

SeilerScope Binocular Microscope

The budget model microscope in the family of Seiler microscopes. Besides having all the features of other microscopes such as 4 flat-field achromat objectives including the 100x oil objective, mechanical stage, variable halogen illumination, the SeilerScope has a reversed nosepiece, a Seidentopf design binocular head, and also the ability to add plan achromat objectives. Accessories for video are also available.

5766-SXS820 [SeilerScope Binocular Microscope](#)

Seiler Microlux III Binocular

If you liked the Microlux II, you'll love the Microlux III. Made for heavy-duty usage in offices or office laboratories. Features continuously variable 12V 20W Halogen illumination, ball bearing nosepiece, coaxial coarse and fine focus mechanism, right hand graduated mechanical stage, two 10x wide-field eyepieces, 4 flat-field achromat objectives including the 100x oil objective. Includes an Abbe condenser with rack and pinion mount, protective cover and instruction manual. Front-to back dual-view accessory is available. Is UL Approved.

5766-SXSZ817 [Microlux III Binocular Microscope](#)

Seiler Westlab II Binocular Microscope

Economically priced routine microscope offering all the standard features of higher-priced scopes including halogen 6V 20W Halogen illumination, coaxial coarse and fine focusing, Seidentopf binocular head, right-hand graduated mechanical stage, 10x wide-field eyepieces and 4 semi-plan achromat objectives including 100x oil objective, all mounted on a ball-bearing reversed nosepiece. Simple Pol and video accessories are also available. One of our best sellers!

5766-SXSZ814 [Westlab II Binocular Microscope](#)

Seiler V3000 Binocular Microscope

A routine office microscope for those customers that enjoy a "German touch". Includes 4 flat-field achromat objectives, Kohler Halogen illumination, coaxial coarse and fine focus, graduated mechanical stage, rack and pinion condenser and ball bearing nosepiece. Side-to-side dual-view accessory and Polarized light accessory with first order red compensator are also available.

5766-S007312 [V3000 Binocular Microscope](#)

Seiler 202/402 ENT Surgery Microscope

We also have an office ENT Surgery Microscope, Model 202 and 402 series. These microscopes also have dual port halogen illumination, and 3 step magnification. Video accessories are also available. The 202 and 402 are economically priced, making them the perfect in-office microscope for doing tube procedures and ear wax removal. All Seiler microscopes come with a

Lifetime Warranty.

Seiler Revelation ENT Surgery Microscope

Our top-of-the-line ENT microscope is a revelation. It's called RevelationENT and comes with 5-magnifications, 3x, 5x, 8x, 13x, and 20x. Illumination is 15W 150W halogen with dual quick change lamps resulting in an uninterrupted procedure should one lamp fail. The RevelationENT offers coaxial (thru-the-lens) fiber optics and wide field 12.5x eyepieces with dioptic locks. Competitively priced, this microscope offers as accessories a second observer head, video and digital video attachments. Perfect for the office, hospital and clinic. Available with the straight or inclineable head

Cytette® Endocervical Sampling Brushes

Cytette® endocervical sampling brushes have a tapered head which simplifies introduction into stenotic cervixes. Soft nylon bristles increase cellular yield and improve specimen quality. The 7" serrated handle is easy to rotate, even while wearing gloves and is marked with a blue rotation indicator to ensure precise sampling.

Erie Microscope Slides

Microscope slides are made from highest purity, corrosion-resistant sheet glass, free of bubbles, stones and surface stria. The glass is fully annealed to minimize chipping and all edges are precision ground for smoothness and safety. Slides are ideally suited for use in hematology and histology and all general microscopy.

- | | |
|----------|------------------------|
| 2278-420 | Plain, 3" x 1" x 1mm |
| 2278-421 | Frosted, 3" x 1" x 1mm |

Superfrost®/ Colorfrost® Microscope Slides

Smooth opaque surface makes it easy to write on. The inert coating will not dissolve or loosen even under the most demanding conditions. Written key tells which side is up; eliminates wrong side staining. Raised coating keeps slides separated to prevent sticking and scratching. Colorfrost slides allow color coding by type of test, physician, etc. All slides are frosted on one end.

Boekel Microplate Incubator

The Boekel Microplate Incubator provides a reliable, cost effective way to incubate culture kits, microplates, petri dishes, and test tubes. It yields the most efficient use of space and is the least expensive incubator available. The heating element is located behind a panel in the back of the incubator, providing uniform heat, excellent utilization of space and eliminates the risk of scorching samples placed on the chamber floor. The incubator has an attractive smoked acrylic plastic door, a gray Kydex® outer body and a sturdy aluminum interior that makes clean up a breeze. Comes supplied with flat plastic Digitemp® thermometer attached to the interior floor.

- 0878-260700 Microplate Incubator, 7-3/4" W x 6-1/2" D x 6-1/4" H
- 0878-3135400V Mini-Rack for 13 mm Test Tubes, 54 Place
- 0878-3163500V Mini-Rack for 16 mm Test Tubes, 35 Place
- 0878-3202400V Mini-Rack for 20 mm Test Tubes, 24 Place

Boekel 132000 Incubator

The need for an inexpensive, roomy, and feature loaded incubator has made this one of our most popular models. Its large capacity can handle all of the incubator requirements of the busiest physician's office, while the attractive styling, excellent performance and unbeatable price make it welcome in any lab. The Boekel Incubator Model 132000 has a see-through acrylic door, magnetic door latch, pilot light and On/Off switch. It is supplied with a spirit filled thermometer, an integral bottom shelf, plus an adjustable shelf.

- 0878-132000 Incubator, w/See-Through Door, Interior: 12" D x 10-1/2" H x 11-1/2" W

Lab-Line Imperial III Standard Incubators

These incubators combine the advantages of radiant warm wall heat with the convenience of LED temperature display LED continuously displays chamber temperature. All controls and displays are at eye level. Tempered glass inner door allows visual inspection of samples without affecting chamber environment.

- 3776-LLI302 Imperial III, 2.6 cu. ft., 2 shelves
- 3776-LLI305 Imperial III, 5.2 cu. ft., 3 shelves
- 3776-LLI310 Imperial III, 11.2 cu. ft., 6 shelves

Lab-Line L-C Incubators

These general laboratory incubators utilize radiant warm wall heating to maximize temperature uniformity. The hydraulic thermostat responds quickly to temperature changes, and a pilot light indicates when the unit is in operation. You can remove the perforated aluminum shelves easily for cleaning. Three-wire line cord with plug is included.

- 3776-LLI203 L-C Incubator, 1.3 cu. ft., 2 shelves
- 3776-LLI403 L-C Incubator, 5.1 cu. ft., 2 shelves

Calgiswab® Specimen Swabs

Made of pure calcium alginate fibers, swabs permit recovery of pathogens twice as readily as cotton. Contain no fatty acids which may inhibit microorganism growth. Swabs can be autoclaved or cold sterilized, and are neither irritating nor sensitizing.

All shafts are 6" long unless otherwise stated.

Aluminum Shaft, Type 1

Thin aluminum wire shaft with .035" diameter gently follows contour of aural, nasal or urethral passages with virtually no patient discomfort or injury to delicate tissue.

3022-25-800A Sterile 1's, 100/pkg, 1000/cs

Wood Shaft, Type 2

Recommended when a rigid shaft is desired for throat cultures or specimen recovery from industrial surfaces.

3022-806-WASM Non-Sterile, 100/bg, 10 bgs/bx, 5bx/cs

3022-25-8061WA Sterile 1's, 1/pkg, 100 pkg/bx, 10bx/cs

3022-25-8062WA Sterile 2's, 2/pkg, 200 pkg/bx, 10bx/cs

Plastic Shaft, Type 3

Semi-flexible shaft is ideally suited for obtaining specimens from throat and industrial surfaces. Also for routine gynecological screening.

3022-806-PASM Non-Sterile, 100 bgs/bx, 5 bx/cs

3022-25-8061PA Sterile 1's, 1/pkg, 100 pkg/bx, 10bx/cs

3022-25-8062PA Sterile 2's, 2/pkg, 200 pkg/bx, 10bx/cs

Ultrafine Aluminum Shaft, Type 4

Made with aluminum shaft .025" in diameter. Allows for even greater patient comfort when obtaining specimens from aural, nasal or urethral canals. Helps to eliminate post-sampling urethritis in VD screening.

