

Improved Quality of Healthcare

Medical imaging technologies running on GPUs produce better, safer results in less time.

The 3D images produced by CT, ultrasound, MRI and PET scans are computationally intensive. GPUs use parallel processing to break down such complex computing problems into many smaller tasks that run simultaneously. This core capability is driving dramatic improvements across the spectrum of medical imaging technologies.

Healthcare Administration

Whether there are 300 or 3,000 devices, PNY works with health care providers to make sure they get the Mobile accessories they need at a price that stays within their budget.

PNY offers comprehensive visualization solutions to meet all your small to large scale medical market needs:

- NVIDIA® Quadro® Grayscale Products — Built for Diagnostic Imaging
- SSD - Reliable, enhanced performance and response time for complex computing applications

PNY Part #	Product Description
GRAPHICS	
VCQK2000D-PB	NVIDIA Quadro K2000D
SSD	
SSD9SC120GCDA-PB	Prevail SSD 120GB
SSD9SC240GCDA-PB	Prevail SSD 240GB
SSD9SC120GMDf-RB	XLR8 SSD 120GB
SSD9SC240GMDA-RB	XLR8 SSD 240GB
PowerPacks	
P-B-2600-1-S01-RB	PowerPack 2600
P-B-5200-12-S01-RB	PowerPack 5200
P-B-7800-12-S01-RB	PowerPack 7800
ThinkSafe™ Portable Locking Systems	
P-TSUL1-RB	Aluminum & Gunmetal-Laptops, Ultrabooks, & MacBooks
P-TSAL1-RB	Aluminum & Gunmetal-MacBooks & iMac
P-TSKL1-RB	ThinkSafe Keyed Laptop Locking System
