Explanation of Program Costs

2023- 2025 Explanation of Program Costs

Program Costs: Our mission of birth to death, face to face, tailored service to each deaf and hard of hearing individual in North Dakota

Programs: Our evolving programs are Parent Infant Program, School Age Outreach, Communications, Model Residential School, and Adult Outreach.

Special Funds:

Base Budget: The base budget anticipates special fund collections from the ND Department of Trust Lands, Head Start lease and meal revenue, and several office leases.

Decision Packages and Forms:

Decision packages and forms include inflation, two staff positions, the 2023-2025 teacher composite schedule, extraordinary repairs, and may include equipment requests and an equity wage request for classified employees.

252 School for the Deaf

Agency 252

Staffing: 44.61 FTE's

Superintendent: 1.0 FTE provides agency administrative and principal duties to the agency.

Business Administration: 3.0 FTE business manager and administrative assistant positions provides support to all NDSB programs.

Plant and Custodial Services: 4.0 FTE plant and custodial 3.0 FTE provides complete support to NDSB programs and tenants.

Food Services: 4.06 FTE provide meals for NDSB and Head Start Program

Resident Living: 4.75 FTE Provide after hour academic and social education as part of our educational dorm curriculum.

Health Services: 1.51 FTE Day and evening shift professional nursing to campus.

Information Technology and Education Support 2.0 FTE:

1.0 FTE provides information technology support to all NDSB programs and Head Start.

1.0 FTE is administrative assistant who manages a multitude of tasks related to school operations.

Academic and Library Services: 5.25 FTE

Professional staff provide center -based instruction addressing each student's Individual Education Program (IEP) in preschool, kindergarten, and grades 1-8. Library services are available to resident students and on a state-wide basis.

Communications/Interpreter Services: 6.39 FTE

The communications department with two positions in Bismarck and six on campus provide a variety of interpreter services in support of all NDSB programs.

Adult Outreach Services: 3.75 FTE

The adult services department advocates on behalf of people who are deaf and hard of hearing adults in the state.

Parent Infant Program 5.90 FTE

Facilitates infant and youth deaf and hard of hearing communications services throughout North Dakota. Services include home visits, outreach to school age students, consulting to Early-childhood tracking teams, Infant Development programs, Head Start Programs, Day Care settings, and medical facilities.

Temporary Salary: Funds temporary positions for drivers, lifeguards, dorm staff, teachers, technicians, interpreters, curriculum, and summer camp.

Agency 252

Operating Expenses

The majority of the following base budget operating expense is funded by special funds.

Travel (521000)- \$ 337,371 Service delivery to individuals includes most travel expense categories with the largest being DOT. Staff and parents included.

Supplies /IT Software (531000) \$ 16,000 Primarily IT software.

Supply/Material Professional (532000) \$ 39,000 These are professional educational supply cost.

Food and Clothing (533000) \$ 170,850. Food costs related to campus and contracted meal delivery.

Bldgs., Ground, Maintenance (534000) \$ 103,000 General Campus Maintenance

Miscellaneous Supplies (535000) \$ 82,000 Miscellaneous Supplies all cost centers

Office Supplies (536000) \$ 14,000 All areas

Postage (541000) \$ 9,750

Printing (542000) \$ 10,750

IT Equip Under \$ 5000 (551000) \$ 81,000 IT equipment in all programs.

Other Equip Under \$ 5,000 (552000) \$ 28,200 Other equipment campus and programs

Office Equip & Furn Supplies (553000) \$ 8,000 furnishing replacement

Utilities (561000) \$ 252,112: Natural gas, electricity, sewer, water, garbage

Insurance (571000) \$ 26,863 Property, boiler, and risk management premiums.

Rental/Leases-Equip & Other (581000) \$ 15,192 Primarily campus copy machine

Rental/Leases – Bldg/Land (582000) \$ 60,023 Lease existing office locations

Repairs (591000) \$ 45,720 Plant and equipment,

IT-Data Processing (601000) \$ 111,799 ITD Fee

IT-Communications (602000) \$ 68,500 ITD Fee

252 School for the Deaf

Agency 252

IT Contractual Services and Repairs (603000) \$ 26,350: IT contractual service provision for IVN rooms, and related maintenance contracts.

Professional Development (611000) \$ 27,500 Key to program development.

Operating Fees and Services (621000) \$ 43,400 Primarily plant safety system maintenance.

Fees Professional Services (623000) \$ 128,206: Professional services include speech therapy, physical therapy, audiology, interpreters, and other consulting specialties.

Program Goals and Objectives

Strategy Review Objectives are

1. The NDSD Resource Center will be the first point of contact to gain information about hearing loss.
2. All deaf/hard of hearing children in ND receive quality education in their preferred mode of communication (Residential School and Outreach).
3. All deaf/hard of hearing adults will have access to needed services.
4. The NDSD Resource Center will address the problem of recruiting and retaining quality staff.

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Implementation of an update to Teacher Composite scale based upon the HRMS 2023-2025 recommendation is a critical factor in pursuit of a competitive wages for our special education teacher of the deaf specialists. Noteworthy in the recommendation is an increase in the number of steps to reach maximum pay within a lane on the scale from 20 to 24. Approximately half of NDSD contract staff have reached the lane maximum step. Most school districts in the biennial HRMS survey had composite scales with 25 steps.

Necessary resources for implementation (including FTE's)*: Use existing resources to continue reaching out to deaf and hard of hearing in the State of North Dakota.

252 School for the Deaf

Agency 252

Are resources being redirected or are they new or additional (including FTE's)*: Continuation of existing services is key here.

Who is served and impact of not funding*: Replacement and potential loss of key staff are critical mission enabling factors.

Inflationary Increases by Operating Expense Line (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	120,171	-	120,171	0.00	-	90,085	90,085	0.00
Special	-	-	-	0.00	-	30,086	30,086	0.00
Total	120,171	-	120,171	0.00	-	120,171	120,171	0.00

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDSD as an agency is requesting funding consideration by operating expenditure line to offset anticipated inflation or budget proposals provided by OMB, other state agencies, or others.

An aggregate increase of approximately 7% of total operating expenses or \$ 120,171 is included in a decision package.

More recent history and the effects of Covid -19 on operations overall tend to delay expenditure that are just returning to a new normal. The end of the last biennium and the first year of this biennium may be a questionable base period for expenditure projections.

Travel, energy, and food costs are examples of current biennium first year costs that appear low when compared to the budget forecast. However we believe that requests for an inflationary increase to the budget value is warranted due to abnormal market circumstances.

Necessary resources for implementation (including FTE's)*:

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*:

252 School for the Deaf

Request for Signing Para Position (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	230,588	-	230,588	1.50	121,807	-	121,807	0.75
Special	-	-	-	0.00	-	-	-	0.00
Total	230,588	-	230,588	1.50	121,807	-	121,807	0.75

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As part of NDSO ongoing strategy evolution we implemented a new model school focus to bring 3 year old preschool age students to campus. This program modification began on a part time basis (several days a week) for 3-4 students. The response by students and approval of recognized progress by parents has been encouraging. initially transportation drivers were required to make additional trips per week. Staffing requirement for this age of student and the specialized para training was initially addressed with temporary salary with payment of health benefits.

Necessary resources for implementation (including FTE's)*: Since we anticipate that the number of students will double to 8 or more and that the time on campus will transition from part time to full time the need for two signing .75 fte positions are warranted.

In some cases time required per student is close to one on one with the teacher, interpreter, and or signing para position.

Are resources being redirected or are they new or additional (including FTE's)*: The requested increase is part of the overall resource dedicated to a focus language development for preschool at the NDSO campus. Redirection of existing resource is clearly a portion the model school history since the concept was implemented.

Who is served and impact of not funding*: Common to education is that it is for the student , family, and the community.

Classified Staff Market Equity Wage Increase (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	301,000	-	301,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	301,000	-	301,000	0.00	-	-	-	0.00

State Initiative:* Transforming Education

252 School for the Deaf

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDSO entry level staff (custodial, kitchen, transportation drivers, and most dormitory positions) are not competitive with starting entry level wages that continue to emerge in the local market place.

Specialty positions such as interpreters which we believe are placed on the classified wage scale below market value may need further consideration.

26% of classified employees with five years or more of experience are less than 10% above the minimum of the State of ND classified wage scale. When applying our internal scale by position (DPI shadow scale) 37% of classified employees fall into this range.

New hires with less than 2 years of experience are currently 8% to 16% above the scale minimum.

A long term trend has been the lack of equity to move staff wages upward as the classified scale base increases each year, typically by an amount approximating the legislative increase. As new hires recruited at more competitive market wages are hired at wages close to what may be long term staff, wage equity disparity becomes more prevalent.

Necessary resources for implementation (including FTE's)*: Funding for and reasonable discretion to raise wages of existing staff and to provide additional assurance that there is opportunity to be competitive with the prevailing market with new hires.

The projected cost increase as a percentage of 07/01/2022 classified salary wages for the 2023-2025 biennium follow.

3% : \$ 129,000 5% : \$ 215,000 7%: \$ 301,000 7% would be desirable other increases would be meaningful.

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*:

Justification: Equipment items that exceed \$ 5,000 each typically need replacement on short notice when repair cannot be initiated. Kitchen, grounds maintenance, and audiology are campus areas with equipment that fall into this category. The probability of replacement in 2023-2025 is anticipated in the kitchen and audiology department.

Special Funds Agency Summary
School For The Deaf Fund

	2021-23	2023-25
Beginning Fund Balance	3,553,972	2,635,552
Revenues and Net Transfers	2,537,584	2,725,984
Total Financing	6,091,556	5,361,536
Estimated Expenditures	3,456,004	3,578,540
Ending Fund Balance	2,635,552	1,782,996

Statutory Authority

ND Constitution, Article IX, Section 12; NDCC Chapter 25-06.

Agency Description

North Dakota Vision Services/School for the Blind (NDVS/SB) is a statewide comprehensive resource that works cooperatively with related agencies in providing a full range of services to persons of all ages who are blind or visually impaired, including those with additional disabilities. Services include evaluation, consultation, and instruction in the vision specific related areas (i.e. orientation and mobility, braille, daily living skills, technology, career/vocational, recreation/leisure and functional vision). Infants, preschool children, students, and adults with visual impairment are all eligible for consultative service and direct instruction through regional outreach as well as at our facility in Grand Forks. Services provided via the Vision Resource Center include adaptive materials and equipment, braille productions, the vision services "store," descriptive videos, and the professional and consumer library. Additional services include support to parents and families, summer camp and in-service training.

Agency Mission Statement

We are educators and advocates partnering with related agencies to provide individualized services and resources to infants, children and adults with visual impairment to empower them in achieving their goals.

Major Accomplishments

-
- 1 Successful recruitment of qualified staff to fill all positions allowing NDVS/SB to fulfill our broad mission.
-
- 2 Successful delivery of services to students and adults throughout the Covid pandemic resulting in new and innovative service delivery methods.
-
- 3 Greater public awareness across the state through the use of both social media, direct communication with eye care professionals and periodic information about services placed in a major statewide publication.
-

Critical Issues

-
- 1 Recruitment of highly qualified teachers/instructors for people with visual impairment continues to be a significant concern as a percentage of staff near retirement.
-
- 2 The ability to provide the wide range of intensive services equitably across the state (especially services for school-age and infants) is increasingly limited during a time of population growth.
-
- 3 Maintenance of a state-of-the art training facility is an ongoing effort.
-

Performance Measures

- 1. Student performance in the areas of Expanded Core Curriculum are measured on going to demonstrate progress in life skills and skills to support academic performance.
- 2. Adults participating in instruction are continually assessed in several categories to demonstrate skill acquisition. In addition phone interviews are conducted to receive feedback on outcomes and level of satisfaction.

3. NDVS/SB staff participation is a statewide Gallup survey yielded very high job satisfaction which does correlate to positive outcomes for students and clients.

Explanation of Program Costs

North Dakota Vision Services/School for the Blind maintains a building in Grand Forks. The building is adjacent to the University of North Dakota on 10 acres of land and 50,000 square feet of building. Instruction is provided at NDVS/SB, in public schools, in homes and in other community based environments. There are 5 Outreach offices located in the communities of Fargo, Bismarck, Dickinson, Minot and Jamestown. There are a total of 27.75 FTE's. 20.75 FTE's are located in Grand Forks and the remaining 7 are located in regional communities.

Major program costs include: Salaries to instruct students and adult learners including the support staff costs associated with this instruction, building maintenance, data processing, etc. Travel expenses to conduct outreach based service is a significant part of the overall budget. Information technology costs, professional development and materials, educational supplies and other office related equipment are other areas. Rental of three regional office space is also a cost associated with providing statewide services in an equitable manner.

Program Goals and Objectives

1. Maintain and support all FTEs with the best possible work environment to ensure our mission is fulfilled.
2. Reach and maintain a consumer (parents, students, adult clients and partner agencies) satisfaction rating of 95% or greater through the use of various measures.
3. Increase the number of total adults served by 15% compared to the number served in the 2019-2021 biennium.
4. Seek and be granted accreditation through the AER Accreditation Council by the end of the 2021-2023 biennium.

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request includes: 4,000 for programming purposes for our family weekend. We have good participation in this program and want to be able to continue to provide quality education to families about their family member’s vision loss. 40,000 for anticipated utility increases. We get our heat/electricity and recently imposed a 19,000 increase for utility overage. 11,500 for outreach services to travel to a student/adult school or home. We recently began hiring to chemical spray our property for weeds. It has become overgrown with weeds and want to be able to get it under control.

Necessary resources for implementation (including FTE’s)*:

Are resources being redirected or are they new or additional (including FTE’s)*:

253 School for the Blind

Agency 253

Who is served and impact of not funding*: Due to inflationary increases, these cost are anticipated for the 2023-25 Biennium.

Teacher Salary Increases (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	93,838	-	93,838	0.00	93,838	-	93,838	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Teachers are in a non classified position. The increase is based on the Composite Salary Schedule developed by HRMS for 2023-25. The increase includes wages, retirement and payroll taxes.

Necessary resources for implementation (including FTE's)*: NDVS/SB is necessary to retain qualified staff.

Are resources being redirected or are they new or additional (including FTE's)*: This does not include FTE's but salary dollars to retain staff.

Who is served and impact of not funding*: The salaries are for Teachers of the Visually Impaired. There is a shortage of teachers and we would like to be able to retain our current staff.

Request for Temp Salaries (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	30,000	-	30,000	0.00	30,000	-	30,000	0.00
Total	30,000	-	30,000	0.00	30,000	-	30,000	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

253 School for the Blind

Agency 253

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This is to request part of temporary salaries reduced in a prior biennium.

Also, we may need to hire temporary staff as we anticipate 20% of our staff will retire in the next five years. During this period of a tight labor market, this may help so our services are not disrupted as we train new staff.

Necessary resources for implementation (including FTE's)*:

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*: Typically these dollars will be used for direct service to students or adult clients.

Request Equipment under 5,000 (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	26,000	26,000	0.00	-	26,000	26,000	0.00
Total	-	26,000	26,000	0.00	-	26,000	26,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This request includes 12,000 for technology equipment, 3,600 for floor scrubber, 4,900 for a carpet cleaner, and 5,500 to replace two doors in the garage/warehouse.

Necessary resources for implementation (including FTE's)*: NDVS/SB should be leader in the state for technology and technology instruction. These items will be used for demonstration.

The current floor scrubber and carpet cleaner are over 15 years old. Many areas of our building have carpet and therefore are used frequently.

The garage doors are many years old and need replacement.

Are resources being redirected or are they new or additional (including FTE's)*: New and a one time purchase.

Who is served and impact of not funding*: The will allow us to keep current with technology. We need to maintain a clean building.

Additional IT Costs (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00

Total	10,000	-	10,000	0.00	10,000	-	10,000	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Power Platform will allow the organization to build upon a low-code solution with positive citizen outcomes through a database, Dataverse. This platform would allow our agency to analyze, manage, and report data in a actionable manner. This in turn will help executives, teachers, and staff make informed data driven decisions that save time and costs at any location within the state. Overall, information gathered from collection points within the organization, services, stats, program evaluations (ECC and Adult) would deliver insights for providing greater outcomes for citizens.

Necessary resources for implementation (including FTE's)*:

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*: Visually impaired and blind students and adults.

Total				39,192	-	-	39,192	-	39,192	-

Update Parking Lot Tar (Priority: 06)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Resurface parking lot	354	253-8300	25350	-	-	50,000	-	50,000	-	50,000
Total				-	-	\$50,000	-	\$50,000	-	\$50,000

Explanation / Justification: This includes the area north parking lot located adjacent to Sixth Avenue North and the northwest parking lot adjacent to Sixth Avenue and Stanford Road. The tar in this area is greater than 25 years old. It has been repaired but needs to be resurfaced and could be a safety hazard.

Flooring and cabinets for East Wing (Priority: 07)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Kitchen cabinets for apartments and flooring for suites.	354	253-8300	25350	-	-	45,000	-	45,000	-	45,000
Total				-	-	\$45,000	-	\$45,000	-	\$45,000

Explanation / Justification: This request includes flooring replacement for the suites in the East Wing, \$10,000 and replacement of kitchen cabinets in the apartments, \$35,000

253 School for the Blind

Agency 253

Update Front Entrance (Priority: 08)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Update exterior main entrance to building that includes installing a drain.	354	253-8300	25350	-	-	55,000	-	55,000	-	55,000
Total				-	-	\$55,000	-	\$55,000	-	\$55,000

Explanation / Justification: This request includes an update to the front entrance (door #4). Most of the cost includes a drain to to the sewer system for water that collects in this area. We are treating it as a safety issue.

Breakdown of costs:

Install drain to collect moisture to existing drain 28,000, cement 17,000 tree removal 3,000, and landscaping 7,000

Update to Student Commons area (Priority: 09)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Update to the student commons area.	354	253-8300	25350	-	-	50,000	-	50,000	-	50,000
Total				-	-	\$50,000	-	\$50,000	-	\$50,000

Explanation / Justification: This request is to update the Commons area. The objective is to make the room more functional to use as a social gathering or for student projects. It is the intent to open a wall into the study room. Move the TV into that area. This will allow to update the commons area.

Replace Electrical Panel - Corridor (Priority: 10)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
To replace an aged electrical panel.	354	253-8300	25350	-	-	10,000	-	10,000	-	10,000
Total				-	-	\$10,000	-	\$10,000	-	\$10,000

Explanation / Justification: This will replace an electrical panel in the main hallway. This panel serves the gym location.

Roof Replacement and Repairs (Priority: 11)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Roof Replacement & repairs	354	253-8300	25350	-	-	150,000	-	150,000	-	150,000
Total				-	-	\$150,000	-	\$150,000	-	\$150,000

Explanation / Justification: This request includes replacement of the roof in the corridor area between the West and South Wings - 135,000. It also includes deferred maintenance for 2023-25 - 15,000.

Gutters for the South Wing (Priority: 12)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Gutter repacement South Wing	354	253-8300	25350	-	-	50,000	-	50,000	-	50,000
Total				-	-	\$50,000	-	\$50,000	-	\$50,000

Explanation / Justification: During April, 2022, SiteLogiq and Tecta inspected the roof of all of our buildings. Due to the fact that we have been doing deferred maintenance on the roofs, only one area is in need of replacement. This is the recommendation that came out of the inspection.

Misc Repairs (Doors & A/C Units) (Priority: 13)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Replace two exterior doors and two air conditioners for the South Wing.	354	253-8300	25350	-	-	29,000	-	29,000	-	29,000
Total				-	-	\$29,000	-	\$29,000	-	\$29,000

Explanation / Justification: These repairs include:

Replacement of 2 doors - The main door for entrance to NDVS and and exterior door between the East Wing and South Wing. 19,000

Includes the replacement of two small air conditioners. 10,000.

Statutory Authority

NDCC - 15-19 - Distance Education

NDCC - 15-20.1 - Career and Technical Education

NDCC - 15-20.2 - Area Career and Technology Centers

NDCC - 15-20.4 - Postsecondary Educational Institutions

Agency Description

The Department of Career and Technical Education provides funding, technical assistance and professional development for Career and Technical Education programs across the state. CTE Staff also provide leadership for the various Career Technical Student Organizations.

NDCTE also has oversight over the Center for Distance Education. NDCDE provides virtual K12 educational opportunities to all students in North Dakota.

Agency Mission Statement

The mission of the State Board for Career and Technical Education is to work with others to provide all North Dakota citizens with the technical skills, knowledge, and attitudes necessary for successful performance in a globally competitive workplace.

The mission of the Center for Distance Education is to ensure all K12 learners regardless of location have access to educational opportunities.

Major Accomplishments

- 1 Development of Work-based Learning guidance, including the integration of Career Ready Practices, in collaboration with business and industry. This also includes the development of a work-based learning endorsement and training.
- 2 Visualization of CTE Data on the insights.nd.gov website, to enable more transparency.
- 3 Launch of the CTE Capital Projects grant program. Thirteen applications were approved by the State Board for Career and Technical Education.
- 4 Launch of the Work-Based Learning module within the RUPrepareND career exploration platform.
- 5 During the 2021-22 school year, at the request of local school districts, the Center for Distance Education launched k-5 online courses. Over 1,000 enrollments occurred in the first semester.
- 6 The Center for Distance Education launched a new customer course purchasing experience in the 2021-22 school year.

Critical Issues

- 1 Critical shortage of teachers, counselors and administrators.
- 2 Concerned about continued support for CTE programming, due to the rising costs of education and to need to keep equipment up to to date. Also concerned about the delay in the access of the federal Coronavirus Capital Projects funds.

Critical Issues

- 3 CTE Department staff are past workload capacity, due to the rapid growth of CTE programs, CTE Centers and number of new and alternate certified instructors. New and alternate certified instructors required additional support from the CTE Staff.
-

Performance Measures

CTE Secondary Concentrators

- Four- Year Graduation Rate
- Academic Proficiency in Reading Language Arts
- Academic Proficiency in Math
- Academic Proficiency in Science
- Post-Program Placement
- Non-Traditional Program Concentration
- Program Quality - WBL Participation

CTE Post-Secondary Concentrators

- Post-Program Placement
- Earned Recognized Postsecondary Credential
- Non-traditional program concentration

Center for Distance Education

- Enrollment
- Successful Course Completion

Program Statistical Data

2020-21 Data

- 597 active secondary CTE programs
- 25,604 secondary students enrolled in at least once CTE Course

270 Career and Technical Education

- 8,648 secondary CTE Concentrators
- 7,834 Post-Secondary students enrolled in a CTE course
- 4,696 Post Secondary concentrators
- 948 employers served by TrainND
- 715 Producers served by Farm Management Education
- 11,396 K-12 Enrollments through the Center for Distance Education

Explanation of Program Costs

NDCTE uses its appropriations for the following purposes:

- 1) Reimbursement of operating costs for CTE programs at Public Schools and Career and Technology Centers
- 2) Fund STEM Initiatives at our schools
- 3) Provide dollars for workforce development and training through TrainND
- 4) Reimburse operating expenses for Farm Management Education programs
- 5) Support Youth Entrepreneurship through Marketplace for Kids
- 6) Funding for the operating costs for the Center for Distance Education, including curriculum and instructional costs
- 7) Provide technical assistance and professional development to CTE Educators

Program Goals and Objectives

- 1) Expand Capacity of CTE programs through the development of new and expanding programs and quality virtual education opportunities.
- 2) Increase the number of students enrolling in CTE Programs
- 3) Continue to maintain and improve the quality of CTE programs
- 4) Develop programming to recruit and retain quality secondary and post-secondary teachers, counselors, advisors and administrators
- 5) Support post-secondary and incumbent workforce training
- 6) CDE - Provide new and improved learning experiences

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As Career and Technical Education continues to grow, the workload for CTE Staff continues to rise. Programs continue to increase in number and diversity and more alternate teachers are entering the classrooms, which requires more attention of CTE Department staff. This will provide adequate time for the Program Area Supervisors to provide more direct technical assistance to instructors, therefore ensuring quality CTE programs and improving instructor retention. The Department has been extremely frugal in its FTE count, decreasing staffing from 27.5 FTE in 2013-15 biennium to 21.5 in the 2021-23 biennium. This is as lean as the agency can be and now needs to look to expand, to ensure we continue to provide services. The Department is requesting four additional program supervisors, for our largest program areas.

Necessary resources for implementation (including FTE's)*: Funding for the salaries and benefits for four additional FTE.

270 Career and Technical Education

Agency 270

Are resources being redirected or are they new or additional (including FTE's)*: These are new resources.

Who is served and impact of not funding*: Educators and students are served by these additional FTEs. The impact of not funding is the risk of lower quality CTE programs and the inability to properly serve the ever expanding number of CTE programs.

Additional FTEs - CDE (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	529,670	-	529,670	3.00	188,042	-	188,042	1.00
Special	-	-	-	0.00	-	-	-	0.00
Total	529,670	-	529,670	3.00	188,042	-	188,042	1.00

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Due to the continuing high number of enrollments, CDE continues to employ a large number of part-time temporary instructors. Since we have seen a consistent number of high enrollments in specific academic areas, CDE is requesting an additional three instructional staff. Employing additional full-time instructors would decrease the need for part-time temporary instructors, which would result in a lower overall cost.

Necessary resources for implementation (including FTE's)*: Necessary resource would be funding for salaries and benefits for three additional instructors.

Are resources being redirected or are they new or additional (including FTE's)*: The three FTE are new resources.

Who is served and impact of not funding*: The schools and students of North Dakota are served. Without this funding, CDE will need to continue to employ part-time temporary instructors, who are getting harder to secure and in total, can be more costly. Without a sufficient number of teachers, CDE will not be able to continue to accommodate enrollment numbers.

Increased Fees for RUReady (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	500,000	-	500,000	0.00	500,000	-	500,000	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Additional fees incurred to add a Work-Based module to RUReady, Work-Based Learning is the state's new measure selected to meet the target requirements in the Consolidated Annual Report (CAR) submitted to DOE for Perkins V.

Necessary resources for implementation (including FTE's)*: Increase in federal Perkins funds.

Are resources being redirected or are they new or additional (including FTE's)*: Current Perkins funds and anticipated increase in funding will be used.

Who is served and impact of not funding*: Student, educators and employers will be impacted as this platform will ease in the connection of students and industry.

The impact of not granting operational spending authority will not allow the state to offer the platform to all students.

Increase Special Funds Authority - CDE (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	1,500,000	-	1,500,000	0.00	1,500,000	-	1,500,000	0.00
Total	1,500,000	-	1,500,000	0.00	1,500,000	-	1,500,000	0.00

State Initiative:* Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As enrollments for Center for Distance Education remains at high levels, it is being requested to increase Special Fund spending authority by \$1,500,000. These are funds that are collected from schools and families for the class fees/tuition. These special funds are used to pay temporary part time teachers salaries and operating costs.

270 Career and Technical Education

Agency 270

Necessary resources for implementation (including FTE's)*: The fees collected for course enrollment. As enrollments increase, the funding collected increases.

Are resources being redirected or are they new or additional (including FTE's)*: The new resources are the fees collected for each new enrollment.

Who is served and impact of not funding*: The schools and students of North Dakota are served. Without this additional spending authority, students would need to be turned away as we would not be able to collect fees or secure the appropriate staffing.

Rent Model Change (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total				-	4,000,000	-	4,000,000	-	4,000,000	-

State Initiative:* Transforming Education

Explanation / Justification: Cost to Continue – \$4 million

270 Career and Technical Education

Agency 270

Currently High School Career and Technical Education programs are reimbursed at our comprehensive high schools at 27% and 40% at the Area Career and Technology Centers. To account for increases in costs and maintain reimbursement rates, the Department is requesting \$4 million for cost to continue. This may be adjusted if a new reimbursement model is adopted.

Grants-Secondary-New & Expanding Programs (Priority: 02)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	270-2200	27062	-	23,000,000	-	23,000,000	-	13,000,000	-
Total				-	23,000,000	-	23,000,000	-	13,000,000	-

State Initiative:* Transforming Education

Explanation / Justification: Every year, new CTE programs are introduced and make substantial expansions. To support these programs, not at the expense to reimbursement of existing programs, the agency is requesting \$20 million. This will include provide funding for new programs at comprehensive high schools, existing and new Area Career and Technology Centers. The new Centers were funded with CTE Capital Project Grant in the 2021-23 biennium and will begin operation in the 2023-25 biennium. This funding will continue to provide for more equitable access to diverse and quality CTE programs, to more students, in more areas of the state. New programs must align with in-demand occupations, as identified by the North Dakota Workforce Development Council. The Department of Career and Technical Education would also include in this requests funds to enable the Department to fund access to a career advisor to every school district across the state. Career Advisors would support counselors, by assisting students with career exploration. Currently school counselors are beyond capacity assisting students with social and academic needs. Career Advisor's sole responsibility would be career exploration. This would fund approximately 90 career advisors across the state, both years of the biennium. \$3 million would be set aside for funding Career Advisors. This also would support legislation passed in the 2021 session, which adjusted the ratio of counselors required in our schools. Career Advisors can assist in filling that ration.

New & Expanding CTE Centers (Priority: 03)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	10715	270-2100	27064	-	-	88,276,228	-	88,276,228	-	-
Total				-	-	88,276,228	-	88,276,228	-	-

State Initiative:* Transforming Education

Explanation / Justification: During the 2021 Legislative Session, the Department of Career and Technical Education was provided \$88.3 million for the intent to fund new and expanding CTE Centers. Due to delays in receiving the funds from the US Treasury, the funds have not been distributed. The Department is requesting a continuation of these funds into the 2023-25 Legislative session.

270 Career and Technical Education

Agency 270

New CTE Centers Inflation Impact (Priority: 06)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	10715	270- 2100	27064	-	-	40,000,000	-	40,000,000	-	-
Total				-	-	40,000,000	-	40,000,000	-	-

State Initiative:* Transforming Education

Explanation / Justification: Due to the delay in receipt of the Coronavirus Capital Projects funds, grantees will be unable to deliver what was stated in the applications, due to inflationary costs. The Department is requesting \$40 million, to grant out to awarded applicants, to deliver upon their submitted and approved 2022 applications.

Workforce Training (Priority: 09)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	270- 2500	27073	-	2,000,000	-	2,000,000	-	-	-
Total				-	2,000,000	-	2,000,000	-	-	-

State Initiative:* Workforce

Explanation / Justification: Due to the continuing workforce training needs of the state, TrainND is requesting an additional \$2 million in funding. Currently, the four TrainND regions have a biennial state appropriation of \$2 million. These additional funds would be used to update equipment and training, to address to ever evolving workforce needs of the state. This would also provide funding for TrainND to have a presence in parts of the state where a gap in workforce training exists.

Grants-Secondary-Work-Based Learning Coordinators (Priority: 10)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	270- 2200	27062	-	3,000,000	-	3,000,000	-	3,000,000	-
Total				-	3,000,000	-	3,000,000	-	3,000,000	-

State Initiative:* Transforming Education

270 Career and Technical Education

Agency 270

Explanation / Justification: To continue to expand work-based learning opportunities, the Department of Career and Technical Education is requesting \$3 million to provide full funding for up to sixteen work-based learning coordinators, to be located throughout the state, primarily housed out of Area Career and Technology Centers. These positions would be the conduit between education and business, developing work-based learning opportunities as well as support the Learn Everywhere Initiative, as passed by the 67th Legislative Assembly.

CTE Centers Not Previously Approved (Priority: 11)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	10715	270- 2100	27064	-	-	20,000,000	-	20,000,000	-	-
Total				-	-	20,000,000	-	20,000,000	-	-

State Initiative:* Transforming Education

Explanation / Justification: Although thirteen different projects were funded across the state during the 2021-23 biennium, there are still gaps in the state where Area Career and Technical Education centers are not serving. This funding is to continue the initiative, started in the 2021 Legislative Session, to close the gaps on access to quality and diverse CTE programming.

Anticipated Increase in Federal Funding for Schools (Priority: 12)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	10715	270- 2100	27060	-	2,000,000	-	2,000,000	-	2,000,000	-
Total				-	2,000,000	-	2,000,000	-	2,000,000	-

State Initiative:* Transforming Education

Explanation / Justification: CTE has seen an increase in Perkins funds over the last 4 years so anticipate an increase for the 23-25 biennium.

Statutory Authority

North Dakota Century Code Titles 23.1, and 61.

Agency Description

The North Dakota Department of Environmental Quality works closely with federal, state, and local governments along with private industry and agriculture to safeguard the quality of North Dakota's air, land, and water resources through permitting, inspecting, sampling, analytical services and monitoring activities.

Agency Mission Statement

To conserve and protect the quality of North Dakota's air, land and water resources following science and the law.

Values of the North Dakota Department of Environmental Quality:

- Public servants dedicated to public health and a high-quality environment.
- Committed to using sound science and applicable law.
- Believe economic development can be compatible with the protection of public health and the environment.
- Strive to be friendly, courteous, fair and compassionate in all our interactions with the public, other agencies, organizations and our coworkers.
- Accessible and provide timely responses to the public.
- Prioritize transparency in our actions, accountability for our decisions, consideration of all concerns and clear and consistent communication.
- Focus on collaboration with stakeholders.
- Strive to enhance the economic and social well-being of our citizens.
- Promote the conservation and recycling of our limited resources.
- Strive to find the optimum solution to any challenge.

Major Accomplishments

-
- 1 Continued to maintain high compliance rates above national compliance averages for all environmental health regulatory programs while responding to the energy industry's increased needs.
-

Major Accomplishments

- 2 During the 67th Legislative Assembly, the Department of Environmental Quality (DEQ) successfully expanded the Environmental Quality Restoration Fund to be an Environmental Response State Superfund. The Environmental Response State Superfund allows the DEQ not only to respond to emergencies but to address non-emergency environmental contamination. Furthermore, the DEQ is able to fund the Environmental Response State Superfund with environmental enforcement penalties among other funding sources.
- 3 During COVID, the Department of Environmental Quality maintained federal commitments outlined in our Performance Partnership Agreement with the Environmental Protection Agency (EPA).
- 4 The Department of Environmental Quality Petroleum Tank Release Compensation Fund (PTRCF) program in cooperation with the PTRCF board adopted a risk-based classification system that will classify tanks with respect to degree of hazard, determine the risks of each classification and will charge a rate to provide for maintenance which will ensure solvency of the fund.
- 5 For the 2021-23 biennium as of August 2022, the Department of Environmental Quality has issued 35 enforcement actions with loan letters and has collected penalties totaling \$1.3 million. The penalties have been deposited into the Environmental Quality Restoration fund and will be used for Environmental Response State Superfund activities.

Critical Issues

- 1 Level or reduced state and federal funding, coupled with the increased cost of doing business, leaves less money for conserving and protecting the environment's quality.
- 2 Increased cost of technology systems and demand for Data and File Management.
- 3 Continue to respond to environmental needs in oil-impacted counties relating to water, waste, air and wastewater.
- 4 Dealing with the new federal environmental regulations and increasing EPA oversight.
- 5 Continue to evaluate permits for increasingly complex and more extensive projects in areas where the environment's natural capacity to cleanse itself is becoming limited. Construction of such facilities requires aggressive monitoring and inspection routines to ensure compliance.
- 6 Workforce development, striving to maintain technical competency of existing and future staff to address increasing regulatory challenges and requirements. Acquiring and retaining talent in a competitive market with limited compensation.

Performance Measures

- Annually strive to maintain the percentage of sources meeting all permit conditions and air quality standards at or above 99%.
- Annually strive to maintain or increase the percentage of community water systems meeting all applicable health-based drinking water standards under the Safe Water Drinking Act above 90%.
- Annually strive to maintain or increase the percentage of public water systems that meet operator certification requirements for water treatment above 85%.
- Annually strive to maintain the percentage of public water systems that meet operator certification requirements for water distribution to above 85%.
- Annually strive to maintain compliance with National Discharge Pollution Elimination System based on technical review criteria established by the US EPA permit compliance system above 90%.

- Annually strive to maintain the state's percentage of permitted facilities with a National Pollution Discharge Elimination System above 98%.

Program Statistical Data

The Department of Environmental Quality (DEQ) includes the Director's Office and six divisions: Accounting, Air Quality, the Chemistry Laboratory, Municipal Facilities, Waste Management, and Water Quality. The statistics do not represent the entire scope of activities completed by the DEQ but give a general representation of some of the activities conducted from July 1, 2021, through June 30, 2022.

See attachment labeled DEQ Program Statistical Data 2023-25 for Division and Program statistical data.

Explanation of Program Costs

Major program costs include the salaries and wages and associated operating expenses to protect the state's air, land, and water resources. In addition, a significant amount of research, assessment and plan implementation activities are accomplished through contractual agreements. The state has received delegation and primacy from the Environmental Protection Agency (EPA) for many environmental protection programs that can be delegated to the states.

The program continues to experience increased costs in all media programs. Significant areas of concern are regulation of greenhouse gases and regional haze, addressing environmental impacts of oil exploration/development/production activities and maintaining high compliance rates in all environmental programs.

Program Goals and Objectives

Goal: To preserve and improve the quality of North Dakota's environment to benefit public and environmental health and allow for the sustained use and enjoyment of the state's natural resources.

Objectives:

- To preserve and improve the air, water, and land quality in the state through monitoring, technical assistance and enforcement of state and federal environmental protection laws.
- To ensure safe public drinking water through monitoring, technical assistance and enforcement of state and federal drinking water laws.
- To promote environmental protection, restoration and stewardship programs through public education and funding of local programs.
- To provide accurate and precise laboratory results from which environmental decisions can be based.

Is this a Large IT project? No

Is this request for a new program or service? No

303 Environmental Quality

Agency 303

Request explanation and justification (include any statutory authority)*: In the 2021-23 Biennium the Chemistry Laboratory received \$1 million in general fund appropriation authority to replace the antiquated DOS based Laboratory Information Management System (LIM System). The department issued a request for information which resulted in a notice of intent for a non competitive purchase for a new LIM System. The Chemistry Laboratory determined the SampleManager system from Thermo Fisher Scientific was the system that best fit their needs.

The new SampleManager LIM System will allow the department to track analytical samples, allow analytical results to be entered, and will generate all required reports. The LIM System will also support many other aspects of the Laboratory including but not limited to quality assurance, reagents and standards inventory, and equipment maintenance and validation.

However, during the procurement process of the new LIM System, the budget amount for the ongoing maintenance and hosting was much higher than anticipated. The Chemistry Laboratory has a very tight budget which is already constrained due to inflation of laboratory supplies. This decision package will support the biennial expenses for maintenance support of the underlying system, and the managed cloud hosting. This is an ongoing annual maintenance support and hosting expense which permits the Division to operate the software.

Statutory Authority:

Per NDCC 231-04-03 Director-Power and duties, the director of the department of environmental quality shall maintain a central environmental laboratory and, if necessary, branch laboratories for the standard function of diagnostic, sanitary, and chemical examinations.

Necessary resources for implementation (including FTE's)*: The DEQ is requesting \$280,000 of General Fund authority in the 2023-25 operating line to support the biennial expenses for maintenance and support of the underlying systems, and the managed cloud hosting. This is an ongoing annual maintenance and hosting expense that permits the Division to operate the software.

Are resources being redirected or are they new or additional (including FTE's)*: The Chemistry Laboratory has a very tight budget which is already constrained due to inflation of laboratory supplies. The DEQ is requesting additional general fund operating authority to support the ongoing annual maintenance and hosting expense that permits the Division to operate the software.

Who is served and impact of not funding*: The Chemistry Division and all of its customers: other divisions of the DEQ, other state agencies, federal partners, and private citizens and businesses that submit samples all benefit from this software. Operation of a modern laboratory is essential and if not funded the laboratory would require a significant increase in staffing to track and report samples.

Office of the Director and Accounting Division (Priority: 02)

State Initiative:* Other

303 Environmental Quality

Agency 303

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Office of the Director and the Division of Accounting provide administrative services to the entire Department of Environmental Quality (DEQ) which includes 166 FTE and over \$63 million 2023-25 base budget. These services include but are not limited to a unified approach to federal policy, data quality and management, public information outreach, administrative and personnel policies. The accounting services include grants/contract review, accounts payable/receivable, and financial reporting. The Office of the Director has a small staff of seven team members and the Division of Accounting has four fiscal team members. The Office of the Director and the Division of Accounting operate with federal funds, special funds and general funds as negotiated via an indirect cost rate.

Over the next five years, the DEQ will receive over \$360 million awarded from the Infrastructure Investment and Jobs Act (IIJA). The IIJA funds along with existing budget will require additional administrative support.

Recently, EPA incorporated environmental justice requirements in delegated programs and awards. The EPA has also expanded the Quality Assurance and Quality Control (QAQC) component for all EPA-delegated programs. Due to increasingly complex federal policies and technical requirements of federal and state programs, the DEQ has identified four new positions needed to maintain primacy and effectively operate.

Necessary resources for implementation (including FTE's)*: The Department of Environmental Quality is requesting four FTE's and associated operating expenditures. In the 2021-23 Biennium, the Emergency Commission approved two FTEs, the Accountant Budget Specialist and the Civil Rights/Environmental Justice Coordinator. The DEQ is requesting the two position approved by Emergency Commission and two additional positions.

Accountant Budget Specialist III

- The DEQ has 166 FTE and a base budget over \$63 million. Agencies of similar size have 2-3

accountant budget specialists/managers.

- Assist with budget preparation, complete federal financial reports, track department

awards, assist with ACFR, and complete SEFA.

- Serve as backup for the Director of Accounting.

Civil Rights and Environmental Justice Coordinator

- The EPA has recently expanded the environmental justice component and requirement in

awards. This position would develop and oversee the DEQ Environmental Justice Plan,

ensuring the fair treatment and meaningful involvement of all citizens.

303 Environmental Quality

Agency 303

- Also, the EPA is expanding the oversight of Title VI of the Civil Rights Act in federal awards to the states. In order to receive EPA funding, the DEQ is required to have a Civil Rights Coordinator to oversee and implement Title VI compliance in all federal programs.

- This position is critical to maintaining primacy for EPA-delegated programs.

Assistant Director

- Backup the Director to ensure consistent policy and financial decisions.
- Coordinate unified policies and procedures for DEQ.
- Oversee DEQ division directors and the Director's Office day-to-day operations.

Human Resource Officer

- DEQ is classified as a "large agency" category per HRMS-HR Service tiers.
- DEQ has 166 employees predominately located on-site at the Normandy Building and the state laboratory complex.
- North Dakota agencies of similar size have 2-3 human resource staff.
- The DEQ would continue to partner with HRMS on statewide services and programs.

Are resources being redirected or are they new or additional (including FTE's)*: The DEQ is requesting four (4) new FTE's and associated operating costs. Of the four FTE's, two of the positions the Accountant Budget Specialist III and the Civil Rights/Environmental Justice Coordinator were approved in the June 2022 Emergency Commission meeting.

The four positions are vital to retain primacy of the EPA delegated programs and to maintain day to day functions of the DEQ. The positions will be funded by the indirect cost pool which is negotiated annually with EPA

Who is served and impact of not funding*: If not funded, the DEQ could risk primacy of delegated EPA programs which would directly impact the industry that we permit and regulate and indirectly impact North Dakota citizens. The DEQ is required to meet administrative requirements of federal programs including all financial reporting requirements, Quality Assurance and Quality Control conditions, and Environmental Justice initiatives.

Also, in order to retain primacy, the DEQ needs to have strong continuity of leadership which an Assistant Director would provide and the DEQ needs to be able to recruit and retain qualified team members with the support of on-site Human Resource expert.

303 Environmental Quality

Agency 303

Chemistry Laboratory Inflation (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	116,800	-	116,800	0.00	-	116,800	116,800	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	116,800	-	116,800	0.00	-	116,800	116,800	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Economic inflation and increased demand have caused cost of laboratory supplies to increase significantly. Supplies that the Chemistry Laboratory depends on to operate have gone up anywhere from five to 98 percent. See attached file labeled "Chemistry Laboratory Supplies Increase", for recent analysis of essential laboratory supplies with a comparison from 2021 to 2022 per unit costs.

Necessary resources for implementation (including FTE's)*: The DEQ is requesting \$116,800 in general fund operating authority to cover the inflationary increases for laboratory supplies. This is in addition to the 2023-25 Chemistry Laboratory base budget. This request would allow the Chemistry Laboratory to keep pace with the increasing costs of operating the laboratory.

Are resources being redirected or are they new or additional (including FTE's)*: The Chemistry Laboratory operates a very tight budget. The Laboratory has redirected existing resources however, the increased cost for inflation is beyond our current budget. Therefore, we are requesting additional general fund operating authority totaling \$116,800 for the 2023-25 Biennium.

Who is served and impact of not funding*: The Chemistry Laboratory serves several state agencies, cities, counties, townships, rural water districts, private citizens, federal agencies, and tribal partners. In addition to those mentioned, the Department of Environmental Quality (DEQ) relies on the Chemistry Laboratory for testing in a majority of our water quality programs including emergency spill response. If not funded, the Chemistry Laboratory may be required to discontinue services for specific programs or certain parameters. This would be concerning as the Chemistry Laboratory supports tests run for State including sample for the Department of Agriculture, Department of Water Resources in addition to the work that is conducted for the DEQ.

Municipal Facilities IJJA SRF Funding and Lead & Copper All Federal Funds (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	23,314,992	502,350	23,817,342	6.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation

Special	-	-	-	0.00	-	-	-	0.00
Total	23,314,992	502,350	23,817,342	6.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: There are four components to this decision package and all are federally funded.

The first component is requesting additional spending authority for additional FTEs to manage a significant number of new loans for the DEQ’s Drinking Water State Revolving Loan Fund Program and the Clean Water State Revolving Loan Fund Program (SRFs). The SRFs are projected to receive \$359.5 million (\$72 million per year) through the Infrastructure Investment and Jobs Act (IIJA). The funding is expected to be received over the next five-years with the final project construction ending ten-years from now. The increased workload is estimated to be 55 new drinking water and/or wastewater loans per year in addition to existing workload of 25 new loans per year. Additionally, Congressional and USEPA federal requirements on these funds will make working with these funds more complicated and time consuming.

Second component is the receipt of two additional IIJA pass-through grants. These are an estimated \$50 million over 5 years (\$10 million per year) from the Emerging Contaminant for Small and Disadvantaged Communities Grant and \$2.5 million over five years (\$0.5 million per year) from the Sewer Overflow and Stormwater Municipal Grant. It is anticipated that it could take up to ten years to complete all of these infrastructure projects. These projects will be implemented by the SRFs and are pass-through grants to communities for their drinking water and wastewater systems. These IIJA grants are from the USEPA but are different and separate from the IIJA grants dedicated specifically to the SRFs.

Third component is for additional spending authority for the Drinking Water Program to implement federally mandated rule changes to the Lead and Copper Rule of the Safe Drinking Water Act (SDWA). Changes in the Lead and Copper Rule will require an increase of lead related drinking water samples to be analyzed from 1,500 samples per year to 13,000 samples per year. The changes to the Lead and Copper Rule, in addition to the extra water samples that need to be tracked, will require every service line that feeds a building in a drinking water system to be inventoried annually and that information submitted to the Drinking Water Program for review. This will require additional FTEs to implement and track.

Fourth is for additional spending authority at the Chemistry Laboratory to implement federally mandated rule changes to the Lead and Copper Rule of the Safe Drinking Water Act (SDWA). Changes in the Lead and Copper Rule will require an increase of lead related drinking water samples to be analyzed from 1,500 samples per year to 13,000 samples per year. Also, the equipment used to analyze 675 drinking water samples per year for contamination formed when chlorine reacts with natural occurring constituents in water (referred to as disinfection byproducts) is at the end of its useful life, tends to break down, and needs to be replaced.

Statutory provisions that relate to this request:

N.D.C.C. 61-28.2 authorizes CWSRF; N.D.C.C. 61-28.1 authorizes DWSRF; N.D.C.C. 23.1-01-14 authorizes Environmental Laboratory; N.D.A.C. 33.1-35 rules relating to CWSRF; N.D.A.C. 33.1-17 rules relating to Drinking Water Program

Necessary resources for implementation (including FTE's)*: The DEQ is requesting increased spending authority to hire additional staff to handle the workload required to review and award IJJA loans, and implement changes to the SDWA. Resources needed to handle the increase in workload to review and award IJJA loans and implement the changes to the SDWA include the following:

- Four additional FTEs, in addition to the existing 11 SRF staff members, will be required to handle the increased workload. It is estimated at 55 new drinking water and wastewater loans per year which equates to 238 loans open in a year. This is an increase of 153 loans open per year over the typical 85 open loans in a year. The SRFs are also instrumental in assisting the Drinking Water Program with implementing the SDWA and will be called upon to assist with implementing the changes to the Lead and Copper Rule.
- The Sewer Overflow and Stormwater Municipal Grant and the Emerging Contaminants for Small and Disadvantaged Communities Grant will be implemented by the SRFs.
- Resources needed by the Drinking Water Program to implement changes to the Lead and Copper Rule include one additional FTE and a database update. The changes to the Lead and Copper Rule, in addition to the extra water samples that need to be tracked, will require every service line that feeds a building in a system to be inventoried annually and that information submitted to the Drinking Water Program for review and electronic storage.
- Resources needed to implement changes to the Lead and Copper Rule for the Chemistry Laboratory include one additional FTE, laboratory equipment to run the additional samples, and consumables to analyze the additional samples. Laboratory equipment that analyzes drinking water for disinfection byproducts is at the end of its life and needs to be replaced.

All staff will require office equipment, computers, training and travel funding to implement these projects and changes to the SDWA.

Are resources being redirected or are they new or additional (including FTE's)*: Resources being requested are in addition to existing resources:

- The SRFs currently have 11 staff dedicated to implement the programs and we are requesting 4 additional FTEs to address the increased workload. This increased workload will include new loans, assisting the Drinking Water Program with changes to the Lead and Copper Rule, and implementation of the two separate IJJA grants (Sewer Overflow and Stormwater Municipal Grant and the Emerging Contaminants for Small and Disadvantaged Communities Grant).
- The DEQ currently has one staff member dedicated to the Lead and Copper Rule and will redirect one existing staff member to work on the Lead and Copper Rule. An additional new FTE is being requested for the Lead and Copper Rule.
- The Chemistry Laboratory currently has half of an FTE dedicated to lead sample analysis and is requesting an additional FTE for the near 10-fold increase in samples to be analyzed.

Who is served and impact of not funding*: The DEQ is committed to protecting the health of all North Dakota citizens. The funding awarded via the IJJA will provide additional funding to local communities to improve water and wastewater infrastructure. Additionally, this IJJA funding will help these communities stay in compliance with changes to the SDWA while helping the Chemistry Lab and Drinking Water Program implement these changes.

The worst-case scenario for not being able to successfully implement the IJJA funding for drinking water and wastewater projects is a delay in implementing projects in a timely manner which could result in the loss of these funds to other states. This loss of funding would make it more difficult for communities to stay in compliance with drinking water regulations, wastewater regulations, and changes to the Lead and Copper Rule. The impact of not funding the Drinking Water

303 Environmental Quality

Agency 303

Program and Chemistry Laboratory requests is the increased potential of drinking water systems not being able to maintain compliance with the changes to the Lead and Copper Rule.

Necessary resources for implementation (including FTE's)*: The DEQ is requesting increased spending authority to hire additional staff to handle the workload required to review and award IJJA loans, and implement changes to the SDWA. Resources needed to handle the increase in workload to review and award IJJA loans and implement the changes to the SDWA include the following:

- Four additional FTEs, in addition to the existing 11 SRF staff members, will be required to handle the increased workload. It is estimated at 55 new drinking water and wastewater loans per year which equates to 238 loans open in a year. This is an increase of 153 loans open per year over the typical 85 open loans in a year. The SRFs are also instrumental in assisting the Drinking Water Program with implementing the SDWA and will be called upon to assist with implementing the changes to the Lead and Copper Rule.
- The Sewer Overflow and Stormwater Municipal Grant and the Emerging Contaminants for Small and Disadvantaged Communities Grant will be implemented by the SRFs.
- Resources needed by the Drinking Water Program to implement changes to the Lead and Copper Rule include one additional FTE and a database update. The changes to the Lead and Copper Rule, in addition to the extra water samples that need to be tracked, will require every service line that feeds a building in a system to be inventoried annually and that information submitted to the Drinking Water Program for review and electronic storage.
- Resources needed to implement changes to the Lead and Copper Rule for the Chemistry Laboratory include one additional FTE, laboratory equipment to run the additional samples, and consumables to analyze the additional samples. Laboratory equipment that analyzes drinking water for disinfection byproducts is at the end of its life and needs to be replaced. This request includes all equipment being federally funded but the Chemistry FTE and consumable would be funded with special funds.

All staff will require office equipment, computers, training and travel funding to implement these projects and changes to the SDWA.

Are resources being redirected or are they new or additional (including FTE's)*: Resources being requested are in addition to existing resources:

- The SRFs currently have 11 staff dedicated to implement the programs and we are requesting 4 additional FTEs to address the increased workload. This increased workload will include new loans, assisting the Drinking Water Program with changes to the Lead and Copper Rule, and implementation of the two separate IJJA grants (Sewer Overflow and Stormwater Municipal Grant and the Emerging Contaminants for Small and Disadvantaged Communities Grant).
- The DEQ currently has one staff member dedicated to the Lead and Copper Rule and will redirect one existing staff member to work on the Lead and Copper Rule. An additional new FTE is being requested for the Lead and Copper Rule.

303 Environmental Quality

Agency 303

•The Chemistry Laboratory currently has half of an FTE dedicated to lead sample analysis and is requesting an additional FTE for the near 10-fold increase in samples to be analyzed.

Who is served and impact of not funding*: The DEQ is committed to protecting the health of all North Dakota citizens. The funding awarded via the IJA will provide additional funding to local communities to improve water and wastewater infrastructure. Additionally, this IJA funding will help these communities stay in compliance with changes to the SDWA while helping the Chemistry Lab and Drinking Water Program implement these changes.

The worst-case scenario for not being able to successfully implement the IJA funding for drinking water and wastewater projects is a delay in implementing projects in a timely manner which could result in the loss of these funds to other states. This loss of funding would make it more difficult for communities to stay in compliance with drinking water regulations, wastewater regulations, and changes to the Lead and Copper Rule. The impact of not funding the Drinking Water Program and Chemistry Laboratory requests is the increased potential of drinking water systems not being able to maintain compliance with the changes to the Lead and Copper Rule.

Litigation Pool Funding (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	500,000	500,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	500,000	500,000	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department is requesting access to the Litigation Funding Pool. The DEQ may need to pursue legal action to defend the Department’s stance on environmental regulations. The Department would seek reimbursement for litigation costs such as expert witness fees, depositions, and legal fees incurred with special assistant attorneys general appointed by the Attorney General.

Necessary resources for implementation (including FTE’s)*: The Department would seek reimbursement for litigation costs such as expert witness fees, depositions, and legal fees incurred with special assistant attorneys general appointed by the Attorney General.

Are resources being redirected or are they new or additional (including FTE’s)*: This would be additional resources for litigation costs such as expert witness fees, depositions, and legal fees incurred with special assistant attorneys general appointed by the Attorney General.

Who is served and impact of not funding*: If not funded, the state maybe subject to federal environmental regulations that conflict interest of the state. This would impact the industry we permit and regulate.

Large IT Project Summary

Priority	Form Name	2023-25 Agency Request					2023-25 Executive Recommendation

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The NDDEQ is responsible for programs to protect the air, land and water resources of the state. Under NDCC 23.1-01-03. Director - Powers and duties item 8 indicates that the director shall take any other action, including the collection and distribution of environmental quality data, necessary and appropriate for the administration of this title and chapters 61-28, 61-28.1, and 61-28, 61-28.2. To manage the environmental programs within the department, a significant component is to collect data both to verify the quality of air, surface water, ground water and drinking water, as well as to evaluate the regulated community's compliance with applicable environmental regulations. The department currently has over 36 separate custom-built environmental data systems for storing and managing data across the department. We are looking to reduce this to 10 or less in order to standardize the data system. Where possible and practical, we would prefer to use Commercial Off the Shelf (COTS) solutions that allow for electronic reporting for the regulated community and the public as well as enabling electronic access to their data. These systems will allow the automation of data collection and improve our ability to manage the data and the environmental programs we implement. Updated system will improve efficiency for staff by reducing data entry and provide better tools to manage this data and for decision making based on data to protect the air, water and land resources within the state. COTS systems tend to be continually maintained and updated which will reduce the need to build new systems every 10 years.

Necessary resources for implementation (including FTE's)*: The NDDEQ is proposing to update multiple data systems to better manage environmental data collected by several program areas within the Department. The Department is looking to use Commercial Off the Shelf (COTS) solutions where possible and practical to do so, and to build custom solutions in instances where a COTS solution is not viable. Specifically for this proposal we are looking to implement 5 updated systems. The first

two programs we would like to update using a COTS solution for our North Dakota Pollutant Discharge Elimination System (NDPDES) Program area and for our Solid Waste Program area. We propose to integrate both of these current data systems into the same data management solution used by the departments Air Quality Division for environmental data management related to regulating air quality emissions. The same environmental data management software named nVIRO from Windsor Solutions has components for NDPDES environmental data management for Wastewater discharges and for managing the regulation of solid waste entities mainly consisting of landfills across the state. The use of this one system will allow all data to be managed electronically and has an external component for regulated entities to use when submitting all reports electronically to the department. By using the same system already in use by the Air Quality Division, the regulated community can see their Air permits, their NDPDES wastewater permits and their Solid Waste permits in the same system. It provides users at regulated entities access to their compliance data, provides notices for reports that are due or actions that they need to complete based on permit conditions and allows them to submit all required reports electronically within that same tool. This will also reduce the number of systems the department has to maintain as there will be one data system used by all of these program areas. The department would propose to integrate other NDDEQ program areas into this same nVIRO system in the future.

The next data system is for tracking ambient water sample data. The initial intent is to get a system for the groundwater protection program, but to also then add the surface water monitoring data into the system. The department's groundwater protection program monitors both shallow glacial drift aquifers, mainly in the central and eastern parts of the state as well as deeper aquifers in the western part of the state. The Watershed Management Program monitors surface waters across the state. Monitoring consists of staff collecting samples at specific sites for each of these and then the field data and analytical results from the chemistry lab for these samples are compiled and analyzed to ensure the quality of all of these sources of groundwater and surface waters continues to be safe for intended uses. For both of these programs their intent would be to implement a data system that will streamline the ability to load data into the system, and that will have tools to simplify the ability to securely get this data out and analyze the data as well as make data more accessible to partners and the public in compliance with state law. The preferred solution will be one that will have tools for electronic collection of field data as well as automate the transfer of data from the Chemistry lab LIMS system into the data system. When the data is in the system it shall provide secure storage and access to the data along with tools to allow users to chart, map, parse and query the data to evaluate the quality of the aquifers and surface water sources and improve decision making related to protecting these state resource. The intent would be a solution that can also be used by both of these ambient monitoring programs within the department.

The next data system the department would propose to implement is an electronic document management system for the departments fiscal and accounting areas. The department setup its own accounting program in 2021. The system would be used to reduce the handling and storage of paper and provide efficiencies for handling all documents related grants, contracts, purchasing and human resources. It would also be designed to automate and improve the efficiency in handling documents for this business office within the department. We would intent to work with NDIT on the system that would be the most functional for our needs and conform with all NDIT standards and requirements.

Are resources being redirected or are they new or additional (including FTE's)*: The department is requesting new resources in the form of capital expenditures to implement these data systems. The current systems were developed mainly with onetime federal funding, most more than 10 years ago. The plan we are working to implement will be to primarily use COTS system that will be continually updated, provided we continue to license these systems. There are some maintenance funds that are currently within the department budget which would be redirected into these updates systems, and this ranges from 0% to 15% of the licensing cost of the proposed new systems. These funds will continue to be directed toward maintenance of the updated systems. However additional funds will be needed to sustain the licensing and maintenance costs of the proposed updated systems.

With the implementation of these systems, we would anticipate reduced workload for existing staff who are doing a lot of manual entry of the data and managing the data. The department did a cost benefit analyses in 2019 for several business processes within the department related to electronic reporting of data from regulated entities. These past cost benefit analyses estimated the time it took to recoup the cost of implementation of various electronic reporting systems was within 20 months. The systems we are proposing for this package include electronic reporting, but also include a full data management system update and are much larger in scope than the electronic reporting assessment previously done. While cost benefits for these specific systems have not been completed, it is estimated based on cost of the system and total staff time that could be saved, we would expect to see cost recovery time of less than 10 years.

303 Environmental Quality

Agency 303

Who is served and impact of not funding*: These system would serve 1) the NDDEQ program areas 2) the regulated communities for the NDPDES Waste Water program and the Solid Waste Program, 3) agency partners and the public who would be able to get access to what is legally defined as public information through these various systems (NDPDES, Solid Waste, Ambient Ground Water data and Ambient Surface Water data).

Start Date (MM/DD/YYYY): 7/1/2023

End Date (MM/DD/YYYY): 6/30/2025

Replace existing application? Yes

Upgrade existing application? Yes

Development of new application? Yes

Anticipated Benefits*: The anticipated benefits for these systems include:

- 1.) Improved interaction with the regulated community as they would be able to have access to their site information through the systems and be able to do all reporting through the system.
- 2.) Reduction of time staff are doing data entry and improved data quality as reported data is entered directly by regulated community which would allow staff to review and analyze data and improve decision making on environmental compliance.
- 3.) Reduce staff time maintaining systems by reducing the number of different data systems and using COTS solutions that are supported by vendors.
- 4.) Using the same solution for multiple programs will simplify the ability for regulated entities and the public to get access to data and submit reports. A single user interface will be used for multiple programs and will give a consistent look and feel for the public to interact with when working with the system for various permits.

Project Risk*: 1.) Each program using the system must still have well defined business rules for data entry and handling of data within the systems to ensure high quality data for environmental decision making.

2.) commercial solutions must maintain licensing and maintenance to ensure the systems continue to be updated so having licensing and maintenance budgeted to ensure there is continued ongoing use of the system.

3.) Evaluation of solutions and vendors providing these solutions to ensure there is a good fit for the department and program area they are used and also to ensure long-term availability of the product for the future.

Issue/Solution*: The preferred solution is to continue to expand the use of the nVIRO environmental regulatory software solution from Windsor Solutions to other environmental regulatory program areas starting with the NDPDES permits program. This solution is supported by a reputable vendor who specializes in environmental regulatory data systems and has over 20 years experience working with regulatory agencies in over 40 state and working with EPA.

303 Environmental Quality

The Electronic reporting system for the Drinking Water Program does not have an obvious COTS solution available so the department will be reviewing other commercial solutions that may work and will evaluate if a custom solution is the best option or possibly a solution that can be build and shared by multiple state Drinking Water Programs. The final decision will need to be made and a solution implemented in 2023 before the regulatory deadline.

The department groundwater program is evaluating COTS solutions specifically designed for ground water sample data. We would propose to use a formal procurement process to determine the most effective solution for managing groundwater data in North Dakota. This would include taking into account the tools the solution has available to load field data into the system and the tools for loading and laboratory analytical data for these samples. We would also evaluate how the system can manage this data and to make data available and accessible to partners and the public as per state law. The Department would also evaluate the solutions ability to be used by the surface water monitoring programs within the department.

State Initiative:* Other

Justification: The Chemistry Laboratory to implement federally mandated rule changes to the Lead and Copper Rule of the Safe Drinking Water Act (SDWA). Changes in the Lead and Copper Rule will require an increase of lead related drinking water samples to be analyzed from 1,500 samples per year to 13,000 samples per year.

To handle the additional sample a Flow Injection Analyzer (FIA) will be needed. The FIA is used in the determination of nutrients. One of those nutrients, ortho-phosphate, is part of lead and copper water quality parameter testing.

Inductively Coupled Plasma-Mass Spectrometer (Priority: 4)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Total					-	-	-	-	45,000	-	45,000	-	45,000

State Initiative:* Other

Justification: The Chemistry Laboratory to implement federally mandated rule changes to the Lead and Copper Rule of the Safe Drinking Water Act (SDWA). Changes in the Lead and Copper Rule will require an increase of lead related drinking water samples to be analyzed from 1,500 samples per year to 13,000 samples per year.

To handle the additional sample a Flow Injection Analyzer (FIA) will be needed. The FIA is used in the determination of nutrients. One of those nutrients, ortho-phosphate, is part of lead and copper water quality parameter testing.

Inductively Coupled Plasma-Mass Spectrometer (Priority: 5)

State Initiative:* Other

Justification: The Chemistry Laboratory to implement federally mandated rule changes to the Lead and Copper Rule of the Safe Drinking Water Act (SDWA). Changes in the Lead and Copper Rule will require an increase of lead related drinking water samples to be analyzed from 1,500 samples per year to 13,000 samples per year.

To handle the tenfold increase of samples, an Inductively Coupled Plasma-Mass Spectrometer (ICPMS) for Lead and Copper will be required.

State Initiative:* Other

Explanation / Justification: Subaward or grant funding totaling \$20 million to pass through to Small or Disadvantaged Communities to focus exclusively on addressing Emerging Contaminants in drinking water, including PFAS. Emerging contaminants such as compounds like per- and polyfluoroalkyl substances (PFAS), pharmaceuticals and personal care products, and unregulated contaminants such as manganese, perchlorate, and 1,4 dioxane. Funding will be granted to small or disadvantaged communities for scoping, planning, testing and remediating emerging contaminants in drinking and source water.

Subaward or grant funding totaling \$1 million to pass through for sewer overflow and stormwater reuse municipal projects.

Statutory Authority

North Dakota Century Code Chapters 37-15 and 37-18.1

Agency Description

The current Veterans Home, built in 2011, is located on 90 acres of land in the picturesque Sheyenne River Valley in Lisbon. The North Dakota Veterans Home stands as a tribute to North Dakota citizens who answered their country’s call to duty. Since 1893, the Veterans Home has been serving the veterans and their spouses.

Agency Mission Statement

Caring for America’s Heroes

Major Accomplishments

-
- 1 Provided a home for veterans and their spouses.

 - 2 Provided treatment in place. We were able to set up a separate COVID unit within our facility so positive residents could be quarantined without having to leave the facility.

 - 3 We were able to redesign our nurses stations and office spaces to give staff more space and privacy, while giving the residents a great area for activities.

 - 4 We installed new carpet in our skilled nursing facility.

 - 5 We were able to create several commercials focusing on recruiting residents and staff. Advertising campaign totally funded by donations.

 - 6 We were fortunate to be able to have the Department of Veterans Affairs bring in additional equipment to expand telehealth services at the Veterans Home. Once COVID restrictions are lifted these services will also be available to all veterans in the surrounding communities.

 - 7 Upgraded all light fixtures to LED.

 - 8 Facility upgraded with hand free fixtures for all entrances/doorways and restrooms.

 - 9 Upgraded camera systems for better protection in and out of the building.

Critical Issues

-
- 1 Staffing is a huge issue for us. The restrictions of being a state agency and not being able to keep up with the market is hurting us. Many of the other facilities in Lisbon or nearby have raised their wages higher than ours and are now offering benefits packages similar to ours as well as huge sign on bonuses. The local hospital and other nursing facilities in Lisbon are offering \$10,000 sign on bonuses, fully paid health insurance and higher wages. Due to huge staffing shortages at the local hospital we have heard they are offering double time and an extra \$500 per shift on weekends. Another nursing home within 20 miles of us just raised their starting C.N.A. wage to \$20.56, ours is \$16.38. After not having contract nursing for over 10 years, we have already spent over \$250,000 this biennium alone. We have residents wanting to move in but are unable to admit due to lack of staff. We currently have 11 open C.N.A. positions, most have been open for well over a year.
-

Performance Measures

We have none at this time.

Program Statistical Data

Since July 1, 2021 we have had admitted 29 residents to the skilled nursing home and 30 to basic care. We have had 35 discharges from the nursing home and 23 from basic care. We currently have a waiting list for skilled and are working on approximately 15 pending applications.

Explanation of Program Costs

Since 1893, the Veterans Home has been providing high quality care for honorably discharged veterans and their spouses. The home has 52 skilled nursing home beds and 98 basic care beds. Our program costs include bond and interest for the veterans home, operation and maintenance of the home and grounds, and costs related to providing 24 hour care for all our residents.

Program Goals and Objectives

Simply put our mission statement says it all, Caring for Americas Heroes. We are dedicated to the health and welfare of each individual resident.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We no longer use the universal worker role; these workers performed all the C.N.A., housekeeping and dietary roles. We had 6 FTE in dietary that worked mainly Monday thru Friday from 8:00 - 4:30. When we eliminated the universal worker role we gained 9 more FTEs that work 10 hour shifts seven days a week. Many of these shifts are paid a shift differential rate, resulting in more funding needed.

Necessary resources for implementation (including FTE's)*: NA

313 Veterans Home

Agency 313

Are resources being redirected or are they new or additional (including FTE's)*: No resources being redirected and no new FTE.

Who is served and impact of not funding*: We may lose staff resulting in additional overtime and incentive pay to have existing staff help cover shifts.

Increase in chemical costs (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Significant price increases in chemical costs for the laundry.

Necessary resources for implementation (including FTE's)*: NA

Are resources being redirected or are they new or additional (including FTE's)*: No

Who is served and impact of not funding*: Resident laundry may not get washed.

Increase in repairs (Priority: 03)

State Initiative:* Other

Is this a Large IT project? No

313 Veterans Home

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Our building will be over 12 years old by the 23-25 biennium. We are seeing an increase in repairs needed along with increased prices for part. This account also covers companies coming in to do repair services, which have also increase significantly.

Necessary resources for implementation (including FTE's)*: NA

Are resources being redirected or are they new or additional (including FTE's)*: No

Who is served and impact of not funding*: Upkeep needed to building in order to prevent larger breakdowns. Need building working properly in order to provide a home to the residents.

Increase in food costs (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	26,000	-	26,000	0.00	26,000	-	26,000	0.00

General	-	-	-	0.00	-	-	-	0.00
Special	-	11,950	11,950	0.00	-	11,950	11,950	0.00
Total	-	11,950	11,950	0.00	-	11,950	11,950	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Purchase of 80 bed extenders and 25 new mattresses. We are increasingly needed larger beds due to the predominately male population that we care for. Our overall goal is to have all beds the same size so we don't have to spend so much time coordinating mattresses and bedding throughout the entire building.

Necessary resources for implementation (including FTE's)*: NA

Are resources being redirected or are they new or additional (including FTE's)*: No

Who is served and impact of not funding*: Residents may not have the appropriate size bed, staff with the amount of time spent coordinating beds, mattresses and linens.

Refrigerators (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	-	4,900	4,900	0.00	-	4,900	4,900	0.00
Total	-	4,900	4,900	0.00	-	4,900	4,900	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Refrigerators to replace existing ones that are in constant need of many repairs.

313 Veterans Home

Agency 313

Necessary resources for implementation (including FTE's)*: NA

Are resources being redirected or are they new or additional (including FTE's)*: No

Who is served and impact of not funding*: Food will not be kept at appropriate temperatures. May have to rely more on shopping at the local supermarket rather than buying in bulk from the food supplies resulting in increased costs.

RN to LPN increase (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	15,000	-	15,000	0.00	15,000	-	15,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	15,000	-	15,000	0.00	15,000	-	15,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Funding to allow us to fill an open FTE with an RN rather than an LPN if we are unable to find an LPN. Majority of nurses are now obtaining their RN degrees since it does not require that much more schooling and wages are higher. There are very few LPNs anymore.

Necessary resources for implementation (including FTE's)*: NA

Are resources being redirected or are they new or additional (including FTE's)*: No

Who is served and impact of not funding*: We will not be able to fill all of our open positions which could result in us being able to admit residents, resulting in lost revenue.

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: Looking to repair and maintain the asphalt parking lots and roads on the grounds. Initially constructed in 2010-2011 during the construction of the new Veterans Home. The roads and parking lots have developed many cracks and potholes over the years. Several areas have become trip hazards and need additional work to make them safe.

Statutory Authority

NDCC 54-36-01 to 54-36-10.

Agency Description

The North Dakota Indian Affairs Commission (NDIAC) is the liaison between the Executive branch and the Tribal nations of North Dakota. Duties include coordination and mediation service with Tribal nations and the State and its agencies regarding inter-agency communication, protocol, and jurisdictional issues. Additionally, NDIAC works with Tribal governments, their people and communities to enhance capacity in working with the State.

The NDIAC also is responsible for the maintenance and publication of several documents, including but not limited to the, Statewide Directory of American Indian Resources, historical and contemporary information, and research about North Dakota's Native American citizens. These materials are available in print and for download on the agency website.

Agency Mission Statement

NDIAC shall have the power to assist and to mobilize the support of state and federal agencies in assisting Native American individuals and groups in North Dakota, especially the five Tribal councils, as they seek to develop their own goals, project plans for achieving those goals, and implement those plans. NDIAC's duties are:

- To investigate any phase of Native American affairs and to assemble and make available the facts needed by Tribal, State, and Federal agencies to work effectively together.
- To assist Tribal, State, and Federal agencies in developing programs whereby Native American citizens may achieve more adequate standards of living.
- To assist Tribal groups in developing increasingly effective institutions of self-government.
- To work for greater understanding and improved relationships between Native American and non-Native Americans.
- To seek increased participation by Native American citizens in local and state affairs.
- To confer with and coordinate officials and agencies of other governmental units and congressional committees regarding the needs and goals for each Tribal community.
- To encourage and propose agreements and accords between Federal, State, and local agencies and the several tribal governments, and, pursuant to chapter 54-40.2, to assist in monitoring and negotiating agreements and accords when asked by an affected Tribe.

Major Accomplishments

-
- 1 Reintroduced the quarterly North Dakota Indian Affairs Commission meetings as defined in NDCC 54-36.

 - 2 Held the 4th Strengthening Government to Government Partnerships and Relationships conference in 2022. This conference brought together Federal agencies, State agency staff and Tribal staff to talk about treaties, policy, and other issues the Tribal communities face. Biggest turnout to date

 - 3 Co-sponsored with the North Dakota Department of Public Instruction (DPI) a two-day North Dakota Indian Education Summit.

Major Accomplishments

- 4 Created partnerships and memorandums of agreements and understanding between Tribal entities and non-Tribal entities.
- 5 Continued building and fostering working relations between State government agencies and Tribal agencies.
- 6 Established and continued to co-chair the North Dakota Indian Education Advisory Committee in partnership with DPI, and continued to work directly with all North Dakota Tribal Colleges and North Dakota University System.
- 7 Worked with North Dakota Legislature and serve as a technical advisor to Tribal and State Relations Committee. This committee works on various challenges that the Tribes face in North Dakota.
- 8 As an active member of the ND Unified Command regarding COVID 19, ensured all ND Tribes and members had adequate resources in controlling and combating the virus.
- 9 Coordinated large scale Testing Events with ND Tribes, National Guard and local public health centers.
- 10 Worked with North Dakota Highway Patrol to establish mutual aid agreements with two Tribal Nations.

Critical Issues

- 1 Native American population growth is having an increased impact on infrastructure, oil energy development, schools and human service organizations in North Dakota.
- 2 Issues confronting State-Tribal relations are increasingly more complex. A state-embraced and formalized structure to address these increasingly complex issues is imperative to the future of North Dakota.
- 3 The NDIAC, staff, at times, is limited in its capacity to address issues beyond basic information sharing, networking and coordination functions. From an administrative leadership standpoint, the ability to provide focused and sustained support is challenging but is being performed at a much higher level than in previous years. NDIAC Executive Director, Nathan Davis, spends 85.0 percent of his time in meetings between State and Tribal committees, boards and on travel throughout North Dakota.

Performance Measures

1. Develop and implement a written public relations campaign\plan to create a greater role and clarify its responsibilities, create an awareness of the needs and issues of American Indians in North Dakota; to celebrate the accomplishments of Indian individuals, programs and projects.
2. Gather and facilitate the dissemination of data and statistics and research issues, concerns, and needs that pertain to the American Indian population in the State of North Dakota.
3. Facilitate a collaborative relationship between and among agencies and tribal communities as it relates to legislation, economic development, workforce development, judicial systems, education, and social and health needs.
4. Advocate for the design, development and implementation of Tribal initiatives that may include but not limited to water issues, economic development, gaming, education, taxes, and social and health needs workforce development.
5. Coordinate quarterly meeting between State and Tribal leadership with the option to host emergency meetings as needed to build better understanding and respect amongst governments

Program Statistical Data

No information available.

Explanation of Program Costs

The cost associated at the program level will provide for long-term articulated needs identified by the American Indian communities. The low achievement rate of American Indian children continues to lag an average of 20 points below that of the general school population of children in North Dakota schools. American Indian children still constitute the largest number of students by ethnicity in North Dakota schools and represent the largest number of English learning students. North Dakota ranks as one of the top 20 states with significant enrollments of American Indian students in the United States. American Indian students account for 10.5 percent of the total number of all K-12 students enrolled in North Dakota schools by type. Funds will be used to focus efforts to identify and offer strategies to address some of the consistent issues of student achievement, attendance, rates of graduation, efforts to work with key school\school districts on appropriate cultural pedagogy and evidence-based methodologies proven to impact the gap in achievement.

76% of the budget requested is for salary and fringe for Indian Affairs Commission staff. The remaining budget is for the operating expenses of the agency. There is an amount allocated to help fund the annual conference sponsored by the Indian Affairs Commission. Also included are funds to conduct an economic study of tribal reservations.

Program Goals and Objectives

The goals of the North Dakota Indian Affairs Commission as articulated continue to be:

- To increase the capacity of the state and state agencies to better address issues related to American Indians systemically. Increase the need for communication and cooperation toward resolution of matters of mutual concern.
- Build inter-agency support for identification/securing of personnel within agencies to serve in a liaison capacity on American Indian related issues and to network with the ND Indian Affairs Commission.
- Work to build government to government agreements between tribes and state in the areas healthcare, taxation, cyber security, and law enforcement.