3022-25-801A Sterile 1's, 1/pkg, 100 pkg/bx, 10bx/cs

Specialty Swabs

Made with flexible shafts, available with rayon, polyester or cotton fibers for a variety of applications. All are made in accordance with USP specifications.

Rayswab® Type 1

Made from pure spun white rayon; contains no fatty acids. High absorption capacity makes Rayswab particularly useful for specimens having low sample populations.

3022-25-800R Sterile 1's, 1/pkg, 100 pkg/bx, 10bx/cs

Polyester Types 1 and 3

For recovery of herpes simplex virus. Swab's small head size allows Type 2 HSV to be recovered more reliably from patients with single or multiple small lesions. Available with aluminum, stainless steel or plastic shafts.

3022-25-800D Sterile 1's, Aluminum, 1/pkg, 100 pkg/bx, 10bx/cs

3022-25-8061PD Sterile 1's, Plastic, 1/pkg, 100pkg/bx, 10bx/cs

Quality Control (QC) Organisms

Culti-Loops® (Remel) and Culti-Swabs (Gibson) are the perfect source of organisms for your CLIA needs. Organisms are lyophilized on the end of the loop/swab for immediate use including throat, sensitivity and N.gonorrhoeae testing. Culti-Swabs are an economical alternative (generally 10-20% less than Culti-Loops).

6435-4606500	Staphylococcus epidermidis (12228)
6435-QC06500	Staphylococcus epidermidis (12228)

Please Note: There is a minimum order of two five-packs. There will be a freight charge added to each Culti-Loops® order to cover shipping and hazardous material handling from Louisiana.

Culture Media in Plates & Tubes

100mm x 15mm Monoplates, 10/Pkg

6435-1014	Blood Agar (TSA 5% Sheep Blood)
6435-1003	Biggy Agar
6435-1016	Levine EMB Agar
6435-1006	MacConkey Agar
6435-1007	Mannitol Salt Agar
6435-1008	Mueller Hinton Medium
6435-1009	Mueller Hinton Medium w/ Blood
6435-1013	Thayer Martin Agar
6435-SS100	Selective Strep Agar

100mm x 15mm Bi, Tri & Quad Plates, 10/Pkg

6435-2001	TSA5% / EMB
6435-2000	TSA5% / MacConkey
6435-2110	Cled / EMB
6435-2051	Cled / Mueller Hinton
6435-3001	TSA5% / EMB / Staph Select
6435-4000	TSA5% / EMB / Staph / Mycosel
6435-4001NF	TSA5% / EMB / XLD / Simmons

16mm x 125mm Tubed Media, 10/Pkg

6435-6000	Biggy Agar Slants, 20/Box
6435-6019	Thioglycollate with Indicator
6435-6020	Thioglycollate without Indicator
6435-6035	Tryptic Soy Broth, 5ml
6435-6007	Brain Heart Infusion Agar Slants
6435-6005	Brain Heart Infusion Broth, 5ml
6435-6039	Trichomonas Broth
6435-6025	Sabouraud Dextrose Agar Slants

Fungal Vials, 20/Pkg

6435-7051	DTM Agar Vials
6435-7050	Mycosel Agar Vials
6435-7050A	Sabouraud Agar Vials
6435-7052	Biggy Agar Vials

Bacti Plate® Systems

A culture and sensitivity system similar to the Bullseye™ System, the Bacti Plate® is available in our Bacti Star® Plate octagon-shape as well as our Bacti Plate® rectangular version. Each kit contains 10 of the following: culture/sensitivity plates, sterile applicator swabs, patient report slips, and sterile inoculating loops (.001 calibrated). Available in several combinations including"

6435-PS100	Bacti Urine® System, 10 tests
6435-PS300	Bacti Vaginal System, 10 tests
6435-PS400	Bacti General® System, 10 tests
6435-SP500	Bacti Star Urine® System, 10 tests
6435-SP600	Bacti Star Vaginal® System, 10 tests

Quidel QuickVue® Chlamydia

Results in 12 minutes, or less. 92% sensitivity, 98.6% specificity. Simple extraction procedure requires the addition of only two reagents to extract the chlamydia antigen from an endocervical swab or cytology brush specimen. Controls included in kit. Store at room temperature.

5293-0B006 QuickVue® Chlamydia, 25/kit

Quidel QuickVue® Influenza

Immunoassay for the qualitative detection of influenza type A and B viral antigens. 3 steps nasal swab/1 step nasal wash/aspirate, 1 reagent, 10 minutes to results, this test takes less than 30 seconds hands on time. Kit contains patient swabs, positive and negative controls and is stored at room temperature. CLIA-waived. The 10-test kit is conveniently packaged for single-use testing and disposal. The 25-test kit offers bulk packaging that is ideal for batch testing.

5293-00324 QuickVue® Influenza test, 10 test kit
5293-00317 QuickVue® Influenza test, 25 test kit

Quidel QuickVue® Influenza A & B

Immunoassay for the differential detection of influenza type A and B. 3 steps nasal swab/1 step nasal wash/aspirate, 1 reagent, 10 minutes to results, this test takes less than 30 seconds hands on time. Kit contains patient swabs, positive and negative controls and is stored at room temperature. CLIA-waived.

5293-20183 QuickVue® Influenza A & B, 25 test kit

Immunostics Detector Strep A Direct™

For the qualitative detection of Strep A antigen from throat swab to aid in the diagnosis of Group A streptococcal infection. (cassette test)

3350-ILSTREP-25 25 Test Kit

Immunostics immuno/STREP A Detector™

A qualitative immuno-assay for the detection of Strep A antigen from direct throat swab. (dipstick test)

3350-IDSTREP-25 25 Test Kit

Quidel QuickVue® Dipstick Strep A

Allows for the rapid qualitative detection of Group A Streptococcal antigen directly from patient throat swab specimens or confirmation of presumptive Group A

Streptococcal colonies from culture. The dipstick format allows for an easy-to-handle, off-line extraction process with 92% sensitivity and 98% specificity. Two-color results give clear readability and the proven accuracy of QuickVue provides dependable results. The kit stores at room temperature and includes positive and negative controls. CLIA-waived.

5293-20108 QuickVue® Dipstick Strep A, 50/kit

Quidel QuickVue In-Line® Strep A

The unique in-line extraction and easy procedure allow point of care testing. Each kit contains positive and negative controls and stores at room temperature. CLIA-waived. Specificity is 99%, sensitivity is 92% and overall agreement to culture is 96%.

5293-00343 QuickVue In-Line® Strep A, 25/kit

Quidel QuickVue+® Strep A

Clearly distinguishable +/- endpoint and two reagent extraction make testing easy for anyone in your office or lab. A Test Complete indicator appears in about 5 minutes to let you know the test can be read. Overall accuracy of the test is 98%, with a sensitivity of 95% and specificity of 98%. The built-in controls satisfy CLIA requirements for daily QC. The kit stores at room temperature and contains positive and negative external controls.

5293-20122 QuickVue+® Strep A test kit, 25 test kit

Other Selective Strep Medium

Preferred by offices that want to detect Group A strep but do not want other interfering organisms growing at the same time. Allows the physician office to remain moderately complex under CLIA-88.

6435-SS100 Selective Strep Agar (100mm)
6435-ST101 Selective Strep Agar w/ SXT (100mm)
Selective media for Group A & B beta-hemolytic strep. Does not need the CO2 environment.

Quidel QuickVue+® One-Step hCG Combo

Plus/minus result in 3 minutes for urine and 5 minutes for serum. Sensitivity of 20mIU/mL in urine and 10 mIU/mL in serum, >99% sensitivity and

specificity. This simple, accurate and convenient test as an aid in the early detection of pregnancy requires just 4 drops of serum or urine and yields a 2-color plus or minus sign, for clearly distinguishable results. CLIA-waived for urine; CLIA moderately complex for serum.

5293-00178 QuickVue+® One-Step hCG Combo, 30 test kit
5293-00179 QuickVue+® One-Step hCG Combo, 90 test kit

Quidel QuickVue® One-Step hCG Tests

Detects 25 mIU/mL and greater hCG in urine. Detects pregnancy as early as 3 days before expected menses. Two-color result differentiates patient result from control line. Combo version works with serum or urine with 25 mIU/mL sensitivity in urine and serum. CLIA-waived for urine; CLIA moderately complex for serum.

