Title: Edit Snapshot

Overview: This document will explain how to edit a snapshot in Trimble Access with a vision instrument.

Equipment: Trimble TSC3 w/Access, Trimble S7, Trimble S6 w/vision

<u>Results</u>: User can take snapshots with instrument and edit/label photos in the field. Which allows for note taking on the photo without carrying a field book, or having to remember why you took the photo.

Procedure: Step 1: Once you are in Trimble Access with a job started, click on the instrument icon.

Step 7: Once you tap draw the sidebar menu displays all the available functions

The pencil icon allows you to draw lines freely.
 2) The line icon draws straight lines
 3) The rectangular icon allows you to put a box around something

 4) The oval allows you to circle an object
 5) The T icon allows you to put a text box where you want
 6) The arrow is an undo button

Step 8: As you can see I have drawn arrows and created text boxes to label the photo.
