The NVIDIA Quadro K1200 now includes a full-height bracket allowing it to be installed in any workstation, desktop, and mid-tower enclosure. With the supplied low-profile bracket even the most space constrained SFF compact system can be used.

512 CUDA cores and 4 GB of GDDR5 GPU memory with fast bandwidth enables your customers to create large, complex 3D models, and an all-new display engine drives up to four displays natively with DisplayPort 1.2 support for true 4K resolutions like 3840 x 2160 at 60 Hz with 30-bit color.

NVIDIA Quadro K1200 offers:

- Ability to be installed into a wide variety of computer system configurations
- 2x graphics performance advantage over competing products
- Large 4GB GDDR5 GPU memory capacity
- Excellent AutoCAD and SolidWorks advanced photorealistic rendering
- Superior CAD graphic performance for value line business PCs
- Support for four monitors including 4K displays
- Highest performance compact professional graphics board currently available
