1. Introduction

1.1 The purpose of this document is to present data on the housing land supply in Redditch Borough, which contributes towards meeting the Borough's housing requirement. The housing requirement for Redditch Borough is for the construction and completion of 6400¹ dwellings between 1 April 2011 and 31 March 2030.

1.2 The information in this document shows the housing land supply position for Redditch Borough at 1 April 2022. This information is used to monitor the progress of meeting the housing requirement set out in the Borough of Redditch Local Plan No.4 (BORLP4), which was adopted in January 2017. Furthermore, this information will populate the Council's Authority Monitoring Report, which is published annually in December. It will also help the review of Local Plan policies, and provide background information for other strategic planning documents.

1.3 Paragraph 68 of the National Planning Policy Framework² (NPPF) highlights that local planning authorities should have a clear understanding of the land available in their area. Paragraph 74 of the NPPF states that '*... local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement...*' and paragraph 76 states that '*... local planning authorities should monitor progress in building out sites which have permission. ...*' .

1.4 The role of housing land monitoring is to:

- Ensure the maintenance of an adequate supply of both brownfield and greenfield land for housing and to enable its managed release;
- Assess the supply of affordable housing units;
- Track the effectiveness of Local Plan policies; and
- Contribute to the Borough's Authority Monitoring Report and the Department for Levelling-Up, Housing and Communities housing flow returns.

1.5 The Housing Land Supply document was re-designed in the monitoring year 2018-19 to provide a more streamlined and useful document. As such, some datasets won't have historic trend data.

1 As detailed in Policy 4 of the adopted Borough of Redditch Local Plan No. 4

2 The revised National Planning Policy Framework was updated on 20 July 2021

2. Housing Completions

2.1 This section details the completions to date which contribute to meeting the Borough’s housing requirement of 6400 dwellings up to 31 March 2030. For the Plan period (2011-2030) an average of 337 net completions per annum is required to meet the Borough’s housing requirement. Table 1 shows the housing delivery performance to date. For details of the sites which made contributions to the 2021/22 completions, see Appendices 1 and 2.

2.2 Redditch monitors the type and tenure of completions within the Borough every year from 1 April until 31 March in line with Policy 4 and Policy 6 of the BORLP4. Policy 6 states that “on sites of 11 or more dwellings (net), a 30% contribution towards the provision of affordable housing will be expected”. Table 2 provides details of all completed dwellings within the Borough from the beginning of the Plan period by tenure.

2.3 Table 3 identifies the number of dwellings by bed space which have been completed in each monitoring year. The total only reflects monitoring years 2018/19 to 2021/22, as including previous years in this total will give a false figure due to previous monitoring years being monitored in Net, and recent years monitored in Gross.

Brownfield/Greenfield

2.4 A core planning principle highlighted in the NPPF is to encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value.

2.5 Paragraph 119 of the NPPF explains *‘Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or ‘brownfield’ land.’*

2.6 The NPPF also states at paragraph 71 that planning authorities should consider the case for setting out policies to resist inappropriate development of residential gardens, for example where development would cause harm to the local area. The glossary of the NPPF also excludes land in built-up areas such as residential gardens as being part of the definition of ‘previously developed land’. As such garden land is classified as greenfield land.

2.7 Table 4 provides details of the total number of dwellings completed on brownfield and greenfield land for the period 1 April 2011 to 31 March 2022.

³ Prior to the monitoring year 2018/19, bed spaces were monitored as 4+ rather than 5+

2.8 Historically Redditch Borough has achieved high figures of housing built on brownfield land, with the 2018-19 monitoring year resulting in a dramatic decline of brownfield completions. The 2021-22 has seen an increase in the percentage of net completions being on brownfield land, due to several windfall sites being completed.

3. Provision of Affordable Housing

3.1 The provision of sufficient and high-quality affordable housing is one of the most discussed and relevant issues within Britain today, especially given the present housing market conditions, which are precluding many people from accessing housing.

3.2 Therefore, robust monitoring of the provision of affordable housing provides local authorities with an assessment of whether or not sufficient levels of affordable housing are being provided as a response to meeting their current housing needs. Policy 6 in the BORLP4 relates to affordable housing requirements within the Borough.

3.3 The total affordable housing completions in 2021/22 was 19 dwellings. This is lower than the last several years, although it does partly reflect the lower number of overall net completions. There are a further 1539 affordable housing commitments as of 1 April 2022.

3.4 For the breakdown of affordable completions by tenure, see Table 5. For the breakdowns of bed spaces for affordable dwellings from 2011/12 to 2021/22 see Table 6. Data for 2011/12 to 2017/18 was collected differently, which is why it isn't presented yearly.

4. Distribution of Housing Supply

4.1 Table 7 provides details of sites which are Under Construction (UC) and sites which are Not Started (NS) for this monitoring year, and completed sites for the 2018/19-2021/22 monitoring years by Ward. Data for the breakdown of completed dwellings by Wards has not been available for previous monitoring years prior to 2018/19.

