## THE ABC OF IIYAMA - how to find your perfect match?

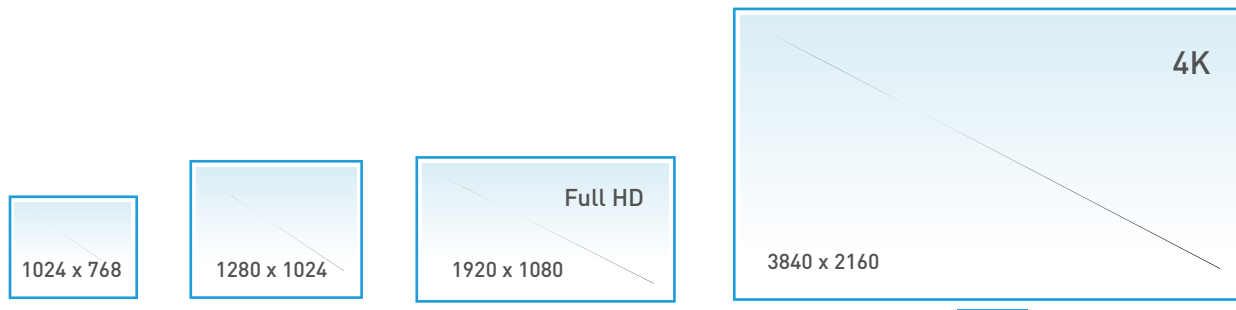

Panel type? Resolution? Touch technology? Orientation or anti-glare coating? - Our model names will tell you all about the basic specifications of each product. Below you will find a practical guide explaining how to read them.

TE 6568 MIS - B1AG

## SCREEN RESOLUTION

The screen resolution is the number of distinct pixels that can be displayed in width and height. The higher resolution, the more information can be accommodated on the screen.

### RESISTIVE MONITORS

The resistive touchscreens work with both finger and any input device which guarantees high accuracy level. The five wire resistive screens do not lose calibration over time. Durable robust design and an IP rated housing allow for installation in any kind of environment including industrial manufacturing, warehousing and retail.

### SURFACE ACOUSTIC WAVE (SAW) MONITORS

Touchscreens with the SAW technology have an additional glass layer on top of the panel which registers the touch through acoustic waves. They can be operated with the touch of a finger or with a special stylus.

This touch technology is very durable and is unaffected by scratches. SAW touchscreens are ideally suited for high-use environments such as retail or hospitality or in public areas and offer a great picture performance with high contrast and colour accuracy.

ProLite T2452MTS-B5

## OPTICAL MONITORS

The optical touch technology does not rely on an overlay or substrate to register a touch event, so it is impossible to physically 'wear out' the touchscreen. In fact, you don't really have to physically touch the screen. You just need to put your finger (gloved or not) or any kind of stylus very close to it. The optical technology ensures great picture performance. As there is no overlay or substrate on the screen the display characteristics remain virtually unaffected by the touch function.

### PROJECTIVE CAPACITIVE (PCAP) MONITORS

PCAP touchscreens work through a very low level electrical field on top of the panel with a glass overlay to register touch. This makes them very durable and the touch function is unaffected by scratches in the glass. PCAP touchscreens offer perfect picture performance and will work with finger, thin (latex) gloves and a special (conductive) stylus.

### iLFD-SERIES (INTERACTIVE LARGE FORMAT DISPLAYS)

Professional, solid and robust. Our interactive large format displays are available in different sizes (32" - 86") with either PCAP or Infrared multi-touch technology. Incorporating the best panel technologies, our screens feature high brightness, exceptional colour clarity and a clear and detailed image from all angles.

All our iLFD's are easy to use and ready out of the box with zero software restrictions and suited for extended use; up to 24/7 a day. They can operate with almost all devices and software currently on the market or function as a stand-alone solution just as easily.

They are available in Full HD (1920x1080) or with a 4K (3840x2160) resolution, with three possible orientations - landscape, portrait and face-up and with many other features that will help you in your day to day work.