Statutory Authority

North Dakota Century Code Chapters 37-14 and 37-18.

Agency Description

The North Dakota Department of Veterans Affairs (NDDVA) has the responsibility of ensuring the state's over 54,000 veterans and their dependents not only know about the state and federal benefits to which they are entitled for having served their country, but also assist them in obtaining such benefits. The department is responsible for the collection, filing, safeguarding and maintaining of North Dakota Veterans DD214 and DD215 armed forces discharge documents. The department safeguards these records in fireproof locking cabinets and in electronic form. NDDVA provides certified and true copies to the veterans or their eligible next of kin upon request at no charge.

The department is responsible for assisting counties with training of the County Veterans Service Officers (CVSOs) and their assistants who serve 53 counties, and are appointed by their respective County Commissions, as well as assisting in the training of 9 Tribal Veteran Service Officers (TVSOs) from four tribes. The department provides training through two training seminars each year to keep the CVSO/TVSOs as current as possible on issues, topics and programs available to and affecting veterans as well as providing initial and continued one-on-one training and accreditation with the CVSO/TVSOs in the NDDVA office. The department assists counties in serving veterans in the absence or vacancy of CVSO personnel.

The department accepts, develops and carries through to completion veteran and dependent claims for benefits and services from the United States Department of Veterans Affairs (VA) and acts as power of attorney in these claims and appeals; counsels veterans on employment and entrepreneurial programs and regulations, educational (high school through graduate level) programs, disability benefits, medical (both physical and mental) care, nursing home assistance, death benefits, housing, and other related veterans activities. The department is responsible for enforcing the state's veteran's preference law.

A Veterans Aid Loan Program, Transportation Program, Hardship medical & non-medical Grant Programs and Commemorative Memorial Coin programs are all administered by the department. The department is responsible for distributing information relating to veterans programs and veterans issues to the state veteran's population, interested parties and the general public through the use of email, news media, website, social media, CVSO/TVSOs, veterans organizations and US mail. The department, working under the supervision of the Administrative Committee on Veterans Affairs, also monitors legislation and assists others in acquiring information.

Agency Mission Statement

1. Assist Veterans and their families to obtain benefits for which they are entitled.
2. Ensure that Veterans of the State of North Dakota are aware of all benefits available.
3. Advocate for adequate and needed benefits for Veterans being mindful of changing needs of those Veterans.
4. Ensure adequate resources are available for Veterans and Veterans' programs.
5. Develop programs and services to meet Veterans' needs.

Major Accomplishments

- 1 Provided training and support to over 70 County Veteran Service Officers (CVSOs) and Tribal Veteran Service Officers (TVSOs).
- 2 Continued to archive DD214s into electronic data base for safe keeping and easy access.
- 3 Continued to improve veteran’s claims with over \$1 Billion in Federal Veterans Affairs benefits/expenditures coming into North Dakota
- 4 Improved Women Veteran Services.
- 5 Involved in 16 legislative changes that resulted in improvements to services and benefits.
- 6 First ever Veterans Court being established in North Dakota.
- 7 ND approved for a Fisher House at Fargo VA Campus.
- 8 Provided over 7,500 trips to medical appointments to over 1,700 veterans.
- 9 Provided over \$276,000 in medical grants to ND Veterans and Spouses.
- 10 Provided over 2,638 funeral honor coins to families of veterans.
- 11 Over 101 OJT & Apprenticeship facilities approved and \$47 Million in education benefits.

Critical Issues

- 1 Restore NDDVA 2017 staff cuts; -- Return Veterans Benefits Specialist (VBS) FTE -- Transition Part Time Temp Communication and VBS position to FTE
- 2 Staff Equity pay increase
- 3 Return the \$68,000 in General Fund dollars supplanted with Federal funds (HRTG) and fully fund Loan and Grant Position

Performance Measures

We have implemented and continue to update individual employee goals and performance measures to outline and measure the quality of service to our veterans and performance of our staff in providing these services to ensure quality service.

Program Statistical Data

During the course of the Federal Fiscal Year (FFY) 2020, in part due to the services provided and coordinated by the North Dakota Department of Veterans Affairs, the Federal Veterans Affairs benefits amounted to \$523,734,000 coming into North Dakota through benefits and programs such as pension, compensation, education, insurance, health and behavioral health services. Total Federal benefits in FFY2021 was \$543,457,000 (up \$19,723,000 from previous year). VA expenditures in North Dakota are over \$1Billion per biennium, this does not happen without the hard work of NDDVA and our partners.

North Dakota has approximately 53,000 veterans residing in the state along with their dependents.

NDDVA Veteran Service Officers:

ND DVA’s employs three Veterans Benefit Specialists and one Women Veterans Coordinator/Benefits Specialist who service the claims from the 4 Tribal Service Offices and over 60 CVSO’s and their assistants serving North Dakotas 53 Counties.

2019-2021 Biennium: NDDVA Veteran Benefits Specialists:

321 Veterans Affairs

Agency 321

Filed 3,315 new claims resulting in

-- \$35 Million in new Compensation or Pension awards

-- \$9.3 Million in retroactive (back pay) payments

-- 628 appeals filed with

-- 85% remand (wins)

(national average: 39%)

Veteran Service Officers efforts resulted in

-- \$440 Million paid to ND Veterans and Dependents in Compensation and Pension

-- \$490 Million in medical services

State Approving Agency (under NDDVA)

FFY2020 and FFY2021 accomplishments

-- 16 Compliance Surveys (Audits) on Institutes of Higher Learning (IHL)

-- 67 Catalog reviews of Non-Certificate Degree (NCD) and IHL

-- 101 Total On the Job (OJT) and Apprenticeship facilities approved in ND

-- \$47 Million in Education Benefits in North Dakota

Highly Rural Transportation (HRTG) Program:

Fourteen (14) vans are in operation with ten (10) sub-recipients designated to transport veterans to VA medical appointments. Nine (9) independent transit providers are also contracted to provide transportation services.

During the two HRTG Federal Fiscal Years September 15, 2019-September 14, 2021:

-- 16,071 hours spent transporting veterans

-- 611,235 miles traveled

-- 1,152 Veterans served

321 Veterans Affairs

Agency 321

-- 6,880 trips provided

DAV Transportation Program: The veterans (DAV) transportation system is designed to aid veterans in transportation to a Veterans Hospital. Currently, there are eight (8) vans on scheduled routes bringing veterans to the Fargo Veterans Affairs Medical Center.

For the year 2019:

-- 560 veterans were transported to the Federal VA for medical appointments

-- Volunteer drivers drove 90,475 miles providing 534 trips during 3,730 hours of volunteer driving

-- For the year 2020: COVID shut down vans for many months

-- 74 veterans were transported to the Federal VA for medical appointments

-- Volunteer drivers drove 16,869 miles providing 96 trips during 701 hours of volunteer driving

-- 1 DAV van purchased in 2020 for \$13,845

Veterans Aid Loan Program:

During the 2019-2021 biennium NDDVA processed 56 loan applications. Approving 31 new loans for \$142,000.

Hardship Grant Programs:

During 2019-2021 biennium

-- 147 PWTF grants processed and \$245,649.41 paid out.

-- 35 Impact grants processed and \$30,857.21 paid out.

Funeral Honor Coins:

2020 & 2021 totals:

-- Coins Sold: 1,627 for \$16,090

-- Replacement coins provided to Funeral Home Directors 2020 & 2021: 2,638

Funding for the veterans' aid loans comes from the Veterans Aid Fund (Fund 368) and funds for the hardship grant are obligated by the Administrative Committee from the Post War Trust Fund interest earnings held in fund 410.

Explanation of Program Costs

The cost for the Department is in salary, benefits, and operating costs for the eight full-time staff including the Commissioner of Veterans Affairs. The Department has a responsibility towards the veterans and their dependents of North Dakota to meet the duties and obligations given to it under North Dakota Century Code and as assigned by the Administrative Committee on Veterans Affairs.

The ND State Approving Agency (SAA) is also under the ND Department of Veterans Affairs. The full budget for the one SAA employee is paid by Federal funding. Administrative fees are also collected from Federal funding.

The veterans aid loans come from the revolving Veterans Aid Fund (368).

Funds for the hardship grant and transportation programs are obligated by the Administrative Committee from the Post War Trust Fund interest earnings. Available funds are held in Fund 410.

Highly Rural Transportation program is fully funded by a Federal Grant. NDDVA collects 10% of the Federal Grant Funds expended. These funds have supplanted \$100,000 in NDDVA staff salaries since 2017-2019 budget. 2021-2023 budget supplanted \$68,000.

Program Goals and Objectives

The program goal is to deliver quality customer service and manage available resources in a way that is cost effective and productive. Expand and grow programs to compete with other states in order to attract discharging veterans to North Dakota and become a more military and veteran friendly state.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The HRTG allows for up to 10% of the total Federal grant dollars expended be available for administrative costs. ND Department of Veterans Affairs (NDDVA) utilizes the maximum amount of funds for administrative and salary expenses allowed by law.

321 Veterans Affairs

Agency 321

Supplanting of state general funds by Federal Grant fund dollars greatly affects NDDVA's ability to apply for and maintain additional Federal Grants. NDDVA is requesting that the mandate of supplanting State General Funds salary expenses with Federal HRTG funds be removed, and the general fund dollars returned.

The NDDVA properly collects the allowed 10% admin fees. NDDVA properly turns back any unexpended funds at the end of each biennium to the General Fund.

History of HRTG supplanting.

2017:

- OMB removed \$100,000 in General Fund salary dollars from NDDVA 2017-2019 budget. NDDVA was instructed to supplant the state funds with Federal HRTG admin fees.
- In 2017-2019 biennium NDDVA expended \$734,104.70 and was allowed \$73,410.47 for administrative expenses. Creating a shortfall of \$26,589.53.
- NDDVA had been utilizing these funds for a part-time temporary HRTG coordinator and administrative costs as authorized by the Federal Grant Program. This action eliminated the HRTG coordinator position.

2019:

- OMB puts \$100,000 back in initial NDDVA budget recommendation
- End of 66th legislative session-funding was not included.
- Total supplanted for programs was over

2021:

- OMB had over \$128,000 in general funds supplanted by Federal HRTG
- 67th Legislative Session returned all but \$68,000 back to General Funds

Necessary resources for implementation (including FTE's)*: \$68,000. Provide General fund appropriations for the state FTE's. Excess admin fees will be returned as they have in the past.

Are resources being redirected or are they new or additional (including FTE's)*: Returning the general fund appropriation for NDDVA staff salaries.

Part-time temporary HRTG Coordinator will be restored. This position will receive training in grants and be able to apply for and maintain more Federal Grants. It is our intention that this position will be funded solely through federal funds.

Who is served and impact of not funding*: The HRTG serves some of ND's most vulnerable veterans-those that are unable to provide their own transportation to medical care.

321 Veterans Affairs

Agency 321

Supplanting of state general funds by Federal Grant fund dollars greatly affects NDDVA's ability to apply for and maintain more Federal Grants.

NDDVA recently had an opportunity to apply for an annual grant of over \$750,000 which would also allow for additional Federally Funded Part-time staff to assist in addressing the important issue of Suicides among Veterans. This mandate hinders NDDVA's ability to seek and obtain these great federally funded programs.

** Federal VA expenditures brought into North Dakota exceeds \$1 Billion each biennium. NDDVA is at the center of making that happen and increasing those dollar amounts.

Equity Funding (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	289,710	-	289,710	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	289,710	-	289,710	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Recruiting and retention of employees:

During the previous biennium ND Department of Veterans Affairs (NDDVA) experienced 30% staff turnover. All staff turn-over was attributed to their salary/compensation amounts. Civilian, County and Federal employers are paying higher compensation packages. Four of our top candidates refused employment due to the compensation package NDDVA could offer. It is unacceptable that NDDVA cannot afford to recruit the qualified staff needed to serve North Dakota's Veterans. We need to provide funding to move these employees closer to a compensation package which is more reflective of the work that they are doing and competitive with the civilian, County and Federal employment markets

In comparison to the top 3 competitors for NDDVA Veterans Benefit Specialist (VBS) positions NDDVA salary is on average 34% below. See below;

MNDVA (23%) Minnesota Department of Veterans Affairs poached one of NDDVA VBS at a starting annual salary of \$12,000 more than current salary of NDDVA VBS. That is a 23% higher wage. Source: MN DVA

VARO (36%): Federal VA Regional Office Veterans Claims examiners grade 11 and 12 step 4 is 36% higher than NDDVA. Source: VA online pay schedule

CVSO ND (44%): County Veteran Service Officers (CVSO) of the top 8 largest counties in ND are paid on average 44% more than the NDDVA VBS who train and support them. Source 2022 Mill report.

321 Veterans Affairs

Agency 321

NDDVA VBS are also below ND Salary Market Mid-Point (MMP)

ND Salary MMP (17%): NDDVA VBS Grade 105 are on average 17% below MMP of the ND Salary Ranges for 2022-2023

Necessary resources for implementation (including FTE's)*: Total General Fund Salary Base for NDDVA 2021-2023 Biennium: \$852,087

34% of Base = \$289,709.58

Are resources being redirected or are they new or additional (including FTE's)*: New additional funding.

Who is served and impact of not funding*: NDDVA and its stakeholder are responsible for service to over 53,000 North Dakota Veterans and their 69,000 dependents.

** Federal VA expenditures brought into North Dakota exceeds \$1 Billion each biennium. NDDVA is at the center of making that happen and increasing those dollar amounts.

2021-2023 North Dakota General Fund dollars appropriated to NDDVA= \$1.5 million.

Return on Investment: 667%

Public Information Officer (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	194,202	-	194,202	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	194,202	-	194,202	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDDVA is requesting the current part time Program Coordinator/Information Officer position be moved to a Full Time Equivalent (FTE) status.

- Current funding (2021-2023 biennium) is at \$70,000.

- Would require additional: \$78,222

321 Veterans Affairs

Agency 321

The current workforce climate has severely inhibited NDDVA ability to hire, train and retain staff. This part-time position has proven to be extremely difficult to fill and maintain.

- One person hired in July of 2021. Took FTE position with another organization in October 2021
- Other attempts to find candidates have been unsuccessful

*2017 budget cuts took 30% of NDDVA staff. This position was added back in 2021 as a Part-Time Temp.

Program and information sharing is important to providing the best service to our veterans and their eligible dependents. Coordinating state, federal and other benefits, services and programs available in ND as well as communicating this information in the most effective and efficient medium.

This position is important to coordinating with all stakeholders to maximize our collaborative efforts and ensure communications on social media, press releases, website, newsletters and emails are shared efficiently.

Necessary resources for implementation (including FTE's)*:

Are resources being redirected or are they new or additional (including FTE's)*: This now falls to our current Veteran Benefit Specialists and other staff, which has been unsuccessful in reaching the needs of NDDVA and its stakeholders.

Not a new position. Return to FTE status.

Who is served and impact of not funding*: • 53,608 ND Veterans (Source: VA GDX 2020)

- 69,690 Dependents of Veterans (Per US Census.gov Household of 2.3)
- 70+ County and Tribal Veteran Service Officers

Impact: has been harmful to NDDVA and stakeholder. Communication is key to serving ND Veterans and sharing the important information on benefits, services and programs available. Currently we are not reaching our Veterans and their dependents which inhibits our ability to connect them to the programs, benefits and services they are eligible for. The position will not only help these veterans but will lead to increased use of VA health care and programs which will increase the amount of Federal Dollars coming into North Dakota.

An added note: The Federal VA expended over \$523,734,000 in 2020 and over \$543,457,000 in 2021. That is over a Billion Dollars (\$1,067,191,000) in Federal funds coming into North Dakota during the last Biennium. Without VSO's this does not happen. Source: VA GDX.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDDVA requests the return of one FTE lost in the 2017 cuts.

North Dakota Department of Veterans Affairs (NDDVA) has been in need of an additional Veteran Benefits Specialist (VBS) for many years. With the loss of 3 positions during the 65th Legislative session and the increase of responsibilities and caseload the NDDVA staff have been unable to serve the ND Veterans and the ND County and Tribal Veteran Service Officers (C&TVSO) as they require.

During the 2019-2021 biennium NDDVA VBS;

- Completed 3,315 new Claims for Compensation and Pension resulting in,
 - o \$35 million in new awards
 - o \$9.5 million in retroactive payments
 - o 628 appeals filed with an 85% remand (National average: 39%)

The 3 NDDVA VBS assist, advise and mentor over 70 ND County and Tribal Veteran Service Officers.

Necessary resources for implementation (including FTE's)*: General funds and 1 FTE authorization added to budget.

Are resources being redirected or are they new or additional (including FTE's)*: This would be the return of resources removed in 2017 budget cuts.

Who is served and impact of not funding*: 53,608 ND Veterans (Source: VA GDX 2020)

69,690 Dependents of Veterans (Per US Census.gov Household of 2.3)

70+ County and Tribal Veteran Service Officers

321 Veterans Affairs

Agency 321

Impact of not funding has taken a toll on NDDVA staff. NDDVA has lost good staff after the 2017 cuts and the workload has only increased. The workload for current staff needs to be relieved.

Due to the increased workload NDDVA lost its most senior and experienced Veterans Benefits Specialist to a higher paying position with less caseload in the same field.

NDDVA believes that an additional FTE would greatly improve our ability to serve our veterans as well as increase the services and benefits received by ND Veterans.

An added note: The Federal VA expended over 1 Billion Dollars (\$1,067,191,000) of Federal funds in North Dakota during the last Biennium (Source: VA GDX). With better supported and informed stakeholders this number will continue to grow.

DAV Transportation Program (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	18,800	18,800	0.00	-	18,800	18,800	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	18,800	18,800	0.00	-	18,800	18,800	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDDVA has supported and continues to support the need for DAV transportation vans in North Dakota. While NDDVA is requesting this funding, it is important to point out that this is not funding for use in the operation of the NDDVA but is Pass-Through funding.

Current DAV Van inventory in ND is 9 vans serving the urban areas of:

- Bismarck (2 vans): Bismarck/Mandan, Jamestown, Valley City (communities between Bismarck and Fargo)
- Beach (1 van), Beach, Medora, Dickinson (communities between Beach and Fargo and Beach and SD Ft. Meade)
- Lidgerwood (1 van): Communities from Lidgerwood, Wahpeton and to Fargo
- Minot (1 van): Minot and communities along highway 2 and I29 to Fargo
- McHenry County (1 van): Communities along highway 75 to Jamestown and to Fargo

321 Veterans Affairs

Agency 321

- Pembina Count (1 van): Communities along I29 to Fargo; Grand Forks, Hillsboro

*Drivers are volunteers and drive on set days and set routes.

NDDVA's budget for vans:

- 2017-2019 included \$37,200 for the purchase of up to 2 transportation vans, no vans were purchased.
- 2019-2021 budget included: \$18,800, one (1) van was purchased at a cost to NDDVA of \$13,845.
- 2021-2023 budget includes \$18,800 for vans. 1 expected to be purchased 2023.
- It is estimated that two (2) vans will need replacement during the 2023-2025 biennium.

This funding along with funding from the DAV's Columbia Trust is used to purchase vans to transport veterans from across ND to the VAMC in Fargo. In working with the Columbia Trust NDDVA's has been able to purchase vans for \$14,000-\$21,000. When we submit applications to the Columbia Trust we also request that the trust consider North Dakota for a free van, the trust provides a few free vans nationwide each year. North Dakota received a free van in 2014 and again in 2018.

Once purchased the DAV Vans are donated to the Federal VA in Fargo. The Federal VA maintains all expenses for van to include fuel, maintenance, and licensing. Once van reaches its useful life it is returned to NDDVA for disposal. Useful life has been at 150,000 miles.

Necessary resources for implementation (including FTE's)*: NDDVA is requesting additional DAV van funding of \$18,800 be added to \$18,800 (amount in the 2021-2023 budget) for a total of \$37,600 in the 2023-2025 biennium.

Are resources being redirected or are they new or additional (including FTE's)*: No redirected resources. New or additional funding needed.

Who is served and impact of not funding*: ND veterans without personal means of transportation to VA medical care are served by this program.

Vans that have reached their useful life may be discontinued resulting in veterans losing access to their VA medical care.

Retirement Payment of Annual and Sick Leave (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	-	19,066	19,066	0.00	-	19,066	19,066	0.00

State Initiative:* Workforce

321 Veterans Affairs

Agency 321

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Employee retiring after 40+ years of service. Agency will need to pay out accumulated annual and sick leave hours as directed under HR Policy Manual.

Necessary resources for implementation (including FTE's)*: Additional general funds dollars to cover costs.

Are resources being redirected or are they new or additional (including FTE's)*: n/a

Who is served and impact of not funding*: Not funding costs would negatively impact the Agency's payroll budget. Position would need to be left vacate in order to cover the costs. This position does all the administrative work for the Department and would severely impact all areas of the Agency.

DD214 Document Scanning Project (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	-	-	-	0.00	-	78,000	78,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: DD214 paper documents need to be scanned so they are accessible electronically.

Necessary resources for implementation (including FTE's)*: Additional funding needed for scanning project.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding needed for scanning project.

Who is served and impact of not funding*: This will greatly benefit ND Veterans and their families to have their DD214s accessible electronically.

321 Veterans Affairs

Agency 321

Vietnam Veterans Books (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	60,000	60,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	60,000	60,000	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Korean War Veterans of ND received a complimentary "Korea Reborn" book paid for by the government of South Korea in appreciation to the US military service members who fought for their freedom. Distributed by ND Department of Veterans Affairs.

Gulf War Veterans of ND received a complimentary "Liberation of Kuwait" book paid for by a Kuwaiti Prince. Distributed by ND Department of Veterans Affairs.

Vietnam War Veterans have NOT received a complimentary "Vietnam 50 Years Later. A Time to Honor" book. No country has offered to pay for the books.

- 2008 national Defense Authorization Act authorized the Secretary of Defense to conduct a program to commemorate the 50th anniversary of the Vietnam War. (Public Law 110-181 SEC.598)

- Presidential Proclamation the USA Vietnam War Commemoration will be conducted over a 13-year period ending on November 11, 2025

- All 56 US States, Commonwealths, Territories & District of Columbia have signed proclamations to commemorate the 50th anniversary of the Vietnam War.

North Dakota can order a special "North Dakota" edition with a few extra pages from ND dignitaries. Minimum order is 20,000 books at about \$13.00 a book. \$260,000.

The publisher can print a generic version of the book with a minimum order of 20,000 for about \$12 per book.

ND has 15,000 Vietnam Veterans (estimated) \$180,000. NDDVA would like to be able to purchase at least 5,000 books (\$60,000). Books to be distributed by the NDDVA before the end of the Vietnam War Commemoration.

NDDVA will partner with other states who have not had the resources to purchase the minimum number of 20,000 books in an effort to collectively reach the minimum order for printing.

321 Veterans Affairs

Agency 321

Necessary resources for implementation (including FTE's)*: NDDVA would request \$60,000 for the purchase of a minimum of 5,000 "Vietnam 50 Years Later. A Time to Honor" books to distribute to ND Vietnam Veterans or their surviving family members.

Are resources being redirected or are they new or additional (including FTE's)*: These are new resources.

NDDVA will solicit and expend funds from private resources in effort to raise additional funds for books.

Who is served and impact of not funding*: This will serve North Dakota's remaining 15,000 Vietnam Veterans and/or their surviving family members. Impact of not funding will result in yet another insult to the Vietnam Veterans who were not properly supported and were disgracefully treated during and immediately following their service.

Agency Description

Health and Human Services (HHS) provides more than 100 programs and services that help North Dakotans of all ages enhance their well-being and quality of life by supporting equitable access to the social determinants of health, which include economic stability, housing, education, food, community and behavioral and physical health.

The combined agency employs about 2,400 full-time team members who serve North Dakotans at locations across the state that include the ND State Hospital, the Life Skills and Transition Center, Human Service Centers, the ND State Laboratory, the ND State Capitol and from remote work locations.

Provider and partner support:

HHS delivers services and supports in collaboration with Medicaid providers and contracted human service providers and other partners. HHS also supports and provides resources to health care providers and facilities.

HHS partners with 19 human service zone offices to deliver economic assistance and child welfare programs and services across all 53 counties in the state. HHS also partners with local public health, tribal leaders and providers to deliver public health education, outreach and response.

Agency Mission Statement

As part of the integration to one Health and Human Services team on Sept. 1, 2022, we set a directional vision and guiding principle to be the healthiest state in the nation by focusing on and investing in the foundations of well-being: physical, economic and behavioral health.

We work together to make sure everyone can realize their potential by focusing on five key priorities: Strong, stable families; services closer to home; early childhood experiences; efficiency through redesign; high-performing team.

At the same time, we support every North Dakotan with strategies that help create healthy and vibrant communities, enhance and improve systems of care; strengthen population-based health interventions and promote public and health readiness and response.

We do our work in ways that give everyone the opportunity to decide to be healthy and active and to find disease early.

As a new agency, our transformational and continuous improvement goals carried forward from the integration journey include to:

Deliver one streamlined path to quality, equitable programs and services.

Continue to improve quality, effective and efficient health and human services.

Create career growth and development opportunities for team members and build a new one-team culture.

Major Accomplishments

-
- 0 Awarded a two-year \$500,000 federal grant in partnership with the Three Affiliated Tribes' Division of Child Support Enforcement to improve intergovernmental child support case management and collections.

 - 0 Expanded statewide stabilization and crisis response, support and service coordination to help individuals with developmental disabilities maintain stable living arrangements (known as "diversion").

 - 0 Implemented the Safety Framework Practice model, which redesigned in-home child and family support services and foster care services so more children could remain safely in their homes. The number of children living in foster care decreased in 2021. Launched statewide centralized intake for child abuse and neglect reporting in January 2021.

 - 0 Improved access to in-home and community-based services (HCBS) so that older adults and adults with physical disabilities who qualify for skilled nursing care can live at home if they choose. Provided HCBS services to 3,143 adults in 2021 and helped 178 individuals transition from institutions to community living. North Dakotans can easily apply for services online or by phone through the Aging and Disability Resource LINK (ADRL).

 - 0 Launched a statewide 24/7 behavioral health crisis response system that includes a centralized crisis line (211), mobile crisis response and crisis stabilization facilities (in select regions) with walk-in services. Expanded the Free Through Recovery program model into the Community Connect program, which provides community-based behavioral health services that meet the needs of individuals through care coordination, peer support and recovery services. Launched the Recovery Housing Assistance Program (RHAP) to financially assist individuals for 12 weeks of living in a recovery home. 31,232 Narcan kits were distributed to prevent opioid overdose. Implemented a Medicaid 1915(i) state plan amendment, which allows ND Medicaid to pay for additional in-home and community-based services to support individuals with behavioral health conditions. Services include care coordination, benefits planning, nonmedical transportation, respite, supported education, supported employment, housing and peer support. Transformed forensic assessments and restoration services to a telehealth platform, which reduced disruption to county jails and sheriff's departments and enhanced services to North Dakota courts.

 - 0 Launched new early childhood division focusing resources on school readiness (Best in Class program); strong, stable families and quality early childhood experiences and awarded federal grant dollars to ND child care programs to use for financial stabilization and workforce recruitment and retention.

 - 0 Redesigned the way nursing homes are paid by ND Medicaid by incentivizing providers to deliver cost-effective care and renovate, rather than build facilities. The new payment system will help contain overall expenses, making it advantageous to taxpayers too. Entered into an agreement with Blue Cross Blue Shield of North Dakota to manage the Medicaid Expansion program, that serves about 30,000 Medicaid members.

 - 0 Served the state by coordinating pandemic response efforts for education, testing, distribution of therapeutics and vaccine. Conducted over 3 million COVID-19 tests and administered 1 million COVID-19 vaccine doses. NDQuits Cessation program grantees expanded into more health care systems, counseled 26,880 individuals, provided 2,830 bridge nicotine replacement therapies NDQuits also implemented a youth-specific program, "My Life My Quit." Successfully received reaccreditation by the Public Health Accreditation Board and the statewide cancer registry was recognized by the CDC as a "Registry of Excellence." Screened 2,026 underinsured or uninsured women for breast and/or cervical cancer through the Women's Way program. The screenings resulted in 18 individuals diagnosed with breast cancer and 23 with cervical conditions that required treatment. Provided over 32,000 women, infants and children with food and support through WIC.
-

Major Accomplishments

- 0 Worked with housing partners to implement a comprehensive housing stability program for renters and homeowners. Since January 2021, 11,000 of renter households received emergency rent or utility assistance from ND Rent Help, and 1,966 unique housing providers and utility providers received direct payments. Total assistance disbursed through Sept. 8, 2022, was \$59.6 million. (Source: Dashboard) Provided increased SNAP benefit to households as per COVID enhancements; during 2021 approximately 17,800 ND households benefited each month.

Critical Issues

- 0 • Better support of the delivery of food and nutrition services to older adults across ND and re-imagining a more impactful utilization of TANF resources.
- 0 • Continue to invest in emergency preparedness & response technology to support data collection and information sharing, strengthen the medical cache including expanding ambulance services, and enhanced communication systems (public radio) and staff training. • Domestic violence prevention and treatment. • Need for updating the State lab to ensure state-of-the-art readiness, response and service to North Dakotans for the next 50 years.
- 0 • Fluctuations in demand and utilization due to rolling re-determination of eligibility for Medicaid (unwinding of public health emergency provisions).
- 0 • Need for continued behavioral health support for Free Through Recovery, Community Connect, mobile crisis services, suicide hotline / 988, peer support and school support. • Need for a modern, efficient, therapeutic environment at the North Dakota State Hospital.
- 0 • Need to continue to expand access to in-home and community-based services (HCBS) and support for older adults and adults with physical disabilities. • Need to attract, retain and train an adequate HCBS qualified service providers and direct support professional workforce. • Serving the needs of vulnerable adults across ND.
- 0 • Need to continue to shift resources to prevention of child abuse and neglect through in-home services to support children and their families while ensuring adequate child welfare resources and capacity to support child safety and well-being, including timely assessments and face-to-face contacts with at-risk children.
- 0 • Pressures on rates as cost to deliver services is affected by inflation.
- 0 • Remove child care as a workforce barrier by strengthening child care availability, affordability and quality for working families.
- 0 • Workforce shortages impacting HHS, our partners and providers ability to hire qualified staff for key roles including behavioral health clinicians, child safety and protection case managers, direct support caregivers, nurses, etc.

Performance Measures

This is a high-level sampling of performance measures from the 100+ programs HHS administers.

Aging and Adult Services

- Inform all Medicaid members residing in long-term care facilities about their care choice options
- Support individuals with disabilities who participate in Medicaid-funded services to transition from institutional settings to community living if they choose

Developmental Disabilities

- Stabilize living situations for individuals who receive DD services.

325 Health and Human Services

Agency 325

- Increase access to crisis supports, particularly those involving behavioral health and intense behaviors.

Behavioral Health

- Increase positive behavioral health among individuals, families, communities, and businesses
- Increase number of communities implementing substance misuse and suicide prevention strategies
- Decrease underage drinking and adult binge drinking
- Decrease opioid overdose deaths
- Increase number of new community-based providers
- Increase number of certified peer support specialists billing for services
- Individuals struggling with behavioral health conditions achieve independence and live a self-directed life in recovery.

Child Support

- Confine growth in unpaid child support to less than 1% per year.

Disease Control and Forensic Pathology

- By 2025, increase the MMR vaccination rates of infants ages 19-35 months from 78.3% to 85%.
- By 2025, maintain the rate of primary and secondary syphilis among women of childbearing age (15-50) at 4.6/100,000 or less.
- By 2025, ensure hepatitis C (HCV) status conversion from negative to positive remains (current is .5%) below 1% per year among syringe service program (SSP) participants.

Early Childhood

- Increase in utilization of child care assistance program (CCAP) and the percentage of slots in licensed child care that are paid for in part with CCAP funds
- Increase in percent of child care programs actively participating in the quality improvement system (QRIS)
- Decrease in number of areas designated as child care deserts

Economic Assistance

- Achieve the processing timeliness goals specific to each program

- Increase the percentage of customers who complete applications via the online portal

Health Response and Licensure

- By 2023, increase the percentage of hospitals that are able to confirm receipt of a health alert network (HAN) message and successfully order from the state medical cache within 1 hour, at or above 85%.
- By 2023, increase the percentage of long-term care facilities that are able to confirm receipt of a HAN message and successfully order from the state medical cache within 1 hour at or above 85%.

Health Statistics & Performance

- Maintain Vital Record's turnaround time for customer requests for certified copies at 1.5 days (prior to 2020, this was approximately 3 days)
- By 2025, increase the automated reporting of conditions in the Reportable Conditions Knowledge Management System (RCKMS) from 9% to 100%.

Healthy & Safe Communities:

- Increase the percentage of babies residing in North Dakota who have confirmed newborn screening diagnosis and engaged in the long-term follow up program follow through with service referrals to 100% (Baseline: 78.5% January 2019-October 2019, Data source ND Newborn Screening (NBS) Program)
- Reduce the prevalence of Type II Diabetes to 7% (2012 American Diabetes Association (ADA) (7.7%; 2014 ADA - 8.6%; 2016 BRFSS – 8.6%; 2018 BRFSS – 9.4%)

Laboratory Services

- Maintain access to infectious disease services of public health importance and surveillance to healthcare providers and epidemiology services in ND.
- Implement new technology to meet test needs of the state for emerging infectious diseases that are currently unknown.

Medical Services

- With human service zone partners, complete Medicaid eligibility reviews and ensure qualified individuals sustain coverage after COVID-19 related continuous eligibility ends (unwinding).
- Increase the number of children covered by Medicaid who participate in Health Tracks preventive screenings.
- Streamline Medicaid provider enrollment and process provider claims in a timely manner

Refugee Services

- Support integration and decrease feelings of isolation and inferiority by increasing English proficiency and building of trust and community relationships.

Administrative and Business Services:

- Reduce internal team member turnover rate

Program Statistical Data

Aging and Adult Services

- Transitioned 81 individuals with developmental disabilities and 178 adults with physical disabilities from institutional settings in 2021
- Acted on 1,485 reports of suspected abuse/neglect/exploitation of vulnerable adults

Development Disabilities (DD)

- Worked with 4,760 Individuals to create person-centered service plans individualized to their needs and goals

Behavioral Health Division (includes policy, Human Services Centers and State Hospital)

- Provided behavioral health services to 16,939 individuals and 2,725 youth and their families through the human service centers (HSC)
- Supported 4,619 individuals with crisis services through the HSCs
- Served 3,294 people through Community Connect and 4,604 people through Free Through Recovery
- Supported 5,565 individuals through the Substance Use Disorder Voucher
- Trained over 791 people to become peer support specialists and 171 of those trained became Certified Peer Support Specialists
- Awarded behavioral health grants to 20 schools
- The Recovery Housing Assistance Program has assisted over 70 people since its inception in May 2022 to reside in recovery homes for support

Child Support

- Served 66,400 children through the collection of court ordered child support and medical support, disbursement of support, and other related activities
- Received and disbursed over \$300 million in support payments to children

Disease Control and Forensic Pathology

- As of July 14, 2022, over 1.1 million doses of COVID-19 vaccine have been administered in North Dakota. Over 400 North Dakota healthcare providers are enrolled to administer COVID-19 vaccine. 64.2% of North Dakota adults have at least one dose of COVID-19 vaccine.

- In 2021, there were 453 enteric disease cases, 30 human West Nile virus case, 37 newly reported cases of HIV/AIDS, 15 cases of active TB, 384 cases of latent TB and 38 cases of pertussis.

Early Childhood

- Maintained licenses for 1,202 early childhood programs (capacity of 38,113 children).
- Delivered COVID-relief funds to more than 800 child care providers

Economic Assistance

- Child care assistance (CCAP) to an average of 2,780 children in 1,709 families per month during the SFY 2020.
- Home heating assistance (LIHEAP) to more than 12,700 households from 10-1-19 through 5-31-20; 81% of the households served were elderly, disabled, or included children age 0-5.
- Food assistance (SNAP) to an average of 23,178 households (48,323 individuals per month) during SFY 2020.
- TANF provided cash assistance to an average of 981 families each month (including 2,387 individuals).

Health Response & Licensure

- Administer a hospital preparedness program that increases preparedness for 52 hospitals, 149 ambulance services and 81 skilled nursing facilities.
- Continue direction and support of 16 statewide response team members and adequate response activities at 28 local public health units.

Health Statistics & Performance

- Completed second year of data collection for the North Dakota Violent Death Reporting System (NVDRS) in which ND was identified as 3rd in the nation for highest quality of data.
- Register approximately 10,100 certificates of live birth, 7,100 certificates of death, 4,000 marriage records and 2,000 divorce records annually.
- Process more than 48,000 requests for over 118,000 certified copies, record searches, amendments, and verifications of vital records annually.

Healthy & Safe Communities

- In 2021, the Newborn Screening and Follow-up program screened 11,709 infants in North Dakota (this number includes infants born in bordering states who received care in North Dakota). There are 53 primary and secondary disorders included in North Dakota's newborn screening panel (including hearing and Critical Congenital Heart Disease screening).

- In 2022, the Diabetes Prevention and Control Program (DPCP), in collaboration with the Dakota Diabetes Coalition and Great Plains Quality Innovative Network (QIN), offered 14 hours of diabetes-related continuing education to health professionals. A webinar series that reviewed best practice guidelines for delivering Diabetes Self-Management Education and Support (DSMES) reached over 70 individual providers across the state.

Laboratory Services

- Processed over 1.4 million tests for COVID-19, tuberculosis, hepatitis, influenza, rabies, sexually transmitted diseases, among others.

Medical Services

- Served 121,523 Medicaid members in 2021
- Processed over 4.7 million provider claims in 2021

Refugee Services

- In 2021, 100 percent of resettled families were economically self-sufficient
- In 2021, 80% of refugees spoke English upon arrival

Explanation of Program Costs

Operating costs: Motor pool expense and rent and leases; IT support and infrastructure; administrative hearings; attorneys general assistance; mailing costs, insurances, contracted services and printing, vital records maintenance, treatment and care costs, licensing, telephone and printing costs

IT costs include many systems such as: MMIS Modernization Project and support and maintenance for the Health Enterprise Medicaid Management Information System (MMIS), the MMIS Decision Support System, the Self- Service Portal and Consolidated Eligibility System (SPACES), and the Electronic Health Records System (EHR), among others.

Internal workforce costs: Salaries and benefits; professional development

Capital expenditure infrastructure costs: Equipment repairs and replacement, building maintenance and improvement, signage and building demolition.

Grant costs: These include payments and services to individuals for programs such as Child Care Assistance Program (CCAP), Low Income Home Energy Assistance Program (LIHEAP), Supplemental Nutrition Assistance Program (SNAP), and Special Supplemental Nutrition Program for Women, Infants and Children (WIC), Temporary Assistance for Needy Families (TANF) and ND Housing Stability, medical assistance grants, Workforce incentive grants; substance use disorder (SUD) voucher, Recovery Housing, behavioral health grants, local public health unit grants, emergency response grants to partners, and other supportive services.

Funding is also dispersed to state agencies, local health departments, county social services, health facilities, schools, universities, tribal reservations, political subdivisions and non-profit agencies through grants and contracts.??

Indirect costs: Reimbursement to counties for human service zones indirect costs.

Program Goals and Objectives

A high-level summary of HHS program goals/objectives include:

Adult and Aging Services

- Expand access to in-home and community-based services for older adults, adults with physical disabilities
- Attract, retain and train an adequate qualified service provider and direct support professional workforce

Developmental Disabilities:

- Stabilize living situations for individuals who receive DD services
- Increase access to crisis supports, particularly those involving behavioral health and intense behaviors

Behavioral Health Division (includes policy, Human Service Centers and State Hospital)

- Support the full behavioral health continuum from prevention to recovery support
- Increase community-based services
- Prevent criminal justice involvement for individuals with a behavioral health condition
- Expand peer support in treatment and recovery services
- Partner with schools to increase behavioral health services and support
- Support and expand crisis services across the state
- Improve access to quality treatment and recovery services

Child Support

- Ensure support for children from legally responsible parents
- Facilitate payments to help assure children have basic needs met

Children and Family Services

- Support services to strengthen families
- Reunite children with families

- Avoid foster care placement
- Support child safety and well-being

Disease Control and Forensic Pathology Objectives:

- Reduce the risk of infectious disease
- Support communities in building resilience
- Promote community driven wellness
- Reduce risk of vaccine preventable diseases
- Ensure capacity to detect and respond to hazardous threats

Early Childhood:

- Build greater access to quality, affordable early childhood experiences so kids age 0-5 from all backgrounds and circumstances, their families, and those who support them have the opportunity to realize their potential.

Economic Assistance:

- Support access to financial assistance that helps families meet their basic needs

Health Response and Licensure:

- Maintain emergency communications and alerting systems
- Manage the State Medical Supply Cache
- Coordinate and facilitate the public health statewide response team
- Ensure statewide EMS system readiness
- Enhance quality and safety through regulation and education
- Appropriately regulate and educate workforce to enhance quality and safe care
- Promote safe and sanitary food establishments
- Reduce the risk of foodborne illness by conducting risk-based inspections in a timely manner based on a system of risk categorization

325 Health and Human Services

Agency 325

Health Stats and Performance

- Improve Access to Care in Underserved Areas
- Prevent Violence, Intentional and Unintentional Injury
- Enhance care through technology and data

Healthy & Safe Communities:

- Promote health in all polices
- Foster system level partnerships across continuums of care
- Prevent and reduce tobacco and other substance misuse
- Prevent violence, intentional and unintentional injury
- Reduce adverse health outcomes through early detection
- Promote healthy weight across the lifespan
- Prevent and reduce chronic diseases
- Increase healthy lifestyles and behaviors

Human Service Zones

- Help individuals access economic assistance programs
- Provide child welfare services and support to families who are at risk or in crisis

Laboratory Services

- Promote public health readiness and response
- Ensure capacity to detect and respond to disease outbreaks.

Life Skills and Transition Center

- Accelerate the rate of transitions and diversions with a particular focus on youth.

325 Health and Human Services

Agency 325

- Help reduce childhood trauma experienced by children with intellectual or developmental disabilities by reducing the incidence of out of home placements brought on by crisis behaviors.
- Assure a safe, secure, and quality environment at LSTC by measuring performance that indicates positive therapeutic outcomes.
- Assure quality of services by creating an environment that encourages positive interactions with people supported, guardians, family members, advocates and stakeholders.

Medical Services

- Ensure continuity of Medicaid coverage and services for members
- Expand utilization to 1915i providers and services
- Increase maternal care

Refugee Services

- Increase collaboration with community organizations, employers, schools, post-secondary education providers and community members.
- Increase the economic contributions of refugees (taxes paid and wages earned) by helping them to rejoin their career field through local trainings, apprenticeships and education opportunities that lead to financial stability and add value to our communities.

Vocational Rehabilitation

- Support the employment goals of individuals with disabilities through work readiness, job training and placement and education

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: According to North Dakota Century Code 50-06, the department is responsible for twenty-four-hour crisis services for individuals with a behavioral health crisis across the state. A robust behavioral health crisis service system must be designed to serve anyone, anywhere, and anytime with dedicated resources to address a variety of behavioral health needs. For crisis services to work effectively they must include crisis call centers for immediate access, mobile crisis units to reach individuals in an environment conducive to their needs, crisis residential units to provide observation and supervision as needed and follow up and referral services for engagement to prevent future crisis situations.

325 Health and Human Services

Agency 325

Crisis Residential/Withdrawal Management Expansion:

Crisis Residential expansion including contract for 24/7 general physician, nursing, and on-call psychiatry will align us with SAMSHA recommended best practice as well Council on Accreditation minimal standards for serving those with acute withdrawal needs. These are the additional professional services required to manage a free-standing withdrawal management center safely and effectively. This will address a gap existing between social withdrawal and medically monitored withdrawal and so reduce current burdens placed on Emergency Rooms, law enforcement, and hospitals (Lines 8,9,10, & 13).

Mobile Crisis Service (after hours, weekends, and holidays):

Due to the lack of qualified independently licensed applicants, weekend and after hour crisis service positions are being under-filled by non-licensed or non-exempt staff. This requires adding an additional staff into the crisis service after hours rotation to minimize overtime costs. Two independently licensed staff rotate coverage for all after hour, weekend, and holiday coverage provide remote consultation and telehealth support to all eight regions (Lines 7&11).

Peer Supports:

To hire full time those 16 peer support positions that were created through the COVID grant expiring in August of 2023. These positions are dedicated to crisis service support, transitioning into and from crisis residential units, and linking individuals to community services/support groups. Peer support has a humanizing effect on care, and individuals feel their challenges are better understood (Repper & Carter 2011) – (Line 14).

This decision package includes requests for FTEs and general fund to increase access to behavioral health crisis services across the state.

Necessary resources for implementation (including FTE's)*: 27 FTEs are requested and general fund for contractual professionals.

Are resources being redirected or are they new or additional (including FTE's)*: 16 FTEs are requested to convert positions from temporary to permanent status and 11 FTEs are new.

Who is served and impact of not funding*: Individuals served by this decision package are North Dakota citizens experiencing a behavioral health crisis. Without the additional staff and funding increase North Dakota citizens are at risk for multiple hospital readmissions, life in the criminal justice system, homelessness, early death, and suicide.

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: ND is actively working to transform the home and community-based services experience for Target Population Members (TPM) identified in the DOJ Settlement Agreement (SA), making sure it is streamlined, effective, culturally-informed and a viable alternative to institutional living. The overarching vision that guides the State's efforts under the Settlement Agreement is to take actions that support the ability of a TPM to make an informed choice about where they want to live and how they want to receive needed services and supports. (A TPM is defined as a person over age 21 with a physical disability who is eligible or likely to become eligible to receive Medicaid long-term services and supports and is likely to require such services for at least 90 days.)

Today, many TPMs' experience suggests that institutional settings are their only option for receiving supportive services, and that no meaningful option for services delivered in a home setting exists. The SA Implementation Plan outlines dozens of strategies that, when taken together, will effectively change systems of care in North Dakota, which will ultimately transform a TPM's ability to choose to live in an integrated community setting. This decision package includes 14 separate elements that combine to address many of the highest priority issues identified in the first two years of the SA.

HCBS Case Management

The State is required to provide timely, quality case management to all individuals who seek state/federally-funded HCBS services. The state has seen an increase in the volume of HCBS referrals, both because of work associated with the DOJ Settlement and because of changes in community context/expectations re receipt of services at home. Today there are 67 HCBS case managers working in HHS; this request adds 12 new HCBS case managers (anticipated caseload of 60/FTE (varies based on intensity of need, new referral, ongoing/termination). 3 of the 12 new case managers will focus on handling 100% of the 750+ basic care case management cases, which will further free up capacity to help assure that the state can meet customer expectations. The request also adds 2 HCBS Generalists and 4 HCBS Service Navigators. These positions together will help optimize the effectiveness of the case management group by helping manage the time consuming process of matching individuals with service providers once services have been authorized (navigator role) and by providing additional capacity to handle the LTSS options counseling requests that are coming in through the ADRL Line (generalists).

Access to HCBS

To truly assure access to the HCBS services that are necessary to help someone maintain their home in the community, the state needs to find ways to build and support a robust network of service providers that can serve people's varied needs all across ND. To do this we are requesting the establishment of 3 baseline payments to help secure coverage for emergency care needs (agency on call rate), intermittent care needs that serve an essential preventative function in the care continuum (personal care base rate) and a rate that will help individuals who receive residential rehabilitation through HCBS maintain community services when hospitalized for short periods or during a rehab stay (bed hold days). Additionally, there are many areas in ND that currently suffer from a shortage of HCBS caregivers, especially those who are willing to provide homemaker, chore, personal care and respite services (all of which are effective, low-cost interventions for diversion from institutional living). We are proposing a partnership with three Human Service Zones to hire 9 QSPs who can provide these billable services to individuals in their communities, as employees of the local HSZ.

High Priority Services

As part of the state's HCBS transformation, HHS has commissioned a rate study to help remove any barriers to increasing supply of the services people need. As part of this decision package we are requesting an increase in the rate paid for adult foster care (to incentivize 24-hour supports), the rate paid for family home care (to

incentivize and support family caregiving as an essential element of the ND system of care), and establish companionship services for people receiving care through SPED and ExSPED (social isolation is driver for poor health outcomes that can lead to nursing home placement).

System Transformation

There are several system infrastructure investments that can support the broader HCBS transformation. As part of HHS' approach to ensuring its compliance with the ADA, we have identified 41 ADA coordinators within divisions/sections/locations to help lead our efforts. This proposal injects resources to cover training costs and tools to support the work of the ADA coordinators. We are also requesting the ability to embed a dedicated communications partner with the teams leading the HCBS effort to help develop key messaging and full-channel communications plans to help drive and communicate results. HHS is requesting an FTE to coordinate administration of the DOJ SA.

The last item effectuates a change in the personal care allowance built in to our Medicaid program. Today, a person who is determined to be "medically needy" and Medicaid eligible is allowed to keep \$65 of their total income per month for personal needs not covered by Medicaid. This proposal increases the personal care allowance from \$65 to \$120 per month, to more appropriately account for personal needs an individual may have. The funding request backfills the loss of income this change would represent to the HCBS provider to help assure this change does not create instability in the care continuum.

Necessary resources for implementation (including FTE's)*: This proposal requests 20 FTE (12 from HSZ FTE pool, 4 temp converting to state FTE, and 4 new FTE) and \$16,754,380 (\$10,485,283 of which are general funds).

Case Management

HCBS Case Managers - 12 FTE; \$2,323,860 (457 Fund) (50/50 Medicaid match)

HCBS Generalists - 2 FTE; \$194,028 general fund (50/50 Medicaid match)

HCBS Service Navigators - 4 FTE (convert from temp status to state FTE); \$93,797 general funds (50/50 Medicaid match); total is balance of cost not already included in budget

Access to HCBS

Agency On-Call Rate - \$351,000 (general fund). Establishes \$1/hr on-call rate for 40-50 people with 24/7 care needs (assumes 12 on-call hours/day)

Personal Care Base Rate - \$100,000 (general fund). Assumes \$42/hr for 1st hour (increase of \$12.08 from current billable hourly rate of \$29.92) for 1,200-1,300 people who receive personal care services through SPED, ExSPED, or Medicaid State Plan

Bed Hold Rate - \$182,910 (\$86,882 general fund). Assumes \$15/bed hold day for 200 people receiving ResHab svc, for 30 days/year.

HSZ QSP - 9 FTE (from the HSZ FTE pool); Special Funds of \$161,440 will cover the portion of the cost of these positions that exceeds anticipated billable Medicaid revenue

High Priority HCBS Services

325 Health and Human Services

Agency 325

Adult Foster Care Rate - \$1,559,674 (\$779,837 general fund). Assumes rate of \$150/day (increased from \$95.94/day) for 20 individuals who require this level of care 365 days/year.

Family Home Care Rate - \$6,240,000 (general fund). Assumes rate of \$80/day (increased from \$48/day) for 300 individuals who receive services an average of 325 days/year.

Companionship Services - \$280,000 (general fund). Assumes \$26.92/hour for 60 people to receive up to 10 hours of companionship services / month.

System Transformation

ADA Coordinator support - \$55,200 (general fund)

DOJ Admin Coordinator - 1 FTE (convert position with 2-year sunset to state FTE); \$260,959 (general fund)

Communications Partner - 1 FTE; \$130,480 (general fund)

Personal Care Allowance - \$3,439,800 (\$1,913,100 general fund). Assumes \$60 in increased monthly personal care allowance for 2,400 people receiving services.

Are resources being redirected or are they new or additional (including FTE's)*: 4 of the 20 requested FTE are current temporary staff that would be converted to state FTE. HHS is estimating that approximately 63% of the total dollars requested are new general funds.

Who is served and impact of not funding*: The work that results from HCBS transformation efforts reach into the lives of people with disabilities in every corner of North Dakota, including the 20,000+ North Dakotans who reach out to the ADRL line to get help with their quest to live independently in the community and the 10,000+ North Dakotans who currently receive HCBS services and supports and informed choice services.

State Initiative*: Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Significant workforce shortages, compounded by the Covid pandemic and an increased demand for non-revenue-generating services, has significantly reduced the HSC and NDSH revenues and increased overall labor costs.

The healthcare labor market is facing unprecedented shortages across a range of specialties and services. The exodus of exhausted and depleted care workers continues. Persistent staff shortages forced healthcare entities to increase staff salaries, give large hiring bonuses, and use contract workers to fill essential positions.

HSC and NDSH, to compete with private sector healthcare, increased nursing and direct care wages, increased starting salaries for clinical and nursing staffing, and increased hiring bonuses for nursing and clinical positions. These increases improved capacity to recruit staff, however, have not kept pace with private sector increases and has worsened the already existing salary compression in the existing workforce.

Use of overtime, to fill required shifts, has also increased labor costs. Mandatory overtime, used when acute staff shortages threatens safe and quality patient care, requires steep incentive for staff and further drives exhaustion and dissatisfaction.

HSC staff vacancies are 18% system-wide, nearly doubling from the previous biennium. Average time to fill an addiction counselor or therapist position is 9 months, representing 900 lost treatment hours per person. NDSH RN vacancies averaged 42% over the last 2 years. LPN vacancies averaged 31%. These acute shortages reduce the total number of available treatment hours and open treatment beds, resulting in reduced revenue and drive the use of wait lists for patient admissions.

NDSH has seen more than a 400% increase in forensic assessment and treatment demand. Forensic patients, on average, require a longer period of hospitalization, and the total cost of care is all general funds. The HSC have experienced a 65% statewide increase in demand for crisis services and a 100% increase of services in jail settings. Services in jail settings do not generate revenue. Crisis services only generate revenue for a portion of the provided services.

The reduced NDSH revenue, and the increased labor costs, result in a \$13,895,467 request to increase the budget for salaries, overtime, and contract nurses, and switch funding from other to Medicaid and general funds. The reduced HSC revenue and the increased labor costs result in a \$48,069,298 request to increase the budget for revenue shortfall, salary underfunding, salary increases for permanent and temporary staff, and an increase in overall operating expenses.

The requested budgets are necessary to attract and retain high quality staff to perform necessary care, treatment, and services to some of the most vulnerable North Dakota citizens. Service availability and quality suffers when high quality staff aren't hired and retained to do the work.

Necessary resources for implementation (including FTE's)*: No additional FTE, additional cost only see above

Are resources being redirected or are they new or additional (including FTE's)*: No

Who is served and impact of not funding*: Significant workforce shortages, compounded by the Covid pandemic and an increased demand for non-revenue-generating services, has significantly reduced the HSC and NDSH revenues and increased overall labor costs.

Special	-	-	-	0.00	-	1,000,000	1,000,000	0.00
Total	3,298,726	1,000,000	4,298,726	52.00	1,799,794	1,000,000	2,799,794	30.50

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The COVID-19 pandemic significantly exacerbated pre-existing behavioral health conditions and has resulted in even higher levels of demand for behavioral health services. Nationally, there is more demand for behavioral health (mental health and substance use) treatment than workforce capacity to deliver services. A shortage of behavioral health professionals limits access to necessary services, particularly for residents of rural and underserved communities.

This decision package includes a comprehensive list of FTE and funding requests which will assist in hiring and retaining needed behavioral health professionals, providing linkages to services, and increase access to behavioral health services for individuals in the state.

The public behavioral health service delivery system is required by law to provide chronic disease management, regional intervention services and twenty-four-hour crisis services for individuals with behavioral health disorders. In order to meet this requirement and the increasing need for behavioral health services, this decision package includes a request for 46 FTEs to convert from temporary to permanent status. These FTEs includes positions at the regional human services centers needed to retain staff, meet required staffing/client ratios and provide needed services to individuals and their families.

The First Episode Psychosis program is a specialized, evidence-based program to treat and provide support for individuals and families who are under the age of 35. The First Episode Psychosis program includes comprehensive, early intervention treatment that includes family peer support, peer support and vocational support. To effectively implement this program, 2 FTEs are required to provide family peer support services.

Individuals, families and communities can benefit through the navigation and connection to behavioral health services. The Behavioral Health Division receives a large number of calls and emails from people who are in need of services and do not know where to go to access services. The Behavioral Health Navigator FTE request would assist with the navigation and connection to the needs of people across the continuum of care. The coordinator would maintain relationships with a wide variety of community agencies and ensure that the best resources are being used to help individuals at the least restrictive level of care and remain in their communities, when possible.

The Behavioral Health Division continues to increase access to services by creation of programs and training and technical assistance for providers. As programs and projects are rolled out, long-term maintenance and sustainability is required and as a result, decreasing capacity to continue building more accessibility, developing new projects, and providing new training and technical assistance.

The Public Health Division tobacco program has a long-term established relationship with the NDSU College of Pharmacy and has worked with program instructors to expand tobacco treatment efforts with pharmacies in North Dakota. The College of Pharmacy is currently receiving funding from the 1815 Project to address hypertension in North Dakota pharmacies. The ND Legislature approved prescriptive authority for pharmacists to prescribe all seven FDA-approved tobacco treatment medications (nicotine gum/patch/lozenge/nasal spray/inhaler, bupropion, and varenicline). This request would build off of current 1815 Project efforts to address hypertension issues through Pharmacy Services to evaluate implementation of tobacco treatment services in rural and urban community pharmacies in North Dakota.

Necessary resources for implementation (including FTE's)*: This proposal includes 52 new FTE and general fund dollars.

46 FTE conversions from temporary to permanent status:

- 44 FTE are requests to convert positions from temporary to permanent status because of service demand and staffing requirements at the regional Human Service Centers
- 2 FTE is a request to convert the position from temporary to permanent status working in the SUD Voucher system and the 1915(i) Medicaid State Plan Amendment

6 New FTEs:

- 2 FTE requests for navigation services (one specific to the 1915(i) Medicaid State Plan Amendment)
- 2 FTE requests for Family Peer Support providers as part of the First Episode Psychosis program
- 1 FTE request for an administrator within the policy division

325 Health and Human Services

Agency 325

- 1 mental health specialist

Funding Request:

- Pregnant and Parenting Women Residential program development (occupancy and operating costs)
- Tobacco Treatment Services Expansion and ND Quits Cessation Program Grants to ND Pharmacies
- Professional Recruiter contract to focus on assisting with acquiring staff for the State Hospital

Are resources being redirected or are they new or additional (including FTE's)*: 46 FTEs are requested to convert positions from temporary to permanent status; 6 FTEs are new requests

Who is served and impact of not funding*: Individuals potentially served include any North Dakotan with a behavioral health condition and their family. The impact of not funding this decision package would be continued workforce shortages and inability for the public behavioral health system to meet demand and required staffing/client ratios.

Child Health, Safety and Wellbeing (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	278,512	-	278,512	1.50	184,420	-	184,420	1.00
General	5,360,100	-	5,360,100	1.50	3,747,700	-	3,747,700	5.00
Special	-	-	-	0.00	-	-	-	0.00
Total	5,638,612	-	5,638,612	3.00	3,932,120	-	3,932,120	6.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: To help ND become the healthiest state in the nation, we have to work together to make sure everyone has the opportunity to realize their potential.

At HHS we do this by promoting policy and action that:

Prioritizes strong stable families, services closer to home, early childhood experiences, efficiency through redesign, and a high performing team

Invests in the foundations of well-being: economic health, behavioral health, and physical health

Gives everyone the opportunity to decide to be healthy, be active, and find disease early

This decision package directly supports several key investments outlined in the April 2022 HHS Strategy Review. It includes seven individual elements that together allow us to address important issues of child health, safety and wellbeing both for children who are experiencing family crisis / trauma, and for children who are just doing their best to grow up safe, stable and healthy (i.e., children not in immediate crisis).

Supporting children who are experiencing family disruption

Children's Advocacy Centers (CAC) serve as a front line resource that works in partnership with law enforcement to support children who have been victims of sexual and extreme physical abuse. They offer specialized, age-appropriate forensic interview services in the immediate aftermath of abuse and play a critical role in the state's child abuse response. CACs are operated by private organizations whose revenue is dependent on public support. This decision package requests an additional \$4,121,588 to increase HHS/State of ND support for the network of CACs to be more appropriately commensurate with the level of service they provide in support of the state's child protective services system.

Supporting Kin Caregivers as an alternative to Foster Care. Evidence is clear that maintaining and strengthening family relationships is a powerful protective factor for children. For children who are unable to live with their biological parents because their parents are struggling with substance abuse, have been incarcerated, or because the family home is otherwise not safe for them, the opportunity to live with other family (referred to as "kin") is a first choice solution. When they can be identified and are willing/able to take a displaced child into their home and their family, kin caregivers can be a tremendous stabilizing influence for the child. If that child were placed in foster care, there are federal resources available to help pay the foster family for the costs associated with raising and caring for that child. When that same child is placed with a kin caregiver, there are no comparable resources available to help offset the costs associated with meeting that child's basic needs. This proposal would utilize general funds to create a resource for kin-caregivers, allowing HHS through its Children and Family Services section, to offer a maintenance payment to unlicensed kin-caregivers similar to what would be currently available for licensed foster families.

Emergency Medical Services for Children is a HRSA-funded program available to ND families who have a child with physical health challenges that require pediatric hospital care. To solidify this work in our state, we are requesting the ability to convert the temporary staff support to a permanent FTE position (continuing to utilize federal funding to cover all related costs).

Safe Havens for Safe Parenting Time. Several privately-operated domestic violence agencies offer an essential family reunification service known as "safe havens" to thousands of North Dakota families each year. When a family has been disrupted by violence and abuse, the process of rebuilding and/or maintaining strong and healthy relationships can be very challenging. Evidence is clear that maintaining family relationships is a powerful protective factor for children and supports lifelong resilience. These safe havens offer a supervised space for establishment of safe parenting relationships. Their work is largely reliant on public resources. This proposal increases the resources available to organizations providing safe haven services by \$1,775,000 to help ensure the continued availability of this service in our state.

Helping kids realize their potential

Childhood Obesity Prevention. We know that childhood obesity rates are on the rise in ND; that childhood obesity is a determinant of a person's physical health as an adult; and that poor nutrition and physical inactivity are contributing factors to childhood obesity. This portion of the request represents a targeted investment in promoting and increasing local efforts related to healthy foods and physical activity with a focus on children and families, recognizing this as an areas of high potential impact in support of efforts to reduce childhood obesity rates in ND.

Early intervention and support. Early matters. Earlier detection of developmental delays and/or physical health needs gives children and families a change to intervene early. Having the opportunity to connect to appropriate and targeted supports, services, and treatments in a child's youngest years can pay lifelong

325 Health and Human Services

Agency 325

dividends and greatly increase that child's ability to make up for any early delays or challenges they may have experienced. This portion of the requests adds additional staff resources to the areas of HHS' work that specifically connects families of young children with early screening, diagnosis, intervention and support.

Youth Vaping and Nicotine Prevention. As children transition through adolescence to adulthood, they are development the areas of their brain that control "judgment" and decision making. Access to addictive substances is particularly harmful during this developmental phase of life. In order to continue to ensure that nicotine prevention efforts keep pace with the current context that kids are facing, we are proposing an increased investment in prevention efforts related to youth vaping.

Necessary resources for implementation (including FTE's)*: This decision package request includes 5 new FTE (including one current temporary staff role that is being converted to an FTE), and \$7,375,189 in general fund dollars. These general fund dollars will be leveraged by \$298,440 in federal funds (Medicaid match) and \$300,000 in special funds (HRSA).

Children's Advocacy Centers - \$4,121,588 (general fund)

Supporting Kin Caregivers - \$960,000 (general fund)

Emergency Medical Services for Children - 1 FTE (\$0 general fund)

Safe Havens for Safe Parenting - \$1,1775,000 (general fund)

Childhood obesity prevention - 1 FTE (\$231,830 general fund)

Early intervention and support - 3 FTE (\$286,771 general fund)

Youth vaping and nicotine prevention - \$300,000 (general fund)

Are resources being redirected or are they new or additional (including FTE's)*: With the exception of one existing federally-funded temporary staff role that is being converted to a state FTE, all of the resources outlined in this proposal are new.

Who is served and impact of not funding*: The highest risk of loss of service comes for children and families who are experiencing family-level crisis resulting from violence and/or abuse/neglect. The resources proposed as part of this decision package will stabilize and strengthen several key components of the state systems of care and support.

The highest number of children and families will be affected by the upstream/prevention-oriented elements of the decision package. We realistically expect thousands of ND children and families to be positively affected by the work proposed as part of the youth vaping, childhood obesity and early diagnosis/screening/intervention efforts. The work outlined in this proposal will not occur without additional investment.

Serving the needs of VULNERABLE ADULTS across ND (Priority: 08)

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: "Vulnerable adult" is a term that can be broadly defined as any person over the age of 18 years who may be unable to protect themselves from abuse, harm or exploitation, which may be by reason of illness, age, mental illness, disability or other types of physical or mental impairment. HHS collectively serves tens of thousands of North Dakotans who meet this definition and, has proposed in this decision package seven distinct elements that help assure we as a state are appropriately serving the needs of these men and women.

Vulnerable Adult Protective Services (VAPS). VAPS helps ensure the safety and well-being of elders and adults with disabilities who are in danger of being mistreated or neglected, are unable to take care of themselves or protect themselves from harm, and have no one to assist them. HHS is responsible for receiving and responding to reports of abuse, neglect and exploitation involving vulnerable adults. In recent years, the greatest increase in demand for VAPS has involved financial exploitation of vulnerable adults by family members. This proposal will help ensure the state has the ability to continue to support demand for VAPS by converting 2.5 existing temporary staff to state FTE.

Guardianship. When adults are incapacitated (whether by reason of dementia, mental illness, or other serious physical condition) and deemed unable to make decisions on their own behalf, a guardian is appointed to act as decision maker on their behalf. Both Aging and Adult Services and the Intellectual/Development Disabilities teams offer forms of guardianship support to individuals they serve. There is a severe shortage of people who are willing and able to serve as guardians, which can have dire consequences for the incapacitated individual.

This proposal helps bolster both of these particular elements of guardianship support. HHS is asking to increase the rate available to pay the legal fees associated with establishing a known-relationship guardianship from \$2,500 to \$3,000 per person; the request of \$70,500 would support establishment of approximately 140-150 guardianships per year for older adults or people with physical disabilities who don't have resources to pay the legal costs associated with becoming a legal guardian. The proposal also adds a resource to support the establishment of family / known-relationship guardianships for people who have intellectual and/or developmental disabilities. Today HHS only has resources to support a corporate (i.e. paid-agency-provided) guardianship for a person with I/DD. We know there are individuals who would be willing to serve as legal guardian for a person they know and care about but, do not have the financial means to pay for the costs of establishing guardianship through the court (total request of \$300,000 general fund).

Health and Safety for people residing in facilities. When older adults and people with disabilities live in residential facilities, HHS is responsible for helping to assure ongoing health and safety. We do this through licensing and ongoing quality assurance monitoring, as well as by creating avenues for residents to connect with ombudsmen and liaisons that can serve as an outlet for issues and concerns. The continuum of facilities that serve as supported housing for vulnerable adults ranges from institutional facilities like skilled nursing and intermediate care facilities, to more independent options like assisted living, basic care, and group living

arrangements known collectively in HCBS as residential habilitation (ResHab). This proposal strengthens the health and safety infrastructure and oversight of facilities that serve vulnerable adults in three different ways: licensing, quality assurance, and resident liaisons.

Licensing of Assisted Living and Basic Care facilities. Today there is very little in existing state law to establish a licensing expectation for assisted living and basic care facilities. These two residence-types provide a supported living environment for thousands of older adults and people with physical disabilities every day; the resident currently has no assurance that the facility where they are living meets basic health and safety standards as would be established and verified by a licensure process. This element of the proposal involves both a policy and budgetary element. The policy request would establish licensure standards for assisted living and basic care facilities; the budgetary request adds 4 staff to the Health Licensing and Safety team in the HHS Public Health division to verify licensure requirements at these facilities.

Quality assurance monitoring in residential facilities. There are almost 8,000 children and adults with I/DD who receive residential and supportive services through a state-funded service provider network, and another 8,000+ older adults or people with physical disabilities living in either skilled nursing, assisted living, basic care or other HCBS ResHab settings. There are processes and policies in place that require regular reporting of critical incidents that occur in several of the afore-mentioned settings; there are others setting types this expectation does not currently exist. HHS is receiving an increasing number of reports of critical incidents and concerns across a range of facility types but does not have staff resources to follow up timely or consistently. This proposal adds 4 FTE to allow HHS to provide appropriate oversight and follow up on reported incidents and overall resident health and safety concerns that occur for people who are living in one of these facilities.

LTC Ombudsman and Resident Liaisons. There is a federally-established system of support for residents of skilled nursing facilities known as the "long term care ombudsman" program. This package adds additional resources to the Ombudsman program to account for increased demand (increased incidents and requests for in-facility services); the request converts a 0.7 FTE to a state FTE and adds dollars for additional travel. The decision package also includes a proposal to add 2 FTE to HHS to serve as resident liaisons for vulnerable adults who are living in a residential supportive service setting (not already covered by LTC Ombudsman services) or who are receiving other HHS-funded HCBS services (ex. PACE). These resident liaisons will work with and on behalf of residents to resolve problems related to the health, safety, welfare and rights of individuals served, and seek remedies to protect residents.

Necessary resources for implementation (including FTE's)*: This decision package request includes 13.2 new FTE (including 3.2 are current temporary staff role that is being converted to FTE status), and \$2,135,925 in general fund dollars. These general fund dollars will be leveraged by \$856,562 in federal funds (Medicaid match).

VAPS - 2.5 FTE (convert from temp) (\$95,819 additional general fund)

Guardianship (Aging) - \$70,500 (general fund)

Guardianship (I/DD) - \$300,000 (general fund)

LTC Ombudsman - 0.7 FTE (convert from temp) (\$128,589 general funds)

Resident Safety Liaison - 2 FTE (\$213,244 general fund)

Vulnerable Adult facility licensing - 4 FTE (\$676,092 general fund)

Vulnerable Adult facility quality assurance - 2 FTE (\$440,878)

325 Health and Human Services

Agency 325

Are resources being redirected or are they new or additional (including FTE's)*: With the exception of 3.2 existing temporary staff roles that are being converted to a state FTE, all of the resources outlined in this proposal are new.

Who is served and impact of not funding*: These proposals strengthen the support available to protect all vulnerable adults in ND, and will specifically and directly affect the health, safety, wellbeing and rights of the 16,000+ youth and adults who receive services from residential and HCBS facilities and service providers.

Beh health svc FOR people who are (or are at risk of) CRIM JUST INVOLV (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative*: Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This decision package includes requests to increase access to comprehensive services for youth and adults with behavioral health conditions at risk of criminal justice involvement and their families.

The 2018 ND Behavioral Health System Study identified a recommendation to expand the outpatient and community-based service array, stating, "Ultimately, the state must work to shift the focus from congregate living to prevention efforts and community-based services. Over the long-term, these efforts will result in a system that relies less on out-of-home placements and facility-based care and supports the wellness of children, youth, and adults in their own communities." Free Through Recovery (FTR) is a community-based behavioral health program designed to increase access to recovery support services for individuals engaged with the criminal justice system who have a serious behavioral health concern. Free Through Recovery is a partnership between the Department of Human Services and the Department of Corrections and Rehabilitation. The mission of Free Through Recovery is to improve healthcare outcomes and reduce recidivism by delivering high-quality community behavioral health services linked with effective community supervision. The goals are to improve engagement in quality services and to provide access to individualized services that are responsive to each person's specific needs. Stakeholders in the North Dakota 2018 study reported that North Dakota's current behavioral health system is "primarily crisis oriented and pays inadequate attention to rehabilitative and community-based services." The study identified a recommended (4.1) to ensure access to needed recovery support services, including providing funds to support the implementation of a "Free Through Recovery" program separate from the criminal justice system. During the 2019 North Dakota legislative session, Senate Bill 2012 passed which created a new section in ND Century Code and provided funding to implement Community Connect. This decision package includes additional dollars to maintain current level of service through the Free Through Recovery and Community Connect programs.

Multisystemic Therapy (MST) is an intensive family and community-based intervention for children and young people aged 11-17, where young people are at risk of out of home placement in either care or custody and families have not engaged with other services. Currently being implemented in Southeast Human Service Center. Request is to expand the delivery of these services to the Bismarck area through the West Central Human Service Center.

325 Health and Human Services

Agency 325

There are currently no Functional family therapy (FFT) providers in the state. FFT's a treatment approach for families of teens between the ages of 11 and 18. Functional family therapy is intended for teens displaying behavioral issues, such as drug and alcohol use, truancy, and school refusal.

Drug courts help participants recover from use disorder with the aim of reducing future criminal activity. As an alternative to incarceration, drug courts reduce the burden and costs of repeatedly processing low-level, non-violent offenders through the nation's courts, jails, and prisons while providing offenders an opportunity to receive treatment and education. Drug court participants are required to abstain from substance use, to be accountable for their behavior and to fulfil the legal responsibilities of the offenses they have committed. This decision package includes a request to meet increased demand for drug court in the southeast human service center region of the state.

Necessary resources for implementation (including FTE's)*: This proposal includes 11 new FTE and \$2,087,648 general fund dollars.

4 FTEs to initiate FFT services in rural areas of the state

5 FTEs to expand MST services in Bismarck, ND

2 FTEs to meet drug court demand in the Southeast human service center region

Are resources being redirected or are they new or additional (including FTE's)*: All FTEs and general fund is a new request

Who is served and impact of not funding*: Individuals with behavioral health conditions who may be at risk of involvement with the criminal justice system. The impact of not funding would be not having services available for this population and potential increased criminal justice system costs.

Public health and wellbeing (Priority: 10)

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: For ND to become the healthiest state in the nation, we must invest in public health. The COVID-19 pandemic highlighted the impact of underfunding of the public health system. It impacted the mental, physical and economic health of our communities. This decision package would invest in core public health infrastructure to bolster the public health system and address existing problems. "Core public health

infrastructure” refers to activities that strengthen the quality and capacity of public health to address a range of issues, such as infectious and chronic diseases or environmental hazards. This decision package would assist public health infrastructure in the following ways:

Local Public Health Unit State Aid: Public Health is most impactful when it can be done on a local level. Increasing Local Public Health State allows for a greater state investment into building the capacity and infrastructure needed at the local level to ensure the state is prepared to confront public health emergencies and there is greater access to preventive care to vulnerable populations.

Regional Field epidemiologists: These positions have been permanent temporary since 2021 when CDC made an investment in increasing and bolstering the disease investigation workforce to be more able to respond to outbreaks, novel infections and other disease of public health significance that may have gone uninvestigated due to lack of staff and competing priorities.

West Nile Virus epidemiologist: This permanent temporary position has had stable federal funding since 2011 (funding for WNV surveillance since about 2002). This position has had high turnover and since 2011 there have been 5 different people in this position. A FTE is needed for this position to ensure core ELC staff are knowledgeable and proficient which will have a positive impact on the health of the public.

Hepatitis Surveillance Epidemiologist: This position has been a permanent temporary position since 2021 when CDC made a landmark investment in the development of hepatitis C surveillance systems a national priority. Public Health has maintained disease surveillance for these infections for years, but this position allows for action on those reports to increase the number of people treated/cured of their infections leading to a healthier resident population.

Medical Marijuana Compliance: With a patient population of over 8,000, increases in dispensing volume, and production increases, an additional FTE is requested to assist with monitoring and compliance reviews and ensuring the Medical Marijuana program is well regulated and product is safe for qualified patients. This FTE request would return the amount of team members back to the six FTE allocated when the program was initially established.

Autopsy Technician: This FTE would assist in retaining competent and knowledgeable talent in a position that currently has a high turnover rate. Most of the temporary technicians aren't employed for much more than one year. Training new hires into the autopsy tech positions is time intensive due to limited experience and this person could assist in training other technicians. This position would also take on administrative roles in the Forensic examiner's office.

Poison Control Hotline: Public Health contracts with Hennepin County Medical Center to manage the Poison Control Call line for North Dakota. Additional funds are necessary to support the contract with Hennepin County Medical Center/Minnesota Poison Control Program As the per call rate continues to rise.

Public Health Communications: Health communication is vital to public health programs that address disease prevention, health promotion, and quality of life. It can make important contributions to promote and improve the health of individuals, communities, and society. An additional FTE is requested to assist with external communications to ensure timely and accurate information reaches the public.

Toxicology testing for controlled substances: Recent federal funding has enabled Public Health to start toxicology testing coroner cases for the western part of the state. We would like to expand this to the eastern counties that have not been able to participate in this project. Toxicology testing should be routine for coroner cases, but in many instances, it is not done for a variety of reasons, one being costs.

Necessary resources for implementation (including FTE's)*: This decision package request includes 13 new FTE (including 11 currently temp staff being converted into FTE) and \$3,647,516 of general funds.

325 Health and Human Services

Agency 325

Are resources being redirected or are they new or additional (including FTE's)*: Eleven of the identified positions would be moving temporary staff to FTE to ensure stability and quality in public health response. All other resources are enhancing current established programs or services.

Who is served and impact of not funding*: The request serves the entire state of ND. This request if not funded would limit the services able to provided by public health especially at the local level with the request increase of State Aid which hasn't been increased in over a decade.

Supporting ND Workforce initiatives (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	371,474	-	371,474	2.27	311,862	-	311,862	1.61
General	38,021,198	7,000,000	45,021,198	4.23	55,982,846	7,000,000	62,982,846	3.89
Special	-	-	-	0.00	-	13,000,000	13,000,000	0.00
Total	38,392,672	7,000,000	45,392,672	6.50	56,294,708	20,000,000	76,294,708	5.50

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: What we know

Communities need workers who want to work in both low-skill-required and high-skill-required jobs to thrive. | North Dakota has more job openings than people to fill them. | Household economic realities affect decisions about employment. According to ND Job Service, 51% of job openings (June 2022) are low-barrier to entry in terms of training/education. And almost half of jobs available pay an average starting wage of less than \$25/hour. 32 ND counties had more job openings in May 2022 than they had people unemployed and looking for work. And all but four counties are experiencing greater workforce shortages in 2022 than 2021.

