redirected or are they new or additional (including FTE's)*: New funding is requested. The project will not continue after the 2023-25 biennium.

Who is served and impact of not funding*: The citizens of North Dakota.

Judge's Salary Increase (Priority: 10)

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The cost to provide the Supreme Court Justices and District Court Judges with a July 1, 2023 salary increase of 20% and a July 1, 2024 salary increase of 15%. Salaries for the Justices and Judges are based on NDCC Sections 27-02-02 and 27-05-03.

Necessary resources for implementation (including FTE's)*: No new FTEs.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding requested.

Who is served and impact of not funding*: The citizens of North Dakota.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Pursuant to State Court Policy 160, the salary for judicial referees is 80% of the District Court Judge salary. The funding request would increase the salary for the 5 referees to 80% of the proposed 2023-25 judge salary.

Necessary resources for implementation (including FTE's)*: No new FTEs are requested. Request applies to the 5 current FTE referees.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is requested based on the increase provided to judges.

Who is served and impact of not funding*: The referees serve the residents of North Dakota.

New FTE Requests (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	405,952	-	405,952	2.00	416,240	-	416,240	2.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The proposal adds the following 23 new District Court FTEs:

180 Judicial Branch

Agency 180

1 FTE judge and 1 FTE staff attorney in the NECJD (associated with judge request);

1 FTE deputy clerk in Grand Forks County;

2 FTE judges and 2 FTE staff attorneys in the ECJD (associated with the requested judges);

7 FTE deputy clerks in Cass County;

1 FTE judge and 1 FTE staff attorney in the SCJD (associated with the judge request);

2 FTE deputy clerks in Burleigh County;

1 FTE deputy clerk in Morton County;

1 FTE staff attorney in the NCJD;

1 FTE staff attorney in the NWJD; and

2 federally funded Court Improvement Program positions (the request is to convert 2 long-time temporary positions to full-time equivalent positions).

In addition, the request adds 1 FTE Assistant State Court Administrator within the Supreme Court.

Necessary resources for implementation (including FTE's)*: A total of 24 new FTEs are requested. The CIP coordinator and data analyst are current temporary positions funded with federal funding. The two positions will continue to be federally funded, but the request is to convert to FTEs.

Are resources being redirected or are they new or additional (including FTE's)*: New funding is requested. Federal CIP funding of \$342,290 is being redirected from temporary to permanent salaries (see Federal CIP temporary positions to FTEs adjustment).

Who is served and impact of not funding*: The citizens of North Dakota who utilize the court system.

Federal CIP temporary positions to FTEs (Priority: 13)

180 Judicial Branch

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Removes federal Court Improvement Program funding for two long-term temporary employees as request is to use the funding to convert the positions to federally funded FTEs (see FTE request decision package).

Necessary resources for implementation (including FTE's)*: The budget request is for the two current employees who have been temporary positions for several years to be made full-time positions. If the request to make the positions full-time is not approved, the request is to reinstate the authorization for the temporary salaries.

Are resources being redirected or are they new or additional (including FTE's)*: Savings is being redirected from temporary to permanent salaries.

Who is served and impact of not funding*: The federal Court Improvement Program objective is to improve the legal process of foster care cases with emphasis on cases where children were adjudicated as in need of protection or services and placed in out-of-home care.

Travel and professional development (Priority: 14)

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Allows for increases in in-state mileage and lodging rates. Restores out-of-state training and education budget to pre-pandemic levels.

Necessary resources for implementation (including FTE's)*: No new FTEs.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is requested due to increase in mileage and lodging rates. Additional funding is requested for out-of-state education opportunities (primarily for judges and court administrators) that were significantly reduced due to the pandemic and budget restrictions.

Who is served and impact of not funding*: The funding is requested to better serve the residents of North Dakota.

180 Judicial Branch

Agency 180

Juvenile Court Services programs (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	394,774	-	394,774	0.00	394,774	-	394,774	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	394,774	-	394,774	0.00	394,774	-	394,774	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The juvenile court services budget request adds temporary youth coordinators to provide youth cultural achievement activities with minority youth, assist with monitoring the intensive supervised probation caseload and monitoring activities with youth. The budget request for the youth coordinators is \$495,000 which is partially offset by not contracting with providers for youth cultural achievement programs (\$252,000). There is an increase in restorative justice program costs of \$144,476. The total juvenile court services budget request is \$1,550,832 or an increase of \$394,774 as compared to the current budget.

Necessary resources for implementation (including FTE's)*: Youth coordinators will be hired as temporary employees to provide juvenile services when needed.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is requested, however the increase is partially offset by a reduction of \$279,702 in the budget for contracted juvenile program providers.

Who is served and impact of not funding*: The program serves youths who enter the juvenile justice system.

Family Mediation Program (Priority: 17)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

180 Judicial Branch

Agency 180

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Increases funding for family mediation program. Mediators are currently paid \$170 per hour for up to six hours per case. The budget request would allow for an increase in the mediator’s hourly rate to \$220.

Necessary resources for implementation (including FTE’s)*: Additional funding for contracted mediators. No FTEs.

Are resources being redirected or are they new or additional (including FTE’s)*: Additional resources.

Who is served and impact of not funding*: The mediation program is designed to minimize family conflicts, encourage shared decision-making, and support healthy relationships and communication among family members by trying to resolve custody and visitation disputes through mediation.

Office equipment and furniture (Priority: 18)

Statutory Authority

North Dakota Century Code Chapter 54-61.

Agency Description

The North Dakota Commission on Legal Counsel for Indigents is an executive branch agency that consist of a statutorily created board of seven persons appointed from various entities serving staggered terms. The agency is responsible for constitutionally and statutorily mandated services to individuals in the state who financially qualify for indigent defense services in accordance with eligibility requirements. The Commission utilizes eight regional public defender offices and private attorneys with contracts to provide services.

Agency Mission Statement

The mission of the North Dakota Commission on Legal Counsel for Indigents is to provide high quality, professional, and effective legal representation to eligible clients, consistent with the guarantees of the constitutions of the United States and North Dakota, and applicable North Dakota statutes and rules, at reasonable cost to the community.

Major Accomplishments

-
- 1 Handled a record number of 16,104 case assignments in FY 2021. Monitored case load and addressed fluctuation in need by adjusting contracts accordingly.
 - 2 Continued to work with Pre-Trial services to expand services to eligible clients in North Dakota, decreasing the number of days an individual spends incarcerated in a pre-trial status.
 - 3 Provided training at no cost to our attorneys across state. Encouraging training through various mediums throughout the year.
-

Critical Issues

-
- 1 It remains a priority to continue to recruit and train attorneys interested in providing indigent defense services. However, it is difficult to recruit attorneys to provide indigent defense services at the rate of \$75 per hour. The rate is significantly less than an attorney can earn in private practice and significantly less than attorneys are paid to handle indigent defense cases at the federal level. The agency continues to try and find ways to address the employee turnover rate. We have conducted a salary survey and see we are drastically behind our counterparts in other state and county government positions. This has caused not only a difficulty in keeping employees, but we are struggling to get individuals to apply for our jobs. We constantly monitor case loads and adjust our contracts and staffing levels accordingly. It is essential to the mission of the agency to keep an attorney, staff or contractor from burnout due to overbearing caseloads. We strive to improve the quality of services provided to our indigent clients through mentoring, training and education of counsel.
-

Performance Measures

The Commission oversees the administrative office and evaluates the Executive Director, who, in turn, evaluates staff of the administrative office and supervising attorneys of the public defender offices (after the Supervising Attorney performs his/her evaluations of the office staff). Attorneys for the agency must meet standards provided in the Rules of Professional Conduct and State Bar Association of North Dakota.

188 Legal Counsel for Indigents

Agency 188

Attorneys contracted with our agency must meet the Minimum Performance Standards as adopted by our agency, as well as standards provided in the Rules of Professional Conduct and State Bar Association of North Dakota. Attorneys contracted with our agency must provide to us updated proof of malpractice insurance as well as any disciplinary complaints. They also must maintain their license to practice law and stay current in their case reporting duties.

Program Statistical Data

The contract attorneys in North Dakota are assigned roughly 68% of our total cases in a year's time. The full-time public defenders handle the remaining 32% of the cases. We assign approximately 15,000 cases a year throughout the state of North Dakota, with the majority of those cases being criminal cases, next followed by juvenile court assignments.

Explanation of Program Costs

The majority of costs for our program include fees for hourly contract attorneys (who handle conflict cases), monthly fees paid to contract attorneys, and salaries and benefits for the agency's 40 full-time employees and about 5 temporary employees. Other significant costs would include the administrative costs of running the offices, IT costs, case-related travel for attorneys, and support services (such as medical experts, private investigators, and mental evaluations when necessary for adequate defense of the case). We also have costs for statutorily mandated training.

Program Goals and Objectives

The goal of our program is to provide quality licensed counsel for indigent persons who qualify for counsel in accordance with adopted agency standards and policies. (We utilize the Federal Poverty Guidelines in our indigency determinations). If a person earns more than 125% of the Federal Poverty Guidelines, then he or she will most likely not qualify for appointed counsel. (There are some extenuating factors to consider). Our goal is to have our attorneys meet performance guidelines and rules of professional responsibility in their legal representation of their client to insure that the client is adequately represented in the court system. We also require our attorneys to attend relevant trainings to improve upon their skills.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Commission on Legal Counsel for Indigents is requesting equity funding to increase employee salaries to stem turnover and create interest in employment. The Commission conducted a salary survey of our salaries against like government agencies that compete for our talent: state’s attorney offices, the district and supreme court, and other government agencies. Upon conducting the review, it is evident the Commission continues to lag. Our biggest competition for attorneys is in prosecutor offices. We have lost several attorneys over the last few years who have left our employ to go work at a states’ attorney office and make more money. The American Bar Associations 10 principles of a Public Defense Delivery System Principle 8 suggests the need for parity for resources between defense counsel and prosecution. This is not the case in North Dakota.

Necessary resources for implementation (including FTE’s)*: The funding listed is the only resources needed for implementation.

Are resources being redirected or are they new or additional (including FTE’s)*: These would be new resources.

Who is served and impact of not funding*: Failure to address this issue in the past few sessions when requested has led to the agency falling even further behind. We have several positions we are not even receiving applicants for because of our pay in comparison to prosecutors. As case numbers and the difficulty in cases

188 Legal Counsel for Indigents

Agency 188

continues to climb, we are nearing a point where we will not have sufficient attorneys to cover the cases we are constitutionally obligated to. In this event, the court cases will come to a screeching halt as defendants may not be tried and or convicted if they exercise a right to counsel. We are a constitutionally mandated service found with in the bill of rights in the sixth amendment.

Increase Legal Fee Rate (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	630,453	-	630,453	0.00	630,453	-	630,453	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	630,453	-	630,453	0.00	630,453	-	630,453	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Commission on Legal Counsel for Indigents is statutorily required to contract for public defense services at a rate of at least 50% of the biennial case load. These contracts have paid a rate of \$75 per hour since 2012, which was the last increase. The Commission on Legal Counsel for Indigents sets the contract rate based upon funding received from the legislature. The Commission has requested in previous budgets to increase this amount to be more in line with hourly rates offered by other government entities in North Dakota. The Commission recently evaluated our hourly rate as it compares to that paid by municipal courts and federal courts in North Dakota. The U.S. District Court pays attorneys at the rate of \$158 per hour in non-capital cases. This is more than double what the Commission is funded to provide. Further, many municipalities in North Dakota now pay more in hourly rate than the Commission.

Necessary resources for implementation (including FTE's)*: Funding

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: Failure to increase the funding to support a rate increase has caused the Commission even more difficulty in finding attorneys willing to provide services. As contractors, attorneys who provide services are required to cover much of the overhead associated with providing services. As the cost of goods and services has increased significantly, since 2012, the rate we pay on contracts has not. Once again, we are at a time in North Dakota where we are perilously close to failing our mission. We need support. The increase of \$5 per hour would cost approximately \$630,453 per biennium.

Total	488,092	-	488,092	3.00	519,113	-	519,113	3.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Commission on Legal Counsel for Indigents seeks to add investigators to its staff. The mandate placed upon our agency is to provide effective representation to clients when there is a constitutional, statutory, or ruled based right to counsel. Investigators assist attorneys by investigating and analyzing cases, locating and interviewing witnesses, locating and gathering records, and serving subpoenas. Currently, every prosecuting attorney in North Dakota has a police force, sheriff's office, or other state and federal law enforcement they can have conduct follow up investigation on a case. Our public defenders do not have these persons in house. To provide constitutionally effective services as mandated by case law, we have allowed our attorneys to attempt to hire investigators in the private sector. However, we are forced to pay them only \$65 per hour as private attorneys who contract to handle cases are only paid \$75 per hour. This has caused extreme difficulty in finding investigators.

Necessary resources for implementation (including FTE's)*: Funding and 3 FTE

Are resources being redirected or are they new or additional (including FTE's)*: additional funding

Who is served and impact of not funding*: The Commission is one of the only state-run public defender agencies that does not employ full time investigators on staff. All federal public defenders' offices have them. Our neighbors in Montana and Minnesota have state run systems that hire investigators. Case loads and demands of the Court prohibit attorneys from having necessary time to conduct through investigations. If investigations are not completed, cases do not move forward. This leads to a backlog of cases in court greatly delaying justice.

Statutory Authority

ND Constitution Article IV, Section 13 and Article X, Section 26; North Dakota Century Code Chapters, 15-39.1, 21-10 and 54-52.5

Agency Description

The Retirement and Investment Office (RIO) administers two programs: the investment program overseen by the State Investment Board (SIB); and the retirement program for ND educators overseen by the Teachers’ Fund for Retirement Board (TFFR). RIO’s mission has continued to evolve since its creation by the 1989 Legislative Assembly. Originally the agency was formed merely to gain economic efficiencies by capturing the administrative and investment cost savings in combining the management of the SIB investment program and the TFFR retirement program. The SIB and TFFR board are both fiduciary Boards; and both board members and agency staff have fiduciary obligations related to the programs. Both programs have experienced robust growth within the preceding decade. The investment program has grown to approximately \$19 billion in assets under management on behalf of more than 25 client funds; and the retirement program serves over 20,000 members with more than 200 Kindergarten through 12 grade employers within the state. Both the investment and retirement programs are currently undertaking transformational initiatives: an in-state investment initiative for the investment program and a pension system modernization project in the retirement program. Our governing boards are respectively reviewing and pursuing governance changes to support continued program growth.

Agency Mission Statement

1. State Investment Board (SIB) clients receive high quality and cost-effective investment services directed at meeting their written financial goals under their Investment Policy Statements and the Prudent Investor Rule.
2. SIB clients receive investment returns consistent with their written investment policies and market variables.
3. Potential SIB clients have access to information regarding the investment services provided by the SIB.
4. The Teachers’ Fund for Retirement (TFFR) Board will administer a comprehensive retirement program that provides North Dakota public educators with a foundation for retirement security.
5. TFFR benefit recipients receive their retirement benefits in a cost effective and timely manner.
6. TFFR members have access to information which will allow them to become knowledgeable about the issues and process of retirement.
7. SIB clients and TFFR benefit recipients receive quality services from the boards and staff of the office.

Major Accomplishments

-
- 1 Created and began implementation of a new agency strategic plan identifying core priorities and transformational initiatives.
 - 2 Reorganized agency to achieve greater economies of scale and support new strategic plan.
 - 3 Developed and implemented intra-agency communication and training plan to support organizational culture as a core agency priority.
 - 4 Posted, filled and onboarded ten new employees in the last fiscal year including two interns and three part time employees for an agency with twenty-five approved FTE’s.
-

Major Accomplishments

- 5 Assisted governing boards with the creation of three new standing committees to create governance that supports program growth: a Governance & Policy Review committee of the SIB; an Investment committee of the SIB; and a Governance & Policy Review committee of the TFFR Board (previously and ad hoc committee, standing committee status pending second reading).
- 6 Continue to implement an in-state investment initiative with the creation of the ND Growth Fund, increased funding of the BND match loan program, and supporting a Legacy Fund Asset Allocation Study project commissioned by the Legacy and Budget Stabilization Advisory Board.
- 7 Completed two out of three phases of the TFFR Pension Administration System Modernization Project (TFFR "Pioneer" Project), with the third and final phase underway.

Critical Issues

- 1 The future uncertainty to ND's state budget as the oil industry experience changes and the evolving mission of the Legacy Fund requires increasing the innovation and agility of the investment program.
- 2 The landscape of the K through 12 education environment has changed as a result of the pandemic and the retirement program must be responsive to help support demands on employers resulting from teacher shortages.
- 3 The new strategic plan for the agency focuses on transitioning from a "business as usual" reaction mode to an "innovative and agile" proactive mode; which requires prioritizing communication, infrastructure, organizational culture, talent management, and technology enables processes.
- 4 The investment program is exploring alternative program structures such as the benefits of internalizing some investment operations to further support investment returns, mitigate risk, and achieve greater economies of scale for client funds.
- 5 The retirement program continues to undergo a pension administration system modernization project which will transform the member and employer experience, improve risk management efforts, program compliance, and provide a better return on investment of staffing.

Performance Measures

TFFR

The TFFR Board collaborated with its actuarial consultant to create an annual Plan Management Policy Review and Scoring system that helps to evaluate the health of the plan and support the TFFR Board in its fulfillment of its fiduciary obligations. The most recent score based on the July 1, 2021 actuarial valuation ranks the TFFR plan at a 9 out of 14 (with 14 being the best), indicating the plan is well positioned to meet its funding objectives over time. The score increased from a 6 out of 14 based on the July 1, 2020 actuarial valuation. Member and employer customer satisfaction is measured through various program evaluations and ranked 3.9 on a 4.0 scale in 2021. As part of the TFFR "Pioneer" Project, the agency is identifying additional guidelines to measure future performance.

SIB

SIB Governance and SIB Client Investment Policies state the following:

1. SIB clients should receive investment returns consistent with their written investment policies and market variables, in a cost effective manner and under the Prudent Investor Rule;
2. Potential SIB clients have access to information regarding the investment services provided by the SIB; and

3. The client’s fund rate of return, net of fees and expenses, should be compared to the client’s policy benchmark over a minimum evaluation period of 5 years (in addition to other risk related performance metrics).

The following table summarized the results of our four largest SIB clients for the 5-years ended March 31, 2022, noting the SIB oversees the investment management of 26 different client portfolios including the Legacy Fund, TFFR, PERS and WSI (Workforce Safety & Insurance).

Five-Years Ended March 31, 2022

	Legacy Fund	PERS	TFFR	WSI
Actual Net Investment Return	7.98%	9.89%	9.79%	5.93%
Policy Benchmark Return	7.71%	9.59%	9.71%	5.24%
Net Excess Return Above Benchmark	0.27%	0.30%	0.08%	0.69%

The SIB’s ability to earn above benchmark returns is conservatively estimated to have generated over \$210 million of incremental income for our SIB clients over the last 5-years (e.g. SIB client investments of \$10 billion x 0.20% of “Net Excess Return” = \$20 million/year x 5 years).

Monthly financial statements and investment performance reports are prepared and distributed for each of the 26 funds. This involves monitoring and reporting activities on 42 outside money manager organizations and a total of 135 investment portfolio accounts at the SIB’s master custodian bank.

Total gross costs, including administrative, money manager, custodian, and consultant fees, and excluding performance related fees for the year ended June 30, 2021, were \$86 million or 43 basis points of total average assets under management. Total fees including performance related fees were 67 basis points. All investment program costs are paid out of assets of the funds participating in the SIB’s program.

Overall investment costs, excluding performance fess, decreased from 66 basis points in 2013 to 43 basis points in 2021. The SIB’s ability to reduce fees by 0.23% since 2013 is estimated to generate approximately \$46 million per year of incremental income for our clients (based on \$20 billion of AUM).

Program Statistical Data

TFFR

(Data is as of 6/30/2021.)

The Teachers’ Fund for Retirement (TFFR) has more than 11,500 active, nearly 3,000 inactive and over 9,200 retirees and beneficiaries. The 9,200 retirees and beneficiaries receive monthly retirement, disability and survivor benefits from TFFR totaling over \$235 million annually. The Fund also distributes approximately 220 refund and rollover payments totaling approximately \$5.9 million.

There are 206 employers (school districts, counties and other state entities) that report retirement contributions to TFFR on a monthly basis. The Fund deposits the daily collections in the Bank of North Dakota. The member and employer contributions average \$16 million per month or \$192 million per year.

TFFR processed approximately 401 new retirements, 1,004 new membership enrollments, and 188 deceased members in the last fiscal year. Annually, nearly 600 teachers and administrators participated in TFFR outreach programs and educational sessions. The program continues to explore options to increase participation through the use of virtual and digital formats. Attendance levels were lower in the previous year than years past due to the effects of the pandemic.

Annual statements of account are sent to non-retired members and retired members. Approximately 9,700 1099R tax forms are prepared and distributed by TFFR to the annuitants and members who withdraw their account balance each year. An annual financial report is prepared each year.

SIB

Total assets under management have more than doubled since June 30, 2013; from \$7.45 billion to nearly \$19 billion as of March 31, 2022.

Monthly financial statements and investment performance reports are prepared and distributed for each of the 26 funds. This involves monitoring and reporting activities on 42 outside money manager organizations (an increase from 39 last biennium) and a total of 135 investment portfolio accounts (an increase from 126 last biennium) at the SIB's master custodian bank.

Explanation of Program Costs

TFFR

The Retirement and Investment Office (RIO) serves two important program boards: the State Investment Board (SIB) and the Teachers' Fund for Retirement (TFFR) Board. The TFFR Board is responsible for the TFFR retirement program. TFFR is a qualified defined benefit public pension plan for North Dakota public school teachers and administrators.

This request is all special funds. Funding for administration of the TFFR Pension Plan comes from member and employer contributions and investment earnings.

1. Salary represents funding for 11.15 FTEs responsible for administering the TFFR retirement program, down from 11.70 previously due to agency restructuring and NDIT unification.
2. The operating funds are to administer the TFFR retirement program. Significant object code expenditures are NDIT data processing, IT contracts, building rent, staff and board travel and professional development. Carry-over funding for the Pension Administration System Modernization Project (TFFR "Pioneer" Project) is included and the anticipated implementation date is 4th quarter 2024. New costs associated with the TFFR "Pioneer" Project are included in a decision package including temporary costs due to the increased workload and agency partner assistance (such as Procurement and NDIT unification costs) required to implement and some new ongoing cost associated with the software solution.
3. Historically, contingency funds were requested in case of unexpected budget shortfall, generally related to turnover of executive staff and the need to perform an executive search. No contingency funds are included in the base budget request for 2023-25, though a contingency funding request is included as a decision package request. Due to restructuring/reorganization of the agency in the last biennium some FTE's were reclassified and the corresponding salaries and equity adjustments for other Team members increased the salary line in the base budget.

SIB

The Retirement and Investment Office (RIO) serves two important program boards: the State Investment Board (SIB) and the Teachers' Fund for Retirement (TFFR) Board. The SIB is responsible for oversight of approximately \$19 billion of investments for 26 different client funds including TFFR and PERS within the more than \$7 billion Pension Pool and WSI in the \$3 billion Insurance Pool in addition to more than \$8 billion in the Legacy Fund (Quarter ending March 31, 2022).

This request is all special funds. Funding for administration of the SIB Investment Program comes directly from investment clients' invested assets (both statutory and contracted).

1. Salary represents funding for 13.85 FTEs, increased from 8.3 previously, which provide all the accounting, financial and administrative support and investment performance services for the funds under management.
2. The operating funds are needed to administer the SIB investment program. Significant resources have been allocated to the in-state investment initiative and management of the Legacy Fund as a result of H.B. 1425 and H.B. 1380 (2021 Legislative Session). Significant expenditures also include building rent, staff and board travel and education, and NDIT data processing.
3. Historically contingency funds were requested in case of unexpected budget shortfall, generally related to turnover of executive staff and the need to perform an executive search. No contingency funds are included in the base budget request for 2023-25, though a contingency funding request is included as a decision package request. Due to restructuring/reorganization of the agency in the last biennium some FTE's were reclassified and the corresponding salaries and equity adjustments for other Team members increased the salary line in the base budget.

Program Goals and Objectives

TFFR

The mission of TFFR, a trust fund, is to advocate for, develop, and administer a comprehensive retirement program for all trust fund members in a manner consistent with its fiduciary obligations and approved resource allocation.

- The TFFR Board reaffirmed its commitment to evolving governance to respond to program growth by establishing a Governance and Policy Review committee that is tasked with reviewing program policies and public policy affecting statutes and administrative rules to make recommendations to the full Board for making policy or requesting changes from the Legislature.
- The TFFR program is currently in Phase 3 of 3 of a multi-year large IT Pension Administration Modernization Project (TFFR "Pioneer" Project) that will provide a better ROI for the agency and improve the member and employer experience with TFFR while aligning with state-wide initiatives to better utilize technology enabled processes.
- TFFR plan is designed to provide lifetime normal retirement benefits, disability benefits, and death benefits for ND public school educators and certain state teachers. It provides ND educators with a financial foundation for the future that includes a secure and stable retirement. This is possible due to TFFR's plan design, professional plan management, strong investment performance, and outstanding customer service.
- The TFFR plan is an important feature in the recruitment and retention of high quality teachers and administrators in North Dakota, and not lose these quality individuals to out of state programs.
- TFFR provides retirement benefits services to more than 11,500 active teachers and administrators, nearly 3,000 inactive members, and more than 9,200 retired educators and beneficiaries. Licensed staff from 206 employers participate in the plan.

TFFR investment and funding goals

- Improve the Plan's funding status to protect and sustain current and future benefits.
- Minimize the employee and employer contributions needed to fund the Plan over the long term.
- Avoid substantial volatility in required contribution rates and fluctuations in the Plan's funding status.

TFFR Service Goals

- Create and implement an enhanced Outreach and Communication Plan for our members, employers, and other stakeholder groups related to the program in general and the TFFR "Pioneer" Project specifically.
- Administer accurate, efficient, and responsive pension benefits program.
- Deliver high quality, friendly service to members and employers.

Strategic Investment Plan

1. Reaffirm our organizational commitment to the importance of continuing board education and strong board governance to create and maintain an innovative and agile investment program. The SIB has moved forward with the creation of two new standing committees within the last year to support this goal: a Governance and Policy Review committee and an Investment committee. Board member salaries are expected to increase as a result of the increase on Board and committee attendance.
2. Enhance understanding of our core goals and beliefs while enhancing overall transparency.
 - a. Remain steadfast in our commitment to the prudent use of active investment management.
 - b. Expand awareness to downside risk management which is essential to achieving our long term investment goals.
 - c. Given actual and projected growth of SIB client assets and the heightened public awareness of the Legacy Fund, align our investment platforms to promote greater clarity and efficiency in reporting and implementing client investment policies.
3. Expand RIO's influence and ability to create positive and sustainable change by building deeper relationships with existing clients, organizations and legislative leaders.
 - a. Enhance community outreach to build upon public awareness and confidence.
 - b. Develop concise presentations which highlight our overall risk, return and cost control framework including our progress towards attaining our long-term goals.
 - c. Continue to implement an in-state investment initiative and provide education and outreach efforts consistent with the roll-out of that initiative.

190 Retirement and Investment

Agency 190

4. Encourage employee participation in staff meetings, offer team members more opportunities to impact RIO's change initiatives and improve the office environment for staff and clients.
5. Enhance our internal control environment by improving use of proven risk management solutions relating to fraud risk assessments, investment risk management and overall enterprise risk management.
 - a. A robust risk management framework serves as a foundation to support a sound internal control environment and lessen downside risks.
 - b. Broaden stakeholder awareness of the challenges faced in estimating Legacy Fund earnings for future budget planning.
 - c. Evaluate and expand the efficient use of technology in our investment program activities including risk management, compliance monitoring, client satisfaction surveys, website design and communications.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Inflation in travel costs, an increase in permanent FTE's, and continued implementation of the agency strategic plan are the factors contributing to this request. Additional cost for work related travel due to both inflation and the need for continuing education of existing FTE's requires an increased allocation to this line item. Work related travel is necessary not only for investment and retirement program operations but also for continuing education for positions to maintain certifications relevant to the performance of their duties. Agency reorganization/restructuring and new strategic plan requires many employees to pursue or maintain professional certifications relevant to the performance of their duties and the associated increase in cost of agency reimbursed certifications is reflected in this proposal as well. An additional FTE for administrative support is also requested to provide assistance to the 6 new FTE's granted during the last special legislative session. Due to agency reorganization during the 21-23 biennium, FTE's were repurposed and additional salary is needed for the repurposed position. While the agency is committed to a hybrid work environment, such a work environment does require the availability of some additional office space to support the growing and increasingly collaborative teams during the implementation of aforementioned initiatives for both retirement and investment programs and the cost of some additional equipment and space is included in this proposal. Finally we are also requesting some additional funds to continue our commitment to a robust internship program within the agency and for contingency funding to support at least two executive searches during a biennium. During the last two biennium's the agency lost its top two managers in both the retirement and investment programs within 60 days of

190 Retirement and Investment

each other (respectively for each program) and while turnover of these positions is not planned in the short term, prudence requires preparing for what is not an unusual event.

Necessary resources for implementation (including FTE's)*: An additional FTE for administrative support for the additional 6 FTE's granted during the most recent special legislative session. While agency reorganization has supported growth and better utilized administrative services, we have done what we can with what we have and recognize additional support is needed. Additional funding requests are outlined above.

Are resources being redirected or are they new or additional (including FTE's)*: As noted most of the request stems from the realistic impact of inflation such that redirection is not possible. As noted the addition of administrative support comes after the agency has attempted to create efficiencies through reorganization/restructuring. Finally, the agency is asking for dedicated resources to commit to maintaining an internship program and contingency funding based on prior experience to responsibly plan for turnover in the executive staff.

Who is served and impact of not funding*: The commonality relating to the request in this decision package is that the increase in cost is directly related to maintaining the caliber of service provided to the more than 25 client funds of the investment program and more than 20,000 members and more than 200 employers of the retirement program. As noted both the investment and retirement program development and the strategic plan of the agency supports the staffing of individuals that have obtained and maintained relevant professional certifications; the cost (as opposed to the frequency) of work related travel for both program operations and education has increased due to inflation; additional administrative support is needed to support the additional FTE's granted during the prior special session; and finally dedicated resources are needed to continue to offer internship opportunities within the agency and contingency funding is needed to provided resources necessary in the event that there is turnover within the executive team. The impact of not funding is the degrading of the quality of service, and negatively impacts maintaining the expertise of the staff responsible for implementing both programs.

Pension Administration Project (Priority: 02)

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This optional package funding request seeks to support the TFFR Pension System Modernization Project (TFFR Pioneer Project) for the development and deployment of the modernized pension administration system pursuant to its authority under NDCC 15-39.1-05.2. The project is currently in its final phase involving the development and implementation of the vendor solution. While our project is currently on time with an expected completion date of 4th quarter 2024, the agency must continue to utilize its current system until the new system is ready and efficiencies can be gained. This package is intended to provide necessary interim support and resources for the agency until the new system is ready to deploy such as: an increase for

190 Retirement and Investment

Agency 190

personnel costs of existing staff as it relates to additional workload and overtime; continuing cost for temporary FTE's to support the manual processes needed to make the existing system work until it can be retired;; and the funding needed for ongoing hosting and support fees associated with the new software vendor solution.

Necessary resources for implementation (including FTE's)*: The implementation project will be completed using existing FTE's; however, continued funding for two temporary employees is necessary to sustain operations under the existing pension administration system while the new system is being developed. The current system is quite antiquated and requires significant manual data entry; these processes will be significantly improved with the new system and therefore the services of the temporary employees will no longer be needed subsequent to the launch of the new system. Overtime costs are needed for current non-exempt staff, and temporary increases for current exempt staff, due to the increased work hours and workload involved in the development and implementation of the system. It is expected that these additional costs, including limited term employee costs will be eliminated upon implementation of the new pension administration system.

Are resources being redirected or are they new or additional (including FTE's)*: The Retirement Investment Office is utilizing current staff from the Retirement Services division, Fiscal Division, Internal Audit Division and associated administrative support for the project. One part time and one full time temporary employees were hired to support continuing operations under the current pension system, and allow permanent full time employees to assist/dedicate time to implementing the new system. In addition to RIO staff, there are NDIT support and project management staff from NDIT assigned to this project and an associated increase in NDIT unification related costs for next biennium which are expected to decrease once the new pension system is fully implemented. In addition, at the recommendation of internal audit services the agency has sought to automate death auditing services as part of the pension system modernization process by transitioning from a death audit practice of utilizing one permanent FTE to search obituaries in ND newspapers to utilizing the services of a third-party vendor that searches both inside and outside the state of ND in order to recapture any overpayments to deceased members. The ROI for modernizing this part of the pension system processes is the difference between the cost of the third -party vendor and the cost associated with time spent by the permanent state employee and increased recapture capabilities.

Who is served and impact of not funding*: The 24,188 members in the Teacher Fund for Retirement are served by this project as well as the more than 200 K through 12 employers throughout the state that contribute to the fund and employ members of the fund. This project modernizes an antiquated pension administration system that not only requires significant manual operations to maintain but fails to provide a welcoming user experience for both member and employer. In the event this optional package is not funded, the Retirement Investment Office would continue using the existing pension administration system, restricting the program from making much needed improvements to processes and would require additional staff to further maintain the manual processes needed in a growing and increasing complex regulatory environment. The TFFR program would lose the already sunk cost that has been on the development of the new system as well as contractual liabilities that may be incurred for ending any vendor service and SaaS (Software as a Service) contracts presently in place for the new pension administration system.

Internal Investment Plan (Priority: 03)

State Initiative*: Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The assets under management by the RIO investment division have grown from about \$4 billion to about \$20 billion from the year 2010 to the beginning of the year 2022 and continue to grow at a high pace from investment returns and contributions to the Legacy Fund, pension plans and insurance funds. The combination of the growth of AUM, the number of individually managed funds, and the complexity of mandates such as the Legacy Fund have increased the need for staff resources, infrastructure and new scalable investment processes that can enhance the performance of client funds while reducing the net cost of management of those funds when manager fees are considered.

A recent survey by the industry recognized and respected firm, CEM benchmarking, indicates that public fund peers with similar size and investment strategies have about 11 investment FTEs compared to the currently budgeted 8; and 16 operations FTEs compared to the currently budgeted 6. There is an opportunity to create significant benefits from the scale advantages of the growth of \$20 billion of assets under management. A typical public fund with similar assets under management as RIO has more internal investment management which creates the opportunity of better investment returns while decreasing costs from the advantages of more internal management versus money placed with external managers.

Generally investment management costs fall within the scope of continuing appropriation authority granted by the legislature in NDCC 21-10-06.2; however because this proposal involves cost savings achieved by internalizing investment operations through additional permanent FTE's and infrastructure it falls within the scope of NDCC 54-52.5-03.

Necessary resources for implementation (including FTE's)*: The proposal requires five investment professionals, one operations professional and one administrative staff to manage approximately \$3 billion of assets internally. Implementing this proposal can lower the net costs for RIO investments by \$6 million per year and create opportunities for better liquidity management and rebalancing that may result in up to another \$10 million in savings per year. The net costs and opportunities grow with assets under management and with the amount of assets managed internally.

Due to the complexity of this plan we are only asking for a salary budget for one year of the biennium for these additional staff as we believe it would take significant time to receive the necessary classification approvals and fill the positions.

The market for investment professionals total rewards shows that investment professionals typically receive both a market based salary and incentive compensation even in the public sector. A well-designed incentive compensation system, based on fair criteria, can stimulate employees to deliver quality work, reach set targets, and maintain motivation and productivity. For investment managers, it provides incentives to make smart and risk-appropriate investment choices that result in an appreciation of invested assets. The incentive system also aligns the risk of the investment manager's compensation with the risk of the underlying assets being managed, thus acting as a control mechanism incentivizing good risk/return choices. Lastly, an incentive system is good for investment plan beneficiaries in that the incentive is paid when there is superior investment performance and not paid when there is not superior investment performance. As a result, a well designed incentive compensation system results in added net investment performance and reduces the overall cost of compensation by paying only when the benefits exceed the cost. The incentive compensation presented assumes a targeted bonus of 50% of salary and a max of 100% of salary and would only pay out when benefits exceed costs. This proposal is contingent on an incentive compensation plan approved by the legislature and administered by the State Investment Board.

