## **FUEL PUMPS**

**MODULES / KITS / UNIVERSAL / MECHANICAL**

US Motor Works has combined the strength of a technologically orientated manufacturer, superior sales and service organization and a sophisticated global distribution network to keep the company on the forefront of the automotive marketplace.

With the focus of providing Automotive and Heavy-Duty engine parts and components, US Motor Works is constantly looking for ways to support its customers by increasing the availability of quality parts and components. Currently, US Motor Works manufactures a complete line of water pumps, fuel pumps and fan clutches. In addition to our traditional Automotive and Heavy-Duty market, US Motor Works has merged with Derale Performance and Pacer Performance to expand our manufacturing and quality assurance to the High Performance industry.

Precision Engineering and manufacturing are essential in creating products that you can depend on. At US Motor Works, quality begins with skilled technicians utilizing materials that meet or exceed OEM specifications to manufacture premium water pumps, fuel pumps and fan clutches. Our specially trained technicians apply stringent quality control standards utilizing sophisticated technology to make sure that all US Motor Works products meet the rigorous demands of our customers. When you buy US Motor Works manufactured items, you are investing in technology that has been meticulously engineered, manufactured from the highest quality materials and thoroughly tested to assure accuracy, reliability and workmanship.

With more than 50 years of combined experience, we are committed to providing an extensive line of high quality products, the finest customer service and the best support program available in the automotive, high performance and heavy-duty market. Our 99.05% fill rate is proof we're on the right track.

Fan Clutches  
Water Pumps  
Fuel Pumps  
Max Cooling Kits  
Timing Kit w/ Water  
Pumps

Heavy-Duty  
Water Pumps  
Oil Pumps  
Universal Fuel Pumps  
Fuel Lift Pumps & Solenoids  
Viscous Fan Clutches

H.O. Electric Fans  
Belt Driven Fans  
Fluid Coolers  
Transmission Cooling Pans  
Fluid Filtration  
HP Fuel Pumps

Jeep Bumpers & Nerfbars  
Hi-Five Cab Roof Lights  
Flexy Flare®  
Rubber Fender Extenders

## A Certified ISO 9001:2015 Company

US Motor works, LLC and its employees are committed to providing an extensive line of consistent High Quality Products, the finest Customer Service and Satisfaction, through our commitment to the continual improvement of our Quality Management System of ISO 9001:2015.

## OPEX: Operational Excellence

US Motor Works adoption of OPEX is a business philosophy aimed to achieve a sustainable competitive advantage. Operational Excellence focuses on the customer's needs. By leadership, teamwork and problem solving principles, US Motor Works achieves continuous improvement, empowered employees, optimized activities and processes.

Implementation of this philosophy is built on 'Lean Manufacturing' principles designed to achieve:

- World-class quality
- Maximum productivity
- Reliable delivery to the customer
- Competitive pricing

Lean Manufacturing is the foundation of the Operational Excellence implementation program to create maximum value for your customers. It builds an integrated product delivery process to meet the changing needs of customers while creating a fundamental and sustainable change in organizational culture.

Lean Manufacturing has helped us achieve:

- Substantial response time and lead time reduction with best in class On Time Delivery rate
- Significant quality improvement, and overall cost reduction
- Constant innovation embedded as part of the day to day work at all organizational levels
- A permanent, on-going cultural change that delivers Continuous Improvement on a daily basis, with collaboration, commitment and partnership among all of the organization's employees

# **WARRANTY POLICY**

## **US Motor Works, LLC**

- USMW Professional Series brand of US Motor Works, LLC products are warranted to be free from defects in material and manufacture, under normal use and service.
- US Motor Works coverage will extend a full 12 months from the date of installation in an engine regardless of mileage or hours.
- US Motor Works will cover (replace free of charge or pay for) all labor and parts needed to repair the warrantable failure, including progressive damage to the engine concerned.

### **Conditions of the warranty are:**

1. US Motor Works must be notified by the customer before filing a warranty claim.
2. All warranty claims must be in writing and US Motor Works reserves the right to examine every single engine or part subject to a claim under this warranty
3. Price of parts will be based on the US Motor Works current price list or other accepted suppliers at US Motor Work's option. Cost of labor will be of reasonable hourly flat rate (overtime or holiday rates are not accepted).

### **The warranty is also subject to the following limitations:**

1. The provisions of this warranty shall not apply to any US Motor Works (USMW) brand part altered from its original specification (including but not limited to alterations in packaging and/or markings) or which has been misused, exposed to weather conditions, negligence or damage by accident.
2. The warranty shall be null and void, if the engine or vehicle is not maintained to the suggested OEM level. All receipts and records should be accounted for in the event it is requested for the warranty analysis.
3. This warranty is provided solely to direct customers of the US Motor Works and not any other party. It is the only agreement or obligation of US Motor Works. All other warranties, expressed or implied, including the warranties of merchantability and/or fitness for a particular purpose, are excluded.

