○ Indicates that this lens will be available in the near future.

- All new FD lenses are coated and their inner surfaces anti-reflection treated for optimum light transmission and color balance and maximum elimination of ghost and flare.
- The "L" designation of certain lenses indicates that the lens concerned is specially constructed to give extra high performance. This designation replaces the "aspherical" and "fluorite" designations used formerly.
- Extender FD 2X-B can be used with any FD lens with a focal length less than 300mm. Extender FD 2X-A is for any FD lens having a focal length of 100mm or longer.
- Extender FD 1.4A is for any FD lens having a focal length of 300mm or longer.

- Canon Extension Tubes FD 15-U, FD 25-U and FD 50-U can be used with any Canon FD lens having a focal length from 35mm to 200mm except for the FD 85mm f/1.2 S.S.C. ASPHERICAL and the FD 85mm f/1.2 L. The FD 15-U tube can also be used with FD 28mm lenses.
- Those lenses which take a 52mm filter may also be fitted with a 55mm screw-in filter by placing a 52-55 Step-Up Ring (optional) between the filter and lens.
- Lens length and weight do not include parts or accessories, such as cap, hood and tripod mount, which are not integral parts of the lens.

Subject to change without notice.