5293-20109 QuickVue® One-Step hCG Urine, 25 mIU/mL, 25/kit
5293-20110 QuickVue® One-Step hCG Combo, 25 mIU/mL urine and serum, 50/kit
5293-00177 QuickVue® Semi-Q™ hCG Combo, 20 mIU/mL urine/10 mIU/mL serum, 50/kit
5293-00272 hCG control set, set
5293-00281 hCG-serum control set

Quidel RapidVue® hCG Urine

Fast time to results. Dipstick convenience. Detects 25 mIU/mL or greater hCG in patient's urine sample. Dip the test strip into the sample for 10 seconds, remove and place strip on a flat dry surface. Read results at 3 minutes.

Some positive results may appear as soon as one minute. Box contains 25 individually pouched strips for a fresh strip every time. Store at room temperature. CLIA-waived.

5293-00257 RapidVue® hCG Urine, 25/kit

Immunostics immuno/hCG detector™

A simple-to-use, urine only, pregnancy test that will answer this most personal of questions within 5 minutes. The test is supplied with all of the components necessary to perform an assay; the all-in-one test device and a micropipet, packaged with desiccant in a moisture-proof foil pouch. Individually wrapped packages, shipped 25, 50, 100 to a box. (cassette test)

3350-HD-25 25 Test 3350-HD-50 50 Test
3350-HD-100 100 Test

Immunostics immuno/hCG detector stix™

For a rapid, economical detection of pregnancy in volume. Packed in a moisture-proof foil pouch, the stick is dipped in the first morning urine and allows to develop for five minutes. Available in individually wrapped tests. (dipstick test)

3350-HS-25 25 Test
3350-HS-50 50 Test
3350-HS-100 100 Test

Immunostics immuno/Detector *H. pylori*™

A qualitative immunoassay for the detection of Anti-Helicobacter pylori Antibody in Whole Blood or Serum/Plasma. (cassette test) CLIA waived for Whole Blood.

3350-IHP-10 10 Test

Quidel QuickVue® *H. pylori* gII™

For the qualitative detection of IgG antibodies to *Helicobacter pylori*. One-step ease of use: less than one minute hands-on time. Whole blood, serum or plasma samples can be used. 90% sensitivity, 84% overall agreement.

Positive and negative controls included in kit. Room temperature storage. CLIA-waived for whole blood; CLIA moderately complex for serum and plasma.

5293-0W009 QuickVue® *H. pylori* gII™, 10 Test Kit
5293-0W010 QuickVue® *H. pylori* gII™, 30 Test Kit

Immunostics STAPHACOL™

A color enhanced, easy-to-read, latex slide test for the presence of coagulase and Protein-A associated with *Staphylococcus aureus*.

3350-STP-50 50 Tests
3350-STP-100 100 Tests

Quidel QuickVue Advance® *G. vaginalis*

The QuickVue Advance *G. vaginalis* test is an enzyme activity test for use in the detection of *Gardnerella vaginalis*

Proline IminoPeptidase (PIP) activity in vaginal fluid specimens for indication of bacterial vaginosis. The test is precise and as small and thin as a credit card. The simple test procedure can be done from a single sample and the Rub 'n Read™ format gives results right on the specimen swab. Results can be read within 5 minutes. 25 test per kit. CLIA moderately complex.

5293-20145 QuickVue Advance® *G. vaginalis* test, 25/kit

Quidel QuickVue Advance® pH and Amines

The QuickVue® Advance pH and Amines test aids in the clinical evaluation of infectious vaginitis.

The test contains two qualitative, colorimetric tests for use in the characterization of a vaginal fluid sample: a pH test and a test that detects alkali volatile amines in vaginal fluid. The test is precise and as small and thin as a credit card. In conjunction with the clinical evaluation of the vaginal fluid, 3 of the 4 Amsel criteria will be assessed. Results for both tests can be read within 2 minutes. CLIA-waived. 25 tests per kit

5293-21046 QuickVue Advance® pH and Amines test, 25/kit

Immunostics immuno/lex-aso™

Two minute latex slide agglutination test for the qualitative and semi-qualitative determination of Antistreptolysin O Antibodies in serum. Useful in determining infections caused by B-hemolytic streptococci.

3350-aSO-50 50 Test
3350-aSO-100 100 Test

Immunostics immuno/lex-im™

A simple, two-minute latex agglutination format procedure for the specific detection of the Infectious Mononucleosis heterophile antibody in Plasma or Serum.

3350-IMLX-50 50 Test
3350-IMLX-100 100 Test

Immunostics immuno/color-im™

A simple, one-minute, single reagent color enhanced slide test for the detection of Infectious Mononucleosis in Plasma or Serum.

3350-IMC-50 50 Test
3350-IMC-100 100 Test

Immunostics MONOCOL™

Color change hemaagglutination test for the detection of Heterophile Antibodies associated with Infectious Mononucleosis in Plasma or Serum.

3350-IMM-50 50 Test
3350-IMM-100 100 Test

Immunostics MONOCOL/lex™

Color change latex test for the detection of Heterophile Antibodies associated with Infectious Mononucleosis in Plasma or Serum.

3350-MCLX-50 50 Test
3350-MCLX-100 100 Test

Immunostics immuno/Detector MONO™

A qualitative immunoassay for the detection of Infectious Mononucleosis Heterophile Antibodies in Whole Blood, Serum or Plasma. (test cassette) CLIA waived for Whole Blood

3350-IDM-25 25 Tests

Quidel QuickVue+® Infectious Mononucleosis test

Designed to detect the IgM heterophile antibodies in serum, plasma or whole blood. The assay utilizes an extract of erythrocytes which give a greater sensitivity and specificity than similar extracts prepared from sheep and horse erythrocytes. Clearly distinguishable plus/minus result and accompanying pictorial procedure card make testing and interpretation easy. Overall accuracy of the test is >99% sensitivity and specificity when compared to EIA. The kit contains positive and negative controls and stores at room temperature. CLIA-waived for whole blood; CLIA moderately complex for serum and plasma.

5293-20121 QuickVue+® Infectious Mononucleosis test, 20 test kit

Immunostics HEPACOL™

A simple, five minute color change latex slide agglutination test for the specific detection of Hepatitis B Surface Antigen in Serum. For export only.

3350-HEP-50 50 Test 3350-HEP-100 100 Test

Immunostics immuno/ra™

A one-minute qualitative screening and semi-quantitative test for the determination of Rheumatoid Arthritis Factors in Serum.

Reagent requires a patient specimen dilution of 1:20 prior to use.
3350-RA-50 50 Test 3350-RA-100 100 Test

Immunostics immuno/lex-ra™

A one-minute, qualitative screening and semi-quantitative test for the determination of Rheumatoid Arthritis Factors in Serum. No patient specimen dilution is required.

3350-RA-50U 50 Test
3350-RA-100U 100 Test

Immunostics immuno/lex-sle™

A two-minute, latex slide agglutination test for use in the detection of serum antinucleoprotein factors associated with Systemic Lupus Erythematosus.

3350-sLE-25 25 Test 3350-sLE-50 50 Test
3350-sLE-100 100 Test

Immunostics RHEUMACOL™

Color change hemagglutination test for the detection of Rheumatoid Factor in Serum.

3350-RH-50 50 Tests
3350-RH-100 100 Tests

Immunostics RHEUMACOL/lex™

Color change latex for the detection of Rheumatoid Factor in Serum.

3350-RHLX-50 50 Tests
3350-RHLX-100 100 Tests

Immunostics immuno/lex-crp™

Two minute latex agglutination test for the qualitative and semi-quantitative determination of C-Reactive Protein in Serum. Useful in the diagnosis of diseases characterized by acute inflammation.

3350-CRP-50 50 Test
3350-CRP-100 100 Test

Immunostics C. REACTACOL™

Color change latex for the detection of C-Reactive Protein in Serum.