Are resources being redirected or are they new or additional (including FTE's)*: This is a phased in proposal that seeks to create a foundation to internalize additional investment functions in future biennium's. This initial proposal seeks to achieve cost savings by moving approximately \$3 billion in AUM to internal management, however, future costs savings may be achieved in future biennium's with up to 50% of AUM moved to internal management. The net after cost estimated benefits of going to a greater portion of internal investment management and to a more sophisticated investment process is estimated at \$45 million per year as the result of

190 Retirement and Investment

Agency 190

lower fees (the savings is net after the cost of the additional FTE's and infrastructure) if up to 50% of the assets are managed internally. The decrease would be recognized within continuing appropriation expenses. The change to more internal investment would require more FTEs currently paid out of appropriated expenses. The recent CEM benchmarking survey indicates an additional 16 investment FTEs count and an additional 27 operations FTEs count required for a \$20 billion plan with the enhanced capabilities. In addition, there would be a need for additional appropriated expenses associated with the new processes. The net after cost benefit of \$45 million per year would easily justify the investment.

Who is served and impact of not funding*: All RIO client funds under management can benefit from the associated cost savings achieved by implementing some internal investment management of assets. At the present rate of growth for the program the impact of maintaining the current investment management structure results in failure to leverage client assets and achieve benefits from the scale of the program.

Statutory Authority

North Dakota Century Code Chapters 39-03.1, 52-11-01, 54-52, 54-52.1, 54-52.2, 54-52.3 and 54-52.6.

Agency Description

The Public Employees Retirement System is the administrator of several employee benefit plans for state employees and employees of participating political subdivisions. The plans include the following:

- Six Defined Benefit Retirement Plans
- Defined Contribution Retirement Plan
- Deferred Compensation Plan
- Retiree Health Insurance Credit Plan
- Group Health Insurance Plan
- Group Life Insurance Plan
- Voluntary Insurance Products (dental and vision plans)
- Employee Assistance Program
- Pretax Benefits Program (FlexComp)

Agency Mission Statement

The mission of the Agency is to design, communicate and efficiently administer a viable employee benefits program within a framework of prudent risk taking, applicable state and federal laws, and professional and ethical standards so as to provide an employee benefits package to North Dakota public employees that is among the best available from public and private employers in the upper Midwest, the most affordable for our participating employers and beneficial to the taxpayers of North Dakota.

Major Accomplishments

-
- 1 • Went out to bid to secure an investment consultant for our 457 Companion Plan and 401(a) Plan • Renewed the 457 Companion Plan and 401(a) Plan recordkeeping services with the incumbent provider • Renewed our disability consultant contract with the incumbent provider • Transitioned our Retiree Health Insurance Credit program to be on a calendar year instead of a fiscal year reporting period • Developed a request for proposal for the administration of the Retiree Health Credit program • Went out to bid for the Health plan and awarded the contract to the incumbent provider • Went out to bid for EAP services and selected four providers from which agencies can select • Went out to bid for Medicare Part D and selected a new carrier, resulting in a significant premium reduction for our members. • Renewed our Dental, Vision, and Life insurance contracts with the incumbent provider • Offered COBRA Premium Subsidies and increased dependent care limitations in accordance with the American Rescue Plan • Discontinued an underperforming mobile app by implementing fully functional and scalable portals for our employers and members • Reviewed and updated our internal policy for reviewing member accounts prior to receiving benefit payments • Reviewed and updated our policy on operating guidelines, which outlines the responsibilities of Staff and the Board • Upgraded our internal line of business application to a Mobile-View-View-Mobile platform to match the employer and member web portals • Developed an interface to replace our legacy mainframe system • Upgraded our website to a more effective and efficient platform • Secured new office space inside a state owned building • Redesigned how issues are reported in our business system • Reviewed and updated our internal employment policies and practices on background checks • Developed a policy to charge employers penalties for noncompliance with statutory requirements
-

Critical Issues

-
- 1 • Impact of federal legislation on state and local government pension plans, requiring plan modifications to remain in compliance • Maintain a sufficient rate of return on investments so current contribution rates for our retirement plans remain stable • For closed retirement plans such as Job Service, examine strategies to insure the flow of assets meets the required benefit payments over the remaining years of the plan • Continue to increase participation in the deferred compensation plan, which we feel is presently being underutilized • Impact of federal legislation on employer sponsored health plans requiring plan modifications to remain in compliance • Health plan placement and funding arrangement • Maintain an affordable health insurance plan in an environment of rising health care costs • Maintain our business application system (PERSLink) • Ability to enhance technology and maintain it at a level that allows us to continue providing services to our members in an efficient manner • As the scope of programs PERS administers expands, the ability to maintain a prudent level of financial oversight • Allocating resources to process improvement and issue resolution while still maintaining day to day operations • Maintaining a low level of staff turnover • Succession planning
-

Performance Measures

Agency Performance Measures:

NDPERS is audited annually by an independent audit firm. The agency has always received a clean, unqualified financial audit opinion. NDPERS has been awarded the Certificate of Achievement for Excellence in Financial Reporting by the Government Finance Officers Association (GFOA) for our annual comprehensive financial report (ACFR). The Certificate of Achievement is the highest form of recognition in the area of governmental accounting and financial reporting. The agency has prepared a ACFR and received this award for the last twenty three consecutive years.

We also perform electronic surveys of our membership on a weekly basis. After contacting our office, participants are provided with a 4 question survey if they have an email on file with our office. These surveys measure the courtesy and promptness of our employees, as well as the accuracy and ease of materials received from our office.

Program Performance Measures:

192 Public Employees Retirement System

Agency 192

Defined Benefit/Hybrid Retirement Plans. One of the goals of the agency is to provide benefit plans that are competitive and affordable. The agency measures this by comparing the plans administered by NDPERS to other public retirement systems, using a Public Fund Survey prepared by a national organization. This comparison shows that our retirement plans provide a competitive level of benefits. A combination of benefit reductions, as well as the potential to receive funds from the earnings of the Legacy Fund have helped put this plan back on the path to full-funding.

Health Insurance Plan. One of the goals of the agency is to provide benefit plans that are competitive and affordable. The agency measures this by comparing the health plan administered by NDPERS to other health plans, using various national surveys. This comparison shows that our health plan provides a competitive level of benefits at less than average costs. The agency also monitors performance measures relating to customer service, claims processing, call center response times, etc. to insure performance of the carrier is acceptable.

Program Statistical Data

Program Statistical Data:

RETIREMENT:

Participation in the PERS retirement programs continue to increase. Since last biennium, there was an 6.8% increase in the number of participants in the defined benefit plan and a 2.2% increase in the number of political subdivisions who participate in the defined benefit plan.

PERS Defined Benefit/Hybrid Retirement Plans

(Includes PERS, Highway Patrol, Judges, Law Enforcement and Prior Service Plans)

Non-retired Participants: 25,527

Retired Participants: 13,710

State Agencies: 97

Political Subdivisions: 361

Job Service Retirement Plan

Non-retired Participants: 2

Retired Participants: 181

State Agencies: 1

Political Subdivisions: Not eligible for this plan

State Agencies: 97

Political Subdivisions: 147

Retiree Health Insurance Credit Plan

Non-retired Participants: 20,258

Retired Participants: 13,697

State Agencies: 97

Political Subdivisions: 361

GROUP INSURANCE:

Participation in the insurance plans continues to grow, with the exception of the health plan. Since last biennium, the number of participants in the health insurance plan decreased by 0.3%, and participation in the voluntary insurance programs increased by 14.19%. The amount of coverage in force for the life insurance plan increased by 4.36%. Following are statistics on participation in each of the insurance programs.

Life Insurance

Active Members: 18,738

Retired Members: 3,216

State Agencies: 97

Political Subdivisions: 107

192 Public Employees Retirement System

Agency 192

Coverage in force: \$1.869 billion

Health Insurance

Active Members: 18,190

Retired Members: 6,835

State Agencies: 97

Political Subdivisions: 136

Total Covered Lives: 58,504

Voluntary Insurance Programs

(Includes dental and vision plans)

Active Members: 18,193

Retired Members: 7,760

State Agencies: 97

Political Subdivisions: Not eligible for these plans

Employee Assistance Program

Active Members: 15,074

Retired Members: N/A

State Agencies: 97

Political Subdivisions: Not eligible for this program

FLEXCOMP:

There has been a decrease in participation in the medical and dependent care spending accounts as well as in the annual salary reductions. Following are statistics on participation in the FlexComp program.

Medical Spending accounts: 2,298

192 Public Employees Retirement System

Agency 192

Dependent Care accounts: 399

State Agencies: 97

Political Subdivisions: Not eligible for this program

Annual salary reductions exceed \$6.23 million per year

Explanation of Program Costs

NDPERS is submitting a base budget that includes initiatives proposed by the Governor. NDPERS has spent the last two biennia trying to catch up to modern technology. This has included business system upgrades to make our member and employer portals scalable so they can be accessed on any device. This biennium we also upgraded our business system to Business Process Management (BPM), which will be a 3-4 year process in redesigning all of the internal workflows in our agency. BPM will create efficiencies in our office by automating data entry, and it will also ensure that staff drive the system as intended.

In addition NDPERS has been programming comprehensive wizards to allow every new hire, annual enrollment election, and applications for retirement benefits to be completed electronically within our member portal. Upgrades are currently being programmed to allow employers to electronically certify a temporary employee's eligibility for health insurance. Once this certification is complete, a temporary employee will be granted access in member self-service to electronically enroll in health insurance.

Over the last three years NDPERS has converted all employers that are not on the State's Central Payroll program to an ACH process in our employer portal. This has resulted in more accurate payment processing for our office, and nearly eliminated check processing in our office from our employers. In addition, we have implemented demographic inbound file processing from both the State and Higher Ed's PeopleSoft systems, and implemented a benefit enrollment outbound file on the State's PeopleSoft system. This has reduced redundant data entry for all of the State Agency employers that we have.

The salaries and wages line item accounts for 73% of the budget request for the agency and includes funding for 35.5 FTE. Funding was also included for three full-time temporary positions; all of which are currently being utilized by our agency.

Operating expenses account for 24% of the budget request. Information technology costs account for 65% of the operating expense line item. The agency's IT costs are a combination of fees paid to a software vendor to support the agency's PERSLink system, as well as fees paid to ITD for hosting, desktop support, disaster recovery, network and email access, document storage in FileNet and telecommunications. Postage, printing, office rent and operating fees and services represent 25% of the operating line item. The benefits programs administered by the agency serve over 50,000 active and retired members and over 400 employer groups, therefore, communication is a substantial portion of the printing and postage expenses.

The contingency line item accounts for 3% of the budget request.

All programs administered by the agency are funded through special funds.

Program Goals and Objectives

Defined Benefit/Hybrid Retirement Plan:

192 Public Employees Retirement System

Agency 192

- Enable career employees to care for themselves and their dependents at retirement and to provide a plan that will reduce personnel turnover and encourage career employment to high grade men and women.
- Establish a mechanism to insure that career employees can care for themselves and their dependents in retirement by maintaining the purchasing power of current retirement benefits.
- Improve the desirability of state and political subdivision employment by developing more options on how a member could access, contribute to, supplement, and draw their retirement funds.
- Insure that members will be better able to care for themselves and their dependents in retirement and to improve the desirability of state and political subdivision employment by providing incentives and rewards to members who engage in supplemental retirement savings.

Defined Contribution Retirement Plan:

- Provide an alternate defined contribution retirement plan for state employees that offers a diversified set of investment options.
- Provide information to each eligible employee in a timely manner.
- Establish investment guidelines for the funds and review their performance on a regular basis.
- Provide the members the opportunity for investment education through multiple channels such as on-site counseling, call centers and web access.

Deferred Compensation Plan:

- Provide a supplemental retirement plan that offers a diversified set of investment options that will allow employees to augment their retirement benefits.
- Establish investment guidelines for the Companion Plan funds and review their performance on a regular basis.
- Provide the members the opportunity for investment education through multiple channels such as on-site counseling, call centers and web access.
- To encourage and enroll all members who are eligible to participate in the plan.

Retiree Health Insurance Credit Program:

- Maintain adequate funding of this plan for the future, as this is now a closed plan to new hires that enrolled in the plan after January 1, 2020.

GROUP INSURANCE:

Life Insurance:

- Provide for a single, understandable and non-discriminatory life insurance plan to members at affordable premiums.

192 Public Employees Retirement System

Agency 192

- Supplement the existing life insurance program with other programs.
- Have a premium structure that is the lowest and best available.

Health Insurance:

- Provide understandable options at affordable premiums which protect public employees and their families from excessive medical expense.
- Promote positive competition through PERS or group purchasing initiatives with providers who emphasize and practice the principles of continuous quality improvement.
- Develop and maintain an information database on quality and costs.
- Provide information and assistance in community, legislative and national matters related to health care services.
- Consider modifications and improvements to the benefit plan design that can be accomplished within the constraints of available funding.
- Encourage healthy lifestyles and preventative attitudes in an effective and cost efficient manner.
- To encourage our participating employers to sponsor wellness programs.

Voluntary Insurance Plans (Dental, Vision):

- Provide state employees and retirees access to affordable dental and vision premiums that also provide for a reasonable level of coverage.

Employee Assistance Program:

- Provide state employees access to an EAP that effectively responds to employee's needs as well as the needs of the employer.

FLEXCOMP:

- Administer a program that allows state employees to elect to reduce their salaries to pay for qualified insurance premiums, medical expenses and dependent care expenses on a pretax basis.
- Remain budget neutral - the employer FICA savings cover the expenses of administering the program.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

192 Public Employees Retirement System

Agency 192

Request explanation and justification (include any statutory authority)*: An analysis was done to compare the salaries of NDPERS staff to other state agencies. As you can see from the attached graph, the majority of NDPERS staff really struggles to survive on the salaries we are able to offer our staff. Our goal is not to compete with the private sector....our goal is to be the "average" state agency.

An analysis on an individual-by-individual basis was done to see what funding would be required to get the blue line at the same level as the red line. It's the goal of our Board to be able to offer our staff the average compensation throughout the state.

Necessary resources for implementation (including FTE's)*: Appropriation Authority

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: An analysis was done to compare the salaries of NDPERS staff to other state agencies. As you can see from the attached graph, the majority of NDPERS staff really struggles to survive on the salaries we are able to offer our staff. Our goal is not to compete with the private sector....our goal is to be the "average" state agency.

An analysis on an individual-by-individual basis was done to see what funding would be required to get the blue line at the same level as the red line. It's the goal of our Board to be able to offer our staff the average compensation throughout the state.

Add a Retirement Processing Lead (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	215,357	1,000	216,357	1.00	235,110	1,000	236,110	1.00
Total	215,357	1,000	216,357	1.00	235,110	1,000	236,110	1.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We are looking at adding a Retirement Processing Lead to our agency. Currently the process for a member to transition to a retiree has two processing steps involved - a retirement application process and a historical review of the member's account to ensure the member has a correct final average salary calculation and service credit allocation. Each of these processes are staffed by a division of 2, and every process requires one of those two staff do input the data and the other to review the work. We feel having a retirement processing lead that can serve as the subject matter expert for both areas on complex accounts, and that can act as a backup for each of the divisions is crucial in ensuring the accurate processing of retiree accounts.

Necessary resources for implementation (including FTE's)*: 1.0 FTE and appropriation authority

192 Public Employees Retirement System

Agency 192

Are resources being redirected or are they new or additional (including FTE's)*: 1.0 FTE and appropriation authority

Who is served and impact of not funding*: We are looking at adding a Retirement Processing Lead to our agency. Total	125,711	1,000	126,711	1.00	138,192	1,000	139,192	1.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This FTE would be used as a Receptionist in our agency. We have had to recruit a temporary receptionist now on multiple occasions, and each time this is a challenging position to fill as a temporary employee. We're hopeful that making this a full-time, benefited position will widen the candidate pool and hopefully deliver a skill set that can help alleviate workloads across the agency.

Necessary resources for implementation (including FTE's)*: 1.0 FTE and appropriation authority

Are resources being redirected or are they new or additional (including FTE's)*: 1.0 FTE and appropriation authority

Who is served and impact of not funding*: This FTE would be used as a Receptionist in our agency. State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This FTE would be used to convert our full-time member services representative into a full-time benefited position. Similar to the Receptionist, this was a difficult position to recruit for as a temporary position. We feel this member services representative is crucial in providing the level of service our increasing membership demands, and we hope that it can help increase the scores our office is receiving on the time it takes for members to get information.

Necessary resources for implementation (including FTE's)*: 1.0 FTE and appropriation authority

Are resources being redirected or are they new or additional (including FTE's)*: 1.0 FTE and appropriation authority

Is this a Large IT project? No

Is this request for a new program or service? No

192 Public Employees Retirement System

Agency 192

Request explanation and justification (include any statutory authority)*: Last session we brought forward a request to add two developers (as consultants) to the coding team that works on our PERSLink business system. The Legislature agreed to give us one of the two additional developers, asked us to assess our needs next session, and if we felt like we still needed the additional developer that we'd explore adding them for another biennium.

We implemented Business Process Management in our office this biennium, which redesigns every workflow that our agency has. This is a 3-4 year work effort. Adding the additional developer for one more year to modernize our business system is crucial for agency to continue to create efficiencies in our office.

Necessary resources for implementation (including FTE's)*: One time appropriation authority.

Are resources being redirected or are they new or additional (including FTE's)*: One time appropriation authority.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: If the Legislature moves forward on the plan to close the Main Plan, the administrative efforts in our office will be impacted significantly. The amount of effort will depend on how the Legislature intends to close the plan, and the Staff would prefer to be conservative with the estimate of possible staff we may need to accommodate this change. Attached are the proposed additions our office feels may be necessary to accommodate this transition.

Necessary resources for implementation (including FTE's)*: 4 FTE and appropriation authority, as well as one-time temporary funding to help us with converting records leading up to the 2024 deadline.

192 Public Employees Retirement System

Agency 192

Are resources being redirected or are they new or additional (including FTE's)*: 4 FTE and appropriation authority, as well as one-time temporary funding to help us with converting records leading up to the 2024 deadline.

Add Contingent Staff for Self-Funded Health Insurance (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	1,202,141	5,000	1,207,141	5.00	-	-	-	0.00
Total	1,202,141	5,000	1,207,141	5.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Funding for 5 additional FTE is being included in the event the health insurance contract is awarded on a self-funded basis. Based on recommendations from the surveys we received, through discussions with the insurance department, and from recommendations from our consultants, staff proposes adding in four conditional FTEs (full time equivalents) in the event we award the health contract on a self-insured basis. This would be adding FTE authority in Accounting, Member Services, a Benefits Manager, a Pharmacist, and a Registered Nurse. The agency is not factoring in additional rental space into the budget to accommodate these FTE if needed.

Necessary resources for implementation (including FTE's)*: 5.0 FTE and appropriation authority

Are resources being redirected or are they new or additional (including FTE's)*: 5.0 FTE and appropriation authority

Who is served and impact of not funding*: Funding for 5 additional FTE is being included in the event the health insurance contract is awarded on a self-funded basis. Statutory Authority

North Dakota Constitution Article XIV

NDCC 54-66

Agency Description

The North Dakota Ethics Commission was created by passage of initiated measure 1 in 2018 which created Article XIV of the North Dakota Constitution. The North Dakota 2019 Legislature passed House Bill 1521, implementing Article XIV of the North Dakota Constitution and created N.D.C.C. 54-66, State Government Ethics.

The Commission consists of five members appointed by consensus agreement of the Governor and the Senate Majority and Senate Minority Leaders. The Ethics Commission also has two state employees; the Executive Director and a part-time temporary Office Manager.

The Commission is tasked with developing rules and ensuring an open, ethical and accountable government through a prompt and fair complaint process.

Agency Mission Statement

The mission of the North Dakota Ethics Commission is to strengthen the confidence of the citizens of North Dakota in their Government by ensuring and promoting transparency and accountability.

Major Accomplishments

- 1 Adopted complaint procedure rules June 15, 2020.
- 2 Adopted gift rules October 6, 2020.
- 3 Received authority during the 2021 Legislative Session to issue advisory opinions.
- 4 Adopted quasi-judicial bias rules June 22, 2022.
- 5 Anticipate the adoption of conflict of interest rules by October 2022.

Critical Issues

- 1 Maintaining adequate funding for salary and operations to include contingent investigation costs which are very difficult to predict.

Performance Measures

Improved processes for open communication and feedback from citizens.

Educated citizens promoting transparency and awareness of Commission’s jurisdiction, activities and responsibilities.

Creation of a more positive and transparent government culture.

Increased citizen trust in government.

195 Ethics Commission

Agency 195

Program Statistical Data

15 Complaints received as of 6/3/2022 of which 13 were non-jurisdictional, 1 was incorrect allegations and 1 was informally resolved.

26 Training sessions with public entities/groups to educate on our mission, jurisdiction, and future initiatives.

60 public meeting notices received since January 2021.

Explanation of Program Costs

Salary and benefits for one FTE (Executive Director); one temporary (Office Manager) and five Commissioners.

Operational costs to support personnel and operations to carry out mandate of ND Constitution Article XIV.

Program Goals and Objectives

Goals: Adopt rules that address the Commission's mandates in Article XIV of the North Dakota Constitution relating to transparency, corruption, elections and lobbying.

Objectives: Improve and strengthen the confidence of the people of North Dakota in their government.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Education & Training Coordinator will develop educational materials/curriculum in light of the Ethics Commission’s educational goals to help stakeholders better understand the role of the Ethics Commission. This position will develop methods and tools to effectively communicate Ethics Commission’s educational goals.

The Ethics Commission was established pursuant to Article XIV of the North Dakota Constitution for the purpose of strengthening the confidence of the people of North Dakota in their Government and supporting open, ethical, and accountable government. To meet that constitutional directive and best support an open, ethical, and accountable government in North Dakota, individuals (including citizens, state employees, and those who lobby in the State) need to be knowledgeable about the ethical rules in place in North Dakota’s Constitution, statutes, and administrative rules.

195 Ethics Commission

Agency 195

This FTE will develop and implement a continuing education and communication plan aimed at: (1) educating citizens of North Dakota so they can be knowledgeable about the role of the Ethics Commission, (2) effectively communicating with the citizens of North Dakota so they can understand how the ethical rules in the Constitution, statutes, and administrative rules function, and (3) training individuals subject to the Ethics Commission’s oversight how to fully comply with the rules. This role is critical to the Ethics Commission’s role in supporting an open, ethical, and accountable government.

Also, section (3) of Article XIV provides “[t]he legislative assembly shall provide adequate funds for the proper carrying out of the functions and duties of the commission.” N.D. Constitution Art. XIV, Section 3.

Necessary resources for implementation (including FTE’s)*: \$225,511 in general funds which includes salary costs of \$152,952, benefits of \$65,520, and IT costs of \$7,039

Are resources being redirected or are they new or additional (including FTE’s)*: This requirement is for a new FTE as well as the funding.

Who is served and impact of not funding*: This position will serve the entire population of the State of North Dakota, State employees. The North Dakota Ethics Commission must educate the citizens of North Dakota regarding its rules and clarify the uncertainty about the Commission’s jurisdiction. Without adequate education and training along with transparency, the Commission cannot successfully carry out its mission as mandated by ND Constitution Article XIV.

Executive Assistant FTE (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	60,798	-	60,798	1.00	71,310	-	71,310	1.00
Special	-	-	-	0.00	-	-	-	0.00
Total	60,798	-	60,798	1.00	71,310	-	71,310	1.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Executive Assistant will provide administrative and operational support to the Executive Director and Commissioners. Administrative duties are currently performed by a part-time temporary Office Manager whose hours have significantly increased. Therefore, it is necessary to transition the position to an FTE, full-time position. This FTE would replace the part-time temporary Office Manager.

The Commission also anticipates the administrative duties of the Commission will continue to increase as recent reporting requirements have gone into effect. The Commission’s rules have increased reporting requirements resulting in a significant increase in filings. As the Commission matures and stakeholders are educated and trained on the jurisdiction of the Commission, we anticipate administrative duties will continue to increase.

Also, section (3) of Article XIV provides “[t]he legislative assembly shall provide adequate funds for the proper carrying out of the functions and duties of the commission.” N.D. Constitution Art. XIV, Section 3.

195 Ethics Commission

Agency 195

Necessary resources for implementation (including FTE's)*: The funding for this FTE is \$164,422 in general funds which includes salary costs of \$107,952 and benefits of \$56,470.

Are resources being redirected or are they new or additional (including FTE's)*: Our base budget includes funding for the part-time office manager at \$103,624. The part-time position will be eliminated and would be used to partially fund this new full-time FTE. This will result in a net cost at \$60,798 (\$164,422 - \$103,624) for the new FTE.

Who is served and impact of not funding*: This position is critical to successfully implementing the Commission’s constitutional requirements and provides a service to all citizens. The impact of not funding is creating an administrative workload that does not allow the Commission to educate and train its citizens and stakeholders. It is a key component in achieving the Commission’s overall mission in carrying out the mandate of ND Constitution Article XIV.

Increase Professional Fees (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	216,000	-	216,000	0.00	216,000	-	216,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	216,000	-	216,000	0.00	216,000	-	216,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As the Commission matures and implements rules according to ND Constitution Article XIV and N.D.C.C. 54-66, there is an increased requirement to maintain transparency as well as avoid any areas where there maybe conflicts of interest as we carry out our mission. Our base budget has \$20,000 for professional fess that we have viewed as inadequate to carry out investigations and hire independent counsel, if needed.

Our request for additional funding of \$216,000 is based upon an estimate utilizing independent counsel and other possible professional costs at \$300 per hour and 30 hours per month for the biennium. While the basis for additional funding is based upon the Commission needing to hire a special assistant attorney general to provide legal services, this additional funding would also be for other professional services, if needed.

Also, section (3) of Article XIV provides “[t]he legislative assembly shall provide adequate funds for the proper carrying out of the functions and duties of the commission.” N.D. Constitution Art. XIV, Section 3.

Necessary resources for implementation (including FTE's)*: \$216,000 in general funds.

Are resources being redirected or are they new or additional (including FTE's)*: This is for new additional (\$216,000) funding for the 2023-25 biennium.

195 Ethics Commission

Agency 195

Who is served and impact of not funding*: This is another significant key component in providing the citizens of North Dakota with a Commission that is able to achieve the mandate and requirements set forth in ND Constitution Article XIV and N.D.C.C. 54-66.

Increase Travel Costs (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	13,448	-	13,448	0.00	13,448	-	13,448	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	13,448	-	13,448	0.00	13,448	-	13,448	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Commission has been holding monthly meetings as well as special meetings virtually since Spring of 2020. Although, under the circumstances it has worked well, the Commission would like to increase regular monthly meetings to an in-person meeting at least once a quarter. With increased awareness and education, it also sees meeting lasting two consecutive days rather than just one day per month.

The Commission is a member of the Council on Government Ethics Laws (COGEL) which holds an annual convention each year. This provides our Commissioners with best practices by networking with colleagues throughout the United States. The Commission’s goal is to send at least two Commissioners or staff to this event each year of the biennium.

Although, an increase in travel costs (\$13,448) is our priority 4, education and training is critical to creating awareness to our citizens as well as public officials. The Commission is dedicated to providing clarity and awareness of the Commission’s jurisdiction and rules and how they can serve North Dakota citizens. Our request includes funding for four trips to various locations around the state.

Also, section (3) of Article XIV provides “[t]he legislative assembly shall provide adequate funds for the proper carrying out of the functions and duties of the commission.” N.D. Constitution Art. XIV, Section 3.

Necessary resources for implementation (including FTE’s)*: Additional general funding of \$13,448.

The current base budget contains \$15,292 in general funds for travel. The Commission has identified a total requirement of \$28,740 as explained above with \$12,000 for one quarterly in-person regular meeting, biennial COGEL convention costs of \$10,000, and travel for education and training costs of \$6,740. This is an increase in base budget of \$13,448.

Are resources being redirected or are they new or additional (including FTE’s)*: This is additional new funding for our biennial budget.

195 Ethics Commission

Agency 195

Who is served and impact of not funding*: We serve all citizens of North Dakota. Without additional funding we cannot adequately train and educate citizens and public officials within the state.

Statutory Authority

North Dakota Century Code Title 15.1, Sections 25-06-02.1, 25-07-01.1, 54-24-01, 23-09-4-01 through 08, 57-64, 12-60-24 and 54-59-17.

Agency Description

The Superintendent of Public Instructions is responsible for enforcing state laws and federal regulations pertaining to public schools and related programs. These duties include:

- Supervise the provision of elementary and secondary education; approve schools; manage a system of background checks for private and parochial schools; approve school construction; approve the school calendar; implement a uniform system of school district accounting, budgeting, and reporting; and administer school district aid and transportation.
- Administer statewide accreditation through Cognia, provide guidance relating to home education, and implement principal and teacher evaluations.
- Develop course content standards and assessments.
- Direct school district annexation, reorganization, and dissolution efforts.
- Draft, implement, and communicate administrative rules.
- Collaborate with the Department of Health and Human Services to deliver prekindergarten grants.
- Administer state and federal programs identified in state law.
- Chair the board of the nominating committee for the state Board of Higher Education and provide administrative support to the Board of Public School Education as a non-voting member.
- Serve on the Board of University and School Lands, the K-12 Education Coordination Council, the Education Standards and Practices Board, the Children’s Cabinet, the Commission on Juvenile Justice, and the Teachers’ Fund for Retirement.
- Supervise the ND School for the Deaf/Resource Center for Deaf and Hard of Hearing, ND Vision Services/School for the Blind, and the ND State Library.
- Develop teacher contracts and personnel policies needed for the administration of state-supported schools (NDS/D/RCDHH and NDVS/SB).
- Implement and administer North Dakota Scholarship.
- Establish common goals to align and coordinate educational efforts that support the work of the joint board, professional development, early childhood education, and the implementation of high school graduation requirements.
- Provide technical and professional support to Local Education Agencies.

- Build relationships, cultivate opportunity, and inspire growth.
- Work to see that all students graduation Choice Ready with the knowledge, skills, and disposition to be successful.

Agency Mission Statement

DPI will partner with schools and communities to provide a statewide system of excellent service and support to ensure a healthy school environment that fosters student success.

Major Accomplishments

- 1 Updated and expanded public education data offerings on the North Dakota Insights website, which was created in cooperation with NDDPI, NDUS, and NDIT.
- 2 Supported schools as they provided federally funded breakfast and lunch programs to all students over two school years because of the pandemic, and encouraged families to apply for free and reduced-price meals when the program ended during the 2022-23 school year. Made system improvements to allow families to make free and reduced-price meal applications online.
- 3 Increased financial transparency for taxpayers by continuing the development of a system for school districts to begin tracking expenditures for the building level to comply with the Every Student Succeeds Act (ESSA). This will give North Dakota taxpayers the ability to find more information about their money is being used.
- 4 Updated state academic content standards for mathematics, English/Language Arts and literacy, library media, and indigenous and world language.
- 5 Began implementation and training of "Science of Reading" legislation, which emphasizes knowledge and understanding of the relationships between letters and sounds and aims to help early readers develop "decoding" skills.
- 6 Drafted administrative rules for ban on Critical Race Theory instruction, reading curriculum, accreditation, alternative education, and innovative education.
- 7 Extended the availability of ExactPath, which offers personalized online instruction in mathematics, reading, and language arts to students in grades kindergarten through 12, to North Dakota students and families at no charge through September 2023.
- 8 Developed and implemented the Trauma Sensitive School Initiative, which currently has over 400 trainers who have trained over 9,000 educators.
- 9 Continued a partnership with the Regional Education Laboratory Central and the Rural Education Research Alliance to develop a plan to assist in recruiting and retaining teachers in rural areas, close achievement gaps, and increase the use of distance technologies.
- 10 Worked with WIDA states to conduct a standard-setting process to ensure the annual English language proficiency assessment accurately and reliably measures the academic language needed to meet 21st century learning standards.
- 11 Incorporated Lexile and Quantile scores on student reports to add value to the assessment exam.
- 12 Obtained continued authorization to use the ACT exam for high school accountability measurements for English/Language Arts and mathematics.
- 13 Began creating a statewide evaluation system for workforce research and evaluation.
- 14 Continued growth in the use of Native American Essential Understanding guide; July 2022 Indian Education Summit in Bismarck draws record number of participants.
- 15 Developed the Title I handbook to provide guidance for Title I school staff about regulatory requirements.
- 16 Assisted in the drafting of legislation to require computer science and cybersecurity instruction in elementary, middle and high schools, and add one unit of computer science and cybersecurity instruction as an option for meeting high school graduation requirements.
- 17 Continued school district pilot projects for identifying students with dyslexia and exploring effective interventions.

Major Accomplishments

-
- 18 Continued competency-based learning and innovation projects in several school districts, including Northern Cass, Bismarck, Garrison, and Wilton.

 - 19 Implemented and provided guidance for HB1478, the "Learn Everywhere" bill, which allows schools to offer credit for educational opportunities in grades 6-12 outside of the school building, with cooperation from a sponsor.

 - 20 Awarded new \$15,000 grants to North Dakota Teacher of the Year honorees to use in promoting the teaching profession and innovation.

 - 21 Established and promoted "Be Legendary" training programs for school boards that help them to focus on student achievement.

 - 22 Expanded County Teacher of the Year program to 48 counties, with goal of having Teacher of the Year honorees from all 53 counties.

 - 23 Collaborated with the Information Technology Department for major upgrades to the "STARS" school information reporting system to make it much more user-friendly, reduce repetitive data entry, and cut red tape.
-

Critical Issues

-
- 1 Unable to compete salary-wise with local districts for personnel.

 - 2 North Dakota school demographics are in flux. From 2010 to 2022, public school enrollment has seen a steady increase from about 94,000 to almost 114,000, with 117,000 students projected in 2024. There are 172 operating school districts. Birth rates are rising, which has led to a projection of almost 9,700 kindergarten students. As a result of the pandemic, non-public and home schooling has increased.
-

Performance Measures

- By the 2029-30 school year, all students graduating high school with the traditional diploma will graduate Choice Ready. The Choice Ready rate will increase 5.4% each school year for 10 years to match the traditional graduation rate.
- By the 2025-26 school year, the percentage of students who are proficient or above on the NDSA reading subdomains will double from the 2020-21 school year.
- By the 2025-26 school year, the percentage of students who meet expected learning gains in ELA and math will increase by 10 percentage points. In 2021-22, reassess whether the measurable goal is realistic through a review of data and revise the goal as needed.
- Reduce the number of students in Novice and Partially Proficient for Native American and Low-Income students by 25% each year for 5 years.
- By the 2025-26 school year, the statewide behavioral engagement score will be 150 points. In 2021-22, reassess whether the measurable goal is realistic through a review of data and revise the goal as needed.

Program Statistical Data

See Statistical Information attachment

Explanation of Program Costs

- Budget funds 86.25 FTEs
- Administration of 49 Federal programs

201 Public Instruction

Agency 201

- Provides funding for the operations of the K-12 Education Coordination Council and 3 members of the State Board of Public School Education
- Provides technical assistance to teachers and administrators for State and Federal programs
- Develop and align all standards and student assessments, early childhood through high school graduation.
- Link children at risk of failing to meet the state’s challenging content and achievement standards with support services designed to address specific needs.
- Advocate for the resources necessary to implement a system that focuses on student achievement and well-being.
- Enhance before- and after-school programs to provide students with opportunities to improve their academic performance, integrate service projects with classroom learning, and offer educational development opportunities to eligible students and their families.
- Ensure success for students with disabilities.
- Provide Adult Education and Literacy programs for individuals over the compulsory attendance age of 16 who lack high school equivalency skills, workplace readiness skills, and EL skills to New American adults.
- Provide nutritious foods to children and low-income households and nutrition education to caregivers and food service personnel.
- Provide prevention information and resources that increase safety, health, and well-being of all students and teachers.
- Provide liaison services to Regional Education Service Agencies.
- Design professional development systems and instructional supports to assist all North Dakota teachers in improving classroom instruction.
- Ensure a valid and reliable system for data collection, verification, analysis, and reporting.

Program Goals and Objectives

- Quality early childhood education
- Support for safe and healthy behaviors
- Career awareness, exploration, and development
- Quality education personnel
- Quality student-center instruction

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Since Superintendent Baesler has been elected as the North Dakota State Superintendent, we have continually looked at ways to manage our funding better and promote enhanced student outcomes to the extent possible from the department. Over the past ten years, we decreased our FTE numbers from 101.5 to 86.25, a reduction of 15.25 full-time employees, equating to a 15% staff reduction. In addition, we have not been able to fully fund all 86.25 FTEs due to the lack of funding provided. This has resulted in work being reassigned or eliminated. We are asking more of our employees as we continually add programs and initiatives to our department to provide resources and opportunities to North Dakota schools that aim to increase student outcomes. The ND Department of Public Instruction is looking to the next legislative session to provide additional compensation to get current staff closer to market compensation which is needed to retain current DPI talent. In addition, we will be looking to fund the unfilled FTEs to reduce exorbitant stress on current team members. This equates to funding for approximately 7.25 positions. We intend to use performance bonuses to recognize the work of those employees who have exhibited exemplary service during the current fiscal year. In some cases where employees have assumed additional duties, we have provided pay increases and retention bonuses commensurate with the additional workload they are assuming.