Many lower wage jobs also have a low barrier to entry in terms of training and/or education. Lower income households – both with and without young children – struggle to earn enough income to meet their basic budget needs. But if you are a family with young children, one of the largest items in your household budget is CHILD CARE.

Child care is a good investment. Strengthening child care availability, affordability and quality is a high impact investment in working families who are employed in thousands the jobs that are necessary for our communities to thrive.

This decision package includes five elements that combine to support North Dakota's workforce initiatives. Together they represent an impact level investment that aims to remove child care as a workforce barrier for young parents

1. Double the number of families with children age 0-3 who receive child care assistance
2. Increase the child care assistance payment that is available to programs who care for infants and toddlers from lower income families

3. Infuse quality incentives into the child care assistance payment tiers and help more child care programs move up in the quality rating system
4. Provide a parent-led, personalized family education and coaching program (Upstart) to families with children who are a year away from entering kindergarten
5. Streamline the criminal background check process that opens the door to employment for thousands of child care and other direct care workforce

In addition to child care, we know how important - and how difficult it is - for small businesses who are in the field of human services to transform their business model to take advantage of more sustainable healthcare-oriented revenue streams. We are proposing to create a provider strike team that can offer targeted support and technical assistance to private businesses who employ direct care workers and a range of health and human services professions. This group of four professionals will provide time-limited customized advice and guidance on billing systems, staffing practices, and service delivery models with the intention of helping them develop more sustainable business models and help address persistent and critical workforce shortages by ultimately growing their businesses.

Necessary resources for implementation (including FTE's)*: This proposal includes new FTE, new contract dollars, and general fund dollars.

FTE

- 1.5 FTE to support streamlined criminal background check processing (\$275,315 total; 82% general)
- 4.0 FTE to create a health and human services provider strike team to provide customized assistance to small businesses (\$711,962 total ; 50% general)
- 1.0 FTE to establish communications, outreach and marketing support for the early childhood and provider TA initiatives (\$130,480 total; 100% general)

Contract resources

\$3 million to increase contracted resources available to support quality assessment and coaching for child care programs (this is in lieu of an FTE request)

General Fund

- \$37.9 million to increase availability of child care assistance to lower income working families in North Dakota
- \$2.4 million to provide families of children in the year before kindergarten, access to Waterford Upstart
- \$1 million to streamline and automate the criminal background check system

Are resources being redirected or are they new or additional (including FTE's)*: With the exception of a 1 FTE in the criminal background check unit that is being converted from temporary to permanent status, the request represents new resources.

Who is served and impact of not funding*: The child care investment is projected to provide an additional 1,500 children age 0-3 with child care assistance. The average child care assistance per month is \$650/child. This is a meaningful and significant investment in family economic wellbeing as it can easily represent 10-20% of a total family budget (for households earning less than \$50,000/year).

325 Health and Human Services

Agency 325

The child care investment will also affect an estimated 700-800 child care businesses who serve infants and toddlers living in families with modest incomes (and utilizing child care assistance), as they will receive an enhanced rate from the state to offset the higher costs associated with providing quality care to the youngest children.

The strike team is estimated to support 10-12 private businesses each year, who in turn can be anticipated to employ 400-600 individuals who serve as workforce to children and adults with disabilities (who need to hire in-home/support services to support independent community living).

The criminal background check unit processes an average of 8-10,000 background checks per year, which directly affects the expediency of onboarding and hiring for individuals in dozens of human serving professions including child care, child welfare, and delivery of home and community based services.

Addressing Basic Needs of North Dakotans - FOOD (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	12,992,444	3,000,000	15,992,444	0.00	12,992,444	-	12,992,444	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	12,992,444	3,000,000	15,992,444	0.00	12,992,444	-	12,992,444	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Through the Older Americans Act, HHS provides financial support to more than 170 senior meal sites across North Dakota. These meal sites typically serve more than 1 million meals each year to more than 10,000 older adults across the state.

During COVID, as congregate dining options were curtailed, take-out and pre-packaged meals became more widely used as a means of reaching out to older adults who were experiencing food instability. Even without the option for group dining, during the pandemic, we saw the number of people receiving nutrition from this service increase. The alternate delivery model allowed us to reach new people who hadn't previously utilized this community resource.

This decision package provides resources to better support the delivery of food and nutrition services to older adults across ND. The package includes a rate increase (from \$4.60 to \$7.00/meal) that will be passed through to Senior Meal providers to help account for rising food and packaging costs, as well as an incentive rate that will encourage quality and innovation in how senior meals are delivered.

This decision package also changes the reimbursement that is available to an older adult who receives home and community based services through Medicaid, SPED and Expanded SPED. Evidence is clear that food insecurity and poor nutrition lead to poor health outcomes and nursing home placement. Two meals per day will help ensure better nutrition for HCBS recipients.

This request supports HHS' Economic Health initiatives.

325 Health and Human Services

Agency 325

Necessary resources for implementation (including FTE's)*: The request requires \$15,992,000 in general funds. (The state already maximizes federal funds that are available for senior meals.)

\$12,854,294 - Rate increase from \$4.60 to \$7.00

\$3,000,000 - Incentives for quality and innovative senior meal delivery

\$138,150 - Increase availability of home delivered meals from one to two per day (for Medicaid, SPED, and Expanded SPED)

Funds can be distributed through existing systems and networks. No additional resources are required for implementation.

Are resources being redirected or are they new or additional (including FTE's)*: No resources are being re-directed. This decision package requires new General Funds.

Who is served and impact of not funding*: In federal fiscal year 2021, 1,020,542 meals were served to older adults across North Dakota. As such, HHS anticipates that this request would support approximately 2,000,000 meals in the 2023-25 biennium.

At the same time, there are approximately 100 people who receive home delivered meals via Medicaid, SPED, or Expanded SPED each year. This decision package would ensure that those individuals have access to two meals per day instead of one.

Beh health svc FOR YOUTH (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,295,968	-	1,295,968	4.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,295,968	-	1,295,968	4.00	-	-	-	0.00

State Initiative*: Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: School-based mental health is becoming a vital part of student support systems. Studies have shown the value of developing comprehensive school mental health programs in helping students achieve academically and have access to experiences that build social skills, leadership, self-awareness, and caring connections to adults in their school and community. Schools that also choose to collaborate with community partners have found that they can enhance the academic success of individual students. These partnerships have found to significantly improve schoolwide truancy and discipline rates, increase the rates of high school graduation, and help create a positive school environment in which a student can learn and be successful in school and in the community.

325 Health and Human Services

This decision package includes two strategies to enhance these efforts of supporting the behavioral health of our K-12 students:

1. Technical assistance for Behavioral Health Resource Coordinators at all K-12 schools
2. Enhanced capacity to increase the number of schools provided behavioral health services and supports by the public behavioral health system.

NDCC Section 15.1-07-34 includes a requirement for each school within a district to designate an individual as a behavioral health resource coordinator. NDCC Section 50-06-05.1 requires the Department of Health and Human Services' Behavioral Health to provide resources on mental health awareness and suicide prevention to the behavioral health resource coordinator at each school. Resources must include information on identifying warning signs, risk factors, and the availability of resources in the community. The Behavioral Health Division, through partnership with a vendor, created "North Dakota's Behavioral Health in Education: Resources and Opportunities (B-HERO)" technical assistance center to provide technical assistance, collaborative opportunities and evidence-based content to assist Behavioral Health Resource Coordinators in their role. The funding request will ensure this effort continues to support the wellbeing of school personnel, students, families, and school communities.

The West Central Human Service Center currently provides mental health professionals and skills integration into some of the Bismarck Public Schools. The request is to increase this team by 4 FTE to provide these services to an additional school in the district.

Necessary resources for implementation (including FTE's)*: This proposal includes 4 new FTE and \$1,153,857 general fund dollars.

4 new FTEs for West Central Human Service Center to provide behavioral health services in a new school within the Bismarck Public School District.

\$753,857 general fund to support the 4 FTE and non-billable service delivery in a new school within the Bismarck Public School District.

\$400,000 general fund to continue providing the training and technical assistance on mental health awareness and suicide prevention to the Behavioral Health Resource Coordinator at each school as required by NDCC.

Are resources being redirected or are they new or additional (including FTE's)*: FTEs are new

Who is served and impact of not funding*:

All schools are served by B-HERO as all schools are required by law to identify a Behavioral Health Resource Coordinator.

An additional school in the Bismarck Public School District will be served with the FTE and general fund request for West Central Human Service Center.

If this decision package is not funded, the NDCC requirement will not be met and there will be more students and families without a connection to behavioral health services within the school

HHS infrastructure to support strategic initiatives (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Funding to outsource two key components of program integrity: audits related to nursing homes and hospitals. Increased efficiencies will be realized as staff will be able to focus on other provider types and recoveries from hospitals and nursing homes will fund these efforts. Outsourcing will eventually be recovery based only.

Transformation managers - SB 2256 of the 2021 legislative session resulted in a study of the DD and autism systems in the state and recommended changes to modernize and transform the system to better serve members. These FTEs will lead the implementation of the changes.

Necessary resources for implementation (including FTE's)*: 2 FTEs for Transformation managers - SB 2256 of the 2021 legislative session resulted in a study of the DD and autism systems in the state and recommended changes to modernize and transform the system to better serve members. These FTEs will lead the implementation of the changes.

Are resources being redirected or are they new or additional (including FTE's)*: No

Who is served and impact of not funding*: If this package is not funded, the Department will not be able to conduct the proper audits of nursing facilities and hospitals, two of our largest providers in terms of expenditures.

Data Assets and Data Modernization (Priority: 17)

StateTrauma Registry

The following positions are requested to continue to leverage our goal of ensuring Public Health is using a data-driven best practices approach to programs and actions.

Senior Public Health Info Specialist/Data Modernization Lead- This FTE would serve as the data modernization initiative lead for the Public Health Division. This position is a leadership role as a public health informatics expert regarding public health programs and in the design, development, maintenance, operation, enhancement, and configuration of data systems and informatics capabilities to address the needs of the Public Health Division. This includes service to the 23 Local Health Jurisdictions, and five federally recognized Tribes

Epidemiologist - Special Projects- These FTE are especially instrumental in the qualitative research projects that the team undertakes, such as policy analyses, maternal mortality review and suicide and opioids. This position plays an important role in identifying and then advising on the epidemiological priorities in collaboration with the program staff. These positions would provide continued epidemiological and analysis support to the newly formed DHHS programs and will assist across multiple program areas such as Economic Assistance and Medicaid.

Health Stats & Performance Support Staff- The position supports 25 people in four Divisions and the State Epidemiologist. The position provides support for an additional six contracted students. On top of the many administrative duties, the position is responsible for over 50 contracts. This position is the initial point of contact for Qualtrics survey development for many in the Public Health Division and is necessary for the continued efficiency of the Health Statistics and Performance section.

Improving HHS ability to respond to growing demand for svc (Priority: 18)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	908,788	-	908,788	8.86	179,406	-	179,406	1.02
General	1,028,758	250,000	1,278,758	8.64	172,370	-	172,370	0.98
Special	-	-	-	0.00	-	-	-	0.00
Total	1,937,546	250,000	2,187,546	17.50	351,776	-	351,776	2.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This decision package includes several items from across HHS that represent investments that address increased demand for services.

HHS Finance/Legal Infrastructure. Add capacity to HHS finance team by adding 2.5 FTE to fill the Accounts Payable Manager and Financial Data Analyst roles. The HHS finance team is charged with providing support to dozens of teams across the agency. As demand for HHS services continues to increase so does demand for HHS Finance team support. These roles represent a critical investment in the department's infrastructure.

325 Health and Human Services

Agency 325

Developmental Disabilities. Convert 9 long-term temporary staff (8 case managers and 1 admin assistant) to state FTE. These staff were brought on to address system demand increases over the last few years (as per legislative direction related to caseload/service delivery); and add 3 new DD case managers (DDPMs) to appropriately serve individuals and their families given continued demand pressures.

Refugee Services. Establish a state FTE for a fully federally-funded Community Engagement Specialist to work with businesses, nonprofits and schools to foster positive long-term outcomes for refugees. A focus would include a community needs assessment and connecting refugees to local resources.

Food & Lodging Licensing. Add a Lead Inspector/Plan Reviewer to the Food & Lodging Licensing team and would be assigned an inspection area in central/north central ND. The Food and Lodging Licensing team ensures safe and sanitary food and lodging establishments for anyone who is a customer of these services. As the state continues to experience strong economic growth and community development, the need for health and safety related inspections continues to grow as well.

Supplemental Nutrition Assistance Program (SNAP). Add a SNAP program specialist to the state policy team. Providing lower income North Dakotans with food assistance remains a high priority; as opportunities to provide nutrition assistance continue to evolve, the in-state program team needs to align state plans to federally-required plan elements, including expansion of supportive services delivery and oversight. During recent federal management evaluation reviews of the SNAP program, ND was cited for lack of State oversight in the SNAP-Ed and Outreach. Federal requirements at 272.2(d)(2)(vii)(A) requires State agencies provide program oversight to ensure integrity of funds and demonstrate program effectiveness.

Vocational Rehabilitation (VR). Convert a long-term temporary VR counselor role in Williston to a state FTE. Demand for employment support services remains a high priority; this role provides critical program coverage in northwest ND.

Oral Health. Convert a long-term temp public oral health hygienist position to state staff. This long-term temporary role is responsible for program and quality improvement strategies in the state's oral health program.

Necessary resources for implementation (including FTE's)*: 19.5 FTE (11 convert temp staff to state FTE and 8.5 are new FTE); \$2,439,356 total funding (\$1,443,610 new general fund).

HHS Finance/Legal Infrastructure.

Finance staff - 2.5 FTE; \$611,712 total funding (\$501,604 general funds)

Special Lawsuit funding reserve - \$250,000

Developmental Disabilities.

Case Management - 11 FTE (8 convert from temp staff to state FTE, 3 new FTE); \$832,652 total funding (\$410,929 general funds)

Administrative Support - 1 FTE (convert from temp staff to state FTE); \$40,530 (\$20,002 general funds)

Refugee Services. 1 FTE; \$182,303 (100% federal)

Food & Lodging Licensing. 1 FTE; \$120,000 (general fund)

325 Health and Human Services

Agency 325

Supplemental Nutrition Assistance Program (SNAP). 1 FTE; \$197,140 total funding (\$98,570 general fund)

Vocational Rehabilitation (VR). 1 FTE (convert 0.7 temp staff to 1.0 state FTE); \$170,019 total funding (\$42,505 general fund)

Oral Health. 1 FTE (convert from temp staff to state FTE); \$35,000 total (100% federal funds)

Are resources being redirected or are they new or additional (including FTE's)*: 11 of the requested FTE are existing long-term temporary staff that would be converted to state FTE. All requested general funds are new.

Who is served and impact of not funding*: The infrastructure investments in finance and legal will affect the entire agency by helping to ensure that the thousands of HHS and HSZ staff and tens of thousands of service providers whose revenue derives at least in part from HHS-administered programs receive efficient, timely, accurate service.

The programmatic requests included in this proposal directly touch the lives of tens of thousands of individuals and businesses across ND.

*the 8,000+ individuals with developmental disabilities served by HHS,

*the hundreds of refugee families and refugee-serving agencies living and working in ND,

*the hundreds of individuals and businesses in NWND who receive employment services through VR,

*the businesses and residents of central and northcentral ND who benefit from the work of the Food and Lodging licensing team,

*the 48,000+ individuals who receive food assistance through the SNAP program each month,

*the children and adults whose health is improved by having access to a quality oral health system in ND

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

325 Health and Human Services

Agency 325

Request explanation and justification (include any statutory authority)*: The North Dakota Department of Health and Human Services Public Health Division provides the necessary infrastructure for public health and medical disaster and emergency response. Their role is to develop and implement statewide public health and medical plans, develop situational awareness and coordinate responses. They do this by establishing statewide planning processes that integrate all public health and medical services providers into a public private partnership. The success of these responses has a direct impact on the saving of lives and the health of the population during disasters and emergencies. These roles are accomplished through tactical communications with public health and medical providers, the provision of command and control under the NDHHS Department Operation Center (DOC) which is operated under the State Emergency Operations Center (SEOC), the provision of necessary medical assets such as drugs, durable medical equipment and personal protection equipment and other supplies required for response from the State Medical Cache warehouse.

System improvements need to be made that will improve the capability and capacity of public health and medical providers to save lives and improve health during disasters and major emergencies. There are four major strategies. They are

- (1) Expand the cache of public health and medical durable equipment, PPE, disposable supplies and pharmaceuticals that can provide an effective response to North Dakota during an emergency. While a medical cache exists, enhancements need to occur to cover the entire public health and medical system supplies and equipment. At current levels, only partial coverage can be achieved.
- (2) Provide adequate staffing to maintain the DOC command and control systems in a constant state of readiness and provide paid training to about 45 members of the North Dakota Medical Reserve Corps (NDMRC) that would serve as field leadership for the approximately 1,400 remaining members of the NDMRC. Additionally, provide laboratory personnel need to maintain the public health laboratory missions.
- (3) Maintain and exercise standardized response procedures and protocols so that medical and public health staff can be effectively deployed across the entire state.
- (4) Identify threats, improve situational awareness and enhance emergency response by automating data surveillance systems from public health, laboratory, medical, hospital, pharmacy and medical supply systems.

The decision packages provide an assessment of solutions to prioritized gaps that exist in the current system.

Necessary resources for implementation (including FTE's)*: This decision package request includes 5 new FTE (including 3 currently temp staff being converted into FTE) and \$3,198,682 of general funds.

Are resources being redirected or are they new or additional (including FTE's)*: Other than the previously identified temporary team members being converted to FTEs, the resources are new to address gaps in the current system.

Who is served and impact of not funding*: The entire state of North Dakota is served through the emergency response activities of public health. The decision packages provide an assessment of solutions to prioritized gaps that exist in the current system. Failure to address these gaps will decrease the effectiveness, capability and capacity of public health and medical providers to mount effective efficient response which correlate to increase loss of life and poorer health outcomes.

Tribal partnerships related to HHS (Priority: 20)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
General	407,130	-	407,130	2.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	407,130	-	407,130	2.00	-	-	-	0.00

State Initiative:* Tribal Partnerships

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Tribal Partnerships are one of the five strategic initiatives for North Dakota. To achieve this, we must collectively strengthen our tribal communities across North Dakota which will only happen when we genuinely engage, listen, and learn about each tribe’s individual challenges and opportunities. The tribal liaisons directly serve this purpose.

Disparities facing the AI population include higher rates of diabetes, cancer, addiction, heart disease and other public health issues, including unintentional injuries. The average age at death for AI is 56.5 years, compared to 75.3 years for the White population (North Dakota Division of Vital Records 2021). According to the 2022 County Health Rankings, all 12 North Dakota counties identified as “least healthy,” are either within a tribal reservation or designated as rural/frontier.

The Tribal Health Liaisons (THL) positions have been in place since July 2022. The positions were originally brought on by COVID-19 funding. However, with the increasing health inequities among North Dakota’s Tribal populations outside of COVID-19 and the growing need to better relationships between the state and Sovereign Nations it is imperative that these relationships continue. The positions have established relationships not only within the Tribal Nations but with the Urban Indian Community-Based Organizations. The THL distribute/communicate important health information to the AI population. In return, the AI population has gained the trust in the THL to provide information and needs back to the Department. The THL have also been utilized by other state agencies.

Necessary resources for implementation (including FTE’s)*: This decision package request includes 6 new FTE (including 4 currently temporary team members being converted into FTE) and \$406,013 of general funds to expand the number of positions for this purpose.

Are resources being redirected or are they new or additional (including FTE’s)*: Two of the positions request would be new FTEs. The remaining four FTEs requests are established temporary positions that are federally funded through 2027.

Who is served and impact of not funding*: Tribal nations and Urban Indian Community-based Organizations are served by these positions. Not funding these positions could lead turnover in positions where established relationship and trust is paramount. This could lead to diminished trust and engagement with tribal partners.

Investing in HHS Workforce (Priority: 21)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	216,608	-	216,608	0.90	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
General	1,205,190	-	1,205,190	5.10	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,421,798	-	1,421,798	6.00	-	-	-	0.00

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: DHHS has invested significant time over the past two years implementing a new HR operating model within ND state government. DHS and DoH were two of four agencies who participated in this effort to appropriately define and scope HR work according to business need. This model not only streamlines our services to team members and managers but expands the use of our services. This translates into improved services for North Dakotans. Our initial implementation was done utilizing existing DHS and DOH FTE. The FTE and resources requested in this decision package will allow us to fully implement the necessary basic functions of this operating model.

The DHHS workforce is complex in that we have several 24-hour facilities, including a hospital, eight clinics, residential facilities, the State Health Lab, and various program-related team members. Implementation of any HR services across our team is done using multiple approaches and strategies based on the specific needs of the workforce. The requests that comprise this decision package are noted below:

Culture/Engagement

The State of ND has necessarily and appropriately placed increased importance on team member culture and engagement. These items have a direct impact on recruitment and retention of team members, and consequently, the services provided to ND citizens. To adequately serve the team members of DHHS, and citizens of North Dakota, the Department needs resources to spearhead, integrate, and sustain these efforts across the entire agency. Integral to this work is the creation and execution of an engagement and culture strategy.

Employee Health/Safety/Wellness/Risk Management

DHHS operates several 24-hour facilities, and as a result our team members have unique health and safety needs. Resources are needed specifically to manage prevention programs, employee injuries, and return-to-work plans.

Business Partner

Each area within DHHS has an assigned HR Business Partner who is responsible for the provision of HR services to team members and managers within that Division. This resource is needed to assure that all team members/managers have the same level of service from HR, given the geographic spread and unique needs (24 hours, hospital based, etc.). A primary function of the business partner is to create workforce plans with leaders, and then work with HR team members and others to do the work necessary to execute the plan.

325 Health and Human Services

Agency 325

Internal-focused communications

This role will develop and implement a strategic internal communications plan focused on informing / mobilizing team members around agency-wide business strategies and goals; scope includes driving internal / external employment brand.

Team Engagement/Manager Support (Communications)

This role will develop / strengthen internal communications channels and content to drive / increase team engagement and strengthen Better Together culture; scope includes enhancing manager communications to support team building and citizen focus.

Necessary resources for implementation (including FTE's)*: The FTE needed as part of this decision package are primarily needed to implement and sustain activities that are necessary for the successful operating infrastructure of the agency.

IT systems already exist for these areas so there is no anticipated additional expense in that area.

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*: The impact of not funding these resources will have negative impact on team members of DHHS, which ultimately results in quality of service to citizens. The functions outlined are necessary for any employer, and as the State's largest agency, there are basic expectations that team members have which must be met. Our workforce is complex, and the challenges presented require complex solutions.

Funding shared delivery of Human Services with Human Svc Zones (Priority: 25)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	4,332,369	-	4,332,369	0.00	2,991,189	-	2,991,189	0.00
General	27,201,890	-	27,201,890	0.00	19,816,723	-	19,816,723	0.00
Special	11,134,431	-	11,134,431	0.00	10,823,588	-	10,823,588	0.00
Total	42,668,690	-	42,668,690	0.00	33,631,500	-	33,631,500	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Since Human Service Zones were created in January 2019, the delivery of services across ND has continued to evolve. The shared responsibility for delivery of human services is coming into clearer focus with each year that goes by.

The intent of SB2124/Social Service Redesign was to provide property tax relief to ND residents by shifting the responsibility for funding social services from counties to the state. As part of this shift, the state accepted the responsibility of funding the delivery of social services and, at the same time, accepted greater responsibility

for oversight and coordination of the delivery of said services. Human Service Zones operate as part of County government with State-level oversight and funding. To appropriately fund delivery of social services across the state, the Legislature established the Social Services Finance Fund in 2017-2019 (SB 2206) and the Human Service Finance Fund in 2019-2021 (SB 2124) to fund Social Service Redesign. The Legislature appropriates dollars to the fund during each legislative session.

Social Services Finance Fund/Human Service Finance Fund Appropriation per Biennium

2017-19 - \$0M

2019-21 - \$173M

2021-23 - \$189M

Each biennium funds are transferred into DHS' Human Services Fund (aka "457 Fund"), based on the Department's budget request. The budget request accounts for the cost of delivering human services outlined in state law, all of which is done via the above-described partnership between Human Services Zones and the ND Department of Health and Human Services. As of July 2022 HSZs employ 832 FTE to deliver eligibility support for economic and general assistance, child protective services, foster care and in-home family support; HSZs also serve as custodians for orphaned children. HHS employs 153 FTE who deliver child care licensing, foster care IV-E eligibility determination and licensing, child welfare quality assurance and support, case management for home and community based services, and eligibility support for long term care. Additionally, HHS employs 100+ staff who provide policy and system support as part of the HSZ human service infrastructure. 985 of these staff positions (832 + 153) are authorized through the HSZ FTE pool, established as part of Social Service Redesign.

Today, all of the funding for these 985 FTE (832 HSZ employees and the 153 HSZ-to-State transferred employees) comes from the 457 Fund. As the responsibilities for various elements of human service delivery continues to shift between State and HSZ staff, the mechanism that funds services may need to evolve as well. This proposal requests that the State shift the cost of funding social services delivered by state employees to the state HHS budget, and that the cost of social services delivered by HSZ employees continue to come from the 457 Fund.

Removing the costs associated with the 153 HSZ-to-State transferred FTE from the 457 fund and aligning them with their respective programs would offer greater transparency into total cost to operate each program and more appropriately allocate administrative positions across all cost centers.

Necessary resources for implementation (including FTE's)*: There are no new FTE required to effect this change. The request would require the HHS Finance team to coordinate with OMB and HSZ accounting staff to effectuate the change. The general fund dollars requested support the costs associated with the 153 HSZ-to-State transferred staff who work together with HSZs to deliver on the duties as per social service redesign.

Are resources being redirected or are they new or additional (including FTE's)*: As per SB2124, the state is obligated to provide for the cost of delivering social services in counties across ND. This proposal requests that the legislature meet the obligations of SB2124 by funding the Tax Relief Fund for costs related to services delivered by HSZ employees and the HHS budget for the cost of services delivered by state employees.

This proposal splits social service funding appropriated by the legislature as per SB2124 between the Tax Relief Fund and the HHS budget, which in essence re-directs dollars that would otherwise go to the Tax Relief Fund, to the HHS budget.

Who is served and impact of not funding*: HHS and HSZs are committed to working together to deliver human services to people in communities across ND. We believe this change will improve the transparency of this partnership by clearly delineating funding sources for HSZ and HHS related costs. Aligning funding to roles/responsibilities will also make it easier for policy makers to gain a more complete picture of the human service delivery system in ND.

Employee Payouts (Priority: 26)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

325 Health and Human Services

Agency 325

Request explanation and justification (include any statutory authority)*: During 2020 and 2021 the US has suffered from an increased state of inflation. Every organization that provides products or services has been negatively impacted by these occurrences. DHHS is no exception. Whether that be the cost of fuel to operate or vehicles and facilities nothing has been untouched by this unfortunate situation. The Department has prepared an itemized list of the areas that have been impacted. The calculations are based on what we used during this biennium thus far and projected use for the 23-25 biennium. Realizing of course inflation could go even higher than the numbers we used. Please see attached document for the details and additional narratives.

Necessary resources for implementation (including FTE's)*: No Additional FTE's are needed at this time.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are not being redirected.

Who is served and impact of not funding*: The loss of services that are provided to the residents of North Dakota will be negatively impacted if this is not approved. If funding is not secured the department will be required to reduce its operating expenses therefore reducing the number and types of services it will be able to provide to those citizens that are the most vulnerable.

Deferred Maintenance HSC (Priority: 31)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	-	-	-	0.00	-	735,154	735,154	0.00
Total	-	735,154	735,154	0.00	-	735,154	735,154	0.00

State Initiative*: Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Fire Alarm system is original from 1993 and beyond life expectancy. Current equipment is out of date and no longer serviceable. Replacement would increase durability and reliability as well as improve fire and safety features. Replacement would decrease waiting times for repair or parts.

The Parking Lot has reached the point where it should be completely resurfaced. Last time it was resurfaced was 2005. It requires regular maintenance and crack sealing to keep it operational.

Necessary resources for implementation (including FTE's)*: No

Are resources being redirected or are they new or additional (including FTE's)*: No

325 Health and Human Services

Agency 325

Who is served and impact of not funding*: Impact of not surfacing parking lot would be risk of vehicle damage or injury due to pot holes in parking lot. Continued cost of crack repair and maintenance.

Impact of not replacing the fire alarm system is critical to the safety and well-being of clients and staff in case of fire.

Provider Inflation (Priority: 32)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*:

79,000+ unique employers connect to ND's child support system to report new hires and departures, and to withhold child support monies from their employees who have child support obligations. These employers send 15,000+ new hire reports through the ND Child Support system every month.

More than 83,700 parents receive child support services in North Dakota, which means 1 of every 7 adults (age 18+) has a connection to child support services. Each of the 53,000+ cases these parents are attached to require ongoing communication regarding employment, income and other household changes, as well as collection and payment issues.

1 in 3 ND children under age 18 (66,000) receive child support services. An average of \$184 million / year in economic resources are made available to support the child's needs through child support.

While the work of determining and collecting child support has evolved over the last 30-40 years, the technology platform that supports the delivery of child support services in North Dakota has not.

HHS Child Support services operates using a 30+-year old mainframe system, known as FASCES.

FASCES is not able to accommodate changes in work process (including more in-depth integration with other systems like Job Service, SPACES, IRS, Social Security), changes in case management practices, reporting requirements, or changes needed to improve the customer experience - which for child support includes more than 83,700 parents and 79,000 employers.

NDIT is scheduled to retire the state mainframe in next 3-5 years; FASCES is one of last remaining major systems to be transitioned.

The focus of the current system is acquisition and storage of data, with little functionality to support outcome-based data analysis. Case management in the existing system depends on manual actions of the assigned worker and familiarity with the case, which is not realistic given the size of caseloads, turnover of staff, and volume of case actions that occur in each case. As a practical matter, the system is not designed to, nor is it capable of automated workflow management.

Necessary resources for implementation (including FTE's)*:

The implementation of a new child support system is expected to cost approximately \$60 million. Under current federal law, projects like this are eligible for a 66% federal match. We estimate being able to secure \$40 million in federal funds, which would need to be matched with \$20 million in state funds.

We have not requested additional FTEs to support the implementation. Rather, as noted in the response below, our intent is to re-direct existing staff to assume leadership roles related to project implementation. The project budget includes dollars to hire the vendor resources required for independent verification and validation of the system, etc.

Are resources being redirected or are they new or additional (including FTE's)*: Writing system requirements requires commitment from appropriately experienced staff resources. We know from our conversation with other states that it is important not to under-estimate the amount of program staff time that will be needed to appropriately implement a system. When states were not able to dedicate appropriate program-staff resources to project implementation, they tended to experience more defects and delays in the system implementation.

We want to make sure we have strong project coordination resources within the child support division to ensure maintenance of timeline and quality of project.

In that regard, the timing for this project is ideal as the child support section currently has an experienced senior management team with deep knowledge of the entire child support process, including the interfaces and interconnections that are so essential to its success. They as a team are well-positioned to support an effort of this magnitude. We have also connected with other states who have undertaken similar projects and can incorporate lessons learned from their efforts into our own.

Who is served and impact of not funding*: Improving the effectiveness of child support services has a direct impact on thousands of families' ability to meet their children's basic needs.

Child Support conducts quality reviews to identify factors that could lead to better collections. These in-depth case autopsies show that many cases without a support order or without collections are the result of workers missing key information that is captured in FASCES but, that is not presented to the worker in a way that prompts them to utilize it in the determination of most-effective next steps.

These case reviews also highlight the fact that the system lacks data analytics to identify important new or changed information. Users of the current system depend on screens that capture and reveal data elements that were considered important more than 25 years ago and not necessarily data elements that would generate better results today. The current system does not flag inconsistencies in data that has been captured. Our case reviews indicate that workers cannot consistently identify inconsistencies in disparate data elements because the information is simply not presented in a way that ensures that kind of data synthesis happens reliably.

In ND today, 25% of child support goes uncollected in the month that it is due. Statewide unpaid child support exceeds \$250 million. For the 18,000 families who should be receiving child support but are not, unpaid child support is a very real economic stressor, and represents a diminished ability to meet their child's needs.

We believe a new system will result in a 5% increase in current support collected, and a 10% increase in cases with a collection on arrears. Using 2021 data, that would mean at least an additional \$2-\$3 million in child support collected and distributed to families each month.

Start Date (MM/DD/YYYY): 7/1/2023

End Date (MM/DD/YYYY): 12/31/2025

Replace existing application? Yes

Upgrade existing application? No

Development of new application? No

Anticipated Benefits*: The purpose of the Child Support program is to help parents meet the needs of their children by securing appropriate and sustainable child support. Implementing a modern, configurable, outcome-oriented solution that is designed to support both a streamlined customer and worker experience will improve the state's ability to secure resources that can help make sure North Dakota children live in families that are able to meet their basic needs, and that they have a good solid foundation to build on.

Enhance customers' ability to access their information and complete actions required for ongoing child support cases (without having to schedule in person visits)

325 Health and Human Services

Agency 325

Improve worker effectiveness and better enable remote delivery of service and continue to optimize workflow processes and maximize the efficiency of how child care services are delivered.

Support best practice workflows, eliminate excessive manual actions, and create streamlined training for new users due to intuitive interface design.

Replace existing customer web access with integrated, mobile-first customer portals. Because the entire child support system relies so heavily on customer- and employer-provided information, having a more robust, intuitive user-centric interface will produce better data, better compliance, and better collections.

Project Risk:* The State of North Dakota is trying to retire its IBM mainframe system and Child Support is a large application on the mainframe. The state cannot actually retire the mainframe without implementing a new child support technology platform.

Relying on the mainframe will become a bigger budget concern going forward as well. The ability to secure workforce who can appropriately support mainframe-based systems continues to diminish, and the cost to maintain mainframe applications will continue to rise as there are fewer users to share the underlying costs.

Issue/Solution:* Replace the current mainframe-based child support technology platform with a modern, configurable, outcome-oriented technology solution that is designed to support a streamlined customer and worker experience and improve the state's ability to secure resources that can help make sure North Dakota children live in families that are able to meet their basic needs, and that they have a good solid foundation to build on.

Integrated and interconnected HHS data systems (Priority: 23)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	728,484	21,275,000	22,003,484	3.00	-	11,000,000	11,000,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Investing in core DHS infrastructure

Procurement-to-Payment Technology Platform.

This decision package includes a request for general fund dollars to implement an end-to-end procurement, contract/grant-management and monitoring, purchase of services, accounts payable system, hereafter referred to as a Procurement-to-Payment technology platform ("PTP") that will meet the needs of the modern day Department of Health and Human Services.

One of HHS' primary functions is to serve as a conduit of public resources to the private businesses that comprise North Dakota's private sector health and human services delivery networks. Each year HHS procures and enters into 4-5,000 contracts for goods or services, ranging from several thousand to several million dollars each. This workstream is responsible for processing \$800 million - \$1 billion each biennium, all as the gateway to services that are funded in support of HHS' responsibility to serve citizens. In addition to procuring private partners to deliver goods and services, this workstream provides the administrative support that creates and tracks contracts and the accounts payable that accompanies them. Today HHS' procurement, contract management and accounts payables functions are operate using segregated mainframe-based systems that are at least xxx years old.

The current systems were built to acquire and store data. HHS' current PTP technologies are not able to accommodate automated workflows that would help manage flow of documents needed for creation, review and approval; do not provide a means for users to manage contracts and agreements for quality or even for the state to establish expectations that would serve as the basis of thoughtful contract management; and cannot offer the interoperability that is necessary to achieve greater process efficiency. NDIT is scheduled to retire the state mainframe in next 3-5 years; HHS' PTP system is one of last remaining major systems to be transitioned (HHS Child Support FASCES is another). Replacing HHS' mainframe-based applications will be necessary for NDIT to achieve its goal of retiring the mainframe in ND.

MyAvatar system recovery - Create a redundant on-premises backup to support business continuity in the event of a failure in the HHS electronic health record.

Supporting system interfaces

MMIS/SPACES liaison - MMIS and SPACES are HHS' two largest enterprise level systems. The systems interact thousands of times each day to assure appropriate communication of information related to eligibility and claims information for 100,000+ North Dakotans who receive their health insurance from Medicaid. maintaining data integrity and aligned system improvement efforts between both systems requires base knowledge of both, as well as an ability to translate for and between parties. This request creates a position to serve as liaison between these two \$100+ million technology platforms, with a direct link to the SPACES and MMIS data integrity and system improvement efforts.

Therap/EVV liaison and analysis - There are several technology products that combine to form the decentralized technology platform for Home and Community Based Services (HCBS). They include Therap, EVV, SanData (Aggregator), and Wellsky (ADRL), with deep connections to both SPACES and MMIS/FES. Today the program and policy staff from within HHS are tasked with providing business partner sponsorship of these systems. This includes, be default, the interconnections between them. This request would increase HHS' capacity to effectively connect these technology resources to better serve the thousands of individuals who receive services, and the hundreds of private businesses who support them. As well as enable better accountability and insight from the data managed in these systems.

Preparing for program changes

SIS Assessment and DD Payment system - The state DD payment system utilizes AAIDD's standardized and benchmarked tool known as the SIS Assessment to help establish the amount and type of service each individual is authorized to receive from the DD system. Therap is the technology platform that provides fundamental case level support for people receiving DD services in ND. This request includes funding to build an AAIDD/SIS to Therap interface that would populate Therap with data from the SIS form and generate the appropriate correspondence to clients/guardians informing them of any SIS scores changes that result in changes in available service hours. This effort would coincide with the required remapping of the SIS Assessment to the ND payment system. States were notified that the standard SIS assessment tool is being updated to a new edition by early 2023. AAIDD has indicated they will support the first edition until the middle of 2025 to give state systems time to adjust.

Planning to sunset legacy systems (ROAP, AIMS) - HHS has several systems that continue to reside on the mainframe. HHS implemented an electronic health record known as myAvatar in 2019. myAvatar replaced two legacy systems (ROAP - Outpatient EHR and AIMS-Inpatient EHR), which were used by the State Hospital, Life

Skills Transition Center, and HHS Human Service Centers. At the time of conversion, not all needed data was converted from ROAP and AIMS into myAvatar. Currently, the businesses still utilize ROAP and AIMS for historical information. This initiative is for efforts needed to retire the AIMS system.

Planning to sunset legacy systems (TECS, VISN) - HHS implemented the final element of its integrated eligibility system (known as SPACES) in Sept 2021, with the incorporation of LIHEAP into the platform. There are several legacy mainframe-based systems (including TECS, VISN) that are still maintained as a source of historical data for asset recovery investigations and other required functions. This request provides funding to engage in the planning effort needed to appropriately sunset these legacy systems. HHS will work with NDIT to align with mainframe retirement schedule.

Necessary resources for implementation (including FTE's)*: Total of 3 new FTE and \$13,520,004 total funding (\$12,022,503 general funds)

Large IT Project - \$11 million; 0 FTE

Procurement/Contract/Grant management - \$11,000,000 (general funds)

Small IT Projects - \$1,520,004; 3 FTE

MMIS/SPACES liaison - 1 FTE; \$260,959 total funds (\$130,480 general funds)

Therap/EVV/MMIS/SPACES interface support - 2 FTE; \$484,045 total funds (\$242,023 general funds)

Implementing SIS Assessment automation - \$250,000 total funds (\$125,000 general funds)

Planning for sunseting legacy systems (ROAP, AIMS) - \$250,000 (100% general funds)

Planning for sunseting legacy systems (TECS, VISN) - \$250,000 total funds (\$125,000 general fund)

MyAvatar system recovery - \$25,000 (100% general funds)

Are resources being redirected or are they new or additional (including FTE's)*: Procurement-to-Payment Platform. Creating system requirements requires commitment from appropriately experienced staff resources. We want to make sure we have strong project coordination support for the HHS finance team to ensure maintenance of timeline and quality of project.

This same principle holds true for all of the project included in this decision package. Each requires that appropriately experienced staff are able to re-orient their time to commit to sponsorship of these projects.

Who is served and impact of not funding*: The infrastructure investment in the Procurement-to-Payment technology platform will affect the entire agency by helping to ensure that the thousands of HHS and HSZ staff and tens of thousands of service providers whose revenue derives at least in part from HHS-administered programs receive efficient, timely, accurate service.

The smaller IT system investments included in this decision package affect large numbers of people as these projects affect the functionality that underlies the state's electronic health record, integrated eligibility system, Medicaid claims, and HCBS case management and service delivery.

325 Health and Human Services

Agency 325

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? Yes

Upgrade existing application? No

Development of new application? No

Anticipated Benefits:* It is hard to over-state the benefits of a well-designed system as a core infrastructure support to ND HHS. There are hundreds of authorized users and approvers in the current PTP systems, all of whom participate in the highly manual, inefficient process that is HHS procurement, contract management and accounts payable today. A new system will immediately generate very real- and meaningful-time savings for hundreds of HHS employees and HHS vendors, and result in an immediate improvement in the timeliness of contract and payment processing.

Facilitate better tracking and overall management of outstanding contracts by HHS contract managers, including integrated storage of contract-related documents

Support utilization of more consistent procurement and contracting processes across HHS

Eliminate manual document management that consumes time from hundreds of HHS employees each week and often results in delayed processing of documents and/or payments due to the cumbersome nature of the current process

Simplify and standardize authorization of contracts, including appropriate flags for PHI documentation when appropriate, delegation of authority matrices tied to HHS HR systems, automated approval workflows, etc

Automated workflows to manage invoice/accounts payable process

Create capacity for HHS management of system users, with streamlined access enabled by single sign-on

Built-in data integrity and data-matching rules to increase both timeliness of processing and accuracy of results

System design that accommodates basic HHS needs related to length of text fields, ability to amend, drop-downs to facilitate attachment to CFDA, etc.

Project Risk:* The demand for HHS services continues to rise and the ability to grow staff capacity to overcome inefficient administrative processes is non-existent. HHS is expected to run with a lean staffing model. This means there is no room for inefficiency in administrative processes. The PTP workflow within HHS is an example of an outdated, wasteful, inefficient administrative process that has real world impacts on hundreds of staff and private vendors every week. To meet its mission, HHS has to improve the infrastructure that exists to support an increasingly complex delivery of health and human services.

Additionally, the state's desire to retire its mainframe cannot be accomplished until the active systems are migrated away from that platform. HHS' contracts/grants systems must be migrated to align with NDITs timeline for the retirement of this ancient tech resource.

325 Health and Human Services

Agency 325

Issue/Solution:* A successful project will streamline the end-to-end process of procurement through to payment and will include the following minimum requirements.

Create a vendor portal to allow for limited self-service account updates, document upload (W9, invoice) and selected view authority (ex. current contract balance)

Enable Single-Sign on for ease and consistency of access across HHS systems.

Enable self-service for PTP system users according to delegation of authority matrix that establishes proper contract approval workflow throughout divisions and across multiple levels

Provisioning and maintenance of user access owned by HHS

Enabled hybrid work environment (ex. secure printing solutions for system users)

Embedded contact management expectations that align to automated document workflows

Intuitive interface to maintain and update contract details, generate standard and custom reports to view contract(s) details (ex. remaining balance, contract remaining time/end date, contract owners and respective contracts)

Enable better tracking by generating unique vendor and contract numbers

Enhanced data integrity with USPS address matching and contractor debarment registry

Auto-populate contract documents based on information gathered during vendor creation process and HHS funding decision (ex. CFDA #s)

Business rules to establish requirements for supplemental documents (ex. BAA, SSAE16/SSAE18 report) and capability to both generate and store supplemental documents as appropriate

Automated workflows to streamline end-to-end processes (ex. create and approve Purchase Requisitions and Purchase Orders; 2-way / 3-way match based on Purchase Requisition, Purchase Order, Goods Receipt/Invoice Receipts; Qualified Service Providers (QSP) transaction management (high volume manual process that has a high sensitivity to timeliness))

Import functionality to support efficient processing of p-card transactions, including system matching of supporting documentation

Required Technology Investments (Priority: 24)

	2023-25 Agency Request				2023-25 Executive Recommendation

Special	-	-	-	0.00	-	-	-	0.00
Total	15,000	15,000,000	15,015,000	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: In January 2021 HHS assumed responsibility for two technology platforms that are part of the state’s early childhood infrastructure. These platforms were originally managed by an external partner as part of the state’s CCDF-funded contract with them. The technology platforms were implemented at the request of the state and with federal / state funds by the contracted partner and have been serving child care programs and families in ND for several years.

When the contracted partner ceased operation, the state re-assumed responsibility for several key components of early childhood infrastructure - including these two technology platforms.

The State Procurement Office has determined that, since the technology systems were not originally procured according to state procurement law, that HHS will have to re-procure both systems, with new systems in place no later than January 2025.

Resource and Referral (R&R). The R&R database provides a web-based resource to families across ND who are looking for child care in their community. It provides information on child care programs, their costs, quality ratings, and any outstanding correction orders. Information in the database is updated no less than annually via extensive outreach to private child care programs and, starting in Nov 2022, via an interface with the new Child Care Licensing (CCL) database. There are several vendors who provide this type of platform as a service.

Quality Rating Improvement System (QRIS) / Workforce Registry (aka "EC Registry"). The EC Registry is a technology platform is a core element of the state’s early childhood infrastructure. It includes the "Growing Futures" Workforce Registry, which collects and maintains employment and training information for 7,000+ child care workers and 1,200+ child care businesses. The information is validated as an element of the child care program’s quality rating and connected to the state’s quality rating and improvement system (QRIS, known as "Bright and Early"). Each element of the program has a distinct portal (<https://www.brightnd.org/> and <https://www.ndgrowingfutures.org/>) but the back-end is connected to create a seamless experience for users. This platform is also used to distribute grants, stipends and incentives in support of the state’s early childhood strategy

Necessary resources for implementation (including FTE’s)*: There are no federal funds available to re-procure these systems. As such, any required re-procurement will require general funds.

We would need to assign a full time resource to coordinate the re-implementation of a workforce registry/QRIS. To accomplish this we would likely need to task the early childhood system coordinator with this as their primary project for no less than 24 months.

Are resources being redirected or are they new or additional (including FTE’s)*: General fund dollars to procure new systems are a new resource.

325 Health and Human Services

Agency 325

We would need to re-direct existing staff to support the re-implementation of these systems.

Who is served and impact of not funding*: The R&R database serves the thousands of ND families each year who are looking for child care in their community. Maintaining an R&R database is a requirement of the state's federal funding. We need to make sure we are providing this service to people in our state.

The Registry serves 7,000+ child care workers and 1,200+ child care businesses by providing an integrated way to obtain, manage, and track training, supporting the development of individualized early childhood career pathways, managing requirements associated with the state's continuous quality improvement program (QRIS). Federal funding requires the state to provide a means to manage training and quality rating in support of broader early childhood goals.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 01/01/2025

Replace existing application? Yes

Upgrade existing application? Yes

Development of new application? No

Anticipated Benefits*: Having early childhood technology systems that meet state procurement guidelines.

Project Risk*: Primary risk is marshaling the resources necessary to introduce two additional major system changes into an early childhood landscape that is already overflowing with change. Child Care Licensing system, SPACES Child Care Provider Portal and SPACES Client portal all go live by end of 2022. Child care provider streamlined user experience in planning phase with go live planned late 2023. Early Childhood Integrated Data System (ECIDS) under development and in growth phase 2022-2025. Statewide roll out of Teaching Strategies platform for quality rated childcare programs.

Issue/Solution*: To meet procurement guidelines and program needs we will write a procurement that outlines requirements that would re-implement our current systems. We will of course, look for best-in-breed solutions but, as these systems have been under a continuous improvement strategy, they are meeting our needs so can serve as a basis for defining the requirements for new solutions.

Capital Projects Summary

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: HHS seeks authority and funding for a new state hospital campus for all inpatient, and residential services provided by the State Hospital. One treatment building improves efficiency and safety and expands flexibility for patient care. The estimated cost as \$170,000,000.

The North Dakota State Hospital serves as the statewide safety net psychiatric hospital. The specialized facility serves a set of complex patients whose needs exceed private psychiatric hospital capacity and require an integrated set of medical, psychiatric, and rehabilitative care. The hospital also serves as the only psychiatric hospital for specialized forensic and sex offender assessment and treatment.

The current hospital campus does not meet the treatment and safety needs for the specialized care provided. The buildings are old, inefficient, and in disrepair. The deferred maintenance costs exceed building a new hospital and does not provide an improved therapeutic and safe environment.

A new hospital campus, built with evidence based design, creates an effective healing environment that speeds recovery, and improves patient safety and satisfaction, staff performance and retention, and operational efficiencies.

Statutory Authority

North Dakota Century Code Chapter 25-01.3.

Agency Description

The Protection and Advocacy Project (P&A) is governed by a seven-member board named the Committee on Protection & Advocacy. The appointments to the Committee are made by the Legislative Council (2), the Governor (2), Mental Health America of ND (1), The Arc of ND (1), and an entity selected by the Committee (1). The Committee’s current selection is ND Cares. An advisory council provides stakeholder input, regarding the Mental Health Advocacy Program (MH), to the governing board and P&A staff.

Current federal programs include the: 1) Developmental Disabilities Advocacy Program (DD); 2) Mental Health Advocacy Program (MH); 3) Protection and Advocacy for Individual Rights (PAIR - for individuals with disabilities who are not eligible for the DD or MH advocacy programs); 4) Assistive Technology Advocacy Program (AT); 5) Protection and Advocacy for Beneficiaries of Social Security (PABSS); 6) Traumatic Brain Injury Advocacy Program (TBI); 7) Help America Vote Act (HAVA); 8) Social Security Representative Payee Program; 9) Client Assistance Program (CAP) which is a contract from the ND DHS/Vocational Rehabilitation Division.

P&A investigates allegations of abuse, neglect, and exploitation of individuals with disabilities. Advocacy services are directed to individuals with disabilities who experience rights violations or those who are not receiving services for which they should be found eligible.

Agency Mission Statement

The purpose of the agency is to protect and advocate for the rights of people with disabilities. As set by the Committee on Protection and Advocacy in November 2000, the mission reads: Uniting to champion the equality and inclusion of people with disabilities where we live, learn, work and play.

Major Accomplishments

-
- 1 Updated our Supported Decision-Making manual and Individual Justice Planning manual which will be useful tool for individual with disabilities to assert their rights. Both projects required extensive collaboration with both internal and external stakeholders.

 - 2 Collaborated with the Human Service Centers to provide training on abuse, neglect, and exploitation to Human Service center staff.

 - 3 Worked collaboratively with the Governor and to ensure basic care residents and SPED recipients could keep COVID stimulus monies.

 - 4 Formed a committee to evaluate and update our agency’s procedures manual. This was an in-depth look at policies and procedures as they relate to the services we provide to the mental health and disability community

 - 5 Evaluated our internal manual processes to see where technology can be utilized. This resulted in transitioning from a paper process for annual employee reviews to an electronic process utilizing PeopleSoft. While the technology was not new the development of internal procedures and protocol was.

 - 6 Utilized Microsoft Forms for tracking projects federal program projects and non-client related training and outreach. This will provide for data consistency in federal reporting.

Critical Issues

- 1 P&A's proposed budget for the 2023-25 biennium was developed with the assumption of level funding for all of the federal sources unless provided with solid information for changes. While predictions are based on historical information and sound reasoning, they may not come to fruition which will, of course, decrease P&A's resources. Historically, federal grant funds have been generally stagnant over the years for minimum allotment states which includes North Dakota.
 - 2 P&A's payroll will increase each year as legislative raises are given along with increased health insurance premiums. P&A has a total of 28.5 FTE's which includes the attorney for the Olmstead Commission housed in P&A. In recent biennia, additional state general funds have been provided for staff equity and merit increases. These increases have made a significant impact on P&A's budget, as there are no additional federal grant dollars available to North Dakota as we are a minimum allotment state. The need for advocacy services continue to rise in North Dakota therefore the ability to maintain staffing, provide authorized increases in pay and benefits, and be competitive with the private sector it is imperative to the agency budget that this practice be continued.
-

Performance Measures

P&A develops an annual plan with numerous goals and objectives for its federal grants. P&A's activities can be classified into six main areas of effort:

1. Protective services – ensuring appropriate response, including risk management, investigation and provision of remedial effort, to reports of suspected abuse, neglect and/or exploitation of individuals with disabilities.
2. Case advocacy – providing advocacy and/or legal representation, within identified priority areas, to eligible individuals with disabilities to ensure access to appropriate services and resolution of disability-related discrimination or other rights violations.
3. Systems advocacy – collaborating with appropriate stakeholders to identify and advocate for systemic change that will result in positive outcomes for people with disabilities.
4. Information and referral – providing verbal and written information as well as directing individuals to resources external to P&A.
5. Education and training – training provided to groups of individuals, including people with disabilities and service providers, on disability-related rights issues as well as the development and publication of rights-related documents.
6. Self-advocacy support – providing information, technical assistance, and support to self-advocacy groups.

Program Statistical Data

2,687 information and referrals provided in FFY 2021

799 clients served in FFY 2021

3,208 people trained in FFY2021

37,240 website pageviews in 2021

Explanation of Program Costs

P&A uses a combination of state and federal monies to fund salaries and benefits for 28.5 FTEs. Additionally, P&A incurs expenses related to maintaining regional offices which include: rent, insurance, printing, phone and computer services, typical offices supplies, and replacement of furniture and small equipment as needed.

P&A incurs expenses in the areas of travel, periodicals and subscriptions, and professional development to ensure that staff have access to the tools and resources needed to perform their jobs.

Finally, P&A sees operating fees and professional fees in various categories. These items include working with contractors to perform work that P&A doesn't have in-house capacity to complete. P&A also has various operating expenses related to standard office operation and expenses used towards achievement of agency goals.

Program Goals and Objectives

Goals/Objectives:

Abuse, Neglect, & Exploitation

Inclusion

Education

Criminal Justice/Juvenile Justice

Supported Decision Making and Guardianship

Behavioral Health Care Continuum

Health Care

Employment

Voting

*Note federal grants require P&A to go through an annual priority planning process often resulting in annual changes to program goals.

Statutory Authority

North Dakota Century Code Chapter 52-01 through 52-11

Agency Description

Job Service North Dakota (JSND) is the designated State Workforce Agency and is responsible for administering the state and federal unemployment insurance programs, providing labor market information, delivering workforce training and reemployment programs, and providing specific services to targeted workforce sectors and populations.

Agency Mission Statement

Job Service North Dakota's mission is: Meeting Workforce Needs

Our strategic anchors are integrity first, service before self and excellence in all we do.

Major Accomplishments

- 1 Processed fourteen years' worth of Unemployment Insurance claims in fourteen months, maintaining federal quality and timeliness standards, ensuring citizens received accurate and timely benefit payments which were critical to the individual and the individual's family.
- 2 Implemented four complex federal programs (PUA, PEUC, FPUC, LWA), encompassing both technology changes and business processes, to meet the needs of citizens qualifying for these federal assistance programs. These programs were implemented quickly and administered effectively, putting North Dakota within the top 5 states for speedy implementation.
- 3 Implemented effective fraud prevention tools utilizing data analytics and actual identity proofing. These tools had an immediate impact on the fraudulent Unemployment Insurance claim numbers in North Dakota.
- 4 Completed 1,100 housing inspections for 2,566 workers, a 30% increase over the prior year which highlights the impact on the agricultural community.
- 5 Continued seeking innovative solutions to assist employers with recruiting from a local to national level including the first statewide virtual job fair with 160 employers attracting job seekers from six (6) countries and 20 states.
- 6 One of only three states in the nation to meet federal Unemployment Insurance timely payment to claimant standards to claimants during the pandemic, including 2021. This ensured quick resolution of issues that would stop an individual's Unemployment Insurance claim.
- 7 Streamlined internal processes through the implementation of software resulting in efficiencies and reduction of manual data entry for WIOA data monitoring and validation, and the Foreign Labor Certification programs.
- 8 Increased the development of interactive and static dashboards with analysis from 3 products to 6, an increase of 50%.
- 9 Response to Labor Market inquiries increased by 250%, potentially attributable to continued outreach, new product availability, and increased training sessions to various customer groups.

Critical Issues

- 1 Increasingly uncertain federal funding as policy priorities change in response to the economy.

Critical Issues

- 2 Funding shortfalls put program performance at risk, negatively impacting citizens. Risks include delayed Unemployment Insurance eligibility determinations and benefit payments, technology failures & downtime, long waits to speak with staff members. Delays in appeals processing and employer status determinations are also rising and are expected to continue.
- 3 Flat federal funding has not kept up with inflation for over a decade. As funding remains flat, the gap between inflation (actual costs to agency) and actual funding received, grows. In FY21, the gap is \$1.2M in the Unemployment Insurance program alone.
- 4 Over the past ten years, JSND has had to shrink staffing and statewide office footprint due to flat federal funding. This downsizing has come at a time when the ND population has grown by over 106,000 and the number of employers has grown by 7,716.
- 5 Statewide workforce shortages and business growth continue to be challenges in effectively meeting workforce needs. With reductions in staffing over the years, there are limits to providing the necessary staff to seek innovative solutions and conduct national outreach to meet the needs of employers in the state while also serving clients under the programs.
- 6 Flat federal funding and significant increases in workload within the H2A Foreign Labor program has impacted and could further impact the timeliness of the services provided to Ag producers and agents. The primary impact is delays in housing inspections because of the significant increase in the number of inspections and lack of workforce staff to complete the inspections in a timely manner. These delays ultimately impact the timeliness of foreign workers arriving in ND which could delay planting and harvesting timelines.
- 7 Replacement of aging technology, particularly the Unemployment Insurance mainframe-based system. This is a high-risk project due to limited funding and low staffing levels.
- 8 Ongoing technology costs for new systems actually exceed our total yearly operating grant. This is critical as it limits technology options and prevents innovative, customer-desired service options. This is particularly challenging to the efforts of implementing a modernized Unemployment Insurance system.

Performance Measures

Unemployment Insurance Program:

Job Service North Dakota actively tracks and manages the performance of the Unemployment Insurance (UI) program. Leadership throughout the agency, from supervisors to the Executive Director, monitors performance via several reporting mechanisms.

Job Service reviews many performance measures internally, but the U.S. Department of Labor (USDOL) establishes the primary UI program performance measures which revolve around the timeliness, quality, and accuracy of the agency's UI determinations. Historically, Job Service performs very well against the core measures that the USDOL tracks. As importantly, UI staff members are committed to providing high-quality customer service to the unemployed workers and the employers of North Dakota.

While North Dakota has gained a reputation as a national leader in UI performance, the impact of the pandemic workload on North Dakota has and will continue to impact results. Over five years' worth of claims have been filed in four months. The workload has affected all areas of the UI program.

The growing workload and demands on the program have been occurring while staffing levels have declined, albeit with a limited number of temporary staff members brought on for assistance. This, in turn, has, in some cases, created delays in providing service to the individuals and employers utilizing the Unemployment Insurance system. Throughout this time, UI staff has maintained a professional attitude and continued providing an extremely high level of customer service.

380 Job Service

Agency 380

Job Service had the following results on eight of the primary federal measures for the quarter ended December 31, 2021 (most recent performance period results available at time of publication):

Measure: Federal Standard: Job Service Performance:

Payment of Intrastate Claims Timely 87% Timely 90.63%

Non-Monetary Determinations Completed Timely 80% Timely 72.77%

Quality of Non-Separation Eligibility Determinations 75% Exceed Quality 97.41%

Quality of Separation Eligibility Determinations 75% Exceed Quality 96.65%

Appeals Case Aging 60% in 30 Days or Less 36.89%

Appeals Quality 80% Quality 97.5%

Timely New Employer Status Determinations 70% Timely 81.9%

Tax Program Quality Pass/Fail Pass

Job Service strives for excellence in program administration and customer service. As noted earlier, Job Service has been a nationwide leader and has excelled in almost all aspects of measured UI performance. At the same time, Job Service continues to perform well and will always strive for excellence.

Benefits Unit – Although stabilized, the workload in the benefits unit has increased significantly over the last decade, while staffing has declined. Economic factors and a changing worker demographic first experienced during increased oil activity appear to be drivers in some of this workload. While North Dakota’s unemployment rate remains low, we continue to see many claims for benefits from out-of-state claimants.

While claims for UI benefits remain high, the claim duration within North Dakota remains one of the lowest in the nation at approximately 12 weeks. This short duration indicates that claimants are returning to work fairly quickly.

Tax Unit – The primary workload increase within the UI Tax unit results from the increased number of status determinations that must be performed. The status determination function directly correlates with the number of employers establishing businesses within North Dakota and the number of existing businesses changing ownership.

The number of new North Dakota businesses has stabilized at a reasonably high level. These new businesses must complete a Registration for Unemployment Insurance Tax form. Tax staff receives and reviews the forms, follows up with employers for further information, and determines the businesses’ liability accordingly.

The increase in employer numbers causes significant data input and administrative processing. The volume of wage credits and other correspondence that must be processed also increases with the increased number of new businesses. During 2017 legislation, North Dakota Century Code 52-04-01.1 was amended and reenacted to require all liable employers electronically file Employer’s Contribution and Wage Reports quarterly, minimizing data entry and error correction on the part of Job Service staff.

Appeals Unit – The Appeals unit has processed a significantly increased number of appeals over the last several years, which is not surprising given the increased number of claims received. However, we have reached a saturation po

Program Statistical Data

Unemployment Insurance Program:

Covered Employers 26,494

UI Tax Collected \$60,030,799

Initial Claims Filed 43,242

Monetary Determinations Issued 31,977

Non-Monetary Determinations Issued 26,804

Appeal Decisions 8,542

Weeks Claimed 258,872

Benefits Paid \$104,890,080

Average Actual Duration BYE 7-2020 to 6-2021 12.36

*CY 2021 data

The maximum Weekly Benefit Amount (WBA) for which claimants may be eligible is adjusted each July, and is based upon average wages paid in North Dakota. For illustrative purposes, three WBAs are provided:

Time Period Maximum WBA

July 2020 through June 2021 \$640

July 2021 through June 2022 \$657

July 2022 through June 2023 \$673

Explanation of Program Costs

Unemployment Insurance Program:

The costs included in the budget request support the administration of the Unemployment Insurance program. NOTE: Because benefits are paid from a trust fund held by the federal government, the amounts estimated to be paid in benefits are not appropriated biennially. North Dakota Century Code Section 52-03-04 makes these funds available for payment of benefits only and without an appropriation. The remainder of the budget encompasses the administration of the Social Security responsibilities under North Dakota Century Code Ch. 52-10, dealing with the status of public employees with respect to Social Security coverage.

Workforce Programs:

The costs included in the budget request support the administration of Workforce Programs.

Labor Market Information Center:

The budget request includes the continuation of the present Labor Market Information Center at Job Service North Dakota.

Program Goals and Objectives

Unemployment Insurance Program:

1. Administer the UI program to provide temporary income replacement for workers who are unemployed through no fault of their own.
2. Collect employers' unemployment insurance taxes to fund North Dakota's Unemployment Insurance Trust Fund.

3. Pay unemployment insurance benefits to eligible workers consistent with state and federal law.
4. Administer Social Security coverage option statutes (North Dakota Century Code Ch. 52-10) for state and local governmental units. Required action most commonly occurs with school district consolidation or the extension of Social Security coverage to groups of government employees not previously covered.
5. Serve as the USDOL liaison for the required Management Information System reporting and maintenance used for performance management and statistical data requirements.

Workforce Programs:

1. Serve as a lead agency by providing a gateway for employers and job seekers into the state's One-Stop/Workforce Development Service System.
2. Support Job Service North Dakota workforce centers as they help youth and adults enter the labor force and improve their occupational and educational skills. The goal is to improve customers' long-term employment earnings and reduce dependency on economic assistance programs.
3. Develop, test, and maintain the Management Information Systems used by the Job Service workforce centers for program services. These services include initial job training, retraining, upgrade training, and employability for eligible participants. Classroom job-skill training and on-the-job training components are used to achieve the objectives outlined for job training programs. Training funds are aimed toward in-demand occupations in North Dakota.
4. Serve as the USDOL liaison for the required performance outcomes and reporting data extracted from the case management module of the Management Information System and Self-Service Labor Exchange System used for performance management and statistical data requirements.
5. Connect job seekers to statewide job openings on jobsnd.com. The Online Job Openings Report from June 2022 indicates a total of 18,113 open and available online job openings in June 2022, a change of -6.6 percent (-1,283) from the prior month and +0.5 percent (+96) from the same month one year ago. Newer job openings, those posted within the last 30 days, accounted for 65.7 percent of all job openings. Of those openings with a typical entry-level education assignment, 51.0 percent required either a high school diploma or equivalent or no educational credential. North Dakota had a total of 1,864 active résumés in June 2022, a change of -6.7 percent (-134) from the prior month and -82.7 percent (-8,896) from the same month one year ago. Active résumés consist of those posted or updated within the last 90 days. There were a total of 1,714 in-state active résumés and 150 out-of-state active résumés. In-state active résumés accounted for 92.0 percent of all active résumés while the remaining were from out of state. The employment status of active résumé candidates is also tracked. Of all active résumés, 70.7 percent indicated they are currently not working.

The remaining job openings required some sort of postsecondary education or credential. Job Service staff work diligently to connect the supply of job seekers to the job openings in demand.

6. Provide the resources necessary for Job Service workforce centers to assist job seekers with job search assistance, job opening referrals, career guidance, and skill assessment.
7. Provide the tools necessary for Job Service staff to help businesses recruit employees, meet affirmative action goals, process requests for foreign workers, and sustain and grow their local economies.

Labor Market Information Center:

380 Job Service

Agency 380

1. Provide up-to-date labor market information allowing customers to make more informed decisions.
2. Create new products to emphasize the labor market information that is available and how it can be used to our customers' benefit.
3. Support of Workforce Information Grant via activities performed by, and products created by, the LMI Center. Items of note include strengthening of our relationship with Education and Economic Development partners as well as other state agencies; connection of workforce and education data; outreach and presentation activities performed by LMI analysts for various audiences including policy makers, trade associations, civic groups, and business leaders, among many others.
4. Successful administration of the Workforce Information Grant from the Bureau of Labor Statistics (BLS). This Grant requires that specific deliverables be met on an annual basis.
5. Successful administration of Cooperative Agreement grants from the Bureau of Labor Statistics (BLS). The LMI Center administers four BLS program grants creating labor market data for the state. Each grant contains specific criteria regarding deliverables, accuracy, and adheren

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Unemployment Insurance program is 100% federally funded. Federal funding is based off of congressional budgets and United States Department of Labor (USDOL) allocations grounded upon Administration priorities. With congress continuing to fund government operations via continuing resolutions (CR), UI administrative funding has remained for the most part flat over the last decade or longer. The lack of adjustments in federal funding do not support state-level program increases, such as legislative wage adjustments, IT cost increases, and inflationary costs to operating expenses. As funding remains flat, the gap between inflation (actual costs to agency) and actual funding received grows. In FY21, the gap is \$1.2M for the year.

Since 2001, technology improvements and the decrease in funding for our programs has resulted in a reduction of 215 regular full-time employees. We are currently authorized for 156.61 FTE and we supplement our staff with temporary positions. JSND has had to shrink staffing and the statewide office footprint. This downsizing has come while the ND population has grown by over 106K, and the number of employers has grown by 7,716 in the last decade. This significant decrease has resulted in a limited capacity to serve the citizens of the state.

A survey was conducted by the National Association of Workforce Agencies (NASWA) in 2019 showing that 30 states provide supplemental funding in the form of an administrative tax/fee of \$224,411,407 in total. Over 20 states receive general fund allocations from their state legislatures totaling \$16,232,189 while another 20 states receive funding from other sources totaling \$162,756,268. North Dakota typically compares itself to states around us including Montana, South Dakota, and Wyoming. All of these states receive supplemental funding as follows:

SD

- Investment Fee 0% to 0.53%
- Administrative Fee 0.2%
- General Funds \$2,312,767

MT

- Administrative Fund Tax 0.13% to 0.18%, \$20M (approximately)
- General Funds \$2,032,144

WY

- Employment Support Fund Factor 40% of total benefits paid but not charged
- General Funds \$9,202,285

Necessary resources for implementation (including FTE's)*: Job Service is requesting \$3 million of additional general fund resources to support administering the UI program to cover inflationary costs.

Are resources being redirected or are they new or additional (including FTE's)*: This would be additional funding resources.

Who is served and impact of not funding*: Program performance is at risk, negatively impacting citizens. Risks include delayed Unemployment Insurance eligibility determinations and benefit payments, technology failures & downtime, long waits to speak with staff members. Additionally, ongoing technology costs for new systems actually exceed our total yearly operating grant. This is critical as it limits technology options and prevents innovative, customer desired service options.

380 Job Service

Agency 380

Job Placement Pilot Program (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	640,000	-	640,000	0.00	640,000	-	640,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	640,000	-	640,000	0.00	640,000	-	640,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: This Job Placement Pilot Program is an initiative approved and recommended by the Workforce Development Council. The main objective of this program is to connect recently or soon-to-be released ex-offenders with in-demand positions within North Dakota.

Necessary resources for implementation (including FTE's)*: This is a collaborative effort between Job Service North Dakota (JSND), the Department of Corrections and Rehabilitation (DOCR), and the F5 project. JSND would hire temporary Employment Advisors, one in Fargo and one in Bismarck, to be housed within our workforce centers. These two temporary employees would work directly with DOCR Case Managers and F5 Project representatives to identify employers and participants, and to ensure a successful transition to employment.

Are resources being redirected or are they new or additional (including FTE's)*: This program is supplemental to the existing services provided by JSND through the Federal Workforce Innovation and Opportunity Act by serving a minimum of 75 participants per year in both Fargo and Bismarck. JSND will work in partnership with the Department of Human Services and other agencies to provide wrap-around services to include other supportive programs, as well as other basic needs to include housing, transportation, tools, work clothing, and equipment that are not otherwise paid for by federal funding.

Who is served and impact of not funding*: Ex-Offenders were identified by the WDC as a population who experience barriers to entering the workforce, including the life-long impact of a criminal conviction on their record. As of 2020, North Dakota averages 1,600 prisoner releases each year. Almost half of these individuals move back to Bismarck and Fargo once released. Without a steady paycheck allowing for basic needs to be met, such as housing and food, many ex-offenders return to the prisons as indicated by ND's recidivism rate of 40.3% in 2020.

Ex-offenders are a target group to fill in-demand positions in skilled trades, transportation, IT, and a wide variety of other industries. Without tapping into this labor pool and preparing ex-offenders for the workforce, employers will continue to have difficulty filling in-demand positions.

380 Job Service

Agency 380

H2A Agricultural Program (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	627,848	-	627,848	3.00	484,310	-	484,310	2.00
Special	-	-	-	0.00	-	-	-	0.00
Total	627,848	-	627,848	3.00	484,310	-	484,310	2.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Since 2007, JSND has been administering the H2A Foreign Labor Certification Program. This program provides assistance to agricultural employers who have a shortage of domestic workers. The program brings non-immigrant foreign workers to the U.S. to perform agricultural labor on a temporary or seasonal basis. Worker housing provided by the employer receives a quality inspection by JSND as outlined by the US Department of Labor.

The program has grown exponentially from processing 219 H2A applications in 2007 to 846 in 2022, and conducting 203 housing inspections in 2007 to 1,946 in 2022 [See Graph 1].

Over the last 3 years, JSND has facilitated the placement and subsequent housing inspections of thousands of seasonal workers to help agricultural employers during the busy seasons. In the 2022 program year alone, JSND has facilitated the placement and housing inspections of 2,796 workers. [See Table 1]

To conduct these housing inspections, JSND employees must travel from a Workforce Center Location resulting in over 33,500 miles driven in the last year to conduct the 1,946 inspections. [See Table 2]

The current staffing hours and time to travel to locations is unsustainable for the long-term. To continue to support North Dakota’s agricultural employers through administration of the H2A program, there is a need to supplement the current funding to provide more efficient services within the North-Central, Central, and South-Central regions of the state which represent over half of the housing inspection locations. This includes the cities of Minot, Devils Lake, Jamestown, and Bismarck.

Necessary resources for implementation (including FTE’s)*: This supplemental support would require three Full-Time employees to travel to farm and ranch locations to have continued dialogue with the Ag producers about housing needs, employer rights, and foreign worker rights. The employees would also conduct housing inspections per the Department of Labor requirements and provide a report of needed improvements and follow up. During the off-season months of July-September, the employees would provide rural outreach to smaller communities to bring awareness and education about the program, along with training opportunities and other skill-building resources to align individuals with needed services and to remove barriers to employment.

Are resources being redirected or are they new or additional (including FTE’s)*: This would be additional funding resources and three additional FTE’s.

380 Job Service

Agency 380

Who is served and impact of not funding*: North Dakota boasts a large land mass with remote farming communities and H2A workers are vital to these communities. Without additional funding, other workforce services will be reduced due to the time and staffing needed to conduct the required housing inspections.

CTE Pilot Program (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	170,000	-	170,000	0.00	390,000	-	390,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	170,000	-	170,000	0.00	390,000	-	390,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Ground was recently broken on the new Bakken Skills Center. School and city officials requested a partnership with JSND to have a workforce presence within the facility to help facilitate workforce needs such as job searching, resume preparation, interview skills training, career exploration, program awareness, and regional outreach. JSND believes this partnership is essential to connecting students to job openings and helping individuals navigate career pathways available within North Dakota.

An additional CTE site on the eastern side of the state will be chosen to provide job placement services.

Necessary resources for implementation (including FTE's)*: The funding request is for a pilot project to provide an on-site full-time temporary employee to provide these services to start in the fall of 2023 when the Bakken Skills Center opens and at a CTE site in eastern North Dakota. These positions are critical to working with citizens in rural areas in which Job Service ND does not currently have a presence to further align our communities, workforce and schools and leverage the momentum of the CTE curriculum and career exploration.

Are resources being redirected or are they new or additional (including FTE's)*: This would be additional funding resources.

Who is served and impact of not funding*: This presence would contribute to the overall wellbeing of the current and future workforce by providing services essential to job seekers and employers.

Virtual Job Fairs (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
General	300,000	-	300,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	300,000	-	300,000	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: On May 19th, 2022, JSND hosted the first nationwide virtual job fair. This job fair hosted 160 North Dakota employers with job seekers attending from 20 different states and 5 different countries. With the continued workforce shortage in North Dakota, seeking out-of-state job seekers to fill positions within ND is critical to helping employers fill openings.

This request is to have the necessary funding to promote two events per year during the next biennium and will allow for frequent and targeted marketing efforts. These efforts are key to focusing on target markets to bring a wider spread of job seekers to the event to meet with ND employers. Data analytics from our website will be used to determine the direction for market promotion and awareness.

Necessary resources for implementation (including FTE's)*: No additional resources including FTE's will be needed for implementation of this project.

Are resources being redirected or are they new or additional (including FTE's)*: This would be additional funding resources.

Who is served and impact of not funding*: North Dakota has a high labor participation rate, but we lack the workforce to fill the more than 30K jobs open in the state. This presents an opportunity to extend the reach of our advertising to individuals to attend the virtual job fair. This extended reach will allow employers to promote job opportunities to a wider audience.

Large IT Project Summary

Priority	Form Name	2023-25 Agency Request					2023-25 Executive Recommendation				
		General Fund	Federal Funds	Special Funds	Total	FTE	General Fund	Federal Funds	Special Funds	Total	FTE

Special	-	-	-	0.00	-	45,000,000	45,000,000	0.00
Total	-	60,000,000	60,000,000	0.00	-	45,000,000	45,000,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Job Service is requesting \$80 million in general funds over two biennia to support the modernization of the mainframe-based Unemployment Insurance technology system. Technology modernization has been a priority of Job Service for many years. While attempts have been made to modernize in the past, barriers to success have held back any completion. As time passes, the technology ages further, and those trained to work on the platform retire, our options for remaining on this platform continue to shrink.

The 40+ year old mainframe-based system has served us well over the years, but we are now at a high risk of catastrophic failure. The age and platform of the system limit our ability to hire individuals and vendors to support and do development on the system. As a result, changes to the Unemployment Insurance program, whether due to state or federal law, are extremely difficult to implement and create substantial risk. As important, should a technology failure arise, extended down times could occur and result in the inability to serve the employers and workers of North Dakota.

The federal government has shifted away from funding individual state modernizations. They have chosen to begin building components specifically focused on Administration priorities such as accessibility, fraud prevention, and timely payment of UI benefits. They hope that states can utilize these modules within their individual systems and modernization projects, putting most of the burden on the states. As a result of this, other federal funds are not available to fund this project. Many states have moved to a state-funded modernization format through general fund appropriations and additional employer contributions. We have resisted requesting this type of funding up to this point, but without further federal funding, we will be required to look for other sources from the state or the state’s employers.

Necessary resources for implementation (including FTE’s)*: Costs to migrate states to a new system nationally have run from \$50 to \$150 million. Based upon our research, we believe that we can accomplish our modernization for \$80 million. This includes \$70 million for the project vendor to work on the project for 24-36 months and \$10 million for Job Service subject matter experts and NDIT project staff to assist the vendor with requirements and development.

Are resources being redirected or are they new or additional (including FTE’s)*: This would be additional funding resources.