Features can include an anti-glare coating that absorbs ambient light, reduces reflections and ensures image clarity even in brighter lit areas. An ambient light sensor that automatically adjusts the display's brightness to match the light level in the room. An Android operating system with free collaboration applications such as Note, the digital whiteboard application, ScreenSharePro and a media playback function for playing rich content directly on screen.

**EFFORTLESS CROSS-PLATFORM COLLABORATION; SHARE, STREAM AND EDIT CONTENT FROM ANY DEVICE DIRECTLY ON SCREEN.**

Transform your team meetings, lessons and presentations into an easy, fast and seamless cross-platform collaboration session with the additional WIFI module OWM001 and the free ScreenSharePro app. No more hassle of switching cables, or working with platform dependent connectors, passwords or different resolutions and inputs.

Simply download and install the ScreenSharePro app and up to 4 users can connect and show content from their device on the display simultaneously \*

The OWM001 is available for the 68-series interactive large format displays.

\* To use the ScreenSharePro app users need to be connected to the same (WIFI) network as the display.

### LFD-SERIES (LARGE FORMAT DISPLAYS)

iiyama's professional LFD's are available in different sizes (32"-55") and with different panels such as IPS, AMVA3 or VA. Our displays feature high brightness, exceptional colour clarity, a clear and detailed image from all angles and slim bezels.

Available in Full HD (1920x1080) or 4K UHD (3840x2160) resolutions, they are ideally suited to be used as digital signage and information displays in retail, business, education, transportation and healthcare. Landscape and portrait friendly, our LFD displays can be mounted according to the application for the most optimal fit, performance and maximum exposure; ensuring the best impact and effect.

Features (can) include PIP and PBP; perfect for video conferencing or handling multi-input content. Daisy chain function for use with multi-display set-ups such as videowalls. RJ45 and RS232c connections for controlling the display and content centrally through a network. An OPS slot and Media Playback function for a stand-alone solution.

#### Free CMS software

The 4K 40-series come with a free-to-use network content management system that allows you to create and control content on screen from one PC regardless of the location of the display.

#### PIP

PIP (Picture in picture) function allows you to watch images coming from two different sources at the same time.

#### Portrait / landscape

The entire 50, 52, 65 and 82 series displays of LFD's can be used in portrait or landscape mode; allowing them to be used in almost any digital signage configurations.

#### MAXIMUM IMPACT AND FLEXIBILITY

Give a boost to the visibility of your customers content with the eye-catching 700cd/m2 brightness 82-series large format displays; ideally suited for digital signage solutions that need to deliver maximum impact.

The slim design and ultra-thin metal bezel, IPS panel, 24/7 operating time and landscape and portrait orientation ensures optimal fit in almost any digital signage set-up, incl. multi-display set-ups, and in almost any environment; from sunny shopping malls to well-lit stores and venues.

### ONLINE PRODUCT CATALOGUE

We specialise in monitors. Our research and development is based on the concept of creating people friendly products while utilising the most up to date technologies. So whether you are looking for home or industry solutions, you can be sure our monitors ensure performance, reliability and user comfort you need.

Our catalogues are also available online:

Touchscreens & LFD catalogue:

### **iiyama**

iiyama stands for high level proven expertise in the monitor business, a versatile display portfolio, quality and outstanding customer service.

### **Values**

iiyama values customer relations, delivering trustworthy commercial advice to B2B clients and end-users allowing them to make informed purchase decisions. iiyama concentrates on manufacturing best quality, highly reliable screen solutions which minimize the environmental footprint and are in line with the latest technologies available.

### **Mission statement**

Taking the best from our heritage of one of the first brands involved in the display industry and combining it with Vision and Technology facing the future, it is iiyama's aim to continue to build the number one brand in the display solutions field.

We strive to maintain close, responsive and direct relations with our clients, as understanding our customers' needs and serving them with a professional support system is always at the core of our actions.

Ensuring our supply chains and staff are managed in ethical ways and reducing the environmental footprint, iiyama is strongly committed to the concept of business that is socially responsible and sustainable.