201 Public Instruction

Agency 201

Staff turnover has caused additional challenges within the North Dakota Department of Public Instruction. The learning curve is high for new employees, and staff have to pick up workload due to the decreased FTEs. In addition, the agency has taken on new initiatives to better serve North Dakota schools and educators. We are working tirelessly to provide North Dakota schools with additional resources, tools, and programs to address the learning loss caused by the Covid-19 pandemic.

The Department has developed a strategic plan that is being used as a roadmap for the future education direction. As you are aware, only twenty-four percent of our operating budget is State-funded. We utilize the strategic plan to review current programs to determine if we need to make changes in the implementation of existing programs, or if there is a need to redirect resources to areas that we determine to be important to facilitate better student outcomes aligned with student outcome goals. Based on our strategic plan, we do not anticipate additional FTEs. As mentioned above, our goal for the next biennium will be to fully fund our agency. We would look to the agency's current vacant FTEs. This may incorporate reclassification of the vacant FTEs to meet the focus areas necessary to achieve improved student outcomes and meet the agency's continually growing needs.

Necessary resources for implementation (including FTE's)*: N/A

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*:

Rent Model Change (Priority: 10)

Total				-	500,000	-	500,000	-	500,000	-

State Initiative:* Transforming Education

Explanation / Justification: This program is often referred to as "Leveraging the Senior Year," which is a two-pronged approach to ensure all students grow academically during and up to their senior year of high school through the Advanced Placement (AP) and College Ready English And Math (CREAM) programs. Each of these programs saved students time and costs during their college years. Each of these metrics are included in the state's Choice Ready framework and provides North Dakota students with course access, educational support, and opportunities for high school coursework to count towards college time and credit. Based on 2020-

201 Public Instruction

Agency 201

2021 student AP data, 2,445 North Dakota students scored a 3 or higher on their AP exams. This program invested \$215,160.00 in AP Exam reimbursements for these tests. This resulted in college tuition savings for the students and their families in the amount of \$2,171,160.00 during the 2021-2022 school year. This amount was calculated on the average college tuition credit rate of \$296 per college credit.

Be Legendary School Board training (Priority: 03)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

	391	201-1000	20165	-	-	-	-	-	-	3,000,000
Total				-	-	3,000,000	-	3,000,000	-	3,000,000

State Initiative:* Transforming Education

Explanation / Justification: Be Legendary School Board Leadership Institute is a 2-day leadership training for North Dakota school boards designed to help them improve the academic outcomes of their students and is conducted within the school district. The institute helps school board members set student outcome goals, establish a process to monitor and measure progress toward those goals, and develop teamwork and advocacy skills that result in better student academic outcomes. Board members will be asked to select goals that align to North Dakota's PK-12 Education Strategic Vision Framework goals.

The NDDPI has partnered with Elliott & McMahon LLC, an education consultancy, to offer the training. NDDPI has set aside \$500,000 in federal COVID-19 recovery aid for the Be Legendary School Board Leadership Institute and ongoing school board coaching.

Computer Science/Cyber Security Credential Incentive (Priority: 04)

Total				-	-	3,000,000	-	3,000,000	-	4,000,000

State Initiative:* Workforce

Explanation / Justification: Proposed legislation from the Interim Higher Education Committee

SECTION 1. APPROPRIATION - DEPARTMENT OF PUBLIC INSTRUCTION - PARAPROFESSIONAL-TO-TEACHER PROGRAM. There is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, the sum of \$3,000,000, or so much of the sum as may be necessary, to the department of public instruction for the purpose of providing grants to accredited institutions of higher education to assist paraprofessionals to become qualified teachers, for the biennium beginning July 1, 2023, and ending June 30, 2025. The department of public instruction may award up to \$20,000 to each qualifying institution for program startup and other administrative costs and the remainder of the appropriation may be used only for tuition and scholarships for students enrolled in the program. The department of public instruction may establish policies and procedures to administer this program.

PowerSchool Increase (Priority: 06)

Total				-	-	-	-	-	138,215,156	-

State Initiative:* Transforming Education

Explanation / Justification: Change to on-time funding. Will address growing districts and those losing students. This will result in a savings of \$2.4 million.

Move all districts that are transition maximum on to the formula. This will cost \$14.8 million.

201 Public Instruction

Agency 201

Provide an increase to the formula payments by 4% the first year of the biennium and 3% the second year. This has a cost of \$131.9 million.

These changes have a total impact of \$144.9 million and the funding will come from the Foundation Aid Stabilization Fund.

Funding source switch to account for increase in funding from the Common Schools Trust fund of \$80.8 million.

Statutory Authority

ND Constitution Article VIII, Section 6; North Dakota Century Code Chapter 15-10.

Agency Description

The North Dakota State Board of Higher Education (SBHE), established in 1939 by the voters of North Dakota, is the governing body for the state’s 11 publicly funded institutions which comprise the North Dakota University System (NDUS). The SBHE carries out its constitutional responsibilities through a comprehensive set of policies. The Chancellor serves as the NDUS’ chief executive officer. The Chancellor and the system office staff support the SBHE in developing public policy for the NDUS, in advocating on its behalf, and fostering shared leadership throughout the system.

Agency Mission Statement

The mission of the NDUS is to enhance economic growth, social vitality, and quality of life for North Dakota through the discovery, sharing, and application of knowledge. The Chancellor’s Office supports the SBHE in developing public policy for the governance of the NDUS and in advocating on behalf of the System.

Major Accomplishments

- 1 Conducted three successful presidential searches at Williston State College, North Dakota State University, and North Dakota State College of Science.
- 2 Created more than 325 new certificate programs at both the undergraduate and graduate levels.
- 3 Implemented advanced security protection to more than 16,000 computing endpoints across the NDUS.
- 4 Implemented a single sign-on portal for NDUS applications.
- 5 Provided centralized secure wireless networking for the campuses.
- 6 Minot State University became the third institution in the NDUS to receive NSA designation of Center of Academic Excellence in Cyber Defense.
- 7 Maintained the ND Career Builders scholarship and loan forgiveness program, in conjunction with multiple state agencies and private-sector partners, to address the State’s workforce needs.
- 8 Emerging use of stackable certificates – leading to associate and/or baccalaureate degrees.
- 9 Passage of board policy to discontinue the submission of standardized tests for the purpose of admission.
- 10 Rebuilt SBHE Dashboards to reflect updated goals, objectives, outcomes and metrics.
- 11 Continued support of the Dakota Digital Academy, which has resulted in numerous accelerated online course and certificate offerings.
- 12 Deployed a Security Operations Center to prevent, detect, investigate, and respond to security incidents throughout NDUS.
- 13 Collaborated with Department of Health and others to assist in the rollout of a new vaccination campaign.
- 14 Conducted extensive research on behalf of Department of Public Instruction for House Bill 1013 (COVID-era learning loss).
- 15 Collaborated with ND Information Technology and SLDS to include ND Post-Secondary Outcomes on NDInsights, the state’s official source for information about public education.
- 16 Implemented NDUS data governance committee and completed projects to ensure data is appropriately used while protected.
- 17 Launched a systemwide online, self-service performance evaluation system.

Major Accomplishments

- 18 Implemented technical and student-facing upgrades to Campus Connection.
- 19 Launched a systemwide online, self-service performance evaluation system.
- 20 Continued migration of selected services to the Cloud.
- 21 Updated availability of Student Voting Certificate in Campus Connection.

Critical Issues

- 1 Meeting student course delivery needs by implementing a dynamic enrollment environment.
- 2 Maintaining and increasing enrollment and retention through new programs and educational pathways.
- 3 Addressing challenges in talent recruitment and retention for faculty and staff in changing inflationary conditions.
- 4 Anticipating and meeting technological transformation and the digitization of society.
- 5 Lingering impact of the COVID-19 pandemic.
- 6 Continuing to address the near- and long-term workforce needs of the state.
- 7 Furthering development and access to IT capabilities to maximize student success and system-wide collaboration.
- 8 Sustaining and increasing efforts to consolidate IT systems and business services that are cost effective and provide value.

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the SBHE’s vision and strategic plan. These data systems, including Dashboards, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more.

Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system’s biennial report on its strategic plan, which incorporates the “flexibility with accountability” expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

SYSTEM GOVERNANCE

The NDUS Office Provides advice to the SBHE and campuses on system policy development and administration, including institutional missions, program offerings, student affairs, personnel and fiscal operations, budget development, computing, capital construction, financial aid, and all other administrative and academic functions; acts as representatives of the NDUS to governmental bodies and the general public and monitors legal issues applicable to higher education. Core Technology Services implements, maintains, and improves over 50 consolidated technical solutions used by all NDUS institutions and administers student and system grant programs.

CAPITAL BOND PAYMENTS

This appropriation provides payments for ND general obligation bond indebtedness for the campuses. Outstanding bond indebtedness at 7/1/2023 will be \$4.1 million principal and \$4.3 million interest on prior biennium bond issues. Bond maturity dates do not exceed 12/1/2040.

EPSCOR [Established Program to Stimulate Competitive Research]

The effectiveness of the ND EPSCOR development plan is best indicated by the ability of EPSCOR-supported researchers to compete for external awards:

1. The 2019-21 general fund investment of \$5.686M ND EPSCOR [via NDUS] has resulted in \$20M to date in extramural principal investigator grants
2. Over the life of ND EPSCOR, 1985-2022, the state's investment of \$69.2M has resulted in over \$465.9M in merit-based extramural grants—a 7.72:1 Return on Investment
3. Since the creation of the ND EPSCOR State Office (late 2017-present), the state's investment has resulted in a 3.61:1 Return on Investment. This ROI metric will be used going forward as the true measure of importance of an organized ND EPSCOR State Office to program management, implementation, oversight, and reporting
4. ND EPSCOR has provided research opportunities for 3,459 K-12 students, 855 post-secondary students, and 543 faculty since 2014. Many of the students report that these "hands-on" experiences made them more "job ready," as well as more competitive for positions after graduation
5. Six federal agencies have EPSCOR funding programs available for faculty: NSF, NIH (via the sister IDeA program), NASA, USDA, DOE, and DoD

STUDENT MENTAL HEALTH INITIATIVE

Mental Health First Aid (MHFA) program has trained five facilitators and provide an average of 10-15 MHFA trainings each year for students, faculty, and staff. Telemental health services are provided to all students through our partner Northern Prairie Community Clinic in Grand Forks. Crisis intervention on each NDUS institution is available through a Behavioral Intervention Team. A standing contract with FirstLink (211/988) provides after-hours crisis prevention for the institutions. Internship opportunities to counselors and supervision costs for newly licensed counselors is provided. Substance Misuse Prevention and Outreach has an online education module called Electronic CHECKUP TO GO (eCHUG), an evidence based, best practice tool to address alcohol misuse. A biennial systemwide survey assesses students' use and perceptions regarding alcohol, tobacco, and other drugs; mental health, sexual assault; and general health and well-being. Sexual Assault Prevention and Outreach provides training to all Title IX staff regarding trauma-informed investigation strategies and how to best provide outreach and mental health resources to those impacted by sexual assault. A new shared-service position will provide direct support to all campuses in Title IX investigations, policies, and protocols.

Nursing Consortium

The nursing consortium funding supports 13 universities in North Dakota. Among the 13 universities there are 396 practical nursing students, 1633 registered nursing students, and 54 certified registered nurse anesthetists.

Student Financial Aid

NDUS administers the state grant, scholarship, and loan repayment programs by collecting applicant data, processing, evaluating data, awarding recipients, and requesting disbursements of all programs covered under the student grant programs. Records are maintained according to retention guidelines. Additionally, the NDUS Office of Financial Aid provides training to high school and post-secondary personnel on the program rules and procedures and responds to all inquiries on the state student aid programs. The statistics that follow reflect awards by academic year as of August 2022. See attached "Student Financial Aid Statistical Data Attachment".

Veterans Assistance Program

Over the 4 most recent biennia, the VET program has directly assisted 478 ND veterans to prepare for and manage the ongoing challenges of college through the NDSU and UND VET program sites. Of those, 65% have completed or are still actively pursuing an undergraduate or graduate degree (as of Feb 2022). See attached "Veterans Assistance Program Statistical Data"

Explanation of Program Costs

SYSTEM GOVERNANCE:

NDUS Office budget supports the state funded salaries, operating and equipment expenses. The salary budget includes the operating expenses and per diem reimbursement for State Board of Higher Education members. The 2023-25 base budget request totals \$8,680,148, of which salaries and benefits comprise \$7,818,362, or 90.1%. The 2023-25 request supports 24 FTE. Travel, dues and professional development, professional services, and specific ongoing projects, including accountability surveys and reports are the major components of the 2023-25 \$863,786 operating expense budget. The 2023-25 budget request includes additional base budget requests of \$425,000 salary and benefits for an Assistant Vice Chancellor Research and Workforce; \$900,000 systemwide marketing program; \$735,000 Financial Aid system licensing and maintenance; and \$450,000 Dakota Digital Academy

CAPITAL BOND PAYMENTS:

Base funding of \$11,197,896 is included in the budget request for capital bond payments. The amount was provided by the Industrial Commission and represents the actual payments scheduled during the 2023-25 biennium.

CORE TECHNOLOGY SERVICES (CTS):

The total 2023-25 base budget request for CTS equals \$63,182,205. Funding sources include \$39,332,323 from the general fund and \$23,849,882 from special funds. The budget supports salaries and fringe benefits support for 138.83 FTE. Other special fund sources include: ConnectND fees; charges to campuses and non-NDUS entities for IT services; and charges to ODIN libraries for maintenance and enhancement of ODIN and access to electronic databases and subscriptions. The 2023-25 budget request includes additional base budget request of \$4.8M for a Security Operations Center for the NDUS System, increased software license costs and \$2.1M for data warehouse and predictive analytic capabilities

SHARED CAMPUS SERVICES:

The 2023-25 base budget request for NDUS Shared Campus Services is \$800,000, this funding provides \$560,000 for membership dues for the Western Interstate Commission for Higher Education (WICHE) and the Midwestern Higher Education Compact (MHEC) with remaining funds to campuses for open educational resources and other shared services.

EPSCOR:

The 2023-25 general fund base request is \$5,685,750 for the EPSCOR Program and \$342,000 for the NASA EPSCOR Program, which is unchanged from current funding level. Accessing the federal EPSCOR funds requires a cash match from the state and appropriate human infrastructure in place to oversee all the administrative, education and workforce, and outreach requirements of the federal awards. UND and NDSU receive the federal funds directly and the federal funds are not included in the NDUS Office budget request.

STUDENT MENTAL HEALTH INITIATIVE: The 2021-23 general fund base request was \$284,400, the same level as the 2019-21 biennium. This funding is used to provide the NDUS institutions Student Mental Health Services for the biennium. The budget priorities for Student Mental Health is the Mental Health First Aid (MHFA) program, providing 211/988 after hours crisis prevention to institutions, funding internship opportunities, substance misuse prevention and outreach, and sexual assault prevention and outreach.

Nursing Consortium:

Since 2009, the Nursing Education Consortium has received funding to support high virtual simulation technology across all nursing programs in North Dakota. This support has been instrumental to increasing student's ability to practice critical nursing skills. The total 2023-25 base budget request is \$1,356,000

Student Financial Aid Programs

The North Dakota Academic, Career & Technical Education and North Dakota Scholarship program projection indicates a shortage in base funding, therefore, we request an additional \$1,000,000 in funding for the 23-25 biennium. All other Financial Aid Programs are requesting the same funding for the 23-25 biennium as appropriated in the 21-23 biennium. Program and amounts are Student Financial Assistance Program \$23,917,306; North Dakota Scholars Program \$1,807,115; North Dakota Academic, Career & Technical Education and North Dakota Scholarships \$17,216,749, before the \$1,000,000 additional request; ND Indian Scholarship \$555,323; Professional Student Exchange Program (PSEP) \$3,699,342; Education Incentive Program \$260,000; and Tribal College Assistance Grant \$1,000,000. See "Student Financial Aid Program Cost Details" in attachments.

Veterans Assistance Program

The 23-25 biennium base budget request totals \$454,875, an increase of \$177,000 from the base appropriation for 21-23 biennium of \$277,875. Increase of \$47K/biennium fully restores funding for 2 FTE staff to serve veterans throughout the state, as well as a hand-full of part-time student worker program assistants, and program operations. An additional increase of \$130K/biennium funds 1 additional FTE staff (\$65K per FY).

Program Goals and Objectives

SYSTEM GOVERNANCE:

The SBHE is responsible for the overall management and control of the institutions and entities of the North Dakota University System. The System Governance appropriation program provides funding for the expenses/operations of the SBHE and System Office functions needed to carry out the SBHE's constitutional and statutory responsibilities to include approval of new programs, state authorization and renewal, cost saving initiatives, the administration of surveys and data collection, and coordinated statewide training.

CAPITAL BOND PAYMENTS:

To provide payments for ND general obligation bond indebtedness for state bonded capital projects on the campuses of the NDUS.

CORE TECHNOLOGY SERVICES (CTS):

CTS delivers technology-based resources and services to NDUS institutions, students, faculty, and staff. CTS implements, maintains, and improves over 50 consolidated technical solutions used by all NDUS institutions. These solutions include student information systems, learning management systems, comprehensive human capital management systems, comprehensive financial management systems, and information security systems. CTS goals and objectives are to support North Dakota University System infrastructure needs, improve NDUS information technology-enabled business processes and services, and improve and enhance NDUS student learning and user's focus.

EPSCOR:

EPSCOR's (Experimental Program to Stimulate Competitive Research) purpose of EPSCOR is to improve research in states that have historically fared poorly in their efforts to attain federal funding. Funded through federal-state-private sector partnerships, ND EPSCOR manages a comprehensive research development plan that involves Infrastructure Improvement Programs, Science Outreach and Recruitment Programs, Technology Transfer and Commercialization Programs, and Tribal Colleges Programs.

The goals of ND EPSCOR are consistent with those of the NDUS Roundtable Report, and the multi-faceted infrastructure development plan outlined above and collectively addresses the six cornerstones of the Roundtable. Specifically, with respect to Cornerstone 1: The Economic Development Connection, the Roundtable Report states "The research foundation on which entrepreneurial activity will necessarily be based must be expanded...To this end, the state should maximize the opportunities of EPSCOR funding available through Congress to assist in developing research and technology infrastructure..." The ND EPSCOR goal is to obtain federal grants to enhance research infrastructure using state match to leverage federal dollars. Reduction in state cash commitment would result in ineligibility for applying for federal funds and the reduction of a number of key infrastructure programs. Additional details can be found at www.ndepscor.nodak.edu

STUDENT MENTAL HEALTH INITIATIVE:

The Mental Health Task Force (MHTF) is a sub-committee of the Student Affairs Council gathered to implement four mental health recommendations After Hours Crisis Intervention and Emergency Services, Education and Training, Behavioral Intervention Teams, Psychiatric Services.

Nursing Consortium:

The nursing consortium was established to support nursing programs in North Dakota to advance nursing programs at all universities across the state with funding provided for simulator equipment and adequate faculty.

Student Financial Assistance Programs:

215 University System

Agency 215

North Dakota has several Financial Assistance Programs, including:

- Student Financial Assistance (ND State Grant)
- North Dakota Scholars Program
- North Dakota Academic, CTE, and North Dakota Scholarships
- North Dakota Indian Scholarship Program
- Dual Credit Tuition Scholarship
- Skilled Workforce Scholarship and Skilled Workforce Loan Repayment (ND Career Builders)
- Professional Student Exchange Program (PSEP)
- Education Incentive Program
- Tribal College Assistance Grant

See attached "Student Financial Aid Program Details" for additional requirements of each program.

Minnesota Reciprocity:

The reciprocity program with Minnesota allows North Dakota resident students to take advantage of academic programs at Minnesota state institutions at the Minnesota resident rate. The rate is based on the program of instruction at the institution attended.?

Veterans Assistance Programs:

The Veterans Assistance Program appropriation supports Veterans Educational Training (VET), a veteran and National Guard support program that was funded by the 63rd Legislative Assembly through HB1289. Funds were appropriated to the North Dakota University System (NDUS) to provide assistance to veterans who are enrolled or are in the process of enrolling at institutions of higher education in this state or an institution located in an adjacent state provided that institution participated in a course exchange program with an institution within North Dakota.

Budget Request Summary

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Provides \$3,000,000 for increased software contract costs for the 23-25 biennium. Provides \$1,800,000 for Security Operations Center including costs charged to CTS by NDIT, provides two FTE's and software licenses for the CTS Security Operations Center.

Budget System requires a ranking of the decision packages; The NDUS considers all decision packages of equal importance. The nature of the requests don't allow cross-ranking(System security; Student financial aid and scholarships; new programs; marketing; etc.)

Necessary resources for implementation (including FTE's)*: An additional \$4,800,000 for increased software contracts and Security Operations Center within CTS.

Are resources being redirected or are they new or additional (including FTE's)*: New resources, two additional FTE's.

Who is served and impact of not funding*: NDUS's 11 institutions, NDUSO, CTS

Assistance Vice Chancellor - Research and Workforce (Priority: 03)

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request will return a position that existed in the NDUS Office until 2016 budget reductions forced it to be cut. This person will promote and expand research activities and reporting statewide by collaborating with the state EPSCOR office, all institutions of the NDUS including the two research institutions, ND Tribal Colleges, the SBHE Research committee, and other stakeholders.

Budget System requires a ranking of the decision packages; The NDUS considers all decision packages of equal importance. The nature of the requests don't allow cross-ranking(System security; Student financial aid and scholarships; new programs; marketing; etc.)

Necessary resources for implementation (including FTE's)*: Additional \$425,000 to fund the one FTE.

Are resources being redirected or are they new or additional (including FTE's)*: New, one additional FTE.

Who is served and impact of not funding*: The citizens of ND through the expansion of research activities.

Systemwide Marketing Program (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	900,000	900,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	900,000	900,000	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: A systemwide marketing plan has been agreed upon by all statewide campuses as a way to increase awareness to prospective students and their influencers on the value of higher education to address the workforce needs of the State of North Dakota. Collectively, NDUS campuses will work together to advance workforce development by targeting in-demand jobs in the state of North Dakota.

Marketing strategy would include:

- Re-training opportunities of workforce for in-demand areas identified by the state and industry within North Dakota.
- The value of continuing education within the learner's in-home community through collaborative curriculum offerings from all campuses.
- Enhance public perception of the value of higher education to the State and recruit students to programs.
- Frame conversations about workforce needs combined with lifetime earnings data to show the value of education to the State and individual; particularly during times of inflationary/recessionary impacts to the economy.

All citizens of North Dakota will be served by the campaign effort. The affect on the workforce, training, education, and overall citizenship of the state would be impactful as higher education faces imminent enrollment decline. Declines in trained workforce will have a direct impact on our state economy. Also, as enrollment declines, higher education faces tuition increases that will impact overall enrollment numbers. All of these forces combine to affect the entirety of the state on both the business level as well as the individual citizen facing recessionary influences and may overall be the deciding factor on whether a family decides to stay in North Dakota or move away for better opportunities in another state.

Budget System requires a ranking of the decision packages; The NDUS considers all decision packages of equal importance. The nature of the requests don't allow cross-ranking(System security; Student financial aid and scholarships; new programs; marketing; etc.)

Necessary resources for implementation (including FTE's)*: Increase NDUSO funding by \$900,000 to work with the 11 institutions to coordinate and implement a marketing campaign. No new FTE.

Are resources being redirected or are they new or additional (including FTE's)*: New resources, no additional FTE's.

Who is served and impact of not funding*: Provides statewide marketing information to the public on the variety of degrees and certificates available throughout the State with an emphasis on programs to address the state's workforce needs.

Student Grants - ND AC/CTE grant increase request (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,000,000	-	1,000,000	0.00	1,000,000	-	1,000,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,000,000	-	1,000,000	0.00	1,000,000	-	1,000,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The number of eligible students continues to increase because of a higher number of high school graduates resulting in the need to increase the appropriation.

Budget System requires a ranking of the decision packages; The NDUS considers all decision packages of equal importance. The nature of the requests don't allow cross-ranking(System security; Student financial aid and scholarships; new programs; marketing; etc.)

Necessary resources for implementation (including FTE's)*: An additional \$1,000,000 to support the growth in eligible students.

Are resources being redirected or are they new or additional (including FTE's)*: New, no additional FTE's.

Who is served and impact of not funding*: Eligible students attending North Dakota institutions. NDUS would be required to pay the scholarships as the students are entitled to the scholarship by century code. The NDUS would request a deficiency appropriation to cover the deficit.

State Initiative:* Workforce

215 University System

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In 2013, to ensure continuity of services to veterans seeking higher education after NDSU’s loss of a federal grant program, the ND State Legislature made an allocation of \$325K for biennium 2013-15 and designated NDSU to manage a program established as Veterans Educational Training (VET). The program’s directive is to provide assistance to veterans enrolled or in the process of enrolling in an institution of higher learning within the state, or an adjacent state with a course exchange agreement. Previous biennia budgets have required reductions, which have limited the program and reduced the full time positions from two to one position.

This proposal is seeking to return to initial level of funding at \$325,000 per biennia (increase of \$47,000) plus fund a 3rd position for an additional \$130,000 for the biennium. The additional positions would be able to do more direct outreach. One position would be dedicated to outreach with the Western part of the state and smaller schools. The 3rd position would work with admissions staff to improve recruiting and enrollment of military students.

Budget System requires a ranking of the decision packages; The NDUS considers all decision packages of equal importance. The nature of the requests don’t allow cross-ranking(System security; Student financial aid and scholarships; new programs; marketing; etc.)

Necessary resources for implementation (including FTE’s)*: Two additional positions. Increased funding of \$177,000

Are resources being redirected or are they new or additional (including FTE’s)*: New resources, two additional FTE’s requested.

Who is served and impact of not funding*: Veterans interested in a degree or certificate at NDUS institutions.

Dakota Digital Academy (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	450,000	450,000	0.00	-	450,000	450,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	450,000	450,000	0.00	-	450,000	450,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Dakota Digital Academy was formed to provide access to quality education and training to assist citizens, businesses and government agencies in North Dakota engage with and adapt to the changing demands and opportunities associated with the rapid digitization of our economy and society.

Expertise in computing and cyber sciences are of extremely high importance and demand in literally all private and public sector organizations and enterprises in North Dakota and beyond. Digitization of the economy and the special need for cybersecurity expertise produces workforce needs in the primary sectors of the economy, including energy, agriculture, government, services, health, transportation and medicine. The Dakota Digital Academy (DDA) was founded in the fall of 2020 to meet these needs. A priority of the DDA is to serve learners and job seekers who are unemployed, place bound or isolated due to the pandemic or personal circumstances; who wish to upgrade their skills while on the job; reinvent their career; or who want to get a start in a technology career. Because the DDA spans all 11 institutions in the university system, expertise and capacity throughout the system is greatly leveraged.

The funding of this proposal would solidify and advance the delivery of initiatives and programs currently underway while taking steps to achieve multiple goals going forward. Two issues of the Dakota Digital Review will be produced annually, which educates students and professors in non-cyber disciplines and the general public about digitization and its consequences. Under the proposed project, the educational programs, which the DDA has already started, will be made fully operational, new programs designed and launched, and advisory boards will be established. Measurable results will be realized in terms of filling jobs, stimulating economic development, significantly increasing the numbers of skilled people in cybersecurity and related areas, especially through helping people impacted by the pandemic by greatly improving their access to quality education and training needed in the digital age.

Project Goals, Tasks and Outcomes

Goal 1. Elevate enrollment in credentialing programs.

Goal 2. Fully establish and engage the DDA Workforce Advisory Council (WAC).

Goal 3. Establish the DDA Board.

Goal 4. Fully develop a comprehensive DDA portal.

Goal 5. Support the Dakota Digital Review (DDR).

Goal 6. Establish sponsored special events.

Goal 7. Develop the pool of affiliated and credential course instructors.

Budget System requires a ranking of the decision packages; The NDUS considers all decision packages of equal importance. The nature of the requests don't allow cross-ranking(System security; Student financial aid and scholarships; new programs; marketing; etc.)

Necessary resources for implementation (including FTE's)*: Funding of \$450,000 to continue providing accessible computing and cyber science education in North Dakota. No additional FTE's.

Are resources being redirected or are they new or additional (including FTE's)*: New resources, no additional FTE's.

Who is served and impact of not funding*: North Dakota citizens and businesses.

Education Scholarships for Energy Workforce (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	10,000,000	10,000,000	0.00
Total	-	10,000,000	10,000,000	0.00	-	10,000,000	10,000,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Serving communities in the oil and gas sector with degrees, certificates, and new skills to fill workforce staffing needs. Provides retraining for citizens displaced by changes in the energy sector as well as scholarships for students seeking to earn degrees in high-demand occupations.

Budget System requires a ranking of the decision packages; The NDUS considers all decision packages of equal importance. The nature of the requests don't allow cross-ranking(System security; Student financial aid and scholarships; new programs; marketing; etc.)

Necessary resources for implementation (including FTE's)*: Requesting \$10,000,000.

Are resources being redirected or are they new or additional (including FTE's)*: New resources, no additional FTE's.

Who is served and impact of not funding*: North Dakota citizens and businesses related to the oil and gas sectors.

Workforce Education Innovation Grant (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	24,000,000	24,000,000	0.00	-	10,000,000	10,000,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	24,000,000	24,000,000	0.00	-	10,000,000	10,000,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The purpose of the proposed Workforce Innovation Grant is to address the current and emerging workforce needs of North Dakota business and industry. Target programs will align with ND’s most in-demand labor force needs. The funding will be used for the development of curriculum, purchase of equipment and technology, to train or certify new and existing instructors, and to promote the availability of these programs to respond to the critical workforce needs of the state. The program will be modeled after the Workforce Enhancement Grant that was administered by the ND Department of Commerce between 2007 and 2017.

Budget System requires a ranking of the decision packages; The NDUS considers all decision packages of equal importance. The nature of the requests don’t allow cross-ranking(System security; Student financial aid and scholarships; new programs; marketing; etc.)

Necessary resources for implementation (including FTE’s)*: Provides grant funding of \$10,000,000 to the five two-year colleges; \$8,000,000 to the four regional four-year universities; and \$6,000,000 to the two research universities.

Are resources being redirected or are they new or additional (including FTE’s)*: New resources, no additional FTE’s.

Who is served and impact of not funding*: North Dakota citizens and businesses.

Data Warehouse and Predictive Analytics (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	2,000,000	2,000,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	2,000,000	2,000,000	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Maintenance and development of current longitudinal data system is outlined in ND century code 54-59-38 and was previously funded by federal grant dollars. NDUS seeks to continue to grow and development the longitudinal data system, exploring with intent to implement the data lake/lake house system. This will allow for multiple advantages in data collecting and reporting, including more efficiencies with staff time, wider access to data, and the ability to leverage the data lake into a predictive analytics system for student success and other higher education key indicators. The implementation of predictive analytics is a NDUS Chancellor goal for the upcoming biennium.

Budget System requires a ranking of the decision packages; The NDUS considers all decision packages of equal importance. The nature of the requests don’t allow cross-ranking(System security; Student financial aid and scholarships; new programs; marketing; etc.)

Necessary resources for implementation (including FTE's)*: New funding, no FTEs.

Are resources being redirected or are they new or additional (including FTE's)*: New funding, no additional FTE's

Who is served and impact of not funding*: Current and planned development responds to higher education queries from NDUS institutions and system office, legislative requests, governor's office, and other state and public entities.

Large IT Project Summary

State Initiative*: Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: An RFP solution has been issued to procure a vendor for an off the shelf solution that could be utilized by the NDUS Office and the NDUS institutions. Preliminary cost estimates are an implementation cost of \$1,554,354 and \$273,180 annually thereafter to maintain the system. The current system is antiquated and is at risk of failure. A replacement system will streamline processes & administrative effort, currently programs are managed through multiple access and excel databases, some of which are no longer supported by Microsoft. Any changes are costly and cumbersome to complete.

Budget System requires a ranking of the decision packages; The NDUS considers all decision packages of equal importance. The nature of the requests don't allow cross-ranking(System security; Student financial aid and scholarships; new programs; marketing; etc.)

- The NDUS Financial Aid Office (NDUS FAO) has undertaken an RFP for the implementation of an all-inclusive state aid processing and award system. This business case will outline the need and potential solutions.
- The NDUS FAO administers the following programs for ND resident students: ND State Grant, Academic/CTE/ND Scholarships, ND Scholars Program, ND Indian Scholarship, Dual Credit Tuition Scholarship, Professional Student Exchange Program, ND Career Builder Scholarship, ND Career Builder Loan Repayment.
- In 2020-21, the NDUS FAO processed 11,973 awards totaling \$22.3M in 2021-22, this increased to 14,248 awards totaling \$24.5M, reflecting a 19% increase in student awards. The increase was mostly contributed to the Dual Credit Tuition Scholarship; however, the ND State Grant and the ND Academic/CTE Scholarships also saw growth, in addition to the ND Career Builders programs.
- The NDUS FAO awards and issues state aid to students at the 11 public institutions, the University of Mary, University of Jamestown, Trinity Bible College, Rasmussen University, the five tribal colleges in the state, plus proprietary institutions, including the Emerging Digital Academy, Lynnes Welding Training, The Hair Academy and Josef's School of Hair Design. The institutions that are served award based on semesters, quarters, and other various term schedules, resulting in multiple processes for the NDUS FAO to understand and implement.
- Multiple processing systems are currently needed to issue these awards, including the ND State Grant System, Scholarship Management System (SMS), four separate Access

databases (require manual data entry), DocuSign applications, manual applications, Perceptive Content, MoveIT, LiquidFiles, SharePoint for payments, PowerBI for reporting of two programs, Excel spreadsheets for reporting on other programs. This results in the NDUS staff interacting with 13-14 separate systems to accomplish the day-to-day administration of the aid programs.

- Due to awards being processed in multiple systems, NDUS is unable to track total aid by student in order to accurately gauge per-student award levels.
- Current processes could result in the risk of losing business continuity and delays in awarding in the event of staff turnover. There are multiple ways to process each of the different programs, resulting in the limited staff of 3 being “siloed” in how we administer each program. There simply is not enough time in the daily administration of the programs to adequately cross-train staff.
- The programs administered using Access databases require manual data entry, which can result in human error, which poses a risk for audit findings.
- The current systems have no comprehensive institution notification system resulting in the NDUS having to manually notify campuses of awards and student updates, an inefficient and outdated practice.
- The current system lacks ability to save documents in one student file electronically. NDUS FAO data saving ranges from paper files to the use of Perceptive Content to saving within each of the separate processing systems.
- Communications with students range from an automated process in the current SMS to

215 University System

Agency 215

individualized emails to standard mail, resulting in confusion from students who have no standard method of communication from the NDUS FAO. Additionally, there is a cost associated with creating and mailing documents.

- The current SMS and State Grant Systems require significant CTS staff time to maintain, taking them away from other system projects.
- The Access databases, a Microsoft product, are no longer supported by Microsoft, which could result in a risk of data loss.
- Students have no portal to access their state awards, resulting in lack of transparency, as well as inefficient processes. Students often contact the institution, are subsequently referred to our office, our office returns calls/emails and then manually updates the student record. Finally, our office must manually notify the campuses of updates. A great deal of time and effort is spent in just keeping student records manually updated due to the lack of self-service. There was never a plan to integrate a student portal into the SMS.
- In conclusion, the current system has reached its lifespan and is outdated. It is inefficient and no longer effective in awarding state aid in the rapidly evolving educational environment. As a unified system, we need to look toward the future and be proactive in how we approach IT system development. An all-inclusive state financial aid processing and award system will result greater stakeholder satisfaction, student award transparency, reduce risk through audit findings, data loss or staff turnover, and will create efficiencies in award processing that can never be realized utilizing the current processes. In addition, a cost savings will be realized using more effective communication

215 University System

Agency 215

features and by freeing up NDUS FAO and CTS staff time to work toward the goals of the system rather than spending valuable time simply maintaining antiquated processing systems. Implementing an all-inclusive system now will allow the NDUS to plan for future growth and be proactive in developing processes that are efficient and effective as we build toward the future. As we intersect with two dozen institutions and tens of thousands of ND resident students, the NDUS FAO is at a critical point wherein we cannot undertake additional programs without creating either system efficiencies or by hiring additional staff, which would only delay the inevitable. The technology is available to make our state award processing state of the art.

Necessary resources for implementation (including FTE's)*: Preliminary cost estimates are an implementation cost of \$1,554,354 and \$273,180 annually thereafter to maintain the system.

