RAID 5

Product Overview

For 4K and other bandwidth-hungry workflows, the LaCie 5big is the perfect solution. Thunderbolt 2 speeds, up to 30TB of capacity, and secure hardware RAID 5/6 bring the ideal combination of features for creative professionals. Additionally, the LaCie 5big features dual Thunderbolt ports and an effective cooling system for quiet operation and long-term reliability.

Use Cases

- **Digital Content Creation:** Thunderbolt 2 bandwidth gives creative pros enough bandwidth to shave time off their workflows. Post-production pros can work directly from RAW files in Apple® Final Cut Pro® or Adobe® Premiere®, getting full quality from footage and seeing edits in real time. Photographers will notice highly responsive browsing, even in archived libraries of thousands of RAW and edited images. And audio pros using Avid® Pro Tools® and other software will notice much smoother audio mixing.

- **Backup:** The combination of hardware RAID 5/6 and the Thunderbolt 2 I/O means incredibly fast backups, while providing excellent speed and capacity. And hot-swappable disks and efficient cooling ensure bulletproof data security.

- **Desktop Storage:** Speed, capacity of up to 30TB, and reliability make the LaCie 5big a perfect solution for storing both current and archived projects. These features also make this product a perfect way to expand capacity for the new Mac Pro®.
