3979B Scrim Banner Vinyl 380 µ

Description

is a tensile strength banner with a block-out layer to prevent shine through. This water resistant, opaque, light and flexible PVC banner consists of a tear resistant polyester fabric which is embedded between two white vinyl layers. When using printers equipped with 'on board' cutters, cutter mechanism should be disabled due to the high tensile strength of the scrim vinyl substrate.

Features

Can be hung by grommets on the corners, or by 'pocketing' the top and bottom by sewing, welding, or use of double-sided tape. Heavy scrim gives outstanding tear and wind resistance. Designed for high ink limit, excellent white point, good scratch resistance without lamination. Waterfast with pigment inks. Won't crack, fade or peel outdoors, without lamination, (min) three months.

Applications

Free hanging indoor/outdoor banners, advertising, event signage, exhibitions and sporting events, point-of-purchase displays

Available widths

Article number	Width (mm)	Length (m)	Order Multiple	Mercury Code

Compatibility and profiles

Advised Driver / panel settings: Scrim Banner Vinyl / ScrimBannerVinyl
Refer for Onyx and other profiles to www.mediaguide.oce.com
Select your Canon printer to find matching media and media profiles.

Printing

For optimum results select the highest print quality.

Lamination

Lamination or spray overcoat recommended for outdoor use of longer duration, or in applications susceptible to dirt or abrasion.

Physical Properties

Weight	480 g/m ²
Calliper	380 microns
Tear resistance	>60 N

Storage Conditions

Store by 23°C and 50% relative humidity. Store material in original packaging until ready to use. Allow material to adapt to room conditions before use.

Media can absorb moisture in humid conditions or extend moisture in low humid conditions. High humid conditions make the ink dry longer. The packaging also protects against sunlight.

Shelf Life

1 year from shipping date when stored under ideal conditions (see above)