Are resources being redirected or are they new or additional (including FTE's)*: New, no additional FTE's.

Who is served and impact of not funding*: 12,000 eligible financial aid recipients and all North Dakota public, private and tribal institutions, CTS, and NDUSO.

Currently three full-time NDUS staff manage these programs. Programs are mainly manual and use multiple Access and Excel databases, some which Microsoft no longer supports. Using this limited-functioning system, staff members also process awards, issue payments, track eligibility, and report to constituents. Over time, multiple iterations of this system have resulted in fragmented and costly development, reporting, and support. NDIT currently hosts part of this system with development support from CTS, System Office, and NDIT personnel. The need for a single-source processing system to adequately manage the growth of the state-funded programs is at a critical juncture.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2024

Replace existing application? No

Upgrade existing application? No

Development of new application? Yes

Anticipated Benefits:* Financial

215 University System

Agency 215

- Reduction in operating costs

- ROI

Operational

- Improved operational efficiency

- Reduction in break/fix

- Enhanced quality of product / service

- Compliance with state statutory requirements

- Less risk of audit findings due to manual processes

Market

- Consistent and efficient application processes for all ND resident students and all public, private, tribal, and proprietary colleges and institutions.

Students

- Improved student satisfaction

- Increased student retention

- Greater transparency in awarding

Staff

- Increased staff satisfaction

- Improved organizational culture

- Longer staff retention

- Improved efficiencies

Project Risk:* Project risks are if the project isn't funded there is potential data loss from current formats (Access database and remote drives); NDIT development costs could run beyond budget; staffing resource availability for North Dakota University Systems Office (NDUSO) and Core Technology Services (CTS).

215 University System

Agency 215

Issue/Solution:* Three full-time NDUSO staff manage these programs, mainly manually, through multiple Access and Excel databases, some which Microsoft no longer supports. Using this limited-functioning system, staff members also process awards, issue payments, track eligibility, and report to constituents. Over time, multiple iterations of this system have resulted in fragmented and costly development, reporting, and support. NDIT currently hosts part of this system with development support from CTS, NDUSO, and NDIT personnel. The need for a single-source processing system to adequately manage the growth of the state-funded programs is at a critical juncture.

To process one of the most significant awards, the ND Academic/CTE/ND Scholarship, the System Office initially utilized an Access database to manage the state financial aid award process. As the process matured, the existing functionality became stagnant, and solutions were custom fit to meet immediate needs. As awardees grew, the Access database began to fail, creating the risk of losing thousands of students' award data.

Proceed with RFP to determine a scholarship management solution.

Statutory Authority

ND Constitution Article IX, North Dakota Century Code Chapters 15-01 through 15-09, 15-68, 38-09, 38-11, 47.30.1, 61-33 and Sections 48-10-02 Sections 57-02.3-05, 57-62-02 through 57-62-06. ND Constitution Article X Section 21, North Dakota Century Code Sections 15.1-36-02 and 15.1-36-03.

Agency Description

The primary role of the Board of University and School Lands and the Department of Trust Lands is to manage the 13 permanent trust funds under its control, to preserve the purchasing power of the trusts and to maintain stable distributions to trust beneficiaries. Those beneficiaries include local school districts, various colleges and universities, and other institutions in North Dakota. Revenues are generated through the prudent management of trust assets, consisting of approximately 706,600 surface acres, 2.567 million mineral acres, and \$6.27 billion of assets (loans, marketable securities, and cash equivalents) as of June 30, 2021. The surface acres major source of income comes from grazing and agricultural leases, with significant revenue generated from rights-of-way, surface damage agreements and construction aggregate mining. The mineral acres are offered for oil, gas, coal, gravel, scoria leasing with significant revenue generated from bonus and royalty payments.

The Department also manages four additional trusts/funds: Capitol Building Fund, Strategic Investment and Improvements Fund, Coal Development Trust Fund, Indian Cultural Education Trust and Theodore Roosevelt Presidential Library Fund. These trusts/funds had total assets of \$1.07 billion as of June 30, 2021.

The Department administers the Uniform Unclaimed Property Act. In this roll the Department collects "unclaimed property" (uncashed checks, unused bank accounts, etc.), and processes owners' claims. This property is held in permanent trust for the owners to claim, but the revenue from the investment of the property benefits the Common Schools Trust Fund.

Additionally, the Department also operates the Energy Infrastructure and Impact Office, which provides financial support to political subdivisions that are affected by energy development in the state through the oil and gas impact grand fund. Assistance is provided through both the oil and gas impact grant program and the coal impact loan program. As of June 30, 2022, there is approximately \$400,000 remaining to be distributed.

Agency Mission Statement

Under the direction of the Board of University and School Lands, the Department of Trust Lands is to manage the land, minerals, and financial assets of the trusts in a way that balances the current needs of trust beneficiaries with those of future generations.

The mission of the Energy Infrastructure and Impact Office is to help build new infrastructure and reduce the impacts that energy development has on political subdivisions.

The Unclaimed Property Division mission is to act as custodian of unclaimed property surrendered by various business and government entities, working to reunite that property with the rightful owner or heirs.

Major Accomplishments

-
1. Managed permanent trust fund financial assets, which have grown from \$5.19 billion in 2020 to \$6.27 billion in 2021.
-

Major Accomplishments

-
- 2 2. Managed Strategic Investment and Improvements fund (SIIF) with legislative disbursements of \$889 million during the 2019-21 biennium and \$528 million during the 2021-23 biennium.

 - 3 3. Approximately 49% of the oil and gas wells operating in North Dakota contain a mineral asset managed in part by the Board.

 - 4 4. The Unclaimed Property Division returned \$13.0 million to owners during the 2019-21 biennium by paying 19,571 claims. Additionally, Unclaimed Property Division processed 6,783 holder reports totaling \$33.6 million during the 2019-21 biennium.

 - 5 5. Implemented new Financial Management and Accounting system on July 1, 2020 with continued development in 2023.

 - 6 6. Implemented new Land Management System phase one for the Surface Division on November 8, 2021, with continued enhancements and development in 2023.

 - 7 7. Minerals/Revenue Compliance software development kicked off in the fall of 2021 and will continue through 2023.

 - 8 8. Nearing completion of the Acreage Adjustment Survey project.

Critical Issues

- 1 The Board also manages state-owned minerals and the oil, gas and related hydrocarbons within the beds of the State's navigable waters (sovereign minerals). On behalf of the State, the Board oversees the Strategic Investment and Improvements Fund ("SIIF") which receives the revenues from sovereign minerals. The Sixty-Fifth Legislative Assembly's adoption of Senate Bill 2134 (SB 2134), codified as N.D.C.C. ch. 61-33.1, sought to establish state ownership of minerals below the ordinary high water mark of the historical Missouri riverbed inundated by Pick-Sloan Missouri basin project dams. The bill directed the North Dakota Department of Mineral Resources (DMR) to procure a qualified engineering and surveying firm to conduct a review of the US Army Corp of Engineers (USACE) survey segments limited only to the corps survey segments from the northern boundary of the Fort Berthold Indian reservation to the southern border of Sections 33 and 34, Township 153 North, Range 102 West. As fiduciary trust managers it is imperative that the Department has the resources in place to effectively and efficiently manage increasing transactions and collections. The workload will continue to grow as the energy industry expands. Currently, the Department has 4.0 FTE's dedicated to revenue compliance efforts of compiling, monitoring, collecting and verifying rent, easement, royalty and other income. The number of wells managed has increased, though not at the same pace as previous years. There has been an increase in transactions due in part to enhanced collection efforts. The Department has 3.0 FTE's dedicated to managing over 2.6 million mineral acres and nearly 8,000 oil and gas leases. The division tracks and interprets business transactions by lessees; assignments by depth, formation, wellbore or value; requests for pooling agreements; lease and title interpretation; royalty; authorization for participation in production; overrides; and analysis of drilling and production data necessary to hold a producing lease. The Department's Land Management Systems is in the process of development on the revenue compliance and minerals portion: 1. Royalty management systems automation of reporting data entry and royalty management/audit functions. 2. Enhanced internal and public access to more data for review and tabulating, of aggregated or specific tracts or transaction information through the customer portal. 3. Electronic file management storage and retrieval tools. 4. Replace in-house developed mineral management systems with software that is integrated with GIS (Esri ArcGIS), and includes workflow tracking, document management, calculation of payments and a public portal to support communications and transactions with lessees and users. Over the course of the next 12 months, the Department will be implementing the minerals phase of the Land Management system and continued development and enhancement of the surface portion of the land management system as well as the financial management and accounting system. While these systems will create heightened security, stability, and record storage efficiencies for the office the data conversion, training and implementation of new software requires substantial resources. While the workload has not diminished due to the energy industry activity leveling off, any budget cuts to the Department have the potential to have a negative impact on our stakeholders both internally with fellow state agencies that depend on our services and externally with our statewide constituents.
-

Performance Measures

Performance within the Department of Trust Lands is measured by its continued ability to manage the assets of 13 permanent trusts and seven other funds under its control; to preserve their purchasing power; and to create intergenerational equity.

Program Statistical Data

1. As of May 30, 2022, the Department managed an interest in approximately 49% of the 16,953 producing wells in North Dakota.
2. At the end of FY 2022, 7,796 mineral leases were managed by the Department.
3. At the end of FY 2022, 4,406 surface leases were managed by the Department.
4. The Department collected \$514.6 million in royalties during the 2019-21 biennium. The Department anticipates a record royalty income for fiscal year 2022 of over \$450 million.
5. Continued with a 98.5% leasing rate for agricultural tracts, collecting \$27.6 million in rental income during the 2019-21 biennium.
6. Received 288 rights-of-way and surface damage agreements during the 2019-21 biennium generating \$8 million in revenue.
7. The 13 combined permanent trust funds' financial assets managed by the Department continues to grow significantly. As of June 30, 2021, the total value of assets was approximately \$6.3 billion.
8. The combined distribution of funds to beneficiaries has grown from \$388,526,000 during 2019-21 biennium to \$445,525,000 in the current biennium.
9. The Unclaimed Property Division's assets and liabilities are separately managed and accounted within the Common School Trust Fund. The Unclaimed Property Division received \$33.6 million in abandoned properties and paid out \$13.0 million in claims during the 2019-21 biennium.
10. The Department's Large IT projects totaling \$3.6 million have gone live during the last 3 years including Unclaimed Property's KAPS in 2019, Accounting's Financial Management & Accounting system in 2020, Surface Divisions' Land Management System in 2021, and the Minerals Divisions' Land Management System is anticipated to be live by the end of 2022.

Explanation of Program Costs

The Board manages trust assets to ensure they maintain their integrity and those funds have grown markedly supporting beneficiaries and designated purposes. Fund balances have grown based on a combination of market-based rents paid by farmers and ranchers, consistent investment returns, and robust production of trust and sovereign minerals. Mineral royalty income, agricultural rents, and easement revenues are invested to provide income and trust growth that will benefit education now and for future generations. The Board, with guidance from the Department of Trust Lands, manage 13 permanent education trusts:

- Common Schools
- North Dakota State University

226 Trust Lands

Agency 226

- School for the Blind
- School for the Deaf
- State Hospital
- Ellendale State College*
- Valley City State University
- Mayville State University
- Youth Correctional Center
- State College of Science
- School of Mines (UND)
- Veterans Home
- University of North Dakota

* Dickinson State University, Minot State University, Dakota College at Bottineau, Veterans Home, School for the Blind, State Hospital, and the State College of Science are current beneficiaries of this trust.

Distributions from the Common Schools Trust Fund (CSTF) are based upon the growth in value of the trusts' financial assets over time, rather than on the amount of interest and income earned by each trust during the year. Biennial distributions from the permanent trust funds must be 10% of the five-year average value of trust assets, excluding the value of lands and minerals. Equal amounts are distributed during each year of the biennium. With the substantial growth in trust assets over the past 10 years, distributions to beneficiaries have significantly increased.

The per pupil distributions to K-12 education have grown from approximately \$460 per pupil per year during the 2011-13 biennium to a projected \$1,842 per student during the 2021-23 biennium. During that same period of time, distributions from the CSTF grew from approximately 4.5% of the cost of education to a projected 15.1% of the cost of education. With the inclusion of the 2021-23 contribution, the CSTF will have supplied over \$1 billion (\$1,076,040,000) to public schools in the last six years.

In addition, Department employees oversee management of the following funds:

- Indian Cultural Education Trust
- Capitol Building Fund
- Strategic Investment and Improvements Fund (SIIF)

- Coal Development Trust Fund
- Theodore Roosevelt Presidential Library Fund

The management of assets falls within the Minerals Management, Surface Management, Revenue Compliance, Investments, Unclaimed Property, and Accounting Divisions.

The Minerals Management Division is responsible for leasing and managing 2.6 million minerals acres including oil, gas, coal and other subsurface minerals. The division is responsible for the leasing of minerals acres and the maintenance of all records and requests pertaining to mineral ownership and leasing activity. The division tracks and interprets business transactions by lessees; assignments by depth, formation, wellbore or value; requests for pooling agreements; lease and title interpretation; royalty; authorization for participation in production; overrides; and analysis of drilling and production data necessary to hold a producing lease. This division involves three FTEs including the division director and two staff members who are dedicated to reviewing historical records, assessing the unique leasing arrangements, processing leases, division orders and assignments.

The Surface Management Division is responsible for leasing and managing 706,600 surface acres held in trust for various schools and institutions. The division has six FTEs, including the division director, and nine temporary non-classified employees. The major source of income generated from these lands comes from agricultural leases, with grazing being the predominant land use. Significant revenue is also generated from rights-of-way, salt-water disposal, and gravel and scoria mining.

The Revenue Compliance Division is responsible for developing and implementing procedures to assure the timely and accurate accounting of all royalties, bonuses, rents and other revenues received by the Department. The division is also responsible for developing, implementing and monitoring the managerial and system controls used by the Department to detect and prevent the misappropriation of trust assets and revenues. The division has four FTEs including the division director.

The Investment Division is responsible for directing, implementing, coordinating, and monitoring all aspects of the Land Board's investment program. The division has two FTEs, including the division director. Outside of monitoring funds and investment managers, the division administers the cash flows and obligations of the Permanent Trust Funds, Coal Development Trust Fund, Capitol Building Fund, Strategic Investment and Improvements

Program Goals and Objectives

Communication – To Cultivate positive relationships, facilitating the open exchange of ideas, opinions and information. To focus on the impacts to our communities through the engagement of strategic and coordinated activities that aligns the agency mission and the needs of our constituents.

Service to Others - To listen and respond effectively to our customers and colleagues to provide professional and efficient services.

Leadership and Teamwork - To encourage and motivate each other to innovate, grow and accomplish goals through collaboration and corporation across the Department.

Transparency - To be open, honest, upfront and visible in our actions.

Trust - Promote high-trust culture that supports a rewarding, healthy.

Enhance Management of Assets – Honor the fiduciary duty to protect and promote the management of assets to provide for perpetual disbursements through strategic growth.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The requested FTE will perform administrative work primarily associated with the leasing of oil & gas minerals along with the management of more than 2,500,000 mineral acres for the Minerals Division. The Mineral title specialist will help the Minerals Division successfully manage the customer service and records management needs created by the introduction of the new customer portal to more than 7,700 active oil and gas leases. Specifically, the applicant would be asked to correspond with portal users, create documents (leases etc.), help prepare assignments, and be responsible for mailing and emailing them in a timely manner. This would allow the current team to focus on the data management and calculations associated with the new IT System as well as be able to expand opportunities to create new revenue streams using the state’s existing mineral resources.

226 Trust Lands

Agency 226

The Minerals Division previously had 4-5 FTE's along with administrative support, but previous administrations have shifted resources elsewhere. North Dakota is the 3rd largest oil producing state in the country and the Department of Trust Lands, through its Minerals Division, produces over \$400 million in oil & gas revenue annually. However, the Minerals Division currently has only 3 FTE's, making it the smallest trust lands minerals department in the western United States.

Necessary resources for implementation (including FTE's)*: Necessary salary and benefit funding, as well as additional overhead costs.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE

Who is served and impact of not funding*: This new FTE will enhance constituent services by promoting quicker processing/response times, better communication, increased information access, and more efficient workflows. These improvements will be difficult to achieve without the additional position.

New FTE - Investment Analyst (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	343,942	1,800	345,742	1.00	368,283	1,800	370,083	1.00
Total	343,942	1,800	345,742	1.00	368,283	1,800	370,083	1.00

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department's current investment team consists of the Investment Manager and one Investment Analyst. Based on industry standards, for the size portfolio we manage (\$7 billion) and number of strategies we employ, we are understaffed. The addition of a second Investment Analyst would move us toward a more appropriate staffing level. The additional position would support oversight of the 26 investment managers and 33 investment strategies. In addition, in the past two years the Board has approved several new private asset classes (private equity, private debt, and private infrastructure), which require more detailed analysis and monitoring than traditional publicly traded asset classes. The new role will also support expanded investment sourcing, manager searches, and due diligence. Furthermore, the position will assist the incumbent investment analyst with operational duties, particularly involving such tasks as reporting, accounting, legal review, documentation, and the management of fund flows and cash.

Necessary resources for implementation (including FTE's)*: Necessary salary and benefit funding, as well as additional overhead costs.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE

Who is served and impact of not funding*: This new FTE will help achieve a more robust investment management program, promoting better returns, which serves trust fund beneficiaries such as North Dakota K-12 public education and universities, and ultimately the budget and citizens of North Dakota. Not funding this FTE could negatively impact trust funds investment performance.

New FTE - Administrative Officer (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	188,058	1,800	189,858	1.00	-	-	-	0.00
Total	188,058	1,800	189,858	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This additional administrative support is needed due to the increasing number of lessees and producing oil & gas wells, and the correspondingly increasing income from those resources and administrative complexity. The requested FTE will handle administrative work associated with the management of more than 700,000 surface acres and 2.4 million mineral acres for both the Surface and Minerals Divisions. The Administrative Officer will help both divisions successfully manage the customer service and records management needs created by the introduction of the new customer portal for our more than 2,500 surface lessees and Rights of Way customers and 7,700 active oil & gas leases.

Travel is expected twice a year to help conduct surface lease auctions across the state with a natural resource professional, eliminating the backlog created in Department processes when existing administrative staff traditionally traveled to auctions for 4 to 5 weeks straight.

Necessary resources for implementation (including FTE's)*: Necessary salary and benefit funding, as well as additional overhead costs.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE

Who is served and impact of not funding*: This new FTE will enhance constituent services by promoting quicker processing/response times, better communication, increased information access, and more efficient workflows. These improvements will be difficult to achieve without the additional position.

New FTE - Unclaimed Property Claims Processor (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	163,986	1,800	165,786	1.00	-	-	-	0.00
Total	163,986	1,800	165,786	1.00	-	-	-	0.00

226 Trust Lands

Agency 226

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Unclaimed Property Division has continued to increase its claims payments consistently over the last 5-7 years with little owner outreach beyond what is statutorily required. For the Division to meet its goal of a 50% return rate, additional claims processing staff is needed. Adding a claims processor will free up existing staff to increase outreach activities throughout the State to bring more awareness to the program. In turn, returning more money to the citizens of North Dakota. The Unclaimed Property Division has also increased its holder compliance activities, which will increase the volume of property coming into the division which will also increase the number of claims. Additionally, the implementation of the Revised Uniform Unclaimed Property Act in 2021 allows for property to be intercepted by such agencies as Child Support, the Court System, and the Tax department. These types of claims are more complex and require more staff time to process.

Necessary resources for implementation (including FTE's)*: Necessary salary and benefit funding, as well as additional overhead costs.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE

Who is served and impact of not funding*: This new FTE will enhance constituent services by promoting quicker processing/response times, better communication, increased information access, and more efficient workflows. These improvements will be difficult to achieve without the additional position.

Retirements (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	40,000	40,000	0.00	-	-	-	0.00
Total	-	40,000	40,000	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Anticipate two retirements during the 2023-25 Biennium. This lump sum will cover the cost of paying annual leave and 10% of sick leave.

Necessary resources for implementation (including FTE's)*: None

226 Trust Lands

Agency 226

Are resources being redirected or are they new or additional (including FTE's)*: Funding is for anticipated retirements and paying out annual leave and 10% of sick leave.

Who is served and impact of not funding*: Salary for current employees could be affected to payout leave at anticipated retirements.

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department of Trust Lands (Department) is requesting the following funding authority for the continuation of the development of our new software systems.

Continuation of Development of our Land Management System and Financial Management and Accounting System

\$2.0 Million for the continuation of development of our Land Management System (LMS) for both surface management and minerals management and for the Financial Management & Accounting (FMA) software for additional development including configuration of additional integration between the LMS and FMA systems. The Department of Trust Lands has replaced the basic foundation of their 30+ year old surface, minerals, and accounting software and now desires to build upon that foundation. The Department's systems may be enhanced to include the expansion of audit history with only a portion of the processes storing complete user activity currently. The expansion of data management and linking of connections in data (example – the Rights of Way application screen would also include leases associated with the tracts in the application). The Department's legacy systems operated as separate surface and minerals databases and are now combined into one system but still have related data running parallel rather than showing connections in one view. A portion of this funding would allow for the cleanup of one

hundred years' worth of permanent retention data related to School Trust Lands. LMS and FMA are integrated but through further development manual and complex processes would be streamlined. Current invoicing does not allow for editing/corrections of invoices. The current process involves multiple Department divisions to process invoices out of both the LMS and FMA systems; the Department handles hundreds of millions of dollars per year in financial transactions. Further sharing of information between systems would be beneficial to the cash management processes for the trusts and funds managed by the Department.

Customization of Microsoft Dynamics Customer Portal

\$2.4 Million for the continuation of development and customization for our Customer Portal. Our Department understands that the State is considering an enterprise solution for a statewide customer portal for multiple agencies to participate in. This funding would allow for our Department to continue moving forward with their current Microsoft Dynamics platform portal. The current development of the customer portal that the Department will debut is not intuitive for the user and their experience. The application pages do not allow for customization of language/descriptions on fields where simple explanation or direction would greatly help the customer filling out the application. Navigation of the system is a series of menu items and tabs without a logical flow that may only be achieved through full customization. An example of current applicant frustration is that a lessee who rents 8 quarters of land that would like to apply for weed and pest control cost share must submit 8 applications for single tracts, not one application for all 8 tracts. The fully customized portal has the capability to include URL linked tiles that direct the customer to other state agency websites. For example – Applicants could log in through their ND Log In and apply for a right of way with the Department of Trust Lands, then search for their unclaimed property, look at current state employment opportunities or click to navigate to ND Game & Fish to apply for their hunting license.

The Department generated three quarters of a billion in oil and gas royalty revenue alone over the 2021-2023 biennium. This portal allows operators to upload royalty reports that we can view directly in our Land Management System but the operator cannot view their historical documents that they have reported to us as the portal currently stands. Surface and mineral lessees, operators, rights of way customers and the general public may access Department records related to over 700,000 surface acres and approximately 2.5 million mineral acres of State Trust Lands.

Online Payment & Credit Card Processing

\$500,000 for the development of online payment processing that would integrate with both our LMS and FMA systems allowing the Department for the first time ever to handle credit card payments adding efficiency to our application approval processes.

Necessary resources for implementation (including FTE's)*: We will not request any FTEs relating to the large IT projects.

Are resources being redirected or are they new or additional (including FTE's)*: No.

Who is served and impact of not funding*: Stakeholders – Surface and Mineral lessees, ROW applicants, Sportsmen (sign posting look up), Special interest groups – Stockman's, Grazing Associations, Oil & Gas Companies reporting royalty information online, NDIC (integration with their data). Internal staff - improvements in systems were created with the new software but the next phase will create the efficiencies discovered after working in the system for the last year. Not creating the need for fewer FTEs but allowing for staff to grow in taking on new projects with less time spent in manual processes.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? No

226 Trust Lands

Agency 226

Upgrade existing application? Yes

Development of new application? Yes

Anticipated Benefits:* The continuation of developing the customer portal and online payment processing will benefit our customers that work long/irregular hours. Our lessees that are unable to get in touch with the Department between 8 and 5 will have 24 hour access to online applications and payment processing. Less dependency on USPS to deliver physical checks prior to deadlines, lessening the risk of canceled leases. Our Department may serve as a blueprint for other agencies looking to upgrade software/future Statewide customer portal.

Project Risk:* Increased costs/unanticipated delays with staff availability during the project while we continue to do our "daily work".

Issue/Solution:* Estimating higher than calculated costs associated, approving longer project schedule baseline with "buffers" built in for delays.

Equipment > \$5,000 Summary

	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
	Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

Total									43,000		43,000		43,000

Justification: The Department of Trust Lands manages over 700,00 acres of agricultural land in North Dakota. These land are located in 50 of the 53 counties within North Dakota. The Department manages these lands for the benefit of public education funding. The Department inspects these lands and must travel very rough terrain to access these land. An utility terrain vehicle (UTV) is essential in accessing school trust land were the topography is not conducive to traveling with a pickup truck. It is also essential to utilize UTV tracks systems that allow the UTV to travel in deep snow or muddy conditions.

Description of potential purchase: 2022 4x4 UTV with the following specifications: enclosed cab, heat, winch, at least 13 inches of ground clearance, at least 80 HP, rugged tires, and an utility track system for traveling through snow.

Statutory Authority

North Dakota Century Code Chapter 15-10-01.

Agency Description

As North Dakota’s Polytechnic Institution, Bismarck State College provides industry-responsive education to individuals seeking skills for employment or professional growth. BSC collaborates with business and industry leaders to develop curriculum and program pathways that impact the emerging economy. The purpose of BSC is to provide a hands-on, educational environment of the highest caliber at a reasonable cost; to maintain a warm and wholesome social atmosphere; to provide opportunities for advanced knowledge, improved skills, high ideals and ethical standards; and to make learning an enjoyable, rewarding and valuable experience. Students may 1) complete training in a career-technical program to begin, change or advance their career; 2) earn college credits for transfer to a four-year institution; 3) upskill through workforce training or; 4) take non-credit courses in subjects of personal interest or to keep professional skills current and relevant. The college also recognizes the importance of promoting applied research, economic development, public service and cultural awareness. The service areas include the immediate, contiguous geographical region for most programs, and statewide, regional or nationwide areas for select, unique programs. The goal of the college is to connect talent to opportunity and create an avenue for employees and employers to be successful together.

Agency Mission Statement

As North Dakota’s polytechnic institution, Bismarck State College focuses on student success through the delivery of affordable, flexible, high-quality, experiential learning enhanced by public-private partnerships.

Major Accomplishments

-
- 1 BSC students received more than \$610,000 in scholarship funds from the BSC foundation for the 2020-21 academic year, including 3 full-ride scholarships. Nearing 50% of student tuition is covered by grants and scholarships.

 - 2 More than \$600,000 in grants for equipment, partner funds and professional development was awarded to BSC faculty, staff and programs from the BSC Foundation.

 - 3 BSC awarded and processed \$13 million in financial aid for students.

 - 4 BSC received \$3 million from state fiscal recovery fund for the cost of new programs and applied learning which is based on pathways determined by Business and Industry Leadership Teams (BILT). This \$3M is anticipated to fund the start-up cost of the following new programs: Bachelor of Applied Science • Finance • Mechatronics Engineering Technology • Management** • Nursing** • Clinical Exercise and Sports Studies** Associate of Applied Science • Medical Laboratory Technician • Financial Technologies • Exercise and Sports Studies • Integrated Studies • Advanced Digital Technologies • Artificial Intelligence and Machine Learning • Respiratory Therapist** • Electrician** • Agribusiness** Certificates • Environmental and Safety Regulations • Leadership • Applied College Studies • Entrepreneurship • STEM College Studies • Communication & Humanities College Studies • Management • Accounting • Cybersecurity Fundamentals • Exercise Science • Ranch Operations • Sport and Fitness Technology • Sport and Fitness Pedagogy • Career Readiness • Diesel Technology • Graphic Design Technology • Applied Design Technology • Clinical Exercise Science • Sport and Fitness Management • Sport and Fitness Entrepreneurship • Data Analytics** • Project Management** • Business End-User Security** • Print and Digital Publications** • Digital Broadcasting** • Dialysis Tech** * pending HLC approval ** pending NDUS submission and approval and HLC approval

 - 5 In the 2021-22 academic year, the BSC Foundation received over \$5.2 million in contributions for endowed scholarships, direct gifts to programs and donations.

 - 6 Through BSC’s Continuing Education division, 2,115 unduplicated participants received non-credit training at BSC.

Major Accomplishments

- 7 BSC received \$38 million from the state fiscal recovery fund for the purpose of constructing a polytechnic building and related start-up costs for new programs not to exceed \$3 million. An architect and a construction manager at risk have been selected. BSC is expected to start construction in the Fall of 2022. The \$3 million related to the cost of new programs and applied learning is based on pathways determined by Business and Industry Leadership Teams (BILT). The additional \$3 million is anticipated to fund a BAS Mechatronics Engineering Technology, BAS Finance, BAS Clinical Exercise and Sports Studies, BAS Management, BAS Nursing, AAS Medical Laboratory Technician, AAS Respiratory Therapist, AAS Financial Technologies, AAS Exercise and Sports Studies, AAS Advanced Digital Technologies, AAS Artificial Intelligence and Machine Learning, AAS Electrician, AAS Agriculture Business, a Security Operations Center, Robotics, Digital Bus, Digital Hive, and numerous certificates such as Diesel Technology, Environmental and Safety Regulations, Leadership, Entrepreneurship, STEM College Studies, Communication and Humanities Colleges Studies, Management, Accounting, Cyber Security Fundamentals, Exercise Science, Sports and Fitness Technology, Sports and Fitness Pedagogy, Career Readiness, Graphic Design Technology, Applied Design Technology, Ranch Operations, Clinical Exercise Science, Sport and Fitness Management, Sport and Fitness Entrepreneurship, Data Analytics, Project Management, Business End-User Security, Print and Digital Publications, and Digital Broadcasting.

Critical Issues

- 1 Multi-purpose Academic/Athletic Performance Center - High D Careers resulting from a Clinical Exercise and Sports Studies education pathway are high priority occupations based on the following data. Burning Glass data indicates there are nearly 6,000 jobs posted in the last 12 months and the market is expected to grow. Employment opportunities can be found in many industries including sports, recreation, gaming and fitness and wellness. Career opportunities range from sports leadership and marketing to clinical exercise and coaching. Digital technology is unlocking unprecedented opportunities for growth in the sports industry, not only through the growth of non-traditional sports, but also through the potential to attract students and engage the community with innovative, customer experiences. As digital technology advancements are evolving, the future professional workforce in the sports industry looks much different. Changes are being made in every aspect of their job from recruitment, athletic performance and facility operation to fan experience, marketing and sponsorships. The impacts are not only creating skill gaps in the current workforce but also creating new job opportunities as these traditional jobs have been transformed. As North Dakota's Polytechnic Institution, BSC is tasked with providing more hands-on and experiential learning opportunities for our students and community. A new Multi-purpose Academic/Athletic Performance Center would provide a pathway for our mission expansion and opportunities to expand BSC programs and the applied research of Clinical Exercise and Sports Studies. A new Multi-purpose Academic/Athletic Performance Center would replace the BSC Armory. The Armory was designed to accommodate the ND National Guard in 1961 and is not compliant with infrastructure requirements of Equity in Athletics for Title IX nor the Americans with Disability Act (ADA). The quality of athletic spaces is a legal and financial concern for Equity in Athletics Title IX as there is no capacity to construct a shower facility for female athletes. The BSC Armory cinder block foundation creates life, health and safety issues for our students and community members with special needs. The cinder block framing does not allow for the expansion of restrooms, academic classrooms, instructional lab space, hallways, office space, Mystic Media studio, concessions, and gymnasium seating for those needing special accommodations. There are also significant deferred maintenance issues that would be alleviated with the new facility. In summary, this recommendation addresses the life, health and safety issues, and Equity in Athletics Title IX and ADA compliance factors, and it supports the expanded mission of BSC as North Dakota's Polytechnic Institution. BSC Multi-purpose Academic/Athletic Performance Center would be a new 80,000 sq. foot, 2,500-seat performance center that would expand BSC's polytechnic programming and applied research while addressing current life, health and safety issues, and compliance factors. The estimated cost of the performance center is approximately \$31,500,000 and includes academic programming and instructional delivery space, training/performance/evaluation infrastructure, and a competitive multi-purpose athletic space. BSC is requesting \$25,000,000 in state funding to support the academic infrastructure and plans to seek industry partners and grant funding for the remaining \$6,500,000.

Critical Issues

- 2 Inflationary increases have created a significant strain on the financial position of Bismarck State College. Inflation is one factor in employee turnover. With the rising prices, employees are looking for better-paying jobs to cover their monthly expenses. We are unable to quickly increase pay to keep up with inflation due to budget constraints. Employee turnover creates a deficit in knowledge retention and quality of service. In addition, it increases the cost of training and decreases our ability to find qualified talent for BSC. Inflation has also created a deficit in BSC's buying power which adds an additional strain on our ability to deliver quality programs. Auxiliaries are also impacted by the rising food prices as does our ability to offer affordable meals to students. In order to cover these costs, BSC will need a substantial increase in tuition rates which will affect the affordability of education to students. Students are already struggling with the cost of education which will cause a further decline in enrollments with students looking for a more affordable option to enter the workforce. This will create an adverse effect on the economy and limit the quantity and quality of talent that North Dakota will have for its workforce. BSC is currently undertaking an analysis to address compression issues and lack of labor force. Turnover rates have continued to rise over the last several years and our overall competitive position for recruiting and retaining good employees has diminished. Employee morale is negatively affected as workloads increase and pay remains stagnant compared to the market. Costs have increased due to an increase in the cost of hiring, training, and reduction in productivity. BSC continues to look for ways to enhance employee morale which would reduce the turnover rates. BSC is unable to compete with the private sector, especially in technical skills areas. BSC also continues to struggle in hiring faculty, staff and part-time employees due to turnover and employee market rates which is affecting the ability to deliver quality service. BSC has searched for qualified adjunct faculty but adjuncts are often unable to teach face-to-face classes which is a necessity as polytechnic programs require hands-on, project-based instruction. Without employee incentives and pay raises, BSC will continue to struggle to find quality faculty and staff.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools

complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

The instructional services include activities of all persons appointed to teaching positions of the college. These activities consist of regular classroom instruction in credit and non-credit courses, instruction to off-campus groups and distance learning, participation in departmental and college academic governance, and participation in other scholarly activities. Instructional and academic support includes the clerical, technical, and office support provided to the instructional programs, including materials used in the classroom.

Academic support services include library services and the resource and reference materials traditional to library operations, IVN, (which networks postsecondary institutions in North Dakota) and interactive television (which networks surrounding secondary schools). Current and accessible instructional equipment is provided to students, faculty, and staff.

Student services includes registration and student records, career advising and placement, admissions and financial assistance, academic and personal counseling and advising, and academic support services and disability support services. It also provides student activities, intramurals, and housing services.

Institutional support includes administrative leadership, executive management, planning for all institutional functions, fiscal operations, information systems support, general administration, human resources and payroll services, purchasing support, campus mail service, public affairs, institutional research, institutional effectiveness, and college advancement activities.

Facilities services include: building maintenance and operation, custodial services, utilities management, landscape and grounds care. Other essential services include: traffic/safety/security, facilities planning and solid waste disposal. Services and projects related to plant improvements include: new construction, completion of major improvements such as remodeling buildings, construction and repair of streets, sidewalks and parking areas. Also, services in the area of modifications/additions to buildings, boilers, utility, lines, etc., to become energy efficient and to classrooms and other areas to be handicap accessible.

Bismarck State College provides a variety of academic and career pathways to further our mission and meet the needs of our students and partners. BSC offers stackable certificates, embedded industry recognized credentials, and degree program in 102 different areas. Bismarck State College (BSC) leverages public private partnerships (P3s) to grow programs in five pillar areas: energy, cybersecurity, manufacturing automation, agriculture, and healthcare along with integrating Industry 4.0 standards.

In addition to our population of nearly 3,600 students in fall 2021, we serve 1,250 high school students and over 215 graduate and baccalaureate students from other state institutions. FTE for fall 2021 was 2,987. As of August 3, 2023, BSC employed 305 full-time equivalent employees.

BSC is located on the northwestern edge of Bismarck, on a hilltop near the east bank of the Missouri River. The vantage point provides a beautiful view of the river, the wooded river bottoms, and the bluffs beyond the west bank. The site owned by the College contains 106 acres. In addition to the main campus, BSC maintains a one-building campus in southeast Mandan for the Mechanical Maintenance program, land, and buildings north of Mandan for the Lineworker program.