3350-CRC-50 50 Tests
3350-CRC-100 100 Tests

Hemocult II® Dispens-a-pak™ Plus

Serial Test for Routine
Screening for Fecal Occult

Blood. Box of 40 Patient Kits and two 15ml bottles of developer.
Each Patient Kit contains:

- 3 Hemocult II® Slides
- 3 Flushable Sample Collection Tissues
- 3 Applicators
- 1 Barrier Mailing Pouch
- 1 Illustrated Test and Diet Instructions
- 1 Patient Pamphlet

5890-61130 Hemocult II® Dispens-a-pak™ Plus

Hemocult® Single Slides

Each box contains: 100 Hemocult® Single Slides, Two 15ml

Bottles of developer, 100 Applicators

5890-64151 Hemocult® Single Slides

Hemocult II® SENSEA® Dispens-a-pak™ Plus

Test for Enhanced Detection of Fecal Occult Blood. Box of 40
Patient Kits and two 15ml bottles of developer. Each Patient Kit
contains:

- 3 Hemocult II® SENSEA® Slides
- 3 Flushable Sample Collection Tissues
- 3 Applicators
- 1 Barrier Mailing Pouch
- 1 Illustrated Test and Diet Instructions
- 1 Patient Pamphlet

5890-64130 Hemocult II® SENSEA® Dispens-a-pak™ Plus

Hemocult® SENSEA® Single Slides

Each box contains: 100 Hemocult® SENSEA® Single Slides, Two

15ml Bottles of developer, 100 Applicators

5890-60151 Hemocult® Single Slides

Seracult® Fecal Occult Tests

Seracult guaiac tests provide reliable detection of 90% of bleeding colorectal cancers. They are designed for use in routine physical examinations in doctor's offices, hospitals, clinics and laboratories. Seracult® tests are easy to use by examiner or patient. The front flap opens for specimen smear, the back flap opens for development. Each test includes a Performance Control Area that provides verification of each slide's performance. Seracult guaiac tests are capable of detecting 0.03 ml drop of blood in a 1:20,000 dilution (blood to water). For greater sensitivity, use Seracult Plus® slides to detect hemoglobin as low as 0.32 mgHb/100 ml (d. i. water). Both tests are available in single and triple slide versions, and in approved mailing kits for convenient specimen collection by patient.

Uri-check™

Uri-Check™ is a cost effective alternative to Uri Cult™ (MTC, Inc.). It is a semi quantitative dip slide culture system for the screening and early detection of urinary tract infections. Room temperature storage. A color chart is available to aid in both identification and determining a urine count. CLED Agar allows growth of both gram positive and gram negative organisms. The addition of Polymyxin B to CLED Agar allows only gram positive organisms to grow. MacConkey Agar and EMB are two similar agars that are selective for gram negative organisms. 10 Test kit.

6435-3000UC

Uri-Check™ Plus Cled/EMB, Box/10

6435-9000UC

Uri-Check™ Cled w Polymixin B
MacConkey w/Crystal Violet, Box/10

Immunostics hema screen™

A rapid, convenient, qualitative method for detecting asymptomatic occult bleeding. The single slides are convenient, cost-effective and can easily be transported to the clinical laboratory for inspection. hema screen™ Patient Packs are the method of choice for use in the home, or in any environment where serial assays must be forwarded to another location for interpretation. The Patient Pack includes specially designed envelopes to facilitate mailing to the physician and/or laboratory. hema screen™ slides contain two patient test sites with on-slide positive and negative controls. All kits shipped complete with: Developing Solution, Wood Applicators, Mailing Envelopes (Patient Packs Only), Simple Products Instructions, Three Year Shelf Life.

3350-HS-50	50 Tests (single slides)
3350-HS-100	100 Tests (single slides)
3350-HSPP-50	Patient Pack (50 triple slides)
3350-HSDV-8	Developer (8 x 10ml)
3350-HS-34	34 triple slides no mailing envelopes
3350-HS-1000	1000 single slides
3350-HSTAT-50	50 slides w/pull tab developer (no separate bottle of developer necessary)

Immunostics hema-screen™ SPECIFIC

hema-screen™ SPECIFIC, an Immunochemical Fecal Occult Blood Test (FOBT), is a rapid, convenient qualitative immunoassay for the determination of human hemoglobin in feces, a vital tool in the diagnosis and therapy of gastrointestinal disorders. hema-screen™ SPECIFIC features an innovative sampling method that utilizes one card for collection of two (2) specimens of feces and ONLY one immunochemical specimen preparation tube/test cassette system for analysis.

3350-HSSP-25	25 Tests
3350-HSSPENV-20	20 mailing envelopes with collection cards
3350-HSSPCAS-10	10 Test cassettes with buffer preparation tubes

The Products Listed In This Catalogue Represent Only A Portion Of Those Available. Please Call Our Office Or See Your Sales Representative.

NERL Occult Blood Control

- Only commercial external control available
 - Works on most popular tests in the market
 - Control material has the consistency of patient sample
 - 60-day room temperature storage
 - 1-year shelf life 2-8° C
 - Easy dropper bottle application
 - Comes in 2 levels, negative and positive in 1.5ml vials
- 1757-FEC5000-1 Occult Blood Control

Immunostics Drugs of Abuse Test Kits

Detector Drug Key Cup

A cup collection system for the screening of multiple drugs and drug metabolites in human urine

- Sample is kept intact to send to a lab for confirmation
- 3C & 5C cup are CLIA Waived
- Includes temperature strip
- Individually foil pouched

3350-DOACUP-3	single cup for COC, MAMP, THC
3350-DOACUP-3C	single cup for COC, MAMP, THC
3350-DOACUP-4	single cup for COC, MAMP, THC, OPI
3350-DOACUP-5	single cup for COC, AMP, MAMP, THC, OPI
3350-DOACUP-5C	single cup for COC, AMP, MAMP, THC, OPI
3350-DOACUP-6	single cup for COC, AMP, MAMP, THC, OPI, BZO
3350-DOACUP-10	single cup for COC, AMP, MAMP, THC, OPI, PCP, BAR, BZO, MTD, MDMA

Detector Drug Dip Card

A dipstick for the screening of multiple drugs and drug metabolites in human urine. Individually foil pouched.

3350-DOADIP-2	single dipcard for COC, THC
3350-DOADIP-3	single dipcard for COC, MAMP, THC
3350-DOADIP-4	single dipcard for COC, MAMP, THC, OPI
3350-DOADIP-5	single dipcard for COC, AMP, MAMP, THC, OPI
3350-DOADIP-6	single dipcard for COC, AMP, MAMP, THC, OPI, BZO
3350-DOADIP-10	single dipcard for COC, AMP, MAMP, THC, OPI, PCP, BAR, BZO, MTD, MDMA

Bayer Urinalysis Strips/Tablets

Acetest® Reagent Tablets

Tablet test for ketones in urine.

0662-2381 100/btl

Albustix® Reagent Strips

Dip-and-read test for protein in urine.

0662-2191 100/btl

Azostix® Reagent Strips

60 second test for blood urea nitrogen.

0662-2830 25/btl

Bili-Labstix® Reagent Strips

Dip-and-read test for pH, protein, glucose, ketone, bilirubin, and blood in urine.

0662-2180 100/btl

Chek-Stix® Urinalysis Control Strips

Positive control strips for urinalysis.

0662-1360 25/btl

Chek-Stix® Combo Pak

Urinalysis Control Strips

Positive and negative control strips for urinalysis.

0662-1364 25/btl

Clinistix® Reagent Strips

Dip-and-read test for glucose in urine.

0662-2844 50/btl

Clinitest® Reagent Tablets

Test for urine sugar.

0662-2159 100/btl

0662-2127 36/btl, Child Resistant Cap

0662-2126 100/btl, Child Resistant Cap

Clinitest® Set

Urine sugar analysis set with bottle of 36 tablets, 1 test tube, 1 dropper and child resistant cap.

0662-2128 Clinitest Set

Combistix® Reagent Strips

Dip-and-read test for protein, glucose and pH in urine.

0662-2183 100/btl

Diastix® Reagent Strips

Dip-and-read test for glucose in urine.

0662-2806 50/btl 0662-2803 100/btl

Hema-Combistix® Reagent Strips

Dip-and-read test for blood, protein, glucose and pH in urine.

0662-2182 100/btl

Hemastix® Reagent Strips

Dip-and-read test for blood in urine.

0662-2190 50/btl

Ictotest® Reagent Tablets

Test for bilirubin in urine.

0662-2591 100/btl

Keto-Diastix® Reagent Strips

Dip-and-read test for glucose and ketone in urine.

0662-2883 50/btl 0662-2882 100/btl

Ketostix® Reagent Strips

Dip-and-read test for ketone in urine.

0662-2640 20/btl 0662-2880 50/btl
0662-2881 100/btl

Labstix® Reagent Strips

Dip-and-read test for blood, ketone, glucose, protein, and pH in urine.

0662-2181 100/btl

Multistix® 10 SG Reagent Strips

Dip-and-read test for glucose, bilirubin, ketone, specific gravity, blood, pH, protein, urobilinogen, nitrite, leukocyte.