Who is served and impact of not funding*: There are multiple failure points with the 40+ year-old technology. It is not industry standard, and the outdated technology has limited capability for interfaces, business intelligence and modern web tools requiring external systems for functionality. With the loss of 28 UI and IT staff over the past 17 years, the state only has two (2) UI programmers, both who are, or will be, within the next year, eligible for retirement. It takes multiple years to gain

380 Job Service

Agency 380

system knowledge and expertise and there is currently no training available for the system itself. Additionally, the unsustainable decline of federal funding requires a supported and affordable system. Lack of funding will have a significant impact to North Dakota should the system fail. In a normal year, there are approximately 20,000 claimants per year. The system also supports 26,000 employers. The inability to collect payments from employers and pay claimants may have an impact to the economic conditions of the state of upwards of \$80M and potentially result in an outmigration of the workforce.

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Replace existing application? Yes

Upgrade existing application? No

Development of new application? No

Anticipated Benefits:* IMPROVED CUSTOMER EXPERIENCE

- Mobile application
- Online payments
- Online employer entries
- Extended hours of services
- Additional language capability
- Interactive customer correspondence
- Interfaces for integration to other systems
- Linkage to other state entities

LEVERAGE REAL-TIME DATA WITH BUSINESS INTELLIGENCE

- Timely, critical workforce data allowing for improved decision making
- In-depth data analysis and reporting
- Enhanced flexibility for ad-hoc reporting
- Addition of dashboards

SUSTAINABLE TECHNOLOGY PLATFORM

- Availability of IT resources to support and maintain the system
- Elimination of proprietary system reduces technical debt
- Industry-standard technologies
- Improved training and succession planning

ARCHITECTURAL DESIGN TO IMPROVE CAPABILITY & SECURITY

- Integrated identity verification for improved security
- Improved maintenance and interfacing with standard technology
- Elimination of external systems
- Scalability at multiple system levels
- Provides system documentation, easing support and maintenance

CONFIGURATION FRAMEWORK TO SUPPORT CHANGE

- Faster production time for changes
- Less reliance on programming staff
- Robotic Process Automation (RPA) creates efficiencies

Project Risk:* Vendor specific 40-year-old technology

- Not industry standard; not widely used
- No formal training available for new programmers; requires primarily off-shore contractors due to limited trained USA staff

Outdated database technology

- Limited capability for interfaces, business intelligence, and modern web tools

380 Job Service

Agency 380

External systems required for functionality

- Creates support complications
- Prevents data sharing with other agencies needing data

Key staff losses

- Loss of 28 UI and IT staff over 17 years leaving only 2 UI programmers

who do programming/analysis and manage contract programmers

- One is retirement eligible now and the other within 1.5 years
- Multiple years needed to gain system knowledge and expertise
- Further loss of staff would be devastating, negatively impacting system

operation

Long-term decline in federal funding requires sustainable, affordable system

now

- Technology spend will continue to grow as technology ages

Issue/Solution:* Risk and need have been recognized and discussed for years. Multiple attempts at modernization through federally funded state consortiums have occurred, but lack of resources and competing priorities to meet each state's needs have prevented success. A breaking point has now been reached!

Statutory Authority

Title 26.1

Agency Description

The North Dakota Insurance Department oversees the insurance marketplace that exists within the state of North Dakota. Established in 1889, the department serves the public by providing education, regulation, and enforcement of insurance laws and policies. North Dakota is part of the U.S. insurance regulatory framework that is designed to promote fairness and protect consumers in the complexity of the U.S. insurance marketplace. As a member of the National Association of Insurance Commissioners (NAIC), North Dakota joins a coalition of state regulatory agencies to help establish standards and best practices, coordinate regulatory oversight, and conduct peer reviews.

The department consists of six divisions that include assisting consumers in navigating the marketplace, investing insurance fraud, and monitors the financial strength of insurance companies operating in North Dakota. Over 30 full-time team members, led by the Insurance Commissioner, work to execute the mission and goals of the department and uphold the laws governing insurance.

Agency Mission Statement

Safeguarding the promises made to North Dakotans and fostering a fair and thriving marketplace to meet the needs of our consumers and evolving insurance industry.

Major Accomplishments

-
- 1 Reauthorized RAND with HB 1087. This helped stabilize health insurance premiums on the individual market. This past June 2022, RAND distributed 21 million in claim payments to health insurance companies. This saved 21 million dollars from being passed along to consumers.

 - 2 Fraud Civil Penalty implementation and Civil Fraud prosecution. This program addressed misdemeanor level insurance fraud. Previously the Department was not able to adequately address these crimes. This has lead to \$1,350 in civil penalties as of 6/30/2022 which were turned over to the general fund. It is our hope this program continues to build and we can continue to expose the crime of insurance fraud.

 - 3 Office remodel for teleworking and more effective use of space. The Department was able to condense two offices into our main 5th floor office which resulted in less rent and canceled leases. This remodel allowed us to restructure the space to accommodate full-time in-person staff and teleworking staff on a part-time basis.

 - 4 Reorganization of product line function instead of service within the department created efficiencies. For the Life and Health team, L/H, and the Property and Casualty team, P/C, this has helped to have more expertise in the same Department. Internally it was a smart move but externally serving our consumers we have been able to be more timely with responses.

Critical Issues

-
- 1 Recruitment and Retention of employees. Mainly salary. We are constantly reminded from a national level that our salaries are behind for our staff members. As this impacts all state agencies, we are faced with teleworking poachers approaching our experienced staff with higher salaries while remaining geographically neutral.

Critical Issues

- 2 Unification efforts. With continued pressure on the IT Unification front, we have seen benefits and downfalls to this process. We remain open to the idea however our critical issue lies with the rising costs to not unify as well as the unknown high cost to unify. From the HR side of unifications, our Department feels at this time it is not the best fit.
-

Performance Measures

In the State of North Dakota, we have a healthy and competitive insurance market due to our regulatory efforts and we maintain our NAIC Accreditation.

Program Statistical Data

Please see the most up to date Biennial Report linked here: <https://www.insurance.nd.gov/sites/www/files/documents/Communications/Reports/Biennial/2021%20Biennial%20Report.pdf>

Or under our website at [insurance.nd.gov](https://www.insurance.nd.gov)

Explanation of Program Costs

The North Dakota Insurance Department is a state agency with the primary role of regulating the insurance industry in the State of North Dakota. Additionally, the department provides consumer protection and assistance services to help consumers navigate the coverage and benefits within their insurance policies.

Program Goals and Objectives

Consumer Protection & Assistance

The Department is a team of dedicated public servants who are experienced in the ins and outs of insurance. Did you submit an auto claim and it was rejected? Was part of a medical procedure not covered by insurance? No question is a bad question in our book. Our team stands by to assist you with your insurance questions and issues.

If you believe you were wronged or treated unfairly by an insurance company, the Department facilitates and handles complaints against insurance companies in North Dakota.

The Department also assists consumers with Medicare through the State Health Insurance Counseling (SHIC) program. This service assists North Dakotans in understanding choices, enrolling, comparing plans, and submitting appeals while providing unbiased and confidential support. Additionally, the Department offers Prescription Connection to connect citizens with prescription medication that would otherwise be unattainable.

Fraud Investigations

Committing insurance fraud is a crime and is one of the most profitable crimes in the United States. The North Dakota Insurance Department receives fraud tips and inquiries from the public and investigates any wrongdoing to determine if fraud was committed.

Our team investigates fraud claims, recommends charges, and may prosecute alleged fraud. The public is encouraged to report any fraud within North Dakota to the Department.

Agent & Company Licensing

Before an individual or company can market and sell insurance in the State of North Dakota, they need to become licensed through the Department. In order to do this, applicants will be reviewed and must pass all applicable examinations before they are permitted to sell insurance in the State.

Financial Surveillance & Market Conduct

It's common knowledge that companies need to have enough money in order to stay afloat. That couldn't be more true for insurance companies. The Department collects and analyzes the financial data of insurance companies to ensure that there is enough money to pay claims.

The Department also performs market conduct examinations to protect the public's trust in the insurance marketplace. The examinations review a company's conduct and how consumers were treated. This includes assessing a company's complaints, claims processing, agent licensing, and adherence to state and federal laws.

Rates & Policies

The rates you pay and the specific benefits you receive through your insurance all pass through the Department. Our team analyzes the rates that consumers pay and what benefits are associated with each policy to ensure it complies with laws and regulations, as well as the viability of what is being promised.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We have requested the following items as they are above our limit letter. They include:

For travel, since travel is becoming more available we have had the ability to network and attend conferences for professional development. Additionally, airfare & lodging has significantly increased.

For rent, we hope to acquire the entire 5th floor, however overall our rent has decreased.

For IT Data Processing, we have additional program developments such as a blockchain application and a new rebating reporting system that has been budgeted.

For professional development, since travel is becoming more available we have had the ability to network and attend conferences for professional development. Additionally, we have staff who are required due to accreditation standards to keep up with their credentials.

For Operating fees and services we did increase our marketing campaigns, and fingerprinting for volunteers as a requirement from the federal government.

401 Insurance

Agency 401

Professional Fees and Services there was a large increase due to unexpected costs in this current biennium for legal fees that we felt we needed to be prepared for in the future.

These are some of the highlights.

Necessary resources for implementation (including FTE's)*: Requesting additional appropriation authority out of fund 239. We do not need any additional FTEs to carry out our programs, however, we are seeing inflation in the respected areas mentioned. We are also investing in our staff with more professional development which helps with retention as well as helps us maintain our accreditation with the National Association of Commissioners (NAIC).

Are resources being redirected or are they new or additional (including FTE's)*: Additional

Who is served and impact of not funding*: N/A

Total	-	119,000	119,000	0.00	-	98,300	98,300	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In the next biennium, we could potentially face five retirements of staff who have been with our Department. Some of those individuals have been with the Department for 30 years. This retirement package is to cover annual and sick leave payouts where applicable.

Necessary resources for implementation (including FTE's)*: Requesting additional appropriation authority out of fund 239. We have individuals who have not necessarily committed to retirement however because this can be foreseen we cannot go to the Emergency Commission to request these funds during the 2023-2025 biennium.

Are resources being redirected or are they new or additional (including FTE's)*: They are additional. In the past we have been able to redirect salary and fringe dollars to cover exits, however with a fully staffed Department, there will not be excess salary dollars.

Who is served and impact of not funding*: N/A

Office Remodel (Priority: 03)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Office Remodel	239	401-6000	40150	-	-	75,000	-	75,000	-	75,000
Total				-	-	\$75,000	-	\$75,000	-	\$75,000

Explanation / Justification: It is our hope to acquire the entire 5th floor which we currently share with the Securities Department. This will require remodeling to adequately fit our staff. This could include a new main entrance, reworking various office spaces, removing 2 walls to allow free movement around the tower, and IT and telecom-related expenditures.

At this time we do not have an estimate but have had conversations with a company on getting an estimate. We are basing our request on what was appropriated to us last session.

Agency Description

The Industrial Commission (IC or Commission) budget is comprised of three agencies including the Administrative Office, the Public Finance Authority (PFA), and the Department of Mineral Resources (DMR), which includes the Oil and Gas Division (OGD) and the Geological Survey (GS).

The Administrative Office coordinates the Commission's oversight of the agencies or entities that report to the IC. The office is the contracting office for the Lignite, Oil and Gas, and Renewable Energy Research Programs and the Outdoor Heritage Fund. The office also administers the contracts for the Pipeline Authority. The Transmission Authority is administered through a contract under the Lignite Research Program. The Administrative Office also provides the oversight on the disbursement of revenues from the Western Area Water Supply Authority industrial sales. This office has in the past been the primary contact for the Building Authority and the Student Loan Trust. These responsibilities are in the process of being assigned to the Public Finance Authority.

The DMR is the primary source of information regarding the mineral resources of ND and is responsible for regulating all facets of petroleum production through enforcement of statutes, rules and regulations of the IC with regards to geophysical exploration, carbon dioxide and gas storage, permitting of wells, establishing well spacing for producing reservoirs, inspection of facilities, approving enhanced oil recovery operations, ensuring proper plugging and site reclamation of all wells, and conducting hearings on oil and gas matters in a manner that will be most beneficial to the producer, royalty owner and all citizens of the state. The DMR maintains the state's core and sample library in Grand Forks, coordinates the State Fossil and State Mineral Collection, and disseminates geological information via the internet, maps, publications, presentations, tours and field trips. The DMR has statutory regulatory responsibilities for subsurface minerals, underground fluid injection, carbon dioxide and gas underground storage, oil well cores and drilling samples, coal exploration drilling, geothermal, paleontological resources, high-level radioactive waste, and underground storage and retrieval of nonhydrocarbons. The DMR determines the geologic suitability of all proposed landfills, reviews the geology and paleontology of a variety of highway improvement projects as well as pipeline and transmission line corridors, reviews the paleontology on Trust Land tracts, and coordinates the State Fossil and State Mineral collections.

The PFA provides market and below market loans to political subdivisions through the purchase and holding of eligible securities and provides financial services in connection with the administration and management of the State Revolving Fund Program as the financial agent for the State Department of Environmental Quality. Beginning in 2011, the PFA offered disaster loan assistance to political subdivisions through its Capital Finance Program. The Executive Director is an authorized officer for the Building Authority, and the Student Loan Trust and North Dakota Transmission Authority. The NDPFA Executive Director is in the process of learning and assuming the administrative roles.

Agency Mission Statement

- Through the Administrative Office, serve as the central contact for the activities and programs overseen by the North Dakota Industrial Commission and serve as secretary for the Commission.
- Through the Administrative Office (which serves as the contracting officer for the Oil and Gas Research Fund), facilitate the operations of the Oil and Gas Research Program which has the mission to promote the growth of the oil and gas industry through research and education.

- Through the Administrative Office (which serves as the contracting officer for the Lignite Research, Development, Education and Marketing Program), promote economic, efficient and clean uses of lignite and products derived from lignite in order to maintain and enhance development of North Dakota lignite and its products; preserve and create jobs involved in the production and utilization of North Dakota lignite; ensure economic stability, growth and opportunity in the lignite industry; and maintain a stable and competitive tax base for our state's lignite industry for the general welfare of North Dakota. The development of North Dakota's lignite resources must be conducted in an environmentally sound manner that protects our state's air, water and soil resources as specified by applicable federal and state law.
- Through the Transmission Authority (activities coordinated by the Administrative Office and the Lignite Energy Council) with funding made available from the Lignite Research Program, assist with the removal of electrical transmission export constraints and assist with the upgrading and expansion of the region's electrical transmission grid to provide reliable electricity to our citizens and industries and for export to the regions' consumers.
- Through the Administrative Office and the Public Finance Authority acting as the North Dakota Building Authority, access the national capital markets for low-cost financing of capital projects approved by the Legislature.
- Through the Pipeline Authority (activities assisted by the Administrative Office and the Department of Mineral Resources), facilitate development of pipeline facilities to support the production, transportation, and utilization of North Dakota energy-related commodities.
- Through the Administrative Office with assistance from the Department of Commerce, facilitate the operations of the Renewable Energy Development Program which has the mission to promote the growth of North Dakota's renewable energy industries through research, development and education.
- Through the Administrative Office and Public Finance Authority as the authorized officer for the North Dakota Student Loan Trust, oversee funds held in the Student Loan Trust and provide funds, in coordination with the North Dakota Student Loan Guarantee Agency, to enhance student loans administered by the Bank of North Dakota.
- Through the Administrative Office facilitate the operations of the Outdoor Heritage Fund which has the mission to provide access to private and public lands for sportsmen, create fish and wildlife habitats, support stewardship for farming and ranching, enhance water quality, plant diversity, soil conditions and conserve natural areas for recreation through the establishment and development of parks and other recreation areas.
- Through the Administrative Office provide oversight of the disbursement from the Western Area Water Supply Authority industrial sales revenues.
- Through the Department of Mineral Resources Oil and Gas Division, encourage and promote the development, production and utilization of oil and gas in the state in such a manner as will prevent waste, maximize economic recovery, assure that appropriate drilling and plugging operations are utilized that prevent the pollution of freshwater supplies by oil, gas, or saltwater and prevent blowouts, and fully protect the correlative rights of all owners to the end that the landowners, the royalty owners, the producers, and the general public realize the greatest possible good from these vital natural resources.
- Through the Department of Mineral Resources Geological Survey, investigate and report the geology of North Dakota emphasizing the state's energy resources and stressing applied research, public service, dissemination of information, advisory work and regulatory duties leading to the economic benefits or quality of life improvements for residents of the state, industry and other state, federal and local government agencies.
- Through the Department of Mineral Resources Geological Survey, maintaining the valuable oil and gas cores and samples at the core library and manage the State's Fossil Collection and Rock and Mineral Collection at the North Dakota State Museum for the benefit of the State's citizens.

- Through the Public Finance Authority, assist with the development of rural and urban North Dakota by providing political subdivisions and other qualifying entities access to flexible and competitive financing option for their local qualifying projects.
- Through the Public Finance Authority, assist small issue manufacturers in obtaining loans through tax-exempt financing.
- Through the Administrative Office and the Public Finance Authority acting as the North Dakota Building Authority, access the national capital markets for low-cost financing of capital projects approved by the Legislature.
- Through the Public Finance Authority, provides financial services in connection with the administration and management of the State Revolving Fund Program as the financial agent for the State Department of Environmental Quality.
- Through the Public Finance Authority, issues and manages the Legacy Fund Infrastructure Program Bonds.
- Through the Public Finance Authority as an authorized officer, assists the North Dakota Transmission Authority with bond issuance and accounting.

Major Accomplishments

-
- 1 Oil & Gas: During Fiscal Year 2022 (July 1, 2021 - June 30, 2022), the Oil & Gas Division issued 656 well permits, heard 598 cases, wrote orders disposing of the cases, and permitted 8 seismic projects, due to oil and gas production and activity. Also, the Oil and Gas Division continues to enhance royalty owner access to well information and hearings.

 - 2 Geological Survey: During Fiscal Year 2020 (July 1, 2019 - June 30, 2020), the Geological Survey: published 476 articles, maps, and reports and gave 52 presentations (13 of which were virtual) on various aspects of North Dakota geology. The vast majority of publications were landslide maps. In addition, the Survey published more than 600 quadrangle maps. Article, map, and report topics included landslides in North Dakota, oil potential interpreted from drill stem tests in most of the oil producing formations, Three Forks and Birdbear stratigraphy, the helium potential in North Dakota, the critical mineral (including rare earth element) concentrations in North Dakota lignites, North Dakota's potash resources, windblown sand potential for oil industry proppant, surface geology, and the geological uses of drones.

 - 3 Geological Survey: Geological Survey paleontologists installed a new fossil exhibit in Icelandic State Park, oversaw a nearly completed renovation of the Dakota hadrosaur exhibit at the North Dakota State Museum (installation delayed due to covid19), managed five public fossil digs, published a report on mosasaurs in North Dakota, and created a virtual fossil lecture series that filled the science gap created when schools suddenly dismissed last spring due to covid19 and before they started back up for on-line classroom instruction.

 - 4 Geological Survey: Geological Survey created a two-session, two-day-long core workshop in the core library and gave four technical talks on the Tyler, Spearfish, Bakken, Three Forks, and Birdbear Formations at the Rocky Mountain Sectional meeting of the American Association of Petroleum Geologists. The Survey also generated a series of shallow salt maps for potential gas storage in western North Dakota.

 - 5 Geological Survey: Geological Survey answered more than 962 enquiries, issued geothermal, coal exploration, and subsurface mineral permits for 447 test holes; reviewed the geologic suitability of 181 infrastructure projects (roads, bridges, pipelines, transmission lines, and wind farms), reviewed three solid waste disposal permit applications, five coal mine permits and evaluated the paleontology on 1,043 Trust Land tracts.

 - 6 Geological Survey: Geological Survey amended the rules for two regulatory programs (in situ leach uranium mining and geothermal energy production) and created two new articles (deep geothermal energy production and high-level radioactive waste). The rule-making process is complete except for an upcoming meeting in September with the Administrative Rules Committee.

 - 7 Oil & Gas: The NDIC approved two carbon dioxide storage facilities during fiscal year 2022 and expect several more from future applicants of Class VI programs during the 2021-2023 biennium. Many applications for carbon dioxide storage are expected to be submitted during the 2023-2025 biennium.

Major Accomplishments

-
- 8 Public Finance Authority: 8. The North Dakota Building Authority (NDBA) issued bonds to fund the \$110,000,000 of North Dakota University System projects authorized by the 2019 Legislature.
-
- 9 Administration: The Pipeline Authority Director provided ongoing information on current pipeline activities through reports, monthly webinars and numerous presentations.
-
- 10 Administration: The Pipeline Authority Director developed forecast models to better understand the production potential and required transportation infrastructure for natural gas liquids. This information was utilized by industry in developing the industry's plans for expanding natural gas processing in the state.
-
- 11 Administration: The Pipeline Authority Director continued to update models regarding the production and required transportation infrastructure for oil. This information is used by policymakers for revenue forecasting and by industry to assist with infrastructure planning and development.
-
- 12 Oil & Gas: Assisted the Attorney General's Office with litigation against the Bureau of Land Management (BLM) Flaring and Venting Rule, BLM Hydraulic Fracturing Rule, Bureau of Land Management oil and gas leasing suspension, EPA changes to the Clean Air Act, ND cooperating agency with USACOE on DAPL permit, Pore Space, and Ordinary High Water Mark.
-
- 13 Oil & Gas: The Division made application to the U.S. Department of Interior to receive up to \$25 million out of the Infrastructure Investment and Jobs Act (IIJA) made available by the United States Congress to assist in the cost of plugging, reclaiming and monitoring emissions from undocumented orphan wells. The Commission plans to plug 92 orphan wells and reclaim a total of 157 well sites for the landowners using these funds once they are awarded. This work is scheduled to be done by November 2023. On November 15, 2021, the North Dakota Legislature approved SB 2345 after Special Session, which included \$3,200,000 in funds for conversion of oil and gas wells to water wells. The Division is planning to conduct this work in collaboration with help from the United States Forest Service over the next year.
-
- 14 Oil & Gas: The final release of Department of Mineral Resources NorthSTAR project, which was a multi-year IT engagement to upgrade the master data platform, went live in the 4th quarter of 2021. The project came in on budget and the deliverables outlined in the project plan were met by the Ground Water Protection Council and solution provider partners. On December 22nd, 2021, the NorthSTAR Executive Steering Committee voted to accept the project close out package.
-
- 15 Administration: Leveraged over \$38.8 million of state dollars with matching funds of approximately \$79.8 million for 25 oil and gas, lignite, and renewable energy research and educational projects.
-
- 16 Public Finance Authority: The SRF reached a major milestone during 2021, surpassing the \$1.66 billion mark in assistance approved and \$1.4 billion in funds disbursed. Because the funds are continually being loaned out and repaid with interest, the SRF continues to grow. This source of below-market rate financing will continue to meet future needs for a wide variety of water issues.
-
- 17 Administration: In addition to the continued management of the Outdoor Heritage Fund Program contracts awarded during previous biennia in excess of \$43.6 million, the Commission awarded an additional 12 grants in the amount of \$1.1 million during the first year of the 2019-21 biennium. A new grant administration program was developed and implemented during the biennium.
-
- 18 Administration: The Commission continued its oversight of the Western Area Water Supply Authority disbursements from industrial sales revenues.
-
- 19 Public Finance Authority: The Transmission Authority issued a current Transmission Capacity Study Report.
-
- 20 Administration: The Pipeline Authority contracted with the Energy and Environmental Research Center to complete an Assessment of Bakken and Three Forks Natural Gas Compositions.
-
- 21 Public Finance Authority: The Public Finance Authority issued \$85.33 million in bonds for the State Revolving Fund Program. The proceeds were used to provide state match, leverage the program and refund the 2011A bonds.
-

Major Accomplishments

- 22 Public Finance Authority: The Public Finance Authority issued the first Legacy Fund Infrastructure Program Bonds to fund the \$680 million dollars of projects approved by the 2021 Legislature.

- 23 Public Finance Authority: The Transmission Authority with assistance from the Public Finance Authority, issued their first bonds for \$150 million to finance the purchase of a transmission line.

- 24 Geological Survey: During Fiscal Year 2022 (July 1, 2021 - June 30, 2022), the Geological Survey: answered more than 1,274 enquiries, published 288 articles, maps, and reports and gave 68 presentations on various aspects of North Dakota geology. Topics included; landslides in North Dakota, the extent and thickness of two shallow salts for potential gas storage, the lithium potential of produced water in the Williston Basin, critical mineral (including rare earth elements) concentrations in ND lignites and other rocks, ND’s potash resources, windblown sand potential for oil industry proppant, surface geology, tours of the paleontology laboratory and the ND State Fossil Collection, and the sedimentology and stratigraphy of the Three Forks, Birdbear, and Deadwood Formations. In addition, Survey geologists held a two session, two-day long core workshop for 60 industry participants on August 9-13, 2021.

- 25 Geological Survey: Geological Survey paleontologists oversaw a complete renovation of the Dakota hadrosaur exhibit at the North Dakota State Museum with the Exhibit Grand Opening on October 16, 2021, managed 43 days of public fossil digs, generated 116 fossil field jackets, and added 1,013 fossils into the State Fossil Collection.

- 26 Geological Survey: The Geological Survey issued geothermal, coal exploration, and subsurface mineral permits for 1,212 test holes; reviewed the geologic suitability of 199 infrastructure projects (roads, bridges, pipelines, transmission lines, and wind farms) and four coal mine permits, and evaluated the paleontology on 917 State Trust Lands tracts.

Critical Issues

- 1 Increased demands for carbon dioxide storage facilities with limited staffing provided.

- 2 The need for additional staffing in the Department of Mineral Resources along with competitive salaries to retain skilled scientists, engineers, and experienced personnel.

- 3 Increasing environmental and reclamation workload on the Department of Mineral Resources as a result of federal and state legislation with limited funding provided.

- 4 Increasing plugging and reclamation workload on the Department of Mineral Resources as a result of IJJA funding providing the oil and gas industry monies to plug and reclaim hundreds of abandoned wells in North Dakota.

- 5 Increasing demands for detailed landslide mapping, critical mineral information, detailed surface and subsurface mapping, and outreach demands throughout the state with limited staff to meet demands.

- 6 Equipment and temporary salary needs for electronic storage and dissemination of oil and gas information to county governmental agencies, landowners, and all citizens of the State.

- 7 Federal regulations that would interfere with state primacy over oil and gas development .

- 8 Sufficient resources to convert all files to electronic format to allow for remote working environment and availability of records for researchers and the public. Resources are also needed to complete records management program.

- 9 Efficiently manage the core and sample library.

- 10 Transmission (electrical) and Transportation (pipeline) constraints that limit the State’s energy industries from moving all forms of energy both in and out of North Dakota.

Critical Issues

-
- 11 The lignite energy industry is facing an unknown future as a result of laws, regulations and court rulings, and the lack of a national energy policy. In addition to providing funding for the development of new technology, North Dakota must be prepared to address and litigate, if necessary, regulations that could place oversight of various aspects of lignite mining and electric generation at the federal rather than the state level.

 - 12 An increasing demand for renewable energy without sufficient time to develop technology and identification of the best possible sources.

 - 13 Leverage limited research dollars to the greatest extent possible to meet the challenges being faced by the energy sectors – oil and gas, lignite, and renewable energy.

 - 14 Working with the Western Area Water Supply Authority (WAWSA) Board of Directors, Bank of North Dakota and Public Finance Authority identify and implement a financial plan that will facilitate the repayment of all WAWSA debt.

 - 15 Continue funding projects that meet the Directives of the Outdoor Heritage Program within the funding limitations.

 - 16 Effectively administer Outdoor Heritage Fund while tracking and communicating the results of completed projects.

Performance Measures

Oil & Gas: Permit Processing The Oil & Gas Division has seen a steady increase in the number of drilling permit applications. The average permit processing time has slightly increased, averaging 36 days in 2021 and approximately 46 days today with approximately 350 applications pending. The Oil & Gas Division is seeing a steady increase in the number of permit requests for UIC applications (disposal wells and injection wells in enhanced recovery units), at the same time permit processing time has remained steady from an average of 110 days in the last biennium to 115 days today. **Well and Site Construction Regulation** The Oil & Gas Division witnesses a very high percentage of mechanical integrity tests and rigorously enforces well construction rules designed to protect underground drinking water. The Oil and Gas Division regulates spill containment through diking and site construction rules. **Outreach-Customer Service** The Oil & Gas Division website currently provides over 260,000 electric logs, 39,800 well files, and over 342,000 formation tops, core data, etc for access by industry, government, and the public. Streaming audio of our live hearings can be accessed from the Oil & Gas Division website. We now provide the Monthly Production Reports (from 2003 to present) on our website, which allows interested parties and royalty owners to access oil and gas marketed by well free of charge.

Geological Survey: The Geological Survey consistently issues coal exploration, subsurface mineral exploration, geothermal, and paleontological permits within seven business days of the day they are received. The Geological Survey provides same business day response for requests from industry to study core in our facility or to ship core to an approved out-of-state facility. The Geological Survey website currently provides access to over 907 articles and publications, 1,885 geologic maps, 1,400 LiDAR maps, and other scientific information for access by industry, government, and the general public. The Geological Survey continues to provide a number of outreach activities (both in person and virtual presentations, tours, fieldtrips, fossil excavations, rock and fossil displays, core workshops, website material, etc.) on various aspects of North Dakota's geology. The tours of our paleontology laboratory and the geologic exhibits at the Heritage Center are one of our biggest sources of outreach.

Public Finance Authority: The NDPFA provided funding on a timely basis to those political subdivisions seeking low-cost financing for their capital projects. During the 2019-2021 biennium the NDPFA approved under the State Revolving Fund Program \$42,919,000 of Clean Water SRF Program loans and \$75,727,500 of Drinking Water SRF Program loans. During the 2019-2021 biennium the NDPFA approved \$4,645,000 of loans under the Capital Financing Program. The Public Finance Authority issued \$85,330,000 in bonds for the State Revolving Fund Program. The proceeds were used to provide state match, leverage the Program and refund the 2011A bonds. There were two bond issues totaling \$4,645,000 for the Capital Financing Program. The NDPFA issued the first Legacy Fund Infrastructure Program Bonds to fund the \$680,000,000 of projects approved by the 2021 Legislature. The staff will provide continuing disclosure and all other ongoing administration of the bonds. The NDPFA staff provided continuing disclosure on all outstanding North Dakota Building Authority bonds and evaluated whether it was economic to refund any outstanding bond issues. The staff also processed payments to meet debt service deadlines. During the 2019-2021 biennium, issued bonds to provide \$110,000,00 for projects authorized during the 2019 legislative session. The NDPFA assisted the ND Transmission Authority with their first bond issue of \$150,000,000.

Administration: The Industrial Commission Administration Office oversees grant approvals and administers awards. The Outdoor Heritage Fund has approved 205 projects totaling \$69 million since established. Lignite Research Development funded 18 projects during the 2019-2021 biennium totaling \$20.5 million. Assist with the Oil and Gas Research Program, Renewable Energy Development Program, Pipeline Authority, and Transmission Authority. Oversight of Student Loan Trust and Western Area Water Supply.

Program Statistical Data

Oil & Gas: The Oil & Gas Division currently regulates approximately 21,000 oil, gas, and injection wells and during the Fiscal Year 2022 (July 1, 2021 – June 30, 2022) permitted over 650 new and re entry wells and eight geophysical exploration projects involving approximately 100 square miles and over 22,000 shot points. Oil and gas production has remained flat during the 2021-2023 biennium and is currently approximately 1,100,000 barrels of oil per day, 3,100,000 MCF per day, and nearly 1,750,000 barrels of water per day. Approximately 3% of the oil production was from active enhanced recovery units. Oil prices have climbed to over \$100 per barrel, but workforce shortages and industry's commitment to Environmental, Social, and Governance have inhibited capital investment into increasing oil production. The Oil & Gas Division expects oil price to remain strong and oil production to increase 1-2% during the second half of the 2023-2025 biennium.

During Fiscal Year 2022, the Oil & Gas Division heard nearly 600 cases, which is 50% higher than pre Bakken activity of 10 years ago.

Geological Survey: The Wilson M. Laird Core and Sample Library contains more than 92 miles of core (485,000 feet) which equates to 162,000 core boxes and 52,900 sample boxes (three feet long). Since 1984, industry and academic scientists using the core library have studied more than 1.1 million feet of core. Over the last 17 years we have photographed 212,000 feet of core, generating 327,000 photographs for the ND Oil and Gas Division subscription website. We answered 1,274 enquiries during the first half of the 2021-2023 biennium. Survey scientists performed 199 geologic reviews of proposed infrastructure projects (transmission and pipeline corridors, highway and bridge construction, wind farms, etc.) as well as paleontological assessments of 917 Trust Land tracts during the first half of the current biennium. The Geological Survey issued, 27 coal exploration, geothermal, subsurface mineral, and paleontological resource assessment permits over the last twelve months. A total of 1,212 test holes were drilled under these permits during this time period.

Public Finance Authority: Under the Capital Financing Program established in April of 1990, the NDPFA has made 195 loans to political subdivisions in the total principal amount of \$265,093,016. The State Revolving Fund Program consists of a Clean Water SRF Program and a Drinking Water SRF Program. As of December 31, 2021, under the Clean Water SRF Program established in October 1990, the NDPFA has approved 327 loans to political subdivisions in the total principal amount of \$901,273,241 and has funded \$744,807,967 of this amount. The Building Authority has \$93,235,000 of bonds outstanding as of June 30, 2022. As of June 30, 2022, there are \$389,200,000 of Legacy Bond Infrastructure Program Bonds outstanding. The Student Loan Trust has \$2,200,000 of assets as of June 30, 2022.

Administration: The Commission averages between 15 and 20 meetings a year dealing with all areas of the Commission's responsibilities. The Industrial Commission Administrative Office staff participates in all Lignite Research Council, Oil and Gas Research Council, Renewable Energy Council, Clean Sustainable Energy Authority and Outdoor Heritage Fund Advisory Board meetings.

Explanation of Program Costs

Oil & Gas: General Fund budgeted costs are primarily salaries and benefits (83% for the Oil & Gas Division). Federal funds for protection of fresh water supplies are not increasing, although program costs continue to rise due to inflation and federal environmental mandates. However, the agency continues to have statutory responsibilities to protect fresh water supplies. Operating budgets are primarily Travel (43%), over three-fourths of which is state fleet vehicle mileage for field work, Lease/Rent (25%) for the Bismarck office, warehouse, and three Oil & Gas Division field offices, and IT (9%) three-fourths of which is ITD data processing

Geological Survey: The Geological Survey's requested budget is 99% general funds and 1% federal funds. Budget costs are primarily salary and benefits (82%). The operating budget consists primarily of Lease/Rent (33%) for the Bismarck office and warehouse. Other items in our budget are indicative of the agency's role in

providing services necessary to meet the objectives of collecting and disseminating geologic data, overseeing regulatory programs, managing the core library, and providing geologic information. The items of greater costs include travel (20%), primarily for fieldwork, and IT costs (19%) including Data Processing, Telephone, Contractual Services, and maintenance contracts on GIS and other specialized geologic software programs.

Public Finance Authority: All program costs for the NDPFA are paid from revenues of the NDPFA. No General Fund dollars are utilized for the operations of the NDPFA. Salaries and wages for the NDPFA's employees comprise the largest single program cost. The appropriation for lease/loan-bond payments for outstanding North Dakota Building Authority bonds was moved from the Industrial Commission Administration budget in 2021. The appropriation for the outstanding Legacy Fund Infrastructure Program bond debt service payments from the Legacy Fund Earnings is new in the budget.

Administration: The base budget includes funding for 4 FTE positions and temporary staffing. Funding for temporary staffing is needed for the current and 2023-2025 biennium as the records management system continues to be updated and as more documents are converted to electronic format. All funding for the administrative office comes from the entities which report to the Commission--the Bank of North Dakota, Housing Finance Agency, North Dakota Mill, Public Finance Authority, Lignite Research Fund, Oil and Gas Research Program, Renewable Energy Development Program, Outdoor Heritage Fund, and Clean Sustainable Energy Program and the legislatively authorized Western Area Water Supply Authority payment. No General Fund dollars are requested for this budget. The continuing biennial appropriation of \$14,500,000 for the Oil and Gas Research Program is deposited in the Oil and Gas Research Fund (OGRF). The continuing appropriation funding of the Lignite Research, Development and Marketing Program comes from dollars held in the Lignite Research Fund. The funding sources for the Fund are a \$.02 per ton severance tax and coal taxes, interest income and, during the 2019-2021 and 2021-2023 biennia \$10,000,000 each biennium from oil and gas taxes. The Program also receives income from its investment in the Dakota Gasification Plant and the Spiritwood Plant. The continuing appropriation funding source of \$3,000,000 for the Renewable Energy Program is in the Resources Trust Fund. The Outdoor Heritage Fund was established in 2013 with a continuing appropriation of \$30,000,000 a biennium with the funding source or oil production revenues. The 2013 Legislative Assembly gave additional responsibilities to the Industrial Commission regarding oversight of the Western Area Water Supply Authority (WAWS) industrial sales. The 2021 Legislative Assembly established the Clean Sustainable Energy Authority and authorized \$25,000,000 of grant funding from the General Fund and during the special session authorized an additional \$20,000,000 for grant funding of hydrogen projects from federal funds. In addition, the Legislature authorized the Industrial Commission to borrow \$250,000,000 to loan to projects that meet the guidelines established by the Legislature. That loan is to be repaid by June 30, 2025. The 2021 Legislative Assembly established the Natural Gas Pipeline Grant Program and authorized \$150,000,000 of grant funding from federal funds. As of August 30, 2022, no funding awards have been made under this program. There are no direct costs for the Transmission Authority noted in the budget. The funding for this program currently comes through the Lignite Research Fund.

Program Goals and Objectives

Oil & Gas: Goals for the Oil & Gas Division are to effectively and efficiently accomplish the statutory responsibilities of the Industrial Commission for the regulation of oil and gas drilling, pipelines, geologic storage of carbon dioxide and gas, geophysical exploration, development, and production in a manner that will be most beneficial to the producer, royalty owner, citizens of the state; and to facilitate electronic storage of and access to oil and gas production, carbon dioxide storage, pipeline, reservoir, well, and geophysical exploration data to be used by industry, royalty owners, and other governmental agencies. The objectives of the Oil and Gas Division are to continue providing the timely engineering, geological, and legal analysis necessary for the Industrial Commission to effectively and efficiently enforce North Dakota's oil and gas conservation statutes; continue the effective field supervision of drilling, geophysical exploration, production of oil and gas, underground injection, geologic storage of carbon dioxide and gas, oil, gas, and produced water pipelines, and reclamation of lands disturbed by oil and gas development; implement electronic filing of oil and gas information; and improve storage and access to computerized geophysical exploration, production, and well information data to industry, royalty owners, other governmental agencies, and the public.

Geological Survey: Goals for the Geological Survey are to continue providing detailed information on the surface and subsurface geology of North Dakota to citizens, industry, municipalities, and other state and federal agencies; to identify, collect and display important fossils of North Dakota; to efficiently administer regulatory programs; and to disseminate educational geologic material to the general public.

405 Industrial Commission

Agency 405

The objectives of the Geological Survey are to map the entire surface geology of the State of North Dakota at a scale of 1:24,000 (identifying landslides and other geohazards) and the subsurface at a scale of 1:100,000, to perform mineral assessments of areas of interest identified by industry including rare earth element concentrations and the other critical minerals, identify sand deposits that have potential as proppant sand, to effectively manage the core and sample library and to provide core workshops to train the next generation of scientists working in the Williston Basin, to photograph all oil core and thin sections for the ND Oil and Gas subscription site, to continue to provide timely responses to industry requests for access to cores and samples, to provide additional opportunities for citizens of the state to participate in public fossil digs and other geotourism ventures, to exhibit dinosaur and Ice Age mammal fossils at various localities around the State, to continue to issue regulatory permits in a timely fashion, and to continue to provide scientific outreach to the mineral industry, other state and federal natural resource agencies, and the citizens of North Dakota.

Public Finance Authority: To provide market and below-market interest rate loans to North Dakota political subdivisions and other qualifying organizations at low costs of issuance and in compliance with federal tax laws and regulations and State law. To administer the NDPFA's programs in such a manner as to assure credit ratings that allow the NDPFA to sell its bonds at low interest rates. To develop new programs, encourage economic development, provide the services of the NDPFA to other state agencies, act as the financial agent for the Department of Environmental Quality in administering and managing the finances of the State Revolving Fund (SRF) Program.

Administration: To provide ongoing coordination and oversight of the Industrial Commission agencies/programs.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Geological Survey: The Geological Survey has \$54,483 in specific cost increases for the 23-25 biennium: \$34,820 in increased motor pool costs, \$12,496 in IT costs increases (mostly in IT software licenses over \$5,000 and ITD telephone office), and our office rent increased \$7,167. The Geological Survey has increased costs of \$12,801 in inflation as per the OMB Guidelines: \$1,120 in office supplies (10% OMB), \$1,000 in postage (10% OMB), \$3,275 in additional printing costs for the newsletter and other publications (10% OMB), and \$7,406 for insurance (20% of the FY22 Insurance increase, OMB).

Oil & Gas: Fleet Services Budget Guidelines require the Oil & Gas Division to budget for \$0.53/mile during the 2023-2025 biennium, which is a 130% increase over the \$0.23/mile budgeted for the current biennium. Office building rent has also increased approximately 3.5%.

Administration Office: Inflation has led to an increase of \$20,305 for leasing office space.

PFA: Inflation has led to an increase in costs for IT data processing, professional development, equipment under \$5,000, software licenses under \$5,000, and travel.

Necessary resources for implementation (including FTE's)*: Geological Survey: Total inflationary costs needed are \$67,284.

Oil & Gas: Our division has 43 field inspectors which will drive over 2.5 million miles, resulting in an inflationary increase of \$712,358. Office building rent is increasing \$41,814. The Oil & Gas Division has increased inflationary costs of \$754,172.

Administration Office: The total amount needed for inflationary costs is \$20,305

PFA: The total amount needed for inflationary costs is \$15,383.

Are resources being redirected or are they new or additional (including FTE's)*: Geological Survey: No new resources are required.

Oil & Gas: The cost increase is due to motor pool budget guideline rates increasing from \$0.23/mile to \$0.53/mile during the 2023-2025 biennium and contractual increases in rent.

Administration Office: Inflationary increases to printing services and office supplies are expected to be offset by cost-savings resulting from the office's go-paperless project.

405 Industrial Commission

Agency 405

PFA: No new resources are required.

Who is served and impact of not funding*: DMR: General public, surface owners, mineral owners, and the oil & gas industry. A potential impact of not funding would result in the inability to perform essential job functions, field inspections, hold hearings, and meet with industry, surface owners, mineral owners, and other stakeholders.

ICAO: General public; surface and mineral owners, oil & gas, coal, ethanol industries; researchers/educators; state agencies; and other governments/political subdivisions.

PFA: Political subdivisions and their residents/customers and state agencies.

Server Transition (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	230,000	80,000	310,000	0.00	230,000	80,000	310,000	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department of Mineral Resources (DMR) is requesting one time funding to assist in transitioning agency data storage and website services from on premise servers to an NDITD hosted cloud solution. The transition will ensure data, and related dissemination to stakeholders, are housed in a secure cloud-based environment with associated backup and disaster recovery services. The transition will allow DMR IT staff to focus their efforts on continued enhancements and bug fixes to the master data platform (NorthSTAR) and agency other information technology needs.

Necessary resources for implementation (including FTE's)*: The necessary resources are monetary to defray installation costs and monthly hosting fees for the 2023-2025 biennium. No additional FTEs are needed for the transition.

Are resources being redirected or are they new or additional (including FTE's)*: DMR IT staff resources will be redirected to collaborate with NDITD members to ensure a smooth transition of the servers. Upon completion of the transition, DMR IT staff focus will return to other agency information technology needs. Monetary resources to fund the transition are new/additional.

Who is served and impact of not funding*: General public; surface and mineral owners; oil & gas, coal, and ethanol industries; researchers and educators; state agencies; and other governments and political subdivisions. A potential impact of not funding is agency data storage and website services not continually being online to serve agency and stakeholder needs.

Equipment & Software (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	83,648	83,648	0.00	-	83,648	83,648	0.00
Special	-	54,000	54,000	0.00	-	54,000	54,000	0.00
Total	-	137,648	137,648	0.00	-	137,648	137,648	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Geological Survey: Desktop computers are replaced on a five-year cycle. Survey computers were last purchased in May and July 2019 and are due to be replaced in May and July of 2024. Also, Geological Survey has two drones, one was purchased this biennium, the other was purchased in April 2020. Each of these Survey drones fit into a protective case that is the size of a suitcase. This is no problem when we can come close to accessing the site with a vehicle. However, we have had to carry that cumbersome case for long distances in the badlands. We would like to purchase a smaller, lighter drone (2 lbs.) that would enable geologists to carry it in their field backpack.

Oil & Gas: The division’s drones were purchased in April 2020 and are due to be replaced by June 2024 at an estimated cost of \$12,500. See Form 5100 regarding high-speed scanning/printing equipment.

Administration Office: The Administrative Office plans to deploy meeting management software that will cost the agency and estimated \$9,000 annually. The number of meetings across the IC agencies and programs, the volume of records associated with each meeting, the number of meeting participants, and the goal of making information more readily available to the public drive the need to implement a technology solution of this nature. At this point it is unclear if additional administrative staffing will be required to support meeting management.

PFA: See Form 5100 regarding accounting software update.

Necessary resources for implementation (including FTE’s)*: Geological Survey: Estimated cost to replace desktop computers is \$48,383. Estimated cost for the lighter drone is \$4,765.

Oil & Gas: T Estimated cost to replace drones is \$12,500. See Form 5100 regarding high-speed scanning/printing equipment.

Administration Office: Total cost of the meeting management software is estimated at \$18,000.

PFA: See Form 5100 regarding accounting software update.

Are resources being redirected or are they new or additional (including FTE’s)*: Geological Survey: These are new one-time equipment purchases.

405 Industrial Commission

Agency 405

Oil & Gas: These are new one-time equipment purchases.

Administration Office: This is new software, and at this point it is unclear if additional administrative staffing will be required to support meeting management.

PFA: See Form 5100 regarding accounting software update.

Who is served and impact of not funding*: General public; surface and mineral owners, oil & gas, coal, ethanol industries; researchers/educators; state agencies; and other governments/political subdivisions.

Carbon Capture, Utilization, and Sequestration (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	760,911	31,031	791,942	3.00	825,882	31,031	856,913	3.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Carbon Capture, Utilization, and Sequestration (CCUS) Program continues to grow at a rapid pace. To date, two permits have been approved for carbon capture and sequestration and a third is pending. Applications are very time-intensive and can take over 80 hours to review. Orders rendering a decision on such matters, after notice and public hearing, can also add 20-40 hours of additional time. Staff is unable to perform current essential job functions and oversee the CCUS program, therefore it is necessary to add two FTE Geologists. CCUS field operations are also demanding and one Petroleum Engineer Inspector is necessary for adequate supervision of project construction and drilling of injection and monitoring wells.

Necessary resources for implementation (including FTE's)*: Two FTE Geologists and one Petroleum Engineer Inspector along with one-time costs for necessary set up such as safety equipment and tools.

Are resources being redirected or are they new or additional (including FTE's)*: These are new positions due to rapidly expanding program needs.

Who is served and impact of not funding*: General public; surface and mineral owners, oil & gas, coal, ethanol industries; researchers/educators; state agencies; and other governments/political subdivisions. Not funding will greatly impact the CCUS Program's ability to meet demands.

405 Industrial Commission

Paleo Laboratory Tech (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Since 2016, the popularity of the Public Fossil Dig Program has dramatically increased and continues to sell out within minutes each year. As a result, the number of spots we offer each year has tripled in size with no increase in staffing. This expanded program results in a large influx of newly collected fossils being brought back to the lab each year while also requiring the lab to be closed for three months of the year as there is not sufficient Paleontology staff to run the public fossil digs and oversee lab volunteers at the same time. As a result, there is a significant backlog of fossils awaiting cleaning (more than 765 plaster jackets) and the available storage space for those jackets is now full. The addition of a Paleontology Laboratory Technician would provide more lab staff, allowing the fossil lab to remain open year-round to handle the increased number of fossils collected each year and would enable us to reduce the current backlog of fossil jackets.

Necessary resources for implementation (including FTE's)*: One Paleontology Laboratory Technician along with one-time costs for necessary set up.

Are resources being redirected or are they new or additional (including FTE's)*: This is a new position due to increased program needs.

Who is served and impact of not funding*: General public; researchers/educators; state agencies; and other governments/political subdivisions. Not funding will impact the Public Fossil Dig Program's ability to meet demands.

Two Critical Minerals Geologists (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	553,046	40,268	593,314	2.00	296,388	20,134	316,522	1.00

State Initiative:* Economic Development/Diversification

405 Industrial Commission

Agency 405

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: For the past seven years, 3-4 Survey geologists have been working part-time on the critical minerals project. Hiring two critical minerals geologist would enable those other geologists to focus on their projects and one of them could still assist in a supporting role. The two new surface geologists would focus on the Geological Survey’s critical minerals project. We have been focusing sample collection on the rocks of the lower Fort Union Group. Project emphasis now needs to include the upper Fort Union as well as the overlying rocks (Golden Valley, White River, and Arikaree Formations in Slope, Stark, Dunn, and McKenzie counties). The recent purchase of a new diagnostic field tool, a portable X-ray fluorescence machine, will enable us to analyze samples both in the field and in the laboratory. Fifteen samples per day x 90 days = 1,350 samples analyzed by the portable xrf per field season. We have focused almost exclusively on lignites and will be expanding the sampling program to include more noncoal rocks. Currently, federal funding for critical minerals projects is available exclusively for state geological surveys through three US Geological Survey programs: National Cooperative Geologic Mapping Program, Earth Mapping Resources Initiative, and the National Geological and Geophysical Data Preservation Program.

Necessary resources for implementation (including FTE’s)*: Two Critical Mineral Geologists along with one-time costs for necessary set up.

Are resources being redirected or are they new or additional (including FTE’s)*: These are new positions due to further expand research and sample collection of critical minerals in ND.

Who is served and impact of not funding*: General public; surface and mineral owners, oil & gas, coal, ethanol industries; researchers/educators; state agencies; and other governments/political subdivisions.

Not funding would limit the ability to expand the search for critical minerals in ND.

Subsurface Geologist (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	275,355	9,234	284,589	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: From 1985 – 2005 the Geological Survey had four subsurface geologists, but for the last 17 years we have been short-handed with only three subsurface geologists. Four subsurface geologists would give us more stability and enable us to more quickly examine rock

405 Industrial Commission

Agency 405

cores of the oil producing formations, the injectable horizons, and the salt layers. We have photographed nearly half of the core in the core library. A large percentage of the remaining core needs a geologist to match the core to the electric log and, in the case of Madison core, to place it stratigraphically in the correct subinterval so it can be accurately entered into the searchable database. The Wilson M. Laird Core and Sample Library contains 92 miles of core, a number of the older cores have never been described, this would be one of the main duties of the new subsurface geologist. In recent years, we have been running standalone core workshops every two years. An additional subsurface geologist would enable us to increase the frequency to once per year.

Necessary resources for implementation (including FTE's)*: One Subsurface Geologist along with one-time costs for necessary set up.

Are resources being redirected or are they new or additional (including FTE's)*: This is a new position due to increased workload.

Who is served and impact of not funding*: General public; surface and mineral owners, oil & gas, coal, ethanol industries; researchers/educators; state agencies; and other governments/political subdivisions. Not funding would limit the ability to meet workload demands.

Grant Systems Administrator (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Industrial Commission staff are currently managing over 125 active grant projects/contracts totaling over \$172 million. With the addition of new grant programs like the Clean Sustainable Energy Program (CSEA), the Natural Gas Pipeline Grant Program and federal dollars from the bipartisan Infrastructure Investment and Jobs Act (IIJA), that number is expected to increase beyond \$255 million. Industrial Commission-administered grant programs include the Lignite Research Program (\$18.7 million in new 21-23 funding), Oil and Gas Research Program (\$24 million in new 21-23 funding), Renewable Energy Program (\$3 million in new 21-23 funding), and the Outdoor Heritage Fund (\$15 million in new 21-23 funding).

During the 2021-2023 biennium, two new programs were added under the Commission. These include CSEA (\$45 million in grants, \$250 million in loans – to be approved by the Commission and administered by the Bank of North Dakota) and the Natural Gas Pipeline Grant Program (\$150 million in grants). IIJA was passed in 2021, which included additional grant opportunities for the State of North Dakota. The Commission directly applied for formula grant funding for grid resilience (\$3.7 million/year for 5 years), which will be administered by the Commission through its Transmission Authority.

405 Industrial Commission

Agency 405

Due to increased workload, a Grant Systems Administrator was hired in the Industrial Commission administrative office. The position responsibilities include monitoring grant progress reports, reconciling submitted expenses, supporting advisory board meetings, and recommending grant payments. This role has increased productivity for Industrial Commission staff, allows for additional quality control and ensures that grant payments are timely approved.

Necessary resources for implementation (including FTE's)*: One Grant Administrator FTE.

Are resources being redirected or are they new or additional (including FTE's)*: A proposal for the 2023-2025 would transfer oversight of the Western Area Water Supply Authority from the Industrial Commission to the Water Commission. This transfer would include one FTE. The Industrial Commission requests to retain this one FTE for the purpose of retaining the Grant Systems Administrator role.

Who is served and impact of not funding*: General public; surface and mineral owners, oil & gas, coal, ethanol industries; researchers/educators; state agencies; and other governments/political subdivisions.

Match for IJA Grant (Priority: 09)

State Initiative*: Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Section 40101(d) of the bipartisan Infrastructure Investment and Jobs Act (IIJA) included formula grants for states to enhance electric grid resilience and mitigate the impact of disruptive events. North Dakota will receive \$3,760,129 per year for 5 years. For the 2023-2025 biennium, the total amount of grant funding received will equal \$7,520,258. The state is required to match 15% of the funding which would be \$1,128,038.70. North Dakota tribes are eligible to receive \$1,627,918 during the 2023-2025 biennium. The 15% match required is \$244,187.70. The combined state/tribal 15% match requirement to unlock a total of \$9,148,176 is \$1,372,226.40.

Necessary resources for implementation (including FTE's)*: Please include spending authority for \$7,520,258 of federal dollars and \$1,372,226.40 of general fund match. An emergency clause is also requested due to the grant timelines.

Are resources being redirected or are they new or additional (including FTE's)*: This is a new one-time funding request.

Who is served and impact of not funding*: General public; oil & gas, coal, ethanol industries; researchers/educators; state agencies; and other governments/political subdivisions.

NDTA Consulting (Priority: 10)

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota Transmission Authority (Authority) was created by the North Dakota Legislative Assembly in 2005 at the request of the North Dakota Industrial Commission. The Authority’s mission is to facilitate the development of transmission infrastructure in North Dakota. The Authority was established to serve as a catalyst for new investment in transmission by facilitating, financing, developing and/or acquiring transmission to accommodate new lignite and wind energy development. The Authority is a builder of last resort, meaning private business has the first opportunity to invest in and/or build needed transmission.

By statute, the Authority membership is comprised of the members of the North Dakota Industrial Commission. John Weeda was appointed Director of the Authority in February 2018. The Director works closely with Industrial Commission staff. The Industrial Commission also named the Public Finance Authority Executive Director to be an Authorized Officer for the Transmission Authority as it relates to financial transactions conducted by the Authority. The Authority currently receives no direct general fund appropriation. The Transmission Authority is currently funded by the Commission through a contract with the Lignite Energy Council.

The workload of the Transmission Authority continues to increase, and additional resources are needed. The Transmission Authority provided vital expertise and played a leadership role in negotiating the sale of Coal Creek Station, our state’s largest baseload power plant. Such expertise will be needed to ensure that North Dakota’s electric grid resilience goals continue to be met. Increased state engagement with regional transmission operators MISO (Midcontinent Independent System Operator) and SPP (Southwest Power Pool) is needed as these organizations develop their long-term strategic plans, develop electric resource adequacy plans, and determine cost allocation. The Transmission Authority has also partnered with the PSC and the Governor’s Office to participate in regional discussions with neighboring states concerning our shared transmission infrastructure.

Necessary resources for implementation (including FTE’s)*: This optional package would transfer the Transmission Authority contract from the Lignite Energy Council to the Industrial Commission. \$250,000 would be needed for the 2023-2025 biennium. No additional FTEs would be needed. Please include \$250,000 of General Fund funding.

Are resources being redirected or are they new or additional (including FTE’s)*: No additional FTEs would be needed.

Who is served and impact of not funding*: General public; surface and mineral owners, oil & gas, coal, ethanol industries; researchers/educators; state agencies; and other governments/political subdivisions.

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Fossil Excavation and Restoration Fund (NDCC 54-17.4-9.1) was established during the 1997 legislative session. The fund contains monies, both appropriated and donated to the Department of Mineral Resources -- Geological Survey, to pay for excavation and restoration of fossils for display in the North Dakota Heritage Center and other museums and public venues across the state. Fossil restoration is very time intensive and fossil exhibits also take a considerable amount of time to plan and prepare and are also very costly. This continuing appropriation fund enables the monies to be carried across bienniums for these multi-biennium projects. Since 1997, \$250,000 in appropriated funds and \$900,000 in donations (78% of the total) has been deposited into the fund. Conversely, \$1,150,000 has been withdrawn from the fund to pay for a multitude of fossil preparation and fossil exhibits. The ending balance of the fund for the month ending July 31, 2022 was \$3,057.

Dakota the mummified hadrosaur is the only dinosaur fossil in the world that preserves tooth and claw marks within fossilized skin. The majority of the specimen still requires detailed preparation before it can be put on display and used for research. Preparation of the specimen by a fossil preparator that specializes in cleaning fossilized skin costs \$25,000 a year. We estimate full preparation of the specimen will take an additional six years to complete for a total cost of \$150,000.

405 Industrial Commission

Agency 405

One of the goals of the Geological Survey is to establish fossil exhibits in towns across the state so that people do not have to travel for hours to see and appreciate our prehistoric past. These exhibits continue to expand, with fossils from our collection contributing to over two dozen exhibits across the state. Several additional locations have been identified for future exhibits, including sites in Lidgerwood, Williston, Watford City, and Walhalla. To continue this program, we request \$100,000 as seed money to develop these new exhibits.

Necessary resources for implementation (including FTE's)*: A total one-time funding request of \$250,000.

Are resources being redirected or are they new or additional (including FTE's)*: No other resources are necessary.

Who is served and impact of not funding*: General public; researchers/educators; state agencies; and other governments/political subdivisions. Not funding will impact excavation and restoration of fossils for display.

Paleo Collections Tech (Priority: 14)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	196,952	9,234	206,186	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	196,952	9,234	206,186	1.00	-	-	-	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota State Fossil Collection continues to grow at a rapid pace, with thousands of new fossils being added each year through the Public Fossil Digs Program, research fieldwork by NDGS staff, and the acquisition of orphaned fossil collections from other museums. At the same time, the growing collection is attracting an increased number of visiting researchers from across the world. Currently one paleontologist spends most of the summer and fall in the field, catalogs and organizes all the new fossils, provides assistance to visiting researchers, and plans and develops the growing number of off-site fossil exhibits across the state (currently 25 locations). The Paleontology Collections Technician would assist with the backlog of thousands of fossils awaiting stabilization, cataloging, and organizing. This would allow the paleontologists to organize and run the Public Fossil Digs Program, plan exhibits, and focus on supporting visiting researchers.

Necessary resources for implementation (including FTE's)*: One Paleontology Collections Technician along with one-time costs for necessary set up.

Are resources being redirected or are they new or additional (including FTE's)*: This is a new position due to increased program needs.

Who is served and impact of not funding*: General public; researchers/educators; state agencies; and other governments/political subdivisions. Not funding will impact the Public Fossil Dig Program's ability to meet demands.

Core & Mineral Analysis (Priority: 15)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	-	100,000	100,000	0.00	-	100,000	100,000	0.00

State Initiative:* Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Geological Survey’s critical minerals project requires laboratory rock analyses, in addition to the work that can be done with the Geological Survey’s portable x-ray fluorescence tool. There are 50 critical minerals, based upon our experience, we typically have analysis run on seven of the rare earth elements and 12 of the other critical minerals for a total sample cost of \$225. We plan on submitting 222 rock samples for a total of \$50,000.

The Geological Survey has a number of current core studies of the rocks from the Mission Canyon Formation, Lodgepole, Bakken, Three Forks, and Birdbear Formations that require a variety of core analyses (total organic carbon, vitrinite reflectance, visual kerogen analysis, x-ray diffraction, etc). The costs vary by analysis, but average out to \$240/sample. We are planning on 210 sample analyses for a total cost of \$50,000.

Necessary resources for implementation (including FTE’s)*: A total one-time funding request of \$100,000.

Are resources being redirected or are they new or additional (including FTE’s)*: No other resources are necessary.

Who is served and impact of not funding*: General public; researchers/educators; state agencies; and other governments/political subdivisions. Not funding will impact excavation and restoration of fossils for display.

Temporary Employees (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	90,000	75,000	165,000	0.00	-	75,000	75,000	0.00

405 Industrial Commission

Agency 405

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Geological Survey: Since 2004, Geological Survey has been hiring students at the University of North Dakota to photograph core and thin sections for the Oil and Gas Subscription site. So far, we have photographed 485,000 feet (44% of the core in the Wilson M. Laird Core and Sample Library) and generated 327,000 photographs for the subscription site. We have also photographed 18,600 thin sections generating 143,000 photomicrographs for the web site. One third of the money has been coming from the Geological Survey's temporary salary fund and two thirds from the Reservoir Data Fund. However, the monies we had been using from the Reservoir Data Fund are being diverted to complete the NorthStar oil and gas tracking and reporting system and then will be used to pay for ITD storage of DMR data. Total additional cost for temporary employees is \$90,000.

Administration Office: The Administrative Office has launched a comprehensive records management project that includes a go-paperless component as well as technology implementation for an all-electronic records future state. The first stage of this project, go-paperless, has begun and includes a scanning contract for many decades of IC records. This stage of the project will continue in the 23-25 biennium and an estimated \$75,000 of one-time funding will be needed.

Necessary resources for implementation (including FTE's)*: Geological Survey: Total additional cost for temporary employees is \$90,000.

Administration Office: \$75,000 of one-time funding will be needed.

Are resources being redirected or are they new or additional (including FTE's)*: No other resources are necessary.

Who is served and impact of not funding*: General public; surface and mineral owners, oil & gas, coal, ethanol industries; researchers/educators; state agencies; and other governments/political subdivisions.

Professional Development (Priority: 17)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

405 Industrial Commission

Agency 405

Request explanation and justification (include any statutory authority)*: Geological Survey: Geological Survey geologists occasionally present the results of their work at regional and national meetings where they can also learn from the presentations of other scientists, attend special training classes, core workshops, and fieldtrips.

Oil & Gas: The Interstate Oil and Gas Compact Commission (IOGCC) serves as the collective voice of member states on oil and gas issues and initiates innovative projects to advance our nation's energy future making it critical that the State of North Dakota participates. It is necessary to cross-train Oil & Gas Division employees due to employee attrition, which requires attendance of additional conferences and therefore the payment of conference fees. The Oil & Gas Division's Agency Policy Manual allows for reimbursement of up to 80% of tuition fees to regular employees who attend training or education courses that do not qualify as job-related training, although no monies are currently directly allocated for tuition fees in the budget.

Administration Office: Industrial Commission staff regularly travel to carry out their duties. During the COVID pandemic, travel was limited. However, in-person travel to conferences and meetings has now resumed. Staff participation in conferences and meetings is needed not only to support professional development and remain apprised of the latest industry innovations, but also to maintain professional contacts and influence policy decisions which benefit North Dakota. For example, NDIC staff hold leadership positions in the Interstate Oil and Gas Compact Commission, which allows North Dakota to play a key role in developing and influencing nationwide policies which impact our largest industry.

Necessary resources for implementation (including FTE's)*: Geological Survey: Total cost is \$27,000.

Oil & Gas: Dues and costs to participate in the IOGCC are currently included in the Industrial Commission's Administration Office budget, although the Director of the Oil & Gas Division is the official State representative and monies should be included in the Oil & Gas Division's budget. Dues (based upon each State's oil and gas production) and costs to participate (for appointed persons) in the IOGCC are based upon each State's oil and gas production and total \$105,000. Providing funds of \$15,000 will allow 3-4 employees to attend one additional conference each quarter during the 2023-2025 biennium. Providing funds of \$20,350 will allow tuition reimbursement for up to 6 employees to attend one class each semester during the 2023-2025 biennium. Total cost is \$140,350.

Administration Office: A breakdown of planned travel for the Administrative Office during the 2023-2025 biennium is provided below:

- a. IOGCC – 2 meetings per year = \$1,450/ meeting x 4 = \$5,800
- b. Williston Basin Petroleum Conference – 1 per biennium = \$500
- c. NDPC Annual Meeting – 1 per year x 2 = \$1,000
- d. WDEA Annual Meeting – 1 per year x 2 = \$1,000
- e. BPOP Annual Meeting – 1 per year x 2 = \$1,100
- f. PCOR Annual Meeting – 1 per year x 2 = \$3,000

Total = \$12,400

Are resources being redirected or are they new or additional (including FTE's)*: Geological Survey: No other resources are necessary.

405 Industrial Commission

Agency 405

Oil & Gas: IOGCC dues currently are paid through special funds in the Industrial Commission's budget, but are being redirected through the Department of Mineral Resources. Additional funds are requested in professional development. New funds are requested for tuition fee reimbursement.

Administration Office: No other resources are necessary.

Who is served and impact of not funding*: Participation in the IOGCC benefits the Oil & Gas Division, general public, oil and gas industry, surface owners, and mineral owners. The impact of not funding could result in additional costs to the State of North Dakota since the IOGCC addresses emerging national trends, regulatory practices of states with similar issues, and programs like the Infrastructure Investment and Jobs Act grants for plugging orphan wells. Attendance of additional conferences and workshops will keep morale high and will make employees more valuable for retention and possible promotion. Additional training/courses should help employees better-serve those persons they are assisting, especially the general public, oil and gas industry, surface owners, and mineral owners. A potential impact of not funding could result in lower employee morale and lower employee retention.

State Initiative:* Technology Investment

Justification: The PFA plans to upgrade their accounting software that will cost the agency and estimated \$36,000. The current accounting software will no longer be supported after 2023. The estimated cost will pay for the software, installation, and printers.

DMR routinely scans and occasionally prints documents on high-speed scanner/printers. The DMR is attempting to eliminate paper files by scanning numerous documents into a database. Occasionally some documents must be retained in paper form and a quality printer must be utilized. The Permitting and Production main scanner/printers need to be replaced because they are near the end of their useful life. The DMR is desirous of obtaining dependable high-speed scanning/printing equipment that will enhance our ability to provide quality information to users via the internet. The Permitting color scanner/printer is estimated at \$10,000 and the Production black and white printer is estimated at \$8,000.

405 Industrial Commission

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: Section 40101(d) of the bipartisan Infrastructure Investment and Jobs Act (IIJA) included formula grants for states to enhance electric grid resilience and mitigate the impact of disruptive events. North Dakota will receive \$3,760,129 per year for 5 years. For the 2023-2025 biennium, the total amount of grant funding received will equal \$7,520,258. The state is required to match 15% of the funding which would be \$1,128,038.70. North Dakota tribes are eligible to receive \$1,627,918 during the 2023-2025 biennium. The 15% match required is \$244,187.70. The combined state/tribal 15% match requirement to unlock a total of \$9,148,176 is \$1,372,226.40.

Special Funds Agency Summary

Fossil Excavation & Restoratio

	2021-23	2023-25
Beginning Fund Balance	52,971	52,971
Revenues and Net Transfers	-	-
Total Financing	52,971	52,971
Estimated Expenditures	-	-
Ending Fund Balance	52,971	52,971

Renewable Energy Develop. Fund

	2021-23	2023-25
Beginning Fund Balance	5,894,081	5,894,081
Revenues and Net Transfers	-	-
Total Financing	5,894,081	5,894,081
Estimated Expenditures	-	-
Ending Fund Balance	5,894,081	5,894,081

405 Industrial Commission

Agency 405

Oil & Gas Research Fund

	2021-23	2023-25
Beginning Fund Balance	16,009,110	16,009,110
Revenues and Net Transfers	-	-
Total Financing	16,009,110	16,009,110
Estimated Expenditures	-	-
Ending Fund Balance	16,009,110	16,009,110

Carbon Dioxide Facility Admin

	2021-23	2023-25
Beginning Fund Balance	206,695	206,695
Revenues and Net Transfers	-	-
Total Financing	206,695	206,695
Estimated Expenditures	-	-
Ending Fund Balance	206,695	206,695

Pipeline Auth Admin Fund

	2021-23	2023-25
Beginning Fund Balance	622,346	622,346
Revenues and Net Transfers	-	-
Total Financing	622,346	622,346
Estimated Expenditures	-	-
Ending Fund Balance	622,346	622,346

ND Outdoor Heritage Fund

	2021-23	2023-25
Beginning Fund Balance	34,362,785	34,362,785
Revenues and Net Transfers	-	-
Total Financing	34,362,785	34,362,785
Estimated Expenditures	-	-
Ending Fund Balance	34,362,785	34,362,785

405 Industrial Commission

Agency 405

Industrial Commission Fund

	2021-23	2023-25
Beginning Fund Balance	2,458,665	2,416,757

Statutory Authority

North Dakota Century Code Chapters 14-02.4, 14-02.5, 34-05, 34-06, 34-06.1, 34-07, 34-12, 34-13, 34-14, and Sections 34-01-20 and 34-08-14.

Agency Description

The Department of Labor and Human Rights is responsible for administering statutory provisions relating to labor standards, including wage and hour issues, child labor, and labor-management relations. The Department is also responsible for improving working and living conditions of employees and advancing their opportunities for employment; fostering, promoting, and developing the welfare of wage earners and industries in the state; promoting cooperative relations between employers and employees; cooperating with other governmental agencies to encourage the development of new and existing industries; representing the state in dealings with the U.S. Department of Labor, with the federal mediation and conciliation service, and the U.S. veteran's administration with regard to job training programs; acquiring and providing information on subjects connected with labor, relations between employers and employees, hours of labor, and working conditions; and encourage and assist in the adoption of practical methods of vocational training, retraining, and vocational guidance.

The Department of Labor and Human Rights also has statutory regulatory responsibilities with respect to human rights. This includes receiving and investigating complaints of discrimination in employment and housing; adopting rules necessary to implement the law; fostering prevention of discrimination through education; emphasizing conciliation to resolve complaints; publishing, in even-numbered years, a written report recommending legislative or other action to carry out the purposes of the chapters; and conducting studies relating to the nature and extent of discriminatory practices in the state.

The Department of Labor and Human Rights is responsible for promoting the human rights of all North Dakota citizens through leadership, education, prevention, and enforcement of state laws prohibiting discriminatory practices in the state. Specifically, the department investigates complaints alleging violations of law in the areas of employment, housing, public services, public accommodations, and credit transactions.

Agency Mission Statement

The Department of Labor and Human Rights is responsible for fostering, promoting, and developing the welfare of both wage earners and industries in North Dakota through leadership, education, regulation, prevention, and enforcement of state laws relating to the wages and working conditions of North Dakota employees. The Department is also responsible for ensuring the human rights laws of our state are not only public knowledge but are adhered to as well.

Major Accomplishments

- 1 Provided internal human rights training for agency staff, including on Fair Housing, and other human rights claims, such as Public Services and Accommodations, etc. Set up a mentorship program internally for continued and ongoing training. We were not unlike any other agency, we had many retirements within the Department in a short period of time, so creating a mentorship and onboarding program has been key to the success of our new Compliance Investigators, who make up the bulk of the Department. On top of this training internally, we have attended countless external trainings with our partners from the Federal level (e.g. HUD), as well as other fellow state and North Dakota partners.
- 2 Attended training and policy conferences sponsored by the Equal Employment Opportunity Commission and the Department of Housing and Urban Development each year. Because all of these training opportunities have been remote, we have not had to spend the extra dollars on attending them in person. They are required of us, and to the 1st major accomplishment, this is the training the Department is involved in every year and allows for Investigators and the rest of the team to have full legal updates, etc., for us to be ahead of the work we do. It's been a vital source of how we are able to maintain efficient, diligent, and good work for the citizens of North Dakota.

Major Accomplishments

-
- 3 Attended training at the National Fair Housing Training Academy. The training from the Academy ensures we are keep up with the standards required of us, as well as the added benefit that all new Investigators receive one more source of training, and this allows the Department to have Investigators who are primed and trained in a very quick fashion.

 - 4 Continued all Business Process Improvements and streamlining and setting Standard Operating Procedures. We are now completely paperless, unless that is an accommodation a North Dakota citizen wants otherwise (i.e. they would rather file in person or in hard copies of paper). We are in a position to receive claims in any form they may come in, which is specifically for the benefit of the North Dakota citizens, and we have done this work in a way that has kept costs very low for the taxpayer. We are extremely proud of the work we've done to create and build out our software system that keeps all of our work in one place, and without the major risk management red flags of when we simply had paper files that could not be stored in a proper place. That no longer exists, and on a cybersecurity and plain security front, this has been extremely important and once again, for the benefit of the North Dakota citizen, to ensure they have a smooth and efficient process with us, and know they're information is safe and protected.

 - 5 We have given more educational presentations across the state than ever before. We are doing this in a hybrid space. Remotely presenting has allowed us to give more presentations than ever, and have a far greater reach. We also present in person. This is a statutory requirement, but the Department has been proud to announce that since Commissioner Thunder took on her role on June 3, 2019, these presentations are open to any North Dakota citizen. In the past, previous Commissioners would only give these presentations if a group was a certain number and the Department only presented on a less specific over-arching them, whereas now the Department presents to any business, employees, landlord, tenants, HR groups, and citizens in general, regardless of group size or topic. This is in line with our citizen focus. And, it's an area we receive extremely positive feedback.

 - 6 Created full procedural manuals for the agency. This was a long time coming. Previously, the Department prior to June 2019, had various manuals that were unorganized and did not have one source of truth. We now have on master Standard Operating Procedures manuals for the agency, and have broken down this manual further into the areas of work we handle, manuals specifically for the positions we have, and they function as the one source of truth for anyone needing assistance internally, but we are also happy to share externally in true transparency.

 - 7 Provided various training, education, public documents to the public, other agencies, and citizens traveling inside and outside of North Dakota, on COVID-19. This included training, education, and public documents in both areas of Labor and Human Rights. This has been highly important during the vast confusion on how employers and employees were supposed to interpret various mandates or rules. We did this underneath our jurisdiction and sorting through the many complexities North Dakota faced.
-

Critical Issues

-
- 1 Of several critical issues, includes a small team with which we continue to diversify, but as put forth in this buget, we are in very much need of a Wage and Hour Division Director, to be the counterpart of our Human Rights Director. For whatever reason, it was something that was never passed when the Department was rebuilt and reorganized many times throughout its inception, and as the first Cabinet Agency in North Dakota. This role is entirely important for many reasons. The job duties now fall between the Human Rights Director, who oversees a completely separate area of law, along with the investigators who are not trained in all areas of law from the beginning of their onboarding. We only have one half of our work (Human Rights) with a director, and no formal director for (Labor) aka Wage and Hour issues, which takes up the larger portion of the Department's work and can be very complex. This is a critical issue that needs as immediate attention as it can receive, and why I put it in our budget.
-

Critical Issues

-
- 2 A very critical issue is that our Compliance Investigators have gone through a major change. We were hit by very much known retirements, but those turned our team into a very "green" aka new team, who needs training, and we still have not been able to fill all FTE positions. We have done full due diligence on trying to hire two new Compliance Investigators (CIs) at once, but this role is one that is incredibly hard to fill and make it through the probationary period, so we continue to struggle like most other teams in the State of North Dakota to find people who are qualified and fitting. We even opened the position to about as broad as it can be and are proud of that fact because we really have low minimum qualifications as we believe anyone with a critical mind and analytical skills can not only fill but do very well at this job. Still yet, the workforce shortage has hit us like anyone else. We need to be able to keep the FTE positions we have even if they are filled or not, because the intention is to fill all of them. It's a terrific role and very fulfilling. So, again, this critical issue is being able to fill these positions. And, we cannot compete with remote workers going to other States as public servants.
-
- 3 Pay is another critical issue. As it will be stated by almost every member of Team ND and the leaders of tremendous groups, as the one I'm grateful to lead, the wages I can pay are not competitive. We keep costs down to such a bare minimum that has us saying "no" to a lot of requests, unless of course they at all fall into any accommodations needed, and obviously under law and reasonable accommodations. The market shows we aren't able to pay our Compliance Investigators II what they could make in the private sectors or in other States who also offer remote work. Even our Directors, which only include our Human Rights Director and Director of Operations, are still not at market level of what they should make for the amount of hours put in. To add specifically to the issues that are most critical (not having the pay for Compliance Investigators), they are inundated with more work and higher caseloads and a smaller team, and less experience. We do our best as always to serve the North Dakota citizens, but this is a very much critical issue that needs addressing immediately.
-

Performance Measures

The primary metric for Department performance is accomplishing case closures within timeframes set forth in statute and administrative code.

Caseload Information as of June 30, 2022:

Pending Employment Discrimination and Retaliation Complaints = 122

Pending Claims for Unpaid wages = 113

Pending Claims for Housing Discrimination Complaints = 17

Pending Public Service/Public Accommodation & Credit Transaction Complaints = 3

The ongoing objective is for cases in all areas to be current in accordance with the following targets for case closures: 1) complaints of discrimination in employment, public services, public accommodations, and credit transactions to be completed within 180 days; 2) claims for unpaid wages to be completed within 90 days; and 3) complaints in housing discrimination to be completed within 100 days.