Explanation of Program Costs

Program costs for Bismarck State College include costs of salaries and benefits for staff and faculty, operating expenses for instructional and support functions and facilities upkeep and maintenance expense. Major operating costs include the cost of library materials and resources, instructional supplies, faculty and staff training and development, the local computer network, computer and telecommunications infrastructure for the campus, costs of marketing BSC's course offerings and class times.

Program Goals and Objectives

Student success is ensuring students have the academic and career pathways and support needed to achieve their educational goals. As North Dakota's Polytechnic Institution, BSC offers students of all ages multiple academic and career pathways into the workforce or further education. Our stackable certificates, embedded industry recognized credentials, associates and baccalaureate degrees allow students to customize their programs speeding their way into high-demand high-priority occupations. This model aligns with SBHE's goals of offering affordable education when, where, and how students need it. Ensuring our programs are affordable is a key element in driving our fiscal stability.

Fiscal stability is about efficiently serving our students and public and private partners. BSC has a double bottom line: we have a mission bottom line and fiscal bottom line. Both bottom lines need to balance and complement one another. Over emphasizing mission leads to fiscal bankruptcy. Similarly, only focusing on fiscal matters leads to mission bankruptcy. Taken together, student success and fiscal stability allows BSC to link talent with opportunity.

Linking talent with opportunity is our third strategic goal. It means BSC offers the academic and Career pathways that prepare workforce ready graduates. The College is connected to our and public and private partnerships through CTE advisory boards and our new Business and Industry Leadership Teams (BILT). BSC has

227 Bismarck State College

Agency 227

BILT teams that provide overall direction and feedback in healthcare, agriculture, cybersecurity, manufacturing and automation, and energy related disciplines. Also, our K-12 partnerships allow students to graduate from high school with associates degrees.

Communication is our fourth strategic goal. Creating student success, being fiscally stable, and linking talent with opportunity requires BSC to communicate with all our stakeholders more efficiently and effectively. Staying connected with our students, our employees, our partners, and our communities allows us to execute our mission as North Dakota's Polytechnic Institution.

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the wellbeing of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. NDSWAP data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Additional funding is requested to provide 1 FTE for a Counselor/Professional position. Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased FTE and operational costs are new.

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2026

Description: The BSC Multi-purpose Academic/Athletic Performance Center would be a new 80,000 sq. foot, 2,500-seat performance center that would expand BSC’s polytechnic programming and applied research while addressing current life, health and safety issues, and compliance factors. The estimated cost of the performance center is approximately \$31,500,000 and includes academic programming and instructional delivery space, training/performance/evaluation

infrastructure, and a competitive multi-purpose athletic space. BSC is requesting \$25,000,000 in state funding to support the academic infrastructure and plans to seek industry partners and grant funding for the remaining \$6,500,000.

Construction of a new campus Multi-purpose Academic/Athletic Performance Center would replace the BSC Armory and allow adequate instructional programming space as BSC expands its polytechnic mission. The Armory is currently utilized by the Mass Communication academic program and provides classroom, lab and studio spaces. The expansion of the instructional programs would include the Clinical Exercise Science program designed for students entering the fields of Clinical Exercise Physiology, Physical Therapy, Athletic Training and other health-related sports studies programs.

The new facility would address the life, health and safety issues that BSC is currently facing in the existing Armory facility. The four air handling systems providing ventilation to the building are original to the building construction and do not provide for external air exchanges to the interior of the building. These systems are beyond their useful life, which results in decreased efficiency and increased maintenance costs. Two of the four air handling systems are not operational. The units currently do not have dehumidification capabilities or a cooling coil. The units do not provide adequate tempered air and could not accommodate the air purification systems that were installed in other facilities across campus during the pandemic and were needed to mitigate the spread of COVID-19.

An additional health, life and safety issue is the physical structure of the BSC Armory. The Armory was built in 1961 and the building construction techniques used at that time were intended to accommodate the ND National Guard’s operational needs. The facility was built on clay and shale soil with a cinder block framing. At that time, the building techniques did not require the removal of the clay and shale soil. As a result, there was significant settling of the facility which required the south portion of the building to be removed in 1996. Due to the cinder block construction, there are no expansion joints to allow BSC to extend the existing perimeter of the building for an expansion to include restrooms, academic classrooms, instructional lab space, hallways, office space, Mystic Media studio, concessions and gymnasium seating to accommodate individuals with special needs.

In addition, the Armory is not equipped with a fire suppression system and there are also additional significant deferred maintenance issues such as a majority of the roofing is original to the 1961 building. The improvements needed far exceed the cost of new construction.

The Armory was designed to accommodate the ND National Guard in 1961 and is not compliant with American Disabilities Act (ADA) infrastructure requirements nor does it accommodate Equity in Athletics for Title IX and NJCAA athletic standards for competition. For years, Bismarck State College has been competing in a facility that does not provide adequate space for gymnasium height or length to comply with NJCAA requirements. The current athletic facility is a legal concern for Equity in Athletics Title IX because there is no capacity to construct a shower facility for female athletes.

With a compliant life, health and safety multipurpose facility, BSC would have the infrastructure capacity to expand academic programs, co-curricular activities, and have an athletic training and competition facility reflective of the North Dakota University System. The multipurpose performance center would rectify the compliance factors regarding ADA, Equity in Athletics Title IX and NJCAA facility requirements.

As North Dakota’s Polytechnic Institution, BSC is tasked with providing more hands-on and experiential learning opportunities for our students and community. This new facility would provide a pathway for our mission expansion and opportunities to expand BSC’s programs and applied research of Clinical Exercise in Sports Studies. In summary, this recommendation addresses the life, health and safety issues, and compliance factors, and it supports the expanded mission of BSC as North Dakota’s Polytechnic Institution.

Statutory Authority

North Dakota Century Code Chapter 15-10-01.1.

Agency Description

Lake Region State College (LRSC) is a student-centered, open access, comprehensive community college within the North Dakota University System. The college provides quality academic education, career and technical training, workforce training, educational outreach opportunities, and life-long learning. LRSC serves approximately 3,000 students each year through on-campus and distance delivery. LRSC is proud to collaborate with other NDUS institutions and participates in statewide articulation agreements in early childhood education and nursing. LRSC is also a member of the Dakota Nursing Program with Bismarck State College, Dakota College at Bottineau, and Williston State College, the Dakota Precision Agriculture Consortium with Dakota College at Bottineau and Williston State College, and the Northern Information Technology Consortium with Dakota College at Bottineau, Minot State University, Turtle Mountain Community College, and Williston State College. In addition, LRSC has numerous program articulation agreements with Mayville State University, Minot State University, University of North Dakota, and Valley City State University to provide seamless transfer between associate’s and bachelor’s degree options. and an Associate of Applied Science in Law Enforcement through innovative computer-based training and e-learning technology. LRSC, in cooperation with local law enforcement agencies, offers its Peace Office Training program in Devils Lake, Grand Forks, and West Fargo. LRSC also offers its Nursing program in Grand Forks and Mayville.

Agency Mission Statement

We enhance lives and community vitality through quality education.

Major Accomplishments

- 1 Completed construction of the Hofstad Ag Center. LRSC raised more than half the funds needed for match and the program has maintained enrollment capacity at the LRSC Dakota Precision Ag Center.
- 2 Upgraded air conditioning and siding of the Gilliland Residence Hall.
- 3 Received continued accreditation for the next 10 years from the Higher Learning Commission - 2020.
- 4 Have signed numerous Apprenticeship agreements with employers in high workforce demand careers. We have Simulation Technology agreements with Canadian Aviation Electronics & Northrup Grummen Corporate (NGC). A General Studies agreement with NGC. Information Technology agreements with CTS and NDIT covering three areas: cyber security, network analyst, and IT support tech. Nursing agreements with Good Shepherd, Lutheran Sunset Home, Sanford Health and Nelson County Health in three areas: CNA, LPN and RN).
- 5 Expanded the Peace Officer Training program with a summer academy in West Fargo.
- 6 Received CHS Foundation Award for precision ag equipment to enhance hands-on learning - 2022.
- 7 Received Bremer grant to expand nursing education online and increase mobility - 2021.
- 8 Offered a Wind Energy Technology training program in Tioga through Train ND-Summer 2020.
- 9 Met the challenges of creating a COVID-19 safe environment for students, staff, and faculty per current guidelines.
- 10 Endowments continue to flourish thanks to the ND Challenge Match program.

Major Accomplishments

-
- 11 LRSC serves the most North Dakota high schools in dual credit offerings, with more than 65 schools participating in the program. Students take courses face-to-face at their school or enroll in online classes through LRSC. In response to school needs, LRSC will add sections to current transfer classes and offer CTE courses. At the Jamestown CTE Center, LRSC is working with the school district to provide prerequisite classes aligned with the Dakota Nursing Program and also is offering an Information Technology track for high school students.
-

Critical Issues

-
- 1 The wind turbine is ten years old. There has been extensive down time which is affecting finances in three directions. 1. increased maintenance, 2. increased utility costs, 3. decreased revenue for energy that is sold. Please see attachments for graphs showing the changes. From FY20 to FY21, revenues dropped by 36%. From FY20 to FY22, revenues dropped by 38%. Currently, the turbine is not in service and has been out of service for two months. LRSC is attempting to purchase a gearbox, but is waiting for production. It is possible the turbine will be out of service through the end of 2022. Meanwhile, the annual payment of \$434,225.56 will need to be made. Using FY20 as a base year, FY21 with drop in revenues, increase in maintenance, and increase in utilities netted a loss of \$100,427.15. Using FY20 as a base year, FY22 with drop in revenues, increase in maintenance and increase in utilities netted a loss of \$118,256.47. The net affect on FY23 will be worse because the turbine will be down considerably more. The cost of a gearbox (approximately \$600,000), plus the FY21 loss (\$100,427.15) plus the FY22 loss (\$118,256.47) totals \$818,683.62 as of 6-30-22.
-
- 2 While many of the COVID-19 pandemic challenges are behind us, there is still the lagging results of a decline in the work force and high school graduates. A declining population base in the surrounding communities continues to concern Lake Region State College as we strive to address the demographic issues facing the state as a whole. The college continues to be entrepreneurial in its outreach efforts to ensure adequate enrollment to sustain the college infrastructure and basic services. Strategic planning is a high priority and a key component to our plan is to expand LRSC's presence in Grand Forks. LRSC began to offer dual credit courses in the Grand Forks Public School System in the fall of FY 2011 and has continued to expand. LRSC rented space across the street from the Altru Hospital and offered its Nursing program for the first time in Grand Forks in Fall 2014. LRSC established its Launch program on the campus of UND in the fall of FY 2010 and continues to prepare underprepared students who wish to transfer to UND. LRSC's Launch program has been a successful component for increased student retention. Our ultimate goal is to provide vocational and technical training opportunities in Grand Forks and stem the tide of ND residents attending MN institutions for training. The personnel needed to respond to programmatic and administrative needs of North Dakota continues to be a challenge because of funding limitations. Much of the institution's growth in programmatic opportunities provided to North Dakota citizens has been the result of LRSC's innovation and effective use of non-appropriated funding to explore new venues and modes of delivery. Maintaining enrollments will require additional staffing focused on educating the general public on the unique educational opportunities available at LRSC. Increased state appropriations through the higher education funding formula have been greatly appreciated.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003

passed by the 2001 Legislative Assembly.

Program Statistical Data

PROGRAM METRICS

Licensure exams and certification are used by some career and technical education programs for assessment of student learning and to provide students with professional and educational advancement opportunities. Students in the Automotive Technology, Fitness Trainer Technician, Marketing, Information Technology, Precision Agriculture, and Wind Energy Technician programs can choose to take industry certification exams.

The Licensed Practice Nurse, Associate Degree Nurse, and Peace Officer Training programs prepare students to sit for national exams that are required for employment in the industry. For the Licensed Practical Nursing program, graduates take the NCLEX-PN. The first-time pass rate goal is at or above 80%. The reported pass rate for 2020-2021 was 100%, 2019-2020 was 97%, and 2018-2019 was 100%. For the Associate of Nurse Degree program, graduates take the NCLEX-RN. The first-time pass rate goal is at or above 80%. The reported pass rate for 2020-2021 was 79%, 2019-2020 was 95%, and 2018-2019 was 84%. For the Peace Officer Training program, graduates take the ND POST Licensing Exam. The reported pass rate for 2020-2021 was 98%, 2019-2020 was 100%, and 2018-2019 was 100%.

Placement rates represent the percentage of total career and technical education program graduates who obtain employment in their field of study or who are seeking additional education. The data is collected six months after the end of the academic year to allow students time to obtain employment. The 2020-2021 placement rate for all students graduating with a career and technical education credential was 96%.

The persistence rate is the percentage of students enrolled in the fall semester who are either enrolled in the subsequent spring semester or graduate before the subsequent spring semester. The 2021-2022 persistence rate was 83%, 2020-2021 was 77%, and 2019-2020 was 83%. The retention rate is the percentage of students enrolled in the fall semester who are either enrolled in the subsequent fall semester or graduate before the subsequent fall semester. The 2020-2021 retention rate was 64%, 2019-2020 was 70%, and 2018-2019 was 63%. The graduation rate is the percentage of students enrolled in the fall semester who complete a program within three years. The 2018 graduation rate was 51%, 2017 was 47%, and 2016 was 49%.

Explanation of Program Costs

The program costs of LRSC include expenses associated with instructional support and the delivery of instructional services, physical plant (Facilities Upkeep and Maintenance) operational expenditures, and the academic, institutional and student support systems needed to operate a comprehensive community college.

Program Goals and Objectives

The main objectives of Lake Region State College are threefold:

- 1) To provide affordable, high quality instruction in curricular areas approved by the Board of Higher Education,
- 2) To provide access to community and state-wide educational services at the collegiate level and
- 3) To provide an atmosphere of scholarly activity wherever its services are delivered.

In addition to the instructional services provided to carry out its objectives, the college maintains other support services required to meet the needs of all

228 Lake Region State College

Agency 228

students and student groups, to provide leadership and direction, and to coordinate all institutional affairs and operating guidelines in compliance with the policies and regulations established by the Board of Higher Education, the State of North Dakota, and the federal government.

Physical facilities are planned and maintained to create an operating environment conducive to learning through the most economical means possible.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Includes restoring the Minimum Amount Payable NDCC 15-18.2-06; slows funding decreases as credit production drops. Provides additional time for planning and reduction of fixed operational costs.

Necessary resources for implementation (including FTE's)*: No new resources.

Are resources being redirected or are they new or additional (including FTE's)*: No new resources

Who is served and impact of not funding*: If not funded, the impact could be increased tuition costs to students and may require institutions to implement cost reductions without time to evaluate the most efficient strategy.

Behavioral Health Initiative (Base) (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	109,000	-	109,000	0.00	-	-	-	0.00

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the well-being of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. NDSWAP data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased operational costs are new.

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

End Date (MM/DD/YYYY): 06/30/2024

228 Lake Region State College

Agency 228

Description: A gearbox is needed for the Wind Turbine. It is currently out of commission. The Gearbox was originally quoted at \$350,000 but then was sold before we could get the ok to purchase. We are currently in line waiting for a gearbox to be made, but in the mean time, LRSC is losing revenues from power generation and savings on the utility bills. The \$600,000 should cover inflation and some of the lost revenue/increased power costs.

Statutory Authority

North Dakota Century Code 15-10-01.1.

Agency Description

Williston State College (WSC) is a comprehensive community college serving northwest North Dakota and beyond with Associate of Arts, Associate of Science, Associate of Applied Science, certificate education in academic transfer, and vocational education, as well as Workforce Training as a service to regional employers.

Agency Mission Statement

"Where the People Make the Difference"

Major Accomplishments

-
- 1 BVLOS Drone Program

 - 2 Reorganized campus departments and the Business Office to create a clear chain of command and accountability for deliverable work. The Business Office is revising policies and procedures to be more congruent with other NDUS and State Policies, and these policies and procedures are being rapidly disseminated to other campus divisions to further campus compliance in areas previously reported as audit findings.

 - 3 Dr. Bernell Hirning started with WSC effective 07.01.21

 - 4 Addition of Clay Target and Women’s Hockey to WSC athletics. Clay Target to start Fall FY23 and Hockey to start Fall FY24

Critical Issues

-
- 1 Succession Planning: A major factor contributing to the need for succession planning is the continued trend of staff turnover due to energy industry companies in NW North Dakota and employees leaving WSC for better regional wages. With continued turnover in management and staff, it is apparent that there is a need to continue to “cross-train” staff members, division directors, and members within the WSC Executive Cabinet. Employee turnover creates a gap of institutional knowledge, productivity and compliance with Federal, State and NDUS policies. This can be mitigated by an expansion of training within departments, automated processes and incentive compensations for retention. In addition, shared oversight and job duties can help bridge the gap while a new or incumbent employee is learning the new job and its responsibilities. WSC is understaffed in a few critical support areas, namely in academic advising and business office operations.

 - 2 Financial Stability: Enrollment has not bounced back since COVID19

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board’s vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System. These systems provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system’s biennial report on its strategic plan, which incorporates the “flexibility with accountability” expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

WSC serves a student population of approximately 981 per semester with full time equivalent student enrollment for Fall 2021 at 667.53 and Spring 2022 at 647.45. The Fall 2021 decreased 5.09% from Fall 2020 and the Spring 2022 decreased 4.77% from Spring 2021. Credit enrollment is estimated at 690.36 FTE for each year of the 2023-25 biennium. WSC - Workforce Training (TrainND Northwest) in FY2021 served 4,452 unduplicated individuals and 6,350 duplicated. The total contact hours generated at TrainND northwest is 29,969.50.

Explanation of Program Costs

Program costs consist of salaries, benefits, operating, equipment, capital improvement, extraordinary repair, and major capital project expenses for Williston State College. The expenditures fall into the functions of instruction, support services, and facilities, upkeep, and maintenance. The budget is planned around campus and State Board of Higher Education strategic plans as well as aligned with the Roundtable Cornerstones.

Program Goals and Objectives

WSC strives to provide high quality instruction in curricular areas approved by the North Dakota Board of Higher Education. The College provides community, regional, and statewide educational services at the local and collegiate level, while also providing an atmosphere that promotes regional growth, scholarly activity and economic diversity and development. As a steward of public funds and resources, WSC provides the support, leadership, and direction needed to manage and maintain the College academically, economically, and physically to the benefit of students, taxpayers, and patrons in northwest North Dakota.

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the wellbeing of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. NDSWAP data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Additional funding is requested to provide 1FTE. Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased FTE and operational costs are new.

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

Start Date (MM/DD/YYYY): 7/1/2023

End Date (MM/DD/YYYY): 11/01/2024

Description: Sanford Health has a plan to transform the City of Williston into a Medical Hub for this region of the country. Starting in May, 2022, Sanford Health will be building a 90,000 square foot clinic, to include 85 exam rooms and 40 doctors at full staffing. Construction is scheduled to be complete in the fourth quarter of 2024. For this clinic to be fully functional Sanford Health will require a fully trained workforce in the Williston area to provide the needed resources for the clinic. Statistics show that on average, each doctor will require an average of seven trained staff members.

Williston State College and TrainND Northwest can provide a trained Nursing pool for this clinic through the RN Nursing Program at WSC, and the CNA program at TrainND Northwest. For all additional training needs, WSC is prepared to create any Certificate or Associate’s program needed for the Clinic. For Bachelor and Master-level training needs, WSC is prepared to partner with UND, as well as our other NDUS institutions to bring the needed training from their universities to Williston. Conversations with UND have already begun, with President Armacost and his Medical School Team interested and eager to be part of this project. Sanford’s desire is that all training take place in Williston.

For WSC to expand in this manner, additional space will be needed for program and faculty growth, not just from WSC, but also from our NDUS partners.

Statutory Authority

ND Constitution Articles VIII and IX; North Dakota Century Code Sections 15-11 and 15-22.

Agency Description

The University of North Dakota is the chief opportunity engine for North Dakota and UND students. Founded in 1883, six years before North Dakota was granted statehood, UND is among the nation’s premier regional public research universities and is at an exciting point in its 135-year history. Classified as a “Doctoral University: Higher Research Activity” institution by the Carnegie Foundation for the Advancement of Teaching, UND is characterized by a solid foundation of the liberal arts, high quality students and faculty, a diverse curriculum, a widely recognized program of graduate education and research, law and medical schools praised for quality and innovation, rich cultural resources, and an outstanding record of alumni support. Its major academic divisions include Arts and Sciences, Aerospace Sciences, Business and Public Administration, Education and Human Development, Engineering and Mines, Nursing and Professional Disciplines, Medicine and Health Sciences, Law, Extended Learning and the School of Graduate Studies. Long a provider of distance education, UND is expanding their robust online presence.

Agency Mission Statement

Our mission is to provide transformative learning, discovery and community engagement opportunities for developing tomorrow’s leaders.

UND’s vision is to be the premier flagship university in the Northern Plains.

Major Accomplishments

- 1 Recruited new VP Academic Affairs & Provost, Dr. Eric Link and hired Karla Mongeon-Stewart as VP for Finance and Operations/COO. Also hired three new deans: Robert Kraus for the Odegard School of Aerospace Sciences, Brian Pappas for the School of Law, and Chris Nelson for the Graduate School.
- 2 On Aug. 9, 2021, UND became the first institution in the country to join the new U.S. Space Force University Partnership Program, which will open the door for opportunities in research and workforce development. UND began its first phase of the National Security initiatives focused on space and autonomous systems.
- 3 In FY2022, UND had 8,855 donors, including 500 first time donors, make fundraising commitments totaling \$72.1 million. This is the second highest fundraising total in UND Foundation history and includes a 22 percent increase in faculty endowed positions and an endowment payout of \$11.1 million which is the highest in the last five years.
- 4 UND’s new \$80 million Memorial Union, a home away from home for students, opened in August 2021.
- 5 UND graduate students also are enjoying a new space to call their own on campus, the Gershman Graduate Center. The renovated Center was made possible by the generosity of Hal and Kathleen Gershman and opened fall 2021.
- 6 In fall 2022, UND will open the new Nistler College of Business & Public Administration. This was a successful joint funding effort between the State of North Dakota, individual donors, and the city of Grand Forks.
- 7 UND has a \$1.7B economic impact to the state and region.
- 8 The School of Medicine & Health Sciences created of the world’s first Department of Indigenous Health.
- 9 UND created a Drilling and Completions Lab, a full scale oil and gas drilling rig, and a pilot-scale plant to extract rare earth elements from coal which directly benefits North Dakota’s energy industry.

Major Accomplishments

- 10 UNDAAF secured \$18M in funding to complete the final phase of the Pollard Athletic Center (PAC). New athletic space in the PAC and Memorial Village P3 will allow UND to vacate and raise the Hyslop Sports Center, a reduction of 270,00 GSF which will eliminate \$46M in capital renewal needs. All work is targeted to be completed by 2024.

- 11 Executed UND Housing P3 agreement to right-size UND’s residence life managed student housing. Project will result in a 1M reduction in GSF and will eliminate \$200M in capital renewal needs. New and remodeled beds will be delivered in the summer of 2022, fall of 2022 and summer of 2023, with final demolition work planned for 2024.

- 12 Remodeled and modernized O’Kelly Hall via three phases of remodeling with \$40 million of local funds, which addressed \$20M in capital renewal needs.

- 13 Completed \$30M in deferred maintenance bonding work, the majority of the work was centered on building envelope (i.e., roofs, tuck pointing, new windows, new doors) work. Mostly historic buildings in the core of campus.

- 14 UND had dramatic increases in key Research & Development measures over FY21 over FY20. R&D expenditures increased by nearly 29 percent, and expenditures from Federal resources increased nearly 32 percent.

- 15 Raised through private donations more than 300,000 in last biennium for the Angel Fund to address critical financial needs of our students.

Critical Issues

- 1 Mental health issues on campus with students, faculty and staff. There is a need to increase mental health resources.

- 2 Addressing the concerns around inflation.

- 3 Attracting and retaining top talent for faculty and staff.

- 4 Outdated and legacy technological systems, so support for high-speed computing infrastructure needed.

- 5 Pressures of maintaining enrollment numbers in national/regional competitive markets.

- 6 Continued support to research and development for economic diversity.

- 7 Flexibility to enhance technology to meet the specific needs of a research university.

- 8 Make sure we are responsive to student needs in terms of educational delivery methods

- 9 Addressing the emergent financial needs of our students such as food insecurity, housing insecurity, etc

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board’s vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid, and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system’s biennial report on its strategic plan, which incorporates the “flexibility with accountability” expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

The University of North Dakota in addition to the above has developed and expanded the use of the following:

- 1) Financial Accountability

- a. Monthly model statements (variance reports) reflecting year over year as well as budget versus actual performance for all funding sources, with stop light indicators
- b. Enhanced student credit hour projection including a broader campus involvement
- c. Inclusive strategic investment planning and awarding
- d. Broadening the awareness of university financials across the institution via presentations, townhalls, committee reports, alumni retreats
- e. Active review of tuition revenue to plan comparison for real time decision making

2) External Benchmark Vendors

- a. Helio-Campus
 - i. Administrative efforts
 - ii. Internal effort and cost trends (FTE, salary spending, etc.)
- b. Market Pay
 - i. Manage internal pay equity
 - ii. Manage multiple salary surveys for better analysis and improve efficiency
- c. Pay Equity Study for all employees
 - i. Request for proposal (RPA) for an outside company to do the pay equity study
 - ii. Level set compensation (level set all job families)

Program Statistical Data

UND at a Glance

UND enrolls more than 13,772 students in nine colleges: College of Arts & Sciences, Nistler College of Business & Public Administration, College of Education & Human Development, College of Engineering & Mines, College of Nursing & Professional Disciplines, School of Graduate Studies, John D. Odegard School of Aerospace Sciences, School of Law, and School of Medicine & Health Sciences.

230 University of North Dakota

Agency 230

UND offers a total of 222 fields of study, including 89 undergraduate majors, 78 undergraduate minors, 56 master's programs, 35 doctoral programs, two professional programs (medicine and law), and a specialist diploma program in educational leadership.

The University also has a growing distance learning program that offers more than 72 online degree programs (40 graduate and 32 undergraduate).

UND's diverse student body represents all 50 states and more than 99 countries.

UND has approximately 260 registered student organizations, strong fraternities and sororities, a nationally recognized residence hall system, engaged campus student leaders, and strong cultural centers, including an American Indian Student Services Center.

Close to 522 American Indian students are enrolled at UND; they utilize approximately 30 programs and organizations specifically designed to meet the academic, social and support needs of underserved populations. The number of students and the number and strength of programs combine to make UND one of the top schools in the nation for educating American Indian students.

A top-to-bottom renovation and expansion has established Wilkerson Commons as the region's premier student dining facility. In addition to expanded dining options, Wilkerson serves students with a wide range of settings to enhance gathering, recreation, study and fellowship.

The School of Medicine & Health Sciences, Robin Hall and Collaborative Energy Complex address the future of health care education, unmanned aircraft systems (UAS) development, and energy, respectively.

UND's John D. Odegard School of Aerospace Sciences and the College of Engineering & Mines have been especially involved in UAS research, education, and service, and UND's UAS Research Compliance Committee is the first in the nation to examine protocols, privacy, and other concerns.

The University is an anchor of the Red River Valley Research Corridor. Prominent facilities in this endeavor include the Ina Mae Rude Entrepreneur Center, the Norman Skalicky Technology Incubator and the Tech Accelerator Building.

On the other end of the campus, the internationally recognized Energy & Environmental Research Center (EERC) features state-of-the-art facilities on 15 acres and employs about 210 scientists, engineers, and support staff. The EERC is one of the world's leading developers of cleaner, more efficient energy technologies as well as environmental technologies to protect and clean our air, water, and soil.

UND has an international reputation for research and scholarship, notably in the health sciences, energy, and autonomous systems. In FY 21, UND reported \$143 million in research expenditures in the NSF HERD Survey – \$102 million of this was external funding of which \$58 million was from federal sources, \$34 million state, and \$8 million private.

UND invested \$2.2 million of internal strategic funds in Grand Challenges research areas and High Performance Research Computing.

Explanation of Program Costs

Program costs consist of salaries and fringe benefits, operating and equipment. A special line item is included for capital assets.

Program Goals and Objectives

The One UND Strategic Plan is the product of a process that involved more than 900 individuals coming together to craft the future of the University of North Dakota. This plan is truly an illustration of One UND, touching all corners of the University: research, enrollment, online education, creation of 21st century programs, alumni relations, and so much more. The plan has seven goals with specific metrics to meet in areas of liberal arts, enhanced graduation rates, offering quality academic programs and enhancing our enrollments, increasing our research profile and external funding; enhancing our inclusive academic community to serve all students, serving the military, and enhancing our philanthropy to support our academic mission.

UND continues to pursue the One UND Strategic Plan goals:

Goal 1: Provide a strong undergraduate liberal arts foundation

Goal 2: Increase undergraduate, graduate, and professional graduation rates

Goal 3: Deliver more educational opportunity online and on-campus

Goal 4: Enhance discovery at a level consistent with most research-intensive universities (Carnegie R1)
inclusive campus climate

Goal 5: Foster a welcoming, safe and

Goal 6: Meet educational needs of active duty and reserve military personnel, veterans and their families

Goal 7: Attract support for the University by actively engaging alumni and donors about each goal.

Progress toward those goals can be found here: <https://und.edu/about/mission/strategic-plan.html>

A Strategic Planning committee began work in February 2022 to create a new plan that will guide the work of the University into the future. This plan will be completed by January 2023, and will be a living document, which will be evaluated each year going forward. It will also create new vision, mission, and values statements for the University.

Total	660,000	-	660,000	3.00	-	-	-	0.00

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the wellbeing of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. NDSWAP data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Additional funding is requested to provide 2 FTE - full-time clinicians and 1 FTE post-doc position. Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased FTE and operational costs are new.

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

Description: Science, Engineering, and National Security Corridor \$11,600,000 GENERAL FUND APPROPRIATION \$2,900,000 OTHER FUNDS

This request outlines changes across several buildings on campus to improve academic and research spaces; address current health-safety issues; reduce underutilized space; and eliminate/correct significant deferred maintenance. The request also leverages UND’s approved and locally funded Athletic projects (Fritz Pollard Center addition and Memorial Village P3) by repurposing the vacated Hyslop Sports Center site adjacent to UND’s science buildings and the College of Engineering and Mines (CEM) and into a science, engineering, and national security corridor which will integrate science-technology-engineering-math (STEM) academic spaces with much needed research and training space.

Description	Fund	BU-Dept	Fin Class	Account	2023-25 Agency Request	2023-25 Executive Recommendation	Total Estimated Project Costs	2025-27 Operating Costs	2027-29 Operating Costs
No operating impact, this first tranche of funding is mostly for design and to demo Hyslop to prepare the site for a new building. This work would reduce our operating costs.	001	230-9000	23050	682000	11,600,000	-	11,600,000	-	-

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 04/01/2023

End Date (MM/DD/YYYY): 11/30/2024

Description: Project to remove approximately 16.2K SF of obsolete facilities in poor condition and replace them with a state-of-the-art 28K SF material handling and processing facility which can support innovative technology developments that target North Dakota energy initiatives. Funding for the project will be provided by self-liquidating lease revenue bonds whereby the University of North Dakota Alumni Association and Foundation will sell bonds on behalf of the North Dakota University System, as well as \$3M in local funds made available for the project. Debt will be retired via lease payments funded through the F&A indirect cost recovery made possible through sponsored research projects. EERC’s primary electrical distribution system has a critical reliability issue requiring an upgrade from a 4.166-kV system to a 12.47-kV system. Estimated bond payment is \$1,5M per year.

Statutory Authority

ND Constitution Articles VIII and IX; North Dakota Century Code Chapter 15-52.

Agency Description

The University of North Dakota School of Medicine and Health Sciences (SMHS) is recognized nationally as one of the outstanding community-based medical schools in the country and is a model for high-quality educational programs, efficiently delivered, with an emphasis on primary care. In addition to medical student and resident education, the SMHS provides educational opportunities for a wide variety of biomedical researches and allied health service professionals including biomedical science, medical lab science, athletic training, physical therapy, occupational therapy, physician assistant program and public health. Further, the SMHS is acknowledged for its leadership in providing inclusive education in the health professions through its commitment to American Indian students and other trainees.

Agency Mission Statement

The primary purpose of the University of North Dakota School of Medicine and Health Sciences is to educate physicians and other health professionals and to enhance the quality of life in North Dakota. Other purposes include the discovery of knowledge that benefits the people of this state and enhances the quality of their lives.

Major Accomplishments

-
- 1 Implemented the Healthcare Workforce Initiative- increasing class sizes and growing residencies based on funding the legislature has provided.

 - 2 Established a process of constant and recurring attention to and assessment of our compliance with accreditation standards.

 - 2 The SMHS has received state funding, through Healthcare Workforce Initiative (HWI), to increase annual class sizes of medical students and health sciences students (occupational therapy, physical therapy, athletic training, physician assistants, medical laboratory science, and public health). The current HWI funding allows for 35 additional residency slots. In addition, the new Pediatric resident program in Fargo will start accepting its first four resident slots in FY24, and will grow to a total of 12 resident slots by FY26.

 - 4 Strategic planning process and monitoring alignment with UND’s strategic plan.

 - 5 Recognized by the American Academy of Family Physicians (AAFP) as having the nation’s highest percentage of graduating seniors select family medicine as their specialty choice.

 - 6 Ranked by U.S. News & World Report as one of the best in the nation, ranking 3rd for its commitment to rural medicine.

 - 7 Continued the RuralMed Loan Forgiveness program to mitigate medical student debt and encourage the choice of a rural family medicine practice location for graduating medical students. The RuralMed Loan Forgiveness Program has been expended to include all medical specialties that may practice in rural areas.

 - 8 Expanded opportunities in interdisciplinary experience in a rural settings with the Rural Opportunities in Medical Education [ROME] program.

 - 9 Collaborated on Project Echo to help address the opioid epidemic.

 - 10 The SMHS has experienced a dramatic surge in research activity with a record year of external funding for FY22 with over \$50M in sponsored funding being awarded.

 - 11 Progressed in building research infrastructure with federally funded INBRE and COBRE grants.

 - 12 Supervise the North Dakota Tobacco Quitline project.

Major Accomplishments

-
- 13 Provided services to all 53 counties and all 33 rural hospitals by the Center for Rural Health and Rural Assistance Center.
 - 14 The SMHS had a record year in FY22 of securing philanthropic support for student scholarships and faculty endowed chair positions with almost \$12M in gifts.
 - 15 The SMHS Simulation Center continues to be a state-of-the art simulation center that greatly contributes to the educational experience of all medical students and many health sciences students, as well as UND nursing students. In addition, the Simulation Center operates four simulation trucks that are located in the four quadrants of the state, offering patient simulation educational experiences to local health professionals. (i.e. clinic & hospital staff, fire departments, police departments, EMTs, etc.)
-

Critical Issues

-
- 1 North Dakota's population is increasing, due in part to an increasing elderly population and the continuing effects of the "oil patch" developments. The SMHS, in conjunction with its Advisory Council, over the past decade, implemented the Healthcare Workforce Initiative (HWI) to address health care provider needs now and in the future, including: 1) reducing disease burden; 2) increasing retention of graduates for practice in the state; 3) training more practitioners; and 4) improving the efficiency of the state's health care delivery system.
 - 2 The School has endeavored to keep tuition low and student debt manageable, and believe that those are some of the reasons why more graduates are staying in North Dakota to practice and practicing in rural areas. National comparison data shows that in the course of the past decade, the School has gone from well below the national average to well above it as to the fraction of our graduating physician classes that end up practicing medicine within North Dakota.
 - 3 The increasing medical school debt issue across the country for graduating students creates an additional challenge to recruiting needed physicians to rural areas. The RuralMed Loan Forgiveness program is helping to alleviate the overall medical student debt load. Alumni fund raising efforts to augment financial aid availability to all SMHS students is an ongoing goal.
 - 4 The dependence on volunteer faculty (non-salaried community providers) leaves the SMHS vulnerable to changes in availability of qualified and willing individuals. Family medicine clerkships depend heavily on community-based family physician preceptors to teach medical students. These preceptors have traditionally been unpaid, but in recent years more clerkships have started to pay preceptors.
 - 5 Additional funding so that appropriate salary increases can be given to all faculty and staff (not limited to salaries supported by appropriated funds), and also so that merit increases can be provided to faculty and staff who demonstrate outstanding job performance.
 - 6 A continued need for more diversity throughout the institution.
 - 7 Although the new SMHS building in Grand Forks continues to be a wonder since it opened in 2016, the SMHS is having growing pains and needs additional space to house the growth in research and Indigenous health actives in particular. The need for additional space is exacerbated by the future closure of Columbia Hall and Hyslop, where the SMHS has a educational, research, clinical, and service/support activities.
 - 8 The Medical Education Center facility at the SE Campus – Fargo was constructed in 1975 and will require extensive renovation and building upgrades if we are to continue to occupy this facility. If the deferred maintenance is too costly to complete, we may need to explore other facility options.
 - 9 Behavioral, mental health, and stress issues, involving patients as well as students, faculty, and staff, continue to be a significant challenge. The SMHS has added two Wellness Advocates to assist students in need, but the challenge remains to do more for our SMHS family.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-

available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

- All allied health, graduate medical education, continuing medical education and medical student programs are fully accredited.
- The national exam pass rate for all allied health programs are at or exceed national standards.
- The national board scores for medical students are at or exceed national averages.
- Research, scholarship and creative activity make up an important part of the programs at the SMHS.
- SMHS M.D. graduates receive one of their top three choices of residency programs approximately 91 percent of the time

Explanation of Program Costs

Program costs consist of salaries and fringe benefits, operating and equipment.