0662-2161 100/btl

Multistix® 9 Reagent Strips

Dip-and-read test for glucose, bilirubin, ketone, blood, pH, protein, urobilinogen, nitrite and leukocytes in urine.

0662-2162 100/btl

Multistix® 9 SG Reagent Strips

Dip-and-read test for glucose, bilirubin, ketone, specific gravity, blood, pH, protein, nitrite and leukocytes in urine.

0662-2163 100/btl

Multistix® 8 SG Reagent Strips

Dip-and-read test for glucose, ketone, specific gravity, blood, pH, protein, nitrite and leukocytes in urine.

0662-2164 100/btl

Multistix® 7 Reagent Strips

Dip-and-read test for glucose, ketone, blood, pH, protein, nitrite and leukocytes in urine.

0662-2165 100/btl

Multistix® 2 Reagent Strips

Dip-and-read test for nitrite and leukocytes in urine.

0662-2168 100/btl

Multistix® Reagent Strips

Dip-and-read test for pH, protein, glucose, ketone, bilirubin, blood and urobilinogen in urine.

0662-2179 100/btl

Multistix® SG Reagent Strips

Dip-and-read test for specific gravity, pH, protein, glucose, ketone, bilirubin, blood and urobilinogen in urine.

0662-2177 100 btl

N-Multistix® Reagent Strips

Dip-and-read test for pH, protein, glucose, ketone, bilirubin, blood, nitrite and urobilinogen in urine.

0662-2178 100/btl

N-Multistix® SG Reagent Strips

Dip-and-read test for specific gravity, pH, protein, glucose, ketone, bilirubin, blood, nitrite and urobilinogen in urine.

0662-2176 100/btl

Uristix® 4 Reagent Strips

Dip-and-read test for glucose, protein, nitrite, and leukocytes in urine.

0662-2166 100/btl

Uristix® Reagent Strips

Dip-and-read test for protein and glucose in urine.

0662-2184 100/btl

For use visually or selectively with the Clinitek® 50, 100 or 200+ Urine Chemistry Analyzers.

DiaScreen®

- Reliable screening tool for urinalysis
- Easy to read – test strip spacing matches color chart
- Excellent correlation with leading brands of reagent strips
- High quality – manufactured in the U.S.A.
- Only two read times for visual use
- Large selection of test strip configurations
- DiaScreen® 3-10 may be read automatically with DiaScreen® 50 Urine Chemistry Analyzer

9450-D11000	DiaScreen® 10 (glucose, protein, ketone, pH, blood, bilirubin, urobilinogen, nitrite, specific gravity, leukocyte)
9450-D11900	DiaScreen® 9 (glucose, protein, ketone, pH, blood, bilirubin, urobilinogen, nitrite, leukocyte)
9450-D11800	DiaScreen® 8 (glucose, protein, ketone, pH, blood, bilirubin, urobilinogen, nitrite)
9450-D11700	DiaScreen® 7 (glucose, protein, ketone, pH, blood, bilirubin, urobilinogen)
9450-D11600	DiaScreen® 6 (glucose, protein, ketone, pH, blood, bilirubin)
9450-D11500	DiaScreen® 5 (glucose, protein, ketone, pH, blood)
9450-D12400	DiaScreen® 4 ObL (glucose, protein, blood, leukocyte)
9450-D13400	DiaScreen® 4NL (glucose, protein, nitrite, leukocyte)
9450-D11400	DiaScreen® 4pH (glucose, protein, pH, blood)
9450-D11300	DiaScreen® 3 (glucose, protein, pH)
9450-D12200	DiaScreen® 2GK (glucose, ketone)
9450-D11200	DiaScreen® 2GP (glucose, protein)
9450-D12100	DiaScreen® 1K (ketone)
9450-D11100	DiaScreen® 1G (glucose)
9450-D13150	DiaScreen® 1B (blood)

DiaScreen® Urine Controls

Quality assurance programs are a must in all laboratory sections.

DiaScreen® Urine Controls, when subjected to normal test conditions, can help assess the accuracy and precision of the method, the reagents, and the equipment used in routine urinalysis.

DiaScreen® Urine Controls may be used with the DiaScreen® Reagent Strips for Urinalysis or other urine strips such as Chemstrip® and Multistix®.

9450-D76004	Liquid Controls (2 x 10mL Positive Controls, 2 x 10 mL Negative Controls)

IMCO Urine Reagent Strips

- Compares to Bayer's Urine Reagent Strips
- Cleared by FDA & CLIA Waived
- Manufactured in North America
- 18 Months dating
- Works on most popular strip readers
- Significant information provided to the user within 30 seconds to two minutes regarding kidney and liver functions, carbohydrate metabolism, pH balance and urinary track infections
- Easy to read visual color chart for quick analysis and interpretation.
- Easy Dip-and-read test.
- Urine Chemistry Analyzer will be introduced in the

Spring of 2006

6289-900-10-IMC	10 Parameter Urine Reagent Strips (Glucose, Bilirubin, Ketone, Specific Gravity, Blood, pH, Protein, Urobilinogen, Nitrite, Leukocytes), 100/btl, 24btl.cs (Compares to Multistix® 10SG 2161)
6289-900-4-IMC	4 Parameter Urine Reagent Strips (Glucose, Protein, Nitrite, Leukocytes), 100/btl, 12btl/cs. (Compares to Uristix® 4 2166)
6289-900-2-IMC	2 Parameter Urine Reagent Strips (Glucose, Protein), 100/btl, 12btl/cs. (Compares to Uristix® 2184)

Multistix® & Uristix® are registered trade marks of Bayer Corporation

NERL Sentry Urinalysis Control

- Has 6 months room temperature storage
- Liquid ready-to-use
- Works with most popular urine strips
- Can be used with automated strip readers
- Includes HCG parameter
- Packaged in 2 levels, 2 x 25ml each level

1757- URN5005	Sentry Urinalysis Control
---------------	---------------------------

Assure® 3 Blood Glucose Monitoring System

- Biosensor technology for fast, accurate results
- Fast 10 second test time
- Small 3 µL sample size
- Large, easy to read display
- Convenient, plasma-referenced results
- Simple Guide-Me Curve™ test strip

9450-555001	Assure® 3 Blood Glucose Meter, 1 Meter
9450-555050	Assure® 3 Test Strips, 50 Test Strips
9450-555100	Assure® 3 Test Strips, 100 Test Strips

1757-401009P 100g (24 x 10 fl. oz.)

Glucostix® Reagent Strips

Firm plastic strip with impregnated paper area provides two reagent areas for determination of blood glucose levels from one drop of fingertip or venous blood. Convenient no wash test can be read semi-quantitatively against a comparison color chart on the bottle label, or quantitatively in 50 seconds with the Glucometer® 11 or Glucometer® M blood glucose meters.

0662-2374 Glucostix, 50/btl

DiaScreen® 50 Urine Chemistry Analyzer

CLIA Waived. Reduces hands-on-time to five seconds. Minimized variability between operators. Ensures easy patient identification entry. Virtually eliminates transcription errors with an easy-to-read printout. Throughput of up to 50 samples per hour.

9450-D10000 DiaScreen® 50 Urine Chemistry Analyzer

Clinitek® STATUS™ Urine Chemistry Analyzer

Urinalysis has become an indispensable tool in healthcare.

- Provides important markers to detect early stages of many disease states, such as diabetes, kidney disease and urinary tract infections.
- Enhances disease monitoring and patient management.
- Semi-quantitative results have proven to be cost-effective and virtually immediate.

0662-1735 Clinitek Status Analyzer
0662-1760 Clinitest hCG, 25 Tests/Pkg
0662-5773 Clinitek Printer Paper, 5/Pkg
0662-1759 Label Printer Paper, 5/Pkg

Clinitek® 50 Urine Chemistry Analyzer®

5 seconds hands on time frees operator. Minimizes retesting due to interruptions. Reduces variability in reported results. Automatic color determination provides objective results. Line cord or battery operated for portability. Identifies trace intact or lysed blood cells. Reads reagent strip in 1 minute vs 2 minute visual reading. Flags abnormal results. Computer interfaceable.

0662-6516 Clinitek® Urine Chemistry Analyzer
0662-6511 Battery Pack (6AA Batteries Included)
0662-5773 Thermal Printer Paper (5 rolls/pkg)
0662-1364 Chek-Stix® Urinalysis Controls (25 positive, 25 negative)

Cascade® M-4 and M Analyzers

Inexpensive coagulation testing with your choice of a 2- or 4-channel analyzer. Both analyzers provide computer prompts to effortlessly step users through all routine clotting assays – PTs, aPTTs, thrombin times, fibrinogens, factor assays. Operation is simple and economical.