Program Statistical Data

The program statistical is for the 2019-2021 biennium:

Wage & Hour:

The Department of Labor and Human Rights is responsible for enforcing the wage and hour

406 Labor and Human Rights

Agency 406

provisions outlined in several chapters of N.D.C.C. Title 34 and the North Dakota Wage and Working Conditions Order found in N.D. Administrative Code ch. 46-02-07. Under these provisions, the Commissioner of Labor has the authority to investigate violations, to enter places of employment, to inspect records, to take assignment of wage claims, and to institute or cause to be instituted actions to collect wages.

In carrying out these responsibilities, the department investigates and enforces Claims for Unpaid Wages, pursuant to N.D.C.C. ch. 34-14, and addresses other labor standards issues utilizing a range of means from informal communications to the formal investigation of written complaints. The goal of the department is to provide information, correct misunderstandings and misconceptions, and resolve disputes using the means most appropriate to a given situation for timely and effective service to both employees and employers.

The following tables summarize the department's activity relating to Claims for Unpaid Wages filed and closed during the 2019-21 biennium:

The department also resolved a number of cases through a process called Complaint Inquiry. This informal process is used mainly in instances where there may be a dispute over a final paycheck between the employer and employee, but may also be used to address other violations of law. The following chart summarizes the department's efforts regarding Complaint Inquiries:

Explanation of Program Costs

During the 2021-2023 biennium, 92.5% of the Department of Labor and Human Rights' regular program expenditures are being utilized for staff salaries and benefits. The remaining 7.5% is being spent on operating expenditures for day-to-day operation of the office (including postage, printing, office supplies, telephone and data processing costs), professional services such as administrative law judges, operating fees for sheriffs' service, travel as necessary for program work (investigations and mediation) and staff training, and proactive educational activities - all of which directly support the department's programs. Operating expenses have continued to lower but it's imperative that the Legislature knows these have lowered due to the COVID-19 pandemic. 18% of the Department's appropriation is to go to the operating expenses, and this is an important note. Traveling expenses went down substantially, because all of our Federal partners have continued to keep all training remote for the current time being; however, the Department's operating costs need to stay the same for the imperative reason that the rest of the business functions of the Department have not changed and we understand that this is a unique and once-in-a-lifetime ebb and flow, that will return to equilibrium

when the effects of the pandemic continue to dwindle. The Department asks to keep its operating expenses the same as we continue to transition back into the normalcy of using these expenses.

For the 2023-2025 biennium, the department projects that 85% of its budget will be spent on salaries and benefits and that 15% will be utilized on operating expenses, primarily in the areas noted above. These percentages are based on the department's base budget request.

Program Goals and Objectives

The Department of Labor and Human Rights has two program areas, Wage & Hour and Human Rights. The goals and objectives of each include:

Wage & Hour:

- Educate employers and wage earners about labor laws;
- Provide effective and timely investigation of claims for unpaid wages;
- Provide effective and timely investigation of complaints alleging violations of labor standards;
- Monitor the employment of youth under age 16 to ensure compliance with all youth employment laws;
- Review applications for the payment of sub-minimum wages to persons enrolled in vocational programs and persons with disabilities and to issue special licenses to pay sub-minimum wage only where established standards of law are met;
- Make accurate and timely determinations of independent contractor status; and
- Issue licenses (in limited circumstances) to and review the activities of employment agencies operating in the state to ensure compliance with applicable regulatory provisions.

Human Rights:

- Educate employers, housing and other service providers, and citizens about rights and responsibilities under ND human rights laws to promote awareness;
- Provide effective and timely investigation of complaints alleging discriminatory practices in the state;
- Emphasize conciliation to resolve complaints when possible;
- Seek remedies for persons determined to have been harmed by discriminatory practices; and
- Conduct studies of the nature and extent of discrimination in the state.

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The explanation and justification is very simple: we have two division to our department, Labor and Human Rights, we've functioned for too long with only one director on Human Rights, and have never had someone who has specialized in Labor (Wage and Hour division). The Divisions are protected and established by Century Code, yet we only have been able to rely on one as that has all that is funded.

Necessary resources for implementation (including FTE's)*: Funding the one FTE, which should not be a problem, as we already have the FTE in our possession, it is just unfunded at this point. The resources are the same for any new full time, classified, exempt, FTE. My ask for this is supplanted in other areas of this Budget.

Are resources being redirected or are they new or additional (including FTE's)*: Both. We are able to redirect resources if we have open FTEs and the Legislature approves of moving the little funds we have left, otherwise, this will be new/additional funding.

Who is served and impact of not funding*: The people who are serve are the citizens of North Dakota. As well as the citizens of North Dakota who work for the ND Department of Labor and Human Rights, because finally, they will have the proper director and leader, as well as Federal Fund partner director through EEOC to not only rely on, but train, onboard, and cut costs on the need for Compliance Investigators. Impact of not funding will be that we continue with the issues raised for

406 Labor and Human Rights

Agency 406

years and decades: we have no specialist or middle management/leadership where it is desperately needed for the diversification of the Department, and further, the Commissioner will continue to take on more and more duties, with no extra pay, and no delegation for the vital legal law enforcement of our statutory laws. It also will not fulfill the wishes of this Governor whom this Department is a Cabinet member of, along with the rest of its duties under law and in relation to its fellow states.

Funding for Rent Model (Priority: 02)

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Funding for OMB rent model.

Necessary resources for implementation (including FTE's)*: General Funds

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: State Agencies

Recommendation - Budget Summary

Statutory Authority

ND Constitution Article V; North Dakota Century Code Chapters, 24-01, 24-09, 28-32, 38-14.1, 38-14.2, 38-18, 40-33, 40-34, 51-05.1, 54-06, 54-44.8, 57-61;64-02, and 64-04, Titles 49 (except Chapter 49-16)

Agency Description

The Public Service Commission is a constitutional agency with varying degrees of statutory authority over electric and gas utilities; telecommunication companies; power plant, transmission line and pipeline siting; railroads; auctioneers and auction clerks; weighing and measuring devices; pipeline safety; coal mine reclamation; and eliminated public hazards from abandoned mine lands. The Commission is comprised of three Commissioners who are elected on a statewide basis to staggered six-year terms. The Commission had 43 authorized full-time employees throughout the 2019-21 biennium and 2 to 3 temporary seasonal construction inspectors.

Agency Mission Statement

The Public Service Commission fulfills its statutory mandates by protecting consumers, the public interest and the environment. Our values include:

- Balance: balancing public and private interest affecting each decision
- Collaboration: tackling work challenges as a team to harness expertise and achieve better outcomes with greater impact
- Continuous Improvement: building a workplace that fosters growth, excellence and diversity
- Creativity: generating solutions by turning new and imaginative ideas into sound policies and regulations that protect citizens and promote orderly development
- Responsiveness: taking action to address the needs of industry and the public

Major Accomplishments

-
- 1 Processed 930 formal cases during the biennium. Cases included industry filings complaint proceedings, and rulemaking. Ninety-eight percent of all formal cases were processed without the need for a formal hearing.

 - 2 Received and processed more than 27,000 informal complaints, inquiries, and comments. A large majority of the contacts included public input for siting cases submitted through organized groups. The majority of informal complaints involved billing disputes, electric disconnects, and quality of service complaints against regulated utilities.

 - 3 Received high marks on federal review of the coal regulatory and abandoned mine lands programs.

 - 4 Approved nine (9) permit renewals in the Reclamation Division. As of June 30, 2021, there were 134,282 acres under permit for surface coal mining and reclamation operations.

 - 5 AML Division conducted sinkhole filling projects to fill approximately 270 hazardous sinkholes caused by underground mine collapses at numerous sites in western North Dakota.

 - 6 Emergency projects were conducted by the AML Division to fill extremely hazardous sinkholes caused by an underground mine collapse along ND Highway 36 near Wilton, Highway 200 near Beulah, and worked in conjunction with the State Water Commission to reduce the hazard of an imminent embankment breach of an abandoned mine impoundment southeast of Tioga.

Major Accomplishments

- 7 Railroad Safety Program inspectors completed more than 450 inspection days and inspected more than 52,000 units, finding thousands of defects that the railroads subsequently corrected. Commission's Railroad Safety Inspector completed all federal training requirements and was certified by the Federal Railroad Administration to conduct inspections independently.
- 8 Completed 50 damage prevention complaints resulting in penalties totaling \$57,400, bringing more awareness of the ND One Call Law. Participated in 811 Day at the State Fair to help educate the public about the importance of calling 811 before any digging project.
- 9 Processed siting applications for 11 pipelines, 2 gas processing plants, 2 wind farms, and 3 electric transmission lines.
- 10 Worked with telecommunications companies to reassign numbers with 988 prefixes, ensuring the new Suicide Prevention Hotline number (988) could be implemented without forcing North Dakota to go to ten-digit dialing.
- 11 Advocated for single block numbering at the Federal Communication Commission to prevent exhaust of the 701-area code and the need for ten digit dialing and additional area codes within the state. As a result, North Dakota is being considered for a pilot program that would allow for implementation of individual telephone number pooling.
- 12 Continued to be proactive in RTO engagement including Commissioner and staff participation on committees and leadership groups. Held a technical workshop with stakeholders and MISO after the February 2021 rolling blackout event to advance reliability initiatives. The Commission weighed in with RTOs on policy matters relating to cost allocation and the planning for regional transmission buildouts, resource accreditation, and the effect such planning and changes have on the utility fleet the Commission regulates.

Critical Issues

- 1 Since January 2019, 80% of agency staff is new or in a new/expanded role. This has led to a significant loss of expertise and institutional knowledge due to retirements. Acclimating new staff is a challenge as it typically takes several years of on the job training. In addition, we are facing major hurdles in recruiting qualified employees with specialized technical degrees like engineering, hydrology, agronomy, or economics, and maintaining equity among new and long-term employees which impacts our staff retention.
- 2 Removing the sunset clause from the Rail Safety Program. The demonstrated success of the program speaks for itself. The ongoing non-permanent status of this program directly impacts the ability of the Commission to hire and maintain talented employees, impacts employee moral, and generates concern for position longevity. During the hiring process in the spring of 2021, we lost several applicants due to the lack of permanency of the program.
- 3 Emergence of electric vehicle charging stations and the impact this will have on our agency from the Public Utilities regulatory and the Weights & Measures compliance perspective.
- 4 Due to a lack of testing equipment, Weights & Measures inspectors currently do not have the ability to conduct inspections on jurisdictional devices. Instead, we rely on private inspectors to check these devices but have no way to quality assure their work.
- 5 Changing federal rules issued by the federal Pipeline and Hazardous Materials Safety Administration (PHMSA) could impact the Pipeline Safety program. These new rules place reporting requirements and potential inspection requirements on previously unregulated gathering system operators. While the impact to our agency is still being evaluated, this will directly impact ND oilfield natural gas gather systems.
- 6 Evaluating the role of the current Pipeline Safety Program with the evolution of CO2 transportation and sequestration in ND via pipelines as the program is not presently geared towards hazardous liquids.
- 7 Participating in Regional Transmission Organizations (RTOs) MISO and SPP is critical for the energy future of ND. It is crucial to be engaged with these organization in order to influence RTO decisions effecting reliability, cost, and resource mix which impacts ND's power production. In order to ensure that North Dakota's interests are represented in decisions that are made by MISO and SPP, the challenge will be finding resources to assign to the task.

Critical Issues

-
- 8 Working with MISO and SPP to balance the cost and need for interstate transmission lines under federal jurisdiction with the cost and need for resources under local jurisdiction is critical to ensuring ratepayers are served with affordable and reliable electricity. Such transmission investments are forecasted to be significant, and the Commission must ensure both local and regional industries are working to advance ratepayers interests. Becoming more and more involved and keeping up with this complex system takes increased staff time and specific staff expertise.
-
- 9 In addition to the RTOs, another critical area for North Dakota is the Federal Energy Regulatory Commission (FERC). Just as we are seeing RTOs develop regional energy and transmission policies that have an impact on North Dakota, FERC is taking up many topics that will have an impact on North Dakota. This is why engaging in FERC cases and filing meaningful comments is necessary to ensure that our voice is heard and our citizens are protected from the added costs and reduced reliability that will result from the absence of our engagement. FERC cases are numerous, as are the filings within them. Ensuring we have adequate staff to review those cases and filings and make recommendations for comments that North Dakota should file in those cases is not simply important, but necessary.
-

Performance Measures

WEIGHTS & MEASURES:

- Assure all measuring devices are tested at least every 15 months, with a goal of every 12 months.
- Assure that all weighing & measuring devices are accurate.
- Assure that commercial testers are qualified to certify and place weighing or measuring devices into service.

LICENSING:

- Process more than 460 auctioneer and auction clerk license renewals annually.
- Monitor all current and new licensees for compliance with laws and rules to include maintaining required bonding.
- Verify auction schools who offer Commission approved courses continue to maintain minimum standards.

RAILROAD SAFETY:

- Complete at least 130 inspection days per year, per inspector.
- Program goal is to work with railroads for compliance, not to drive compliance through violations and defects.
- Ensure railroad compliance with provisions of law providing rights for North Dakota citizens.

PIPELINE SAFETY:

- Conduct inspections of five distribution system operators, ten transmission system operators, one liquified natural gas facility operator, and seven gathering system operators covering over 4,150 miles of natural gas pipeline.

408 Public Service Commission

Agency 408

• Complete necessary audits based upon time frame, operator size, and system size in the following categories (note, not all inspection types are due annually):

- o Records Audits
- o Control Room Management
- o Drug and Alcohol Testing
- o Damage Prevention
- o Integrity Management
- o Emergency Procedures
- o Operation and Maintenance
- o Operator Qualification Plan
- o Public Affairs
- o Construction
- o PIPES Act of 2020 Section 114

- Take necessary enforcement action when required.
- Annual performance evaluation conducted each year by PHMSA.

DAMAGE PREVENTION:

- Reduce violations
- Reduce accidents
- Increased education to the public on the importance of calling 811 before any digging project.
- Annual performance evaluation conducted each year by PHMSA.

RECLAMATION:

- Broad customer service survey is conducted by OSMRE as part of their annual evaluation

408 Public Service Commission

Agency 408

- Annual performance evaluation conducted by OSMRE resulting in no corrective actions or concerns in many years.
- OSMRE has declared the PSC to be a leader in the development of GIS applications and systems used to track mining and reclamation activities.
- Good working relationship with all stakeholders (industry, landowners, citizen groups, state and federal agencies).
- 90 active Ag producers on permit land
- Actively seek public comments

AML:

- Interaction with landowners and other interested agencies
- Ability to respond quickly to emergency situations
- Annual performance review conducted by OSMRE resulting in no corrective actions or concerns in many years.

ECONOMIC REGULATION:

- Safe service
- Reliable service
- Reasonable cost

SITING:

- Assure that facilities are sited in an orderly manner to ensure that energy needs are met and fulfilled in an efficient manner
- Assure system reliability and integrity
- Assure adverse human and environmental effects are minimized

TELECOM:

- Assure designation of new eligible telecommunication providers is in the public interest
- Assure the longevity of North Dakota's single area code

Program Statistical Data

WEIGHTS & MEASURES: During the 2019-21 biennium, staff inspected and tested 8,883 weighing and measuring devices and reviewed 37,278 test reports filed by private device testers. The Commission also has a Quality Assurance (QA) Program that reviews new installations for compliance, monitors the processes and test results of registered service persons, and performs onsite reviews prior to the approval of a permanent variance. During the biennium, 402 QA inspections were completed. Revenues generated and deposited into the general fund during the biennium totaled \$88,047.

LICENSING: During the 2019-21 biennium, North Dakota had 312 licensed auctioneers and 149 licensed auction clerks. Revenues generated and deposited into the general fund during the biennium totaled \$36,180.

RAILROAD SAFETY: The Commission employs two rail safety inspectors. The mechanical inspector completed training requirements and received FRA certification in August 2016. Additionally, the mechanical inspector received FRA certification in the HAZMAT inspection discipline in September 2021. The current track inspector was hired in April 2021 and received FRA certification in March 2022. They conduct inspections on all 3,000+ miles of track, class 1 and short line locomotives and rolling stock, HAZMAT receivers, shippers, and railroad transport focusing on the main energy/HAZMAT routes and critical noncompliant areas within the state. During the biennium, the two inspectors had a combined total of 451 inspection days, 52,470 units inspected and found 2,761 defects and 15 violations. The program processed 46 informal complaints dealing with blocked crossings, railroad rights-of-way fencing issues, weed control, train speeds, and train horns.

PIPELINE SAFETY: During the 2019-21 biennium, the Commission completed 398 inspection days conducting gas pipeline safety inspections of 5 distribution system operators, 10 transmission system operators, 1 liquified natural gas facility operator, and 7 gathering system operators on a combined total of more than 4,150 miles of natural gas pipeline.

DAMAGE PREVENTION: During the 2019-21 biennium, the Commission completed 51 complaint proceedings resulting in penalties totaling \$57,400.

RECLAMATION: During the 2019-21 biennium, one new permit application was approved. Fourteen significant permit revisions were received and/or approved. Forty-four insignificant permit revisions were received and/or approved. Nine permit renewals were received and/or approved. Five bond release applications were received and/or approved. Final bond release was approved on 628 acres. The division conducted 1,069 inspections on 26 inspectable units and one Notice of Violation was issued where \$1,500 in penalties were assessed and collected.

At the end of the biennium, 134,282 acres were under permits held by eight companies for eight mines. Of these, seven were active and the other one was inactive and under reclamation.

AML: During the 2019-21 biennium, major underground mine reclamation projects were conducted to inject cementitious grout or foamed sand into underground mine voids beneath public roads and both residential and commercial sites near Noonan, and Williston. Exploratory drilling projects were conducted near Belfield, Beulah, Garrison and Williston. Major construction projects to backfill dangerous surface mine highwalls and eliminate spoil piles were conducted at 10 abandoned mines in Hettinger, Morton and Stark Counties.

Sinkhole filling projects were conducted to fill approximately 270 hazardous sinkholes caused by underground mine collapse at numerous sites. Emergency projects were conducted to fill extremely hazardous sinkholes caused by an underground mine collapse along ND Highway 36 near Wilton and Highway 200 near Beulah. Another emergency project was undertaken in conjunction with the State Water Commission to reduce the hazard of an imminent embankment breach of an abandoned mine impoundment southeast of Tioga.

PUBLIC UTILITIES:

During the 2019-21 biennium, the Commission received siting applications for 11 pipelines, 2 gas processing plants, 2 wind farms, and 3 electric transmission lines. The Commission sited \$870 M worth of energy-related projects. The Commission held 18 formal hearings to obtain public input on utility issues and new projects. The Commission was able to adapt to virtual public hearings in a short amount of time, and no hearings had to be canceled or postponed due to COVID-19.

The Commission received and processed more than 27,000 complaints, inquiries and comments. A large majority of the contacts included public input for siting cases. The Commission received and approved 22 interconnection agreements and 39 interconnection agreement amendments.

ADMINISTRATION:

The Commission processed 930 cases during the 2019-21 biennium; 98 percent of all formal cases were processed without the need for a formal hearing.

Explanation of Program Costs**Compliance:**

The Commission's Compliance Division is made up of Weights & Measures; Auctioneer/Auction Clerk Licensing; Railroad Safety; Pipeline Safety; and Damage Prevention (formerly part of the PUD Division)

WEIGHTS & MEASURES: The costs to operate the Weights & Measures Program are primarily comprised of wages and travel expenses for the inspectors. Due to the closing of the Metrology Lab in 2009, spending includes travel to an out-of-state laboratory for calibration of weights & measures standards used for testing of commercial weighing and measuring devices.

LICENSING: Auctioneers and auction clerks are licensed by the Commission and must carry bond coverage. At the end of the biennium, the Commission had 312 licensed auctioneers and 149 licensed auction clerks. Operating costs are primarily related to staff time for processing and issuing new licenses and annual license renewal, complaint investigations, and reviewing auction school courses for approval for use by individuals interested in becoming a licensed auctioneer in North Dakota. Additionally, the 67th Legislative Assembly authorized the Commission to conduct Criminal History Record (CHR) checks at the State and Federal level. CHR checks are required for initial applicants for license only and not used for license renewals.

RAILROAD SAFETY: The costs to operate the Railroad Safety Program are comprised of wages and travel expenses for the inspectors. Initial expenses included purchasing of inspection equipment and other safety-related devices required by the industry. Laptop computers, printers, and air cards were provided by the Federal Railroad Administration (FRA). Required out-of-state annual training is reimbursed through the FRA Rail Safety Grant Program.

Funding for the Rail Safety Program comes from a diesel fuel assessment paid by the railroads, a portion of which is set aside to fund rail safety initiatives. It is distributed by the NDDOT.

PIPELINE SAFETY: The costs for the Gas Pipeline Safety Program are primarily comprised of wages and travel-related costs for the inspectors. Up to 50% of the funding is administered by a grant through the Pipeline & Hazardous Materials Safety Administration (PHMSA) under the U.S. Department of Transportation.

DAMAGE PREVENTION: This program was moved from the Public Utilities to the Compliance Division. The majority of costs for the Damage Prevention Program is wages. A large portion of funding used to administer the program is provided by PHMSA through a grant.

Reclamation:

The reclamation programs are comprised of the Coal Mine Reclamation Program and the Abandoned Mine Lands (AML) Program. Most of the costs for these programs are paid by the federal government on a cost reimbursable basis. The funds are primarily used to pay for salaries and to procure outside construction and other services for abandoned mine lands reclamation.

The costs of administering and enforcing the coal regulatory program are split approximately 36 percent state general funds and 64 percent federal funds, while the AML program is 100 percent federal funds. The Commission also collects indirect costs from the federal government on the salaries of the employees that work on these programs. As part of the OSMRE budget requests for the past several years, the administration has proposed reducing the amount of federal dollars nationwide for states. While the proposed reductions have not been enacted by Congress, the adequacy of future federal funding continues to be a concern.

Based on federal legislation enacted in late 2021, the federal reclamation fees used to fund the AML program will be collected until September 30, 2034. The AML fee on North Dakota lignite changes from eight cents per ton to 6.4 cents per ton. In addition to the reauthorization of fee collection, an additional \$11 Billion in Treasury Funds was appropriated for disbursement to the AML programs over the next 15 years. A minimum of \$20 Million per eligible state or tribe will be dispersed in annual grants. During the 2019-21 biennium the Commission received a reduced grant amount due to federal sequestration of \$2.8 million each year. The Commission is scheduled to receive \$3 million a year, pending sequestration, for the remaining life of the program.

Public Utilities:

The Public Utilities Division is made up of Siting, Economic Regulation and Telecommunications. The majority of the requested funds is related to salaries, but also includes operating expenses necessary to monitor and enforce compliance with the statutory requirements of public utility companies.

Administration:

The Commission's administration is comprised of three statewide Elected Officials, Executive Director, and staff. The salary and wages line item includes the bulk of program expenditures. Remaining expenses are to support the general needs of the agency.

Program Goals and Objectives

WEIGHTS & MEASURES:

- Inspect, test, certify, and monitor all commercial weighing and measuring devices every 15 months.
- Test and license all registered service companies and self-certifying companies and administer their compliance with laws & rules.
- Maintain traceability of all weight/volume standards to the National Institute of Standards and Technology.
- Develop and recommend rule changes and enforcement procedures.
- Provide timely and accurate information in response to inquiries/complaints.

LICENSING:

- Protect the interests of the North Dakota patrons while regulating auctioneer and auction clerk licensees by licensing, bonding, and investigating complaints.

RAILROAD SAFETY:

- Serve the public, railroad employees and railroad customers by implementing inspection and compliance programs that reduce the potential for injuries, death, and property damage in and along railroads.
- The program's goal is to reduce the number of accidents, derailments and other equipment failures experienced. This is achieved through the follow strategies:
 - o Expand safety inspections of track infrastructure.
 - o Utilize enforcement actions to include education, notification, and penalties.
 - o Work with railroads and shippers to upgrade safety and community relations.
 - o Ensure crude oil/HAZMAT routes are inspected regularly, as well as components and equipment used to transport/carry commodities.
 - o Serve as a safety resource and provide guidance regarding federal and state laws.
- Additionally, state law provides that the Commission is charged with representing the state's rail interests before federal agencies and in direct negotiations with rail carriers. The Commission has jurisdiction over certain railroad activities in intrastate commerce and works on behalf of North Dakotans to resolve railroad related issues.

PIPELINE SAFETY:

- The goal of the program is to enhance public safety through enforcement of state and federal laws governing gas pipeline safety for intrastate natural gas transmission and distribution systems; and by maintaining liaison with and availability for special assistance to PHMSA regarding interstate natural gas transmission systems and all hazardous liquids transmission systems.

DAMAGE PREVENTION:

- The goal of the program is to reduce violations, reduce accidents, and increase education of North Dakota's One Call laws through violation enforcement, billboards, Safe Digging Month, participation in 811 Day at the State Fair and other educational events.

RECLAMATION:

- Carry out mine permitting, inspection and enforcement, and bond release activities in a manner that provides protection to the environment and property owners, while being responsive to the needs of the mining industry.
- Evaluate and adjust the program on an ongoing basis to achieve the optimum balance among environmental protection, least-cost industry operations, and landowner needs.
- Seek ways to improve the program at both the state and federal level and foster valid engineering and scientific research and advances. Promote public awareness of the program through increased contact with relevant organizations and potentially affected landowners.

408 Public Service Commission

Agency 408

- Maintain maximum staff effectiveness by providing training and professional growth.

ABANDONED MINE LANDS (AML):

- Reclaim AML sites on the ND AML Inventory.
- Reclaim hazardous AML sites not on the inventory but discovered through exploratory drilling or public information.
- Reclaim emergency sites as the highest work priority. Develop emergency reaction plans that will reduce the time taken to eliminate the hazard.
- Use AML funds as effectively as possible, seek additional funding sources, engage in partnerships, increase public awareness and maintain professional contacts.
- Maintain funds in the state reclamation set-aside account so that when the federal program is over the state will have financial resources to address AML hazards.

PUBLIC UTILITIES:

- Mission statement: to provide utility customers with reliable & safe service at reasonable & just rates.
- Goals include:
 - o Establish & maintain a fair & reasonable regulatory environment in which utility services are provided.
 - o Provide information to consumers & the public to inform them of their rights & responsibilities.
 - o Protect North Dakota's environment & safety by maintaining effective oversight of the construction of energy conversion & transmission facilities.

ADMINISTRATION:

- The Commission's administrative functions are handled by its Executive Director and staff in programs covering functions such as legal, technology, accounting & consumer affairs. These programs provide legal, technology, budgeting, accounting, administrative, consumer affairs & personnel-related services to the Commission. These support services are provided to help the Commission carry out its statutory mandates in a timely, responsive, effective & efficient manner.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Reclamation Division carries out the Surface Mining Control and Reclamation Act of 1977 (SMCRA) in a partnership effort between the State of ND and the US Department of Interior’s Office of Surface Mining (OSM). The Reclamation Division evaluates surface mining permit, permit revision and renewal applications, makes recommendations to the Commissioners regarding permit issuance, and carries out inspections of coal mines to ensure compliance with the program’s requirements. Since the inception of the program in the 1970s, the State has operated at the

408 Public Service Commission

Agency 408

minimum staffing required to maintain the state program. Due to the complexities of this program, it requires nearly three years of on the job training before the full breadth of rules, laws, and processes are understood. This is a challenge as employees typically only stay with a company for 4 years and newer employees require more time to complete their work. In addition to the changing workforce, the coal mining industry is also having challenges retaining employees due to industry perception and in some cases, companies filing for bankruptcy. This adds additional work to already limited staff. An additional position would allow effective cross training, aid in succession planning and provide a backstop from the federal government stepping in to take over the administration of this program if we cannot maintain minimum staffing and appropriate program support.

Necessary resources for implementation (including FTE's)*: We are requesting 1 FTE to hire an Environmental Scientist at \$6,300/month. No operating funding is needed as all training will be covered by OSM. The federal government will cover 64% of the program cost through an ongoing federal grant with the remaining 36% being funded by matching general funds.

Are resources being redirected or are they new or additional (including FTE's)*: These are new/additional resources.

Who is served and impact of not funding*: This position protects the environment and property owners while being responsive to needs of the mining industry. Without this position, our ability to succession plan and transfer institutional knowledge is limited and we continue to be at risk of losing the primacy of the program to the federal government if we cannot maintain minimum staffing and appropriate program support.

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Public Utility Division covers a wide breadth of services to the citizen of North Dakota including: engaging and monitoring Regional Transmission Organizations (RTOs) and the Federal Energy Regulatory Commission (FERC) to ensure North Dakota's interests and voices are being heard in the discussions on energy generation mix, resource planning and pricing, and grid reliability; conducting a thorough and meaningful reviews of rate cases, advanced determinations of prudence, public convenience and necessity, and other miscellaneous economic regulation applications of seven, multi-billion dollar, investor-owned retail electric and gas utility operators to ensure fair, just, and reasonable rates; siting energy generation, electrical power transmission and transmission pipeline infrastructure; and limited regulation of telecommunications. All of this work is covered by three analysts and a director. Due to the rapid and dynamic changes happening in the energy industry, this is no longer sufficient staff to cover these critical areas.

408 Public Service Commission

Agency 408

Necessary resources for implementation (including FTE's)*: We are requesting 2 FTEs – one Public Utility Analyst at \$7,500/month and one Electrical Engineer at \$8,750/month. We also are requesting \$18,500 in operating to cover professional development, travel, dues and memberships. The entire funding request is general fund but we could explore the possibility of self-funding a portion of this request. Self-funding would require an additional assessment on utilities which is passed to consumers.

Are resources being redirected or are they new or additional (including FTE's)*: These are new/additional resources.

Who is served and impact of not funding*: Every citizen and business in North Dakota is impacted by electric rates and resource mix in some way. Without these positions, we will be unable to effectively regulate investor-owned utility interventions on behalf of ND citizens and industry in front of FERC and influence RTO decisions effecting reliability, cost, and resource mix which impacts ND's power production.

Indirect Cost Recovery (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	101,700	101,700	0.00	-	101,700	101,700	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	101,700	101,700	0.00	-	101,700	101,700	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The PSC has an indirect cost agreement with the federal government that allows the agency to negotiate an indirect cost percentage and apply this percent to federal salary and benefit costs. This indirect cost recovery is used to support employee salary costs for critical positions that support the entire agency which subsequently reduces the need for general funds. This indirect cost agreement is based on actual expenditures negotiated every two years. Our indirect cost agreement in the 21-23 budget request was 30.50%. Due to reduced actual expenditures, we project the indirect cost agreement for the 23-25 budget to be 26.50%. This 4% rate reduction anticipated by the federal government will lead to additional general fund needs of approximately \$101,700 to support base salaries of current staff. We expect this to be a one-time issue.

Necessary resources for implementation (including FTE's)*: \$101,700 general funding to support base salaries.

Are resources being redirected or are they new or additional (including FTE's)*: These are new/additional resources.

Who is served and impact of not funding*: Due to an anticipated reduction in indirect cost rate by the federal government, and subsequent loss of federal funding, we require more general funds to support base salaries.

408 Public Service Commission

Agency 408

Operating funding for ongoing operations (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	83,600	-	83,600	0.00	83,600	-	83,600	0.00

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Additional operating funding for various divisions to continue ongoing operations. This includes additional funding for dues and memberships to cover the increased membership costs of the National Association of Regulatory Utility Commissioners (NARUC). This national association representing the state public service commissioners and staff who regulate essential utility services increased annual membership dues by over 65%. We are also requesting additional funding for professional development and travel so staff can maintain professional certifications like CPAs, JDs, and PE, third party support costs in order to extend the life of current equipment instead of purchasing new equipment as a replacement, and software maintenance to continue utilizing rate modeling software during utility rate case analysis.

Necessary resources for implementation (including FTE's)*: \$83,600 general fund operating for various divisions

Are resources being redirected or are they new or additional (including FTE's)*: These are new/additional resources.

Who is served and impact of not funding*: Provides opportunities for commissioners and staff to participate in national organizations and training to further ND's interests and fund ongoing operational costs.

Legal Assistant (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Workforce

408 Public Service Commission

Agency 408

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As a quasi-judicial agency, legal processes are engrained in everything we do. We are requesting a legal assistant to be a dedicated resource to the legal division to assist with tracking open cases filed at the PSC, FERC, and FCC, coordinating with PSC General Counsel to execute open record and open meeting requirements, administrative rulemaking, administrative appeals, preparing records, exhibits, scheduling, and hearing organization and preparation. The assistance would help shorten the amount of administrative time for the attorneys so they can engage further in the growing federal, regional, and multistate interactions.

Necessary resources for implementation (including FTE's)*: We are requesting 1 FTE for a Legal Assistant at \$4,500/month and \$3,000 in operating to cover professional development. This position will be eligible for indirect cost recovery so 57% of funding will be general fund and the remaining 43% is supported with federal funds.

Are resources being redirected or are they new or additional (including FTE's)*: These are new/additional resources.

Who is served and impact of not funding*: This will allow us to process Commission work in a more efficient manner and achieve better outcomes with greater impact and fulfill its statutory mandates to protect consumers, the public interest, industry, ratepayers and the environment.

FERC Contractor (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	120,000	-	120,000	0.00	120,000	-	120,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	120,000	-	120,000	0.00	120,000	-	120,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Commission continues to increase engagement with the Federal Energy Regulatory Commission (FERC) to ensure reliable, safe, secure, and economically efficient energy for consumers at a reasonable cost. If we are unable to secure in-house resources through additional staffing, we would need money to retain a consultant to assist with tracking FERC cases, advising the Commission on critical issues and drafting comments for Commission review and submission. FERC cases are as numerous as are the filings within them. Ensuring we have adequate staff or resources to review those cases and filings and make recommendations for comments that North Dakota should file in those cases is not simply important, but necessary.

Necessary resources for implementation (including FTE's)*: \$120,000 in operating money to have a contractor on retainer

408 Public Service Commission

Agency 408

Are resources being redirected or are they new or additional (including FTE's)*: This would be a new/additional resources.

Who is served and impact of not funding*: If we are able to obtain the 2 FTE and resources requested in the Public Utility and Engineer decision package, we do not believe this funding will be necessary. However, just as we are seeing RTOs develop regional energy transmission policies that have an impact on ND, FERC is taking up many topics that will have an impact on our state. Engaging in FERC cases and filing meaningful comments is necessary to ensure our voice is heard and our citizens are protected from the added costs and reduced reliability that will result from the absence of our engagements.

Temporary Salary Funding (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We have several retiring employees with specialized skill sets that we would like to bring back in a temporary capacity to assist the agency with training during the transition.

Necessary resources for implementation (including FTE's)*: \$38,000 in temporary salary funding

Are resources being redirected or are they new or additional (including FTE's)*: These would be additional, one-time resources.

Who is served and impact of not funding*: The public, new and existing employees are served. The impact is the loss of institutional knowledge and limited succession planning.

Rent Model - 40800 (Priority: 11)

Total									20,000		20,000		20,000

State Initiative:* Technology Investment

Justification: A drone would be beneficial to two divisions at the PSC. The Reclamation division could use the drone when mine access is restricted or hazardous; to create timely aerial imagery when adding acres to a new or existing permit, at bond release, at end of the year, for landowner complaints about land impacts, and immediately following Notice of Violations (NOVs); to create timely digital surface models (DSM)s to estimate mine reclamation progress, estimate earthwork volumes, identify surface water flow paths, identify surface water ponding, and find erosional features. The Abandoned Mine Lands (AML) division would use the drone to inspect areas where access is limited or terrain presents challenges on foot. Images collected can be used to make maps, monitor progress and collaborate with other AML staff, contractors, landowners and the public. Autonomous flight missions would allow AML to create digital elevation models of existing ground conditions much faster than traditional survey methods. This would help AML compute earthwork volumes more efficiently and accurately for reclamation projects.

Weights and Measures Equipment (Priority: 7)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Total					-	-	-	-	70,000	-	70,000	-	-

State Initiative:* Technology Investment

Justification: The Commission currently does not have the ability to test, quality assure the work of registered service companies or technicians who certify high-flow diesel dispensers or respond to complaints on these devices. These devices are used at truck stops to dispense diesel fuel into semis and other large over the road vehicles. Purchasing this prover trailer will allow the PSC to test these devices and provide increased driving safety for our inspectors and reduced weight and wear and tear on vehicles because the trailer can be parked when not needed. While the price initially seems high, this is precision measuring equipment that is being outfitted to be robust and have a long service life.

Copier Replacement (Priority: 8)

Statutory Authority

North Dakota Century Code Chapters 2-02, 2-03, 2-04, 2-05, 2-06, 2-08, 57-40.5, 57-43.3.

Agency Description

The North Dakota Aeronautics Commission supports aviation activities in the state through communication with state, local, and Federal Aviation Association (FAA) officials, congressional offices, and national aviation groups. The commission is responsible for administering North Dakota’s laws regarding the registration of aircraft, aircraft dealers, aerial applicators, and the collection of aircraft excise tax. The Aeronautics Commission provides grant funding for airport infrastructure projects and manages aviation education initiatives and programs throughout the state. The office also provides airport planning services, helps to maintain the state’s Automated Weather Observation Systems (AWOS), and provides airport inspections for the general aviation airports.

The Aeronautics Commission also works to maintain and update publicized planning documents to help maintain and grow North Dakota’s aviation transportation system. Statewide airport capital improvement plans, aviation economic impact studies, airport directories, state aviation system plans, and pavement condition index studies are a few examples of these documents.

Agency Mission Statement

To serve the public by providing economic and technical assistance for the aviation community while ensuring the safe and cost-effective advancement of aviation in North Dakota.

Major Accomplishments

-
- 1 Provided technical and financial assistance to the 89 public-use airports across the state.

 - 2 Coordinated financial assistance through the Federal Aviation Administration and state capital improvement plan for 54 airports within North Dakota that belong to the National Plan of Integrated Systems (NPIAS).

 - 3 Provided approximately \$14 million dollars in state airport infrastructure grants throughout the 2021-2023 biennium and leveraged approximately \$100 million of federal aid for North Dakota airport projects during that same period.

 - 4 Completed an update to the Pavement Condition Index Study that inventoried and provided a cost-benefit maintenance plan for the 59.5 million square feet of pavement that exists on North Dakota’s public-use airports.

 - 5 Continued to provide the Flight Instructor Assistance Program (FTAP) to offer assistance to rural public use airports that are not served by an active flight instructor.

 - 6 Continued the Air Carrier Airport Management Intern Program for the eight commercial service airports.

 - 7 Continued the Airport Passport Program and provided completion awards to encourage pilots to visit all the state’s public-use airports.

 - 8 Provided aviation education grants and support for schools and aviation museums to encourage youth to pursue careers in Aeronautics & STEM related fields.

 - 9 Collaborated with the North Dakota Aviation Association to establish and support an annual aviation career expo and established endowed and non-endowed scholarships for students pursuing a career in aviation.

 - 10 Collaborated with the University of North Dakota and the North Dakota Aviation Association and received a \$500,000 FAA Workforce Development grant to assist in providing professional training opportunities to high school educators.

Major Accomplishments

-
- 11 Distributed airport directories and aviation education material and supplies to communities throughout the state.

 - 12 Continued the windsock program which provides up to one new windsock annually to each public-use airport in North Dakota.

 - 13 Continued a statewide contract to provide routine maintenance and updates to North Dakota’s Automated Weather Observation System’s (AWOS).

 - 14 Provided educational opportunities for the public, the aviation community, and public airport sponsors through airport inspections, training conferences, and community meetings.

 - 15 Updated the agency’s Aviation Information Management System (AIMS) to allow efficiency and timely gains in working with aircraft registrations, aircraft excise tax payments, aircraft dealer licensing and aerial applicator licensing.

Critical Issues

-
- 1 **Maintaining and Improving Airport Infrastructure:** The commission is challenged to ensure that the state’s airports are maintained in a safe condition and are able to expand to accommodate the growing needs of their communities. Accommodating the infrastructure expansionary needs while also maintaining current infrastructure throughout the state is a challenge.

 - 2 **Leverage Federal Airport Improvement Program Funding:** Federal grant funding availability and the timing of receiving that funding is always a critical issue for airport infrastructure projects. The commission will continue to work with local, regional, and national leaders to ensure that North Dakota strongly competes for these funds. The availability of state funding to leverage and match federal funds for airport projects is also a priority of the agency.

 - 3 **Ensuring the Safe Integration of UAS into the National Airspace System:** North Dakota has been operating as one of the six unmanned aerial system (UAS) test sites within the United States. This new technology will require changes to airspace regulations, modernized equipment, new aviation fields of expertise, and additional infrastructure to provide in-state support. The commission will continue hold an active role in ensuring that the UAS business is supported in North Dakota and will work with our UAS test site to successfully implement the new Statewide UAS network - VANTIS. The state will need to eventually determine how to regulate the industry (registration and excise tax of UAS) and if additional agency functions or employees will be needed to accommodate the public and private needs of this industry.

 - 4 **Aviation Education Efforts:** The international pandemic has had a large impact of the aviation sector and the industry is currently experiencing workforce shortages. The agency will continue to work with our high schools, aviation museums, aviation associations, and the University of North Dakota to attract and grow the capacity of training an aviation workforce.

Performance Measures

Agency Performance Measures –

The agency tracks a variety of data and performance metrics to track both the success of the agency for helping to fund and complete airports projects as well as to monitor the health of aviation throughout the state. Examples of metrics include:

- Airline passenger enplanement and deplanement counts
- Airline Routes and top destinations of passengers
- Aviation Fuel Sales

412 Aeronautics Commission

Agency 412

- Aircraft Registrations
- Aerial Applicator Licenses and acres sprayed annually
- Aircraft Dealer Licenses
- Pilot Numbers
- Student counts for Aviation Education efforts
- Federal, State, and Local Contributions to airport infrastructure projects
- Airport Capital Improvement Plan Needs
- State Aviation System Plans also contain multiple metrics that benefit the public and aviation system such as:
 - o Pavement Condition Analysis for all 71 paved public airports
 - o Economic Benefits and Jobs created by the public airports
 - o Aviation System Plan has a host of additional airport metrics used to understand current system and to help plan and improve it.

Program Performance Measures – 100

Performance measures and results reporting are not currently used by the agency.

Program Performance Measures – 200

Performance measures and results reporting are not currently used by the agency.

Program Statistical Data

Program Statistical Data – 100

The agency works with and provides services to approximately 3600 pilots, owners of 2000 registered aircraft, 45 aircraft dealers, 100 aerial applicators, 56 fixed base operators, 81 general aviation airport managers and 8 air carrier airport managers.

Provides aviation education information and grants to various entities who are looking to promote aviation education.

Program Statistical Data – 200

The agency provides management assistance to 89 public use/owned airports. Only a few of these airports have full-time paid managers. All airports rely on the Commission to give guidance and assistance to achieve and maintain an efficient airport system. The agency is able to track state, local, and federal funds spent on airport infrastructure projects.

Explanation of Program Costs

Explanation of Program Costs – 100

The material amounts requested in this program cover the salaries/wages and operational costs for the agency. This program allows the agency to carry out the mission and regulatory requirements of the North Dakota Aeronautics Commission.

The educational grant program allows the Commission to fund activities which help to develop and support aeronautical activities and promote aviation youth programs.

Explanation of Program Costs – 200

State airports grants are available to the 81 general aviation airports and the 8 air carrier airports in the state. The grant programs provide funds to the airports for both maintenance and expansion related projects. Very often the state funds are matched by federal funds which allow a tremendous return on investment for state and local funds.

This program also funds the aviation planning efforts of the Aeronautics Commission. Airports are the gateway to each city and can be a key factor for the economic development for a city supporting an airport. Statewide planning efforts help to provide a systematic level view of the airport system and assists to plan and justify appropriate future investments.

Maintenance and capital improvements of the state's two airports, Garrison Dam Recreational Air Park in Riverdale, and the International Peace Garden Airport in Dunseith, are also funded within this program.

Program Goals and Objectives

Program Goals and Objectives – 100

The Aeronautics Commission encourages and supports the development of aviation activities in the state. The agency represents and communicates state concerns and positions at all levels of government while maintaining the regulatory environment of aviation activities as required.

Program Goals and Objectives – 200

Airport Grant Program – The commission provides airport infrastructure funding to ensure orderly and cost-effective growth for the improvement and maintenance of the state's airport system. The commission conducts annual inspections of all general aviation public-use airports every 3 years and is able to provide a first-hand assessment of current pavement conditions at airports. The airport inspection program also allows for the evaluation of safety issues at the airports and allows the state to ensure that the data for each airport that is disseminated to pilots is up to date.

State Owned Airports – The agency coordinates the capital improvements of the International Peace Garden Airport near Dunseith, North Dakota and the Garrison Dam Recreational Airpark near Riverdale / Pick City, North Dakota. Both of these airports are operated by the state.

412 Aeronautics Commission

Agency 412

State System Planning - To foster a timely competitive air transportation service, interstate and intrastate, in order to maintain the state's access to the national air transportation system. This is provided through the updating of statewide planning efforts. This program provides assistance to the Commission in forecasting airport needs into the future and evaluate future funding plans this program has allowed the development of airline enhancement strategies, coordination of new business growth on the airports, and can provide the economic impact of aviation on the state's economy.

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2025

Description: The North Dakota Aeronautics Commission owns and manages the International Peace Garden Airport which consists of a 3000 X 60 ft paved runway. A separate Canadian & U.S. aircraft parking ramp is also available for aviators to directly access Customs. The estimated 260,000 square feet of asphalt pavement on the airport is currently at the end of its useful life and is in need of a rehabilitation. A recent pavement report was created for the airport as a part of our Pavement Condition Index Study and is provided as an attachment. The report provides a detailed breakdown and cost estimate of the recommended pavement repairs.

The North Dakota Aeronautics Commission is currently planning to utilize a professional engineering firm in 2023 to core the pavements. An engineering analysis will provide a design based upon the final recommendation of an appropriate pavement rehabilitation solution. NDAC is currently targeting the year 2024 to bid and complete the construction on the proposed project. It is anticipated that 90% of the overall project will be funded with federal infrastructure grant dollars from the Airport Improvement Program and the Infrastructure Investment and Jobs Act. The remaining 10% of the project costs are planned to be funded through the North Dakota Aeronautics Commission special fund.

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: The North Dakota Aeronautics Commission is requesting an optional budget package that would allow an additional \$4 million in special fund appropriation to be utilized for airport infrastructure grants. This additional allocation can be made possible due to a healthy Aeronautics Commission Special Fund balance which is a result of unexpected revenue increases over the past two years. The revenue received from aviation fuel taxes have fully recovered to pre-pandemic levels. Additionally, aircraft excise tax revenues have been at record high levels due to the recent federal stimulus, a low interest rate environment, and growth in the aviation sector which has led to more aircraft purchases and trade-ins than originally expected. As of the end of our recent fiscal year, the ND Aeronautics Commission is currently \$2.4 million ahead of the total biennial budget projections within the aircraft excise tax revenue line item.

The additional \$4 million allocation that is requested within this optional budget request would be utilized next biennium to provide airport infrastructure grants to high priority projects at the 89 public-use airports throughout the state. Additional federal funding has also become available through the Infrastructure Investment and Jobs Act and these state funds can be utilized to help leverage federal funding within this program as well as the federal funds from the ongoing Airport Improvement Program (AIP). Project inflation has also been prevalent throughout the state on construction projects and these additional funds will provide greater assistance to the local municipalities that may not be able to offset the unanticipated increased costs with their currently available local funds.

This Fall, the Aeronautics staff will be updating the statewide capital improvement plan to receive an updated snapshot of all the airport project needs within North Dakota. Our most recent capital improvement plan shows that \$435 million of airport projects have been identified within the next 5 years and \$450 million in projects have been identified for years 6 to 10. Essentially, an estimated \$1 billion in airport projects have been identified over the next 10 years which shows that airport infrastructure needs are prevalent throughout the state. Any additional state funds that can be made available for these projects will help to continue to maintain and grow our airport system while reducing the financial burden on our local municipalities.

Statutory Authority

North Dakota Century Code Titles 6, 13, and 51

Agency Description

The Department of Financial Institutions is a self-funded regulatory agency responsible for the oversight of state-chartered banks, credit unions, trust companies, money brokers, collection agencies, mortgage loan originators, deferred presentment service providers (payday lenders), debt settlement providers, and money transmitters doing business under the laws of the state of North Dakota. The department conducts examinations to determine the safety and soundness of the financial institutions and monitor compliance with applicable rules and regulations.

The services financial institutions provide in North Dakota are the foundation of main street and touch every citizen. The department’s responsibility is to ensure the safety and soundness of these institutions and therefore the continued economic development and the well-being of North Dakota communities and citizens.

Agency Mission Statement

To maintain public confidence in North Dakota financial institutions by ensuring the financial industry operate in safe and sound manner while complying with applicable rules and laws.

Major Accomplishments

- 1 Obtained re-accreditation by the Conference of State Bank Supervisors and the National Association of State Credit Union Supervisors in our Bank, Mortgage, and Credit Union divisions
- 2 Modernization of administrative code to reduce regulatory red tape.
- 3 Continued engagement with federal counterparts to ensure North Dakota interests are considered in the drafting of federal rules, including ongoing appraisal rule amendments and ensuring the availability of agricultural financing in a climate change-driven federal regulatory environment.
- 4 Provided crypto currency guidance to financial institutions when federal agencies failed to do so, as well as provided guidance on bank-owned life insurance products.
- 5 Took action against nefarious actors to protect the public as well as the financial institutions.
- 6 Maintained bank and credit union examination frequency within the requirements set by statute and federal regulations, despite not being able to go on-site during the COVID-19 pandemic.

Critical Issues

- 1 Priority #1 will always be the safety and soundness of our financial institutions. This will be obtained by: -Maintaining examination schedules -Identifying and addressing problems quickly -Proactive outreach and monitoring -Training of examination staff -Coordinate with federal counterparts
- 2 Team Member Retention -Takes 3-5 years to be fully trained -Approximately one-third of agency has been on staff less than three years -Typically lose people within 3 years, just when they are starting to learn the job -Recruited by banks
- 3 Financial Literacy -Schools -Elder financial exploitation -Under-banked/non-banked population -New financial products

Critical Issues

-
- 4 Money Transmission/Virtual Currency -Crypto currency oversight is evolving -Ensure oversight remains with state government versus opening it up to be regulated federally -Increase examinations and involvement -Efficiencies sought in collaboration with other states -Provide leadership in areas such as IT review

 - 5 Mortgage Servicing -Nonbank mortgage servicing has grown from 6% to 60% of government agency mortgage markets in the last 10 years -We currently only oversee origination, not servicing -ND does not have a seat at the table

 - 6 Information Technology -Increase automation -Enhance monitoring using AI -State and federal collaboration

 - 7 Non-Depository Institutions -92% increase in licensees in two years -Only four people overseeing this area -No staff change since 2011, when our total license number was 1,400 -Now currently have over 9,000 licensees -Two bank examiners taking care of money transmitter exams, but all other exams are being done by the four non-depository staff -Need dedicated licensing staff

 - 8 Large Banks -Need to keep pace with growth and expansion of financial institutions and services -Need to ensure strong state presence to protect our community banks -Need the skills and resources to properly assess their programs for risk

 - 9 Data Analytics -More examination processes can now be handled offsite with enhanced monitoring -Some states are adding data analytics as a stand-alone position -System is in place, need people to have the time to use it, and the skillset to interpret the data -Good data analytics can help us be more predictive and proactive in our oversight -Data analytics and automation will increase in importance 5-10 years from now – need to train and invest in people today to be ready and a leader to do this

 - 9 IT Service Providers -Most community banks outsource IT – especially for their core providers -We have oversight over the service providers and the authority to examine -FTE to be full time focus on IT examinations – to do more complex bank IT exams & service providers

 - 10 Preventing federal preemption to ensure local control and that North Dakota interests are considered.

 - 11 Attorney General’s Office resources: -Increase the amount of Assistant Attorney General time allocated to our agency by having one attorney dedicated to our agency -A dedicated attorney will allow for the attorney to give more focus on financial industry legal matters. -Ongoing Supreme Court case, which will continue into the next biennium

 - 12 Dynamics System -Microsoft Dynamics will require ongoing support to maintain upgrades and do bug/fix work. -Maintaining the system will ensure that the financial institution users are confident that the information provided within their portal is secure and they are comfortable using it. -Ongoing maintenance will also improve and continue efficiencies internally.

Performance Measures

- 1. Meeting mandates by performing examinations within timeframes established by statute and agreements with Federal regulatory agencies.
- 2. Obtaining re-accreditation status for all three divisions within the Department. Accreditation ensures the Department is in compliance with industry standards and best practices through an independent review process.
- 3. Recognition by Federal Counterparts of Department work products, which reduces burden on North Dakota citizens by allowing more local state level oversight in lieu of more Federal regulation.
- 4. Timely identification of problems within the industries and guidance issued promptly to help resolve the issues.
- 5. Maintain an agency that consists of highly trained and experienced examiners to implement the mission, duties, and responsibilities of the agency.

Program Statistical Data

The Department of Financial Institutions has two chief examiners, 15 bank examiners, four credit union examiners, four non-depository examiners, and five office staff to supervise and examine 59 banks with 296 locations in 5 states, four trust companies, 19 credit unions with 108 locations in two states, 607 collection agencies, 563 money brokers, 166 money transmitter companies, 6,805 mortgage loan originators, 4 debt settlement service providers, and 32 deferred presentment service providers. In addition, the Department examines the Bank of North Dakota on a bi-annual basis. The percentage of the financial services market overseen by the Department continues to increase (e.g. state-chartered banks had a market share of 61% of deposits as of June 30, 2019, up from 53% of the deposit market five years earlier).

Explanation of Program Costs

Salaries represent 81 percent of the Department budget. Travel expenses, which represent 27 percent of the operating expense request, decreased from the prior biennium of 40 percent of operating expenses. These travel costs are primarily for vehicle, motel and meal costs for the bank examiners, credit union examiners, and consumer investigators. Travel costs have decreased significantly due to COVID-19 and the need to conduct off-site examinations. We have only recently returned to limited on-site examinations. Due to this fact, we have only used approximately 10 percent of the travel budget as of May 2022, but expect this to increase as we move to a post-COVID normal. Professional development represents 21 percent of the operating budget and encompasses continuing education to acquire the skill required to succeed, participation in professional organizations, and other areas to improve job performance. Data processing expenses represent 20 percent of operating expenses and are primarily for desktop and technology support, as well as project management for specific IT projects.

Program Goals and Objectives

The Department will focus on successfully retaining national accreditation from the National Association of State Credit Union Supervisors (NASCUS) for the credit union division and from Conference of State Bank Supervisors (CSBS) for the banking division and mortgage division. The accreditation process enhances the function of the Department since it requires staff to review and enhance the aspects of the Department operations and encourages the Department to strive for continuous process improvement to meet higher industry standards. To ensure the safety and soundness of institutions, the examination staff continues to maintain bank and credit union examination frequency within the requirements set by statute, as well as federal examination frequency requirements. The Department issues administrative orders to problem institutions, and more closely supervises these institutions to ensure the corrective programs are implemented as expeditiously as possible. The Department has developed a data driven monitoring system, which assists in identifying and proactively addressing potential problem situations. The State Banking and Credit Union Boards continue to act on applications in a reasonable time-frame while still providing public comment opportunity.

The number of licenses issued to money brokers, collection agencies, mortgage loan originators, deferred presentment service providers (payday lenders), debt settlement providers, and money transmitters continues to increase on an annual basis. The Department has utilized the National Multi-State Licensing System (NMLS) and increased the cooperation with other states to issue licenses in a more efficient manner. The Department will continue to explore further cooperation with state counterparts for nationwide licensees to enhance efficiencies and provide North Dakota citizens with financial services in a timely manner.

The Department continues to focus on attracting and retaining qualified individuals and finding ways to reduce turnover in the Department.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We are requesting eight additional FTEs. The additional resources will allow us to provide stable oversight to prevent federal regulator preemption, keep pace with growth and expansion of financial institutions and services, and manage the increase in non-depository institutions (non-banks).

When a bank reaches \$10 billion in assets it is considered a "large bank" and the supervisory oversight changes to an ongoing review rather than once a year examinations. The federal regulators dedicate examiners to large bank supervision and the state, as the chartering authority, needs to ensure strong participation to protect our community banks. Bell Bank achieved the large bank designation in 2021 and we have other banks growing rapidly. We need the skills and resources to properly assess their programs for risk. We are requesting one FTE to work as an examiner for large banks.

Non-depository institutions include payday lenders, collection agencies, money transmitters, debt settlement providers, and money brokers, which include mortgage companies and individual lenders. There has been a 92% increase in non-depository licensees over the past two years. We have over 9,000 licensees

413 Financial Institutions

Agency 413

(about 5,000 of these are mortgage loan originators). We only have four people overseeing this area. We have not added staff since 2011. At that time our total license number was about 1,400. In a recent 90-day period there were 2,300 amendments and 4,500 work items. There is a need for dedicated licensing staff. We are requesting one FTE for this licensing position. Due to the exponential growth in the non-depository division, we are also asking for one FTE as a non-depository examiner to help oversee the non-depository institutions.

Money transmitters, including FinTechs and virtual currency, has grown. States worked together on a model law with input from the regulated industry to ensure the law is consistent across the country. This will be introduced in the 2023 ND legislative session. This will replace the current money transmission statute and include oversight of transmissions involving crypto currency. Currently we are using two bank examiners to cover the examinations of the money transmitters. We are requesting one FTE for the money transmitter/virtual currency role.

There is currently no oversight of mortgage servicers in North Dakota. Some companies originate and service loans. We only license the origination, not the servicing. Non-bank mortgage servicing has grown from 6% to 60% in the secondary market in the last 10 years with no state oversight. North Dakota does not have a seat at the table during national level regulatory discussions. When we received re-accreditation, it was recommended that we license mortgage servicers. Of 41 states, 26 (63%), including our surrounding states, regulate this important industry. We are requesting two FTEs in the mortgage servicing area. This work will include the licensing, oversight, and examinations of mortgage servicers.

Data analytics and automation will increase in importance over the next 10 years. It is important to train and invest in people today to be a leader in this area. More examination processes can now be handled offsite with enhanced monitoring. Good data analytics can help us be more predictive and proactive in our oversight. Some states are adding data analytics as a stand-alone position. We have the systems in place, we need people to have the time to use it and the skillset to interpret the data. We are requesting one FTE for data analytics.

Most community banks outsource information technology services, especially for their core service providers. Therefore, vendor management is very important. We have oversight for the service providers and the authority to examine; however, we do not have the staff to do so. There is also the opportunity to participate in examinations on the national level, to ensure North Dakota interests are considered. This FTE would be focused on IT examinations to do more complex bank IT examinations and service providers. We are requesting one FTE to be focused on IT service providers.

We are not growing government, rather responding to an explosive growth in the industries we oversee.

Necessary resources for implementation (including FTE's)*: We are requesting FTEs for the following:

- 1 Examiner for Large Banks
- 1 Licensing Examiner
- 1 Money Transmission/Virtual Currency Examiner
- 2 Mortgage Servicer Examiners
- 1 Data Analytics Examiner
- 1 IT Service Provider Examiner

413 Financial Institutions

Agency 413

1 Non-Depository Examiner

Are resources being redirected or are they new or additional (including FTE's)*: The resources would be new FTEs.

Who is served and impact of not funding*: Our presence gives confidence in the financial system and the availability of financial services. We need to lead, we need to innovate, and we need state interests represented, rather than federal. To do so, we need more resources and people. We know this is a big ask but it is necessary to accomplish our goal and hold our own.

Additional Assistant Attorney General Time (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	625,000	-	625,000	0.00	250,000	-	250,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We expect to see an increase in the use of time the Department needs to utilize the Attorney General's Office. We have an ongoing Supreme Court case, as well as additional need in both the non-depository and depository area. This will result in an increase in operating line to cover the additional costs.

Necessary resources for implementation (including FTE's)*: We will utilize the Attorney General's Office for our legal resources. The amount of time needed will increase. We are requesting that an Assistant Attorney General be dedicated to our agency.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested to cover the cost of the additional time used for legal costs.

Who is served and impact of not funding*: This request directly affects the citizens of North Dakota. If we do not have the funds for the increase in legal costs this will have a negative impact on the citizens, potentially allowing the bad actors to continue preying on the people of North Dakota.

413 Financial Institutions

Agency 413

Dynamics Ongoing Maintenance (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	100,000	-	100,000	0.00	100,000	-	100,000	0.00
Total	100,000	-	100,000	0.00	100,000	-	100,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The is the estimated cost for the ongoing maintenance of the Dynamics system. The maintenance will cover ongoing support to maintain upgrades and buy/fix work.

Necessary resources for implementation (including FTE's)*: NDIT will provide the support for the maintenance. This will come out of our operating line.

Are resources being redirected or are they new or additional (including FTE's)*: This is a new resource.

Who is served and impact of not funding*: The financial institutions users and internal staff will be impacted if not funded. The financial institutions need to remain confident in the security of the information they are providing through their portal, as well as have a system that is easy to use. The internal staff need an up-to-date program to ensure efficiency and accuracy of the data.

Statutory Authority

North Dakota Century Code Chapters 10-04, 43-10.1, 51-19 and 51-23

Agency Description

The North Dakota Securities Department protects North Dakota investors and supports legitimate capital formation by businesses. The Department is a regulatory agency that serves the citizens of North Dakota through the administration and enforcement of the North Dakota Securities Act (10-04), the North Dakota Commodities Act (51-23), the Franchise Investment Law (51-19) and Pre-Need Funeral Services Law (43-10.1).

Key elements of this investor protection regulatory structure are the registration of investment firms and professionals (broker-dealer, agents, investment advisers, and investment adviser representatives), the registration of securities offerings and the qualification of securities offerings for registration exemptions, and the registration of franchise offerings. Registration fees collected are a revenue source for the State of North Dakota. The agency regulates the capital formation process and strives to adequately balance the support of efficient, legitimate capital formation with appropriate protections for investors who commit capital to businesses.

Investigation of fraud and other securities law violations result in money returned to North Dakota investors through rescission, recovery and restitution. Enforcement actions produce necessary disciplinary remedies, act as a deterrent for further violations, and generate revenue through statutory civil penalties. Financial education programs delivered by the Department help investors make wise investment decisions and avoid financial fraud and exploitation.

Agency Mission Statement

The Core Mission of the Securities Department is to protect North Dakota investors and support legitimate capital formation by businesses through the administration of the North Dakota Securities Act (10-04). We execute this mission through our efforts in four functional areas:

1. Regulation of the Capital Formation Process
2. Registration of Securities Industry Firms and Professionals
3. Examinations, Investigations and Enforcement Actions
4. Investor Education and Financial Literacy Initiatives

Our Agency Vision: With a focus on inclusive prosperity, we safeguard the integrity of capital markets and support financial literacy improvement, so people of all backgrounds can confidently and capably invest to build a secure financial future.

Major Accomplishments

-
- 1 In response to the Covid-19 pandemic, the Department first issued an electronic filing mandate for specific filing types on April 30th, 2020 taking effect June 1st, 2020. Since then, the Department has expanded the mandate and as of November 2021, all filing types are required to be filed electronically through various filing systems, including Electronic Filing Depository (EFD), North Dakota Securities Filing Portal, BlueExpress and the Central Records Depository (CRD). The Department receives approximately 155,000 filings annually through these electronic filing systems.
-

Major Accomplishments

- 2 In October 2020, the Department began working with a Developer to build a new electronic system for investigators and examiners to track and main records related to investigations and examinations. The software previously used by the Department was no longer meeting the needs of the users and the Department was looking to build a web-based program that would be more user-friendly and easily accessible. Countless hours were spent with the Development team to customize the Case Management System (CMS) to assist the users through various stages of investigations and examinations and build the ability to extract data to run reports for tracking purposes. The system houses all files electronically for investigations and examinations which aligns with the goal to be a paperless Department.
- 3 After the successful development of the CMS, the Department continued to work with the Developer to build a filing system that would focus on specific filing types which did not allow users to file through an electronic system. At the time, the filings were being sent to the examiner via email and the data was tracked either in spreadsheets or in the Department's outdated Microsoft Access database. The goal of the program was to provide the filers in the select filing types a process which would walk them step by step through the registration and list all the required documentation. It would also allow them to complete the data necessary for the required forms during the filing process and produce a document for the filer to electronically sign and submit. The program would allow the filer to correspond with the examiner through the electronic system and track the filing progress. The North Dakota Securities Filing Portal was successfully rolled out after extensive testing was done and is now used by filers of Pre-Need Funeral Contract Sales Annual Reports, Issuer-Dealers and Agents, Canadian Broker-Dealers, State Accredited Investor Exemptions, Limited Offeree Exemption, Municipal Security Notice Filings, Limited Offering Exemptions, and Requests for Interpretive Opinion.
- 4 The Department conducted 186 examinations which is a significant increase over previous reporting periods due in large part to the enhancement of the Department's Examination Program. The program focuses on streamlining the Department's contact with examinees throughout the entire exam process. The Program also established focused examinations, which allows the examination staff to have contact with all State Registered Investments Advisers (RIAs) on a rolling 3-year interval. The focused exams assist the examination staff to connect with State RIAs and ensure they are meeting their annual filing requirements. The examinations are conducted through the previously mentioned Case Management System and all correspondence with the examinees is through the system.
- 5 The Department requested the withdrawal of 1 individual registration, issued 1 Cease & Desist Order, and 5 Consent Orders.
- 6 Negotiated 2 Rescissions Offers which returned \$105,000 to investors.
- 7 Obtained Investor Restitution totaling over \$472,500 in a large, ongoing investigation involving fraud, misrepresentation, and suitability violations in the sale of Real Estate Investment Trusts.
- 8 The Department collected \$188,679.24 which is the first of 5 penalty payments totaling \$943,396.22 to be received through February 2024, from a multi-state enforcement case settlement related to unregistered activity.
- 9 Collected an additional \$40,500 in penalties associated with the issuance of 3 Consent Orders.

Critical Issues

- 1 Fraud against seniors
- 2 Financial Technology (Fintech) innovations - i.e. Robo-advisers, crowdfunding, cryptocurrency, initial coin offerings.
- 3 Fintech related fraud
- 4 Securing Blockchain analytics software and capabilities for cryptocurrency related investigations.
- 5 Pandemic related fraud
- 6 Continued growth in number of investors with more people turning to securities markets to help build wealth and financial security.

Critical Issues

-
- | | |
|----|--|
| 7 | People have increased responsibility for personal financial security with the continued trend away from Defined Benefit plans to Defined Contribution plans and uncertainty around Social Security benefits. |
| 8 | Enforcement of SEC "Best Interest" rule for broker-dealers, effective June 30, 2020. |
| 9 | Enhancement of Case Management System for examinations and investigations. |
| 10 | Enhancement of Securities Filing Portal for Securities filings and data management. |
-

Performance Measures

Agency Performance Measures:

1. Operate department within budget parameters.
2. In coordination with SEC and FINRA scheduling, examine broker-dealers and investment advisors registered and with offices in the state.
3. Maintain staff of highly trained, professional, experienced examiners in all divisions.
4. Perform duties in ethical, unbiased, informed and efficient manner.
5. Foster public confidence in regulated industry and capital markets through effective administration of duties.
6. Promote compliance with the Securities Act through routine firm examinations and swift enforcement action when necessary, appropriate and in the public interest.
7. Annual performance reviews are utilized to determine effectiveness in contributing to agency goals and overall mission.
8. Statistics are maintained for each division and are compared to prior measurement period. However, agency activity is market driven and connected to the health of the economy and finance sector, thus changes in measured statistics do not directly translate into a measure of agency effectiveness.
9. Gallup Engagement Survey – 4.81 engagement mean, 94 percentile rank

Program Performance Measures:

1. Operate department within budget parameters
2. Routinely examine broker-dealers and investment advisors registered with offices in the state
3. Maintain staff of highly trained, professional, experienced examiners in all divisions
4. Perform duties in ethical, unbiased, informed and efficient manner

5. Foster public confidence in regulated industry and capital markets through effective administration of duties
6. Promote compliance with the Securities Act through routine firm examinations and swift enforcement action when necessary, appropriate and in the public interest
7. Performance reviews are utilized to determine effectiveness in contributing to agency goals and overall mission.
8. Statistics are maintained for each division and are compared to prior measurement period. However, agency activity is market driven and connected to the health of the financial services sector and the economy overall, thus changes in measured statistics do not directly translate into a measure of agency effectiveness.

Program Statistical Data

See attached.

Explanation of Program Costs

Costs are associated with the execution of the Department's mandate to protect North Dakota investors and support legitimate capital formation by businesses.

Successful execution of this mandate involves the registration of investment securities, investment firms and agents, and franchise offerings. Fees collected are a revenue source for the State of North Dakota. The agency supports the formation of capital by legitimate North Dakota businesses.

Successful execution of this mandate also involves the investigation of fraud and misconduct, which may result in money returned to North Dakota investors through rescission, recovery and restitution. Enforcement actions generate state revenues through statutory civil penalties, consent orders and agreements. Education programs help investors make wise investment decisions and avoid investment fraud and financial exploitation.

Program Goals and Objectives

The primary mission of the Securities Department is to protect the North Dakota Investor through the administration of the North Dakota Securities Act (10-04). We support this mission through our efforts in four functional areas:

1. Regulation of the Capital Formation Process
2. Registration of Securities Industry Firms and Professionals
3. Examinations, Investigations and Enforcement Actions
4. Investor Education and Financial Literacy Initiatives

For the 23-25 Biennium the following Goals and Objectives are identified to support the mission of the Department:

1. Regulatory Systems Modernization
 - a. CMS/Filing Portal 2.0

414 Securities

Agency 414

- b. Investment Adviser Regulatory Program Update
- 2. Fintech Regulatory Adaptation
 - a. Enhanced Digital Asset and Decentralized Finance Investigative Capabilities
 - b. Compliance Enforcement
- 3. Inclusive Prosperity Impact
 - a. Expand and Diversify Investor Education and Outreach Program Reach
 - b. Improve Competition Against Weaponizes Social Media Platforms

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department seeks one-time funding to enhance our Case Management System and Securities Filing Portal. The enhancements will provide an interface between the two data management systems, expand the functionality of the filing portal, and allow for secure and efficient electronic submission of investor complaints, which will improve the citizen user experience. Measurable outcomes of this investment include an increase in number of examinations conducted by the Department, a reduction in exam turnaround time, improvement of enforcement case outcomes, improved speed of case analysis and resolution, and improved speed of securities filing processing and approvals.

Necessary resources for implementation (including FTE's)*: One-time funding of \$150,000

Are resources being redirected or are they new or additional (including FTE's)*: No.

Who is served and impact of not funding*: See request explanation.

Operations/Enforcement-Cryptocurrency related investigations (Priority: 02)

Total	160,000	-	160,000	0.00	160,000	-	160,000	0.00

State Initiative:* Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Department seeks funding to purchase licenses for blockchain analytics software from a private sector data analytics company. The software will improve the Department’s ability to conduct Digital Asset and Decentralized Finance related investigations, and enable the tracking of cryptocurrency transactions between digital wallets, improving the likelihood of asset seizure and return of funds to harmed investors.

The Department also seeks funding to cover the increased cost of the State Auditor’s biennial audit of the Department.

Necessary resources for implementation (including FTE’s)*: \$160,000 - recurring

Are resources being redirected or are they new or additional (including FTE’s)*: No.

Who is served and impact of not funding*: See request explanation.

Statutory Authority

North Dakota Century Code Chapter 6-09.

Agency Description

The Bank of North Dakota (BND) serves as the development bank for agriculture, commerce, and industry in North Dakota.

The strategic goals from the 2022-24 Strategic Plan of the Bank include: drive innovation to enhance effective delivery of products and services, establish the new work environment to build community, support diversification in North Dakota's economy by creating financial solutions to current and emerging needs, educate North Dakotans about post-high school education opportunities and deliver innovative products and services that support them, increase stakeholder appreciation for BND's role as a bank in a competitive marketplace.

Bank of North Dakota is an important partner for students pursuing secondary education opportunities including college, trade school and certificate programs. In addition to offering a variety of loan programs at competitive rates, BND also coordinates scholarship opportunities and provides information on how to pay for college.

Agency Mission Statement

Bank of North Dakota's mission is to deliver quality, sound financial services that promote agriculture, commerce, and industry in North Dakota.

Major Accomplishments

-
- 99 Agency Major Accomplishments 1. Assets grew from 6.2 billion in 2012 to \$10 billion in 2021, a 63% increase over ten years. Total employees declined by 2.5%.
 9 BND's efficiency ratio for 2021 was 18.14% compared to the North Dakota Bank average of 64.43%. 2. Assets in the Legislative Directed programs have grown 22% since 2016 from \$710 million to \$867 at the end of 2021. This includes implementing new administered loan programs for Clean Sustainable Energy Authority and the Agriculture Diversification and Development Fund. 3. Closed 2021 with a \$4.7 billion loan portfolio. BND Funded 557 Commercial loans for over \$1.4 billion compared to 461 loans for \$1.0 billion in 2019. 421 Agricultural loans for \$221.8 million were funded in 2021 compared to 389 loans for \$171.7 million in 2019. 4. BND played a lead role in COVID Response for ND. The team facilitating weekly webinars with federal government officials in order to assist banks, credit unions and economic developers with accessing the available programs with their customers, developed programs such as the Small Employee Loan Fund, COVID Pace Programs and the Ethanol Recovery Program creating an additional 1,200 in loan volume all while transitioning the BND staff to working from home. 5. Committed to provide over \$200.0 million of its capital to fund its buydown of \$40.0 million in loan programs, \$27.0 million in various other areas, and provided a \$140.0 million dividend to the General Fund. 6. In 2020, the Career Education & Alternative Learning (CEAL) program was released to provide student loans for North Dakota residents and prospective North Dakota residents pursuing career education through alternative learning training programs and certifications. 7. Disbursed over \$100.0 million in student loans in 2021 with a total portfolio of \$1.15 billion. 8. Under Legislative direction, implemented new administered loan programs for Clean Sustainable Energy Authority, Agriculture Diversification and Development Fund, established a Permanent Rebuilders Loan Fund and as well as merged the BND-Water Infrastructure Loan Fund into the state water commission's water Infrastructure Loan Fund. 9. Rated A+ by Standard and Poors (S&P), putting BND in a rating category with the highest-rated U.S. banks. 10. BND played an integral role in the sale of Coal Creek station through our lending and trust departments and coordinated its efforts with the ND Transmission Authority, Public Finance Authority and Industrial Commission staff. 11. In 2020, through its loan participations, BND assisted in creating or retaining over 50,000 jobs in the state with a projected impact of \$6 billion to the State's Gross Domestic Product.
-

Critical Issues

- 99 1. Maintaining and building on BND's capital base. Capital is utilized to absorb shocks during periods of stress and is an indicator of a bank's financial strength.
- 9 The capital ratio can also impact the Bank's ability to assist in financing large-scale economic development projects. Capital growth is obtained in only one way for BND – retention of net profits. BND monitors its risk-based capital ratios and primary capital ratio according to banking industry standards. Over the last decade, industry and regulatory requirements have put pressure on the financial industry to increase capital levels. BND has an internal capital level benchmark of 12.0 percent. Today, BND's ratio is at 10.26%.
2. Employee attraction and retention is a pressing concern for Bank of North Dakota. BND's current turnover rate has increased from 7% in 2020 and 9% in 2021 to an annualized rate of 11.4% in 2022. One of the Bank's main disadvantages in retention and recruitment is the inability to compensate employees at a rate that is comparable to the highly competitive financial industry market. The inability to earn incentive compensation is also a significant disadvantage when trying to recruit and retain employees, especially at the management and senior executive levels. BND has proposed a SMART compensation concept with goals to: attract and retain talent, limit risk and enhance organizational performance, motivate employees to achieve and maintain high performance, and ensure competitive and consistent salary practices. Next steps for this proposal are being discussed. It is continually important to balance the financial and business objectives of the Bank with the social and political objectives to expand North Dakota's economy. It is equally important to provide a culture that develops people, acts as a model of efficient business and government, and exemplifies the core values of the bank. BND strives to be a leader in technology in order to provide quality customer service and meet customer needs. BND continues to deal with increased regulatory requirements related to financial institutions. The effects of Dodd Frank, Basel III, SOX 404, and information security program requirements are burdensome. The role of compliance in the banking industry cannot be overstated and our entire bank feels the effects on a daily basis. In addition, BND will continue to invest in ways to protect its physical and cyber security, whether through improved building security or insurance coverage. Although this coverage comes at a cost, we owe it to our employees and customers to provide a safe environment to conduct business.

Performance Measures

In meeting BND's performance, there are three areas that we believe should be monitored: Financial performance, achieving BND's mission, and meeting legislative expectations.

1. Financial Performance - The Department of Financial Institutions (DFI) evaluates the safety and soundness of banks utilizing the "CAMELS" rating system. CAMELS is an acronym standing for: Capital, Asset Quality, Management, Earnings, Liquidity and funds management, and Sensitivity.
2. Meeting the Mission - To deliver quality, sound financial services that promote agriculture, commerce, and industry. We measure our success in achieving our mission by the quality and usage of our programs.
3. The Legislature has numerous expectations for Bank of North Dakota. Key among these expectations are:
 - a.. For BND to enhance the ability of North Dakota's financial institutions to serve their customers through loan participations and services. To maintain an awareness of financial needs in the state and develop products and services that enhance diversification of the state's economy.
 - b. To administer legislatively directed programs including revolving loan funds and one-time initiatives.
 - c. For the bank management to meet regulatory and statutory requirements and to maintain the ability to provide a dividend for the state's general fund or for emergency programs in the state.

Return on Average Assets measures how effect a company is utilizing its assets. BND's historical ROA was as follows: 2021 - 1.6%; 2020 - 1.85%; 2019 - 2.5%; 2018 - 2.4%; 2017 - 2.1%; 2016 - 1.9% and 2015 - 1.7%.