Program Goals and Objectives

The primary purpose of the University of North Dakota School of Medicine and Health Sciences is to educate physicians and other health professionals and to enhance the quality of life in North Dakota. Other purposes include the discovery of knowledge that benefits the people of this state and enhances the quality of their lives.

- To be the best community-based school in the country
- To continue to be an innovator in education (with a focus on interprofessional teams)
- To continue to develop focused programs of research excellence
- To serve the people of North Dakota and beyond
- Rural health
- Healthcare workforce development
- Primary care (especially family medicine)
- Health advocacy
- Interprofessional care

232 UND School of Medicine

- Indigenous Health education leader

Statutory Authority

ND Constitution, Section 215, North Dakota Century Code Chapter 15-12

Agency Description

NDSU is the state’s 1862 land grant institution and serves the state by bringing educational opportunities and research solutions to the people of North Dakota. Our commitment remains focused on affordable access to a high-quality education for our students and serving state interests in a manner demonstrating sound stewardship and accountability. NDSU’s success has led to higher national and international visibility, not just for itself but the entire state, and most importantly, more substantial contributions to the success of North Dakota and the nation.

NDSU offers undergraduate, masters and doctoral degrees as well as undergraduate and graduate certificate programs. While the significant majority of its students are in-person, NDSU also offers online options and is committed to expanding its online and hybrid offerings.

NDSU leads the state in the enrollment of first-time freshmen, and remains the largest university in the state in terms of overall full-time enrollment. Our signature programs include Engineering (largest discipline enrollment), Agriculture (largest NDSU research productivity), and Health Professions (2nd largest discipline enrollment with nationally ranked programs for Pharmacy and Nursing).

NDSU collaborates with many institutions across the country and the state. Some of these relationships include research collaborations with other leading research universities throughout the country, administrative service agreements with other institutions within the NDUS whereby NDSU provides administrative support (e.g., payroll) to those institutions, transfer agreements designed to facilitate student transfers within the NDUS, and joint-degree programs where institutions within the NDUS collaborate on degree programs.

As NDSU continues to evolve, adapt and thrive, we also continue our commitment to affordability, efficiency and productivity. That commitment is reflected in the success of our students, local and service region communities and the statewide economic interests we serve. We look forward and remain committed to addressing the needs and aspirations of North Dakota by building on our land grant foundation.

Agency Mission Statement

We provide transformational education, create knowledge through innovative research, and share knowledge through community engagement that meets the needs of North Dakota and the world.

Major Accomplishments

-
- 1 Major accomplishment #1 NDSU helps fulfill the state’s workforce needs by enrolling the largest number of face-to-face students of any institution in the NDUS. Each of these students was either a North Dakota resident retained in the state or an out-of-state student recruited to physically come to North Dakota. Not only will these students be the state’s next generation of leaders and entrepreneurs, but while they are in college, they (along with their families) provide multiple years of beneficial economic impact for the state by working service jobs, paying rent and other living expenses and having their families visit.

 - 2 Major accomplishment #2 NDSU has more graduates in numerous high-demand fields than any other institution in the NDUS including engineering, computer/information science and nursing.

 - 3 Major accomplishment #3 NDSU has the highest four- and six-year graduation rates among the four-year institutions in the NDUS.

Major Accomplishments

-
- 4 Major accomplishment #4 NDSU achieved post-graduation success rates (employment/graduate study) of 92 percent for undergraduate students and 94 percent for graduate students.

 - 5 Major accomplishment #5 Among NDSU's recent graduates, 80% who started NDSU as a North Dakota resident were working in North Dakota after graduation and 41% who started NDSU as a Minnesota resident were working in North Dakota after graduation.

 - 6 Major accomplishment #6 In 2021, NDSU completed the largest fundraising campaign in school and state history totaling \$586.7 million. In addition, the endowment grew from \$82 million in 2010 to \$457 million in 2021.

 - 7 Major accomplishment #7 NDSU completed construction of Sugihara Hall which is a laboratory intensive building with approximately 105,000 square feet. In addition, NDSU started construction of the Peltier Complex, which will support a wide range of research involving food science, meat science, muscle biology, food safety, nutrition, consumer sensory traits and the development of new agricultural products. Designed to meet federal and state food processing and food handling regulations, the center's labs will expand research grant opportunities and partnerships with federal and state agencies.

 - 8 Major accomplishment #8 NDSU's athletics program is ranked among the best overall NCAA Division-I programs in the nation. The new Nodak Insurance Football Performance Complex is expected to open in the fall of 2022. The entire cost of the estimated \$50 million building project is being privately funded, including a lead gift from Nodak Insurance Company, which was awarded naming rights.

Critical Issues

-
- 1 Critical issue #1 Enrollment has been steadily declining since 2017, this has resulted in a decrease in student credit hour production under the Higher Education Funding Formula which has resulted in a base budget decrease of \$7.5M for the upcoming 2023-25 biennium.

 - 2 Critical issue #2 Inflationary pressures and workforce competition are affecting NDSU's ability to retain existing faculty, staff and recruiting top talent.

 - 3 Critical issue #3 Enhanced, modern laboratory and fabrication space for Engineering and AG Engineering key program areas (precision agriculture, cybersecurity, robotics, artificial intelligence, biomedical engineering, environmental engineering) is vital to enroll, retain and graduate students to make them successful on the job when they enter the workforce today and in the future. Modernized facilities will also promote interdisciplinary collaboration for faculty to be productive and advance research opportunities in these vital program areas.

 - 4 Critical issue #4 Due to increasing competition to apply for federal research grant opportunities, NDSU needs to modernize dated instructional and research lab space, and technology infrastructure to continue to provide experiential education for students as well as prioritize our R-1 Carnegie Classification status in support of our land grant mission to meet the aspirational and economic needs of ND. We are requesting ongoing base funding for continued access to high speed research and education network resources with connectivity, maintain cybersecurity control standards, computational research tools and methods to support cybersecurity, artificial intelligence and quantum computing programming efforts.

 - 5 Critical issue #5 Request modification to the Higher Education Funding Formula to reinstate a base funding minimum amount payable (NDCC 15-18.2-06), this would provide additional time to allow for evaluation and strategic planning for reductions in fixed programmatic and operational costs.

 - 6 Critical issue #6 Affordability. Request consideration for additional base funding, provided through the HE Funding formula, in an amount to defray salary and operational costs so NDSU does not have to increase tuition for students during 2023-25. As student demographics change, many state markets have changed strategy to compete for student enrollment and have not increased their tuition rates. This has created a difficult enrollment and pricing environment. Additional base funding to support affordable tuition pricing will provide a competitive recruiting advantage and support our land grant mission.

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public

reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

NDSU consists of eight colleges: College of Agriculture, Food Systems and Natural Resources; College of Arts, Humanities, and Social Sciences; College of Business; College of Engineering; College of Human Sciences and Education; College of Health Professions; College of Science and Mathematics; and the College of Graduate and Interdisciplinary Studies.

NDSU offers a wide range of undergraduate majors, minors and certificate programs, as well as graduate programs at the doctoral, masters, specialist and certificate levels. As a land grant institution, we are responsive to workforce demands and provide undergraduate and graduate degree programs in high-need areas such as Engineering, Nursing, Software Engineering and Security, and Teacher Education. In response to societal needs and student demand, we have launched new programs such as a degree in Supply Chain Management, and on-line initiatives in Marketing and Natural Resource Management. Strengthening relationships with communities and tribal organizations occurs through joint research projects and leadership development programs. We also partner with NDUS institutions through articulation agreements in areas such as agriculture and health professions.

As of fall 2021, NDSU student enrollment headcount was 12,461 students.

Explanation of Program Costs

Salaries and fringe benefits continue to make up the majority of NDSU's expenses, representing approximately 73% of the University's state educational and general fund operating budgets in the most recent fiscal year. At NDSU, in order to achieve and sustain the University's viability, programming and recognition as a leading student focused, land-grant, research university, sufficient funding is required for competitive compensation and start-up packages for faculty and staff, along with the capacity to retain those faculty and staff in a performance-based, market driven environment.

Non-salary operating expenses represent the remaining 27% of the state education and general fund operating expenses. NDSU's continued focus on operational efficiencies allows us to meet extra student demand of both undergraduate and graduate students.

Program Goals and Objectives

NDSU is proud of its tradition as the state's student focused, land grant, research institution. The mission of the university is to provide transformational education, create knowledge through innovative research, and share knowledge through community engagement that meets the needs of North Dakota and the world. We embrace this responsibility as a cornerstone of our future productivity.

NDSU continues to excel in providing high-quality accessible and affordable education to meet academic and professional standards. Research productivity remains strong; our faculty compete successfully for corporate, state, and federal research grants, and our creative activity is vibrant and diverse. We serve, and are accountable to the constituents of the state.

The vision for NDSU as outlined in our strategic plan is to be innovative in education, research and outreach, and identifies goals and objectives in five areas including Diversity, Inclusion and Respect; Student Success and Achievement; Research and Creative Activity; Education, Extension and Outreach; and Resource Planning and Development. We incorporate best practices in teaching and learning to deliver high quality curricula approved by the State Board of Higher Education to meet student and labor force needs. As a land grant institution, we serve the constituents of the state through programmatic and outreach efforts. Additionally,

the university's research and creative outputs are critical to improving the vitality of the state's economy and quality of life (https://www.ndsu.edu/fileadmin/president/pdf/NDSU_Strategic_Plan_0522.pdf).

In support of these goals and objectives, student services and institutional support is necessary. NDSU must meet the needs of students by providing traditional and innovative programs to assist in the total development of the student. Moreover, we must be responsive to labor-force demands and opportunities in the state through expanded offerings while balancing our portfolio for the best and responsible use of resources. In response to the pandemic, NDSU adopted the HyFlex (Fall 2020) learning model which synchronously incorporates traditional in-person classes with remote learning. We are now seeing increasing demand for asynchronous on-line programming as well, and will expand efforts accordingly.

We are also committed to supporting student achievement and academic excellence through career preparation and development. We promote a better quality of life for our students through wellness programs, the provision of alcohol-free social activities, counseling and personal growth opportunities, as well as services for first generation students, veterans, and students with disabilities.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Includes restoring the Minimum Amount Payable NDCC 15-18.2-06; slows funding decreases as credit production drops. Provides additional time for planning and reduction of fixed operational costs

Necessary resources for implementation (including FTE's)*: No new resources

Are resources being redirected or are they new or additional (including FTE's)*: No new resources

Who is served and impact of not funding*: If not funded, the impact could be increased tuition costs to students and may require institutions to implement cost reductions without time to evaluate the most efficient strategy.

Behavioral Health Initiative (Base) (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,100,000	-	1,100,000	4.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,100,000	-	1,100,000	4.00	-	-	-	0.00

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the wellbeing of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. NDSWAP data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Additional funding is requested to provide:

Four FTE's:

One 12-month provider position

One 12-month Disability Specialist Position

One 10-month Nurse Practitioner

One 12-month Case Manager for students on Care Team

Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased FTE and operational costs are new

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: This project will house engineering and Ag engineering, computer science, construction management teaching and research programs which is critical in order to maintain and advance current programs by promoting innovation, collaboration, and hands-on learning in modernized spaces. This project will also allow NDSU to expand and create new programs in the key areas of precision agriculture, cybersecurity, robotics, artificial intelligence, biomedical engineering and environmental engineering.

Enhanced, modern laboratory and fabrication space for these engineering programs is vital to enroll, retain and graduate students and enables us to make them more successful for entry into the workforce now and in the future. This project will also promote interdisciplinary innovation and collaboration and provide spaces for faculty to be more productive and advance research opportunities for these vital program areas.

Project funding includes 25% special funds from private donations and other sources.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: This project will create an addition for spaces that aren't feasible in the current building. The exact size is yet to be determined but could be in the 12,000 square foot range. Some of the existing spaces will be repurposed, renovated or improved for the performance of the space. There are also plans to improve one of the entrances for better accessibility and as a more prominent feature.

In addition to the programmatic improvements to the building, various deferred maintenance items will be addressed at the same time utilizing deferred maintenance tier matching funds.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: In order to conduct biomedical research safely and effectively and accommodate the growing research needs of the pharmaceutical sciences department at NDSU, faculty need access to a contemporary small animal research facility to conduct animal studies.

The current small animal research facility in Sudro Hall is inadequate in size and scope to accommodate the anticipated research growth of the department. Without a major expansion of the current small animal research facility, the future growth of research within the department will be greatly hindered.

Statutory Authority

North Dakota Century Code 15-15.02.

Agency Description

NDSCS provides educational programs and services which serve the needs of individuals preparing to transfer to four-year academic institutions, or preparing for careers in the applied sciences/technologies. It serves the businesses and industries of North Dakota by working with employers on the design and delivery of customized training programs. It is the vision of the college to provide quality education/services "second to none" through our commitment to student-centric programs and services, employee development and continuous improvement.

NDSCS is committed to a philosophy that provides for the varied educational needs of each person through competent faculty, curriculum and educational experiences. Students have the opportunity to develop their full potential, obtain gainful employment and make satisfactory career progress. It provides students with practical hands-on and general-education knowledge and skills.

Agency Mission Statement

The North Dakota State College of Science is a comprehensive, associate degree granting college founded on a tradition of quality and integrity. We deliver learner-focused education through a unique and evolving collegiate experience. Using innovative delivery strategies, NDSCS anticipates and responds to statewide and regional needs by providing access to occupational/technical programs, transfer programs, and workforce training.

Major Accomplishments

- 1 American Welding Society certified NDSCS as an Accredited Test Facility
- 1 Developed and assessed improvement plans
- 1 Developed and implemented new class and room scheduling system.
- 1 Earned 2020-2021 Military Friendly® School Designation
- 1 Forbes ranked NDSCS #14 in the nation for the top two-year trade schools (2018)
- 1 Listed at #14 by Niche for "2022 Best Community Colleges in America"
- 1 Working collaboratively with Richland, Wilkin, Northern Cass, Central Cass, Fargo, and West Fargo school districts to increase partnership with K-12.

Critical Issues

- 1 Attract more out-of-state, and international students.
- 1 Continue developing and offering relevant and meaningful academic programs.
- 1 Continue to meet workforce development needs by building TrainND team and scope.
- 1 Continue with Community College Awareness Campaign.
- 1 Develop strategy to overcome excessive inflationary costs.
- 1 Funding for strategic, capital projects.

Critical Issues

- 1 Improve enrollment, and student credit hours, in all locations (Wahpeton, Fargo Center, dual credit, online).
- 1 Improve student enrollment management services.
- 1 Improving student success and retention.
- 1 Increasing partnerships with business and industry.
- 1 Long-term facilities and maintenance planning and funding.
- 1 Partnering with local and regional public schools to help build dual credit enrollment.
- 1 Utilizing technology to enhance a student’s collegiate experience.

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board’s vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system’s biennial report on its strategic plan, which incorporates the “flexibility with accountability” expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

NDSCS is a comprehensive community college located in Wahpeton, a progressive city with a population of 8500 in the southeastern corner of North Dakota. Wahpeton, the county seat of Richland County, is located at the head of the Red River of the North. Across the state border lies its sister city, Breckenridge, Minnesota, with a population of approximately 3700. Over 200,000 people live within a 60-mile radius.

Student FTE for fiscal year Fall 2021 is estimated at 2,029.

The following programs are currently being offered at NDSCS: agriculture, architectural drafting and estimating technology, auto body repair and refinishing technology, automotive technology, banking and financial services, building construction technology, business management, caterpillar dealer service technician, civil engineering and surveying technology, computer information systems, cooling and heating services, culinary arts, dental assisting, dental hygiene, diesel technology, electrical technology, health information technician, John Deere tech, machinist and toolmaker, mechanical systems, mental health care associate, occupational therapy assistant, office administration, pharmacy technician, plumbing, nursing, recreational engines technology, HVAC systems and technology, refrigeration and air conditioning, technical studies, welding, workforce training and community education.

The campus is located on 128 acres of land and includes thirty-five major building totaling 1,382,613 square feet. Twenty-four of these buildings are instructional/administrative buildings totaling 690,165 square feet. The other twelve buildings are used for Auxiliary Enterprises (Student Housing, Dining Services, etc.) totaling 692,448 square feet. The insured value of the building and contents total \$246,808,515. The buildings are utilized heavily due to large number of labs/shops areas that are provided for career and technical students (seventy-two percent of NDSCS students are enrolled in these programs).

The replacement value of all Type I-III buildings at NDSCS is valued at \$245,269,578 and consists of the following areas:

15.4 acres of roofs

11.38 miles of electrical utilities

3.4 miles of water lines

2.5 miles of storm sewer

1.9 miles of sanitary sewer

2.33 miles of steam line

19.75 acres of parking lots

4.75 miles of sidewalk

6.3 miles of telecommunication

Explanation of Program Costs

Program costs for North Dakota State College of Science include cost of salaries and benefits for staff and faculty, operating expenses for instructional and support functions and facilities upkeep and maintenance expenses.

Major operating costs include the cost of equipment for labs/shops, which is continually escalating due to the constant changes in technology, instructional supplies, faculty and staff training and development, risk management insurance, the local computer network, computer and telecommunication infrastructure for the campus, cost of marketing NDSCS's services, class time, etc., the constant increase of utilities, repairs and maintenance, and building and ground supplies.

Program Goals and Objectives

To provide high quality instruction on and off campus in curricular areas approved by the State Board of Higher Education, to provide community and statewide educational services at the collegiate level and to provide an atmosphere of scholarly activity. It is NDSCS' goal to increase enrollment to approximately 3200 students per academic year at the freshman and sophomore levels and to graduate approximately 1200 students per year. Further, we strive to provide the instructional and academic support required to reach our goals and for the delivery of high quality instruction, research, and scholarly activities and service by the faculty.

To provide the required support services in meeting the needs of all students and student groups. Institutional support provides administrative leadership within a growing institutional environment, academic and financial coordination of all institutional affairs, operating guidelines, and compliance with the policies established by the North Dakota State Board of Higher Education.

To help plan, create, maintain, and operate an environment conducive to learning and training for approximately 7,000 individuals per year through its involvement in the Workforce Training initiative as well as its other outreach activities and services which are provided through staffing and facilities on the NDSCS campus as well as the Skills and Technology Training Center in Fargo. All of which are to be accomplished through the most economical means possible. It is also the intent to maintain and preserve the campus buildings, streets, parking lots and other facilities, and to remain current on special assessments.

Total	-	2,892,145	2,892,145	0.00	2,573,188	-	2,573,188	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Includes restoring the Minimum Amount Payable NDCC 15-18.2-06; slows funding decreases as credit production drops. Provides additional time for planning and reduction of fixed operational costs

Necessary resources for implementation (including FTE's)*: No new resources

Are resources being redirected or are they new or additional (including FTE's)*: No new resources

Who is served and impact of not funding*: If not funded, the impact could be increased tuition costs to students and may require institutions to implement cost reductions without time to evaluate the most efficient strategy.

Behavioral Health Initiative (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	186,750	-	186,750	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	186,750	-	186,750	1.00	-	-	-	0.00

State Initiative*: Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the wellbeing of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. NDSWAP data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Additional funding is requested to provide 1 FTE for a Counselor. Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased FTE and operational costs are new.

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: Agriculture, Automation & Autonomous Systems. DM/LS \$4,542,851

This initiative will significantly enhance the capability of NDSCS to provide programming in emerging areas of Agriculture, Automation and Autonomous Systems Technology. It will provide much needed visibility and awareness to agricultural technology, robotics, and automation curriculums. It will create collaborative laboratory spaces while resolving difficult facility usage challenges in several instructional areas. Areas that will be positively impacted by the completion of this project include: Agriculture (including Precision Ag, Agronomy, Farm Management, Ag Business, Adult Farm Management, etc.), John Deere Tech, Diesel Technology, Autonomous Systems Technology, RAMT (Robotics, Automation and Mechatronics Technology), and multi-purpose instructional areas.

Statutory Authority

North Dakota Century Code 15-13-01

Agency Description

Dickinson State University (DSU) is a comprehensive state institution, one of 11 colleges and universities that make up the North Dakota University System. The university employs approximately 180 faculty and staff with an enrollment of approximately 1,400 students. More than 75 programs are offered at the undergraduate level. The institution is comprised of two colleges, the College of Arts and Sciences, and the College of Education, Business, and Applied Sciences. DSU is North Dakota’s only dual mission university, with a growing career and technical education program and five accredited master’s programs. The majority of students come from North Dakota, Montana, and other Midwestern and Western states. A modest contingent of international students are also an important component of the student body.

Agency Mission Statement

Dickinson State University is a regional comprehensive institution within the North Dakota University System, whose primary role is to contribute to intellectual, social, economic, and cultural development, especially to Southwestern North Dakota. The University’s mission is to provide high-quality, accessible programs; to promote excellence in teaching and learning; to support scholarly and creative activities; and to provide service relevant to the economy, health, and quality of life for the citizens of the State of North Dakota.

Major Accomplishments

-
- 1 Made significant progress in evaluating and implementing instructional efficiency.

 - 2 After several years of deficit spending, maintained equivalency between revenue and expenses.

 - 3 During pandemic period when nationwide college enrollment decreased by over five percent, DSU grew enrollment by over five percent.

 - 4 Increased academic program offerings including the addition of five Master’s Degrees and certificate, associate’s, and bachelor’s degrees.

 - 5 Expanded Dual Mission programming including a credit-bearing CNA course, CDL (truck driving, through partnership with Williston State College), and welding, with other new career and technical programs being developed.

 - 6 Awarded \$1.1M in scholarships over each of the past two academic years through the DSU Heritage Foundation.

 - 7 Executed articulation agreements with Williston State College and Miles Community College that allows students to complete an elementary education degree from DSU while remaining in their home areas.

 - 8 Implemented a program with Dickinson Public Schools that provides “Early Entry” education, bringing several dozen local high school students to the DSU campus to study during the academic year.

 - 9 Adopted a two-year tuition and course fee freeze, believed to be the only such stabilization of educational costs in any North Dakota higher education institution (and one of very few nationwide), despite significant inflation.

 - 10 Adopted a dual delivery (face-to-face and simultaneous remote access) through which the vast majority of courses are made available, thereby helping to advance DSU’s accessibility mission.

 - 11 Developed plans and procedures in response to COVID-19, prioritizing the transition of courses to hybrid/hyflex modalities to allow for necessary flexibility for our students, staff, and faculty.

Major Accomplishments

12 Coordinated with local public schools to form a career and technical education center serving western North Dakota.

Critical Issues

- 1 DSU's Historical campus that will require additional updates in the future.
- 2 Though DSU is enthusiastic about its new Dual Mission designation, career and technical education will require additional investments.
- 3 Retention of students following over two years of COVID-19 challenges.
- 4 Managing substantially higher costs due to inflationary pressures while still maintaining as low a cost of education for students.

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

Dickinson State University served a headcount enrollment of over 1400 students during the fall, 2021 semester. The campus consists of 26 buildings with a total gross square footage of 640,975 square feet with an estimated replacement value in excess of \$123.6 million situated on approximately 132 acres. Based upon expenditures of \$33 million, the projected direct economic impact of Dickinson State University's operations was approximately \$100 million. See Economic Contribution of the North Dakota University System in 2019 on page 75.

Explanation of Program Costs

As a service orientated agency, personnel costs make up the largest component of DSU's expenditures at approximately 80% of total anticipated appropriated expenditures. The remaining expenditure breakdown consists of general operating costs. Of the total expenditures referred to above, approximately 50% of the total is expended in direct support of instruction, 20% for institutional and Student Support functions, and 10% in support of the physical plant. The remainder of expenditures are for scholarships and fellowships, auxiliary services, public service, research, and depreciation. The primary cost centers after salaries and wages are utilities, repairs, office and instructional supplies, travel, and staff development. Funding requests in support of extraordinary repairs will help us address deferred maintenance projects in instructional and administrative facilities/grounds.

Program Goals and Objectives

Provide quality collegiate level instruction in curricular areas approved by the North Dakota Board of Higher Education thus fostering an atmosphere of scholarly activity including research. Serve as a regional/national resource center capable of disseminating information that promotes change, fosters economic development, and contributes toward the betterment of society. Assist those in pursuit of knowledge to acquire information/instruction through an environment that is conducive to meeting their goals and furthering their well-being, at an affordable price.

Total	294,000	33,000	327,000	1.50	-	-	-	0.00

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the wellbeing of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. NDSWAP data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Additional funding is requested to provide Dickinson State University with a FT and PT (.5) mental health counselor. Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased FTE and operational costs are new.

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

Land/Building Preparation and Purchase or Donated Costs: Resurfacing of parking lot and attached area for safe parking.	001	239-9200	23950	682000	7,553,000	-	7,553,000	-	-
Demolition and Disposal									
Hazardous Material Abatement									
Construction: This includes a generator that would support the DSU West campus as a safety feature to protect students, faculty, staff, and especially animals during power loss. We also believe this will be cost saving mechanism in the long run, because power companies sell electricity at substantially reduced prices to those who are willing to go off-load during peak use periods.									
Other, including 3rd party costs: Possible institutional costs include travel related to project, re-platting (if needed), research expenses re similar facilities, etc. We do not anticipate major expenses in this category.

Statutory Authority

ND Constitution Article VIII, Section 6; North Dakota Century Code Chapter 15-13.

Agency Description

Mayville State University (MaSU) is a regional institution of higher education established in 1889 with a focus on teaching and learning. MaSU is one of the 11 public colleges and universities that make up the North Dakota University System (NDUS). The State Board of Higher Education (SBHE) is responsible for system governance to ensure that each campus fulfills its roles and responsibilities to the system, as well as to the citizens of North Dakota. While the University maintains its historical mission of teacher education, other programs are available to prepare students for careers in business, health & physical fitness, science, mathematics and nursing. Students can also pursue a Masters of Arts in Teaching (MAT), Masters of Science in Nursing or continue study in professional and graduate schools. Distance and online education has allowed MaSU to expand its course and program offerings to the region while continuing to meet the current needs of students in North Dakota. These opportunities offer accessible courses and degrees via a variety of delivery methods, so that working adults in North Dakota have the flexibility to further their education while remaining close to their homes, families, and jobs. Through this evolutionary process, MaSU institutional identity and direction have been guided by its mission statement, vision, and purposes. MaSU has defined itself as the school of "personal service", and fosters a campus community that provides a variety of programs and services that are designed to nurture a student's academic and personal success.

Agency Mission Statement

Mayville State University is dedicated to excellence in teaching, service, and scholarship in dynamic, inclusive and supportive learning environments that are individually focused. We offer quality undergraduate and master's programs enriched with practical experiences to prepare all learners for a global economy. The mission statement, approved by SBHE November 2016, has four specific purposes 1) To provide academic programs and services that address contemporary career and workforce opportunities. 2) To maintain collaborative relationships with schools, employers, and communities which contribute to the economic growth and social vitality of North Dakota. 3) To deliver flexible programs, instruction, and student services to meet the needs of the individual. 4) To cultivate an environment that supports creativity, intellectual curiosity, lifelong learning, service, and an appreciation of diversity.

Major Accomplishments

-
- 1 Distance off-campus programs offer flexibility for students. A total of 795 students in Fall 2021 chose accessible courses via a variety of delivery methods on campus and at off campus sites at Dakota College at Bottineau, Lake Region State College, Cankdeska Cikana Community College, Williston State College, and North Dakota State College of Science. Of the total students enrolled in Mayville State online classes, 379 students are online degree-seeking students.

 - 1 Division of Education earned approval to offer the Master of Education (M.ED.) program by the North Dakota Education Standards and Practice Board and the Higher Learning Commission. The Division of Nursing earned full five-year accreditation by the Commission on Collegiate Nursing Accreditation (CCNE) for the Master of Science in Nursing (MSN) program. The Division of Education earned full seven-year accreditation by the Council for the Accreditation of Educator Preparation (CAEP) for our initial licensure level teacher education programs.

 - 1 Mayville State strategically developed accelerated five-week and eight-week course offerings with RN-to-BSN and Master of Science in Nursing programs to help fulfill workforce needs in evolving health care situations designed for full-time working nurses.

 - 1 Sixty five percent of all Mayville State students are from North Dakota. Mayville State appeals to a population of North Dakota resident who prefer the family atmosphere and personal attention offered by faculty and staff on our small college campus. Seventy-one percent of our record setting freshman class from fall 2021 is comprised of students from North Dakota and Minnesota. Sixty-eight percent of Mayville State graduates stay in North Dakota, filling workforce needs or continuing their education.

Critical Issues

-
- 1 Extraordinary Repairs funding \$2 for \$1 matching requirement is very challenging at a smaller institution, and as a result, fewer repairs are made, because the matching funds are not available. Reducing or eliminating the match will free up available extraordinary repairs funds, allowing building and systems to be safer and more efficient.
-
- 1 Faculty and staff recruitment and retention are concerns. Employees are leaving for better paying positions at other campuses or with firms that are within commuting distance. The vacant position responsibilities are placed upon their colleagues causing additional work stress. Many position postings do not receive applicants or receive only one or two qualified candidates because compensation levels are below market value. Increased compensation funding will enable the State Board of Higher Education to develop appropriate recommendations for compensation that will improve retention and work life balance for faculty and staff.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools

complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

Mayville State University delivers instruction, through six academic divisions, and instructional support services to approximately 1200 on campus and at a distance students. MSU's enrollment fall 2021 totaled 1,172 students, 1,147 undergraduate, and 25 graduate. Full time students totaled 622 with 474 resident on campus, and 148 at a distance. MSU and the Mayville community demographic indicate a more diverse campus than within the community. MSU's racial and ethnic diversity percentage (19.6%) is one of the highest across all of the ND campuses when compared to total student populations.

The support services function reacts to non-instructional needs such as: housing, dining, bookstore, library, health services, wellness center, academic support services, counseling services, career development, and campus administrative services.

Facilities service is responsible for the care and upkeep of the 55 acre campus which includes: administrative, instructional and auxiliary buildings encompassing 371,355 sq. ft.; the football stadium and practice fields, the baseball stadium and tennis courts, all located at the east end of campus; and parking lots, streets, and sidewalks throughout campus.

Explanation of Program Costs

Program costs include the salary and fringe benefits for all faculty, administrators, professional and support staff, instructional supplies and equipment, operating costs for institutional administration and student services programs, and utilities and maintenance costs for the entire campus. Capital improvements are also essential costs that provide systematic repair and upgrade of facilities for a safe and comfortable environment for students and employees to learn and work in. Program costs align with mission, vision, purposes, core values, and strategic plan.

Program Goals and Objectives

The Mayville State University instructional program provides high quality instruction in curriculum areas approved by the North Dakota State Board of Higher Education, community and state-wide educational services at the collegiate level, and in an atmosphere for scholarly activity including research. MaSU Theme 3 Goals support excellence in teaching and learning. 3.1 Focus on strengthening the quality of instruction across all modes of course delivery. 3.2 Improve academic excellence by recruiting and retaining qualified diverse faculty and faculty with diversified qualifications. 3.3 Provide faculty with the tools and resources for success to create a culture that supports quality instruction. 3.4 Strategically increase options for course offerings in programs. 3.5 Assess and respond to emerging opportunities through strategic investment in new programs of study. 3.6 Use valid student learning assessment techniques and resulting data for decision making. 3.7 Ensure academic quality across all modes of course delivery.

Campus support services include the functional areas of student services and institutional support. Student Services provides the support services to meet the needs of all students and student groups. Institutional Support provides leadership and direction for an institution embracing change, coordinates all institutional affairs, and ensures compliance with the policies established by the North Dakota State Board of Higher Education. MaSU Theme 1 goals support these efforts. 1.1 Redefine and strengthen the recruitment and admissions process. 1.2 Increase the number of students who make timely academic progression and attain degree completion. 1.3 Provide transformative experiences for students. 1.4 Utilize systems and analytics to monitor and manage retention that leads to graduation.

Facilities services maintains and operates campus facilities in a manner which assures safety, complements learning and research, and is accomplished through the most economical means possible. MaSU Theme 3 goals support these efforts: 2.1 Provide safe, secure, and inclusive physical and social shared environments. 2.2 Technology use across the institution reflects current social, instructional, and workforce practices. 2.3 Facilities support the development of a positive living, learning and working environment. 2.4 Develop environmentally safe and responsible practices. 2.5 Provide reasonable accommodations for learners with documented disabilities with readily available resources and alternative instructional strategies regardless of delivery mode.

Additional cross-cutting goals that support MaSU's core values are supported in Themes 4 and 5: 4.1 Create opportunities for students and faculty to engage in research and other scholarly activities. 4.2 Support and reward innovation that results in new relationships, research, academic programs, enrollments, and learning experiences. 5.1 Strengthen a culture of communication 5.2 Foster commitment to personal service across campus. 5.3 Employ the Strategic Plan to guide institutional vision and priorities. 5.4 Invest in qualified faculty and staff that support institutional mission and achieve priorities. 5.5 Invest in new ways of charitable giving that support institutional priorities.

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the wellbeing of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. NDSWAP data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Additional funding is requested to provide 1 FTE for a Care Coordinator and 1 FTE for a Nurse. Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased FTE and operational costs are new.

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

Capital Projects Summary

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 03/01/2024

End Date (MM/DD/YYYY): 03/01/2026

Description: The Old Main Renovation project will involve a substantial remodel of the 55,000 sq. ft 100+ year old building, and construction of a 10,500 sq. ft. four floor addition on the east end of the building. Components to the project renovation include:

- New windows to improve energy efficiency and restore historic character to the building.
- Add exterior wall insulation and attic insulation to improve comfort, energy efficiency and reduce operating costs.
- Repair foundation deterioration and cracking.
- Re-paint exterior brick to seal the building envelope.
- Replace and repair exterior soffit and fascia.
- Remove hazardous materials (asbestos, lead paint, etc.)
- Gut and replace building old or nonexistent mechanical HVAC system to improve energy efficiency, controls, indoor air quality and occupant comfort.
- Replace antiquated and deteriorated building plumbing system including waste and water supply lines.
- Gut and replace obsolete electrical power and lighting systems to improve energy performance and control, respond to increase power demands, and improved lighting.
- Replace fire alarm and add life safety notification system.
- Provide new technology, data and communication systems to respond to current and future demands of information technology access.

- Install new automatic fire suppression system.
- Create more efficient use of building space by raising the lower-level floor in west wing.
- Administrative, student services and faculty offices and classrooms will be reorganized to meet current and future needs and to provide improved visibility, access and student/student and student/faculty interaction.
- Reconfigure interior circulation and stairway access to improve utilization, access, and life safety for offices and classrooms. Rectify dead-end corridor safety concerns.
- Improve theatre access and exiting to meet current code requirements for life safety.
- Construct a new four-story, 10,500 SF addition on the east end to:
 - o Locate new building mechanical systems and equipment
 - o Provide adequate number of accessible restroom facilities on each floor
 - o Provide a passenger/freight elevator to serve all building levels
 - o Provide a new staircase that is also an approved egress from the theatre.
 - o Construct an addition that will be sensitive and complimentary to the existing building brick and stonework.

Statutory Authority

ND Constitution Article VIII, Section 6; North Dakota Century Code Chapters 15-10 and 15-13.

Agency Description

Minot State University (MiSU) is a regional, public institution located in the northwest region of North Dakota, serving students from Minot, the region, state, nation, and other countries. Undergraduate and graduate courses and programs are offered on campus and at a distance, through face-to-face, online, and alternative modes of delivery. Non-credit and professional training and experiences are offered to students and community members.

Agency Mission Statement

Minot State University is a public university dedicated to excellence in education, scholarship, and community engagement achieved through rigorous academic experiences, active learning environments, commitment to public service, and a vibrant campus life.