3083-HL1710 Cascade M (110/220 V) 2-Channel Analyzer with 4-Line Screen
3083-HL1711 Cascade M-4 (110/220 V) 4-Channel Analyzer with 6-Line Screen

CoaguChek™ Coagulation Analyzer

CLIA Waived. The CoaguChek™ System is the newest Point-of-Care product from Boehringer Mannheim. It is a portable, easy-to-use meter that measures prothrombin time. CoaguChek™ gives you accurate results in two minutes while only using a single drop of whole blood from a fingerstick or venipuncture. Its reliable technology provides consistent results, test to test, lot to lot. The unit is only 5.5" x 8.8" and weighs just 1.5 pounds, and it operates on six AA batteries or with an AC adapter. It can store up to 30 test results.

0875-BID2138280 CoaguChek™ Care Kit, PT, each

ProTime® System

CLIA WAIVED. The ProTime® System is designed for physician offices and home care providers. The ProTime® System consists of an instrument, disposable reagent cuvettes and Tenderlett® Plus finger incision devices for rapid, accurate, prothrombin time testing. Each ProTime® reagent cuvette has five channels for triplicate PT testing and simultaneous analysis of two levels of controls. Quality control is done on every test. The user is assured that the instrument and reagent system are functioning properly and that the test procedure was performed correctly.

3390-ITC-L11-01-01 ProTime® instrument, each
3390-ITC-L31-01-0025 ProTime® disposables, 25/bx

Coag-A-Mate® XM

The Coag-A-Mate® XM transforms the complicated procedure of clotting analysis into an almost effortless task. It is a photo-optical instrument, offering a complete range of advanced programming features that are specifically designed for testing in

environments with a low-volume throughput, e.g. small laboratories, as a back-up for big routine instruments, and research applications. This instrument is compact, semi-automatic and easy to use. And just like every component in the Organon Teknika hemostasis system, it allows you the flexibility to make your own connections to the products and services you need. It performs all key coagulation tests. It has a semi-quantitative fibrinogen (SQF) option: fibrinogen content is calculated from the PT clotting reaction. Testing parameters can be modified to accommodate various reagent systems. Apart from English, other languages can be selected for readouts such as Spanish, German, French and Italian. The Coag-A-Mate® XM is a high performance coagulation instrument requiring minimal operator training.

4854-GD52187 Cuvettes, XM, 1000 tests

Sysmex XT-1800i™ Hematology Analyzer

The Sysmex XT-1800i, another addition to the Sysmex X-Series product line, is a compact, high performance hematology analyzer. It provides accurate and precise CBC results, including a fully automated WBC 5-part differential. Fluorescent flow cytometry technology allows for rapid, highly reliable test results that are essential for effective patient diagnosis and therapeutic monitoring. The XT analyzer utilizes the same powerful fluorescent flow cytometry technology, reagents, controls and data management systems as the XE analyzers, making it the perfect solution for the IHN or laboratory seeking to standardize hematology.

9999-XT-1800i Sysmex XT-1800i™ Hematology Analyzer

AC•T™ Series Hematology Systems

The AC•T series is available with 8 parameters for CBC and PLT or 10 parameters including a 1 part WBC differential. Designed specifically for customers performing between 1 and 20 CBC's daily. The AC•T features one step sample processing with a touch screen user interface, small 12µL sample size, automated probewipe, and a compact design. Stat samples in less than 60 seconds, zero routine maintenance, and Interlaboratory Quality Assurance Program (IQAP).

 1690-7547005 S-CAL® Calibrator

ATAC 8000 Random Access Analyzer With 4 Parameter ISE

The ATAC 8000 Random Access Chemistry System offers random access capability in a bench top analyzer. Solid State ion selective electrodes are available for the testing of sodium, potassium, chloride and carbon dioxide. The operating software enables both the general chemistry portion of the analyzer and the ISE module to work together to provide continual high volume throughput. Patented electrodes require no filling solutions and no membrane replacement providing convenience reduced maintenance for the ISE operation. Patient report forms are automatically printed as blood work is completed and all results can be stored permanently in the built-in 500 megabyte hard disk drive. Built-in date management capability is provided with the MAC ATAC Data Management System to improve productivity and maintain patient and quality control files. Multi-tasking capability enable user to run multiple ATAC instruments at the same time. More than 20 interfaces for hematology, urinalysis, and electrolyte analyzers are available for use now with the ATAC Lab-System.

0801-ATAC8000 ATAC 8000 Random Access Analyzer

VITROS® 350 System

The VITROS® 350 Chemistry System offers easy operation, maintenance, and training. Whether you use it as a primary, STAT, or back-up to the powerful VITROS 5,1 FS, the VITROS 350 Chemistry System will get the job done right the first time. It's that simple. You know that VITROS® Systems are efficient, dependable, and easy-to-use. The VITROS® 350 comes complete with enhanced throughput, a broad accessible menu, and new ergonomic design. Boost your productivity and reduce costs with the system that delivers the right results the first time.

AIA 600™ II Automated Immunoassay Analyzer

This analyzer adapts readily to the laboratory's requirements. It can run any combination of analytes on any patient sample at any time, so single assays and complete profiles can be performed and reported on demand. This makes it practical and economical for low and medium-volume laboratories to respond to test requests in a timely manner. For higher-volume laboratories, the AIA 600™II is a powerful alternative for time-consuming and labor-intensive assays.

6371-TMI-019328

AIA 600™ II Auto-Immunoassay Analyzer

EasyLyte Electrolyte Analyzer

The EasyLyte measures Na, K, CL, Li, Ca and pH on whole blood, plasma, serum and urine (excluding lithium) samples. Automatic calibration. Complete internal QC software is included. Each analyzer (excluding calcium) is available with a 24 position autosampler. Besides containing all calibrating solutions, the Modular Solutions Pack collects all sample waste material, minimizing exposure.

Quality Control Program

Program includes normal and abnormal chemistry controls plus monthly quality control charts. Statistical analysis includes mean, CV, Levy-Jennings plot, Youden plot and peer group comparisons.

IMCO 6-Place Centrifuges

6-place centrifuges feature constant 3,400 RPM speed, integral aerosol and splash protection, automatic shutdown when cover is opened, and rotor with lifetime warranty. Maintenance-free brushless induction motor, efficient and quiet operation. 10 ml or 15 ml hardened aluminum shields. Available with on/off timer.

2980-V6000I	6-place centrifuge with On/Off Switch
2980-V6500I	6-place centrifuge with On/Off Timer

Vulcon Clinaseal Safety Centrifuge

Features exclusive AeroLok technology that helps protect personnel from aerosols while maintaining sample temperature stability. The motor chamber is isolated from the spinning chamber and the chamber in turn is isolated from the outside environment. A brushless, permanently lubricated motor means no maintenance worries. The sturdy aluminum cabinet is covered with a durable, baked-on powder coating in an attractive tan color that compliments any environment. Designed for use by laboratories, physician's offices, veterinarians, and hospitals. 3 Year Warranty.

9590-CS6C	Clinaseal 6 tube cap., , 30 min. timer
9590-CS8C	Clinaseal 8 tube cap., 30 min. timer
9590-CS6X	Clinaseal 6 tube cap., on/off switch

Vulcon Clinaspin Economy Centrifuge

Rock solid and affordable, everything you want in a basic centrifuge. A brushless, permanently lubricated motor assures long life, reliability and sample temperature integrity. 3 Year Warranty.

9590-6C	6 tube cap., 30 min. variable timer
9590-8C	8 tube cap., 30 min. variable timer
9590-6X	6 tube cap., on/off switch

Vulcon Quantum Large Capacity Centrifuge

Performs centrifugal blood cell separations, urine separations, and sperm cell washing. Offers the larger laboratory or hospital these important features: 24 place angle head, variable speed (calibrated in both RPM and RCF), and automatic braking system. 3 Year Warranty.

9590-QM100 Quantum 24 tube cap., 30 min. timer

Vulcon Microspin Microhematocrit Centrifuge

Offers reliable microhematocrit determinations. The high speed motor assures rapid spin-downs, and the included reader is adjustable, allowing accurate readings in a variety of circumstances. Quieter operation than many similar units, the Microspin offers

superior performance and is quickly becoming the standard for rapid, no hassle hematocrits. Designed for use by laboratories, physician's offices, and veterinarians. 3 Year Warranty.