Return on Average Equity measures how equity is used to generate income. BND's historical ROE was as follows: 2021 - 15.1%; 2020 - 15.6%; 2019 - 18.6%; 2018 - 18.1%, 2017 - 17.0%; 2016 - 16.6% and 2015 - 18.1%.

Leverage Ratio is a measure of financial strength and is calculated by dividing Tier One Capital by average assets. The leverage ratio BND was: 2021 - 10.2%; 2020 - 11.9%; 2019 - 13.6%; 2018 - 12.5%; 2017 - 12.1%; 2016 - 12.0% and 2015 - 10.0%.

Program Statistical Data

BND ended 2021 with over \$10 billion in assets driven by larger cash and deposit balances due to the receipt of American Rescue Plan Dollars, additional state dollars of nearly \$1 billion related to Legacy Fund Earnings and additional tax revenues as well as higher correspondent bank deposits.

- BND utilized funding to enhance its investment portfolio to provide additional income and to serve as liquidity for loans. The investment portfolio increased by over \$600 million from 2019 to 2021.
- The bank's loan portfolio grew 3% from \$4.5 billion to \$4.7 billion at the end of 2021. BND's loan portfolio concentration includes: agriculture, commercial, residential, and student loans. (Note: All residential originations, servicing, and collections transferred to Housing Finance Agency in 2021 as one of BND's initiatives for process improvements across state agencies.)
- The diversification of BND's loan portfolio remains well-balanced with commercial loans accounting for 52 percent, student loans 24 percent, ag loans 15 percent and residential loans 9 percent.
- At the end of 2021, BND also administered \$875 million in net assets for legislatively directed programs, adding 3 additional programs from 2019. These programs serve a wide range of purposes, including school construction, water projects, general and medical infrastructure, disaster recovery and promoting value added agriculture and energy development.

BND's Treasury Services provides a federal funds program and safekeeping services to over 100 North Dakota financial institutions.

- At the end of 2021, the Bank held 13,255 customer securities for \$8.7 billion, up by nearly 3,500 holdings and \$4 billion since year end 2019. .
- Treasury Services also settled a record number of customer trades with over 4,100 trades settled in 2021, compared to 2,800 in 2019.
- The Bank's financial institution customers are also holding record balances on deposit at the Bank, three to four times greater than their historical average, primarily generated by federal and state stimulus.
- BND also provided an additional \$300 million of liquidity through our Letters of Credit for Public Deposits Programs. BND trust services 76 accounts with assets in excess of \$650 million, and transfer agent, registrar, and paying agent agency services to approximately 2,100 accounts.

BND's Banking Services provides check clearing and correspondent bank account services to North Dakota financial institutions, state agencies, and political subdivisions. ACH and wire transfer services are also provided to correspondent banks.

Explanation of Program Costs

BND is a development and wholesale bank which generates revenue to fund its cost of operations and provide a return to the general fund.

Program Goals and Objectives

1. Drive innovation to enhance effective delivery of products and services.
2. Establish the new work environment to build community.
3. Support diversification in North Dakota's economy by creating financial solutions to current. and emerging needs.
4. Educate North Dakotans about post-high school education opportunities and deliver innovative products and services that support them..
5. Increase stakeholder appreciation for BND's role as a bank in a competitive marketplace.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: BND Assets have grown over 42% from 12.31.18 to 6.30.22.

4 addition Legislative directed programs with an additional 215 million assets have been added since 2018 .

Commercial and Ag lending volume has grown by nearly 10% over that same time period.

BND’s efficiency ratio is 17.0 % as of 6.30.22, this compares to the state average of 70.7%.

471 Bank of North Dakota

Agency 471

The addition of programs, loan volume, asset size as well as the expansion into new solutions for our state's Financial Institutions such as Collateral Valuation lends to the request for additional staff. As the Bank has proven with a historically low efficiency ratio each FTE addition will be evaluated on a case by case basis.

Necessary resources for implementation (including FTE's)*: - Office Equipment

- Additional tech support

Are resources being redirected or are they new or additional (including FTE's)*: New and expanding programs

Who is served and impact of not funding*: Bank of North Dakota serves the State Institutions, Financial Institutions and the citizens of the state. Not having adequate staff limits the Bank's ability to follow its mission statement:

Bank of North Dakota's mission is to deliver quality, sound financial services that promote agriculture, commerce, and industry in North Dakota.

Additional funding for existing positions (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	569,615	-	569,615	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: BND's turnover rate has seen an increase. Increased salary allocations have increased to fill positions that have retired and/or left the bank. 9 vacant position are listed for our current position with salaries listed at 100% compa ratio, that is also higher the prior positions. The vacant position is listed as such due to past recruitment experience.

In addition, we have additional position opt-in to the Health Insurance package that previously had opted out changing BND's benefit calculation.

Necessary resources for implementation (including FTE's)*: none

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: BND will not be able to fill vacant positions when needed.

471 Bank of North Dakota

Total	750,000	-	750,000	0.00	-	-	-	0.00

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority): Bank of North Dakota currently has 108 of its employees, nearly 2/3s of its staff under the mid-point or at an average salary according to the most recent salary study. This request could bring up to 60 employees near 95% of the mid-point given performance would warrant the request.

Necessary resources for implementation (including FTE's): None

Are resources being redirected or are they new or additional (including FTE's): additional funding for staff

Who is served and impact of not funding: The Bank of North Dakota and its ability to retain key employees and high performing employees.

IT Consulting and Developing Costs (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

471 Bank of North Dakota

Agency 471

Request explanation and justification (include any statutory authority)*: BND has a number of IT Consulting and Developing fees as way of keeping current with Financial Institution technology, continuing to work efficiently with the as the number of transactions continues to increase as well as the volume.

There is \$340,000 of carryover operational improvements included in this request that is classified as carryover projects due to the timing of the implementation of previous projects. These include a payment risk management software as well as a number of items with our current vender, Finastra.

Lending has a request of \$322,000 to support additional phases with the Dynamics/DOSS program that they are currently in the middle of working on converting to a better system that will enable a number of improvements from the current system.

Additionally, there is \$75,000 included for additional analytics software. The Bank continues to grow its lending portfolio as well as its Legislative directed programs. And the Bank participates in more complex deals with its Financial Institutions. Providing the appropriate tools to the employees will enable the Team to make better educational based decisions.

Necessary resources for implementation (including FTE's)*: Support Staff for new programs

Are resources being redirected or are they new or additional (including FTE's)*: Redirected

Who is served and impact of not funding*: The stakeholders of the Bank, partners with the bank including the Financial Institution partners and State Institutions.

Additional funding for monthly NDIT billing (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	-	-	-	0.00
Special	405,524	-	405,524	0.00	405,524	-	405,524	0.00
Total	405,524	-	405,524	0.00	405,524	-	405,524	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: A portion of BND's shared services billing from NDIT billing includes costs of salaries based on BND's hourly usage of staff.

NDIT is anticipating salary increase due to recruiting as well as Legislative allocation of salary increases.

Necessary resources for implementation (including FTE's)*: none

471 Bank of North Dakota

Agency 471

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding for staff

Who is served and impact of not funding*: Bank of North Dakota relies on technology to function. Through the shared services, relies on NDI to continue to electronically service State Institutions, local Financial Institutions and customers.

Statutory Authority

North Dakota Century Code Chapter 54-17.

Agency Description

North Dakota Housing Finance Agency (NDHFA) makes possible the purchase, development and rehabilitation of single- and multifamily housing for low- and middle-income residents of North Dakota. Agency profits are reinvested into grants and programs that provide critical assistance to households and communities to ensure safe, affordable and decent housing options.

Agency Mission Statement

NDHFA is dedicated to making housing affordable for all North Dakotans while focusing on the housing needs of communities.

Major Accomplishments

- 1 Since 1983, NDHFA has provided more than 50,000 single family loans across the state equal to approximately \$4.85 billion. The U.S. Department of Housing and Urban Development (HUD) again ranked NDHFA a Tier 1 Federal Housing Administration loan servicer. The ranking system measures compliance with federal guidelines and intervention requirements, loss mitigation engagement, and reporting.
- 2 Multifamily housing leverages, local, state and federal funding; today the Agency has assisted in the creation and preservation of more than 9,400 rental units. Specifically, the state's Housing Incentive Fund, which was launched in 2011, has committed over \$105 million in authorized funds, adding 3,043 units. The 67th Legislative Assembly allocated \$9.5 million to the Housing Incentive Fund, North Dakota's only state-funded development program; 10 percent set aside to prevent and end homelessness.
- 3 During the 2021 session, legislators gave NDHFA the ability to offer residential mortgages at the same capacity as Bank of North Dakota (BND). As BND exited the residential lending market, the agency's North Dakota Roots program was expanded to offer mortgage loans for higher-income individuals and families who struggle to obtain conventional financing and to refinance residential real estate loans.
- 4 The federal HOME Program was transferred from the Dept. of Commerce to the Agency and successfully implemented by NDHFA. Through the HOME-American Rescue Plan (ARP) Program, North Dakota is slated to receive more than \$7.7 million from HUD to assist individuals or households who are homeless, at risk of homelessness and other vulnerable populations, by providing housing, rental assistance, supportive services and non-congregate shelter, to reduce homelessness and increase housing stability across the state.
- 5 The success of Minot's Resilient Homebuyer program, which provides financial aid to low- to moderate-income households impacted by the 2011 flood, resulted in the program's continuation with an influx of \$1.5 million in new funding. In 2022, all of the funding was successfully allocated.
- 6 NDHFA become the collaborative applicant for North Dakota's Continuum of Care (CoC) program. The CoC is composed of public and private organizations that come together to plan for and provide a homeless response system that is dedicated to preventing and ending homelessness in the state of North Dakota. In 2021, the CoC was awarded a \$1,975,377 Youth Homelessness Demonstration Program grant, a first for the group. It will be used to fund rapid rehousing, transitional and permanent supportive housing, and to fund innovative programs like host homes.

Critical Issues

- 1 Interest rates: Interest rates for 30-year fixed-rate mortgages have jumped from an average low of 3% to about 6% in the last year. Because of this increase, mortgage rates have shot up by a median increase of 49%. a. NDHFA provides below market interest rates and down payment and closing costs assistance. Almost 30% of the state's first-time homebuyers use NDHFA's programs and more than 80% use down payment and closing cost assistance. b. Below market interest rates are secured by selling mortgage revenue bonds, which are repaid by revenues generated through mortgage loans, not taxpayer dollars.
- 2 Limited federal funds: Federally, North Dakota is considered a small state and therefore receives the small state minimum allocation for multifamily housing development totaling \$9 million annually. Construction costs increased 33% in 2021, reducing the number of new construction and rehabilitation projects that can be funded. a. The North Dakota Legislature authorized the Housing Incentive Fund (HIF), which is the only state-funded, gap financing program for affordable, multifamily housing. Funding is contingent upon each legislative session. Currently, no HIF funding is available. b. NDHFA administers a competitive application process for federal funds and HIF to build and rehabilitate multifamily housing. In 2021, 19 applications were received for urban and rural communities and approximately 8 projects were funded. Programs were oversubscribed by \$34 million.
- 3 Housing instability: In 2020, 36% of renters and 14% of homeowners are considered housing cost-burdened (pay more than 30% of their income for housing); almost 5,000 individuals received services for homelessness through ND Homeless Continuum of Care (CoC) partners; more than 2,600 school aged students identified as experiencing homelessness; and over the past year almost 400 justice-involved individuals identified as homeless. Further complicating the issue, rents in North Dakota grew by 49 percent over the past decade. a. NDHFA administers the CoC federal program to support community-wide efforts designed to link people to organizations to prevent and end homelessness. The CoC is federally funded and supplemented with agency funds. NDHFA also self-funds and administers a financial security program for housing providers to accept applications for hard to house individuals and families. b. Multifamily housing development and rental subsidy programs administered and monitored by NDHFA includes a compliance portfolio of more than 10,000 housing units. c. The Opening Doors program provides participating households with an opportunity to access housing, while protecting the property and investment of property owners. Tenants with poor credit, a history of evictions or a criminal record work with a care coordinator to secure housing, receive support services and mediate any disputes with the landlord. Landlords receive financial coverage beyond a security deposit if a participant causes excessive damage or loss of revenue.
- 4 Housing accessibility: In 2022, a typical home price in North Dakota was \$273,818. Based on median income limits and industry standards regarding mortgage lending practices, more than half of the state's households would not be able to afford this value of housing. Renters are also experiencing a substantial increase in rental costs. a. NDHFA administers four new construction and rehabilitation programs for builders, homeowners, property owners and nonprofits to create more safe and affordable housing. More than 50% of the housing in urban and rural communities is more than 40 years old. Preserving existing housing stock, creates more opportunities for homeownership and utilizes existing infrastructure.
- 5 Department of Justice (DOJ) Settlement and Aging Population: The state of North Dakota and the DOJ reached a settlement agreement that outlines actions the state will take to expand access to home and community-based care services and enable individuals with physical disabilities to live in the least restrictive settings possible. Persons ages 65 and older is the fastest growing demographic in every county and is projected increase 24%, reaching 147,528 by 2025. One in four 65 and older homeowners were housing cost burdened and so are 49% of renters in this age group. One in three have a disability including having serious difficulties waking or climbing stairs or vision, hearing and cognitive challenges, a. NDHFA self-funds a single-family rehabilitation program and a single/multifamily renovation program, both grant programs, to ensure lower-income residents can remain safely in their homes. More than 8,300 households benefited from these programs.

Performance Measures

Ratings & Ranking

- Moody's Aa1 rating reflects the agency's strong financial position and loan portfolio characteristics. As of June 30, 2022, the 1994 General Bond Resolution has \$1,401,415,000 in bond debt and the 2009 General Bond Resolution has \$55,665,000 in bond debt outstanding.

473 Housing Finance Agency

Agency 473

- HUD National Servicing Center Tier 1 ranking as a Federal Housing Administration loan servicer.

Homeownership Accessibility

- 12,352 mortgages serviced by NDHFA, including 1,801 loans transferred from Bank of North Dakota.
- Servicing portfolio value as of Dec. 31, 2021, \$1.64 billion.

Multifamily Funding Allocated

- In 2021, more than \$21.4 million (grants/tax credits) was allocated to eight multifamily projects throughout North Dakota. When completed, 515 affordable rental housing units will be rehabbed or constructed.

HUD Compliance

- Under the umbrella of NDHFA, the ND Homeless Continuum of Care (CoC) developed policies and procedures to meet HUD compliance standards. ND was at risk of losing the Homeless CoC, which now oversees a funding portfolio of \$2.9 million.

Federal, State & Agency Administration (grants, tax credits, contracts)

- Administer more than \$41 million for multifamily housing construction and renovation, contract administration, and ND Homeless CoC.

Explanation of Program Costs

NDHFA's budget consists of grants to North Dakota low-to moderate-income residents and operating expenses associated with administering programs fully funded through federal and Agency generated revenue.

Included in Operating Fees and Services, object 621000, are servicing release premiums paid to participating lenders.

Professional services include legal, financial advisor, and audit expenses.

Program Goals and Objectives

NDHFA uses the following core priorities and goals as the compass for all future and ongoing business decisions capitalizing on leadership and organizational strengths. Each priority is supported by goals designed to be measurable, attainable and realistic to ensure desirable outcomes and managed expectations.

NDHFA helps North Dakotans achieve successful homeownership with homebuyer education, down payment and closing cost assistance, and affordable mortgage loans. More than 50,000 North Dakota households have achieved their homeownership dreams with the Agency's support.

- Create a new Loan Guarantee Fund which will lower mortgage insurance premiums on certain loans serviced by the agency
- Create and support access to affordable single-family housing and expand housing choices for low- and moderate-income individuals and families.
- Enhance the client and partner experience of homebuying through technological updates that will improve program performance.

- Proactively pursue strategic partnerships to support investment in affordable housing across the state.

Multifamily Development and Financing NDHFA is charged with addressing the state's changing housing needs, including a shortage of housing for the state's workforce and low- to moderate-income households, and providing technical assistance to North Dakota communities struggling to address their housing needs. The Division is committed to providing financing for affordable rental housing and preserving existing affordable rental housing stock by supporting property improvements and extensions of rental assistance.

- Create and support access to affordable multifamily to expand housing choices for low- and moderate-income individuals and families.
- Cultivate strong, multi-sector partnerships to increase access to affordable housing for vulnerable populations.
- Support community and economic development, ensuring feasibility and long-term success to address the needs of vulnerable populations.
- Compliance Monitoring NDHFA provides regulatory oversight of privately-owned properties for thousands of individuals and families designed to provide modestly priced housing opportunities for low-income families, seniors, and individuals with disabilities. Working closely with federal agencies, NDHFA ensures that these rental housing options are safe, clean and accessible.
- Manage the multifamily portfolio for physical and financial conditions and fulfillment of regulatory guidelines.
- Create and improve training and technical assistance to strengthen multifamily housing monitoring and compliance practices while improving the customer and partner experience.
- Collaboration NDHFA leverages partnerships with local, state, federal and tribal entities, and the private and nonprofit sector to create and sustain affordable housing. Collaboration is essential to reach the public about services offered and to develop strategies for providing housing for the state's vulnerable populations.
- Improve marketing and outreach efforts to raise brand awareness of NDHFA to encourage public engagement in the creation and preservation of affordable housing.
- Take action on critical housing issues to address vulnerable population needs.
- Staff Development NDHFA's greatest resource are the people that come to work every day to administer our housing programs or provide the operational support to make the Agency run smoothly. Ensuring that employees understand the importance of their role in the housing system and to create a culture of inclusivity and constant personal and professional improvement is vital to the success of the Agency's mission.
- Identify and provide training and development opportunities that are tailored to strengthen employee skills and encourage personal and professional growth.
- Create a succession plan to develop a pool of trained employees to be able to fill key roles • Create a culture of employee engagement.

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: With the exit of the Bank of North Dakota (BND) from the residential mortgage market NDHFA’s volume has increased to fill the demand. If North Dakota’s economy remains strong additional resources will be required. To provide the best service to the citizens, NDHFA must be able to adjust as circumstances warrant. NDHFA has the financial resources as increased business generates additional revenue. To ensure the Agency is meeting its obligations to lenders, mortgage insurance/guarantee entities, and bond investors additional staff for business analysis and quality control are necessary.

NDHFA’s current serviced loans per FTE/loan ratio is 1,143. In 2022, the Agency is projected to service 11,434 loans with 10 employees in Servicing. Over the next three years, NDHFA anticipates loan servicing growth of 3% year after year. Compared to the National Mortgage Bankers Association’s Loan Servicer report, NDHFA staff currently service 18% more loans per FTE than the private market.

NDHFA will create a new Loan Guarantee Fund which will lower mortgage insurance premiums on certain loans serviced by the agency. Possible strategic partnerships with Private Mortgage Insurance (PMI) companies could reduce the need for FHA (federal govt) mortgage insurance, which is more costly to the borrower and consumes valuable resources for the agency. Net income generated from premiums paid will be reinvested into agency funded programs that target single and multifamily housing rehabilitation. serving a critical need to preserve existing housing stock.

As the Homeownership portfolio continues to grow additional staff are needed to for technology support to administer automation and management improvements for a larger portfolio. NDHFA current staffing levels are not able to manage current portfolio needs in addition to service enhancements that are needed to enhance citizen focus of borrowers.

Necessary resources for implementation (including FTE’s)*: For NDHFA to be able to meet the demand of future low- to moderate-income homebuyers across the state, four additional FTEs are needed.

Are resources being redirected or are they new or additional (including FTE’s)*: Through organic, market growth, NDHFA generates program revenue to fund additional FTEs, pay the servicing premiums, and will be able to create the new Loan Guarantee Fund.

NDHFA will use revenue to create a Loan Guarantee Fund

473 Housing Finance Agency

Agency 473

Loan Guarantee Fund is a new program. When implemented, the premiums collected will cover program expenditures with net revenues reinvested into Agency programs.

Who is served and impact of not funding*: NDHFA provides housing solutions and stability for low- and moderate-income homebuyers and renters, and persons experiencing homelessness or at risk of homelessness. If NDHFA is not able to implement this Decision Package, operations will be negatively impacted, which directly affects financial gains and the Agency's ability to administer programs.

If this Decision Package is reduced from the 2023-2025 budget request, the Agency would be forced to adjust business practices to slow down loan production, as direct costs, SRP, services fees and loan losses are non-negotiable expenses. Another consequence could include higher interest rates for future borrowers, a reduction in down payment and closing cost assistance, and loan servicing being conducted by out of state entities

Compliance Officers (Priority: 02)

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Federal regulations and bond investors requirements can no longer be managed by current staff. Compliance Officers are needed within the agency to research and perform any updates on compliance, state/federal regulations, and new audit regulations/trends. As federal and bonding practices become more sophisticated, the Compliance Officers will need to be diligent about performing detailed analysis of effective risk and control assessments, adequately documenting audit activities and ensuring compliance with any findings.

Necessary resources for implementation (including FTE's)*: For NDHFA to be in compliance with federal agencies and bond investors, two additional FTEs are needed to fill Compliance Officer positions.

Are resources being redirected or are they new or additional (including FTE's)*: Agency revenue and federal administration fees will be used to fund the two FTEs.

Who is served and impact of not funding*: NDHFA provides housing solutions and stability for low- and moderate-income homebuyers and renters, and persons experiencing homelessness or are at risk of homelessness. If NDHFA is not able to implement this Decision Package, operations will be negatively impacted, which directly affects financial gains and the Agency's ability to administer programs.

Total	1,387,341	-	1,387,341	0.00	1,387,341	-	1,387,341	0.00

State Initiative*: Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In 2021, NDHFA became the ND Homeless Continuum of Care (CoC) collaborative applicant. Administrative support and funding awards through the CoC align with the recipients of the Emergency Solutions Grants, which is currently administered by the Dept. Of Commerce. Transferring the grant to NDHFA, will create program efficiencies and streamline the awards process.

Necessary resources for implementation (including FTE's)*: The 2023 Legislature will need to authorize the transfer of the program from the Dept. of Commerce to the Agency.

Are resources being redirected or are they new or additional (including FTE's)*: Legislative approved funding will need to be transferred to NDHFA's budget.

Who is served and impact of not funding*: The Emergency Solutions Grants awards grant funds to provide financial assistance to facilities and programs within the state to identify sheltered and unsheltered homeless persons and those at risk of homelessness and provide services to regain housing stability. Funds are used for operational expenses, essential services, homeless prevention, rapid re-housing and the Homeless Management Information System. If the grant is not funded, the state's most vulnerable population would not receive services needed or access to safe and stable housing.

Total				-	380,000	-	380,000	-	380,000	-

State Initiative:* Health, Vibrant Communities

Explanation / Justification: To address the needs for the state’s most vulnerable populations to be able to secure housing and age in place. Construction and inflation costs have impacted the ability to serve the number of North Dakotans needing grant funding.

The Agency has determined to increase Agency Funded Grants.

NDHFA re-invests program revenue to fund and administer agency funded grants that provides housing solutions and stability for low- and moderate-income homeowners and renters, and persons experiencing homelessness or are at risk of homelessness. If NDHFA is not able to implement this Decision Package, operations will be negatively impacted, which directly affects the Agency’s ability to administer the agency funded grant programs.

Emergency Solutions Grants ñ Transfer from Dept. of Commerce (Priority: 6)

Statutory Authority

North Dakota Century Code Chapter 54-18.

Agency Description

The North Dakota State Mill & Elevator Association started operations in 1922 and serves as a foundation for value-added economic development in the state, promotes the export for North Dakota wheat, and returns a percentage of its annual profits to the state general fund. The Mill is located in Grand Forks.

Agency Mission Statement

The Mission of the North Dakota Mill is to:

Promote and provide support to the North Dakota agriculture, commerce and industry.

Provide superior quality, consistency and service to our customers.

Grow the business and provide a profit to our owners - the citizens of North Dakota.

Conduct our business with the highest integrity so that our employees, customers, suppliers and owners are proud to be associated with the North Dakota Mill.

Major Accomplishments

-
- 1 Achieved sales of 15.6 million hundredweights of flour in fiscal year 2022.

 - 2 Purchased more than 32.9 million bushels of spring wheat and durum in fiscal year 2022.

 - 3 Achieved profits of \$14.6 million in fiscal year 2022.

 - 4 Achieved gross revenues of over \$473 million in fiscal year 2022.

 - 5 Completed construction and commissioned the new H & I Milling units in fiscal year 2022.

Critical Issues

-
- 1 Volatile grain markets impact the cost of raw material inputs.

 - 2 Energy cost and related volatility impact our plant operations. Energy costs have increased greatly and continue to rise.

 - 3 Supply chain issues and the rise in fuel prices impact shipping of products to various markets.

 - 4 Interest rates and the potential for increasing rates to combat inflation.

 - 5 Current economic conditions. Inflation and possible recession.

 - 6 Rules and on-going regulatory changes regarding Food Safety and Security.

Performance Measures

The North Dakota Mill:

- 1.) seeks to be the leader in quality and service for the milling industry
- 2.) manufactures flour to bakery specifications from hard red spring wheat
- 3.) manufactures durum flour and semolina to pasta manufacturer's specifications from hard amber durum
- 4.) seeks to develop new, value added products to enhance the growth and profitability of the North Dakota Mill

Program Statistical Data

The North Dakota Mill:

- 1.) purchases and mills 40,000,000 bushels of spring and durum wheat annually
- 2.) produces and sells 18,000,000 hundred weights of finished product of which approximately 80% is bulk and 20% is bagged
- 3.) will provide employment for approximately 156 people

Explanation of Program Costs

A major part of the budget is wages and benefits for the 156 employees to mill over 40,000,000 bushels of grain into 18,000,000 hundred weights of flour and semolina. Utilities and repairs are the next largest expense categories. Electrical usage is high as several motors of various sizes are used in running the terminal and mill. Costs of repairs and operating supplies are those required to keep the terminal and mill running at peak efficiency. Other expenses includes advertising and promotional expense, data processing expense, insurance, communications, employee expense, and postage. Agriculture promotion is money spent on general promotion that is not tied specifically to mill products. All funds are generated through operations, and when necessary bank loans for the Bank of North Dakota are used. No General Funds are required.

Program Goals and Objectives

North Dakota Mill will:

- 1.) Purchase and mill 40,000,000 bushels per year of North Dakota grown spring and durum wheat.
- 2.) Realize profits in order to maintain the facilities in top operating condition.
- 3.) Return a portion of the profits to the General Fund.

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota Mill (NDM) has grown over the past twenty (20) years. We have increased shipments of flour from six million cwts. reaching to over fifteen million cwts. Profits have grown from less than \$2 million in FY 2000 to over \$14 million in FY 2022. Over the past five years profits have averaged \$12.87 million. Transfers to the General Fund have also increased as profits increased.

During this same period, our efficiencies have also increased due to the investments made in the mill and finding and retaining qualified people to work in the mill. The cwts. shipped per FTE per year have increased from just over 50,000 cwts to just over 100,000 cwts. per FTE.

In June 2022, NDM completed two new milling units and converted an existing milling unit to increase our daily capacity by 11,500 cwts. With this additional daily capacity we anticipate our annual production and sales to reach over 18MM cwts. In order to reach these production and sales levels, we need to have additional FTE's and funding.

Necessary resources for implementation (including FTE's)*: In order to reach 18MM cwts of production and sales NDM will need additional funding for inflationary factors and business growth. We have seen costs rise substantially in many of our expense categories. NDM has used a 9% inflationary factor due to the current economic conditions.

475 State Mill and Elevator

Agency 475

Miscellaneous Supplies. This item continues to rise, as we grow, we need more supplies.

Utilities. Energy costs continue to increase and be volatile. We expect there will be more control periods that we will need to operate through resulting in a much higher demand charge. We have been informed by WAPA of a 16% increase in rates that will begin in January 2023. The cost of natural gas continues to increase at a very high rate.

Insurance. Property insurance rates have been rising dramatically, we have see our rates increase dramatically over the past four fiscal years. The amount of insured value continues to rise due to our added equipment and the rise in building and equipment replacement costs. The cost of property insurance is anticipated to continue increasing with all the natural disasters occurring in the world today.

Operating Fees and Services. This item includes the cost of fumigations and heat treatment to eliminate bugs as well as various other services used to keep our plant running safely and efficiently.

NDM is requesting 14 additional FTE's due to the growth of our business. 5 of the requested FTE's will be used to move our Milling Department to a 4 shift operation in order to reduce overtime and recruit and retain good quality employees into the Milling Department. 6 of the FTE's requested will help to reduce the overstressed/overtasked currently employees and help to reduce overtime. 3 of the requested FTE's are for loading midds for 24 hours per day when our new facility becomes operational in February 2023.

Are resources being redirected or are they new or additional (including FTE's)*: NDM is requesting additional FTE's due to the increased daily capacity. The increase in daily capacity has caused a need to add a 2nd shift grain mixing crew in order to ensure that grain is delivered to the mills for continues 24/7 operations. The increase of 11,500 cwts of flour equates to an additional 25,000 bushels of wheat transferred to the mills daily. The 2nd shift grain mixing crew will require 3 additional FTE's.

NDM is also requesting an additional mechanic, electrician and equipment oiler due to the added amount of equipment to maintain.

NDM is requesting 3 additional FTE's to load midds/feed 24 hours a day. The Midds Storage & Handling Facility will be complete in February 2023 and will require 3 feed loaders for 24/7 loading capabilities.

NDM is requesting 5 FTE's to convert the Milling Department from a 3 shift operation to a 4 shift operation. This will reduce overtime within the department and help us to recruit and maintain quality employees in the Milling Department. The new 4th shift will consist of 3 Millers, 1 Assistant Miller, 1 Grain Cleaner.

Who is served and impact of not funding*: If NDM is not funded to the full extent, we are forced to reduce our run time and will be unable to meet our customer's demands, reducing our profitability. Declining profitability causes the General Funds transfers to be reduced.

Statutory Authority

North Dakota Century Code Title 65.

Agency Description

Workforce Safety & Insurance (WSI) was established in 1919 as an exclusive state fund for workers compensation insurance. Today, North Dakota is one of four remaining monopolistic workers compensation systems in the United States. The others are Ohio, Washington, and Wyoming.

WSI, a state entity, functions as the sole provider of workers compensation insurance in the state of North Dakota. WSI receives no general fund dollars and is funded entirely by employer premiums. There are no provisions for self-insurance or private insurance for purposes of workers compensation. If a business has significant contacts in North Dakota, they must insure with WSI.

WSI has 260 authorized full-time employees (FTE's). Claims for occupational injury and disease are filed with WSI and adjudicated by in-house agency claims analysts. WSI processes approximately 20,000 new claims per year. WSI services over 25,400 employers with a covered workforce of approximately 391,500 workers. Annual earned premiums were approximately \$163 million in Fiscal Year 2022.

Agency Mission Statement

WSI's core purpose is to care for injured workers.

WSI's core values are: Loyal, Caring, and Forthright.

WSI's strategic anchors are: Exceptional People, Exceptional Service, and Financial Stability.

WSI's business is providing workers compensation and safety services.

WSI's vision is a safe, secure and healthy North Dakota workforce.

Major Accomplishments

-
- 1 1. Exceptional employees and positive work environment.

 - 2 2. North Dakota's benefit structure is set by statute and compares very favorably to other jurisdictions.

 - 3 3. Premium rates continue to be the lowest in the nation and were reduced for the 4th consecutive year.

 - 4 4. WSI offers fair payment for medical and hospital services and ensures injured employees have access to quality healthcare.

 - 5 5. WSI is financially stable. Investment returns averaged 7.07% over the past ten years and total dividends issued 17 out of the last 18 years have amounted to \$1.7 billion.

 - 6 6. WSI continues to provide and enhance policyholder safety and loss control programs, helping both employers and employees recognize and correct safety hazards. Injury rates fell for the 8th consecutive year.

 - 7 7. WSI continues to maintain a low administrative expense ratio of approximately 23%. Workers' compensation industry expense ratios are approximately 25%.

Major Accomplishments

-
- 8 8. There are few disputes and WSI has low litigation. Only 0.6% of decisions issued proceed to an administrative court hearing.
-
- 9 9. Medical cost containment is maintained through medical and hospital fee schedules, utilization review, medical bill review, and pharmacy formularies.
-
- 10 10. WSI has a great return to work program. Time-loss claims account for approximately 15% of total claims in North Dakota compared to 20% in other jurisdictions.
-

Critical Issues

-
- 1 1. Continued Development of Claims & Policy System (CAPS) – The goal of CAPS is to replace WSI's core business system software with web-based technology in order to improve customer service, enhance system maintainability and provide enhanced reporting and accessibility to information.
-
- 2 2. Continued Development of myWSI – The goal of myWSI is to create a secure, self-service portal for external customers and stakeholders to view, update, submit and retrieve information relating to interactions with WSI.
-

Performance Measures

100 Employer Services

Some of the key performance measures employed by Employer Services include:

Average annual premium rate adjustment

Number of employer accounts

WSI covered workforce

200 Administrative Services

Some of the key performance measures maintained and monitored by Administrative Services functions include:

Net Earned Premium (millions)

Net Position / Fund surplus

Premium Dividends (millions)

FTE Authority

Available Fund Surplus Ratio

300 Injury Services

The work performed in WSI's Injury Services unit can be measured in various ways. Some of the key performance measures include:

485 Workforce Safety and Insurance

Wage-loss claims filed

Total claims filed

Total claims filed per 100 Covered Workers

Wage-loss claims filed per 100 Covered Workers

Total paid claim costs (millions)

400 Executive

The following statistics are measured and monitored by WSI's management and/ or Board of Directors:

Net Position / Fund surplus

Litigation Rate

Investment returns

General and Administrative Expenses

Explanation of Program Costs

100 Employer Services

The Employer Services division is charged with billing and collecting the appropriate amount of premium to pay for medical and disability expenses, and overall administrative expenses. Each employer pays a premium based on the payroll of the number of people they employ and the type of work those employees do.

Key activities of the employer services area are underwriting new applications for coverage, processing policies upon renewal, and collecting unpaid premium.

485 Workforce Safety and Insurance

Agency 485

The Employer Services division has a Safety and Loss prevention department which helps prevent injuries and assists employers in providing the safest workplace possible. Employer Services includes policyholder services and loss control activities. The requested budget will support the current staffing level for Employer Services. The appropriation will provide funding for salaries and wages, and operating expenses.

200 Administrative Services

The Administrative Services division provides services to the organization that keep the core functions operating efficiently and effectively. Departments include Facility Management, Finance, Information Services, and Human Resources.

300 Injury Services

The Injury Services division area provides services to injured workers and works with medical providers. This division is a key part of WSI's Core Purpose of "caring for injured workers." This is done through the timely handling of claims, providing "return to work" services including vocational rehabilitation, nurse case management, and the review and payment of medical bills. This area also includes Pharmacy Services, Customer Service and Office Services.

400 Executive

The Executive division's programs include the WSI board of directors, Executive management, Communications, Quality Assurance, Legal Services, Special Investigations, Internal Audit and the Decision Review Office. The requested budget will support the current staffing level for the Executive division. The appropriation will provide funding for salaries and wages and operating expenses.

Program Goals and Objectives

100 Employer Services

Some of the major functions of the Employer Services division are underwriting applications for coverage, processing policies upon renewal, and collecting unpaid premium. Employer Services has a Safety and Loss prevention department which helps prevent injuries and assists employers in providing the safest workplace possible.

Primary goals and objectives include ensuring employers are paying accurate premiums for their employed workforce, educating employers and employees on safety issues, and providing policyholder service and education to employers.

200 Administrative Services

Each of the Administrative Services departments directly manage specific activities to help the agency accomplish its core purpose.

The Finance Department manages the financial condition of the agency through control of general and administrative expenses, and monitors and reports on the fund surplus and invested assets. Finance is responsible for the annual financial audit, employee payroll and benefit administration, contract administration, budget and internal control monitoring, and financial statement preparation.

The purpose of the Information Technology (IT) department is to provide high quality, reliable and cost-effective information management products and services that support the core purpose of WSI.

485 Workforce Safety and Insurance

Agency 485

Facility Management maintains a good work environment and building maintenance.

300 Injury Services

The main focus of the Injury Services division is to fulfill WSI's Core Purpose of "caring for injured workers." This is accomplished through the timely handling of claims and payment of medical and indemnity bills and includes Return to Work services such as vocational rehabilitation and medical case management.

This division also includes Pharmacy Management, Customer Service, and Office Services.

400 Executive

The Executive division provides overall management and strategic guidance to the organization. Key activities in this area include the direction of the agency, management of personnel, finances, equipment and facilities. In addition, legislation and legal matters are monitored; as are relationships and partnerships with key stakeholders and the public.

The Executive Division monitors the overall financial condition of the organization including the net position / fund surplus, invested assets, general and administrative expenses, as well as employee management including turnover.

Quality Assurance provides WSI and external customers with statistical reports and data. This department coordinates process improvement throughout the agency as needed.

The Communications department projects the image of the organization internally and externally.

The Decision Review Office provides an alternative dispute resolution process for injured workers that may be aggrieved with a decision.

The Internal Audit department assists in assuring WSI is providing quality service to our customers and following our laws, policies and procedures.

The Legal department keeps various parts of the organization functioning by providing legal advice and fulfilling legal procedures required by North Dakota law. The Special Investigations department reviews cases that may involve employer, injured worker, or medical provider fraud and/or abuse.

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The justification for having SLX aide in providing production support is they have worked closely for the last seven years with internal WSI staff. They have been the primary resource providing developers, analysts, etc. associated with the CAPS conversion project, making them the best possible resource when we need additional help in this area.

The use of SLX for support will also:

- Enable WSI employees to provide better support for internal/external stakeholders and partners that are unrelated to the CAPS conversion itself.
- Through mentorship and working as partners with SLX, will better enable WSI development staff to learn and understand the .NET framework and processes they are less familiar with.
- WSI has also has had turnover in staff in this area and an inability to hire experienced individuals which SLX is able to provide.

Necessary resources for implementation (including FTE's)*: The resources will come from several departments in the capacity of SME(Subject Matter Experts):

485 Workforce Safety and Insurance

Agency 485

- 1) Injury Services (SME, Testers)
- 2) Administrative Services (SME, IT staff)
- 3) Employer Services (SME, Testers)
- 4) NDIT (IT staff)
- 5) Contracted Services (Service Logix) will provide mentors, developers, analysts

Are resources being redirected or are they new or additional (including FTE's)*: Resources will be redirected to the extent they may be called to contribute as SME's or in the event of testing.

Who is served and impact of not funding*: The citizens of North Dakota, Employers, Providers, WSI stakeholders and partners.

Large IT Project Summary

State Initiative*: Technology Investment

Is this a Large IT project? Yes

485 Workforce Safety and Insurance

Agency 485

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The justification for our conversion: CAPS will be a migration of our legacy PowerBuilder, client-based applications to a .NET framework which is an open-source platform which accepts multiple coding languages and features that make it easy to build applications for mobile devices, desktop, the web and Internet. We were unable to do that with PowerBuilder.

With this migration we will:

- 1) Improve internal and external communication.
- 2) Increase online interactivity for WSI's stakeholders and partners.
- 3) Streamline processes related to information from/to external audiences.

Necessary resources for implementation (including FTE's)*: The necessary resources come from several departments:

- 1) Injury Services (SME, Testers, Trainers)
- 2) Administrative Services (SME, Testers, IT staff)
- 3) Employer Services (SME, Testers, Trainers)
- 4) NDIT (IT staff)
- 5) Contracted Services (Service Logic)

We are targeting completion of the last release of CAPS in mid-2031. This is only a target; each release/project is baselined (a firm schedule set) as it draws near. This is the iterative approach endorsed by large project oversight. The date could shift if we encounter unforeseen complexities or additional resource constraints during releases in the 23-25 biennium.

Program Start Date	Jul-2015
Current Estimated End Date*	May-2031
Program Total Spent to-date	\$15,983,521
Total Est'd Expenditures for Duration	\$21,353,808
Total Program Cost Estimate at Completion	\$37,337,329
Total Spent to-date 2021-23 Biennium	\$1,615,372

485 Workforce Safety and Insurance

Agency 485

Est'd Expenditures thru End of Biennium	\$2,145,882
Est'd Expenditures for 2021-23 Biennium	\$3,761,254
Est'd Funding Need for 2023-25 Biennium	\$4,886,954
WSI Budget Contingency	\$63,046
Est'd Funding for 2023-25 Biennium	\$4,950,000

Are resources being redirected or are they new or additional (including FTE's)*: Resources, in addition to their current job duties, have also had to pick up additional workload required to make the project a success.

Who is served and impact of not funding*: The citizens of North Dakota, Employers, Providers, WSI stakeholders and partners.

Start Date (MM/DD/YYYY): 07/01/2015

End Date (MM/DD/YYYY): 05/31/2031

Replace existing application? Yes

Upgrade existing application? Yes

Development of new application? No

Anticipated Benefits*: This system replacement will provide efficiency gains through improved integration between the claims and policy systems, supporting business operations continuity at current or enhanced levels of efficiency/functionality without adding staff, providing internal WSI staff access to core business systems from anywhere there is an internet connection, providing internal WSI staff a single user interface for accessing claims and policy data/functionality where there is a common look and feel in navigating the applications, and providing internal WSI staff with quick easy ways to view summary and detail information related to policies and claims.

A phased, evolution implementation approach is being used to replace current enterprise application systems to:

- Improve customer service
- Minimize disruption to staff and business operations
- Mitigate risk of failure
- Minimize cost of system replacement
- Meet WSI's anticipated demand for growth

485 Workforce Safety and Insurance

Agency 485

- Enable WSI to remain current with technology and take advantage of technology enhancements as they occur while conforming to industry standard best practices.

The specific primary business needs to be met by the CAPS Program are:

1. Provide current industry web-based technology for core business systems supporting Injury Services and Employer Services and replace existing client-server-based systems.
2. Provide a system with enhanced reporting and accessibility to information.

Project Risk:* WSI will face a variety of risks during the execution of the various initiatives in its long-range IT plan. The following risks have been identified for the entire CAPS Program with the possibility of additional risks being identified for each Release of the Program:

- Overall WSI staff availability is limited; the release schedule and cost could be impacted.
- If the approach for limited legacy development is not followed, the team, schedule and cost will be impacted; other staffing may need to be added.
- With the long duration of this program there are unforeseen changes and impacts that could impact many areas of each release, in particular staff retirements and turnover.
- The ND State IT Unification effort could impact the program, but specifics are unknown at this time.
- Potential lingering impacts from COVID-19 pandemic.

A Risk Management Plan has been developed to mitigate risks within the Program.

Issue/Solution:* The basic issue with our existing legacy applications is the platform they were created on, PowerBuilder and the inability of this platform to provide the integration between our claims and policy systems and support business operations at a level of enhanced efficiency and functionality without having to add additional staff.

The solution chosen was to migrate or existing applications to a .NET solution which would allow for staff and citizens of North Dakota(Injured Workers, Employers, Providers, etc.) to access core business systems from anywhere there is an internet connection, providing internal WSI staff a single user interface for accessing claims and policy data/functionality where there is a common look and feel in navigating the applications and also providing much easier ways to view summary/detail information related to policy and claims.

MyWSI Enhancement (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The justification for our conversion; MyWSI will be a migration of an outdated legacy application to a more secure online portal. This secure online portal will provide efficiency gains by providing employers, providers, and injured employees online access to data specific to them, provide a secure method to submit and receive forms, reports, and other pertinent documents/information, and provide for self-service capabilities. Other efficiencies include mechanisms for routing information collected from forms into the WSI internal environment/systems, dashboards for specific audiences, and a reduction in the amount of time and effort required by WSI internal staff in providing reports and other information to external stakeholders.

With this migration we will:

1. Improve internal and external communication
2. Increase online interactivity for WSI' stakeholders and partners
3. Streamline processes related to information from/to external audiences

The myWSI Program consists of the following 9 Releases:

- Planning – Extranet Infrastructure – completed June 2017
- Releases 1-2 – myWSI Enhancements – completed September 2019
- Release 3 – Safety / Ergo –completed July 2020
- Release 4 – Online Payroll Reporting – completed July 2021
- Release 5 – Site Reorg / Employer Dashboard / Enterprise Identity Management Integration – completed July 2022
- Release 6 – Employer Online Application / Safety & Ergo Refacing / Chatbot
- Release 7 – Providers Dashboard / Forms Replacement / Enhanced Chatbot / Admin Tools

485 Workforce Safety and Insurance

Agency 485

- Release 8 – Injured Employee Dashboard / File Access / Forms Submittal / SMS/Text / Online FROI
- Release 9 – General Vendor Access / General Enhancements
- Program Closeout & Transition

Necessary resources for implementation (including FTE's)*: The necessary resources come from several departments:

- 1) Injury Services (SME, Testers, Trainers)
- 2) Administrative Services (SME, Testers, IT staff)
- 3) Employer Services (SME, Testers, Trainers)
- 4) NDIT (IT staff)
- 5) Contracted Services (Service Logic)

A phased, evolution implementation approach is being used, consisting of multiple releases. Each release is baselined as a major project delivering functionality in a production environment, ready to be used.

Program Start Date	Nov-2016
Current Estimated End Date*	Sep-2026
Program Total Spent to-date	\$3,407,179
Total Est'd Expenditures for Duration	\$3,367,017
Total Program Cost Estimate at Completion	\$6,774,196
Total Spent to-date 2021-23 Biennium	\$1,117,576
Est'd Expenditures thru End of Biennium	\$1,353,601
Est'd Expenditures for 2021-23 Biennium	\$2,471,177
Est'd Funding Need for 2023-25 Biennium	\$1,811,543
WSI Budget Contingency	\$18,457
Est'd Funding for 2023-25 Biennium	\$1,830,000

485 Workforce Safety and Insurance

Agency 485

Are resources being redirected or are they new or additional (including FTE's)*: Resources, in addition to their current job duties, have also had to pick up additional workload required to make the project a success.

Who is served and impact of not funding*: The citizens of North Dakota, Employers, Providers, WSI stakeholders and partners.

Start Date (MM/DD/YYYY): 11/01/2016

End Date (MM/DD/YYYY): 09/30/2026

Replace existing application? Yes

Upgrade existing application? Yes

Development of new application? No

Anticipated Benefits:* This secure online portal will provide efficiency gains by providing employers, providers, and injured employees online access to data specific to them, provide a secure method to submit and receive forms, reports, and other pertinent documents/information, and provide for self-service capabilities. Other efficiencies include mechanisms for routing information collected from forms into the WSI internal environment/systems, dashboards for specific audiences, and a reduction in the amount of time and effort required by WSI internal staff in providing reports and other information to external stakeholders.

A phased, evolution implementation approach is being used to fully implement the myWSI online portal:

- Improve service to external stakeholders by increasing online access to data relevant to the stakeholder
- Improve service to external stakeholders by increasing self-service capabilities for stakeholders
- Provide efficiencies for internal WSI staff by reducing the amount of time and effort needed in producing reports and providing other information to external stakeholders

The specific primary business needs to be met by the myWSI Program are:

1. Improve internal and external communication.
2. Increase online interactivity for WSI's stakeholders and partners.
3. Streamline processes related to information from/to external audiences.

Project Risk:* WSI will face a variety of risks during the execution of the various initiatives in its long-range IT plan. The following risks have been identified for the entire myWSI Program with the possibility of additional risks being identified for each Release of the Program:

- Overall WSI staff availability is limited, especially IT and with CAPS and myWSI releases running in parallel; the release schedule and cost could be impacted.

485 Workforce Safety and Insurance

Agency 485

- The ND State IT Unification effort could impact the program, but specifics are unknown at this time.
- Potential lingering impacts from COVID-19 pandemic could impact schedule and cost.

A Risk Management Plan has been developed to mitigate risks within the Program.

Issue/Solution:* The basic issue has been multiple on-line applications for the users to log into and the inefficiencies that come with that, also our WSI IT staff having to maintain multiple applications and security associated with those applications.

The solution is a secure online portal, one stop shop single login that will provide efficiencies to employers, providers and injured workers to access data specific to them. A secure method to submit and receive forms, reports and other pertinent information/documentation and providing for self-service capabilities for those using the portal. The portal through capabilities and mechanisms for routing of information collected into the internal system, dashboards etc. will also reduce the amount of time and effort required by WSI internal staff in providing reports and other information to our external stakeholders.

Continuing Appropriation Summary Workforce Safety and Insurance

	2021-23	2023-25

Statutory Authority

North Dakota Century Code title 39; sections 2-05-14, 11-19.1-06, 20.1-01-04, 20.1-13-14, 27-04-09, 29-06-02, and 44-08-20; and chapter 28-32.

Agency Description

The primary duty of the North Dakota Highway Patrol (NDHP) is to keep the motoring public safe as they travel the state's 106,670 miles of roadway, the highest number of road miles per capita in the nation. This is accomplished through law enforcement and traffic safety services including implementation of public education programs to reduce crashes and encourage safe driving practices; enforcement of laws to protect the highway system including size and weight regulations; and inspection of vehicles for safety equipment including school buses. The NDHP is the primary authority for enforcing laws and regulations relating to the commercial motor vehicle industry. The NDHP provides security and protection for the Governor, the Governor's immediate family, and the state Capitol, including the Supreme Court, the Legislative Assembly, and other elected government officials. The NDHP assists local agencies with responses to calls for service when situations arise which exceed the limits of local resources. The NDHP oversees the operation, maintenance, and administration of the Law Enforcement Training Academy (LETA). The LETA provides basic and advanced training to peace officers and public safety officials in North Dakota.

Agency Mission Statement

The mission of the highway patrol is to make a difference every day by providing high quality law enforcement services to keep North Dakota safe and secure. It is supported by our values:

Professionalism

Integrity

Loyalty

Accountability

Respect

Commitment

Major Accomplishments

- 1 Signing of Tribal Agreements - Law enforcement mutual aid agreements signed with the Mandan Hidatsa Arikara and Spirit Lake nations to improve the ability for law enforcement services to be provided all North Dakota citizens, both inside and outside of reservation boundaries. The MHA agreement was signed on October 4, 2021 and the Spirit Lake agreement was signed on June 14, 2022.
- 2 Implementation of Criminal Interdiction Team - A 5 person criminal interdiction team was implemented by the NDHP with a focus on interstate criminal activities such as drug trafficking and human trafficking. The team receives additional training and their enforcement activities focus strictly on criminal enterprise.

Major Accomplishments

-
- 3 Agency Wellness Enhancements - The NDHP has enhanced the wellness offerings to its employees through an enhancement of the it's peer network of trained individuals in critical incident stress management (CISM) in both a peer to peer or group setting. The NDHP has also partnered with the Department of Human Services on a first of it's kind pilot project to enhance clinical mental health services that are available to first responders. During the pilot, the NDHP is assisting with the training and enhancing the cultural competency of counselors to help them become familiar with the law enforcement and EMS culture to be able to provide better service when needed. NDHP employees are helping to develop the program during the pilot contract period through office visits, ride-alongs, and CISM training.

 - 4 Drug/Opioid Round Table Meetings - The NDHP along with the Department of Human Service, Behavioral Health Division and the Bureau of Criminal Investigation, are working together to bring round table discussions to the larger communities in the state. Round table discussions have occurred in Bismarck and Minot and incorporate a whole of community approach to explore and implement solutions to combat the drug, especially the highly volatile opioid epidemic. Future meetings in additional cities are in the planning stages.

 - 5 Signing of 30x30 Initiative/Hosting of 1st Women in Law Enforcement Summit - The North Dakota Highway Patrol signed a 30 x 30 initiative pledge on February 10, 2022. The pledge was signed with a goal of increasing representation of women in law enforcement to 30% by 2030 through recruitment and retention efforts. On the heels of the pledge, the NDHP hosted a first of it's kind Women in Law Enforcement Summit in Fargo on May 16-18.

 - 6 Participating in American Governors' Border Strike Force- The number of overdose deaths in ND is exceeding traffic fatalities. The NDHP has joined with other states to take a proactive approach to combating the destruction caused by interstate criminal enterprise and compromised border security.
-

Critical Issues

-
- 1 Keeping North Dakota safe and secure - The North Dakota Attorney General crime statistic summary released in September 2022 indicate an increase in nearly all classification of offenses. The drug and opioid epidemic continues to plague the citizens of North Dakota with the tribal nations being affected especially hard. The NDHP will need to continue and enhance efforts to keep North Dakota safe and secure. Adequate delivery of law enforcement services is a critical issue factoring tribal nations, drug and human trafficking, commercial vehicle traffic, the number of high speed violations and pursuits, and ongoing traffic fatalities.

 - 2 Work towards zero deaths on the state's roadways - A primary function of the NDHP is to keep North Dakota's Highways safe and secure through education and enforcement efforts. The NDHP continues to aim to educate drivers of the dangers of risky driving behavior and enforce the traffic laws related to the high crash causation factors. Highly trained troopers on the road and out in the public are a necessary asset to continue to work toward the focus of vision zero.

 - 3 Becoming/Remaining an employer of choice - The North Dakota Highway Patrol strives to attract, hire, train, and retain professional, highly motivated, and highly-training troopers and support staff. We strive to maintain competitive salaries, currently we are ranked #7 among local, county, and state law enforcement agencies in North Dakota for trooper pay. Law enforcement agencies around the county continue to face challenges with the number of people interested in joining the law enforcement profession. We also need to increase our recruitment presence and truly become the employer of choice and attract a professional, diverse workforce the State of ND can be proud of.

 - 4 Provide high quality law enforcement training - Law Enforcement is one of the few professions in which you must get the job done and get it done right 100% of the time. Increasing public scrutiny, defund the police movements, and the high cost of lawsuits are just a few reasons why professional, high-quality, law enforcement training is critical. The North Dakota Highway Patrol expects a high level of training for our troopers, but we also have the ability to shape law enforcement training for many agencies around the state, especially those agencies with limited resources to receive timely, high-quality training. The NDHP strives to provide those opportunities.
-

Critical Issues

- 5 Technology Enhancements - The NDHP continues to remain cutting edge from an equipment and technology standpoint. We do, however, face additional challenges as we continue to move and stay at the forefront of law enforcement technology. Patrol vehicles have transformed into high tech rolling data centers which require adequate data streams to and from the vehicle. The new technology is wonderful for delivering high-quality end products, but the back end of all the technology will also need to keep up. We also strive to integrate our software products to limit the amount of data necessary on the roadside allowing the trooper to focus on the task at hand with the highest level of safety.
-

Performance Measures

Public safety through quality service.

Program Statistical Data

The Highway Patrol consists of 193 full-time employees located in communities throughout the state. Of these employees, 159 are sworn officers.

The remaining 34 personnel are non-sworn employees in the areas of support staff, capitol security, LETA staff, permits staff, and civilian motor carrier staff.

Explanation of Program Costs

Major operating expenses for Field Operations: State fleet mileage - 47.7%, Data processing - 11.5%, Building, equipment, clothing and miscellaneous supplies - 6.0%, Vehicle installation fees - 4.2%, Lease/rent, buildings/land - 3.7%, Professional Development - 3.2%, Telecommunications - 2.7%.

Major operating expenses for Administration: Data processing - 41.4%, Rent of building space - 20.2%, Building, equipment, clothing and miscellaneous supplies - 14.1%, Telephone to ITD - 4.0%.

Major operating expenses for the LETA: Professional development - 33.7%, Repairs - 18.2%, Utilities - 14.7%, Food supplies - 14.2%, Building, equipment, clothing and miscellaneous supplies - 5.2%. Up to \$225,000 is appropriated to the North Dakota Peace Officer Standards and Training Board for training costs under SB 2031 passed in 2005.

Program Goals and Objectives

Strategic Plan Goals

The strategic plan for the immediate future is comprised of four goals that complement the daily operational objectives. The long-term strategic goals and the short-term operational objectives to achieve those goals have been identified.

These long-term strategic goals will be evaluated and discussed annually:

1. Provide a secure environment
2. Provide public safety
3. Enhance relationships

504 Highway Patrol

4. Enhance employee welfare

NDPERS Employer Contribution Increase 2021-23 (39-03.1-10) (Priority: 02)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	-	-	0.00	111,475	-	111,475	0.00
Special	-	-	-	0.00	18,147	-	18,147	0.00
Total	-	-	-	0.00	129,622	-	129,622	0.00

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDCC 39-03.1-10 was amended during the 67th legislative assembly requiring an increase of 1/2% for both the employer and employee for the North Dakota Highway Patrol Retirement System. The increases are required to take place on January 1st of 2022,2023,2024, and 2025. The employer portion was not added to the NDHP's 2021-23 budget. The fiscal impact of the change for 2021-23 was \$129,622. The

504 Highway Patrol

Agency 504

additional ongoing fiscal impact that will be realized (without adjustment for any salary increases) will be 260,521 for the 2023-25 biennium. The amount of \$260,521 was added to the NDHP's base budget limit, but the amount realized in 2021-23 is needed to cover costs realized beginning January 1, 2022.

Necessary resources for implementation (including FTE's)*: Additional ongoing funding in the amount of 130,000 is necessary to cover the costs associated with the changes in SB 2043 from the 67th Legislative Assembly

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: The NDHP budget was essentially reduced by the required contribution not being funded for the 2021-23 biennium. Additional increases are required for 2023-25 biennium, and were included in the budget limit.

State Fleet Mileage Rate Increase (Priority: 03)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	60,000	-	60,000	0.00	-	60,000	60,000	0.00
General	1,706,000	-	1,706,000	0.00	-	1,706,000	1,706,000	0.00
Special	276,000	-	276,000	0.00	-	276,000	276,000	0.00
Total	2,042,000	-	2,042,000	0.00	-	2,042,000	2,042,000	0.00

State Initiative*: Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The NDHP budgets for approximately 2400 mi/trooper/month. The budgeted/appropriated rate for the 2021-23 is currently \$0.74/mile driven. The suggested fleet rate increase provided by NDDOT for the 2023-25 biennium is \$0.99/mile. This is an increase of \$2,042,000 for the 2023-25 biennium.

Necessary resources for implementation (including FTE's)*: Funding only

Are resources being redirected or are they new or additional (including FTE's)*: N/A

Who is served and impact of not funding*: The NDHP would be severely limited in the services provided to the state if a reduction in current mileage driven was implemented.

504 Highway Patrol

Agency 504

2023-25 biennium Lease Rate Increases (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	106,000	-	106,000	0.00	106,000	-	106,000	0.00
Special	17,000	-	17,000	0.00	17,000	-	17,000	0.00
Total	123,000	-	123,000	0.00	123,000	-	123,000	0.00

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: NDHP Warehouse – Location/Bismarck – Landlord/Elmar Commercial Properties: \$3507.12. This is the total additional funding needed for structured increases for both FY 2024 and 2025.

Regional Office – Location/Minot – Landlord/ND Farm Bureau: \$2400.00. This is an anticipated 100.00/month increase for the 2023-2025 biennium.

Aircraft Hanger – Location/Bismarck – Landlord/Executive Air: \$1209.64. This is the total of a 5% increase for each year of the 2023-25 biennium.

Regional Office – Location/Bismarck – Landlord/NDDOT: \$39,936.00

NDHP Permit Office – Location/Bismarck – Landlord/NDDOT: \$12,736.00

Regional Office – Location/Bismarck – Landlord/NDDOT: \$30,992.00

Regional Office – Location/Fargo – Landlord/NDDOT: \$29,872.00.

The NDDOT owned facility rentals are new costs. The NDDOT provided the NDHP with the space in these four facilities rent free for the 2021-23 biennium. The anticipated charge for the 2023-25 biennium will be \$8.00/sq ft.

Headquarters Office/Security Office/Storage – Location/Bismarck – Landlord/OMB: 937.86

Necessary resources for implementation (including FTE's)*: Funding only in the amount of 123,000

Are resources being redirected or are they new or additional (including FTE's)*: New

Who is served and impact of not funding*: The public is served by having space for NDHP personnel to conduct agency business. The most significant portion of lease rate increases are a result of NDDOT requesting funding for office space that was not charged for in the 2021-23 biennium.

504 Highway Patrol

Agency 504

5 additional troopers to backfill positions previously dedicated to criminal interdiction (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,222,658	-	1,222,658	4.30	1,282,555	228,000	1,510,555	4.30
Special	197,758	-	197,758	0.70	208,789	37,000	245,789	0.70
Total	1,420,416	-	1,420,416	5.00	1,491,344	265,000	1,756,344	5.00

State Initiative:* Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The goal of the NDHP criminal interdiction team, is to identify and remove the criminal element from our communities. Most criminal enterprises utilize our highways to move illegal products and the proceeds from their criminal activities. These activities include drug smuggling, drug distribution, human trafficking, theft, and identity fraud.

The NDHP criminal interdiction team currently consists of two troopers in Fargo, two troopers in Bismarck, and a sergeant overseeing the team. This team was originally implemented without the addition of FTE positions. The request is to backfill the positions that were vacated due to the reassignment of duties.

Necessary resources for implementation (including FTE's)*: 5 entry level FTE's to replace positions which have been devoted to criminal interdiction efforts. The funding needed for one trooper is 282,000 in salary and operating expenses and 53,000 in initial equipment costs. Additionally, 33,000 in ongoing funding for salary and benefits to cover the difference between a trooper and a sergeant for 24 months. The total funding being requested is 1,443,000 in ongoing and 265,000 in one-time.

Are resources being redirected or are they new or additional (including FTE's)*: Resources were previously redirected and diverted in the 2021-23 biennium to the program, but there was no backfill for the trooper positions that were vacated. This placed strain on the remaining troopers, but was a necessary move for the agency to devote more resources and attention specifically to criminal interdiction, primarily dangerous drug trafficking.

Who is served and impact of not funding*: The citizens of North Dakota are served. Not funding to backfill these 5 positions will continue to strain current staffing and resources dedicated to the main core functions of the NDHP.

2 additional troopers for purposes of capitol security (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	548,170	-	548,170	2.00	513,465	-	513,465	1.72

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	20,000	-	20,000	0.00	83,076	-	83,076	0.28
Total	568,170	-	568,170	2.00	596,541	-	596,541	2.00

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The NDHP is requesting one additional sworn position in capitol security. In the the 67th legislative session, the agency was reduced by 2 non-sworn positions in Capitol Security as a cost savings. The reduction in staffing has put additional strain on our current Capitol Security resources. Our Capitol Security component provides 24/7 security services to the ND Capitol and capitol complex; including the public, employees, and officials who utilize the grounds and buildings to conduct the business for the State of North Dakota. One additional sworn officer will help to provide the necessary minimum sworn staffing on the grounds for security and law enforcement needs that are occurring.

Necessary resources for implementation (including FTE's)*: 2 sworn trooper FTE to be devoted to the program. Funding required for one entry-level trooper to backfill a position devoted to Capitol Security is 564,000 in salary and operating expenses and 106,000 in initial equipment costs.

Are resources being redirected or are they new or additional (including FTE's)*: These positions would backfill current troopers likely to transfer into the sworn capitol security position.

Who is served and impact of not funding*: The citizens of North Dakota who work in and visit the ND State Capitol. The impact in not funding is leaving potential gaps in coverage which require other valuable NDHP resources to be brought in to fill during times of need.

Increased Electronic Storage Video/Photo/Video Streaming (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

504 Highway Patrol

Agency 504

Request explanation and justification (include any statutory authority)*: The NDHP has implemented body-worn cameras, which work in conjunction with our in-car cameras. Essentially, the amount of storage needed has more than doubled. Our current storage has been appropriate for running our cameras at a lower quality setting. Higher resolution capabilities are now capable and expected. The higher resolution also increases the amount of storage needed.

In addition to video storage, the rate of digital evidence seized in the field is increasing. We need to start researching possible solutions and developing a plan to collect, manage, store, and disseminate digital evidence safely and efficiently. We are requesting 15,000 for initial one-time costs related to the proper storage of digital evidence along with 75,000 in ongoing costs to satisfy the needs of increased video storage.

Additionally, for enhanced officer-safety and increased incident command capabilities, our new systems offer the ability to live-stream video. The on-going streaming costs are \$28,000/biennium.

Necessary resources for implementation (including FTE's)*: The funding needed to meet the increased needs are 15,000 in one-time and 103,000 in ongoing dollars.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources are being requested for current programs

Who is served and impact of not funding*: The requests are necessary for the proper retention and storage of digital evidence of NDHP activities. These items are needed for used by the agency and court system. If the agency were not able to properly collect and store the evidence, it also puts the state at risk for claims against the agency.

5 additional trooper positions to enhance the NDHP criminal interdiction program (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,370,420	-	1,370,420	5.00	1,282,558	-	1,282,558	4.30
Special	50,000	-	50,000	0.00	208,790	-	208,790	0.70
Total	1,420,420	-	1,420,420	5.00	1,491,348	-	1,491,348	5.00

State Initiative*: Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The goal of the NDHP criminal interdiction team, is to identify and remove the criminal element from our communities. Most criminal enterprises utilize our highways to move illegal products and the proceeds from their criminal activities. These activities include drug smuggling, drug distribution, human trafficking, theft, and identity fraud.

The NDHP criminal interdiction team currently consists of two troopers in Fargo, two troopers in Bismarck, and a sergeant overseeing the team. Adding four troopers and a sergeant will allow the team to expand into the northwest and northeast areas of the state. This team will have a positive impact on the communities within the Bakken area and on tribal lands.

504 Highway Patrol

Agency 504

Necessary resources for implementation (including FTE's)*: 5 additional sworn trooper 5 FTE's. It is likely that current troopers would move into the criminal interdiction positions requiring a backfill of the trooper positions with new recruits. The cost to fund one new trooper is 282,000 per biennium for salary and operating expenses and 53,000 in one time equipment. Additionally, we would like to add funding to transition one trooper to sergeant, who will supervise 4 of the new criminal interdiction troopers. The funding needed to transition a trooper to sergeant is an additional 33,000 for the additional salary and benefits for 24 months. The project total is 1,443,000 in ongoing and 265,000 in one time costs.

Are resources being redirected or are they new or additional (including FTE's)*: New FTE's are needed to expand the current criminal interdiction team from 5 to 10, going from the current 1 sergeant and 4 troopers, to 2 sergeants and 8 troopers.

Who is served and impact of not funding*: Our current team of 5 is mainly devoted to criminal interdiction along the I-94 corridor. Expansion of the team would bring additional resources to the northwest and north east corners of the state. This team is and will continue to be very responsive to the interdiction and trafficking of opioids along with all other types of criminal enterprise and activity moving through the state or into the communities of the state.

2 Additional sworn troopers for instruction at the Law Enforcement Training Center (Priority: 10)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	548,170	-	548,170	2.00	-	-	-	0.00
Special	20,000	-	20,000	0.00	-	-	-	0.00
Total	568,170	-	568,170	2.00	-	-	-	0.00

State Initiative*: Transforming Education

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Increasing demands for high-quality law enforcement training have added stress to our current staffing at the Law Enforcement Training Academy (LETA) to meet current needs as well as grow into additional training needs requested by ND law enforcement agencies. Our current staffing continues to accrue unhealthy amounts of comp or overtime. While they do a good job training in core areas such as weapons, driving, and use of force, there are requests from agencies not being satisfied due to the current demands. Additionally, we need to expand our offerings in the areas of active threat/active shooter response, use of force/critical decision making, and driving training to statewide agencies requesting the training.

Necessary resources for implementation (including FTE's)*: 2 additional sworn trooper FTE's to backfill 2 current trooper positions that would transfer into the LETA if approved. The total cost for 2 new troopers is 564,000 in ongoing salary, benefits, and operating expenses and 106,000 in one-time equipment costs.

Are resources being redirected or are they new or additional (including FTE's)*: The funding would provide for 2 new positions, allowing the agency to devote 2 current troopers to the LETA and high-quality law enforcement training.

504 Highway Patrol

Agency 504

Who is served and impact of not funding*: We currently have 2 sergeants assigned specifically for training at the LETA. Although the two of them work quite hard to provide high-quality training, we believe additional staffing is needed to provide additional offerings and additional frequency of the current training provided. Currently there are requests from agencies around the state for high-risk, high-liability training needs such as use of force/decision making, emergency vehicle operations, and active shooter/threat response. When something goes wrong in a law enforcement related incident, the focus usually leads back to training. We'd like to be able to continue and enhance the high level of training provided to NDHP troopers and law enforcement agencies around the state.

Increase in IT maintenance funding for NDHP records management (ARIES) and daily activity (Dailies) programs (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	22,000	-	22,000	0.00	22,000	-	22,000	0.00
Special	3,000	-	3,000	0.00	3,000	-	3,000	0.00
Total	25,000	-	25,000	0.00	25,000	-	25,000	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The NDHP currently budgets \$100,000/biennium for regular maintenance costs related to our ARIES records management system and Dailies time and activity tracking program. Over the last 2 biennia we have averaged \$189,000 in regular maintenance projects. We are requesting the additional funding of 25,000 ongoing which will bring up or budgeted amount to 125,000 for the biennium.

Necessary resources for implementation (including FTE's)*: Additional ongoing funding of 25,000 for the biennium

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*: Timely IT maintenance to NDHP systems may result in IT security risk and/or inability to function properly to meet the records management and employee time/activity reporting needs of the agency.

1 sworn trooper position for state facility criminal investigations (Priority: 12)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	284,082	-	284,082	1.00	-	-	-	0.00

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The NDHP has jurisdiction to investigate all crimes on state lands and properties. We currently see a demand for a specially trained investigator to primarily work criminal cases which are occurring in places such as the state’s correctional facilities. Currently our troopers are being tasked with the investigations, the addition of this position will allow us to specifically train and designate a trooper to investigate these cases.

Necessary resources for implementation (including FTE’s)*: One additional sworn trooper FTE. If this position is approved a current trooper within the agency would likely transfer into the criminal investigator role and need to be backfilled by a new trooper. The cost of a new trooper is 282,000 in salary, benefits, and operating expenses for the biennium. One time funding of 53,000 for equipment is needed for a new trooper.

Are resources being redirected or are they new or additional (including FTE’s)*: Currently, we are responding to and investigating crimes that occur on state properties, primarily DOCR facilities. A trooper specialized in these types of crimes would result in higher quality, more professional investigations.

Who is served and impact of not funding*: Users and residents of state facilities impacted by the crimes that occur. The population most impacted is the DOCR community, especially the victims of crimes occurring in these facilities.

Interface between NDHP video storage system (UDE) and the state’s attorney records portal; redaction tool licensing (Priority: 13)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	4,000	43,000	47,000	0.00	4,000	43,000	47,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

504 Highway Patrol

Agency 504

Request explanation and justification (include any statutory authority)*: We are seeing an increasing amount of manpower devoted to the copying, necessary redaction, and disseminating of videos. This project will reduce the need for NDHP personnel to pull, format, and share In-Car and Body-Worn videos. This project will allow prosecutors to view and download video through the established portal provided by the NDHP to the state's attorney's to access records and in the future, hopefully video. \$50,000 in one-time funding is needed to for the enhancements to programming and \$5,000 for ongoing costs for the redaction licensing.

Necessary resources for implementation (including FTE's)*: One time funding of 50,000 for the programming needs and 5,000 for ongoing costs.

Are resources being redirected or are they new or additional (including FTE's)*: Currently we are managing the file sharing and access to NDHP records through current IT resources and staffing. This will enhance the ability to provide the resources electronically.

With the increased volume of videos needing to be provided to fulfill legal requests either through discovery or public open records, we may need to seek additional staffing in the future devoted to the copying and necessary redaction of video for the protection of privacy offered in current law. This is a trend occurring among law enforcement agencies as the requests for video and the need to fulfil those requests increase.

Who is served and impact of not funding*: It places additional strain on current resources to manually share necessary records to the individuals and entities needing them.

CRT/ERT/Field/UAV Additions (Priority: 14)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	1,000	104,000	105,000	0.00	1,000	104,000	105,000	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: We are seeking additional sUAS(UAV's) and additional equipment for use in crash reconstruction, our emergency response team and other uses in the field. The request is for three additional UAV's to be used for crash reconstruction. The addition of 3 will bring the current 5 crash reconstruction UAV total to 8. This will allow us to have UAV's in the 8 larger cities, providing a more efficient response to crashes by the crash reconstruction team. 4 additional UAV's are requested for use by the NDHP's emergency response team ERT). The ERT is broken down into 4 geographical squads for each of the 4 regions in the state. The request would provide an additional 3 UAV's appropriate for quicker deployment in ongoing critical or civil unrest incidents. The team currently has one UAV suitable for these purposes. The 4th UAV requested for the ERT would be a larger search and rescue style platform, bringing our search and rescue capabilities from 1 to 2 UAV's. 6 additional, smaller more portable UAVs requested for field operations will be staged strategically around the state for quick availability to respond to miscellaneous incidents. In addition to the UAV's, we are requesting funding for 4 additional desktop computers capable of processing crash scene video and images in the programs used for crash reconstruction. One additional license for Pix4D, which is the software program used to

504 Highway Patrol

Agency 504

process the crash scene data. 4 additional battery packs are needed for the current Matrice 300 search and rescue UAV used by the emergency response team. The packs will increase the time available to spend on station at search and rescue operations without the ability to charge quickly.

Necessary resources for implementation (including FTE's)*: 104,000 in one-time state funding.

Are resources being redirected or are they new or additional (including FTE's)*: New, this is an enhancement of a current UAV program

Who is served and impact of not funding*: The project will provide enhanced UAV response capabilities for the agency, allowing for the service of more areas of the state in a more timely manner.

20% increase in uniform budget (Priority: 18)

	2023-25 Agency Request				2023-25 Executive Recommendation

Total	58,000	-	58,000	0.00	-	58,000	58,000	0.00

State Initiative*: Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The North Dakota Highway Patrol has very specialized equipment and supply needs with a limited number of manufacturers and vendors available.

In the last year we've already seen larger than normal price increases and have checked with various vendors regarding anticipated future price increases.

Areas researched included:

Vehicle equipment and up fitting

Ammunition and weapons related supplies

Footwear and duty gear

Thermal paper, envelopes, batteries, etc.

Uniforms and related equipment

504 Highway Patrol

Agency 504

Specialized law enforcement equipment, to include ruggedized laptops, radio accessories, radar and LIDAR units, and other technology solutions currently used by the NDHP.

The vendors that we spoke to quoted total anticipated increases over the next 2-3 years as in the range of 14-20%. All were very hesitant to commit to the upper limit as it may go higher if inflation doesn't moderate. "

Necessary resources for implementation (including FTE's)*: Additional of ongoing funding of 58,000 in uniforms

Are resources being redirected or are they new or additional (including FTE's)*:

Who is served and impact of not funding*: The impact may be the inability to properly provide uniforms to NDHP employees

20% increase in equipment funding (Priority: 19)

Total	123,000	-	123,000	0.00	123,000	-	123,000	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In 2021 the Highway Patrol moved our warehouse and vehicle storage facility to its current location to save costs and reduce the square footage of associated office space considering the new work-from-home/hoteling environment. We currently lease only a portion of the current building, with the other portion being vacant. The Highway Patrol could utilize this additional space to:

- Increase warehouse space, allowing us to buy in more bulk and control overall costs
- Store emergency equipment and select vehicles in climate-controlled conditions, improving readiness and maintainability
- More easily coordinate and support vendor repairs

Necessary resources for implementation (including FTE's)*: The funding needed to lease the other half of the facility we lease which is currently vacant is 123,000 for the biennium in ongoing costs.

504 Highway Patrol

Agency 504

Are resources being redirected or are they new or additional (including FTE's)*: This would be an expansion of our available warehouse storage space.

Who is served and impact of not funding*: The NDHP warehouse is essentially the depot for all agency equipment, uniforms, and supplies. The additional space is needed to better protect high value equipment and vehicles which currently may not be stored inside. The supply chain issues have created an environment in which we may need to order equipment and vehicles when available and store them until they are ready for deployment. These challenges have also created a need for additional storage space.

2 additional troopers devoted to size and weight enforcement (Priority: 22)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	548,170	-	548,170	2.00	-	-	-	0.00
Special	20,000	-	20,000	0.00	-	-	-	0.00
Total	568,170	-	568,170	2.00	-	-	-	0.00

State Initiative:* Smart, Efficient Infrastructure

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The NDHP is the lead agency in the state when it comes to the enforcement of size and weight regulations on state, federal, and county highways. Enforcement of these regulations is crucial to the protection of the state's investment into highway infrastructure. Currently the NDHP has six motor carrier size and weight troopers spread out across the state that are dedicated to enforcing these laws and regulations. These officers dedicate approximately 90% of their patrol time to address these types of violations.

Over the past five years, the NDHP has identified and taken enforcement on over 1,000 vehicles related to civil weight violations. These overloaded vehicles create extra strain on our transportation system to include our roadways and bridges. Pro-active mobile patrol with troopers who are equipped with the proper equipment to stop, weigh and measure suspected overloaded/oversize vehicles is one of the most highly effective tactics the NDHP can use to deter these types of violations. In North Dakota, 38 overhead structures and/or bridges have been damaged due to vehicles operating outside of the permitted size and weight laws. These collisions cost taxpayers millions of dollars in repairs, unnecessary safety risks, and create delays for NDDOT working on other projects.

The NDHP is seeking to increase our efforts in deterring and educating the motoring public related to size and weight violations in North Dakota by adding two additional troopers dedicated to this area. These troopers would be strategically stationed in the state to provide the best coverage and impact on the safety and security of the roadways."

Necessary resources for implementation (including FTE's)*: 2 additional sworn trooper FTE's devoted to size and weight enforcement. These positions would likely be filled by current personnel, requiring a backfill of their trooper positions. The cost to fund 2 new motor carrier size and weight troopers is 564,000 for the biennium in ongoing costs and 112,000 in one-time equipment costs.

504 Highway Patrol

Agency 504

Are resources being redirected or are they new or additional (including FTE's)*: This is a request for 2 new FTE sworn trooper positions.

Who is served and impact of not funding*: Those who use North Dakota's highway system are served and impacted by deterioration of roads and bridges due to oversized or overweight vehicles.