4.2 Worcestershire Strategic Housing Market Assessment (SHMA) identified that Redditch’s housing requirements up to 2030 should be around 6,380 dwellings. The Redditch Strategic Housing Land Availability Assessment (SHLAA) identified that Redditch Borough only has the capacity to accommodate around 3000 dwellings within its own boundaries, leaving a shortfall of around 3400. Bromsgrove District Council and Redditch Borough Council worked together in accordance with the Duty to Cooperate to find preferred locations to accommodate this shortfall. Two sustainable mixed use urban extensions (Foxlydiate and Brockhill) were proposed in the Borough of Redditch Local Plan No. 4, adjacent to the west and north of Redditch’s urban area, which will deliver two new sustainable communities. Therefore, tables 7 and 8 also show data relating to the Cross Boundary Allocations within Bromsgrove District, as well as data by Ward.

Figure 1: Distribution of Housing Land by Ward 2021/2022

Distribution of Housing Land by Ward 2021/22 (% of Commitment)

5. Housing Commitments

5.1 This section details the housing commitments within the Borough. There are currently **230 dwellings under construction** (See Appendix 2) and **3864 dwellings which have not started** (See Appendices 2 and 3) which benefit from valid planning permission this monitoring year. This gives a total of **4094 net housing commitments** in RBC.

5.2 Deliverable is defined in the NPPF (2021) Glossary as:

“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”

5.3 As such, sites within Appendix 4 – Delivery Schedule, adhere to the NPPF and NPPG with regards to being deliverable sites. Evidence has been gathered for required sites to ensure that they should be included within the five year supply.

5.4 There is a total of eight allocated Deliverable sites within the Borough, which are identified in Table 9.

6. Housing Delivery Performance

6.1 The Housing Delivery Test (HDT), which was introduced in 2019, relates to the buffer element of the five year housing land supply (5YHLS) calculation and replaces the Housing Delivery Performance justification for the percentage buffer that needs to be applied. The size of the buffer to apply is set out in the NPPF (2021) at Paragraph 74 (a-c) and is reiterated in the Planning Practice Guidance. The purpose of including a buffer is to ensure choice and competition in the market for land.

6.2 The Council has disputed the methodology to determine the HDT outcome for Redditch Borough in relation to how cross boundary housing need is taken into account and the impact this has had on the Redditch HDT outcome. The Council will continue to apply a 5% buffer⁵ based on the 2017 to 2022 Housing Delivery and Housing Requirement calculation as follows:

Calculating the Housing Requirement

Year	Plan number	Household growth	Net unmet need*	Household growth plus unmet need	Lower of

7. Windfalls

7.1 The NPPF (paragraph 71) states ‘Where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends. Plans should consider the case for setting out policies to resist inappropriate development of residential gardens, for example where development would cause harm to the local area.’

7.2 The Glossary (NPPF, Annex 2), defines windfall sites as ‘sites not specifically identified in the development plan.’

7.3 Windfall development is monitored as part of the Housing Land Supply process in Redditch each year, and a detailed commentary and calculation method has been included previously in the Housing Land Supply documents.

7.4 It is expected that small sites will continue to come forward and make a contribution to the housing supply. In order to avoid double counting with the small site commitments, a windfall allowance for years 4 and 5 of the supply period only has been included. This assumes that any current small site commitments will either have been completed or lapsed over the forthcoming three year period.

7.5 At the examination into the Borough of Redditch Local Plan No. 4, the Inspector considered the appropriateness of the Council’s windfall allowance. He found in his Inspector’s Report (December 2016), at paragraph 70 that:

“No substantive challenge has been advanced in respect of the Council’s windfall assumptions: these appear to be appropriately based on the evidence.”

7.6 Therefore, a small site windfall allowance of **11 dwellings per annum** has been applied to the 5 year housing land supply calculations. This seems to be a conservative figure and therefore there is confidence that this level of windfalls can be sustained. Table 10 demonstrates the windfall completions since 1996/97 and shows that the average number of windfalls in this period is 11 dwellings per annum.

Table 10: Windfall completions for the years 1996/97 to 2019/20

295 / 26 years = 11.35 (rounded to 11 dwellings)

The windfall allowance for 2021/22 is 22.

11 x 2 years = 22. This number shall be used in the five year housing land supply.

8. Five Year Housing Land Supply 1 April 2022 to 31 March 2027

8.1 The NPPF (para 74) states that local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide five years' worth of housing against their housing requirements with an additional buffer to ensure choice and competition in the market for land.

8.2 The Borough of Redditch Local Plan No.4 became five years old on the 30th January 2022. Based on NPPF para 74 FN39, the 5YHLS is now based on the calculated Local Housing Need, not the housing requirement in the adopted Local Plan. Local Housing Need has been calculated using the Standard Method as set out in the NPPG.

8.3 The assessment below demonstrates that there is a five year supply of housing land in the Borough at 1 April 2022.

		Dwellings	Average per Annum
a	RBC Local Housing Need based on 2014 household projections and 2022 affordability ratio		156
b	Requirement for 5 years (1 April 2022 to 31 March 2027) (156 x 5) + 5% buffer ⁶	819	164 (rounded)
c	Net Commitments at 1 April 2022	1250	
d	Deliverable Sites (1 April 2022 to 31 March 2027)	278	
e	Windfall Allowance (11 x 2 years)	22	
f	Total Supply less 5 Year Requirement (c + d + e) – b	731	
g	Number of Years Supply (c + d + e) / 164	9.45 years supply	

8.4 The 5 year housing land supply calculation indicates that at 1 April 2022, Redditch Borough Council can demonstrate 9.45 years of deliverable housing land supply for the period 1 April 2022 to 31 March 2027.
