Abstract

The present study is an advance of a greater work about the botanist Armando Dugand Gnecco, considered the most important scientist native of Barranquilla city, and who during the 20th century, had national and international audience and visibility of scientific communities of the biological sciences that he practiced. This is a work of scientific biobibliography closely related to the tradition of the Social History of the science.

Keywords

Biology, neotropic botany, zoology, herpetology, ornithology, history.