1 sworn trooper FTE position for agency strategic planning, technology research, and future visioning (Priority: 23)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	10,000	-	10,000	0.00	-	-	-	0.00
Total	284,082	-	284,082	1.00	-	-	-	0.00

State Initiative*: Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The NDHP would like to add an additional position to be utilized for long-term strategic planning. This individual will be the agency's visionary who is constantly seeking agency growth and transformation to best meet the needs of the future.

Necessary resources for implementation (including FTE's)*: 1 additional sworn trooper FTE. This is a new position that would likely be filled by a current trooper who's position will need to be backfilled. The funding required for a new trooper is 282,000 in ongoing salary, benefits, and operating expenses and 53,000 for one-time equipment needs.

Are resources being redirected or are they new or additional (including FTE's)*: A current employee would be redirected into this position requiring a new FTE to backfill the troopers normal duties.

Who is served and impact of not funding*: This position will seek to provide the vision necessary to help best align the agency in the future. Their purpose will to explore the future of law enforcement policy, procedures, and equipment to allow the agency to be not just response to change, but on the front of change, leading it.

NDHP recruiter position (Priority: 24)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	244,532	-	244,532	0.86	-	-	-	0.00

504 Highway Patrol

Agency 504

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	39,548	-	39,548	0.14	-	-	-	0.00
Total	284,080	-	284,080	1.00	-	-	-	0.00

State Initiative:* Employer of Choice

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The NDHP would like to add an individual position to be utilized for agency recruiting. With this position we would enhance our recruitment abilities by specifically being able to target career fair events, college programs, high school youth organizations, and military organizations to recruit specifically for the position of trooper. This individual would be experienced as a trooper to be able to have the candid discussions about the profession with a potential applicant as well as be well versed on the agency benefits and what to expect in the training academy. This person would also assist in the increased media reach we are looking to also enhance through and increased advertising budget which is outlined in another decision package. A specific position will allow us to proactively do "boots on the ground" recruiting.

Necessary resources for implementation (including FTE's)*: The recruiter position would likely be filled by a current trooper who would transfer into the role. The troopers position would then need to be backfilled with a new trooper assigned to normal trooper duties. The funding needed for an additional trooper is 282,000 of ongoing salary, benefits, and operating expenses for the biennium and 53,000 in initial one-time equipment costs.

Are resources being redirected or are they new or additional (including FTE's)*: We attempt to actively recruit with current troopers around the state. We are failing in this area by not having a specific individual assigned solely to seeking out potential applicants and making initial and follow-up contact with them.

Who is served and impact of not funding*: The citizens of North Dakota are served by ultimately having a professional, highly qualified, and highly trained law enforcement agency. Not funding will cause us to continue with the status quo, which is becoming less effective in recruiting applicants for a professional and diverse agency.

2 sworn safety and education/community outreach positions (Priority: 25)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	548,170	-	548,170	2.00	-	-	-	0.00
Special	20,000	-	20,000	0.00	-	-	-	0.00
Total	568,170	-	568,170	2.00	-	-	-	0.00

State Initiative:* Health, Vibrant Communities

504 Highway Patrol

Agency 504

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The goal of two community outreach troopers is to expand our efforts in the areas of traffic safety, crash prevention, public awareness, and to build positive, proactive relationships with the public, especially North Dakota residents. The NDHP conducted over 1,500 safety talks from 2017-2021. These safety talks have mainly been at the request of schools, community groups, and businesses within the state. These troopers would take a proactive approach toward educating the public on traffic safety and public safety topics. They would be tasked with planning, developing, coordinating, and implementing community safety programs, special events, and annual projects. They would also enhance our Cultural Liaison Program by helping coordinate activities and outreach events with tribal nations. Outreach efforts would be focused on schools, community groups, and businesses. The two additional troopers would also specialize as department recruiters and participate in recruiting events.

Necessary resources for implementation (including FTE's)*: The positions requested would likely be filled by current troopers, requiring a back fill of their positions for normal trooper responsibilities. The funding needed for two new troopers includes 564,000 in ongoing salaries, benefits, and operating expenses for the biennium and 106,000 in one-time equipment costs.

Are resources being redirected or are they new or additional (including FTE's)*: These positions would specialize in safety and education presentations and activities. Currently troopers are attempting to meet this need, but may lack the necessary available time and expertise to properly address the safety and community outreach needs.

Who is served and impact of not funding*: Citizens of the state of North Dakota are served. Education and prevention efforts will have an impact on tragic events before they happen by providing the necessary tools and better understanding to individuals before they make decisions with have a tragic outcome.

1 sworn crash reconstruction trooper position (Priority: 26)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	274,082	-	274,082	1.00	-	-	-	0.00
Special	10,000	-	10,000	0.00	-	-	-	0.00
Total	284,082	-	284,082	1.00	-	-	-	0.00

State Initiative*: Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The addition of a primary position on the Crash Reconstruction Team (CRT) would greatly benefit the agency and the citizens we serve. Currently, there are two primary members of the CRT, one coordinator and one analyst. The coordinator oversees operations of the team, reviews all cases the CRT is involved in for potential analysis, tracks training and new equipment that will benefit the team and its members, and analyzes

504 Highway Patrol

Agency 504

cases when time is available to do so. The primary analyst's main focus is on case analysis from crashes that occur across the state. Both the coordinator and analyst also assist the local regions on storm days or when the region is short with calls for service and crashes.

In 2019, the CRT was involved in 97 total cases with 31 of those cases going through reconstruction analysis. In 2020, the CRT was involved in 113 total cases with 32 of those going through to analysis. In 2021 the CRT was involved in 131 cases with 52 of those going through to analysis. The increase in case load across the state over the years has caused a backup of case work since the number of analysts hasn't changed. When we were at the point of our biggest backlog of cases, they would take about 6-7 months for the analysis to be completed from the date of the crash. This backlog was felt by the team, State's Attorney's offices that were looking for the analysis for potential charges, and most importantly the families of crash victims who had to wait for the cases for the information on what happened to their loved ones.

The addition of a third primary member to the team would help to alleviate the backlog of case work, resulting in a more timely analysis to be completed and sent to the State's Attorney's offices as well as the families of crash victims.

Necessary resources for implementation (including FTE's)*: One additional trooper to replace backfill for a current trooper to transition to a full time crash reconstruction trooper. The funding required for a new trooper is 282,000 in ongoing salary, benefits, and operating expenses for the biennium, and a there is a one-time equipment cost of 53,000.

Are resources being redirected or are they new or additional (including FTE's)*: This would enhance a current program

Who is served and impact of not funding*: The public is served and not funding will continue a delay in processing of crash reconstruction cases for prosecutors.

Add 1 full-time trooper to NDDOT's DRE and SFST program (Priority: 27)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	298,268	-	298,268	1.00
General	274,082	-	274,082	1.00	-	-	-	0.00
Special	10,000	-	10,000	0.00	-	-	-	0.00
Total	284,082	-	284,082	1.00	298,268	-	298,268	1.00

State Initiative*: Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: With constantly evolving drug trends and the legalization/decriminalization of marijuana in the United States and the increase in other illegal substances such as opioids, officers need regular updated training to identify drug impairment as it relates to driving. Alcohol related crashes also continue to be a major problem in North Dakota, generally accounting for one third to one half of all serious injury and fatality crashes.

504 Highway Patrol

Agency 504

The Drug Recognition Expert/Standardized Field Sobriety Testing (DRE/SFST) State Coordinator position plays a vital role in training law enforcement officers across the state to detect and deter alcohol and drug impaired drivers. The DRE/SFST State Coordinator is tasked with making sure that the impaired driving programs follow the standards set by the National Highway Traffic Safety Administration (NHTSA) and the International Association of Chiefs of Police (IACP). One of the main roles of the DRE/SFST State Coordinator is to ensure regular, consistent training is provided. Currently, time constraints restrict the DRE/SFST State Coordinator's ability to completely fulfill all the duties and responsibilities associated with the position, meaning impaired drivers continue to travel on North Dakota roadways unchecked. This creates an enormous danger to the general motoring public.

A fulltime DRE/SFST State Coordinator would positively benefit the state by being able to dedicate all of their time to combat the impaired driving issues in North Dakota. The position's oversight is essential to maintaining high quality training and updated information to state, county, and local law enforcement agencies which ultimately makes the roads safer for our citizens.

Necessary resources for implementation (including FTE's)*: NDDOT has offered that they are able to fully fund the position through the use of available safety funding. The position would be filled by a current trooper and the vacated position will be filled by a new trooper. If we retain the funding from the original trooper, we wouldn't need additional funding, just the FTE and authority for the funds provided by NDDOT.

Are resources being redirected or are they new or additional (including FTE's)*: Currently we are attempting to assist with the DRE/SFST program part time, but at the detriment of the trooper's current duties. The NDDOT funding and additional FTE will allow us to provide the expertise needed for the program without impacting current field personnel.

Who is served and impact of not funding*: The DRE/SFST ultimately serves the public by providing the resources and training to properly train law enforcement officers around the State of ND to properly recognize and remove impaired drivers from the roadways, making them safer for the motoring public.

10% increase in travel funding (Priority: 28)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

NDIT programming of bridge between ARIES and ASPEN programs (Priority: 37)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	47,000	47,000	0.00	-	47,000	47,000	0.00
General	-	3,000	3,000	0.00	-	3,000	3,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	50,000	50,000	0.00	-	50,000	50,000	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Funding to program a bridge between the NDHP ARIES records management program and the Federal Motor Carrier ASPEN inspection program to reduce duplicate data entry and share information between the two programs.

Necessary resources for implementation (including FTE's)*: Total estimated project cost of 50,000 - federal funds

Are resources being redirected or are they new or additional (including FTE's)*: New federal funds

Who is served and impact of not funding*: This is an enhancement to reduce redundant data entry.

Inspection Site Signage and Lighting Upgrades (Priority: 38)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	-	-	-	0.00	-	-	-	0.00
Total	150,000	-	150,000	0.00	-	150,000	150,000	0.00

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As part of the available funds through Federal Motor Carrier in the MCSAP program, The agency would like to be appropriated to utilize the funds. The funds would be used to enhance signage and lighting at current CMV inspection sites. The enhancements would make a safer, more efficient environment to both notify traffic as well as provide additional safety measures for the individuals completing the truck inspections. The sites are mainly at the current scale facilities, but additional signage could be added to pull-out areas or rest-stops.

Necessary resources for implementation (including FTE's)*: Total ongoing project cost of 300,000/biennium to update the lighting and signage at inspection sites around the state. These expenses are MCSAP (Federal) funding eligible and will enhance the safety of inspection sites.

Are resources being redirected or are they new or additional (including FTE's)*: New federal funding opportunity

Who is served and impact of not funding*: Safety will not be enhanced

Automatic License Plate Readers (ALPR) (Priority: 39)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Total	-	160,000	160,000	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

504 Highway Patrol

Agency 504

Request explanation and justification (include any statutory authority)*: The NDHP would like to begin to explore the technology available through the use of license plate readers. The LPR's will be able to assist in CMV inspections by screening the license plate/DOT number of CMV's. License plate readers are becoming more common for use in different applications both in the state of ND and around the country.

Necessary resources for implementation (including FTE's)*: Total project cost of 160,000 to provide LPR's at weigh stations located in West Fargo, Mooreton, Joliette, and Beach. The LPR's will be able to assist in CMV inspections by screening the license plate/DOT number of CMV's.

Are resources being redirected or are they new or additional (including FTE's)*: New federal funding opportunity

Who is served and impact of not funding*: The use will create efficiency

New Sworn MCSAP trooper FTEs (Priority: 40)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	1,203,336	-	1,203,336	4.00	667,602	-	667,602	1.90
General	145,000	-	145,000	0.00	35,127	-	35,127	0.10
Special	-	-	-	0.00	-	-	-	0.00
Total	1,348,336	-	1,348,336	4.00	702,729	-	702,729	2.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Due to the Federal Bipartisan Infrastructure Law (BIL) signed into law on November 15, 2021, the North Dakota Highway Patrol is eligible to receive additional MCSAP funding through Federal Motor Carrier Safety Administration (FMCSA). In addition to the increased funding, the match for the funding with transition from 85/15 (fed/state) to 95/5. The additional funding will result in an additional funding of 991,310 annually or 1,982,620 for a two year period. The funding goes into effect for the Federal Fiscal Year 2022 grant, which began in October of 2021 and has a 3 year period of performance. Below is an illustration in the funding changes:

Original FY 2022 Funding:

2,609,479.00 Federal

460,135 State

3,069,614 Total (85/15)

New/Revised FY 2022 Funding:

504 Highway Patrol

Agency 504

3,857,878 Federal

203,046 State

4,060,924 Total (95/5)

Difference

1,248,399 Federal

-257,089 State

991,310. Total Annual

The increased funding level is expected to continue to FFY 2026 based on the guidance of the BIL.

The funding must be used for eligible activities related to Interstate Commercial Motor Vehicle compliance with the North American Standards. Infrastructure is not an eligible expense of this grant, but equipment, training, salaries, etc are eligible expenses. The NDHP is seeking additional spending authority to make use of the grant. In addition to spending authority, we are request 4 additional sworn MCSAP Trooper FTE's that will be funded mainly through the program. The NDHP has also developed a plan to make use of the additional funding. Those items include:

CMV Crash Reconstruction Equipment - Total project cost of 35,000 to purchase heavy truck crash data retrieval (CDR) equipment to read the post crash data from commercial motor vehicles.

Four (4) UAV's for use in CMV inspections and enforcement - Total project cost of 100,000, includes (4) UAV's to assist in CMV inspections and CMV enforcement activities such as right of way and railroad grade crossing enforcement. The UAV's could also be used in a hazards materials scene to collect information safely.

NDSU-Upper Great Plains safe system truck crash analysis - NDSU-Upper Great Plains safe system truck crash analysis project

NDIT programming of bridge between ARIES and ASPEN programs - Total project cost of 50,000 to program a bridge between the NDHP ARIES records management program and the Federal Motor Carrier ASPEN inspection program to reduce duplicate data entry and share information between the two programs.

Inspection Site Signage and Lighting Upgrades - Total ongoing project cost of 300,000/biennium to update the lighting and signage at inspection sites around the state. These expenses are MCSAP (Federal) funding eligible and will enhance the safety of inspection sites. The sites are mainly at the current scale facilities, but additional signage could be added to pull-out areas or rest-stops.

Automatic License Plate Readers (ALPR) - Total project cost of 160,000 to provide LPR's at weigh stations located in West Fargo, Mooreton, Joliette, and Beach. The LPR's will be able to assist in CMV inspections by screening the license plate/DOT number of CMV's.

Overtime designated for human trafficking in the CMV industry

504 Highway Patrol

Agency 504

Necessary resources for implementation (including FTE's)*: 4 sworn MCSAP trooper FTE's are being requested. Although the revised match for the funding moves from 85/15 to 95/5, the state cost per FTE does end up being more than 5%. The grant covers 95% of eligible expenses. When it comes to salaries and equipment, however, the actual calculation is based on time spent conducting MCSAP eligible activity. Currently, our MCSAP personnel average approximately 75% of their total time being eligible for reimbursement. The cost of a trooper FTE for the biennium is approximately 312,000 for the biennium with a breakdown of \$222,300 in federal funds, and \$44,850 in state funds. Additionally, the one-time equipment costs for a new trooper are \$50,000 (35,625 federal/14,375 state)

Are resources being redirected or are they new or additional (including FTE's)*: These are new funds and FTE's

Who is served and impact of not funding*: The citizens and visitors of the state of North Dakota who use the highway system. Federal Motor Carrier is a stakeholder in guiding the activities conducted under the grant program.

Funding the project is expected to enhance CMV safety.

Funding for Rent Model (Priority: 41)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* State Facility Investment

Start Date (MM/DD/YYYY):

End Date (MM/DD/YYYY):

Description: As a result of a providing a reduction in general fund dollars in the 2021-23 biennium, the NDHP moved from a leased space to the NDDOT office in Fargo. The move resulted in a significant reduction in space. The space provided by NDDOT meets our needs, except there is very limited storage and limited ability to conduct necessary vehicle related activities such as equipment maintenance or indoor searches of impounded vehicles. The NDHP has collaborated with the NDDOT, which has allowed the NDHP to construct a single stall garage space as an addition on the current NDDOT building in Fargo. Initial estimates show the project will be \$722,000 to construct.

Total					-	-	-	70,000	35,000	70,000	35,000	70,000	35,000

State Initiative:* Transforming Education

Justification: The NDHP is responsible for basic law enforcement training for state, county, and local law enforcement agencies. Enhancing our ability to conduct non-hands on training remotely will ultimately limit the total time needed to bring offers in for in-classroom training. This will allow the officers to be more accessible locally to their agency by spending less time away from their agency while in Bismarck for training. Learning management software is currently used by secondary and higher education institutions for creating a more streamlined in-person and on-line/remote learning environment. The project request is for 70,000 in on-going and 35,000 in one time funding.

TruNarc handheld narcotics testing device (Priority: 15)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Total					-	-	-	-	60,000	-	60,000	-	60,000

504 Highway Patrol

State Initiative:* Behavior Health and Addiction

Justification: The global drug problem is increasing, with trafficking of methamphetamines, heroin, and emerging threats like fentanyl, and carfentanil, impacting communities worldwide, to include communities across North Dakota. Our officers need to quickly identify suspected narcotics in the field to help keep drugs, and drug dealers, off the streets. The TruNarc Handheld Narcotics Analyzer enables officers to scan more than 498 suspected controlled substances in a single, definitive test. With these machines, officers can scan suspected narcotics in the packaging, without having to directly handle them. This significantly lowers officer risk of exposure. The funding requested is for 60,000 in one-time funding of 2 units.

NDHP Records management (ARIES) program updates (Priority: 16)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

	400	504-3100	50471	693000	-	-	-	-	10,000	-	10,000	-	10,000
Total					-	-	-	-	80,000	-	80,000	-	80,000

State Initiative:* Technology Investment

Justification: ARIES Security Upgrades: Update security protocols to allow for higher restriction classes for certain cases and processes.

ARIES Evidence Custodian Enhancements: Update the ARIES Evidence Module to incorporate identified suggestions and needs of the Evidence Control Officers and Supervisors. This has been planned since the evidence module was rolled out.

ARIES Enhancements: Update ARIES based on documented administration, stakeholder, and field needs.

The amount needed for these one-time enhancements to the program is 80,000, which will be provided to NDIT to cover the programming costs.

NDHP dashboard research and analytics (Priority: 17)

Total					-	-	-	-	15,000	-	15,000	-	15,000

State Initiative:* Technology Investment

Justification: This funding is to research and begin to implement an agency dashboard which will coordinate data from several traffic data sources and other systems to bring real time information to the trooper on the road. The requested funding is 15,000 for the project

Training academy management software (Priority: 20)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	504-3100	50471	693000	-	-	-	43,000	62,000	43,000	62,000	43,000	62,000
	400	504-3100	50471	693000	-	-	-	7,000	10,000	7,000	10,000	7,000	10,000
Total					-	-	-	50,000	72,000	50,000	72,000	50,000	72,000

State Initiative:* Transforming Education

Justification: The NDHP requests funding for academy software to better track officer certifications, training, and training deadlines.

Law Enforcement has many associated risks, but one that is not in the forefront, it the legal liability that an agency takes for properly training their officers. CANTON v. HARRIS(1989) states that an agency in certain circumstances, be held liable under 1983 constitutional violations resulting from its failure to train its employees.

While the highway patrol prides itself on its level of professional training, we lack in the ability to effectively manage it. Many troopers have 5-15 different certifications, which all have different expiration dates. It is important for our agency to have software to manage those certifications, send out reminders of upcoming expirations, and to direct them where to recertify to avoid having troopers with expired certifications.

The Law Enforcement Training Academy uses around 70 instructors from agencies around the state to conduct one basic academy class, which occurs three times a year. The academy needs instructor scheduling software to manage those moving parts and will notify them of changes or will send them reminders. It would also allow them to collaborate with others, so they can more routinely update their curriculums to current trends.

504 Highway Patrol

Agency 504

Training, keeping officers certified, and using current updated curriculums will help protect the citizens of North Dakota, troopers, and the agency itself from liability.

Initial quotes received for software which would meet the requested needs are 72,000 in one-time costs and 50,000 in ongoing costs

Daily activity software program enhancements (Priority: 30)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	504-3100	50471	693000	-	-	-	-	8,000	-	8,000	-	8,000
	400	504-3100	50471	693000	-	-	-	-	2,000	-	2,000	-	2,000
Total					-	-	-	-	10,000	-	10,000	-	10,000

State Initiative:* Technology Investment

Justification: Enhancements to the NDHP daily activity reporting system to enhance scheduling and on-call features within the program. The one time funding needed for these enhancements is 10,000.

Field Training Management Software (Priority: 31)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	504-3100	50471	693000	-	-	-	8,000	5,200	8,000	5,200	8,000	5,200
	400	504-3100	50471	693000	-	-	-	1,000	1,000	1,000	1,000	1,000	1,000
Total					-	-	-	9,000	6,200	9,000	6,200	9,000	6,200

State Initiative:* Technology Investment

Justification: Field training of new officers is a very important step in the training and onboarding troopers. We are requesting funding for a solution which will streamline the daily observation reporting that is completed by the field training officer. It will allow for the field training officer to better document and track the new recruit's progress as they go through FTO. Documentation is a crucial part of managing risk in law enforcement. Unorganized or lack of proper documentation which tracks progress and corrective measures could result in a significant amount of risk for the NDHP and State of North Dakota. We currently do the documentation manually, which can distract from valuable training time. The software solutions work closely with the methods of field training that are currently standard practice among law enforcement agencies. The funding needed for the software includes 6200 in initial one-time and 9000 in ongoing costs.

504 Highway Patrol

Agency 504

UAV's for crash reconstruction team, emergency response team, and field operations (Priority: 35)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	504-3300	50471	691000	-	-	-	-	5,000	-	5,000	-	5,000
	XP016	504-3300	50471	691000	-	-	-	-	95,000	-	95,000	-	95,000
Total					-	-	-	-	100,000	-	100,000	-	100,000

State Initiative:* Technology Investment

Justification: We are seeking additional sUAS(UAV's) and additional equipment for use in crash reconstruction, our emergency response team and other uses in the field. The request is for three additional UAV's to be used for crash reconstruction. The addition of 3 will bring the current 5 crash reconstruction UAV total to 8. This will allow us to have UAV's in the 8 larger cities, providing a more efficient response to crashes by the crash reconstruction team. 4 additional UAV's are requested for use by the NDHP's emergency response team ERT). The ERT is broken down into 4 geographical squads for each of the 4 regions in the state. The request would provide an additional 3 UAV's appropriate for quicker deployment in ongoing critical or civil unrest incidents. The team currently has one UAV suitable for these purposes. The 4th UAV requested for the ERT would be a larger search and rescue style platform, bringing our search and rescue capabilities from 1 to 2 UAV's. 6 additional, smaller more portable UAVs requested for field operations will be staged strategically around the state for quick availability to respond to miscellaneous incidents. In addition to the UAV's, we are requesting funding for 4 additional desktop computers capable of processing crash scene video and images in the programs used for crash reconstruction. One additional license for Pix4D, which is the software program used to process the crash scene data. 4 additional battery packs are needed for the current Matrice 300 search and rescue UAV used by the emergency response team. The packs will increase the time available to spend on station at search and rescue operations without the ability to charge quickly. The total funding for the expansion of the UAV program is 104,000 one-time and 500.00 ongoing.

Statutory Authority

There is hereby created a department of corrections and rehabilitation that is responsible to the governor. 54-23.3-01

Agency Description

The department is responsible for the direction and general administrative supervision, guidance, and planning of adult and juvenile correctional facilities and programs within the state. The department includes a division of adult services, a division of juvenile services, and such other divisions as are determined necessary for the effective and efficient operation of the department. Programs and facilities included in the department are the North Dakota state penitentiary or any of its affiliated facilities, parole and probation for adult offenders, North Dakota youth correctional center, community programs and services for juvenile offenders under the division of juvenile services, and any other programs developed by the department. 54-23.3-01

Agency Mission Statement

The mission of the Department of Corrections and Rehabilitation is transforming lives, influencing change, and strengthening community.

Major Accomplishments

- 1 Heart River Correctional Center (HRCC) opened on June 15, 2021 with approximately 32 women residing there. The facility is located on the YCC campus in Mandan, ND. As the youth residential population has declined, DOCR has successfully launched gender responsive services for women on a combined mission campus.
- 2 The Electronic Health Record system was implemented. This major project combined DHS health records with DOCR records. In addition, it has brought medical and mental health information into one record system for the DOCR and for better resident population care.
- 3 Through a partnership with VERA and MILPA, a Restoring Promise Unit was initiated at NDSP. The Unity Village is grounded in dignity and respect focusing on 18 – 25 young male adults. The unit is culturally sensitive with a restorative justice model to promote positive outcomes. The team working in this unit includes incarcerated mentors who guide the young men through this process.
- 4 Due to the heroic efforts the DOCR medical teams, they received the Roaming Bison award for their coordinated response and treatment of the COVID-19 pandemic. The DOCR partnered with the Department of Health to conduct vaccination clinics, with each facility averaging 75% of residents being fully vaccinated. The DOCR is also on track to treat 43% of our residents who present with Hepatitis C upon admission.
- 5 The DOCR signed contracts with MTC and SWMCCC to provide chemical addiction and criminal thinking treatment services to people on supervision in Dickinson, Watford City, Williston, Rolla, Bottineau and Devils Lake. Services are up and running in Dickinson and services are contracted with MTC for the Minot area.
- 6 The DOCR expanded Pretrial Services by adding additional coverage in Bismarck/Mandan, Fargo and Minot areas. An additional pretrial services site was added in Devils Lake and the surrounding area.
- 7 RRI worked with outside employers to procure work projects and is placing former incarcerated individuals in career-type employment. In September 2021, RRI employed our first former resident by hiring an individual who had worked in our correctional industry program the previous ten years. This was the first former incarcerated individual hired by the ND DOCR and helped make the reentry transition easier for this individual. It also allowed RRI the opportunity to hire someone with 10 years of RRI working experience. Someone already familiar with our products, staff, and processes and procedures. He has proven to be a true asset to RRI and the ND DOCR.

Major Accomplishments

-
- 8 Transitional Planning implemented an online booking process that counties use to request admission of newly sentenced offenders to the DOCR. This system has increased communication of medical, behavioral, and other circumstances that may pose a risk to staff of other residents. In addition, it has increased the efficiency for DOCR staff to process and prepare for new arrivals into the orientation unit.
-
- 9 Development of a Parole Board Dashboard that tracks the actions of the board. Collaboration with Foundation AI resulted in a dashboard that reduces staff hours. Previously staff manually entering data to track parole board actions.
-
- 10 Ward County Work Release Program was implemented August 1, 2022. The DOCR in collaboration with Ward County Detention Center developed a pilot work release program for DOCR residents wanting to release into the Minot area. This is a 10-bed unit that will house minimum security residents during the last few months of their incarceration that allows the residents work release opportunities in Minot and the surrounding area. We are hopeful this program will develop into a labor source for local area businesses to recruit employees.
-
- 11 The Shining Light educational programming was delivered through ZOOM meetings. This group is based out of Pennsylvania. The Academy had 33 graduates and delivered over 4,700 hours of programming to students at NDSP and JRCC.
-
- 12 The DOCR implemented Medication for Opioid Use Disorder treatment for residents at all of the adult facilities, including HRCC. Medications offered include Methadone, Suboxone, Vivitrol, and Narcan are sent with residents upon discharge free of charge.
-
- 13 Plant services was blessed with an unprecedented budget to focus on much needed repairs across the four campuses. Completed: New High-Pressure Boiler Feedwater Pump, Medium Transition Unit window replacement, Perimeter security fence expansion project, renovated Restoring Promise Unit, Emergency lift station main piping repairs, West Unit interior security glass installation, Installed air conditioning in Overflow housing unit, and various other projects.
-
- 14 DOCR Dental staff obtained a 3D printer which allows them to create dental prosthetics in-house. This is allowing more patients the opportunity to get dental prosthetics at a significantly reduced cost to the state.
-
- 15 The DOCR partnered with NDSU to conduct wastewater testing for COVID. This partnership has provided critical data for facility teams regarding any new COVID cases.
-
- 16 Community partnerships focusing on restorative justice include RADD and United Way Day of Caring at MRCC. Also, the team at HRCC is partnering with Vocational Rehabilitation and Job Service ND to improve the transition from prison to work in our communities.
-
- 17 HRCC had ten high risk pregnant residents since opening in June of 2021 and all the women had successful deliveries. Also, HRCC has connected with the UND Children and Family Services' Training Center regarding partnering and providing more thorough training to foster care workers and foster parents to increase knowledge and involvement for children that have incarcerated parents.
-
- 18 NDSP created tele-court hearing rooms to reduce the pressure on team members and the court system as there has been a significant increase and demand to conduct tele-court hearings as the prisons have never been staffed to provide court hearings.
-

Critical Issues

-
- 1 Significant staffing shortages, specifically correctional officers, medical staff, behavioral health, teachers and many other positions. For example, HRCC has not been able to open both cottages due to critical staffing levels. This is a two-fold critical issue as the women's population continues to push beyond bed capacity in the state. The DOCR is not competitive in recruiting qualified staff for front-line positions, which leaves much needed beds vacant.
-
- 2 The lack of licensed addiction counselors at the DOCR is impacting the timing of treatment programming resulting in delayed parole board review. This potentially keeps offenders at the DOCR for longer periods of time increasing the overall prison population.
-
- 3 Improving state employee compensation and benefit package are critical to the recruitment and retention of high-performing team members. Compensation is not competitive with other industries which is leading to being unable to recruit and retain staff .
-

Critical Issues

-
- 4 A significant number of DOCR residents suffer from serious mental health issues. The residents are not only difficult to manage, but also pose a challenge when trying to reintegrate them back into society. This need has risen to the point where a need for a dedicated coordinator that would work with case managers and community stakeholders.
-
- 5 The DOCR has a growing population of elderly/high needs residents that prove to be a significant challenge for reentry planning. The DOCR has a need for a long-term care facility or contracted long-term care facility to care for our aging population both during and post incarceration. The stigma associated with justice involved individuals has resounding affects. These elderly residents are often denied placement in care facilities post incarceration despite requiring skilled nursing care.
-
- 6 Currently, there are no transitional facilities West of Mandan and we need to increase the opportunities for reentry in Western ND. This will require the support of funding dollars dedicated to the implementation and operation of these programs. Partnering with local stakeholders will create opportunities for residents to transition back to their home communities.
-
- 7 There is a lack of bed space and services for those that have serious mental health concerns. Often the mental health drives the criminal behavior. But it is the criminal behavior that gets addressed, thus leaving the DOCR and DWCR to manage significant mental health concerns in facilities that are not built to handle such cases as well as having the lack of clinical staff to support the resident's needs.
-
- 8 There is a need to increase community-based services for women leaving prison. A critical issue is continuing to keep the women and their needs at the forefront, as the female numbers are continuing to grow in the system and women continue to have challenges in the community on parole or in the transitional facilities.
-
- 9 New medical space/remodel of JRCC medical unit is needed to include: additional beds (currently only two infirmary beds and in a shared room), updated medication room, and a functional clinic area with exam rooms, nurses' station, room for contract providers such as physical therapy, tele-psychiatry, dental and optometry. The lack of ADA equipment and accessible housing at JRCC/ HRCC/ MRCC limits housing availability for residents with ADA needs.
-
- 10 There were two completed suicides during this biennium. We need to ensure that the critical incident response is focused on our team member wellness and recovery after a major incident. We also need to ensure our policy, practice, and training are in line with a good suicide prevention program.
-
- 11 The JRCC Maintenance shop must be replaced. Repairs needed exceeds three million dollars and the heating plant on the campus will discontinue service after this heating season. A metal building has been requested to replace it. The Amusement Hall is also in major need of structural work as these buildings are beginning to fail.
-
- 12 At NDSP the West Unit and Administration buildings need complete plumbing replacements due to their age. The Rough Rider Industries buildings are in complete need of HVAC overhaul in Buildings A, B, & C.
-
- 13 At YCC/HRCC the School/Administration building and Centennial Hall need electrical service replacements. The entire YCC/HRCC campus needs an upgrade to the steam system . New windows are needed at Brown Cottage and at the School. The School and Brown Cottage also need air handling unit replacements and Pine Cottage will need a chiller & heat exchanger.
-
- 14 The MRCC buildings are in very poor condition due to age. These buildings do not provide adequate space for programming and recreation (no gymnasium). The heating and cooling systems have been problematic and costly for many years. The control desk in the main housing unit needs to be replaced with newer technology enhancing security practices at the facility. There is also a need for industrial laundry equipment as household laundry machines are not able to keep up with the demand of doing laundry for 190 residents.
-
- 15 JRCC/MRCC /HRCC/YCC/DWCR all have dormitory style housing – this limits the ability to control the spread of airborne diseases such as COVID and influenza. Additional security staff and vehicles for medical runs at NDSP, JRCC, MRCC, HRCC. outside of the DOCR are often pushed back weeks if not months due to security or vehicle availability at all facilities.
-

Critical Issues

-
- 16 Recruiting and retaining employees is impacting contracted reentry centers. This has a significant impact on bed space for the DOCR as well as access to required programming for residents. The cost for reentry center placements is going up because of increased costs for food, operational expenses and staffing.
-
- 17 DOCR tele-medicine connectivity is only through use of zoom or similar platform with outside medical systems. There is a need for a better platform to connect with outside medical providers.
-
- 18 The ability to keep up with the ever changing technology and finding ways to better utilize existing technology in order to help with efficiency, improving services, and staff performance.
-
- 19 Access to safe and affordable housing for the newly released offenders as well as quick and reliable access to quality evidence-based behavioral health services.
-

Performance Measures

Performance measurement data is reported at the agency level.

Program Statistical Data

Central Office – Adult /Juvenile: Is responsible for providing executive leadership to the DOCR and for the management of administration, human resources, training, fiscal services, information technology, research, plant services, medical services, and warehouse services. Plant services maintains the physical plant operations for the buildings at all the institutions. The department has assigned staff by institution location based on needs. Medical Services provides medical care for the entire offender population and provides indirect supervision to DWCRC for female residents. Resident oversight for medical needs is provided for offenders housed at county jails, assessment centers, halfway houses and out of state transfers. The Training Department is responsible for training all ND County Correctional Staff. This program completes inspection and certification of all adult/juvenile correctional facilities in the state. Business Analytics/IT researches the processes and methods that are used to capture meaningful data for reporting purposes. The DOCR Warehouse work unit ensures that all procurement activity is conducted in compliance with all state laws, regulations and approved policies and procedures.

YCC – Youth Correctional Center: Provides services for the incarcerated youth. Food Services prepares/serves 27,184 meals/yearly. Security & Supervision oversees the daily campus operations which included 198 admissions in 2021. Marmot School provides educational services to the youth. Marmot school also served students from 26 of the school districts in ND. Treatment provides services to 152 youth for supplemental suicide prevention programming/78 individual counseling sessions were conducted.

Juvenile Community Services: Provides services in eight regional offices across the state. This past year, 23% of the youth were placed back into their homes, 30% were placed at YCC and 47% were placed in foster, group, or psychiatric residential settings.

Adult Services Administration: Crime Victims Compensation Program Statistics for 7/1/2020-6/30/2021: Applications for Assistance Processed: 464 of these applications, 380 were approved, 84 were denied. Claims for Reimbursement Processed: 500 claims with 425 payments made totaling \$270,801.94.

2021-2020 Victim Service Grant Program Statistics: 2021 -\$2,830,097 and 2020 - \$4,268,738,

Parole and Probation: July 1, 2020 thru June 30, 2021 - Presentence Investigations Completed: 298

Men -Case Mgmt. & Supervision Services: 4858, and Women - Case Mgmt. & Supervision Services: 1740

Transitional Planning: July 1, 2021 thru June 30, 2022 – 1301 Cases prepared for Discharge, 1713 Parole Review Cases, 1579 Offenders transported/with 0 Offenders escapes, and 1141 Classification Hearings.

NDSP- North Dakota State Penitentiary, JRCC- James River Correctional Center, and Transitional Facilities: NDSP/maximum-security prison houses all custody levels residents within its seven housing units and serves as the reception/orientation unit for the approximately 1,150 new male yearly arrivals. Food Services prepares approximately 60,505 meals monthly/employs 59 residents daily. JRCC/medium-security prison, share their Jamestown campus with the NDSH. JRCC has a 24 bed Special Assistance Unit (SAU) for residents with serious mental illness/special needs. Food Service Department provides approximately 65,000 meals monthly for residents/NDSH patients. Two separate menus are prepared, one menu for NDSH patients/another menu for the JRCC residents. The MRCC/minimum-security facility in south Bismarck houses up to 191 residents and are housed within 13 separate dorms. Food Services prepares approximately 16,140 meals monthly/employ 7 residents daily. Residents are required to gain employment or participate in the education program while at MRCC. To manage the population, the DOCR identifies appropriate minimum custody cases to utilize contracted transitional facilities and county jails.

Behavior Health: Mental health status continues to be a key issue in targeting criminogenic risk in that it influences the effect of evidence-based interventions on an individual level. From July 2019 - June 2021, 91 % of men and 95% of women entering prison were referred for substance abuse treatment.

Education: Last biennium, 37% of new arrivals didn't have a high school diploma or GED and the average reading level for incoming residents is at 4th grade level.

RRI: Provides monthly work for an average of 130-170 offenders. This represents approximately 12% of the population housed at the DOCR facilities. which compares favorably to the national average of 7.9%.

Women Services: In early July 2022 there were 215 women residents under the control of the DOCR. DWCR's average daily population housed for fiscal year 2021 was 116 and received 259 new arrivals for 2021. The average daily population housed in non-traditional beds for fiscal year 2021 was 56.

Explanation of Program Costs

DOCR program costs for all the departments/programs include: Staff salaries/benefits, risk management insurance, office supplies, staff travel expenses, monthly building/copier rentals, IT telephone, data, and cell phones, electronic monitoring, drug testing expenditures, contracted professional services, and yearly membership/national dues, expenses for staff to attend professional development and training, and staff related supplies/equipment.

Central Office – Adult & Juvenile: Costs for administration, plant services, medical services, training, warehouse, and information technology. Plant services costs include the daily maintenance of buildings and grounds at each of the facilities, motor pool expenses based on Fleet Services rates, and materials used to repair/maintain the facility and its equipment. Medical services include expenditures for Pharmacy, Medical, Dental, contract medical providers and facilities, and Electronic Medical Records System. Staff Development/training oversees the statewide training/inspections and administers staff training to all the DOCR facilities including Correctional Facilities and all county operated facilities in ND. The DOCR Warehouse procures the inventory commodities for the entire agency and the DOCR IT department was unified with ND IT and now receives monthly invoices from NDIT.

YCC – Youth Correctional Center: Program costs include administration and operation of the secure, 24-7 youth correctional facility. Security and supervision include all supplies needed for youth and staff at YCC. Food service includes the meals and all supplies for the kitchen. Education costs include teacher supplies and training and school/education supplies. Treatment costs include staff training and licensing, contracted professional services, and costs for family participation in programming.

Juvenile Community Services: Program costs include administration, behavior health, and operation expenses for the community in-home juvenile services. Operating fees and services include travel costs for interstate compact, detention inspection, transportation of juveniles, return of runaways and family mileage reimbursements.

Adult Services Administration: Responsible for the administration of the Victim Assistance Grant Program and Crime Victims Compensation Program. Both programs are responsible for the distribution of federal funds to victims and victim service agencies throughout the state of ND and is responsible for the oversight of ND's Interstate Compact for Adult Offender Supervision.

Parole and Probation: Program costs include administration/operation expenses for the community-based parole and probation services. There are offices in seventeen different cities and the division supervises people released on parole by the ND Parole Board, people sentenced through the district courts to supervised probation, people placed in a Community Placement Program, and people on a Community Civil Commitment Order from the courts.

Transitional Planning: Provides services to the Parole Board and Pardon Advisory Board, and other DOCR work units. Costs include the Intake Assessment/Appraisal Services which are required for all people coming into the legal and physical custody of the DOCR and costs for the temporary transport officers, Parole Board, and Pardon Advisory Board.

NDSP- North Dakota State Penitentiary, JRCC- James River Correctional Center, and Transitional Facilities/MRCC: Costs include administration and operation of the secure, 24-7 male maximum, medium, and minimum-security facilities. Costs include food supplies for resident/staff meals and supplies for operating the kitchen. Security and supervision include supplies needed for the male residents/correctional officers. Costs for the resident work program include the resident wages needed for the various institution jobs including the Inmate Canine Assistance Program. Costs for the Security Supervision Contracts include housing residents in county jails, out of state facilities, and for the residents that are housed with the Bureau of Prisons.

Behavior Health: Operation costs are primarily of staff salaries, training, and program costs. The staff must maintain professional licenses and training to ensure effective resident programming.

Education: Costs are comprised mostly of salaries for instructors to deliver educational instruction (GED, Read Right program, career and technical education, college courses and Career Readiness instruction).

RRI-Rough Rider Industries: Costs include raw material costs and staff salaries to operate the industries job skills training programs which are located at NDSP, JRCC, MRCC, and HRCC. RRI manages the commissary operations and oversees/manages all DOCR land resources and corresponding leases.

Women Services: Include costs to house the women at DWCRC and HRCC. The costs to house women at the transitional facilities is budgeted in the Transitional Facilities budget.

Program Goals and Objectives

The goal is to provide executive leadership, structure and a coordinated delivery of correctional services. This includes providing direction and coordination to all departments and programs of the DOCR. Central Office assists local correctional programs through jail inspections and training programs. Emphasis is placed on assuring public safety by following sound security practices and providing programs and services that have proven to be effective with offenders. Plant Services goal is to provide a safe and secure environment for all staff and residents who work and live in the DOCR facilities. This is achieved through the operation, maintenance, and repair of equipment/buildings at all the DOCR facilities. Medical Services goal is to provide a community standard of health care to residents with nursing, medical, psychiatric, pharmaceutical and dental care. Health Care Services are provided to residents while maintaining safety and security for staff, residents and the public. The Training Department's goal is to ensure all training and PREA implementation is properly researched, developed, delivered and evaluated in order to

530 Corrections and Rehabilitation

Agency 530

effectively deliver quality training while ensuring compliance with state and federal law. The DOCR's goal to work in partnership with ND IT to insure all DOCR information systems are operating effectively and efficiently. The Warehouse's goal is to insure all DOCR facilities have cost efficient commodities readily available to meet the needs of running day-to-day operations.

Youth Correctional Center: The goal is to provide a safe and secure environment for the youth residing at YCC. This program plans, manages, and evaluates the facility based on the N.D.C.C., Cognia Transition and PbS Standards to assure that the facility fulfills the statutory care, custody and rehabilitation obligation.

Juvenile Community Services: The goal is to provide comprehensive assessments, treatment planning and case management for youth committed to its care, custody and control by state district courts.

Adult Services Administration: The goal is to provide management for Adult Interstate Compact by managing the process for transferring supervision of offenders who wish to relocate to another state, and to administer the federal victim assistance grants according to the federal guidelines.

Parole and Probation: The goal is to provide efficient and evidence-based community correctional services to people on supervision. The primary objectives include reducing supervision revocation rates, increasing completion rates, minimizing active revocation, and targeting reduction in revocation rates for 18-24-year-olds, especially young women and Native Americans.

Transitional Planning: The goal is to provide management and information support to the other work groups including the Initial Classification/Case Planning Committees, the ND Parole Board and the ND Pardon Advisory Board, Parole and Probation, Prison Facilities, contract service providers and Juvenile Services.

NDSP- North Dakota State Penitentiary, JRCC- James River Correctional Center, and Transitional Facilities: The goal of NDSP, JRCC, and MRCC is to provide a safe and secure environment for all the staff and the residents who work and live at the maximum, medium, and minimum-security facilities. Security and supervision provide a safe and secure environment for the public, staff and residents, as well as a system of effective case management, which helps guide residents toward proper rehabilitation programs and effective reintegration to society.

Behavior Health: The goal is to identify and target criminogenic needs to reduce risk and recidivism with effective programs and treatment, as well as to provide evidence-based interventions targeting mental health concerns. Free Through Recovery improves health-care outcomes/reduce recidivism by delivering community behavioral health services.

Education: The goal is to fulfill the statutory requirements for the state as the approved middle and secondary high school and adult education program to enable students to progress toward or complete their secondary level education.

RRI: The goal is to reduce recidivism through successful re-entry strategies. The program objectives are to provide job skills training to residents that increase their chances of obtaining meaningful employment upon release and to manage DOCR land resources in the best interest of the state while ensuring good land stewardship.

Women Services: The goal is to provide a safe and secure environment for all the staff and the residents who work and live at the two women's facilities/DWCRC and HRCC. Security and supervision provide a safe and secure environment for the public, staff and residents, as well as a system of effective case management, which helps guide residents toward proper rehabilitation programs and effective reintegration to society.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In the 21-23 legislative session, two authorized DOCR staff were overlooked when ND IT unification was implemented. This request is to transfer the two authorized DOCR staff to ND IT. These are position number 28792 and 30110.

530 Corrections and Rehabilitation

Agency 530

Necessary resources for implementation (including FTE's)*: This will reduce the salary line for DOCR for these 2 FTE but increase the operating line in order to pay NDIT through the data processing billing.

Are resources being redirected or are they new or additional (including FTE's)*: Two FTE are being redirected to ND IT. However, they will continue to be located at the DOCR. The salary funding for these two positions will be redirected to DOCR data processing operating line.

Who is served and impact of not funding*: The DOCR is being served ND IT/Security services. DOCR requires qualified staff to maintain our facility security. This includes maintaining electronic doors, cameras and facility fencing, for example. Without those services, DOCR would not be able to maintain an appropriate level of security and maintenance on facilities. If these positions do not migrate, they would remain in DOCR FTE count and still operate.

Increased food costs (Priority: 02)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Our facilities have experienced increased food costs in the current biennium and anticipate increases in the 23-25 biennium due to inflation.

When we prepared the 21-23 budget, we estimated \$1.66 average cost per meal. As of 6/30/2022, our average cost per meal is \$1.74. This was calculated during the time when prices were just beginning to rise. We anticipate an average cost of \$2.15/meal during the 23-25 biennium.

Overall, we are anticipating an average \$0.41 cost per meal increase throughout all facilities during the 2023-25 biennium. However, from what DOCR budgeted in 21-23, it is an \$0.49 cost per meal increase.

Necessary resources for implementation (including FTE's)*: DOCR needs additional funding to keep up with inflationary food costs.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is needed to feed the incarcerated residents.

Who is served and impact of not funding*: On duty staff, that can not leave a post, and incarcerated residents are being impacted with this request.

In the event we do not receive additional funding for food inflation, programming and/or other needs may have to be redirected to feed the population.

530 Corrections and Rehabilitation

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The average medical cost per resident estimated in 21-23 biennium was \$1,414.

For the fiscal year ending June 30, 2022, DOCR's average medical cost per resident was \$1,609. Increased medical costs calculated at an inflationary increase of 2.6% estimated medical costs at \$1,715 per resident.

Necessary resources for implementation (including FTE's)*: Additional funding is needed to account for estimated increased medical costs.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for additional funding for increased medical costs.

Who is served and impact of not funding*: The residents in our care and custody are being served. In the event we do not receive additional funding for medical costs, programming and/or other needs may have to be redirected to tend to our populations medical needs.

Increased treatment of Hep C (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Health, Vibrant Communities

Is this a Large IT project? No

530 Corrections and Rehabilitation

Agency 530

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: As of July 31, 2022, DOCR has treated 80 residents with Hep C for the biennium. The projected cost for Hep C was \$24,057 per treatment and we estimated treating 78 residents in 21-23 biennium. Luckily, Hep C drugs have decreased to around \$14,197 per treatment. We are anticipating treating 240 residents for Hep C.

This represents 50% of individuals admitted to the DOCR who are Hep C positive. We will focus on treating the sickest individuals. Although the DOCR population represents 0.3% of the state's population, 15% of individuals in ND with Hep C have been incarcerated in the DOCR.

Necessary resources for implementation (including FTE's)*: Increased funding is needed to treat our sickest residents with Hep C.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is needed to treat Hep C residents.

Who is served and impact of not funding*: Residents are being treated for Hep C. Failure to treat this chronic infectious disease allows the disease to progress resulting in excess illness, disability and death. Residents who are not treated will continue to spread this illness upon return to the community.

In the event we do not receive additional funding for treating Hep C patients, programming and/or other needs may have to be redirected treat our sickliest resident population.

Increased clothing costs (Priority: 05)

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The DOCR is experiencing increased costs for resident clothing and other linens due to current inflation.

DOCR estimated \$189 per resident when preparing the 2021-2023 biennial budget. As of June 30, 2022, it is costing \$270 per resident with current prices.

Necessary resources for implementation (including FTE's)*: DOCR needs additional funding to clothing residents in our custody due to inflation.

530 Corrections and Rehabilitation

Agency 530

Are resources being redirected or are they new or additional (including FTE's)*: The request for resident clothing and linens is for additional funds due to increased cost of these commodities.

Who is served and impact of not funding*: The residents is the care and custody of the DOCR is served.

In the event we do not receive additional funding for clothing and linen costs, programming and/or other needs may have to be redirected to clothe those in our custody and care.

Increased resident payroll costs (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	-	-	-	0.00	-	-	-	0.00
Total	143,053	-	143,053	0.00	-	143,053	143,053	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The DOCR estimated an average wage per resident of \$43.78. For the period ending June 30, 2022, the average wage per resident is \$44.63.

DOCR requests to increase resident wages by 10%. This allows residents to meet their financial obligations and rising commissary costs.

Necessary resources for implementation (including FTE's)*: Additional funding is needed to implement increasing resident wages.

Are resources being redirected or are they new or additional (including FTE's)*: These funds are for a 10% increase to resident wages.

Who is served and impact of not funding*: Rough Rider Industries is experiencing increased costs to purchase commissary items. Residents will absorb some of these costs. By increasing payroll, more money is available to pay financial obligations also.

EMR maintenance and support (Priority: 07)

	2023-25 Agency Request				2023-25 Executive Recommendation

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: The DOCR implemented AVATAR, the electronic medical records system that holds all resident medical information. It is imperative that we continue contracting support with the vendor for maintenance and support of the system to maintain our system of record.

Necessary resources for implementation (including FTE's)*: Additional funding is needed to continue maintenance and support of the electronic medical records system (EMR).

Are resources being redirected or are they new or additional (including FTE's)*: This is additional funding needed for the EMR maintenance and support. The EMR went live in the 2021-23 biennium. This will be a continuous expense.

Who is served and impact of not funding*: All staff and residents would be impacted by the funding decision.

DOCR medical and treatment staff rely on this support to ensure the EMR system is viable and accessible for patient safety.

NDIT data processing (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Is this a Large IT project? No

Is this request for a new program or service? No

530 Corrections and Rehabilitation

Agency 530

Request explanation and justification (include any statutory authority)*: Initial estimations added as adjustments for base budget request limits for data processing costs were low.

An initial base amount of 1,008 units for the technology fee were used , however, actual units are 1,120. A shortage of \$169,344. (\$63.00/unit)

An initial base amount of 600 laptops were used to estimate desktop support. However, actual units are 890 machines varying in model. A shortage of \$567,864.

An initial base amount of 1,071 units of Office 365 premium was used. However, actual units are 1,120. A shortage of \$50,862. (\$43.25/unit)

Necessary resources for implementation (including FTE's)*: DOCR needs additional funding for the shortage of data processing funding added into our base budget request limit.

Are resources being redirected or are they new or additional (including FTE's)*: Increased costs in data processing that were added to our base budget request limit were calculated lower than actual amounts. This is for additional funding.

Who is served and impact of not funding*: The staff, residents and citizens are impacted if funding is not approved.

Data processing is critical to all functions within the DOCR. This request supports all data transmission across the entire DOCR (juvenile, facilities and juvenile). This is a fee we receive from ND IT and is a non-negotiable need within our budget.

Rough Rider Industries supply increase (Priority: 09)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	4,083,681	-	4,083,681	0.00	-	4,083,681	4,083,681	0.00

State Initiative*: Economic Development/Diversification

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Rough Rider Industries has experienced increased supply expenses due to price increases and volumes needed.

Current supply costs are trending at just under \$500,000 per month or estimating \$3.8 million additional funding for the 2023-25 biennium.

530 Corrections and Rehabilitation

Agency 530

RRI also needs to budget for Solid Comfort headboards. (Average \$20/unit X 50 per day = \$1,000/day X 250 days = \$250,000 additional funds needed for the 2023-35 biennium.

Necessary resources for implementation (including FTE's)*: Additional special fund spending authority is needed for Rough Rider Industries to purchase supplies. RRI uses non-appropriated funding.

Are resources being redirected or are they new or additional (including FTE's)*: Additional special fund appropriation is needed.

Who is served and impact of not funding*: Resident workers are being impacted by lack of funding. RRI business and all businesses that purchase from RRI are impacted.

Our vision is too provide quality employment opportunities for incarcerated individuals to successfully reintegrate into society.

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The DOCR has five full-time temporary staff that we need to retain by moving them into authorized FTE positions to attain the same benefits as the staff they work beside daily.

Necessary resources for implementation (including FTE's)*: DOCR is requesting 5 FTE to move 5 temporary staff into. Office space and other supplies are included in the base budget for these temporary staff so there would not be an increase in operational costs.

Are resources being redirected or are they new or additional (including FTE's)*: Temporary salaries in the base budget would be redirected to the authorized salary line for the request for these 5 FTE's.

Who is served and impact of not funding*: The DOCR staff and residents are impacted if we lose these valuable staff.

530 Corrections and Rehabilitation

Agency 530

2023-25 Proposed Teachers Composite Schedule (Priority: 11)

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Human Resource Management Services prepared The Teacher Salary Study Report. This study was conducted at the request of the Superintendent of Public Instruction (DPI) and the Director of the Division of Juvenile Services, Department of Corrections & Rehabilitation, to make a comparison of public-school teacher salaries and benefits with teacher salaries and benefits at North Dakota School for the Deaf (NDSB), North Dakota School for the Blind (NDSB), and the Youth Correctional Center (YCC). The resulting product is a Composite Salary Schedule recommendation for the 2023-25 biennial budget.

Necessary resources for implementation (including FTE's)*: Additional salaries for DOCR instructor's is needed if the study prepared by HRMS is adopted.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding is needed for instructor salaries based on the Teacher Salary Study Report.

Who is served and impact of not funding*: The residents are served educational services. It is important to retain competitive salaries for instructors that are instrumental in reintegrating educated residents back into society.

530 Corrections and Rehabilitation

Agency 530

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Foster Care/Group Homes are getting to the point of not accepting about 10 of the Foster Care/Group Home kids because they are not equipped to handle them. They are moderate risk. They don't belong at the Youth Correctional Center with high-risk kids.

The 10 kids that do not belong at YCC and that Foster Care/Group Homes cannot handle would be placed in contracted housing and provided treatment. Most of these kids are in the Fargo area and we believe this would be a good place to have contracted housing for an average of 30-90 days.

Necessary resources for implementation (including FTE's)*: DOCR is requesting funding for juvenile contracted housing/treatment costs.

Are resources being redirected or are they new or additional (including FTE's)*: DOCR needs additional funding for an average of 10 kids at an estimated rate of \$230/day.

Who is served and impact of not funding*: If we don't get this funding, then we would be forced to use detention centers.

Transitional facility contract increases (Priority: 15)

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Under previous staffing levels, the average caseload is 74 offenders. Our target caseload is 40 offenders. By adding an additional 36 FTE's, this should reduce our caseloads to around 46, which gets us very close to our target caseload. It would take us a full biennium to hire and train new staff so the actual caseload impact wouldn't start coming to fruition until 2025-2026.

Parole and Probation has historically had unacceptably high caseloads which contributes to staff not being able to spend the time necessary to teach, coach and mentor the clientele that are on supervision while holding them accountable. Caseload counts have continued to climb until the onset of the COVID pandemic in early 2020. Since COVID, the caseload counts have seen a reduction of about 800 individuals on supervision. Without that reduction it would be necessary to ask for an additional 20 FTE's. The last few years have brought on some more severe and acute problems. The clientele we are working with and responsible for supervising are presenting with more severe drug and alcohol problems and mental illness. Further exacerbating the issues are the availability of fentanyl, which is deadly to clients and can be for staff. Additionally, the number of high capacity-high power guns that our staff are encountering when conducting searches is continuously growing. Lastly, our officers are vigorously fighting for the safety of our communities in a time where people have felt emboldened to not follow the law or respect

530 Corrections and Rehabilitation

Agency 530

law enforcement. If we want safer communities and to improve outcomes for people on supervision, we must invest in community supervision. Building and staffing more prison beds is very costly and never addresses the roots of the problems.

Necessary resources for implementation (including FTE's)*: Additional funding for 36 FTE's plus the operating expenses associated with these additional FTE's would be needed.

Are resources being redirected or are they new or additional (including FTE's)*: This requires additional funding for 36 FTE salaries and operational expenses.

Who is served and impact of not funding*: The clients and their families and friends are impacted if funding is not approved. Additionally, the business and economic development community is better served if they can use safety as a marketing tool to promote economic growth. Lastly, those people visiting from another state benefit as well as many are coming from states where community safety is continuously eroding.

Expand Pretrial Services Statewide (Priority: 19)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	3,272,982	-	3,272,982	21.00	1,087,074	-	1,087,074	7.00
Special	-	-	-	0.00	-	-	-	0.00
Total	3,272,982	-	3,272,982	21.00	1,087,074	-	1,087,074	7.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: In 2019 the state legislature launched the funding of the Pretrial Services Pilot program. In 2021, the legislature decided to enhance the funding of pretrial services to expand to another judicial district as well as attempt to operate fulltime pretrial services in one judicial district. The judicial system and state leaders have seen how this program can help balance the scales of justice, get defendants back to home and work after being arrested, link defendants to services and programs earlier in the judicial process and hold people accountable. The opportunities provided to defendants in the pretrial process along with the information gathered about them enhances the information the court has at sentencing which yields more informed sentencing decision-making which in turn should result in better use of state resources.

The DOCR is requesting 4 additional Pretrial sites.

Necessary resources for implementation (including FTE's)*: 21 FTE's and the associated operating expenses

Are resources being redirected or are they new or additional (including FTE's)*: This additional funding request is for 21 additional FTE's and operating expenses.

530 Corrections and Rehabilitation

Agency 530

Who is served and impact of not funding*: People who have not been convicted of a crime but are in jail and cannot post a bond are best served by pretrial services as it provides another release valve for the courts. This can reduce jail populations which in turn can reduce jail operational costs. The court is also served by pretrial because pretrial can help the court make more informed bond decisions based on an actuarial risk assessment. Additionally, the court is served by having more information about the defendant if and when it comes time for sentencing.

If this is not funded it will impact those who typically cannot afford to post a bond, which is typically overrepresented by people who live in poverty and minorities. Additionally, North Dakota currently has pretrial services in four judicial districts which means there are four judicial districts that do not have pretrial. In an effort to enhance public safety and promote best of use resources along with providing equal protection to the people, a full service pretrial services system is necessary.

AVATAR contracted support with NDIT (Priority: 20)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative:* Workforce

530 Corrections and Rehabilitation

Agency 530

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Effective case planning requires meaningful one-on-one interactions that motivate and engage the resident based on their immediate needs, strengths, and goals. Case managers will require additional training, coaching, and oversight as they implement new protocols and work with clients/residents. There are existing models of case planning that can help guide practice and support positive outcomes. The department will need to train and hire additional staff in the facilities to ensure caseloads allow for appropriate and quality interactions. Recommended caseloads should average 40 residents per case manager – with some degree of variability based on level of need.

Necessary resources for implementation (including FTE's)*: An additional 10 new case manager FTE's to include operating costs is being requested.

Are resources being redirected or are they new or additional (including FTE's)*: Additional FTE's and operating expenses.

Who is served and impact of not funding*: Residents and staff are impacted with the lack of additional funding. Higher caseloads are not as effective.

Expand Community Behavioral Health Statewide (Priority: 23)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,000,000	-	1,000,000	0.00	1,000,000	-	1,000,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,000,000	-	1,000,000	0.00	1,000,000	-	1,000,000	0.00

State Initiative*: Behavior Health and Addiction

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: DOCR was appropriated \$940,800 for community telehealth services during the 2021-23 biennium.

This request is to expand community telehealth services to \$2 million total for the 2023-25 biennium.

Offenders in rural and underserved areas of the state would benefit from this. As well, clients on correctional supervision are often met with barriers to being admitted to community services for a variety of reasons. This would allow the DOCR to remove barriers by creating resources that clients could access timely and without "red tape".

Necessary resources for implementation (including FTE's)*: An additional \$1 million is needed to expand community telehealth statewide.

530 Corrections and Rehabilitation

Agency 530

Are resources being redirected or are they new or additional (including FTE's)*: This additional funding is for the expansion of community telehealth statewide.

Who is served and impact of not funding*: Offenders under the supervision of Parole & Probation will be impacted. Should those offenders not receive behavioral health services that are evidence-based to address criminogenic thinking pattern which reduces recidivism; they are at increased chances of continuing to victimize communities, suffer addiction and mental health problems (including overdose and death), and incarceration. When services are not available in the community immediately, the criminal justice system relies on incarceration, which is quite costly, to meet the behavioral health needs. Many of our people need it NOW and delays can result in additional crimes, victims and injuries and death

Educational Programming / Career Readiness (Priority: 24)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	306,300	-	306,300	0.00	306,300	-	306,300	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	306,300	-	306,300	0.00	306,300	-	306,300	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The purpose of educational programming and career readiness is to help ensure adults in custody become employable upon discharge from our custody. The DOCR provides this programming through team members who are instructors and through partnerships with higher education, other governmental agencies, and nonprofits. Examples of DOCR's planned career readiness opportunities include commercial driver's license programming, computer programming, and manufacturing and design apprenticeships. To prepare adults in custody for career readiness and to complement career readiness offerings, the DOCR also offers a variety of educational programs to empower adults in custody to help them navigate their job and life challenges in healthy ways by changing their perspectives and enhancing their tools and skills. Statutory authority can be found in NDCC Section 54-23.3-01.

Necessary resources for implementation (including FTE's)*: The DOCR will need this funding to pay compensation for curriculum fees and instructor fees to higher education and non-profit partners, depending on the structure of partnerships. The DOCR can leverage existing FTE's for some of the program delivery; however, there will be some limitations based on current staffing levels. The DOCR likely will need to engage temporary employees or volunteers to assist with the less specialized aspects of program delivery. There may be technology solutions that would allow some of the content delivery to be more efficient.

Are resources being redirected or are they new or additional (including FTE's)*: Resources are needed to deliver educational programming and career readiness. FTE's can be used for some of the programs, though the DOCR would need to recruit volunteers and temporary employees to allow FTE's to be redirected from their current tasks. Technology may also be redirected or purchased to assist.

Who is served and impact of not funding*: The educational and career readiness programming will help them transition to the community more effectively. Education and career readiness have also been shown in research to have the long-term benefit of reducing rates of recidivism, which benefits tax payers. Employers benefit

530 Corrections and Rehabilitation

Agency 530

from adults in custody entering the workforce more prepared to fill needed shortages. Citizens benefit from having healthy and productive neighbors, a stronger work force, and safer communities.

Team member/resident training and wellness (Priority: 25)

	2023-25 Agency Request				2023-25 Executive Recommendation

530 Corrections and Rehabilitation

Agency 530

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: HRCC needs 21 residential treatment agent positions. We are currently budgeted for 19 positions. Having a 21 person staff rotation allows for flexibility in scheduling where and when the need exists and not having to jeopardize programming when a staff member is absent for training, vacation, or sick leave.

The staff are responsible in ensuring physical, emotional, and psychological safety of all residents. The staff facilitate groups that are necessary for the women to complete as part of their treatment programming.

The front line staff (RTA's) are the most essential part to ensuring that we provide a gender responsive, trauma informed center for women to begin their healing and journey towards a healthier version of themselves. They provide active supervision; meaning they interact with women, engage them, and serve as role models. Staff utilize the Mandt system which is built on a philosophy of building healthy relationships between residents and staff members.

Necessary resources for implementation (including FTE's)*: 2 new FTE to right-size staffing needs at HRCC and includes operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for 2 additional FTE and operating expenses.

Who is served and impact of not funding*: Lack of funding impacts women in our custody from getting services and staff wellness.

Business Analyst - FTE Request (Priority: 27)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Business Analysis Unit is understaffed and is consistently challenged with meeting the needs of the department. The DOCR is a large agency that provides services for individuals in custody and on supervision in the community, for both adults and juveniles. Business Analysts work with leadership, managers and front-line staff within the DOCR to improve and streamline processes that help the DOCR meet its objectives

530 Corrections and Rehabilitation

Agency 530

and reach its goals. They help initiate greater employee productivity and they ultimately support business information systems that provide solutions to a variety of business issues across multiple departments and external stakeholders.

Data helps drive effective decisions, as result, there are varying needs for data analysis, requirement gathering, reporting writing, data governance and quality assurance. Good data governance ensures data is used properly, complies with all regulatory requirements and is secure and adheres to policy.

These positions are critical in providing the needed capacity to ensure that the DOCR can continue to function as well as continue to improve how it functions and the services that it provides to the residents and the broader community.

Necessary resources for implementation (including FTE's)*: 2 new FTE and operating expenses

Are resources being redirected or are they new or additional (including FTE's)*: This request is for 2 additional FTE's and operating expenses.

Who is served and impact of not funding*: The entire DOCR staff, to include institutions, field and Central Office will be served if this is approved.

The department would be limited in use of data and ability then to make accurate, timely and effective data driven decisions.

NDIT Contracted Services Elite/DOCSTARS (Priority: 29)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	288,000	-	288,000	0.00	288,000	-	288,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	288,000	-	288,000	0.00	288,000	-	288,000	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: DOCR currently has staff that manage and support our facility offender management system (Elite) and our community offender management system (DOCSTARS). This is to add 1 FTE to NDIT to support these software applications and free up DOCR staff time.

Necessary resources for implementation (including FTE's)*: Additional funding to move an FTE to NDIT due to unification.

1 FTE is equal to \$12,000/month.

Are resources being redirected or are they new or additional (including FTE's)*: This is to right-size our IT services due to IT Unification.

530 Corrections and Rehabilitation

Agency 530

Who is served and impact of not funding*: NDIT staff and all DOCR staff are impacted if this is not funded.

By not moving forward with this position, the DOCR will be without the needed expertise and capacity to maintain and develop DOCSTARS and ELITE. These applications are critical to the work we do for Parole and Probation and institutions. DOCSTARS serves as our community offender management system and Elite is our resident management system. Leaving both these system of records unsupported would negatively impact the work we do.

New Cameras (Priority: 32)

State Initiative*: State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: 30 new additional cameras within our facilities. These are new cameras in new locations, which will require hardware infrastructure (fiber, camera, etc)

Necessary resources for implementation (including FTE's)*: Additional funding needed to install 30 new cameras in new locations.

Are resources being redirected or are they new or additional (including FTE's)*: These are for additional cameras.

Who is served and impact of not funding*: Resident and staff safety is impacted if this is not funded.

These cameras would solve blind spot problems and security/safety concerns by allowing the control room operators visibility and the ability to react to security situations.

HRCC Behavioral Health - FTE Request (Priority: 37)

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The current census is 33 residents with it increasing to 56 in October. Even with the current number (33) there is not enough time to provide all the services needed for the residents. Our current HRC created a priority rating in order to determine who should have priority with individual therapy. Every one of our residents have mental health needs. The HRC creates an assessment at admission to HRCC and the average ACE score is 6.5. (a 10 being the highest ACE score). An ACE score is a tally of different types of abuse, neglect, and other adverse childhood experiences from ages 0-18. A higher score indicates a higher risk for health problems later in life. Research indicates a score over 4 reduces an individual’s life span by approximately 20 years. Most of residents we serve at HRCC have a high level of trauma history and addictions. There are many items that need to be addressed to assist them with being successful and staying sober when they return to the community. Individual therapy is necessary to address issues and concerns for the women. At this time the absolute max caseload of our HRC is 15 based on resident’s trauma histories other job duties. The vocational/employment component is new to DOCR and HRCC. This is taking several hours a week to coordinate the services for the ladies which reduces the time available for other things. Both are needed to improve the resident’s mental health and success in the community.

Necessary resources for implementation (including FTE’s)*: 1 FTE and operating expenses

Are resources being redirected or are they new or additional (including FTE’s)*: An additional FTE and the operating expenses are needed.

Who is served and impact of not funding*: The second HRC position will assist with the following items: Completing Mental Health Care Levels (MHCL), Mental Health Screening, Individual Therapy, assessing and handling crisis and unexpected mental health situations and needs, and vocational/employment services. There are other mental health services that would be beneficial for the residents however right now we do not have the time to bring them to HRCC. A second HRC would be able to assist with expanding the services we provide as there are many other things we could bring in to assist the women.

Correctional Officers - Relief Staff (Priority: 48)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	933,856	-	933,856	6.00	-	-	-	0.00

530 Corrections and Rehabilitation

Agency 530

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: These staff would provide direct supervision in areas at NDSP where we have the highest concentration of disciplinary issues. Officers will provide needed dynamic security practices in these units.

Necessary resources for implementation (including FTE's)*: DOCR is requesting 6 FTE's and appropriate operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: Additional resources are needed for 6 FTE and the operating expenses.

Who is served and impact of not funding*: Residents and staff are impacted if this is not funded.

This results in staff burnout and less dynamic security.

Field Training/Contact Officers (Priority: 49)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Total	933,856	-	933,856	6.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: These positions would assist with the increased demand for transporting residents into the community for various purposes – medical runs, off-property jobs at other facilities, and work release with community employers. Any further expansion of the work release program will require additional positions to transport these individuals to their jobs and to conduct accountability checks. Other duties would include training new correctional officers to have a more consistent training approach and help conduct quality assurance on duty performance of existing correctional officers.

Necessary resources for implementation (including FTE's)*: 6 FTE and associated operating expenses

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding needed for 6 FTE's and operating expenses

530 Corrections and Rehabilitation

Agency 530

Who is served and impact of not funding*: Staff and resident are impacted if this is not funded. Further expansion of the work release program will require additional positions to transport these individuals to their jobs and to conduct accountability checks. In turn, this will impact our vision of helping residents become healthy and productive neighbors for a safe North Dakota.

DOCSTARS Enhancements (Priority: 51)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	307,000	307,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	307,000	307,000	0.00
Total	-	307,000	307,000	0.00	-	307,000	307,000	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: DOCSTARS is the DOCR's community offender management system and used extensively in our Parole and Probation staff to manage individuals on supervision in the community. These enhancements are critical to the workflow involved in managing our individuals in the community as well as a critical reporting source for program efficiency and success.

Necessary resources for implementation (including FTE's)*: Request for funding is for DOCSTARS applications fixes and enhancements.

Are resources being redirected or are they new or additional (including FTE's)*: New additional funding needed for enhancements to DOCSTARS.

Who is served and impact of not funding*: Parole and Probation staff, DOCR contractors and FTR staff utilize DOCSTARS.

Updates are critical to ensure accurate and timely documentation of case management. Workflow will be negatively impacted as alternate solutions will have to be found which often results in more man power.

Family Services Coordinator (Priority: 52)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	176,540	-	176,540	1.00	-	-	-	0.00

	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	176,540	-	176,540	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Consistent with many DOC’s across the nation, family-related resources are primarily dedicated to visitation and communication. This position would move North Dakota into the company of states at the forefront of efforts to help children and strengthen relationships with incarcerated parents through dedicated family services.

In service to the state, among related responsibilities, the DOCR Family Services Coordinator would:

- Lead North Dakota’s Children of Incarcerated Parents Initiative
- Implement family engagement practices/events
- Facilitate training to DOCR facilities and personnel on family engagement
- Manage the Parenting Inside Out Program
- Establish community web-based training to families and stakeholders on DOCR programs, events, and initiatives
- Coordinate with the Parole and Probation Field Services Division on implementation of a family support approach to community supervision
- Serve as liaison with child welfare agencies and develop platforms to increase parental involvement for the incarcerated parent
- Support research to evaluate program fidelity, impact, and outcomes

Necessary resources for implementation (including FTE’s)*: 1 FTE and related operating expenses

Are resources being redirected or are they new or additional (including FTE’s)*: The requires funding for a new FTE and applicable operating expenses.

Who is served and impact of not funding*: While the Children of Incarcerated Parents Initiative (COIPI) has championed many positive changes (e.g., established support groups for impacted youth with the Bismarck YMCA, created training on Adverse Childhood Experiences, led to two free phone calls or video-visitations for incarcerated parents, revised visitation rooms to be more family-friendly, and implemented the Parenting Inside Out program), the COIPI committee members would like to see the initiative strengthened by hiring a dedicated Family Services Coordinator.

530 Corrections and Rehabilitation

Agency 530

Absent a Family Services Coordinator, the DOCR is not adequately equipped with the resources needed to identify or provide referrals for interventions based on parent, guardian, family, or child need.

Strategic Plan - ReEntry (Priority: 53)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	105,000	266,000	371,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	105,000	266,000	371,000	0.00	-	-	-	0.00

State Initiative:* Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: One of the primary objectives of the DOCR's strategic plan is to provide coordinated, individualized, and data-driven rehabilitative services that prevent reoffending. Supporting and engaging adults in custody while they transition to the community is a key piece of rehabilitation. The purpose of this request is to improve reentry services to reduce barriers, including barriers to housing, transportation, employment and supportive connections, for those who have been incarcerated and are releasing to the community.

Necessary resources for implementation (including FTE's)*: This request is for supportive and innovative housing options for adults in custody who are releasing who have serious mental illness and other vulnerabilities, transportation assistance, improvements to visitation spaces to enhance connectives with family and friends, and tangible reinforcers for being actively engaged in employment in the community.

Are resources being redirected or are they new or additional (including FTE's)*: This is additional funding for operating expenses; no new FTE's are needed in connection with this request.

Who is served and impact of not funding*: This funding will reduce the likelihood of homelessness and future reoffending for adults in custody upon their release from incarceration. Citizens are served as increasing incentives for employment improves the likelihood of long-term behavior changes and reduces criminal behavior and recidivism. This keeps formerly incarcerated individuals in the workforce; in turn, the community has more productive members employed to pay taxes and lower costs of supportive services. Better visitation will engage incarcerated individuals with their family and networks, so more of their support can also come from these sources, which will also leads to reduced reoffending.

530 Corrections and Rehabilitation

Agency 530

Elite Modification - Batch Create Multiple Checks (Priority: 54)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	26,730	26,730	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	26,730	26,730	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: By creating a check batch, data entry is in one batch screen versus multiple screens. By having a check batch option, it would drastically cut the time it takes to enter the information into Elite and eliminate the errors of writing checks out of the wrong resident's account. The quicker and more accurate this process, the more time can be spent on other residents issues and not having the employer pay overtime and/or comp time to complete the other tasks.

Necessary resources for implementation (including FTE's)*: One-time funding for Syscon to implement.

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding needed for a one-time fix.

Who is served and impact of not funding*: Employer, staff, and residents would both be served and impacted if not funded. If not funded, we continue to remain inefficient.

Elite Modification - Combine Collectible/Receivable Accts (Priority: 55)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	-	21,186	21,186	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

530 Corrections and Rehabilitation

Agency 530

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Currently, 24 reports have to be individually ran and manually calculated determine the amount to be disbursed for month end processes. By combining the collectible and receivable accounts into one report, the month-end process would be quicker, easier, and less likely to have errors than with manual calculations. The less time spent on this process, the more time can be allocated to taking care of other resident issues and not having the employer pay overtime and/or comp time.

Necessary resources for implementation (including FTE's)*: One-time additional funding is being requested for the vendor to update our offender management system.

Are resources being redirected or are they new or additional (including FTE's)*: One-time funding for software update is required.

Who is served and impact of not funding*: Employer, staff, and residents would be served and impacted if not funded.

If not funded, we continue with inefficient, time-consuming processes.

Elite Modification - Addition to Post Reports Function (Priority: 56)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	20,196	20,196	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	20,196	20,196	0.00	-	-	-	0.00

State Initiative*: Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Generally a post report is generated after completing daily postings. However, whenever there is a technical glitch or power outage, we lose that report and cannot rerun it. We use this report as a supporting document with our daily postings file that gets put into our electronic file database and viewed by auditors or is used for research.

We need the ability to run this report at any time.

Necessary resources for implementation (including FTE's)*: This request is for a one-time software fix by our current vendor for our offender management system.

Are resources being redirected or are they new or additional (including FTE's)*: This is a one-time software fix needed.

Who is served and impact of not funding*: Employer, staff, and auditors would be served and impacted if not funded.

530 Corrections and Rehabilitation

Agency 530

If this is not funded, we continue to be inefficient and lose time processing.

Systems Mechanic (Priority: 57)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	169,890	-	169,890	1.00	180,171	-	180,171	1.00
Special	-	-	-	0.00	-	-	-	0.00
Total	169,890	-	169,890	1.00	180,171	-	180,171	1.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This is a request for a Systems Mechanic II Position at NDSP.

With our current workload due to aging facilities and the severe shortage of security staff we are need of an additional Systems Mechanic.

Due to ongoing projects, we often have plant staff escorting contractors anywhere from 24-32 hours per week. NDSP currently has 4 systems mechanics and is often without half of its HVAC workforce for this reason. This makes it difficult to maintain the facility and complete repairs & preventative maintenance requests in a timely manner.

Necessary resources for implementation (including FTE's)*: New FTE requested and operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for an additional FTE in Plant Services and the corresponding operating expenditures.

Who is served and impact of not funding*: The lack of funding will make it difficult to maintain the facility and complete repairs and preventative maintenance requests in a timely manner.