9590-MS24 Microspin, 5 min variable timer

Vulcon Variseal

Variseal combines all the features of our best-selling Clinaseal centrifuge, with the added advantage of variable speed. The variable speed control conveniently indicates both RPM and RCF (Relative Centrifugal Force). The brushless, permanently lubricated motor ensures maintenance free operation. It performs centrifugal separation of blood cells from serum/plasma, urine separations and sperm cell washing. Designed for labor-atories, physician's offices, veterinarians and hospitals. 3 Year Warranty.

9590-VS6C	Variseal 6 tube cap., 30 min. timer
9590-VS8C	Variseal 8 tube cap., 30 min. timer

Vulcon Mobilespin Automobile Centrifuge

Designed to be an "in the field" unit, deriving its DC power from the cigarette lighter receptacle in an automobile. Samples can be spun in the automobile or "in the field", helping to prevent analyte value shift caused by delayed centrifugation. Optional power converter for indoor use. 3 Year Warranty.

- 9590-126 Mobilespin 6 tube cap., 30 min. timer
- 9590-128 Mobilespin 8 tube cap., 30 min. timer
- 9590-PS126 115V/12V power converter

The Products Listed In This Catalogue Represent Only A Portion Of Those Available. Please Call Our Office Or See Your Sales Representative.

Vulcon Hemo-Dyne Blood Rocker

Hemo-Dyne's gentle side-to-side rocking motion keeps drawn hematology samples thoroughly mixed prior to testing. Features an easily cleaned rubber tube holder. A synchronous motor and teflon bearings at all pivot points assure long, quiet and reliable service.

- 9590-BR01 Hemo-Dyne 14 tube blood rocker

Vulcon Rototron Benchtop Rotator

Compact benchtop unit for rotational mixing needs. Suited for agglutination test cards, chemical mixing and other rotational mixing needs.

- 9590-RT10 Rototron 30 min variable time

infuse your workflow

3354-8881352481 13 X 75 mm, Draw - 5 ml, Stopper Coating Silicone, 10.0 mg Potassium Oxalate, 12.5 mg Sodium Fluoride

3354-8881352580 13 X 100 mm, Draw - 7 ml, Stopper Coating Silicone, 14.0 mg Potassium Oxalate, 17.5 mg Sodium Fluoride

3354-8881352788 16 X 100 mm, Draw - 10 ml, Stopper Coating Silicone, 20.0 mg Potassium Oxalate, 25.0 mg Sodium Fluoride

3354-8881350584 13 X 100 mm, Draw - 7 ml, Stopper Coating Silicone, 20.0 mg Potassium Oxalate, 25.0 mg Sodium Fluoride

3354-8881353588 13 X 100 mm, Draw - 7 ml, Stopper Coating Silicone, 30.0 mg Sodium Fluoride

3354-8881354586 13 X 100 mm, Draw - 7 ml, Stopper Coating Silicone, 50.0 mg Sodium Fluoride

MONOJECT® Corvac Serum Separation Tubes

- Silicone Coated Tubes, New Crown CORVAC gel placement for improved performance and more sample yield.
- Laboratory procedures requiring serum with a positive gel barrier between blood cells and serum-general chemistry, serology and toxicology procedures.
- TDM compatible.
- Can be used with both Angle-head and Horizontal-head centrifuges.
- Sterile tube interior.

CORVAC, Red/Grey Mottled Stopper, Silicone Coated, 500/cs

3354-8881302072 13 X 75 mm, Approx. Draw - 4.0 ml

3354-8881302106 13 X 100 mm, Approx. Draw - 6.0 ml

3354-8881302163 13 X 100 Transport 5.5

3354-8881302015 16 X 100 mm, Approx. Draw -9.0 ml

3354-8881302064 16 X 100 mm, Approx. Draw - 9.0 ml

MONOJECT® Supra/Hone Blood Collection Needles - Thin Wall

- Unique polymer coating on stainless steel needle.
- Single piece Flow-Through cannula design.
- Plastic hub.
- Anti-deflecting butt-end.
- One-piece molded valve on multiple sample needles.
- Color-coded needle sheath designates needle gage.
- Sterile.

Single Sample, 100/bx, 1000bx/cs

IMCO Blood Lancets

Standard lancet, fits most devices. Highly precision ground needle for comfort; newborns to adults. Made in US.

4345-202-I Blood Lancets, 200/bx, 25 bxs/cs

Medi-Lance II Long Body Lancets

Fits Autolet, Glucolet.

4345-302 Long Body Lancets, 200/bx, 16 bxs/cs

Medicore™ Lady Lite

Lady Lite, the gentle lancet. Lady Lite is a delicate fine tip lancet designed for the feminine fingertip for maximum comfort and less tissue trauma. Great for children as well.

4345-202L Lady Lite Lancets, 200/bx, 25bx/cs

IMCO Platforms

Orange/Yellow. Use with Medi-Let, Autolet, Autolite. Limits depth of fingerstick. Diabetic/clinical usage. Supplied with sample Lancets and Platforms. Made in U.S.

4345-128-200 Platforms/Orange 200 ct/25 bxs/cs
4345-25-200 Platforms/Yellow 200 ct/25 bxs/cs

Medi-Let Lancing Device

Similar to Autolet, uses standard lancets. Patented Ejector Arm ejects lancets and platforms. Disposable platform allows patient to patient usage without cross contamination.

4345-299 Medi-Let

Medicore™ Lite Touch

4345-20M Lite Touch Lancing Device (Stainless Steel Pen)
4345-20M-1 Lite Touch Lancets, 200/Box
4345-20N Lite Touch Lancing Device Plastic-Adjustable Pen Type (Comp. To B-D)

Surgilance Safety Lancets

Ease of use is what the SurgiLance safety lancets are all about.

Requiring only two fingers to operate, the SurgiLance safety lancet makes blood sampling quick and easy for you and your patients.

Velket® Tourniquet

All-purpose natural rubber tourniquet with Velcro® closure. Reinforced in two areas of greatest stress. Gray color. Packed 12 per box.

5263-221010	Adult, 14" L, 4-1/2" Velcro Hook
5263-222001	Child, 8" L, 2-1/4" Velcro Hook
5263-223001	Thigh, 14" L x 1-1/2" W, 4-1/2" Velcro Hook

Tourniquets

Fully Latex-free but performs better than latex! Protects patient and provider from the dangers of latex exposure.

2863-36647	Latex-Free, 1000/cs, bulk packed
2863-36648	Latex-Free, 500/cs, 5 bxs of 100 each

Unilet® Lancets

Diverse line of lancets to suit varying blood volume requirements and skin types. Fits virtually all lancing devices.

General Purpose lancets – 21 gauge

Designed to provide maximum blood flow

4642-AT 0414	100/box
4642-AT 0418	200/box

Excelite – 23 gauge

Cost-effective lancet designed to comfortably provide increased blood flow .

4642-AT 0510	100/box
4642-At 0515	200/box

General Purpose Superlite – 23 gauge

Designed to provide increased blood flow with comfort.

4642-AT 0455	100/box
4642-AT 0450	200/box

General Purpose Ultralite – 28 gauge

Designed for maximum comfort. Ideal for modern meters.

4642-AT 0925	100/box
4642-AT 0920	200/box

ComforTouch – 28 gauge

Recappable lancet with ultra thin needle for maximum comfort.

4642-AT 0465	100/box
4642-AT 0460	200/box

Excelite II – 28 gauge

Cost-effective lancet with ultra thin needle.

4642-AT 0535	100/box
4642-At 0530	200/box

Unistik® 2

Single-use capillary blood sampling devices. Available in 5 convenient models for different skin types and blood volume needs. Unistik 2 exceeds OSHA guidelines with its retracting lancet for safe use and protection against cross-infection and needle stick injury.

Normal – for standard tests

4642-AT 0700	50/box
4642-AT 0702	100/box
4642-AT 0704	200/box
4642-AT 0703	1,000/case (bulk)

Extra – for larger samples

4642-AT 0710	50/box
4642-AT 0712	100/box
4642-AT 0714	200/box
4642-AT 0713	1,000/case (bulk)

Super – special needle for optimum blood flow

4642-AT 0752	100/box
4642-AT 0753	1,000/case (bulk)

Unistik® 3

Single-use capillary blood sampling devices.