Major Accomplishments

- 1 The Minot State University Development Foundation celebrated a record year in philanthropic production with a total of \$12,616,426 raised to support students, scholarship endowments, and campus facility projects in the fiscal year that ended June 30, 2022.
- 2 Minot State University's Management Information Systems (MIS) program of study was designated by the National Security Agency (NSA) and the Department of Homeland Security (DHS) as a Center of Academic Excellence in Cyber Defense (CAE-CD) through 2027.
- 3 The Red and Green, Minot State University's student newspaper, was bestowed a first-place award from the American Scholastic Press Association for Spring 2021 print issues.
- 4 Trinity Health has committed to donating \$250,000 per year for the next five years to the Minot State University Department of Nursing and \$100,000 per year to the Dakota College at Bottineau Department of Nursing. The combined \$1.75 million, five-year donation will help MSU and DCB prepare and graduate high-quality nurses.
- 5 MiSU implemented the Hometown Pride scholarship to better serve families of the region.
- 6 MiSU attained successful re-accreditation by the Higher Learning Commission.
- 7 The University restructured its long-term debt which will save MiSU over \$500,000 annually.
- 8 Minot State University was awarded several significant academic grants.
- 9 The Legislature awarded MiSU a \$25 million ARPA grant for the renovation of Hartnett Hall.
- 10 The University and Foundation saw completion of \$2.8 million in privately-fundraised renovations to the MiSU Summer Theatre amphitheater.

Critical Issues

- 1 In the short-term, tight budgets, tight labor pools, and inflation are all significant challenges facing Minot State University.

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

STUDENTS:

Headcount Students-Fall 2021 – 2,836

9% are graduate students

28% are freshman

31% are part-time students

4% are foreign students (other than Canadian)

6% are Canadian students

69% are North Dakota students

FTE Students-Fall 2021:

15% live in student housing (Common Data Set 2021-2022)

Student Employees:

Approximately 311 students are employed annually on campus, 62 of the 311 are being paid with Federal Work Study funds (FY '22 data).

Programs

61 undergraduate, 7 graduate, and 1 specialist degree program are offered.

The programs with the highest enrollment are: Nursing (261); Business Management (157); General Studies (139); Elementary Education (132); Criminal Justice (132); Biology (119); and Special Education (103).

Faculty and Staff"

241 Minot State University

Agency 241

451 FTE employees paid from all sources of funds (as of 6/30/22).

Average faculty salary - \$66,820 (Fact Book 2021-22).

Data Source: 2021-22 MSU Fact Book, Fall 2021 enrollment reports, IR major/minor departmental reports, Financial Aid Office, and Human Resources Office.

Explanation of Program Costs

Revenue by source including all funds:

General Fund 35%

Tuition & Fees 28%

Auxiliaries 5%

Restricted Funds 24% (Includes Grants & Contracts and Scholarships)

Other 8%

TOTAL 100%

Expenditures by type including all funds:

Salaries and wages 64%

Operating 36% (Includes cost of goods sold and scholarships)

TOTAL 100%

Program costs are inclusive of salaries and benefits for faculty and staff and operational expenses for instruction, support services, and physical plant operations and maintenance. Major costs other than salaries and benefits would include; utility costs; communications costs-combination of telecommunications and information technology network infrastructure costs; repairs and maintenance for buildings and grounds-including deferred maintenance and capital repairs; travel; insurance; maintenance agreements; software licenses; equipment purchases and leases.

Data source: FY2021 audited financial statement.

Program Goals and Objectives

Mission

Minot State University is a public university dedicated to excellence in education, scholarship, and community engagement achieved through rigorous academic experiences, active learning environments, commitment to public service, and a vibrant campus life.

Vision

Minot State University will:

- Deliver high-quality education where, when, and how it is needed to a diverse, multi-generational student population.
- Prepare students and the institution for the evolving social and technological challenges of the world.
- Inspire scholarship and creative activity among students, faculty, and staff.
- Empower graduates with a distinctive combination of professional expertise and broad-based education to support varied careers and productive lives.

Goals in Brief

- Goal 1: Excellence in Education

Offer high-quality academic opportunities to meet educational needs.

- Goal 2: Recruit & Enroll

Increase student enrollment and improve student support services.

- Goal 3: Retain & Graduate

Support and increase student retention and graduation.

- Goal 4: Vibrant & Inclusive Campus

Promote and support a vibrant and inclusive campus community.

- Goal 5: Community Engagement & Partnerships

Foster and grow collaborative partnerships and community engagement.

- Goal 6: Creative and Engaged Faculty & Staff

Support and value faculty and staff.

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the wellbeing of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. NDSWAP data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Additional funding is requested to provide one FTE for a Campus Counselor. Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased FTE and operational costs are new.

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: Declining enrollment has led to taking 90+ year-old Dakota Residence Hall offline except for a Day Care on the first floor. The building is not expected to be needed for student residence purposes in the foreseeable future. The building has substantial deferred maintenance issues such as a 30+ year-old roof, old plumbing, a partially functioning elevator and is need of electrical upgrades and window replacements. The University will significantly reduce utility, insurance and maintenance expenses if the building is razed. Demolition of the building will better programmatically align auxiliary facilities with University needs.

Statutory Authority

ND Constitution, Article VIII, Section 6.

Agency Description

Valley City State University (VCSU), operating as a post secondary educational institution within the North Dakota University System, serves the citizens of North Dakota and the surrounding area by offering a broad and diverse population of students an opportunity to challenge their individual learning capabilities.

Agency Mission Statement

Valley City State University is a public, regional university offering exceptional programs in an active, learner-centered community that promotes meaningful scholarship, ethical service, and the skilled use of technology. As an important knowledge resource, the University offers programs and outreach that enrich the quality of life in North Dakota and beyond. Through flexible, accessible, and innovative baccalaureate and master’s programs, VCSU prepares students to succeed as educators, leaders, and engaged citizens in an increasingly complex and diverse society.

Major Accomplishments

-
- 1 Achieved and all-time record high enrollment in the fall of 2021 of 1,686 students.

 - 2 Responded to local workforce need by adding a M.S. degree in Business Information Systems spring of 2022.

 - 3 Opened new Center for the Arts spring of 2022.

 - 4 Received full reaffirmation of HLC accreditation with no concerns spring of 2022.

 - 5 Received national rankings for best online teaching programs, affordable online education, an outstanding master’s of education program, and best online bachelor’s programs.

 - 6 Allocated a record of over \$1.9 million in scholarships 2021-2022 by the VCSU Foundation.

 - 7 Named VCSU the #2 public regional college in the midwest for 2022 by U.S. News and World Report. Also named a U.S. News "Best College" for the 24th consecutive year.

 - 8 Collaborated with K-12 schools to implement dual credit programs.

 - 9 Faculty completed Quality Matters education to enhance online teaching.

Critical Issues

-
- 1 There are both challenges and opportunities for Valley City State University. The University’s main challenges will be maintaining functional, attractive and safe facilities with the renovation of McCarthy as our top SBHE approved capital project; along with the recruitment and retention of students.
-

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board’s vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-

available data available throughout the systems provides real-time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

The university delivers instruction through thirteen academic departments serving approximately 1,600 students. All students and faculty are issued notebook computers. Information technology skills are required of all graduates. Instruction is supported by traditional and web-enhanced library services as well as an extensive, high speed, technology infrastructure. Approximately 2000 web portals support 1600 students and 200 employees. All classrooms are smart rooms allowing wide use of web and communication services. The campus covers 90 acres of which 54 are maintained. The remaining is primarily hillside woodland. The campus has 11 instructional/administrative and 12 service buildings and a total custodial square footage of 549,194.

Explanation of Program Costs

The program major costs include salaries for faculty and staff positions. Other costs include the associated operating expenses including instructional material used in the classroom, fuel, natural gas, water sewer, electricity, telephone, maintenance and custodial supplies and repair and maintenance cost.

Program Goals and Objectives

1. Provide high quality instruction in curricular areas approved by the Board of Higher Education. Provide community and statewide educational services at collegiate level and provide an atmosphere of scholarly activity, including research and service to the local and regional community.
2. Provide the required support services in meeting the needs of all students and student groups. Provide leadership and directions to a growing institution, coordinate all institutional affairs, and ensure compliance with the policies established by the North Dakota State Board of Higher Education.
3. Help plan, create, maintain and operate an environment conducive to learning and research, all of which is to be accomplished through the most economical means possible. Maintain and preserve campus buildings, streets and other facilities.

Total	236,000	-	236,000	1.00	-	-	-	0.00

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the well being of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. NDSWAP data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Additional funding is requested to provide 1 FTE for a Professional Mental Health Counselor. Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased FTE and operational costs are new.

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

Capital Projects Summary

	2023-25 Agency Request	2023-25 Executive Recommendation	Total Estimated Project Costs	2025-27 Operating Costs	2027-29 Operating Costs

Special	2,000,000	-	2,000,000	-	-
Total	13,439,000	-	13,439,000	-	-

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY):

End Date (MM/DD/YYYY):

Description: The proposed renovations to McCarthy remain sensitive to both historic buildings, while allowing McCarthy to stand out once again, this time as a contemporary 21st century learning environment. A new atrium between McCarthy and McFarland Halls will re-establish McCarthy’s prominence on the campus mall while also improving circulation & accessibility. Restoring the paneled windows to their original full glass windows will provide abundant daylight while visually enhancing the exterior. Brick tuckpointing, stone cleaning, and painting of the building to its original charm. While the building will be modernized with the new building systems, there is an opportunity to salvage original items to maintain its historic character. For example, wood paneled doors or ornately trimmed chalk board may be salvaged for reuse as accent wall in select locations such as conference rooms.

The first floor will be home to the Technical Education department and include office ans labs for machining, assembly, wood & metal fabrication, 3D printing, virtual reality, and video productions. McCarthy Hall is the first building constructed on campus using prefabricated steel joists, which became prevalent in the 1930s. The proposed design exposes the structure with the Tech Ed department, serving as an educational tool for students learning about metal fabrication. Labs will have glass windows opening to the corridor to allow education to be on full display. This also allows prospective students touring the facility and those in other programs to get a glimpse into the Tech Ed program. The second and third floors will house offices and classrooms for the Education Department, Classrooms will be technology-rich, flexible, and allow for a variety of teaching pedagogies, work rooms, and a curriculum library. The proposed renovations and addition will provide spaces to effectively continue VCSU’s proud tradition of preparing quality teachers since it began as a teacher’s college in 1890.

Description: A major addition to the W.E. Osmon Field House including an indoor practice facility with a turf floor and a 200-meter track. The enhancement includes locker rooms, the Hall of Fame, an expanded weight room, athletic training area, and classrooms. The Osmon Field House was constructed in 1960. At the time, VCSU had 111 athletes and 7 coaches. Today, the university is home to 285 athletes and 28 coaches.

Statutory Authority

ND Constitution Article XIX, Section 216

Agency Description

A referendum in 1894 stated that a school of forestry should be located in Bottineau, North Dakota, to provide, in addition to forestry, comprehensive community college curricula. The North Dakota Century Code also identified the role of Dakota College at Bottineau as offering programs in agriculture, forestry, and horticulture. Since then, the college has expanded its natural resources programming, and has also added programs in other areas that serve the needs of its constituents. For example, business, information technology, allied health, and general education/liberal arts courses now comprise a majority of the college's inventory of program offerings for students enrolled in transfer, career and technical curriculums. For over 100 years, as the North Dakota School of Forestry, NDSU-Bottineau, MSU Bottineau, and Dakota College at Bottineau, the institution has prepared men and women to become contributing members of society. The college has adopted a "Nature, Technology, and Beyond" focus that reflects its efforts to leave students with a care and concern for the environment.

An institutional name change from Minot State University-Bottineau to Dakota College at Bottineau did not change the college's affiliation with Minot State University. That affiliation continues to grow even stronger.

Agency Mission Statement

Dakota College at Bottineau provides students with a quality education in a caring environment. The institution values diversity and personal enrichment by promoting engaged learning for employment and university transfer. With the help of a supportive community, Dakota College at Bottineau emphasizes nature and technology to accomplish its mission through an array of curricula, programs, and services.

- Liberal arts education provides students the knowledge and tools to continue their education, to serve as good stewards of the environment, and to function as responsible citizens.
- Career/technical education provides students with the knowledge and skills required to succeed by utilizing natural, human, and technological resources.
- Distance delivery provides students increased access to education and career opportunities.
- Community education provides diverse life-long learning experiences.
- Support services provide opportunities for individual growth and success.
- Campus activities provide for interpersonal development.
- Campus outreach provides area schools and groups access to college resources.
- Workforce training and development provides the human resources for economic development.
- All programs provide a greater understanding of human diversity.

Dakota College at Bottineau's curricula, programs, and services take students beyond nature and technology and leave them with an ethic of concern and care for the natural world.

Major Accomplishments

- 1 Dakota College at Bottineau has increased its headcount and full-time equivalent (FTE) enrollment each year since the fall of 2015. DCB's headcount enrollment was 692 students in fall 2015 and 1163 in the fall of 2021. This equates to a 68% increase. DCB's FTE enrollment in the fall of 2015 was 459 students. In the fall of 2021, the FTE enrollment was 615, which is an overall increase of 34%. The ability to increase headcount and FTE enrollment is considered especially significant in light of the COVID pandemic that occurred during the past two years.
- 2 DCB continues to be a leader in developing certificate and degree options for high school students. DCB was the first college in the NDUS to launch a new program for dual-credit students titled Leading to Advanced Educational Preparation (LEAP). One of the major intents of the program is to decrease the costs of a college education. An expansion of the program, LEAP Beyond, was launched in 2020-2021 academic year for students interested in receiving an Associate Degree while still in high school. Approximately 12-15 students graduate each year from these programs.
- 3 Enrollment in the college's nursing program remains strong. There were approximately 100 nursing students enrolled at DCB in fall 2021 compared to 47 in the fall of 2015. The college's two nursing programs (practical nursing and associate degree nursing) are collectively the college's largest career and technical education programs. DCB is one of the four NDUS community colleges that partner to offer the Dakota Nursing Program.
- 4 DCB has responded to the need for additional nurses by continuing or expanding its partnerships with other communities and agencies. The college has a strong relationship with Trinity Health in Minot and provides both PN and ADN (RN) programs on the Trinity Health campus. The college recently partnered with the State Hospital in Jamestown for a cohort group of PN nurses. The Jamestown site will begin instruction in the fall of 2022.
- 5 DCB and Minot State University are partnering with the City of Minot to develop a postsecondary career and technical education (CTE) center in the Minot community. The City has allocated approximately \$3.4 million for this project through federal resiliency funds. The site for the new center is a former Trinity Health facility. The renovation of the proposed site will begin in 2022, with a projected opening in the fall of 2023.
- 6 Dakota College has continued to expand its fundraising and alternative funding strategies. DCB continued the sixth year of its partnership with Trinity Health in Minot in which the Trinity Health Foundation is providing \$100,000 per year for five years to support the PN and ADN nursing programs located in Minot. The DCB Foundation has undertaken DCB's first ever major capital campaign, which is a \$4 million project to develop the college's Old Main Building into a Center for Nursing and Allied Health. Over \$800,000 in commitments have been received to date. The overall fund-raising goal is \$1.5 million.
- 7 Construction was completed for a new dining facility on the Bottineau campus. This \$2.5 million project was financed by bonding authority granted to the college in the 2019 legislative session. This project enabled the college to address significant deferred maintenance issues in the former dining facility as well as major accessibility concerns.
- 8 DCB's financial ratios continue to remain solid. These ratios are required for college accreditation. The college's most recent overall Composite Financial Index (CFI) was 1.37, which indicates no follow-up reporting was needed for the Higher Learning Commission. The college has also maintained sufficient reserve funding. For FY21, the ending reserves met the 7% minimum requirement of \$440,786.
- 9 The college weathered the COVID pandemic during the past 2 1/2 years reasonably well. Although full-time student numbers declined during this time, major increases in part-time enrollment more than offset these reductions. The college received over \$3.4 million in one-time federal and state allocated funding to assist in meeting the challenges posed by the pandemic. Over these funds, approximately 1/3 was distributed directly to students. The remaining funds were used for technology upgrades for distance instruction in all of the colleges classrooms and labs, nursing equipment simulators, hybrid course development, major HVAC upgrades in two buildings, and for needed PPE, additional cleaning operations, and increased campus nurse hours.

Critical Issues

- 1 The college's allied health and nursing programs are growing and in need of modern, state-of-the-art facilities. The proposed renovation of the college's Old Main building into a state-of-the-art center for nursing and allied health programming is Dakota College's highest priority capital project need. The college's Foundation recognizes this priority and has committed to raising \$1.5 million of the estimated \$4 million of renovation costs. However, due to inflation and the discovery of issues related to the construction of the building, the college is requesting an additional \$1,375,000 in funding to ensure that the project can be completed as planned. The new center will enable the college to grow its nursing and allied health program enrollments significantly.
- 2 Dakota College is partnering with Minot State University to offer career and technical education (CTE) programs for the Minot community as well as the north central region of the state. Although the City of Minot has designated significant funding from its federal resiliency grant to support facility needs, funding is needed for the staffing and operating costs for the CTE programs. These costs are estimated at approximately \$875,000 annually (\$1,750,000 over the biennium). Without start-up funding for these program costs, it will be extremely challenging to launch the CTE Center.
- 3 Maintaining and/or growing enrollment is expected to be very challenging in the future. The college is exploring new strategies to increase full-time on-campus student enrollment, which is challenging in the post-pandemic environment. However, it will require additional, scarce financial resources to implement these strategies.
- 4 Finding faculty and staff to replace those retiring or leaving employment is increasingly difficult. Recent searches for faculty and other professional positions have yielded only a handful of qualified candidates for each search, with some positions now open for over a year.
- 5 According to the Chronicle of Higher Education statistics, faculty average salaries are the lowest of the five community colleges in the system. Progress needs to be made to move average DCB salaries closer to the system average.
- 6 The college has identified raising its retention and graduation rates as strategic goals. DCB's ten-year average for retention is 47%. However, the college saw a major increase in retention in the fall of 2021 when the rate increased to 73%, the highest level in the past 10 years. The college believes that its difficult decision to discontinue one of its athletic programs in the fall of 2019 is partly responsible for this improvement, as well as the addition of a third year of eligibility for student athletes due to the pandemic. The challenge will be to continue this improvement. The 150% graduation rate for first-time, full-time students is up slightly from 25% to 28%, when comparing 2021 to 2020. However, this number is still at the college's ten-year average of 27.3%, so DCB remains focused on making improvements in its graduation rate. Program completers numbered 194 for the 2020-2021 academic year, 193 in 2019-2020, and 181 in 2018-2019. [Note: the term 150% graduation rate is defined by IPEDs as the number of students who completed the program in the reported calendar year within 150% of the published program length, including on-time graduates, divided by the number of students available for graduation.]

Performance Measures

NDUS has adopted several data systems that help incorporate accountability measures and transparent reporting in accordance with the Board's vision and strategic plan. These data systems, including Dashboards, Predictive Analytic Reporting, Strategic Planning Online, and the State Longitudinal Data System, provide public reports on completion and retention rates, semester-by-semester enrollment, peer comparisons, financial aid and tuition, and much more. Additionally, the publicly-available data available throughout the systems provides real time data to researchers and decision-makers. These analytical tools complement the system's biennial report on its strategic plan, which incorporates the "flexibility with accountability" expectations created in Senate Bill 2003 passed by the 2001 Legislative Assembly.

Program Statistical Data

FACULTY AND STAFF (FY2023 annual budget)

- 30 FTE faculty employees from all sources of funds
- 42 FTE staff employees from all sources of funds

243 Dakota College at Bottineau

Agency 243

- Average full time faculty salary is \$ 51,216
- 79 % of all FTE employees are paid from general fund and tuition dollars

FACILITIES

- Campus is situated on 35 acres of land
- 21 buildings totaling 230,862 sq. ft. of floor space
- Building replacement value is approximately \$ 25 million
- Infrastructure value is approximately \$2.6 million
- Deferred maintenance is approximately \$ 972,000 (\$ 530,608 on general fund buildings).

However this figure is estimated to be considerably lower than actual. A current physical plant review is being conducted by an architectural and engineering firm as part of the master plan update, with revised numbers expected in the fall of 2022

STUDENTS

See attachment for student information.

Explanation of Program Costs

The program costs of DCB include expenses associated with instructional support and the delivery of instructional services, physical plant (facilities upkeep and maintenance) operational expenditures, and the academic, institutional and student support systems needed to operate a comprehensive community college.

Program Goals and Objectives

Goals and Priorities

1. Improve learning and services through ongoing assessment.
2. Improve extra and co-curricular offerings
3. Provide curricular offerings to meet the needs of constituents.
4. Develop the institution's Nature, Technology, and Beyond focus.
5. Utilize all campus resources.

6. Enhance residential life.
7. Develop learning partnerships throughout the region and state.
8. Promote global awareness.
9. Promote an innovative culture in a technologically enhanced environment.

Core Values

1. Student Centered: Dakota College at Bottineau values students, considers their needs and interests, and makes sincere efforts to respond positively to those needs and interest.
2. Excellence: Dakota College at Bottineau college community members take pride in their work and strive for academic and professional excellence.
3. Learning: Dakota College at Bottineau values innovation and quality as it serves the learning needs of its various constituencies.
4. Respect and Responsibility: Dakota College at Bottineau acknowledges, understands, and supports the rights of others to express their ideas. Individual responsibility is integral to civil discourse, which enables meaningful learning experiences and informed decisions.
5. Diversity: Dakota College at Bottineau supports and embraces diversity, which enriches the quality of the learning experience.

Vision

"Dakota College at Bottineau is rooted in the past and grows towards the future by combining the best from the Past, Present, and Future to provide students with innovative educational opportunities. The campus will emphasize a knowledge and appreciation of Nature, implement a rapidly changing Technology , and prepare to students to go Beyond and improve the quality of life."

Campus Focus: "Nature, Technology and Beyond"

Established as the School of Forestry in 1906, Dakota College at Bottineau has consistently utilized the biological diversity of the region: the Turtle Mountain Forest, the prairie pothole region, the J. Clark Salyer National Wildlife Refuge, the International Peace Garden, and Lake Metigoshe. Using these as natural laboratories to strengthen the educational experience and continuously expanding academic and career programming, Dakota College at Bottineau integrates technology to prepare students not only for the present, but also to go beyond and improve the future. Dakota College at Bottineau's diverse natural surroundings provide examples of how and why everyone must care for the environment. Technology aids in determining appropriate methods to solve problems and create the change necessary to maximize positive consequences to all life. Through these and other appropriate actions, Dakota College at Bottineau will endeavor to leave students with an ethic of concern and care for the world.

Graduate Profile

Graduates of Dakota College at Bottineau are self-confident and possess skills that promote life-long learning. When Dakota College at Bottineau graduates leave the nurturing environment the campus provides, they can successfully continue their education or effectively enter the workforce. By utilizing the knowledge gained

243 Dakota College at Bottineau

Agency 243

and the interpersonal and communication skills learned on campus, graduates will become contributing members of society. Dakota College at Bottineau develops responsible graduates who can manage life activities in a manner that allows them to become high achievers who can protect and use our natural and human resources wisely.

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Behavioral health of institution students is a high priority to ensure the wellbeing of the institution population. Currently, wait times to be seen by the behavioral health staff has increased during the 2021-22 academic year. Additionally there is limited, if any, outreach and prevention efforts at the institutions. North Dakota Student Wellness and Perception Survey (NDSWAP) data and other information from students/institution shows an increase need for outreach around suicide prevention, self-harm behaviors, mental health needs, and drug/alcohol prevention.

Necessary resources for implementation (including FTE's)*: Additional funding is requested to provide 1 FTE for a Counselor Mental Health Counselor. Operational increases to assist with necessary professional development/training, educational programming, intern/trainee stipends, and software.

Are resources being redirected or are they new or additional (including FTE's)*: The increased FTE and operational costs are new.

Who is served and impact of not funding*: Institution students and employees will be impacted if funding is not available. May result in additional increased wait times for current students to be seen by institution behavioral support staff, which could lead to further behavioral health challenges for institution staff and students. The impact will also continue to limit prevention efforts.

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: DCB has received authority in 2021 to renovate the existing Old Main building on the Bottineau campus and repurpose the facility as a Center for Rural Health. The approval included \$2.5 Million in general fund appropriation and \$1.5 Million in special fund (fund raising) authority. Escalating construction costs and have increased the total project budget needs by \$1,375,000. DCB is seeking general fund appropriations to restore the project scope.

Statutory Authority

North Dakota Constitution, Article VIII, Section 6. North Dakota Century Code 4.1-21,18-02, 18-14 and 57-57.

Agency Description

The State Forester has the statutory authority and responsibility to meet the forestry needs in North Dakota. The North Dakota Forest Service administers forestry programs statewide. The agency operates a conifer tree nursery at Towner. Technical and financial assistance for management of private forest lands, state forest lands, urban and community forests, tree planting and wildland fire protection are provided. The North Dakota Forest Service owns and manages approximately 13,945 acres of state forest lands.

Agency Mission Statement

The mission of the North Dakota Forest Service is to care for, protect and improve forest and natural resources to enhance the quality of life for future generations.

Major Accomplishments

- 1 Windbreak Renovation Initiative The removal of deteriorating field and farmstead windbreaks is taking place on farms and ranches across the North Dakota landscape. Rural tree plantings, including field and farmstead windbreaks, provide important public benefits. Unfortunately, many of these plantings have deteriorated due to age, disease or lack of management, and are no longer fully functional. A windbreak inventory in the northern Great Plains indicates 62% of the 145,177 miles of windbreaks in the four-state area are in fair to poor condition. The North Dakota Forest Service has utilized two North Dakota Outdoor Heritage Fund grants to assist landowners with renovation of declining farmstead and field windbreaks. Through this effort, 62 landowners have received \$315,721 in cost-share for windbreak renovation in 2021.
- 2 Community Forestry There are 54 Tree City USA (TCUSA) Communities in North Dakota including two communities that have been part of the program since it was initiated in 1976 – Mandan and Grand Forks. Nearly 70% of North Dakota’s population lives in a TCUSA Community. Together they spend over \$6,457,789 on forestry management to create functional, inviting and safe community forestry resources. In addition, four North Dakota institutions of higher learning have achieved Tree Campus Higher Education status - NDSU, UND, DCB and UTTC. Community Forestry staff provide grants for tree planting and development projects and also technical assistance for tree planting and tree management plans, pest surveys and tree care workshops. The agency granted 61 projects and \$326,286 to communities for forestry projects in 2021.
- 3 Fire Management On the average, North Dakota experiences over 440 human caused wildfires that burn in excess of 29,000 acres. Today’s wildfires follow cycles, with larger fires frequently coinciding with drier years. For example, in 2006, North Dakota experienced 1,077 wildfires which burned 68,122 acres. When wetter conditions prevailed in 2012, there were 376 fires which burned 31,293 acres. Fire season in North Dakota, as in many other western states, is now considered year-round, with fire starts documented in every month. The year 2021 was unprecedented, with 2,199 cumulative fires, 122,300 acres burned, 3 incidents with injury, 6 total injuries and 49 damaged structures. Fire Management staff trained 321 firefighters to enhance firefighter and public safety, completed hazardous fuels reduction treatments on 149 acres of forest and responded to 125 fires in 9 western states.
- 4 Towner State Nursery Since 1951, Towner State Nursery has sold over 78 million conservation tree seedlings. In 2021, the Nursery celebrated 70 years of operation. Through COVID pandemic and the drought of 2021, Nursery staff were able to meet the needs of our customers by growing and selling conservation seedlings and filling 99% of in-state tree orders. Towner State Nursery staff select seed sources and species adapted to the state’s challenging environment, they produce 31 stock types and 17 different ND-adapted species. In 2021, the Nursery sold 789,913 conservation trees to customers.

Critical Issues

- 1 Forest Action Plan Invasive forest insects and pathogens, communities at risk from wildfire, and the loss of field and farmstead windbreaks are critical natural resource issues identified in the North Dakota Forest Action Plan. The plan provides a comprehensive analysis of forest-related conditions, trends, threats and forestry opportunities in North Dakota. The development of the plan was driven by input and collaboration from advisory groups, stakeholders, partners, and customers to identify needs and priorities for sustaining North Dakota's forest resources. Long-term strategies focus financial, technical and educational resources on important landscape areas with the greatest opportunity to ensure the protection of trees and forests for North Dakotans. The strategies provide the basis for future program, agency and partner collaboration including: a) conserving and managing working forests landscapes for multiple values and uses; b) protecting forests from threats including, catastrophic wildfires, storms, flooding, insect and disease outbreaks and invasive species; and c) enhancing the benefits from trees and forests including air and water quality, soil conservation, wildlife and fish habitat, biological diversity, carbon storage, forest products, forestry related jobs and production of renewable energy.
- 2 Fire Management The need to provide critical financial, technical and educational assistance to rural fire departments for wildland fire prevention, suppression and mitigation is ever increasing. The area of wildland urban and industrial interface, zones where human development intermingles with undeveloped land, is growing. At the same time, the number of fire departments registered with the State Fire Marshal's office is decreasing, placing additional responsibility on smaller rural fire departments that are most often staffed by volunteers. Federal firefighting resources have decreased, placing more responsibility for initial attack on rural fire departments. The NDFS ensures the protection of lives, property and natural resources by providing fire suppression assistance, training and equipment to the 378 North Dakota fire departments. Additional state appropriated general funds would assist with: 1.) Developing and promoting local and regional fire department training programs to provide required firefighter certifications and supplement State Fire School courses. 2.) Implementing planning and preparedness practices to provide effective and efficient response to requests for assistance by rural fire departments; 3.) Strengthening mutual aid support to fire departments, including suppression, preparedness, training and prevention; 4.) Providing educational outreach with a consistent fire prevention message to landowners, land managers and the public to coordinate and promote safe fire use practices; 5.) Awarding cooperative fire assistance grants to fire departments for personal protective equipment, firefighting equipment, training and hazardous fuels reduction projects to mitigate wildland fire hazards; 6.) Training fire departments in the use of new radios and operation of the Statewide Interoperable Radio Network (SIRN). SIRN is North Dakota's \$120 million investment in interagency public safety communications. As SIRN rolls out, the North Dakota Forest Service will support this effort by providing initial training and continuing education to fire departments.
- 3 State Forests The NDSU-North Dakota Forest Service manages state forests encompassing 13,945 acres. State Forests are located in the Turtle Mountain, Pembina Gorge and Sheyenne River Valley regions of the state. The demand and utilization of the State Forests have increased substantially in response to society's renewed engagement with our natural resources. Outdoor recreation is very important to the physical and emotional wellbeing of North Dakotans and since 2020 the State Forests staff have documented a 207% increase in trail usage and a 197% increase in campground usage. To better serve the growing needs of State Forest users, additional funding is needed to support operation, maintenance, and enhancements of agency-managed recreational infrastructure including trails, campgrounds, and recreation areas. Additional state appropriated general funds for operating would enhance outdoor recreation experience for an increasing number of visitors.
- 4 Invasive Pests Invasive insects and pathogens are some of the greatest threats to native forests, conservation tree plantings and community forests in North Dakota. Emerald ash borer is a highly invasive exotic insect that attacks and kills all species of North American ash trees. Since its introduction in Michigan in 2002, emerald ash borer has killed hundreds of millions of ash trees in 35 states and 5 Canadian provinces. Across the United States, hundreds of millions more ash trees are at risk. The infestation has prompted state, federal and university personnel in North Dakota to implement contingency planning efforts for prevention, detection and response. State Foresters in Kansas, Nebraska, North Dakota and South Dakota engaged in a regional initiative to prepare for the arrival of invasive pests such as emerald ash borer that threaten tree resources in the northern plains. The Great Plains Tree and Forest Invasives Initiative enabled collaboration among state forestry agencies to create public awareness, promote species diversity, assess the region's tree resources and determine the potential social, economic and environmental impacts of invasive species. Early prevention and detection can reduce the overall cost to communities, nursery industry, and landowners by either preventing pest establishment or managing infestations. With emerald ash borer now found in neighboring province of Manitoba and states of Minnesota and South Dakota, it is likely to arrive somewhere in North Dakota in the next few years.

Critical Issues

-
- 5 Health, Safety and Economy The Forest Service 2023-25 budget supports the state's health, safety and economy by conserving, protecting and enhancing priority forest landscapes including upland forests, riparian (streamside) forests, rural tree plantings and community forests by sustaining the agency's emphasis on providing technical, financial and education assistance to communities, rural landowners, fire departments, soil conservation districts, schools and citizens of North Dakota.
-

Performance Measures

1. Produced and sold 789,913 conservation seedlings for conservation tree planting purposes.
2. Maintained 42 miles of trails and 5 recreational areas serving 7,749 trail users and 1,725 campers.
3. Certified 53 Tree City USA and 4 Tree Campus USA communities.
4. Supported forestry-based economic benefits by providing financial assistance to implement forestry practices as measured by:
 - a. 61 grant projects funded.
 - b. \$326,286 of grant awards.
 - c. \$736,275 total value of project investments.
5. Developed sustainable community forestry programs as measured by:
 - a. 92 communities assisted.
 - b. 79% percent of the state population served.
 - c. 129 community forestry plans developed from professionally-based resource assessments and inventories.
 - d. 194 communities with local ordinances or policies that focus on planting, protecting and maintaining their community trees.
 - e. 154 active tree boards, commissions, or non-profit organizations that are formalized or chartered to advise/advocate for the planting, protection and maintenance of community trees and forests.
6. Provided training and education outreach as measured by:
 - a. 24,080 participants at workshops, meetings, and Arbor Day events.
7. Monitored the health and sustainability of North Dakota's forest resources as measured by:
 - a. 5,100 of forest resources surveyed for damaging agents.

244 Forest Service

Agency 244

8. Provided technical assistance on forest health issues, insects, and diseases on federal, state, and private lands as measured by:

- a. 250 landowners and homeowners receiving technical assistance.
- b. 2 agencies receiving technical assistance.
- c. 198 landowners, land managers, and conservations partners trained.

9. Assisted landowners to actively manage their land and related resources as measured by:

- a. 260 landowners receiving technical assistance.

10. Provided information for keeping land in a productive and healthy condition as measured by:

- a. 189 landowners educated.
- b. 366 conservation partners educated.

11. Helped landowners manage their forestlands to keep them healthy and productive as measured by:

- a. 183 forest stewardship plans written.
- b. 9,404 acres covered by those forest stewardship plans.
- c. 23 residences protected.
- d. 404 acres of cropland protected.
- e. 7,935 feet of roadway protected.
- f. 3,025 feet of riverbank or shoreline protected.

12. Enhanced community wildfire protection by:

- a. 1,128 firefighters trained throughout the state.
- b. 162 fire departments assisted.
- c. Responded to 72 mutual aid requests.
- d. Provided 21 days of suppression assistance through the Great Plains Compact:

- 4 Type 6 engines and 1 Type 3 engine.

e. Filled 26 national dispatch resource orders to Montana, Idaho, Wyoming and California.

13. Increased Rural Fire Capacity by:

a. 203 fire departments improved their capacity.

b. Enhance community wildfire protection at the local level by providing financial assistance to rural fire departments as measured by:

- 41 grant projects funded.
- \$360,735.70 CFPA grant awards funded.
- \$821,989.49 total value of project investments.

14. Provided natural resource education opportunities to:

- 216 teachers
- 3,571 students
- 360 other customers

Program Statistical Data

The North Dakota Forest Service utilizes a performance measures process to assess progress toward achieving long-range strategic goals, and ultimately the agency's mission. Performance measures are linked to the State Forest Action Plan and national reporting systems to document North Dakota Forest Service program outcomes. The North Dakota Forest Service developed performance measures using the State Forester's goals and statutory authority. The State Forester's goals are directly linked to the authority granted under North Dakota Century Code 4.1-21, 18-02, 18-14 and 57-57 to meet the forestry needs of the state. Performance Measures will be completed for each of the agency's programs beginning July 1, 2023, and ending June 30, 2025. A biennial accountability measures report will be prepared by the agency after June 30, 2025.

Explanation of Program Costs

The Forest Service needs based 2023-2025 budget request for Operations is \$24,337,781. The general fund request for Operations is \$5,210,325. Estimated income will be \$19,127,456. The general fund appropriation supports salaries, fringes and operating expenses for 27.0 general fund FTE, 1.0 FTE Special Funds and 45 seasonal positions that provide essential public forestry services. This investment combined with the collaborative efforts of the Forest Service's dedicated staff leverages over \$15 million in external grants and contracts for voluntary, educational and incentives-based forestry programs to address natural resource issues and customer needs identified in the North Dakota Forest Action Plan. The 2023-25 needs based budget request supports the Governor's Main Street Initiative by contributing to the health, safety and the economy of North Dakota through essential public services. See performance measures below.