NDIT Contracted - Business Analyst Application Manager (Priority: 64)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	144,000	-	144,000	0.00	144,000	-	144,000	0.00

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Special	-	-	-	0.00	-	-	-	0.00
Total	144,000	-	144,000	0.00	144,000	-	144,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Business analyst managers serve as a liaison between IT and business teams providing monitoring of project progress, resolving operational issues, recommending actions, and providing updates on current operational tasks. This role works closely with agencies and are the bridge between the technology and reporting teams serving as a subject matter expert of the divisions within Department of Corrections. They additionally provide business analysis and understands the complex environment across run, grow, and transform for one or more divisions of a large agency.

This role is currently not filled within DOCR; however, DOCR is one of the largest agencies within the State. Having the knowledge of the systems that each division DOCR utilizes, the uniqueness of integration those systems between divisions as well as the integration of those systems with other state agencies as well as federal, county and city systems, along with the volume of support incidents, system defects and future system enhancements identified that are needed to support staff in a 24/7 facility is critical to its continued performance.

Necessary resources for implementation (including FTE's)*: This is a request for operating funding for contracted services through NDIT.

Are resources being redirected or are they new or additional (including FTE's)*: The request is for additional funding for contracted services through NDIT.

Business analyst managers serve as a liaison between IT and business teams providing monitoring of project progress, resolving operational issues, recommending actions, and providing updates on current operational tasks.

Who is served and impact of not funding*: ND IT and DOCR is served with this request.

DOCR would not be able to optimally resolve operational issues. This could create issues with security and adhering timely to federal and state law.

Business Analyst Build to Capacity (Priority: 65)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00

Special	-	-	-	0.00	-	-	-	0.00
Total	214,068	-	214,068	1.00	-	-	-	0.00

530 Corrections and Rehabilitation

Agency 530

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The DOCR is a large agency that covers a wide variety of needs for residents and individuals on supervision, to include both adults and juveniles. Our department values data driven decision that are outcome based, as a result this requires a need for additional staff to help keep up with the growing needs. Gathering data for such a large agency, that has multiple roles, databases and application can have its challenges. This position would provide additional support to the BA Team in its multiple responsibilities and help ensure data is available to assist with making critical decisions.

Necessary resources for implementation (including FTE's)*: 1 new FTE (salary and operating)

Are resources being redirected or are they new or additional (including FTE's)*: Additional funding for an FTE and operating expenses

Who is served and impact of not funding*: The entire DOCR team is served by this request.

The department will remain limited on it's ability to rely on available staff to assist with report writing, gathering data requirements and data management. This in turn will result in less effective projects moving forward and lessen the ability to use data to make data driven decisions.

Business Analyst - Data Governance/Management (Priority: 66)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	228,458	-	228,458	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	228,458	-	228,458	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This individual will collaborate with business partners and process owners. It will be their responsibility to evaluate, identify, define and create data governance lineage. Additionally, they will handle profiling, writing rules, and reporting to Business Partners. This position will provide oversight on data governance and quality assurance and implement an enterprise data warehouse for the DOCR.

Necessary resources for implementation (including FTE's)*: 1 FTE and operating expenses

530 Corrections and Rehabilitation

Agency 530

Are resources being redirected or are they new or additional (including FTE's)*: 1 new FTE and operating expenses

Who is served and impact of not funding*: The entire DOCR team will be served with this request.

With no designated staff to provide overall data governance, there will be a likely hood of databases conflicting in outputs.

Mental Health Coordinator (Priority: 67)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	177,030	-	177,030	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	177,030	-	177,030	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The ND DOCR is responsible for the management of many incarcerated individuals that suffer from mental illness, chemical addiction, and other age-related progressive diseases. In order to better serve this population a Mental Health Reentry and Integration committee was formed to help coordinate the reentry. Currently and in the past the duties associated with the coordination fell as additional work for a facility staff member in addition to their normal job duties which has resulted with employee turnover and job fatigue.

The new Mental Health Coordinator/Manager would improve services to individuals by:

- Coordinate and facility Mental Health R&I team meetings to include working with facility POC's to gather information needed for release planning.
- Direct the development and maintenance of Mental Health R&I standards and operating procedures.
- Establish and maintain program admission criteria and screening processes.
- Establish and maintain a quality assurance process and report to directors on compliance.
- Assist the department in coordinating case plans and/or services for individuals transitioning back to the community who have been identified as high needs.
- Coordinate & facilitate the transition of elderly and high needs residents to community facilities or residences.
- Act as a liaison between the DOCR and NDSH for resident and parole placements for psychiatric evaluation or for diagnosis and disposition.

Necessary resources for implementation (including FTE's)*: We are in need of funding for hiring this FTE and the associated operating expenses.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for a new FTE and operating expenses.

Who is served and impact of not funding*: North Dakota incarcerated individuals who are receiving mental health care and other services to improve the quality of their life while in a DOCR correctional facility, individuals on parole or probation supervision that may have a significant need for services such as admission to the North Dakota State Hospital. The advantage of a robust mental health reentry program will provide a continuum of care for individuals as the release back into communities throughout North Dakota. Without the funding we are faced with place more work on existing staff which could potentially lead to future staff resignations, inefficient referrals/collaboration with community resources, increase law enforcement interactions with individuals suffering from mental illness, decrease in community safety, and reduced mental healthcare for individuals releasing to communities.

Talent Acquisition Manager (Priority: 68)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	228,774	-	228,774	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	228,774	-	228,774	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: ND public safety relies upon recruiting and retaining critical staff in key DOCR roles. Turnover for front line security positions, such as correctional officer, nursing, behavioral health, and other key roles have steadily increased in recent years, which means more recruiting and onboarding of new team members. In order to meet the increased level of service demand for hiring, an additional team member is needed. DOCR Human Resources has attempted to meet this increased need with the addition of a part-time temporary position, but the demand has far exceeded what the current team members can provide. In addition to the increased volume, the job market continues to change at a rapid pace and a position solely responsible for tracking, responding, and anticipating job market trends is needed.

- Develop strategies and plans for agency wide talent acquisition, while also focusing on specific talent needs of various divisions.
- Lead the agency efforts in connecting with and building relationships with ND colleges, universities, and high schools to increase internships, transform our visibility and presence at schools and with students entering the job market.
- Tap into veteran labor pool by creating programs to reach out to veterans returning from deployment and veterans looking for rewarding careers.
- Lead the development of processes and champion solutions to increase hiring of criminal justice involved individuals at the DOCR.

530 Corrections and Rehabilitation

Agency 530

- Coordinate with DOCR Communications Director to promote the DOCR brand, mission, and vision and create effective, low cost awareness campaigns to increase applicants.
- Assist DOCR managers with developing career advancement plans for team members. Take the lead in developing current DOCR team members to be future leaders.
- Provide recruitment services for special or high level DOCR jobs.
- Assist other agency recruiters, as needed.

Necessary resources for implementation (including FTE's)*: New FTE and operating expenses

Are resources being redirected or are they new or additional (including FTE's)*: This is for an additional FTE and associated operating expenses

Who is served and impact of not funding*: Position will directly serve all 1,000 classified and temporary DOCR team members, including supervisors and managers. This position will not only provide relief to current HR recruiters by assisting with recruiting and onboarding, but also help to position DOCR Human Resources for all future job markets through effective policy, strategy, and processes. This position ensures that applicant experience remains an important aspect of all recruitment activities and protect against antiquated or old processes or practices that may negatively impact recruitment. This position also enables professional HR team members time to focus on other important areas of responsibility, rather than spending most or all of their time and resources just hiring new team members.

Engagement & Culture Manager (Priority: 69)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	228,774	-	228,774	1.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	228,774	-	228,774	1.00	-	-	-	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: This is a fairly new role in corrections nationally, with several state DOC's creating positions responsible for improving team member engagement and workplace culture. In addition, at least one other ND state agency recently created a similar role. This position will have a major role in transforming team member engagement and workplace culture to reduce high turnover rates and improve the overall employment experience and team member wellbeing. This position will focus primarily on:

530 Corrections and Rehabilitation

Agency 530

- Team Member Engagement; assist DOCR leaders in using annual engagement survey results, gathering additional team member input, creating action plans, and following through on action plans to increase team member engagement and reduce turnover.
- Team Member Belonging and Wellbeing; assist the Director of Diversity and Cultural Competence in creating and sustaining culturally competent programs for DOCR team members related to diversity, equity, and inclusion for the DOCR workforce. Also work with leaders on following through on any other team member wellbeing or culture improvements in DOCR workplaces.
- Performance Management Coordinator; lead agency efforts to improve performance management, which includes annual goal and expectation setting for all team members, constant coaching and feedback throughout the year, and completing effective and meaningful performance reviews.
- Professional Development and Program Assessment; work closely with DOCR Professional Development group to ensure training and development modules are available for all areas of responsibility, which includes creating content and success measures.

Necessary resources for implementation (including FTE's)*: New FTE and operating expenses

Are resources being redirected or are they new or additional (including FTE's)*: This request is for an additional FTE and the corresponding operating expenses.

Who is served and impact of not funding*: Position will directly serve all 1,000 classified and temporary DOCR team members, which indirectly impacts all 8,000+ residents, juveniles, and clients in the DOCR's custody or on supervision. In addition, due to high turnover in critical public safety positions the overall experience of team members in critical security roles has decreased significantly in recent years, which impacts public safety. In 2016, the average years of experience for a Correctional Officer at DOCR was 11.5 years; in 2022 it has decreased to 4.8 years. For correctional staff working with juveniles at the Youth Correctional Center, average years of experience in 2016 was 13.9 years; in 2022 it decreased to 3.3 years. Turnover is having a detrimental impact on DOCR operations and potentially our ability to efficiently and effectively ensure public safety. The DOCR must leverage the power of the engagement survey and improve the overall work experience for all team members to increase retention of critical public safety staff and slow the high rates or turnover. Average turnover for critical corrections staff has been as high as 40%. Without this position, team member engagement, wellbeing, and the employee experience would remain important priorities, but the DOCR would be without the expertise and resources to understand and act on how to really make a difference.

Large IT Project Summary

Priority	Form Name	2023-25 Agency Request					2023-25 Executive Recommendation				
		General Fund	Federal Funds	Special Funds	Total	FTE	General Fund	Federal Funds	Special Funds	Total	FTE

Total	-	757,000	757,000	0.00	-	757,000	757,000	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: DOCR is in desperate need of updating our offender management system.

NDIT estimated 6-8 months to complete this review and a cost of \$757,000 for the consultant.

This planning will provide the base for building a new Offender Management System from entry to exit for all resident and community supervision documents as well as overall case management. There are currently multiple systems and divisions that utilize different workflows. Understanding the needs of each area will require a complex business analysis of processes and identification of opportunities so an effective solution can be identified.

Necessary resources for implementation (including FTE's)*: The consultant cost is a one-time funding to review all DOCR systems.

Are resources being redirected or are they new or additional (including FTE's)*: This is for additional one-time funding for a consultant.

Who is served and impact of not funding*: The Offender Management System would be used by all DOCR staff, to include institutions, field and Central Office.

If this is not funded, we will need to update our current system, Elite, which has limited functionality to meet all our needs. Data is hard to pull from it and does not provide a comprehensive case management system.

Start Date (MM/DD/YYYY): 08/01/2023

End Date (MM/DD/YYYY): 06/30/2024

Replace existing application? Yes

Upgrade existing application? No

Development of new application? No

530 Corrections and Rehabilitation

Agency 530

Anticipated Benefits:* - Formulate future system requirements and specifications for the DOCR New Offender Management System.

-Create an RFI to better understand corrections software options available for consideration in the RFP process for a new offender management system.

-Identify any potential enhancements to current processes to improve workflows without a new offender management system

Project Risk:* - Funding for completion of the RFI and RFP

- Resource availability to complete this initiative

- Adoption rate of users to utilize new offender management and processes

Issue/Solution:* Current Offender Management System is dated and costly. Interfacing to it has become a challenge which makes it difficult when trying to pull data for reporting.

Elite Upgrade (Priority: 31)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	1,180,000	1,180,000	0.00	-	-	-	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	1,180,000	1,180,000	0.00	-	-	-	0.00

State Initiative:* Technology Investment

Is this a Large IT project? Yes

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Oracle back-end of Elite is at the end of its life and if we do not update we will be facing security concerns. Maintenance issues will also raise in complexity and need.

Necessary resources for implementation (including FTE's)*: We are in need of funding for upgrading our ELITE system if the Offender Management System Consultant (priority 26) is not approved.

Are resources being redirected or are they new or additional (including FTE's)*: Currently, Elite is our system of record. This upgrade would not be necessary if we are approved the Offender Management System Consultant. We would ask for a new offender management system in the 2025-2027 biennium.

Who is served and impact of not funding*: All DOCR staff and residents are impacted if this is not funded.

530 Corrections and Rehabilitation

Agency 530

The Oracle back-end of Elite is at the end of its life and if we do not update we will be facing security concerns. Maintenance issues will also raise in complexity and need.

Start Date (MM/DD/YYYY): 7/1/2023

End Date (MM/DD/YYYY): 6/30/2025

Replace existing application? No

Upgrade existing application? Yes

Development of new application? No

Anticipated Benefits:* -Improve performance and functionality with a new front end interface running on HTML5.

-Upgrade the Oracle Database to a supported version to improve functionality and continue to have access to a supported version.

Project Risk:* -Security concern because the current oracle database version will be end of life.

-Resource availability to complete the project

Issue/Solution:* Elite will reach an unsupported version of Oracle in the next 3would have a supported Oracle version.

Start Date (MM/DD/YYYY): 7/1/2023

End Date (MM/DD/YYYY): 06/30/2027

Description: Women within the ND Department of Corrections & Rehabilitation are currently housed in Mandan at the Heart River Correctional Center (HRCC) and in New England at the Dakota Women’s Correctional and Rehabilitation Center (DWCRC). The goal of the department is to move the women from New England to a new facility on the HRCC campus in Mandan so that women can be closer to a wider variety of community resources, and family support - and in a facility that is not only sized appropriately but is respectful to the women in the care of the department. DOCR is committed to keeping DWCRC relevant to their mission and will find appropriate use for the facility. It should also be noted that DOCR also has women on inmate status living in re-entry centers in Mandan, Bismarck, Fargo, and Devils Lake - all of which are important partners and are relationships that DOCR plans to maintain.

HRCC currently shares a campus and facilities with the Youth Correctional Center (YCC) and this poses freedom of movement concerns. Resident movement around the campus is very restricted and difficult to manage. It is important that these populations are separated, which is why the proposed new site is located NW of the existing campus.

The BWBR Correctional Facilities Study is available for review.

End Date (MM/DD/YYYY): 06/30/2025

Description: The current Maintenance Shop Building (Previously known as 16 East) is in a state of disrepair. The building was originally constructed in 1915 (106 years old) and currently needs approximately \$3.44 million dollars in repairs not including steam & condensate line repairs that supply the building with heat during the winter months (see attached Engineering report from Interstate Engineering dated 7/14/22). A metal building would provide 40+ years of service to the state as well as a proper area for staff to work and store maintenance related materials & equipment.

Attached is a Structural Assessment completed in June 2022.

Start Date (MM/DD/YYYY): 7/1/2023

End Date (MM/DD/YYYY): 6/30/2027

Description: Minimum custody men within the ND Department of Corrections & Rehabilitation are currently housed in Bismarck at the Missouri River Correctional Center (MRCC). There are also an additional 60 beds of minimum custody men located at James River Correctional Center (JRCC) in Jamestown. The MRCC site has challenges in that it is located in a flood plain and has flooded on several occasions. The site is also located 6 miles from the center of town, so access to the community and to services is more difficult. The MRCC campus opened in 1992. The existing buildings are not in good condition and they do not support the programmatic needs of the facility.

The BWBR Correctional Facilities Study is available for review.

NDSP Condensate Line (Priority: 33)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
Condensate Line at NDSP needs replacement	001	530-2450	53077	-	-	300,000	-	300,000	-	-
Total				-	-	\$300,000	-	\$300,000	-	-

State Initiative:* State Facility Investment

Explanation / Justification: The main condensate return line to the NDSP Heating Plant Building is failing. This condensate line is original from 1981 when the plant was constructed. The current line is beginning to leak in several spots and is heavily pitted/eroded. We are unable to patch or weld portions of this pipe due to the metal being too thin in spots to weld. The NDSP plant produces steam 365 days per year/24 hours per day as steam is utilized for heating, hot water, and cooking at the facility. If this line were to be compromised the facility would lose these services for upwards of a month while the existing line is being replaced causing an unprecedented facility disruption.

530 Corrections and Rehabilitation

Agency 530

NDSP Mechanical/HVAC Improvements (Priority: 39)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
NDSP Mechanical/HAVC Improvements	001	530-2450	53077	-	-	70,000	-	70,000	-	-
Total				-	-	\$70,000	-	\$70,000	-	-

State Initiative:* State Facility Investment

Explanation / Justification: Replacement pumps, condensate tanks, and various steam line repairs. The current Metasys Program controlling the HVAC functions at NDSP is in need of upgrade as well.

NDSP West Unit Plumbing Replacement/Remodel (Priority: 40)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
NDSP West Unit Plumbing Replacement/Remodel	001	530-2450	53077	-	-	1,750,000	-	1,750,000	-	-
Total				-	-	\$1,750,000	-	\$1,750,000	-	-

State Initiative:* State Facility Investment

Explanation / Justification: The current West Unit was constructed in 1960 and is the oldest housing unit located at the North Dakota State Penitentiary. This unit was originally constructed with cast iron plumbing and this plumbing is failing. The current plumbing in the unit also does not meet modern plumbing code so replacement is necessary.

Plant-General Maintenance/XO Repairs (Priority: 44)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
General maintenance and XO Repairs for unexpected breakdowns and other necessities on DOCR list.	001	530-2550	53077	-	-	750,000	-	750,000	-	4,000,000
Total				-	-	\$750,000	-	\$750,000	-	\$4,000,000

530 Corrections and Rehabilitation

State Initiative:* State Facility Investment

Explanation / Justification: DOCR has a long list of general maintenance and XO Repairs to all facilities. In addition, budgeting for almost 3 years in advance; breakdowns almost always happen.

This would provide a small amount of money for unanticipated breakdowns and other maintenance and repairs to DOCR facilities

YCC/HRCC Electrical Improvements (Priority: 60)

Description	Fund	BU-Dept	Fin Class	2023-25 Base Budget	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
					Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
YCC/HRCC Building Repairs	001	530-2150	53079	-	-	315,000	-	315,000	-	-
Total				-	-	\$315,000	-	\$315,000	-	-

State Initiative:* State Facility Investment

Explanation / Justification: Replace and upgrade main electrical service to Admin/School Building. Existing service is 1960 Federal Pacific equipment and parts are no longer available. As education peripherals continue to improve in technology the overall need for additional power and circuits increase to the building. Many existing panels are full and breakers contained within them are not able to be replaced. \$60,000 for School The Administration Building is currently without back-up emergency or stand-by power. The Administration Building serves as an emergency command center during times of emergency. More importantly all facility communication to include phone service, camera systems, and network connectivity is powered via the Administration Building. Back-up power would ensure that these services remain available to the facility in the event of power failure. The electrical main service to Centennial Hall is original to 1989 and in need of replacement. All food is prepared from this building for the entire facility and current electrical switchgear is obsolete. Motor control Centers for Pine Cottage & Gymnasium Buildings are becoming obsolete. New parts are no longer available for repairs to be made. These MCC's control all HVAC AHU in these respective buildings and replacement will ensure operation of these systems.

YCC/HRCC Building Repairs	001	530-2150	53079	-	-	180,000	-	180,000	-	-
Total				-	-	\$180,000	-	\$180,000	-	-

State Initiative:* State Facility Investment

Explanation / Justification: Several buildings to include the Gymnasium, Administration, Pine Cottage, and Garage are in are need of repairs. The Gymnasium EFIS joints have failed caulking and repairs are necessary to maintain the watertight integrity of the building. The food preparation area is in need of a new ceiling as large

530 Corrections and Rehabilitation

Agency 530

portions of the existing ceiling are deteriorated due to heat and cooking vapors/grease. The flooring in this area is also in need of replacement. New flooring would increase durability, be more ergonomic, safer for staff, and require far less maintenance than the existing flooring. The garage used to store equipment and personal items for facility residents is in need of a new roof & siding. The existing wooden siding is rotted to the point of allowing rodents & the environmental elements to enter the building. A new roof & siding would protect this building from any future environmental damage and extend the life and usefulness of the building. The existing EFIS on Pine Cottage needs to be painted & sealed to protect the watertight integrity of the building.

Equipment > \$5,000 Summary

	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
	Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time

Total					-	-	-	-	310,000	-	310,000	-	310,000

State Initiative:* Other

Justification: JRCC:

The existing industrial wash machines serving both the JRCC & NDSH are at the end of their useful life span. Both of these machines were originally built in 1984 and replacement parts are becoming difficult to find. The nearest available technicians to service these machines are in Syracuse, NY. Due to this we have had to utilize JRCC Maintenance Staff for repairs while paying for over the phone technical service. These machines are to the point of literally breaking down several times per month. Two new machines would alleviate the current maintenance issues and allow for better access to repair parts. The cost is for the machines, shipping, installation, and rigging costs.

MRCC:

The existing washing machines at this facility are both residential & commercial type which is nowhere near adequate. Premature machine failure is currently costing the DOCR/State a large amount of operating dollars as MRCC is washing approximately 500 pounds of laundry per day. \$30,000 for a 60 pound industrial wash machine, 75 pound industrial dryer, delivery/install, and required electrical & venting work.

NDSP Kitchen Equipment (Priority: 36)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Total					-	-	-	-	1,000,000	-	1,000,000	-	2,000,000

State Initiative:* Technology Investment

Justification: Complete a review to enhance current workflow opportunities with the Free Through Recovery system to improve care planning, referral process and system administration to improve outcomes for these individuals.

Data management is a key component to optimizing the use of data to make decisions and take actions. As the DOCR becomes more complex in how it produces, interacts and publishes data a data management plan will help the organization understand gaps and develop strategies to close them.

530 Corrections and Rehabilitation

Agency 530

Transitional Planning Services will enhance data-driven decisions to focus on the highest value rehabilitative and re-entry activities. TPS will accomplish this by upgrading the statewide victim management system, case management & motivation enhancements and the development of key performance indicators

Completion of an IT infrastructure Review facilitated by NDIIT for the NDSP/RRI facilities to identify any needed vulnerabilities or enhancements in hardware, security and services. Additional important physical plant upgrades include the installation of new fiber lines at our facilities to maintain connectivity and avoid any service interruptions.

Medical Services implemented a new Electronic Medical Record system, Avatar, and will need additional licenses to continue to roll out the application and the reporting functions of the application.

Medical Services and security are greatly impacted by individual resident medical appointments off site and to reduce the need for those moves outside secure areas by providing a module within the EMR to conduct Virtual Visits.

Human Resources seeks funding for enhancements to their workflow for complaints, and internal affair investigations. These functions are critical to managing incidents that occur with residents and DOCR staff.

Parole and Probation seeks funding for a KIOSK terminal to allow individuals on probation to access reporting and information gathering tools from KIOSK in a public place similar to the NDDOT's self service KIOSKS. This provides the DOCR and staff to interact with individuals where they are and provide another point of contact for interacting with Parole and Probation.

The education work unit seeks funding for the AutoCAD system that is utilized with Rough Rider Industries in their production and residents skill development. Education also seeks funding for the APEX Officer Simulator to provide staff training opportunities to better prepare our staff for the challenges that Correctional Officers face on a daily basis. Being able to put officers in simulated situations better prepares them to perform and provide a safe & secure environment.

Policy Management Application (Priority: 43)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Total					-	-	-	-	17,500	-	17,500	-	17,500

State Initiative:* Other

Justification: Kubota Zero turn mower (diesel) to replace one gas mower that is extremely old, has a large number of hours, and in need of replacement (\$17,500).

YCC/HRCC Utility Tractor & Trailer (Priority: 46)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	530-2150	53079	691000	13	2	-	-	77,400	-	77,400	-	77,400
Total					-	-	-	-	77,400	-	77,400	-	77,400

State Initiative:* Other

Justification: The current facility maintains approximately 80 acres of property. Much of this property is not ornamental turf and is rough pasture but requires mowing several times per year. The DOCR is also responsible for all weed control on this property as well. We are currently using finish mowers for cutting this pasture grass and for spraying herbicides. These mowers are not intended to be utilized for this purpose and accelerated wear has been the end result. A utility tractor could be utilized for tilling, rough cut mowing, spraying herbicide/fertilizer, blading roads, snow removal, and tilling. DOCR facilities are currently sharing skid steer loaders between the 3 Bismarck/Mandan facilities. Currently we are utilizing a dump trailer to haul skid-steer loaders and other heavy equipment between facilities. Loading and unloading these pieces of equipment is not safe due to the height of the dump trailer. A utility trailer would be lower to the ground and safer to load and haul equipment with.

530 Corrections and Rehabilitation

Agency 530

MRCC Body Scanner (Priority: 47)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	530-0330	53077	691000	12	1	400,000	-	400,000	-	400,000	-	400,000
Total					-	-	-	-	400,000	-	400,000	-	400,000

State Initiative:* Other

Justification: The intended purpose of the Body Scanner at MRCC is to increase controls over contraband being brought in from residents moving from an uncontrolled community environment (ie work release) to the controlled correction environment.

This technology would also have the potential to eliminate the need for more intrusive search procedures for facilities with a large percentage of uncontrolled intakes from the community.

RRI IT Needs (Priority: 50)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	926	530-9000	53077	693000	5	3	-	-	642,080	-	642,080	-	642,080
Total					-	-	-	-	642,080	-	642,080	-	642,080

State Initiative:* Technology Investment

Justification: Rough Rider Industries provides a critical component to many resident’s rehabilitation and recovery. They employ incarcerated individuals to produce goods and services while preparing them to successfully reintegrate into society. RRI is completely funded by the revenues of their goods and services and uses no taxpayer dollars.

Rough Rider Industries requests funding for a new barcoding system to improve tracking and reporting on their production inventories. The current tools and processes are difficult and labor intensive which cause significant non-value added time to maintain accurately.

RRI requires a solution to their current commissary process to enhance their ability to effectively and accurately track and deliver goods to residents. The commissary function within a correctional facility is very important to residents and the current system is dated causing several process issues that negatively impact interactions with residents and staff. Currently, RRI manually tracks this function and problems with residents receiving inaccurate commissary orders has occurred. Implementing an new application and standardizing this process will improve accuracy, simplify accurate inventory management and provide meaningful reporting for the commissary.

530 Corrections and Rehabilitation

Agency 530

Like any organization communication is a critical part of daily work and even more so in an industrial facility. RRI is seeking to improve inmate communications tools by updating their current communication platform version (Big Ant) to add functionality, accessibility and security.

Tattoo Removal Machine (Priority: 58)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

	P1602	530-4410	53077	691000	-	-	-	-	-	-	-	-	75,000
Total					-	-	-	-	75,000	-	75,000	-	75,000

State Initiative:* Other

Justification: The DOCR is establishing a First Impressions Program. This in-house program will identify and treat DOCR residents at all facilities who wish to remove facial, head and neck, and exposed hand tattoos that are offensive, distracting, depict violence or signify gang affiliation. This program will complement existing re-entry programs. The goal is to help our returning community members to gain employment and obtain housing.

Point of Care Ultrasounds (POCUS) (Priority: 59)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation	
								Ongoing	One-Time	Ongoing	One-Time	Ongoing	One-Time
	001	530-4410	53077	691000	6	3	9,000	-	27,000	-	27,000	-	27,000
Total					-	-	-	-	27,000	-	27,000	-	27,000

State Initiative:* Other

Justification: DOCR medical providers are undergoing training to perform Point-of-Care ultrasound examinations using handheld ultrasound devices. Utilization for diagnosis at the bedside or in clinic will decrease significantly the number of off-site transports to emergency departments and to radiology facilities for diagnosis of pneumonia, congestive heart failure, deep venous thrombosis. It will also assist in the delivery of prenatal care. This will improve community safety and decrease transport resource costs as well as medical imaging costs.

530 Corrections and Rehabilitation

Agency 530

Handheld Radios (Priority: 62)

Description	Fund	BU-Dept	Fin Class	Account	Est. Useful Life (Years)	2023-25 # of Items	2023-25 Unit Cost	2023-25 Optional Request		2023-25 Total Budget Request		2023-25 Executive Recommendation

Statutory Authority

North Dakota Century Code Chapter 37

Agency Description

The Office of the Adjutant General includes both the North Dakota National Guard (NDNG) and the Department of Emergency Services (DES).

The NDNG is a community-based defense force made up of quality North Dakota citizens, trained and available to protect the vital interests of our state and nation.

The NDDDES has two divisions: the Homeland Security Division and the Division of State Radio. The Homeland Security Division provides the organizational base for emergency preparedness, response, and recovery operations for the state, 54 local emergency management organizations, and four tribal management organizations. The Division of State Radio provides 9-1-1 emergency dispatching services for State of ND Public Safety Agencies and all emergency responders (Law Enforcement, Fire, and EMS) for 25 North Dakota counties, which includes approximately 287 federal, state, local, and tribal agencies, representing over 4,000 individual users.

Agency Mission Statement

North Dakota National Guard: Providing ready units, individuals, and equipment supporting our communities, state and nation.

Department of Emergency Services: Providing North Dakota with a central coordinating agency for public safety communications, prevention, protection, mitigation, response and recovery.

Major Accomplishments

- 10 National Guard: Continue to play a significant role as an Operational Reserve in support of the combatant commanders. Deployed 481 Soldiers and 434 Airmen
0 from JUL20 to JUL22.

- 10 National Guard: Participated in seven military and air exercises from JUL20-JUL22 involving 379 Soldiers and 125 Airmen.
1

- 10 National Guard: Conducted 25 military and civilian events under our State Partnership Program with the West African Countries of Ghana, Togo, and Benin.
2 These engagements ranged from senior leader officer and non-commissioned officer (NCO) engagements, to heavy engineer machinery new equipment training, the largest earthquake exercise in Ghana’s history (550 first responders trained), along with Ghana Armed Forces participating alongside NDARNG in the Best Warrior Competition (AUG 2022).

- 10 National Guard: NDNG Aviation supported 15 fire and flood response events from APR20-JUL22 around the state involving 550 personnel days, over 100,000
3 gallons of water dumped, and 230 one-ton sandbags placed.

- 10 National Guard: The 119th Wing was awarded their 22nd and 23rd Air Force Outstanding Unit Awards, plus Lt Col Crary was awarded the 2021 Air National
4 Guard Safety Officer of the Year, MSgt Ryan Nelson was awarded the Air National Guard Region 6 First Sergeant of the Year, and TSgt Aaron Fagerwick was awarded the 2020 Gen Jumper Remotely Piloted Aircraft Award as the top Sensor Operator in United States Air Force.

- 10 National Guard: The 119th Wing developed and participated the first of its kind mission coordination and synchronization events with various units from
5 multiple branches from across the nation providing proof of concept support capabilities.

Major Accomplishments

-
- 10 National Guard: Ten members of the NDNG received national recognition from the National Guard Association of the United States for their performance
6 during the past two years.
-
- 10 The 119 Wing was recognized with 7 unit awards over the past two years from the National Guard Association of the United States and National Guard Bureau
7 for exceptional performance. Those awards include the 2020 Spaatz Trophy, 2020 Winston P. Wilson Trophy, 2020 Maj Gen John J. Pesch Flight Safety Trophy, 2021 Maj Gen John J. Pesch Flight Safety Trophy, 2021 William W. Spruance Safety Award, 2021 Distinguished Flying Unit Award, and 2022 Spaatz Trophy.
-
- 20 Homeland Security: Contributed significantly to the organization and response to the COVID-19 pandemic
0
-
- 20 Homeland Security: Lead a whole community approach to the statewide Threat and Hazard Identification and Risk Assessment (THIRA) process
1
-
- 20 Homeland Security: Conceptualized, developed and implemented a virtual capability to issue Public Alerts (Amber, Blue, and Silver)
2
-
- 20 Homeland Security: Lead a multi-agency response and ongoing recovery to the states 5th largest disaster (by cost) after severe spring storms and flooding
3
-
- 20 Homeland Security: Developed a whole community cyber incident response framework and continue to lead the development of a whole community cyber
4 response plan (ongoing)
-
- 20 Homeland Security: Conducted 4 exercises with a total of 110 participants and supported the establishment and ongoing efforts of the CyberCon conference
5 and Teen Cyber Madness
-
- 20 Homeland Security: Administered 9 open disasters in the 2019-2021 biennium
6
-
- 20 Homeland Security: Provided support to five other states under the Emergency Management Assistance Compact (EMAC) since the beginning of FY2019:
7 California, Minnesota, Montana, Oregon, Louisiana
-
- 20 Homeland Security: Distributed \$18.3 million through State Homeland Security programs, \$153.1 million through the Public Assistance programs and \$6.7
8 million through the Hazard Mitigation Assistance programs in the 2019-2021 biennium.
-
- 30 State Radio: Implementing a classroom "Training Academy" to improve the training experience for new hires. This makes the new dispatchers a little more
0 comfortable by the time they start their actual hand-on training in the Communication Center.
-
- 30 State Radio: Upgrading our Computer Aided Dispatch (CAD) to more efficiently serve and provide valuable information and data to our emergency responders.
1 This is a major project that required hundreds of hours of work, on-duty and off-duty to set up, test, build the system, and train internally and external customers.
-
- 30 State Radio: Statewide Interoperability Radio Network (SIRN) – Progressing on the SIRN Project, including meeting with State agencies and State Radio's 25
2 counties to coordinate and set up the new Talkgroup platforms for the responder agencies.
-
- 30 State Radio: Continue to answer 9-1-1 emergency calls well under the national standards for answering time.
3
-
- 30 State Radio: Struggled to, but have been maintaining staffing levels to continue to provide 9-1-1 and dispatching services to our customers throughout North
4 Dakota, even during the COVID pandemic, without having to mandate overtime.
-

Major Accomplishments

30 State Radio: State Radio 9-1-1 Emergency Dispatchers continue to efficiently, professionally, and with compassion answer 9-1-1 emergency calls in peoples' 5 worst times of their lives to assist them, comfort them, and to get them the emergency assistance they require. They are consistently the key to saving lives.

Critical Issues

10 National Guard: Readiness remains the number one priority and is critical to ensure a prepared and ready force as part of the operational reserve and able to 0 respond to federal and state requirements. 1a. Readiness starts with full formations which requires strong recruiting and retention incentives to meet our end strength requirements. The North Dakota National Guard has not be exempt from the recent and on-going recruiting and retention struggles. We have dropped below our desired 102% strength and trends indicate that decline could continue. 1b. Readiness requires exceptionally well trained Service Members and units. We continue our efforts to update ranges and training areas necessary to support changes in weapons and ammunition capabilities and to support the additional and challenging training requirements of an Operational Reserve. 1c. Readiness requires our continued support of our Soldiers, Airmen and their Families. Their needs increase as we ask more of them. 1d. Readiness requires the maintenance and modernization funding to support 330 state owned National Guard buildings and infrastructure across the state. The ability to perform maintenance and conduct necessary repairs as these facilities' age is crucial to ensure they remain functional for our current and future force.

10 National Guard: The continuation of the state match levels necessary to retain federal funding of important programs in the Air and Army Guard federal/state 1 agreements.

10 National Guard: Military construction of an operations facility in Dickinson is expected to be ready for occupancy in the calendar year 2024 and will require 2 additional utilities, maintenance and custodial costs for the Master Cooperative (federal/state) Agreement. A purpose built armory in Williston is proposed to meet the needs of the Air Defense unit moving from Bismarck to Williston in federal fiscal year 2023. Additional space requirements are also necessary at Camp Grafton Training Center. A new Fitness Facility and additional lodging capacity will support a growing military and law enforcement training requirement driven by the completion of the Line of Communication Bridge in FY24, the growing partnership with the Bureau of Indian Affairs (BIA) Advanced Law Enforcement Training Academy, and an increased interest from military as well as other local and state law enforcement entities.

20 Homeland Security: FEMA requirements for implementation of National Qualification System (NQS) for emergency response staff 0

20 Homeland Security: Expansion of missions and stakeholder expectations beyond traditional disaster response to include civil unrest, pandemic, cybersecurity 1 and unmanned aerial systems/autonomous systems

20 Homeland Security: Potential and actual FEMA rule changes that reduce funding both for agency operations and local mitigation projects 2

20 Homeland Security: Maintaining a highly skilled workforce and transitioning in new staff in key positions due to approximately 40% of Homeland Security 3 Division employees being eligible to retire by the end of the next biennium

30 State Radio: State Radio is one of the lowest paid dispatch centers across the state (Staffing & Compensation Analysis Study by RMA). Internally, implemented 0 a 5% equity adjustment to get our emergency dispatchers compensation closer to being competitive. We are still 10%-17% behind other centers throughout North Dakota.

Performance Measures

Program: Tuition and Enlistment Compensation

Performance is not measured at the program level. Performance is measured at the ND National Guard overall level.

540 Adjutant General

Agency 540

Program: NG Operations

Performance is not measured at the program level. Performance is measured at the ND National Guard overall level.

Program: Air/Army Guard Contracts

Performance is not measured at the program level. Performance is measured at the National Guard overall agency level.

National Guard:

Line of Effort 1: People

1. Acquire and manage talent at or above 100% NLT 30 Sept 2027
2. Meet and sustain component readiness standards NLT 30 Sept 2026

Line of Effort 2: Force Structure and Stationing

1. Optimize force structure compatible with Multi Domain Operations while maintaining current Force Structure Allowance 30 Sept 2028
2. Acquire resources that support current and projected stationing plans 30 Sept 2027

Line of Effort 3: Capacity and Capability

1. Enhance CGTC to meet requirements of a Level III training center NLT 2030
2. Optimize readiness and lethality sustaining 90% combat effectiveness in the NDNG NLT 2030

Program: DES Administration

Performance is measured by the success of the divisions served, (Homeland Security and ND State Radio) and accounting excellence without major audit findings.

Goal 1. Improve readiness, response, and recovery

Objective 1-1. Develop, test and refine a real-time GIS based all-hazards common operating picture dashboard no later than FY 2022

Objective 1-2. Expand by a factor of two the implementation of programs and partnerships that promote youth education in disaster management by the end of FY2024

Objective 1-3. Provide Community Emergency Response Team (CERT) training and promote development of hands-on skills useful in emergencies

540 Adjutant General

Agency 540

Objective 1-4. Implement the National Qualification System utilizing a phased approach of State Emergency Operations Center staff, state agency staff, Emergency Management Support Team, local Emergency Management personnel and first responders

Objective 1-5. Determine losses avoided through mitigation, and communicate these determinations with the Whole Community to promote future mitigation and resiliency efforts

Objective 1-6. Build upon the successes of current state-led recovery models to continue to efficiently return communities to pre-disaster conditions, and integrate improved resiliency into recovery efforts

Objective 1-7. Achieve re-certification in the Emergency Management Accreditation Program (EMAP)

Goal 2. Grow the departments capabilities

Objective 2-1. Develop and implement a 24/7 all-hazards, whole of government “watch center” to continually scan, assess and initiate early response to public safety emergencies

Objective 2-2. Expand Emergency Management Support Team (EMST) capabilities and talent to address current and emerging requirements, including the development and employment of pre-identified special purpose teams (i.e., recovery, cyber response, planning, UAS operations)

Objective 2-3. Leverage geospatial technology, pertinent public safety data, and machine learning/artificial intelligence to accelerate the decision-making process with better outcomes

Objective 2-4. Improve the department’s outreach and educational capabilities through increased implementation of visual media; in particular, video and real-time virtual events

Objective 2-5. Increase the availability of direct technical support to communities to assist them in planning and resourcing viable mitigation and resiliency projects

Objective 2-6. Coordinate/Collaborate with NDIS, other PSAPs, and State Radio’s 25 counties in implementing SIRM statewide

Goal 3. Enhance relationships and stakeholder collaboration

Objective 3-1. Expand emergency management engagement to further include community groups and leaders such as faith-based organizations, community service, volunteers, private sector businesses and the general public (On going)

Objective 3-2. Incentivize and engage the general public to better prepare, respond, recover, and mitigate potential disasters and emergencies

Program Statistical Data

Program: Tuition and Enlistment Compensation

Service members (approximately 450 per semester) are provided this educational opportunity while at the same time make their contribution to defend and serve our state and nation. This program was started in 1977 and continues to provide an excellent recruiting and retention incentive. Our Army strength is currently at

540 Adjutant General

Agency 540

2980 with an authorized strength of 3051 for FY22. The Air strength is currently at 1147 with an authorized strength at 1217 for FY22. This program is critical to maintaining current strengths.

Program: NG Operations

The agency maintains approximately 330 buildings throughout the State of North Dakota, of which approximately 20% are state supported. The total inventory of buildings is at a cost value of \$191 million. Current infrastructure costs are at \$51 million. Funding level is at a minimum requirement to continue state operational support of the ND National Guard and affects the long standing agreements and

contracts with the federal government. Operational costs are primarily utilities, repairs, insurance and other day-to-day expenses involved with maintaining state supported facilities at current state. Grant funding provides rental payments to 7 city-owned armory facilities throughout the state that support our units. The ND Veterans Cemetery (NDVC), which currently provides a final resting place for over 9,500 individuals, requires support for salaries and wages. The average number of interments per year is 535. The NDVC is having a busier than usual year and looks like it will be exceeding the annual average by 50 or more burials this year. The Reintegration/Outreach program includes two licensed social workers and two outreach specialists that perform outreach duties to all branches of veterans throughout North Dakota. ND Cares was an initiative created from Executive Order 2015-01 issued by Governor Dalrymple in January 8, 2015 and continues under Governor Burgum. ND Cares was placed under the Office of the Adjutant General in September of 2015. ND Cares is a coalition of more than 40 military and civilian professionals dedicated to the care and support of North Dakota Service members, Veterans, Families and Survivors (SMVFS). ND Cares is not a provider of services, rather a coalition whose mission is dedicated to understanding the needs and services required by our SMVFS and to resolve barriers or gaps in those services to strengthen an accessible and seamless network of support of SMVFS. ND Cares priority is behavioral health with the focus on the promotion of emotional health, prevention of mental disorders, prevention of substance abuse disorders, treatment and recovery support. ND Cares main strategic goal is to reduce barriers to the use of mental health services.

Program: Air/Army Guard Contracts

Personnel and facilities covered by these contracts/agreements are essential to the day-to-day operations of the Air and Army National Guard. The federal funding is dictated by the state share of support (general funds). The state share of support is also closely related to federal funds that come directly into the state that are not processed through the state budget system. The National Guard brings in over \$533 million in economic impact to the State of North Dakota in a biennial period. The Camp Grafton Training Center at Devils Lake is a nationally recognized training facility. Soldiers from throughout the United State and different branches of military as well as civilians train at this facility. This facility is critical to not only overall NDNG Soldier training but specifically weapons training. Without adequate training range areas, our NDNG Soldiers would have to go out of state for critical weapons training and certification. This also is true for out of state Soldiers that train at Camp Grafton Training Center annually.

Program: DES Administration

The NDDDES Administration processed \$9 million in various Homeland Security and Emergency Management Performance grant payments and \$32.8 million in Disaster Recovery Assistance grant payments during the 2017-19 biennium and supported 71 FTE's in payroll and travel processing as well as overall administrative and accounting operations for the Department of Emergency Services. In addition, this division processed \$21 million in DAPL reimbursement payments to local and out of state law enforcement, and state agencies.

Explanation of Program Costs

Program: Tuition and Enlistment Compensation

540 Adjutant General

Agency 540

This program provides ND National Guard members with tuition assistance. The reimbursement payment is based on full time undergraduate tuition rates for undergraduate as well as graduate course work. The program is limited to 130 semester credit hours for undergraduate degrees and 39 semester credit hours for post graduate degrees, per military member. Most students have been receiving 100% tuition reimbursement with utilization of both federal and state funds. Budget request is based upon approximately 450 participants per semester with a goal of continuing 100% tuition reimbursement for undergraduates. This program is critical to maintaining the ND National Guard force strength.

Program: NG Operations

Program funds 49 FTE's with various functions including facility management, tuition reimbursement, reintegration/outreach program, ND Civil Air Patrol, the ND Veterans Cemetery and administrative support of all functional areas. The program maintains and operates our state supported facilities (330 buildings), to include the ND Veterans Cemetery and ND Civil Air Patrol, to ensure the readiness posture of our soldiers for federal as well as state missions. The capitalized cost of these state owned building is \$191 million and infrastructure costs of \$51 million - crucial to force readiness. The ND National Guard Reintegration/Outreach program consists of two licensed social workers and two outreach specialists. The 2015 Legislature approved ND Cares which consists of one FTE and operating costs.

Program: Air/Army Guard Contracts

General fund matching is critical to the Air and Army Guard Contracts to meet agreement commitments between the state and federal governments. The general fund match is needed to fund salaries, utilities and operations that require a state/federal match.

This program supports 106 state FTE which are mainly 100% federally funded along with various federal/state cost share FTE's as well.

Program: DES Administration

1. This program consists of 5 FTE's that provide the administrative/accounting support to the Department of Emergency Services.
2. Operational costs are the administrative costs supporting Homeland Security and ND State Radio.
3. The Grants line expenditures within this program are federal pass through of Homeland Security and Emergency Management Performance Grants

Program Goals and Objectives

Program: Tuition and Enlistment Compensation

The goal of this program is to provide tuition assistance at institutions of higher learning in North Dakota. This goal is to provide 100% tuition reimbursement while utilizing federal and state funds for undergraduates and a portion of graduate level studies.

Program: NG Operations

The goal of the Operations Program is to adequately support and maintain the ND National Guard facilities and state personnel throughout the state. This program provides the day-to-day support in include salaries and wages, operating expenses and equipment for the the units of the ND Air and Army National Guard for over 300 state-owned facilities. Without providing this critical support, we would not be able to support either state or federal missions. In addition, the Operations Program goal is to provide organized support to soldiers through it's Outreach and ND Cares functions.

540 Adjutant General

Agency 540

Program: Air/Army Guard Contracts

The goal of this program is to successfully execute the contracting/agreements with the federal government in support of the ND Air and Army National Guard.

Program: DES Administration

1. Maintaining highly accurate grant accounting records through continuous coordination with grant program managers.
2. Facilitating payroll processing and all travel for the Homeland Security and ND State Radio employees.
3. Ensuring all information processing, grant payments for Homeland Security and Emergency Performance Grants and data support functions following fiscal and administrative policies as well as state laws and regulations.

Budget Request Summary

1		2	3	4	5	6
Object/Revenue		2019-21	2021-23	2023-25	2023-25	2023-25

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority):* Civil Air Patrol’s #2 priority.

The Civil Air Patrol (CAP) is requesting a 3% increase to base budget operating dollars. Over the years the CAP has looked within their own operations and reduced training activities or looked for additional savings within normal operations. With the significant cost increases experienced this past biennium, we are no longer able to continue to find the additional dollars needed within. Fuel costs are a significant part of our operating budget, and with the rise in fuel costs alone this places CAP in a hardship. Civil Air Patrol’s budget has not kept up with cost of living adjustments over the years. Training missions are critical to the safety of our citizens, and in order to maintain and provide the training hours needed, or base budget needs to increase.

Necessary resources for implementation (including FTE’s):* Additional base budget, ongoing operating dollars are needed to continue success for Civil Air Patrol.

Are resources being redirected or are they new or additional (including FTE’s):* This request would be for new dollars appropriated to the Civil Air Patrol budget line.

Who is served and impact of not funding*: The Civil Air Patrol has three primary missions: Aerospace Education, Cadet Programs and Emergency Services. Civil Air Patrol performs 95% of the nation’s inland search and rescue, averages over 100 lives saved per year, performs aerial reconnaissance for homeland security, completes disaster-relief and damage assessment, provides transportation for time-sensitive medical materials and is tasked with counterdrug missions. If this request is not funded the Civil Air Patrol will need to continue to look internally for reduced costs, which may lead to reduced training hours for mission critical tasks. Reduced training hours will have a negative impact on the citizens of North Dakota if we do not have trained and ready members to provide those services.

State Radio FTE Cost to Continue (Priority: 03)

Total	-	-	-	0.00	-	-	-	0.00

State Initiative:* Workforce

540 Adjutant General

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: State Radio’s #1 priority.

During the 67th legislative assembly two FTE were transferred from the National Guard Division to State Radio. The two FTE positions were funded 100% special funds and no cost to the general fund during the 2021-2023 biennium. State Radio received Coronavirus Relief Funds to pay for dispatcher salaries during the 2019-2021biennium, therefore when the two FTE positions were transferred, it was agreed upon that State Radio would use 100% special funds through the remainder of the 2021-2023 biennium.

State Radio dispatchers are generally paid with 60% general funds and 40% special funds. This request is for the cost to continue the two FTE general fund portion into the 2023-2025 biennium and foreseeable future.

Necessary resources for implementation (including FTE’s)*: General Fund dollars for 60% of the two FTE positions is being requested.

Are resources being redirected or are they new or additional (including FTE’s)*: New resources are being requested.

Who is served and impact of not funding*: Citizens of North Dakota are served by the 911 dispatchers as the "first" first responders. If this request is not funded, the special funds will decrease at a faster rate

State Radio FTE (Priority: 04)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	153,274	-	153,274	0.60	164,011	-	164,011	0.60
Special	102,182	-	102,182	0.40	109,341	-	109,341	0.40
Total	255,456	-	255,456	1.00	273,352	-	273,352	1.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: State Radio’s #2 priority.

Per NDCC 37-17.3-07. Maintenance of radio system - Personnel, equipment, and expense.

The director may employ such radio operators and assistants and such radio equipment as

540 Adjutant General

Agency 540

the director may deem necessary to carry out the provisions of this chapter and shall fix the compensation of such personnel. The cost of maintenance and operation of the system and all shortwave length radio receiving and transmitting sets owned or operated by the state must be paid out of the appropriation for this purpose.

State Radio is requesting one additional FTE, an Operations and Training Manager. State Radio, through an independent vendor, Resource Management Associates, conducted a Staffing and Market Analysis Study in December 2020 which identified areas needing improvement. One of the findings from the study was the need for an Operations and Training Manager who can focus on critical hands-on day-to-day operations in its staffing and services, coordinate and implement much needed training programs, and perform Quality Assurance/Quality Improvement to ensure high levels of performance in the Communications Center. This position would also enable the dispatch supervisors to dedicate more time to their supervising responsibilities and less time, including on days off, performing administrative duties, and would help to reduce overtime costs.

This request is for a total of (1) FTE: Operations and Training Manager.

Necessary resources for implementation (including FTE's)*: This request is for (1) FTE for a total cost of \$255,456 (60% general funds and 40% special funds).

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

Who is served and impact of not funding*: State Radio provides 911 services to the citizens of twenty five counties and emergency responders across the state. It is critical that State Radio has an efficient and effective management organizational structure to best implement and maintain continuity across the four working shifts/ crews in the areas of supervision, operational management, and training. maintains adequate staffing levels with qualified, well trained, professional staff. The dispatchers are the "first" first responders and are there when citizens are experiencing some of their worst days ever.

If this request is not approved, State Radio will continue to be inconsistent and fragmented in operations across shifts/crews and the director continue to have minimal time to focus on overall management and strategy for the organization. In addition, overtime expenses will continue to rise due to needing the four supervisors to attend meetings and take on projects that, many times, has to be worked on during their days off, thus reducing their actual time off, life/work balance and results in burnout.

State Radio Consoles (Priority: 05)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	-	300,000	300,000	0.00	-	300,000	300,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	300,000	300,000	0.00	-	300,000	300,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

540 Adjutant General

Agency 540

Request explanation and justification (include any statutory authority)*: State Radio's #3 priority.

State Radio is requesting funds to replace their current consoles/desks in dispatch. The consoles/desks in dispatch currently serve many functions to help keep the dispatcher comfortable and relaxed during a 12 hour shift. They also provide many key and critical components such as the ability to raise/lower monitors, have 2 shelves for monitors that swivel and pivot to accommodate many/multiple monitors, custom pathways for IT cabling and storage of all machines needed per console, plus storage space for dispatch for manuals, supplies, etc.

The current consoles have been in use for over 15+ years now. With the expansion into the new State Radio facility several years ago, costs were cut by finding similar consoles from other dispatch centers that were at that time replacing theirs with newer equipment. The 10 positions in dispatch now have failing motors, heaters, fans, lights and doors. The consoles are no longer supported by the vendor, and we have bought the last of the replacements parts we can find to ensure another year or two of operation of those desks.

Necessary resources for implementation (including FTE's)*: Additional funds for console/desk replacement.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

Who is served and impact of not funding*: State Radio dispatch staff operate on 12 hour shifts with desks that are failing. If funds are not received, and the consoles continue to break we will no longer be able to find replacement parts for things such as motors, heaters, fans, lights and doors as the vendor no longer supports the equipment.

Watch Center (Priority: 06)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	2,317,112	-	2,317,112	10.00	1,551,068	-	1,551,068	6.00
Special	-	-	-	0.00	-	-	-	0.00
Total	2,317,112	-	2,317,112	10.00	1,551,068	-	1,551,068	6.00

State Initiative*: Reinventing Government

Is this a Large IT project? No

Is this request for a new program or service? Yes

Request explanation and justification (include any statutory authority)*: Homeland Security's #1 priority.

The Department of Emergency Services is tasked in NDCC 37-17.1 with reducing the vulnerability of people and communities of this state to damage, injury, and loss of life and property resulting from natural or manmade disasters or emergencies, threats to homeland security, or hostile military or paramilitary action. NDCC 37-17.1-05 specifically states "The governor is responsible to minimize or avert the adverse effects of a disaster or emergency." Similarly, the North Dakota Department

of Emergency Services (NDDDES) division of homeland security shall prepare and maintain a state disaster plan that includes provisions for both averting or minimizing injury and damage caused by disasters or emergencies and prompt and effective response to a disaster or emergency (NDCC 37-17.1-06).

To meet the mandates in both the immediate and long term, NDDDES is requesting funding and authorization to establish and operate a 24/7/365 "Watch Center." The watch center would provide a persistent capability that scans for all-hazard threats, assesses the potential consequences, and initiates response efforts by alerting appropriate stakeholders, providing continuous incident analysis, and providing stakeholders consistent updates. Significant capabilities that the watch center would provide:

- Faster, more consistent whole of government emergency response
 - o Increased citizen safety
 - o Reduced disaster recovery costs
 - o After hours consolidation of public safety agency services
 - o Improved all-source intelligence
- Real and near real-time emergency information via a public and non-public safety dashboard
 - o Improved information for decision makers
 - o Improved public information availability
 - o Long-term data informed decision assistance

Currently, after traditional business hours and on the weekends, the Department of Emergency Services uses staff from various sections within the agency as duty officers. These duty officers are not monitoring for events, but rather react to notifications via phone overnight as well as email prior to going to bed. This costs the state additional money in overtime and requires NDDDES staff to spend time learning and maintaining proficiency in a task that may not be related to their primary role. This results in less time to do their primary jobs, higher overtime costs, increased employee burnout, increased risk of missing significant events, delayed emergency response, and less consistency across duty officers. Similarly, other agencies are also employing on call staff after hours that could be routed through the watch center and vetted prior to contacting each agency and/or mobilizing resources.

Necessary resources for implementation (including FTE's)*: 10 x FTE positions

- 8 – Watch Center analysts (104 classification)
- 1 – Watch Center manager (106 classification)
- 1 – Dashboard development technician (105 classification)

Existing FTE partially directed to support

540 Adjutant General

Agency 540

- WebEOC administrator to support integration of incident management platform
- Planning Section Chief will facilitate inter-agency emergency response plans
- GIS Section Chief to lead initial development of GIS based dashboard
- GIS Tech to build initial GIS based dashboard

All-hazard dashboard software

- Open source and dark web threat monitoring software (\$80,000/yr)
- Additional GIS software licensing

Existing technology being leveraged to support

- ARC GIS
- WebEOC incident management software
- Everbridge public alert software

Are resources being redirected or are they new or additional (including FTE's)*: There is a combination of directed resources and new resources for this request. Existing resources will be used to support the initial development and ongoing maintenance of the all-hazards common operating picture dashboard. In addition, resources will be directed to support the development and planning of operating procedures for the watch center.

Additional resources are being requested to provide 24/7 coverage at the watch center. In order to have staff on-site for 24 hours/day, 7 days/week, a minimum of 6 employees is necessary (3 shifts x 8 hrs/day x 7 days). In order to account for sick/vacation leave, training and vacant positions, 2 additional positions are being requested. A watch center manager position is also being requested to manage the staff and provide day-to-day operational guidance, in accordance with recommended span of control guidance from the Incident Command System (ICS) that the state has adopted. The last position being requested is a watch center dashboard development technician. This position will be the primary developer for the all-hazard common operating picture dashboard. This position will maintain the technology used to aggregate and display the vast amount of public safety data.

In addition to the human resources, there will be technological resources needed to establish and maintain the all-hazard common operating picture dashboard. New resources required will be an open-source monitoring software that will continuously monitor the internet, to include the dark web, for threats and ongoing incidents across the state and region. In addition to the monitoring software, additional licenses for GIS software will be required.

Existing resources that will be directed to support a watch center are the WebEOC software administrator, Planning Section Chief, GIS Section Chief, and a GIS technician. The time directed by these resources will come from efficiencies found in establishing a watch center. There are existing technology resources that will be used to support the watch center as well, including ARC GIS software, the WebEOC incident management platform, and the Everbridge alerting software.

540 Adjutant General

Agency 540

Who is served and impact of not funding*: First and foremost, the citizens of North Dakota will be served by the watch center by creating a true 24/7 capability to monitor for and quickly respond to threats. Earlier warning and faster response times in the long run will result in less citizen injuries or deaths as well as less damage to private and public property. Citizens will also benefit through long term reduced costs of disaster response and recovery. Lastly, the citizens will benefit through access to consolidated public safety information via the all-hazards common operating picture dashboard. The creation of the dashboard will also facilitate the long-term process of collecting better and increased public safety data, which will lead to an ability for data backed analysis and decision making that is not currently possible.

NDIT Increased Unification Costs (Priority: 08)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	156,000	-	156,000	0.00	156,000	-	156,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	156,000	-	156,000	0.00	156,000	-	156,000	0.00

State Initiative*: Other

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: Homeland Security's #3 priority.

The ND Department of Emergency Services is requesting an increase in the ongoing base budget for increased information technology (IT) costs associated with the IT unification. While the Department of Emergency Services did receive \$18,122 for 2023-25 NDIT rate increases, this amount is insufficient for projected Public Service Maintenance and Operations (M&O) costs. Projected Public Service M&O costs for the next biennium will increase from \$564,000 to \$720,000. This is a net increase of \$156,000. In the 2021-2023 biennium this cost covered 3 FTEs supporting the agency while the 2023-2025 biennium is projected at 2.5 FTEs. The result is a 17% reduction in FTEs serving the agency and a 28% cost increase. The cost per FTE of support increased from \$188,000 last biennium to \$288,000, or 53%.

The Dept of Emergency Services receives a large majority of its funding from federal sources such as grants, which limits the ability to absorb the increased costs. The State Radio Division does have the ability to recoup some of this cost in the future through rate adjustments to participating counties, state agencies, and federal agencies; however, these adjustments are made based on historical costs and not projected costs. This results in NDDDES paying the increase upfront.

Necessary resources for implementation (including FTE's)*: Ongoing funding of \$156,000 per biennium.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

Who is served and impact of not funding*: The Dept of Emergency Services, including the Homeland Security Division and State Radio Division are impacted. The end result of not funding results in assuming risk to the public safety networks that support 911 and other emergency response across the state. In the end, this puts the citizens of the state at greater risk during a personal or regional emergency.

540 Adjutant General

Agency 540

Retirement Payouts (Priority: 11)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	175,000	175,000	0.00	-	175,000	175,000	0.00
General	-	100,000	100,000	0.00	-	100,000	100,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	-	275,000	275,000	0.00	-	275,000	275,000	0.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: The Office of the Adjutant General has several employees that are currently eligible for retirement. This number is continuing to grow and by the end of the 2023-2025 biennium, the agency will have a total of 35 employees that have met their rule of 85, or turned age 65. Several of the individuals who are retirement eligible have been with the agency for several years and carry large leave balances. The individuals hold key positions, and it is not feasible for the agency to hold open the positions to make up salary dollars for the required leave payouts. In order to see success for both the incoming employee, and agency, filling the positions as soon as possible is a must.

The agency has experienced several retirements within the past year. This request is for one time funds for roughly 60% of our eligible staff payouts. The total request is for \$275,000 which includes \$100,000 of general funds, and \$175,000 of federal authority.

Necessary resources for implementation (including FTE's)*: General fund dollars and federal authority for estimated retirement payouts.

Are resources being redirected or are they new or additional (including FTE's)*: This request is for new one time funding.

Who is served and impact of not funding*: Many times the current employees have large leave balances at the time of retirement that must be paid out. If the funding is not received, the agency would need to hold open the position to recoup the payout balances, and when the positions are critical to the operations of the agency this would be less than ideal.

Dickinson Readiness Center - FTE & Ongoing Operating Costs (Priority: 12)

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard’s #1 priority.

This request is for ongoing operational and utility costs for the Dickinson Readiness Center communicated during the 27th legislative assembly. The facility’s construction was federally funded, but the majority of the ongoing operational costs are funded 50% federal and 50% general funds (insurance is 100% general funds as this becomes a state owned facility). The ongoing operational and utility costs total \$354,000 (\$170,500 federal and \$183,500 general). These costs include: Utilities (\$175,000), Bldg & Grounds Maint (\$142,000), Office Supplies (\$24,000), and Insurance (13,000).

This request also includes (3) FTEs: Physical Plant Director, Maintenance Supervisor, and a Custodial Supervisor.

Necessary resources for implementation (including FTE’s)*: This request asks for funding of \$354,000 for ongoing operational costs and additional funding for (3) FTE.

Are resources being redirected or are they new or additional (including FTE’s)*: This request is for new resources.

Who is served and impact of not funding*: The NDNG requires adequate facilities for training and ensuring they are mission ready. If this request were not funded, the NDNG would have constructed a facility that would be unusable.

State Active Duty (SAD) Training Funds (Priority: 14)

State Initiative:* Emergency Response Support

Is this a Large IT project? No

540 Adjutant General

Agency 540

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard's #3 priority.

The Office of the Adjutant General - National Guard (NG) is requesting funds for annual state training.

Since 2021, the NDNG has trained 38 service members and sourced 11 of those service members with national wildfire certification. In order for the NDNG to conduct wildland firefighting operations on 1.7 million acres of federal land in North Dakota, all NDNG personnel responding must possess valid and current federally approved wildland firefighting certification. Furthermore, this capability standardizes training and readiness while strengthening safety standards across all personnel responding to both state and federal wildland firefighting. Finally, this capability has continued to shape a positive public perception of the NDNG response capabilities. However, lack of funding and training will result in degrading the NDNG's readiness, safety and public perception to support the US Forestry Service and the state of ND in responding to wildland firefighting operations.

To meet federal requirement, without compromising readiness, balancing logistical and operational constraints, \$40,000 is being requested for this capability to be executed annually.

This capability will maximize planning and meet the requested month to conduct training with the US Forestry Service instructors as well as maximizing training value with the ability to conduct outdoor practical exercises (to include a mandatory fitness test). This funding would be used for State Active Duty (SAD) Service Member pay, lodging, mileage and per diem for those that attend.

Necessary resources for implementation (including FTE's)*: Ongoing funding in the amount of \$40,000 is being requested to conduct annual state training.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

Who is served and impact of not funding*: Lack of funding and training will result in degrading the NDNG's readiness, safety and public perception to support the US Forestry Service and the state of ND in responding to wildland firefighting operations.

Statewide Interoperability Radio Network (SIRN) Equipment (Priority: 15)

State Initiative:* Emergency Response Support

Is this a Large IT project? No

Is this request for a new program or service? No

540 Adjutant General

Agency 540

Request explanation and justification (include any statutory authority)*: National Guard's #4 priority.

Request one time funding of \$2,700,000 in State appropriations to equip the National Guard's (NG) emergency communication ability throughout the state. These assets will allow the National Guard to seamlessly interoperate with other State and Local agencies during domestic emergency responses.

In 2011 an exploratory study that focused on land mobile radio interoperability was initiated by the state in order to determine how to provide better communications during emergency responses. The legislature approved funding for the Feasibility Study in 2015 and the Governor of ND signed into law in 2017, the execution of SIRN 20/20. Project execution started immediately following and projected buildout completion, to include portable and mobile coverage, in 2024.

The new SIRN system utilizes the 800MHz bandwidth. Most old legacy systems, to include the National Guard, use the VHF bandwidth for emergency response. On the legacy system(s) each agency was independent of each other. There is a case study that highlighted that three responders could see each other but were unable to communicate using the current radio network because they were from different agencies. This jeopardizes the safety and response timeliness of the public and first responders. The feasibility study determined that no single ND entity could construct, operate and maintain a statewide communications system with the coverage, capacity, capabilities and redundancy of SIRN.

The NDNG receives a small federal budget to maintain non-standard military communications equipment, but would be unable to field the vast number of radios required to provide the entire force with SIRN capable assets in a reasonable period of time.

This state funding would be one time funding for new equipment capable to operate on the new SIRN system.

ND Army and Air National Guard Forces across the state will work and train with this new equipment to be prepared for the next emergency response when that occurs.

This initiative will ensure interoperability between ND National Guard and civilian first responders during training, exercises, and real world events.

National Guard's #5 priority.

Up to \$2,700,000 in State Funding for radio equipment compatible with the new Statewide Interoperability Radio Network (SIRN) system is being requested.

This initiative will also benefit Anti-terrorism and Force Protection efforts in two of our higher profile facilities in Bismarck and Fargo.

The North Dakota National Guard takes pride in any opportunity to assist support local and state civilian first responders in response to an emergency that ultimately affects impacts the people citizens of ND.

In order to maintain interoperability with other ND agencies, ND National Guard will need one-time state funding to purchase SIRN capable equipment.

Necessary resources for implementation (including FTE's)*: One-time funding of \$2,700,000 is being requested for radio equipment compatible with the new Statewide Interoperability Radio Network (SIRN) system is being requested.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

540 Adjutant General

Agency 540

Who is served and impact of not funding*: Request of one time funding to equip the National Guard’s emergency communication ability throughout the state. These assets will allow the National Guard to seamlessly interoperate with other State and Local agencies during domestic emergency responses. If the National Guard does not operate on the same system, the risk of responders being unable to communicate with one another exists as they may not communicate between networks.

ANG Security Forces FTE (Priority: 16)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

State Initiative*: Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard’s #5 priority.

The Air National Guard Security Forces is requesting one additional, non-classified FTE position. The Air National Guard receives federal funding to support their missions.

Security Forces Units across the nation are undermanned. Under current US Northern Command required Force Protection manning standards, we should be operating with a 10-man minimum per shift during duty hours and an 8-man minimum during non-duty hours. We have had to obtain manning deviation waivers to operate with a 5-man minimum due to the shortage of funded FTE’s. Approval of this FTE request will help us make progress toward meeting permanent, minimum standards for manning requirements.

Additionally, the 119th Security Forces Squadron is competing with the civilian sector for employees. Converting a temporary state position with no benefits into a fully-benefitted FTE will help us attract and retain quality personnel.

Necessary resources for implementation (including FTE’s)*: One, non-classified FTE position is requested. This position is 100% federally funded.

Are resources being redirected or are they new or additional (including FTE’s)*: New resources are being requested.

Who is served and impact of not funding*: The Air National Guard Security Forces Unit has received federal dollars to support this request. If this request is not funded they will continue to operate with limited staff and risk unspent federal dollars received to support their missions.

540 Adjutant General

Agency 540

Camp Grafton Fitness Facility - (1) FTE (Priority: 17)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE

Special	-	-	-	0.00	-	9,000,000	9,000,000	0.00
Total	12,063	9,000,000	9,012,063	1.00	12,063	9,000,000	9,012,063	1.00

State Initiative:* Workforce

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard's #6 priority.

The intent of this request is to expend state funds and communicate the requirement of expenses for subsequent biennium.

\$9,000,000 is being requested for a purpose-built fitness facility located at Camp Grafton Training Center (CGTC), along with one additional FTE. This facility would enable year round training and testing of the Army Combat Fitness Test (ACFT). This new test requires significantly more equipment and space than the previous test. A new facility would support all CGTC's customers and tenants' year round at Camp Grafton. Completion of the fitness facility is expected to be August 2025.

Ongoing operations and maintenance of the building in 2025-2027 would be anticipated at a total of \$280,000 with 50% general funds and 50% federal funds. One additional FTE is being requested with an anticipated start date of May 2025 so this individual can be onboarded prior to the opening of the facility. The cost for the 2023-2025 biennium would be two months of salary and benefits for a total of \$12,063, and a 50% state and 50% federal share.

Necessary resources for implementation (including FTE's)*: One additional FTE is being requested, a General Trades Maintenance Worker II. The project completion of the facility is anticipated to be August 2025, so we would like to bring on the additional FTE with a start date of May 2025. Two months of salary for the 2023-25 biennium is being requested to go along with the construction of the facility.

Are resources being redirected or are they new or additional (including FTE's)*: New resources are being requested.

Who is served and impact of not funding*: A new facility would support all CGTC's customers and tenants' year round at Camp Grafton. If this request were not funded, this would be a negative impact on the goal for CGTC to be the premier federal and state training center.

540 Adjutant General

Agency 540

Maintenance & Repair (Priority: 19)

	2023-25 Agency Request				2023-25 Executive Recommendation			
	Ongoing	One-Time	Total	FTE	Ongoing	One-Time	Total	FTE
Federal	-	-	-	0.00	-	-	-	0.00
General	1,500,000	-	1,500,000	0.00	1,500,000	-	1,500,000	0.00
Special	-	-	-	0.00	-	-	-	0.00
Total	1,500,000	-	1,500,000	0.00	1,500,000	-	1,500,000	0.00

State Initiative:* State Facility Investment

Is this a Large IT project? No

Is this request for a new program or service? No

Request explanation and justification (include any statutory authority)*: National Guard's #8 priority.

Current funding levels for maintenance and repairs has not kept pace with increased costs of materials and labor. Additional state funding is required to properly maintain the 330 buildings owned and operated by the National Guard, of which three are used to support other state entities, Department of Emergency Services Homeland Security Division, Department of Emergency Services State Radio Division, State and Local Intelligence Center, and the Federal Department of Homeland Security. The \$1,000,000 appropriated as one-time funding by the 67th Legislative Assembly was a good first step in correcting this deficiency. However, ongoing maintenance needs require consistent funding.

The known projects and lifecycle updates of building system components that are a priority for the 2023-25 biennium are projected at approximately \$1,300,000 (Exhibit A). This provides a useful estimate of the additional funds required on a continuing basis going forward.

The attachment labeled Exhibit B highlights the current high-cost environment. It gives recent examples of projects that were not awarded due to excessive cost. The table compares the Architect's cost estimate vs. the actual bid amounts contractors submitted on 7 and 8 September 2022.

Also for consideration is the fact that the NDNG added to, or built new, several facilities from 2015-2022. This equates to an additional 233,691 sq. ft. of facilities that require upkeep and repair. The Dickinson Readiness Center, scheduled to open in 2024, will add another 50,000 sq. ft. to that number.

Necessary resources for implementation (including FTE's)*: \$1,500,000 per biennium, recurring addition to base budget.

Are resources being redirected or are they new or additional (including FTE's)*: New resources required. The current funding level is insufficient.

Who is served and impact of not funding*: 3,000 National Guard (NG) Soldiers, NG state employees, DES and State Radio employees all benefit. This initiative translates into modern, efficient, and healthy work areas. Additionally, this will enhance National Guard readiness and response capability to state emergencies.

The impact of not funding is increased probability of catastrophic failure of building systems and equipment as well as increased chances of unsafe, undesirable, or unhealthy working conditions.

540 Adjutant General

Agency 540

Funding for STORM Act (Priority: 20)

	2023-25 Agency Request				2023-25 Executive Recommendation

Start Date (MM/DD/YYYY): 07/01/2023

End Date (MM/DD/YYYY): 06/30/2099

Description: Civil Air Patrol's #1 priority.

The Civil Air Patrol currently leases hangar space in Minot, ND. The lease was entered into in May 2018, and expires June 30, 2023. The individual who currently owns the hangar is no longer interested in owning the building, and wishes to sell. The lease agreement contains an Option to Purchase Provision and the Civil Air Patrol would like to execute.

It is critical to the Civil Air Patrol's mission that assets are located and maintained throughout the state of North Dakota. Civil Air Patrol has three primary missions: Aerospace Education, Cadet Programs and Emergency Services. Civil Air Patrol performs 95% of the nation's inland search and rescue, averages over 100 lives saved per year, performs aerial reconnaissance for homeland security, completes disaster-relief and damage assessment, provides transportation for time-sensitive medical materials and is tasked with counterdrug missions.

End Date (MM/DD/YYYY): 06/30/2025

Description: National Guard's #2 priority.

In Williston, we have recently moved from one city owned facility to another. This new rental facility is adequate for our training requirements, but it is a short-term fix, not a long-term solution. With the consolidation of the Engineer unit to Minot and the move of an Air Defense unit from Bismarck to Williston in the Fall of 2022, now is the time for a purpose-built training facility for this unit. The Air Defense unit currently has 63 members and 32 pieces of equipment, but through force design updates it is expected to grow by 20 personnel and additional equipment in the next 4-5 years. We request \$26,000,000 of state funding in our budget for the construction of this facility. The city of Williston has been a full partner in this venture providing land adjacent to the high school (which will aid in recruiting efforts) and installing the infrastructure to support the new Armory. Williston's total match for this project has been estimated at over \$6 million. Once completed in 2025, there will be three FTEs and a 50% state match for operations and maintenance of the building.

Agency 540

This request is for an additional lodging facility at Camp Grafton Training Center (CGTC). CGTC needs to ensure adequate support to a growing military and law enforcement customer demand. It is the goal of CGTC to develop Camp to be the premier federal and state training center. The construction of this facility would help bridge an 81 room lodging gap that currently exists. Once construction, the ongoing operations and maintenance of this facility would be supported with federal funds.

Description: National Guard's #10 priority.

During the 67th legislative assembly, the Office of the Adjutant General received authority to accept up to \$10,000,000 from other funds, including private and federal funds. These funds would be appropriated to the Adjutant General for the construction of a North Dakota military museum.

The Office of the Adjutant General is now requesting increased fundraising authority of \$40,000,000 for projected construction costs. The agency would like state matching dollars of \$20,000,000 to help construct the best state military museum in the nation. The North Dakota Military Museum has become a joint effort between the State Historical Society of North Dakota (SHSND) and the North Dakota National Guard (NDNG). Written support from the SHSND Board and Foundation has been received, along with approval from the Capitol Grounds Planning Committee. The NDNG Foundation contracted with PACE Fundraising to conduct a feasibility study as well.

State Initiative:* Emergency Response Support

Justification: Homeland Security's #2 priority.

The equipment listed here would be 100% federally funded, and would only be purchased if federal funds became available.

Under 37.17-1, NDDDES is designated as the lead agency for providing a statewide emergency management system embodying all aspects of prevention, mitigation, preparedness, response, and recovery. In order to enhance the agency's capability to meet this mandate, ND Department of Emergency Services (NDDDES) is requesting spending authority of \$660,00 for federal funds, should they be available for the purchase of the following equipment:

540 Adjutant General

Agency 540

1. \$210,000 – (\$10,000/region X 6 and \$150,000 NDDDES capability) If funds become available, the Department of Emergency Services intends to purchase equipment for up to 6 regional Unmanned Aerial System (UAS) Emergency Management Support Teams (EMST) as well as one system within the department to assist in preparing for, responding to, and recovering from emergencies and disasters.
2. \$275,000 – Purchase commercial geospatial Common Operating Picture (COP) software that integrates Computer Aided Dispatch (CAD), IP based camera systems, Internet of Things (IoT) sensors, with existing public safety data.
3. \$50,000 - Interactive Emergency Preparedness display
4. \$125,000 – (3) Generators to support emergency operations

Dickinson Readiness Center Start Up Equipment (Priority: 12)

Total					-	-	-	-	300,000	-	300,000	-	300,000

State Initiative:* State Facility Investment

Justification: National Guard's #1 priority.

This request is for one time start up costs for the Dickinson Readiness Center. The facility's construction was federally funded, but the operational costs are funded 50% federal and 50% general funds. The one-time start up cost of \$300,000 is for equipment such as mowers, snow removal equipment, as well as other implements and supplies for custodial and maintenance operations. This request was communicated during the 67th legislative assembly.

State Initiative:* Smart, Efficient Infrastructure

Explanation / Justification: Homeland Security's #4 priority.

Projected state share of Public Assistance and Hazard Mitigation payments to local subrecipients, increased Public Assistance payments to locals, and projected increases to federal awards through the Building Resilient Infrastructure and Communities grants.

State Initiative:* Health, Vibrant Communities

Explanation / Justification: National Guard's #7 priority.

540 Adjutant General

Agency 540

The Office of the Adjutant General - National Guard (NG) is requesting an increase in the ongoing base budget for city owned armory annual rent payments. The rental payments have not kept pace with increased operational costs. The last increase in rent was in 2016 at only \$1,188 per biennium.

Currently, the NG pays rent at seven locations throughout North Dakota (Dickinson, Jamestown, Williston, Edgeley, Lisbon, Wishek and Valley City). Six of the locations receive \$14,251/yr and the seventh location receives \$19,952/yr. The recommendation is for all armories to receive \$2/square foot for a total of \$585,692/biennium. The increased rate is an additional \$374,776/biennium. The new rate would help the local economies cover increased costs such as utilities.

Market analysis shows the average price per square foot for similar properties across the state is \$14/square foot/month.