Available in 4 convenient models for use across all clinical environments. Unistik 3 is a pre-set single use safety lancet focusing on ease of use and patient comfort.

Comfort- for frequent and pediatric testing

4642-AT 1042	100/box
4642-AT 1044	200/box
4642-AT 1043	1000/case (bulk)

Normal-for standard tests

4642-AT 100	100/box
4642-AT 1004	200/box
4642-AT 1003	1000/case (bulk)

4642-AT 1012	100/box
4642-AT 1014	200/box
4642-AT 1013	1000/case (bulk)

Dual-for high flow fingersticks and low flow heelsticks

4642-AT 1062	100/box
4642-AT 1064	200/box
4642-AT 1063	1000/box

Micro-Hematocrit Capillary Tubes

Paralwall construction minimizes errors. Bore is uniform. Taper does not exceed 0.026 mm in 75.0 mm. Both tips fire polished. Tips, vials, caps color coded for easy identification. Red-Tip inner surface coated with minimum of 2 USP units of ammonium heparin. Blu-Tip is plain. 75 mm long +2 mm. Wall thickness 0.20 mm +0.02 mm ID within 1.1 to 1.2 mm.

1318-41B2501	Red-Tip Tubes, Heparinized, 200/vl, 12 vls/cs
1318-41B2502	Blu-Tip Tubes, Plain, 200/vl, 12 vls/cs

Capillary Tube Sealant

Vinyl plastic compound offers fast, heatless method for sealing any type capillary tube. Specially formulated to remain pliable and minimize leaking and spin-outs. Values can be read with any hematocrit tube reader. Tip-proof Identi-Tray has 24 numbered duplicate sample slots, contains enough Critoseal to seal several hundred tubes.

3354-8889215003	Capillary Tube Sealant, 6 Trays/bx, 6 bxs/cs
-----------------	--

ESR Systems

The Dispette® 2 is a Westergren standard pipette. Reservoirs are pre-filled with saline and have pierceable caps preventing spillage. Allows customer to use only EDTA anti-coagulated blood.

The Sed-Pac® is a convenient Dispette System, which includes 50 tests per box and transfer pipettes.

The Micro-Sed™ is ideal for pediatric patients or when blood volume is at a premium. Only 0.24 ml of blood required.

The Winpette™ is a system designed for the Wintrobe ESR method. Only 0.6 ml of blood is required.

The Vacupette™ test keeps handling to a minimum. Pipettes are fitted with a unique blood displacement collection tube adaptor, allowing test to be run directly from citrated vacuum blood collection tubes, such as BD or Terumo.

9450-H-1500	Dispette® pipette and reservoirs, 100/box, 10 boxes/case
9450-H-1530	Dispette® pipette tubes, 250/box, 10 boxes/case
9450-H-1600	Dispette® 2 with pre-filled reservoirs, 100/box, 10 boxes/case
9450-H-1675	Dispette® 2 bulk with pre-filled reservoirs, 1000/box
9450-H-1700	Sed-Pac® pipette tubes reservoirs and graduated transfer pipettes, 50/box, 10 boxes/case
9450-H-1531M	Micro-Sed™ micropipette tubes & reservoirs, 100/box, 10 boxes/case
9450-H-1530M	Micro-Sed™ micropipette tubes, 250/box, 10 boxes/case
9450-H-1800	Winpette™ pipette tubes & reservoirs, 100/box, 10 boxes/case
9450-H-1900	Vacupette™ with adaptors, 100/box, 10 boxes/case
9450-H-1705	5 Place Plastic Stand with Leveling Bubble and Adjustable Feet
9450-H-1510	10 Place Plastic ESR Stand

Ritter Blood-Drawing Chair

The wide, comfortable 165 Blood-Drawing Chair makes patients more relaxed, makes your work easier. Padded arm support rotates 360°. Thirteen inches of arm rest

height adjustment accommodates any size/height patient. Stain-resistant upholstery. Features a storage drawer. Available in 13 solid colors, 6 designer patterns and 6 ultra-leather upholstery colors.

4443-165003	Ritter Blood-Drawing Chair, without drawer
4443-165004	Ritter Blood-Drawing Chair, with drawer

Clinton Blood Drawing Chair

Fully adjustable to be comfortable for the patient while letting the technician get in just the right position. Both arms are adjustable in height. The left arm swings 360° and

is adjustable out an additional six inches to provide more seating area. The seat, armrests, and backrest (where applicable) are richly cushioned and upholstered in your choice of vinyl colors.

1477-64929-B	B.D. Chair, w/padded backrest w/drawer, as pictured
1477-64929	B.D. Chair, w/o padded backrest, w/drawer
1477-64950-B	B.D. Chair, w/padded backrest, w/o drawer
1477-64950	B.D. Chair, w/o padded backrest, w/o drawer

Clinton Bariatric Series Blood Drawing Chair

- Seat has additional depth and an extra center support for added strength
- Extra dimensions make it easier for patient and technician
- Adjustable height and depth flip arms
- Armrests locks in place when in use, then flips out of the way for easy exit
- Comfortable 2" padding throughout
- Easy-clean, antimicrobial, heavy weight, vinyl upholstery
- Neutral Grey powder-coated frame
- 2 knobs lock chrome armrest into position
- Adjustable foot levelers
- Chairs may be special ordered with straight armrests instead of flip arms (677 Option)
- Accommodates patients up to 700 lbs.

1477-6000B-F	Bariatric Blood Chair with 2 Adjustable Flip-Arms
1477-6000B-FD	Bariatric Blood Chair with Drawer and Flip-Arm

IMCO/Amsino Specimen Container

Specimen container is graduated in ounces, cubic centimeters, and milliliters.

Liqua Guard® lid enhances the container's leak resistance.

- 0361-4921-IMC IMCO Specimen Container, 4 oz., Sterile, Individually Polybagged, 100/cs
- 0361-AS341 Specimen Container, 4oz sterile, bulk packed, 100/Case
- 0361-AS343 Specimen Container, 4oz non-sterile, bulk 25 sleeves of 20 cups and lids

Non-Sterile Specimen Containers

6.5 ounce specimen containers are graduated in cubic centimeters, milliliters, and ounces. The containers are available in

polystyrene and polypropylene. Polystyrene enhances the clarity and polypropylene improves the durability. Each container has a handy pour spout for dispensing specimens.

- 6709-4646 Polypropylene Container w/paper lid, 20/slv, 25 slv/cs
- 6709-4647 Polystyrene Container w/paper lid, 20/slv, 25 slv/cs
- 6709-4629 Polypropylene Container w/out lid, 20/slv, 25 slv/cs
- 6709-4630 Polystyrene Container w/out lid, 20/slv, 25 slv/cs

Sterile Midstream Catch Kits

A kit contains a 4 ounce polypropylene container and screwcap, pressure-sensitive ID

label and 3 towelettes. The catch kits are individually packaged in a sequential "tamper-proof" manner, which promotes sterility maintenance throughout the collection procedure. Three types available.

Tab Ring Series, 100/case

- 6709-4150 With Benzalkonium Chloride Towelettes
- 6709-4152 With Castile Soap Towelettes

Urin-Tek® Urine Testing System

The system consists of disposable, 15 mL capacity, plastic tube with an easy-on, easy-off, plastic snap cap, a self-adhesive identification label, a flat-bottom 3 ounce paper collection cup, and a 10-tube disposable tube holder for easy handling of specimens during collection, transport and testing.

- 0662-4202 Urin-Tek System
- 0662-4204 Tubes Only, 500/bx
- 0662-4205 Caps Only, 500/bx

Gent-L-Pan Specimen Collection Container

Ideal for collecting and accurately measuring specimens. Each Gent-L-Pan is marked with black easy-to-read graduations.

- 6709-02072 Gent-L-Pan, 100/cs

Dispens-A-Pak Disposable Tubes

Disposable culture tubes in the Chase Dispens-A-Pak are available either in Borosilicate or Neutrex® flint glass. These tubes are chemically clean and well suited for general use in blood banks, hematology, chemistry. 250/pk, 4 pk/cs.

Borex™ (Borosilicate) Dispens-A-Pak

- 1318-60P650B 6mm x 50mm
- 1318-60A10B 10mm x 75mm
- 1318-60B12B 12mm x 75mm
- 1318-60C13B 13mm x 100mm
- 1318-60D15B 15mm x 85mm