Operations fund public forestry services provided by the North Dakota Forest Service through field offices at Bismarck, Bottineau, Carrington, Fargo, Lisbon, Towner and Walhalla. Expenditures include salaries, travel, motor pool, supplies, and telephone costs associated with servicing field forestry requests statewide each year from rural landowners, communities, schools and citizens. Operations fund emergency wildland fire fighters who protect lives, property and natural resources threatened by an average of 440 human caused wildfires that burn over 29,000 acres each year. Expenditures include salaries, travel, motor pool, supplies, repairs and sub-contracts for training, organizing and equipping rural fire districts, as well as support for a Forest Service strike team of five type 6 wildland engines. Operations fund tree production at Towner State Nursery. Expenditures include salaries, utilities, repairs and supplies for seeding, weeding, irrigating, fertilizing, lifting, packing and shipping operations associated with both bare-root seedling and containerized tree production.

Towner State Nursery provides seedlings for conservation and forestry plantings in every county of North Dakota.

The Forest Service 2023-25 base budget supports the Governor and Legislative Assembly providing a minimum 5% annual salary increase for each year of the biennium. The agency looks forward to working with the Governor and Legislative Assembly to address 2021-23 inflation as part of a statewide plan. The 2021 Legislative Assembly funded 1.5%/2% salary increases for the 2021-23 biennium. The 2019 Legislative Assembly funded 2%/2.5% salary increases for the 2019-21 biennium.

The 2023-25 special funds request includes \$900,000 for Trees for North Dakota Trust Fund grants. The Trees for North Dakota Trust Fund provides tree planting grants and supports promotional, educational and fund raising projects associated with strengthening the tradition of tree planting and management in North Dakota. The special funds request also includes \$1,200,000 in revenue generated from tree sales at Towner State Nursery.

Program Goals and Objectives

The State Forester's goals:

1. To positively impact forest-based economic growth and sustainability of communities by promoting the wise use of natural resources.
2. To improve the protection of people, property and natural resources by enhancing interagency cooperation in wildfire management.
3. To support informed decision-making and foster individual responsibility in stewards of all ages by raising public awareness about natural resource values.
4. To meet the forest and conservation tree planting needs of private and public landowners by producing and marketing high quality nursery stock.
5. To meet current societal demands by ensuring the health, productivity and growth of private, community and state forests.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: 4.1-21-02. State nursery - Maintenance - Purpose. A state nursery, under the direction of the state forester, must be maintained at Towner. The nursery shall propagate seeds and forest tree planting stock adapted to the climatic conditions of this state.

Special fund authorities for the operation of Towner State Nursery has not been adjusted since the 2017-19 biennium. Since that time, inflation, supply chain issues, increasing costs of materials/supplies, dramatic increases to the costs of fertilizer, herbicides, cover crop seed, soil amendments, fuel, propane, and labor have all

244 Forest Service

Agency 244

increased dramatically. These costs, coupled with increased seedling production to meet rising tree sale demands, has further strained the nursery budget. A special fund increase will ensure Towner State Nursery's ability to meet growing conservation tree planting needs of the state.

Necessary resources for implementation (including FTE's)*: A special fund increase of \$200,000 per biennium will be generated by income derived from increased conservation tree sales and modest price increases to reflect the cost of production. This request will increase the agency special fund authority from \$1 million to \$1.2 million for Nursery Operations. No state appropriated general funds are being requested.

Are resources being redirected or are they new or additional (including FTE's)*: All agency FTE and resources are being fully utilized to meet respective programmatic and agency goals as outlined in the North Dakota Forest Action Plan. Additional self-generated special fund authority will allow for expanded tree production to meet growing conservation tree planting needs and will be offset by nursery income derived from tree sales.

Who is served and impact of not funding*: A special fund adjustment will serve North Dakota Conservation partners including ND Soil Conservation Districts, farmers, ranchers, and land managers. If a special fund authority adjustments is not granted, Towner State Nursery will be unable to meet the growing needs for high quality, acclimated conservation stock for the state; forcing customers to seek less acclimated tree stock from out-of-state vendors.

Cooperative Fire Protection Initiative (Priority: 02)

State Initiative*: Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Century Code

4.1-21-01. State forester - Appointment - Qualifications - Duties.

4.1-21-03. Powers - Cooperative state agreements.

18-02-07. Cooperation of state forester and other agencies - Fire and forest protection.

18-14-01. Interstate compact for the prevention and control of wildland fires.

The Cooperative Fire Protection Initiative provides critical financial, technical and educational assistance to fire departments for wildfire prevention, suppression and mitigation. In addition to helping ensure that North Dakota's first responders are prepared, the initiative provides funding to complete wildland fire training and Statewide Interoperable Radio Network (SIRN) training to enhance firefighter and public safety.

In North Dakota, initial attack wildfire suppression authority is provided by fire departments. The North Dakota Forest Service Fire Management Program supports the state's 378 fire departments in providing this essential public safety services by enhancing firefighting safety and capacity. The program provides rural fire departments with cost-share funds for organizing, training, planning, purchasing and repairing fire equipment.

Each year on the average, North Dakota experiences over 440 human caused wildfires that burn in excess of 29,000 acres. Today's wildfires follow cycles, with larger fires frequently coinciding with drier years. For example, in 2006, North Dakota experienced 1,077 wildfires which burned 68,122 acres. When wetter conditions prevailed in 2012, there were 376 fires which burned 31,293 acres. Fire season in North Dakota, as in many other western states, is now considered year-round, with fire starts documented in every month. The year 2021 was unprecedented, with 2,199 cumulative fires, 122,300 acres burned, 3 incidents with injury, 6 total injuries and 49 damaged structures. Despite the conversion of much of North Dakota's indigenous prairie to non-native grasses and crops, much of the state is covered by highly combustible light fuels that dry quickly and burn readily and rapidly. High accumulations of these fuels on the landscape has resulted in intense fires threatening lives and property.

Adding to the natural wildfire threat is increased population, infrastructure and the oil and gas industry which has resulted in an increase in the fire occurrence across the state. The area of wildland urban/industrial interface, zones where human development intermingles with undeveloped land, is growing across the state and placing additional responsibility on smaller rural fire departments that are most often staffed by volunteers. Federal firefighting resources are now increasing and are coincidentally creating more competition for local and state firefighters.

Fire departments across the state need training and financial assistance to address firefighter and public safety as more and more people move into their protection districts. The types of wildfires are growing in both size and intensity, due to increasing fuel loads, drier weather patterns and longer fire seasons.

Necessary resources for implementation (including FTE's)*: The request includes \$187,000 for salary and travel for 1.0 FTE. The agency will support the position with operating from other sources of funding.

The North Dakota Forest Service works collaboratively with key partners and stakeholders in public safety, emergency management, fire suppression and prevention and planning to ensure that federal, state and local resources are being focused on important landscape level areas with the greatest opportunity to address shared management priorities. The Cooperative Fire Protection Initiative will leverage local, state, federal, corporation and private financial assistance for critical wildfire management needs identified in the North Dakota Statewide Assessment of Forest Resources and Forest Resource Strategy. The initiative will leverage approximately \$788,740 salary from Special Funds for 4.0 FTE. Additional in-kind contributions come from participating entities including communities and fire departments for their fire prevention projects, fire training seat hours, and outreach including public service announcements. The agency has demonstrated a successful history of engaging local, state, federal and tribal partners and will rely on these partnerships to implement the Cooperative Fire Protection Initiative. Partners will collaborate to assist community leaders, landowners, local emergency managers and fire departments with fire management issues, preparedness and planning activities, prevention outreach, and hazardous fuels reduction needs.

Are resources being redirected or are they new or additional (including FTE's)*: All agency FTE and resources are being fully utilized to meet respective programmatic and agency goals as outlined in the North Dakota Forest Action Plan. This is a request for an additional FTE, or new resource.

Who is served and impact of not funding*: The Cooperative Fire Protection Initiative ensures the protection of lives, property and natural resources by providing fire suppression assistance, training and equipment to the 378 North Dakota fire departments. Specific objectives include:

244 Forest Service

Agency 244

- a) Develop and promote local and regional fire department training programs to provide required firefighter certifications and supplement State Fire School courses.
- b) Implement planning and preparedness practices to provide effective and efficient response to requests for assistance by rural fire departments;
- c) Strengthen mutual aid support to fire departments, including suppression, preparedness, training and prevention;
- d) Provide educational outreach with a consistent fire prevention message to landowners, land managers and the public to coordinate and promote safe fire use practices;
- e) Award cooperative fire assistance grants to fire departments for personal protective equipment, firefighting equipment, training and hazardous fuels reduction projects to mitigate wildland fire hazards.
- f) Train fire departments in the use of new radios and operation of the Statewide Interoperable Radio Network (SIRN). SIRN is North Dakota's \$120 million investment in interagency public safety communications. As SIRN rolls out, the North Dakota Forest Service will support this effort by providing initial training and continuing education to fire departments.

Not funding will limit opportunities for North Dakota's 378 fire departments both requested and required training.

Forest Recreation Enhancement (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	200,000	-	200,000	0.00	200,000	-	200,000	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Century Code

4.1-21-01. State forester - Appointment - Qualifications - Duties.

4.1-21-06. State forester may accept land for forestry purposes.

4.1-21-07. Obligations incurred in acquiring land - Payment.

4.1-21-08. Powers of state forester when lands acquired or leased.

4.1-21-09. Revenue received from lands acquired or leased - Regulations governing - Payments in lieu of taxes.

4.1-21-10. State forester may sell, exchange, or lease lands.

The Forest Recreation Enhancement Initiative will support the agency's delivery of services to meet increasing outdoor recreation demands across the spectrum of State Forest users. The NDSU-North Dakota Forest Service manages five state forests encompassing 13,945 acres. State Forests are located in the Turtle Mountain, Pembina Gorge and Sheyenne River Valley regions of the state. The goal of the State Forests Program is to practice sound land stewardship to enhance the forest, grassland and wetland ecosystems found on the State Forests.

The North Dakota Forest Service supports outdoor recreation experiences by maintaining and improving recreational infrastructure on State Forest lands. The agency manages 4 campgrounds, 2 primitive campsites, 42 miles of trail, 3 public access boat ramps, 2 fishing piers, and 2 scenic overlooks.

The demand and utilization of the State Forests have increased substantially in response to society's renewed engagement with our natural resources. Outdoor recreation is very important to the physical and emotional wellbeing of North Dakotans and since 2020 the State Forests has observed a 207% increase in trail usage and a 197% increase in campground usage.

The North Dakota Forest Service does not receive general funds specifically for operations, including maintaining and operating campgrounds, trails, and day use areas. A small amount of revenue is generated by agricultural leases and camping fees. Both fee schedules are based on fair market rental rates and camping fees of other similar campgrounds. The agency also receives a small dividend payment. The program averages \$30,965 in annual income from the State Forests.

Necessary resources for implementation (including FTE's)*: The request includes \$200,000 for part time salaries and operating.

To better serve the growing needs of State Forest users, funds from the North Dakota Recreation Enhancement Initiative will be used to support operation, maintenance, and enhancements of agency-managed recreational infrastructure including trails, campgrounds, and recreation areas. Additional general funds for operating would enhance outdoor recreation experience for an increasing number of visitors.

Are resources being redirected or are they new or additional (including FTE's)*: All agency FTE and resources are being fully utilized to meet respective programmatic and agency goals as outlined in the North Dakota Forest Action Plan. This is a request for a additional resources to be utilized to enhance outdoor recitation experiences for our customers.

Who is served and impact of not funding*: The State Forests are comprised of woody plant communities interspersed with open grassland, wetlands and small lakes. The varied plant communities provide excellent habitat for wildlife and numerous opportunities for outdoor recreation; playing an important role in the economic well-being of rural communities by attracting sportspersons, hikers, bikers, equestrians, campers, skiers, snowmobilers, birdwatchers and other outdoor enthusiasts. In addition, the state forests provide the general public with the opportunity to collect common berries, harvest firewood, observe native wildlife and plant communities, and examine sustainable forest management practices.

Recreational users have grown accustomed to better overall quality of services and recreational experiences. Not investing and improving means not meeting the increasing demands of our customers.

CHAPTER 4.1-21 FORESTRY

CHAPTER 18-02 FOREST FIRE WARDENS

CHAPTER 18-14 INTERSTATE WILDLAND FIRE COMPACT

A wide variety of customers depend on the North Dakota Forest Service for technical, financial and educational forestry assistance. The state forester administers forestry programs serving communities, rural landowners, soil conservation districts, rural fire districts, schools and citizens of North Dakota. All the programs utilize a voluntary, educational and incentives-based approach to address natural resource needs and customer demands. The agency operates a nursery at Towner specializing in the production of conifer (evergreen) tree seedlings. The agency also owns and manages approximately 13,945 acres of state forest lands.

A significant amount of additional funding is available to state forestry agencies nationwide, including the North Dakota Forest Service, through I/JA/BIL/Infrastructure Funding. The investment of State Appropriated funds, combined with the collaborative efforts of the Forest Service’s dedicated staff, leverages over \$15 million in external grants and contracts for voluntary, educational and incentives-based forestry programs to address natural resource issues and customer needs identified in the North Dakota State Forest Action Plan. The agency’s Special Fund authority for the 2021-2023 biennium is \$10,669,315. The Optional Request includes an additional \$8,458,141 in Special Fund authority for a total of \$19,127,456.

Necessary resources for implementation (including FTE's)*: The agency’s Special Fund authority for the 2021-2023 biennium is \$10,669,315. The Optional Request includes an additional \$8,458,141 in Special Fund authority for a total of \$19,127,456.

The Forest Service 2023-2025 budget will conserve, protect and enhance priority forest landscapes identified in the North Dakota State Forest Action Plan. The plan ensures the care and protection of native forests, conservation tree plantings and community forests by sustaining the agency’s emphasis on providing financial, technical and educational assistance to communities, rural landowners, rural fire districts, soil conservation districts, schools and citizens of North Dakota. The budget supports seven forestry programs that address critical issues and service needs identified in the State Forest Action Plan. The plan provides a comprehensive

analysis of forest-related conditions, trends, threats and forestry opportunities in North Dakota. Plan development was driven by input and collaboration from stakeholders, partners, and customers to identify needs and priorities. Long-term strategies focus financial, technical and educational resources on: a) conserving and managing working forests landscapes for multiple values and uses; b) protecting forests from threats including catastrophic wildfires, storms, flooding, insect and disease outbreaks and invasive species; and c) enhancing benefits from trees and forests including air and water quality, soil conservation, wildlife and fish habitat, biological diversity, carbon storage, forest products, forestry related jobs, and production of renewable energy.

Are resources being redirected or are they new or additional (including FTE's)*: All agency FTE and resources are being fully utilized to meet respective programmatic and agency goals as outlined in the North Dakota Forest Action Plan. This is a request for additional, non-state general fund, resources to be utilized to the quality and quantity of services provided to our customers.

Who is served and impact of not funding*: Forestry programs contribute to the Health, Safety and Economy of North Dakota. Additional Special Fund Authority would greatly increase the agency's capacity to provide essential public services including:

1. Outreach and Education to teachers and K-12 students to make wise decisions about the conservation of trees and forests.
2. Community Forestry assistance for tree planting and forestry projects in North Dakota's cities and towns. Nearly 70% of North Dakota residents live in a Tree City USA community.
3. Forest Health protection including insect and disease surveys and training to minimize the threat of invasive species like emerald ash borer. North Dakota has 95 million ash trees threatened by emerald ash borer. The pest has now been confirmed in 35 states and 5 Canadian provinces.
4. Forest Stewardship assistance for rural landowners to manage, protect and utilize their native and planted forest resources. Outdoor Heritage Fund Windbreak Renovation Initiative projects are underway with 323 projects that renovate declining field and farmstead windbreaks.
5. Fire Management for the protection of lives, property and natural resources through training, organizing and equipping North Dakota's 378 rural volunteer fire departments. An average of 440 human caused wildfires burn over 30,000 acres each year. The year 2021 was unprecedented, with 2,199 fires, 122,300 acres burned, 3 incidents with 6 total injuries and 49 damaged structures.
6. Towner State Nursery for the annual production of up to 1 million conservation tree seedlings for field and farmstead windbreaks, living snow fences, wildlife and other conservation plantings.
7. State Forests to provide wildlife habitat, clean air and water, recreational opportunities and forest products. The Forest Service owns and manages 13,945 acres that play an important role in the economic well-being of several rural communities by attracting hunters, hikers, campers, skiers, snowmobilers, tourists and other outdoor enthusiasts.

Not securing additional grants and contracts available through IJA/BIL/Infrastructure Funding means that other states would increase their services to citizens, while North Dakota would remain at a current level of service.

Statutory Authority

North Dakota Century Code Chapter 54-24

Agency Description

The North Dakota State Library has embraced the Governor’s Strategic Initiatives for North Dakota: Work As One, maintain a Citizen Focus, approach problems with a Growth Mindset, apply Leadership Everywhere, and Make a Difference, with the goals to Empower People, Improve Lives and Inspire Success. All work and services delivered by North Dakota State Library staff to citizens and librarians are oriented to incorporate the initiatives and goals as presented above.

The North Dakota State Library provides statewide leadership, advocacy and community development to academic, public, school and special libraries. The State Library provides comprehensive informational resources for all libraries and citizens in the state. Developmental and technical services are provided including training librarians in all aspects of librarianship and management, collecting, organizing, and cataloging state documents to preserve the history of the state; promoting the statewide online library catalog; technical assistance; facilitating interlibrary loan for all libraries and citizens statewide; providing talking book services to vision impaired citizens; digitization coordination and development services; distributing grants on a competitive basis to school, public, and academic libraries; and coordinating and providing Online Library Resources for libraries and citizens. State Library staff provide technical assistance and library development services to academic, public, school and special libraries statewide.

The State Library collaborates with public and private agencies and organizations to work as one to develop and coordinate statewide services and enrich information services for citizens in local communities through public and school librarians.

During Fiscal Year 2020 the State Library reorganized to reset agency priorities and meet the Governor’s strategic initiatives and goals. Four major divisions were established with all agency services being placed within the four divisions. Through organizational efficiencies additional services were added, including literacy services, outreach and partnership services, enhanced digital initiatives, and statistical measurement services.

Agency Mission Statement

Providing pathways to information and innovations for North Dakota’s libraries, state government and residents.

Major Accomplishments

-
- 1 Established partnerships through the Library Vision initiative, which provides a long-range plan for coordinated library services.

 - 2 Promoted the statewide online library network of linked libraries.

 - 3 Continued development of an extensive interlibrary loan system and facilitated over 20,000 interlibrary loan requests.

 - 4 Provided professional reference services to librarians, state agencies and citizens; provided informational databases available to all North Dakotans

 - 5 Continued to operate an electronic state document retrieval and delivery service.

 - 6 Administered Library Vision grant funds and federal Library Services and Technology Act (LSTA) training grant funds; administered the State Aid to Public Libraries grant program.

 - 7 Provided Talking Book services to 1,300 North Dakotans.

 - 8 Provided library development services to academic, public, school and special libraries.

Major Accomplishments

-
- 9 Continued to develop and administer a statewide digitization program and collaborated with Montana in the Digital Public Library of America (DPLA).

 - 10 Continued to partner with the Grand Forks Air Force Base to circulate STEM kits to libraries statewide.

 - 11 Continued to partner with the ND Parks and Recreation Department to give public libraries state park passes.

 - 12 Administered the five year plan for 2018-22 of State Library services in cooperation with the Institute of Museum and Library Services (IMLS).

 - 13 Continued to partner with Minnesota and South Dakota to collaboratively purchase Online Library Resources for all libraries in North Dakota at a greatly reduced price.

 - 14 Partnered with libraries across the state to offer a virtual statewide Summer Reading Program Kickoff Week.

Critical Issues

-
- 1 Equal, efficient, and timely access to information for all citizens of North Dakota remains critical, regardless of a person's physical limitations or where they live. Twenty-two counties throughout the state do not have a county library mill levy, and many counties have a need for additional public library services. County and city residents statewide have access to the State Library's reference and materials collection and rely on its interlibrary loan services for the provision of books and information.

 - 2 The need to continue Library Vision funding in North Dakota is critical. This funding has forged partnerships between the State Library and all types of libraries throughout the state, and expanded community partnerships which has resulted in more efficient use of collections and increased access to materials and services. Library Vision promotes and makes possible further development of school, academic and public libraries.

 - 3 Continued federal and state financial support is critical for grant programs and centralized State Library services that are not provided by other libraries in North Dakota. Critical services include State Aid to Public Libraries, librarian training and education, state document services, interlibrary loan and reference services, the provision of technical and library development services directly to public and school libraries and talking book and disability services.

Performance Measures

1. To annually award Library Vision grants to librarians statewide and LSTA training grant funds according to state and federal guidelines, North Dakota legislative intent, and guidelines set by the North Dakota Library Coordinating Council (NDLCC).
2. To sponsor focus groups to gather information from librarians, trustees, and citizens of North Dakota to be used in statewide library planning efforts.
3. To measure impact on community activities and economic development of programs that are awarded grants through the use of reports and NDLCC site visits.
4. To inform citizens statewide of all types of library services by sponsoring booths at annual conferences and association meetings; preparing timely press releases and public service announcements, by publishing the Flickertale newsletter monthly in an electronic format; and through the use of all types of social media.
5. To provide library and information services statewide by responding to requests and sending materials within two days.
6. To promote the state network of linked library networks for the provision of library services.
7. To provide technical assistance and library development services to 80 public libraries through a minimum of one contact annually.

8. To provide three statewide workshops/conferences annually for training and continuing education to librarians; to provide on-site and online database and electronic catalog training on an ongoing basis.

Program Statistical Data

SERVICES:

23,000 Biennial interlibrary loan requests processed: from public libraries, school libraries,

individual citizens, and from state government and academic libraries. Materials are drawn from the State Library collection and from the established network which includes all types of libraries statewide.

21,835 Subject requests processed and visits to the library for the biennium.

43,285 Items checked out from the State Library collections by libraries and citizens in North Dakota last biennium

COLLECTIONS:

109,190 Items in the State Library collection.

Explanation of Program Costs

\$385,340 PROFESSIONAL SERVICES / RESOURCE SHARING PROVIDERS: Includes: MINITEX - \$115,000, a contract held by the State Library with the State University System of Minnesota. This includes borrowing 30,000 items from Minnesota libraries that are not available from North Dakota libraries, on behalf of all libraries and citizens in North Dakota. ODIN, the Online Dakota Information Network, totaling \$122,000, the statewide online library catalog which has 110 members of all types of libraries statewide; it provides a circulation system, public access catalog, interlibrary loan / document delivery system, acquisitions, and a serials system. It is the backbone for resource sharing within the state, OCLC, \$106,000, which is an international cataloging, interlibrary loan, and researching database which allows efficient and cost effective cataloging of materials which are then imported into ODIN, and has the functionality to search, lend and borrow the materials instate, nationally and internationally using an extensive interlibrary loan system. Zoobean, \$12,000, to assist statewide libraries with reading challenges. \$30,000 for speakers to provide professional development to librarians at NDSL annual conference and NDLA annual conference.

\$641,762 RESOURCE AND REFERENCE MATERIALS and ONLINE LIBRARY RESOURCE DATABASES. Resource Materials includes: magazine subscriptions, serials, indexes, books, online databases, and material about North Dakota and by North Dakotans. All books and materials are made available to every North Dakota citizen through the extensive statewide interlibrary loan system organized and managed by the State Library. Online Library Resources - The State Library purchases databases and Online Library Resources that provide electronic, remote access to full-text online magazines and research and reference materials, e-books and e-audio books which are accessible to all North Dakota citizens, students, educators, and libraries that have Internet access.

\$81,000 POSTAGE - Includes: all mailing activity to school, public, special and academic libraries and North Dakota citizens statewide, sending informational materials from the State Library's collection and supporting over 23,000 interlibrary loan items during the biennium. The agency batch's mailed materials when possible to reduce costs and create efficiencies in the mailing process. The agency promotes the use of online resources, which are printable at the borrower's location, to reduce postage costs.

250 State Library

Agency 250

\$76,717 PRINTING / SUPPLIES / SOFTWARE - Funding for packaging supplies to mail books and informational material to libraries and citizens statewide; photocopier and computer paper, and related supplies; and office supplies. Updating software for functionality and to legally operate. Printing materials, brochures and information to educate and inform libraries and citizens of the State Library services.

\$12,960: software that facilitates the collection of public library statistics and data for reporting to the federal government and for use by the Library Development staff.

\$107,626 TRAVEL - Professional staff travel to provide technical assistance statewide to 80 public libraries and 363 school libraries with local on-site training, training programs to librarians, presenting at booths, and workshops for librarians throughout the state; travel for the State Librarian and professional librarians for state, regional and national committee work and continuing education.

\$249,000 ITD - Funding for State Library data processing and Internet connectivity. Connectivity and filtering services for public libraries who participate in the E-rate service through the state's Information Technology Department. Telecommunications for the State Library.

\$40,000 RENT to FACILITY MANAGEMENT

\$69,000 EQUIPMENT - Computer equipment for agency workload on a four-year replacement basis; other equipment necessary to support agency services.

\$240,000 CONTINUING EDUCATION / PROFESSIONAL DEVELOPMENT Workshops, conferences and training is delivered to librarians, trustees, students, educators, and the public in the use of online library resources, databases and the statewide library catalog; librarians receive training on library skills, new library director orientation, strategic planning; library management; funding and mill levy issues.

Program Goals and Objectives

Provide direct informational and library services to citizens and librarians who have inadequate or no local library services and facilities. Coordinate an interlibrary loan referral service for all North Dakota libraries and citizens. Provide reference services to patrons statewide and to patrons in their capacity as state employees.

Develop and manage the State Document Depository program, which preserves state agency history and facilitates access to publications done by state agencies for all citizens of the state.

Provide talking (audio) and large print books to vision impaired North Dakotans or North Dakotans who cannot hold a book due to a physical disability.

Coordinate, purchase, and provide Online Library Resources (OLR) to all citizens and libraries throughout the state which are accessible from a device that has access to the Internet. Coordinated purchasing of OLR databases saves local libraries 70% - 90% over the cost of their individual purchases.

Provide statewide coordination and development for 65 school and public libraries of the state's online library catalog which makes library materials available locally and to all North Dakotans .

To develop, train and support school and public librarians and library services statewide; to provide technical assistance in all areas of library services.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDSL did not meet the MOE requirement for the federal Fiscal Year (FY) 20 for our federal Grants to State Program from the Institute for Museum and Library Service (IMLS) which is funded under the Library Services and Technology Act. The majority of our MOE is met through employee salaries. During FY20, NDSL had a higher turnover rate than is normal. One of the employees that retired was our Fiscal Director and LSTA Coordinator. If the Fiscal Director has still been here, she would have monitored the MOE compliance and we would have requested authority from the Emergency Commission to reallocate dollars to enable us to meet our MOE. NDSL has submitted an MOE waiver but we have not yet received the results of that request. The impact of not meeting our MOE is a reduction in our next Federal grant of approximately 20%. We are requesting that these funds be replaced one-time with state dollars to ensure that we are able to continue to fund staff positions and provide services to the Library Community, State Government and North Dakota residents.

Necessary resources for implementation (including FTE's)*: Funding

250 State Library

Agency 250

Are resources being redirected or are they new or additional (including FTE's)*: Resources are being redirected to replace federal dollars.

Who is served and impact of not funding*: NDSL serves the North Dakota Library Community, state agencies and North Dakota citizens. The impact of the loss of funding would be the need to eliminate one or more online library resources that support students and lifelong learners; eliminate grants that support individuals and library staff in pursuing higher education and professional development; purchase fewer library materials; decrease on-site visits to North Dakota libraries and decrease support of professional development for NDSL staff.

Cost to Continue (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	54,559	-	54,559	0.00	54,559	-	54,559	0.00

State Initiative*: Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Increase in operation costs as result of increased travel for statewide support to public libraries and tribal libraries, inflation of online resources and subscription services that directly support libraries, state agencies and patrons.

Necessary resources for implementation (including FTE's)*: Continuation of funding.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding.

Who is served and impact of not funding*: Statewide libraries, state agencies, and NDSL patrons would be impacted if funding is not provided. NDSL would need to reduce support to on boarding library directors, reduce online resources and professional development. for libraries.

Salary Increase (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	411,040	-	411,040	0.00	-	-	-	0.00

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The NDSL has had challenges in filling positions over the last 18 months and we have heard repeatedly from candidates that have turned down a position that it is due to the salary that we are able to offer. We have had staff that have accepted positions at other agencies due to our lower pay scale even compared to other state agencies. We need to be more competitive with our salaries to be able to hire and retain staff. Inflation and the increased cost of living expenses will make it harder for the State Library to be competitive

Necessary resources for implementation (including FTE's)*: Funding is the only necessary resource; existing staff will execute the funds.

Are resources being redirected or are they new or additional (including FTE's)*: These would be additional funds to our salary line.

Who is served and impact of not funding*: NDSL employees are the direct impact for this request. The impact of not funding is that we will continue to have difficulty with filling positions and retaining staff.

Retirement (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	40,000	40,000	0.00	-	40,000	40,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	40,000	40,000	0.00	-	40,000	40,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDLS has 3 employees that are eligible to retire and we do not have the necessary funding to cover the associated payouts required as we anticipate our turnover rate returning to a lower amount as has been normal for our agency prior to 2020.

250 State Library

Agency 250

Necessary resources for implementation (including FTE's)*: Funding to support the required expenses

Are resources being redirected or are they new or additional (including FTE's)*: Additional payout funding.

Who is served and impact of not funding*: State employees are served by this request being funded .The impact of not funding would be that we wouldn't have the ability to pay current staff salaries or we would be obligated to overspend our authority.

IT Equipment (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	43,000	-	43,000	0.00	-	43,000	43,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	43,000	-	43,000	0.00	-	43,000	43,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In response to the pandemic, NDSL has implemented a hybrid telecommuting option for staff. Not all positions are telecommute capable due to the need to serve in-person patrons and to mail library materials. Prior to 2020, no NDSL employees telecommuted and very few employees had laptops. The State Librarian is the only employee that worked solely on a laptop. NDSL needs to transition 38% of our staff from desktops to laptops to allow for telecommuting and to increase the efficient use of technology by allowing employees to utilize their equipment beyond their desk.

In addition we plan to implement an electronic filing system (FileNet) for the administrative office to ensure that staff can access files when they are in the building and working remotely and to eliminate the need to retain paper files.

Necessary resources for implementation (including FTE's)*: Funding is the only necessary resource; existing staff will execute the funds.

Are resources being redirected or are they new or additional (including FTE's)*: These would be new funds.

Who is served and impact of not funding*: NDSL staff are the direct beneficiaries of the upgrade. When NDSL staff can use technology more efficiently and effectively we can better serve the library community, state agencies, and the library patrons. The impact of not funding this request is that it will be harder for NDSL staff to telecommute, we will continue to retain paper files which will impact how efficiently we can process bills, contracts and other documents and the State Library will be less efficient overall.

		Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
25000 - State Library	-	-	300,000	-	300,000	-	150,000

250 State Library

Library Building (Priority: 06)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Library Building -- \$30,000 architect fee, \$270,000 renovation	001	250-6200	25030	-	-	300,000	-	300,000	-	150,000
Total				-	-	\$300,000	-	\$300,000	-	\$150,000

Explanation / Justification: To renovate the information desk and workspace in order to create space that is more flexible and will allow staff to work together more efficiently by allowing for cross-training and easier access to provide services to patrons and state employees that come into the building. Remove a secondary desk and replace it with a checkout station. Remove bookshelves and add glass walls to create an emerging technologies lab for state agencies and local libraries to utilize. Additionally, replace the 40 year old carpeting in the NDSL offices throughout the building and replace the blinds of the same age.

A portion of the funding would be utilized to hire an architect to help us plan the construction. We will need to utilize Facilities Management to assist us with the renovation of the spaces. Existing staff will work with Facilities Management and the architect to execute the project.

Library Vision - Tribal Libraries (Priority: 07)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	250-8400	25060	-	50,000	-	50,000	-	50,000	-
Total				-	50,000	-	50,000	-	50,000	-

Explanation / Justification: NDSL would like to extend Library Vision grants to tribal libraries. Currently, tribal libraries are not eligible for state funded Library Vision grants since they are not a publicly funded library. The five tribal libraries are all community college libraries; four of the five have been designated as the public library by their tribal government. Tribal Libraries are not eligible for State Aid to Public Libraries since they don't meet 40-38 which outlines the definition of a library. NDSL wants to support the tribal libraries in meeting the needs of their communities since they would classify as unserved and serving the unserved is one of our agency priorities. We would include the tribal libraries in grant opportunities that are open to all publicly funded libraries such as collection development grants as well as create grant opportunities that are unique to the tribal libraries based on discussions we will have with the tribal libraries.

Statutory Authority

ND Constitution Article IX, Section 12; North Dakota Century Code Chapter 25-07.

Agency Description

North Dakota School for the Deaf Resource Center provides education to persons of all ages who are deaf/ hard of hearing.

NDSD/Resource Center for Deaf and Hard of Hearing is fully accredited and specializes in speech and language and auditory development for students who are deaf or hard of hearing. Children birth to 3 years of age are served through the Parent/Infant program (specialized instruction in the homes). Elementary and middle school students are served through the Day Residential School programming at NDSD or by outreach specialists in their home schools. Educational services for grade 9 through graduation are provided in partnership with the district of residence and outreach specialists in their home school or Devils Lake Public Schools (if living at NDSD). Adults age 18 to death are served through the Adult Outreach Program

In addition to the school’s traditional role as an educational institution, NDSD has become a state resource center for deafness. Through collaborative ventures with other agencies, NDSD outreach programs have increased delivery of services including assessments, evaluations, consultations, instruction and in-service training specific to the hearing loss.

Agency Mission Statement

NDSD shall serve as a State Resource Center to provide advocacy, leadership, and educational expertise for all individuals in North Dakota who are deaf or hard of hearing.

Major Accomplishments

- 10 Newsletter (Tidbits) is sent monthly to showcase what is happening at NDSD.
00

- 20 Renovation of the pool area locker rooms, showers, lights, etc.
00

- 30 Hired a masters level counselor to provide services to students as needed.
00

- 40 Facilitated 18 adult support groups in North Dakota cities.
00

- 50 Provided training for professionals working with adults who are deaf or hard of hearing, for agencies and conferences such as Vocational Rehabilitation,
00 directors of assisted living facilities, law enforcement, lawyers and judges, county workers and hospitals.

- 60 Refocused the residential school as a Model School with a professional learning community for the teachers and other professionals who provide services to
00 the students who are deaf or hard of hearing.

- 70 Increased interpreting classes provided to families and ND communities with specific classes for individual students and their teacher and classmates.
00

Major Accomplishments

- 80 Provided support and professional development of educational interpreters in the state through the partnership of NDSU, Lake Region College, and Minot State University.

- 90 Facilitated an Ice Fishing Event (7 children, 14 adults) for families with students who are deaf or hard of hearing to get together and share experiences.

- 10 Provided interpreting for the Governors Press Conferences on Covid 19.

- 11 test

Critical Issues

- 10 To provide a continuum of services, from residential fulltime to consultation and adaptive equipment, for all children who are deaf or hard of hearing across North Dakota.

- 20 To continue to recruit qualified staff and personnel.

- 30 To provide services safely to those who are deaf and hard of hearing in their homes as requested

- 40 To increase use of social media to inform stakeholders of the scope and quality of services provided by the Outreach Specialists who utilize "best practices" to serve deaf and hard of hearing persons of all ages.

- 50 To increase the use of the residential model school as a training site for teachers and administrators, from across the state, in deaf education with a focus on language acquisition and auditory training.

- 60 Become a Resource/Outreach Center for all individuals in North Dakota who are deaf or hard of hearing.

- 70 Identify gaps in service provision for North Dakota’s individuals who are deaf or hard of hearing and address the gaps/needs.

- 80 To implement the Facility Master Plan assuring ADA compliance and safety of all persons.

- 90 To educate all stakeholders of the fact that deaf and hard of hearing people of all ages are at risk if appropriate intervention is not provided.

Performance Measures

Performance measures and results are reported are implemented through the Strategy Review with specific goals, objectives, as well as delineation of time-lines. Timelines are indicated for each goal and persons (departments) responsible for achieving the goals and objectives are also responsible for documenting progress as well as data to show how many individuals have been served.

252 School for the Deaf

Strategy Review Objectives are

1. The NDSD Resource Center will be the first point of contact to gain information about hearing loss.
2. All deaf/hard of hearing children in ND receive quality education in their preferred mode of communication (Residential School and Outreach).
3. All deaf/hard of hearing adults will have access to needed services.