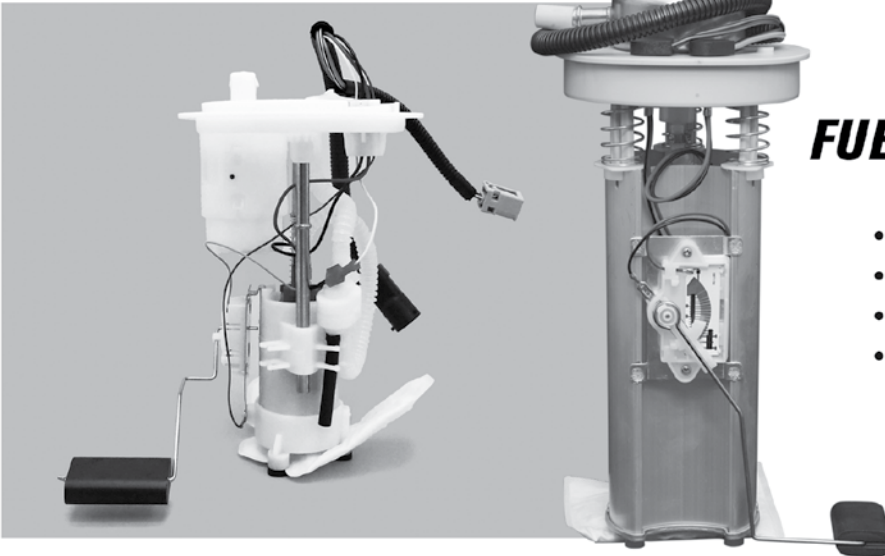

## **US Motor Works, LLC**

## FUEL PUMP MODULES

- Drop-in replacement
- OE Style internal fuel pumps
- Palladium Silver fuel level sensor
- Made with modern materials that are compatible with today's fuel blends

## FUEL PUMP KITS

USMW uses OE style fuel pumps rather than less expensive turbine units (where applicable). This ensures quality and performance that meets or exceeds OE standards.

**New Wiring**  
**New Strainer**  
**New Fuel Lines**

## MECHANICAL FUEL PUMPS

All mechanical fuel pump kits include gaskets and hardware necessary for installation.

## UNIVERSAL FUEL PUMPS

Our Universal Fuel Pumps are compatible with a range of modern fuels, for carbureted and fuel injection applications

## STRAINERS

Quality made strainers help protect your fuel pump from contamination, this helps ensure longer lasting fuel pump performance.

FUEL PUMP MODULES

FUEL PUMP KITS

MECHANICAL FUEL PUMPS

STRAINERS

All Manufacturers names, numbers, symbols and descriptions are used for reference purposes only, and in no way does it imply that any parts listed in this catalog are the products of these manufacturers.

# COMMON REASONS FOR PUMP FAILURE

- A.** Low quality fuel
- B.** Fuel system contamination
- C.** Clogged strainers/filters
- D.** Low fuel levels
- E.** Overheating

## **A** **LOW QUALITY FUEL**

**Fuel quality** is important for proper function and longevity of your fuel pump. High quality fuels from top tier suppliers include additive packages that help lubricate and cool the internal components of the fuel pump and fuel system.

Low quality fuels do not lubricate the fuel pump properly and if excessive moisture is present, it will also cause premature failure of many fuel system components such as the fuel pump, fuel level sensor, fuel pressure regulator, fuel injectors, etc.

Low quality fuel can also be contaminated with small particles that will quickly clog and damage an in-tank fuel pump.

## **B** **FUEL SYSTEM CONTAMINATION**

**Fuel system contamination** is usually a problem with older vehicles and vehicles used in rough terrain.

Contaminants can enter the automotive fuel system when filling the tank or from the breakdown of fuel system components such as fuel lines and fuel tank liners.

**Did You Know?** If you do not clean your fuel system when replacing your fuel pump that there is a 90% chance that the fuel pump will fail under 30 days.

*Drain & clean your fuel tank every time you replace a fuel pump!!*

## **C** **CLOGGED FILTER OR STRAINER**

A fuel pump must pull fuel through a strainer attached to its inlet and push it through an external fuel filter. If either of these are clogged and cannot support the flow-rate required by the engine, there will be bogging and vehicle hesitation as well as increased strain on the fuel pump causing it to eventually fail.

### **Did You Know?**

A clogged strainer and filter will decrease flow-rate and require a fuel pump to work harder to make the proper pressure and flow. These conditions overheat the fuel pump causing it to fail. Always install a new strainer and fuel filter when replacing a fuel pump.

**D**

## ***LOW FUEL LEVELS***

Running your vehicles on low levels of fuel for extended periods is extremely bad for the fuel system. Fuel is used to cool and lubricate the internals of the fuel pump and if the tank is allowed to frequently run low, the cooling ability is compromised because the fuel heats up much faster.

### ***Did You Know?***

Frequently running on low fuel levels allows a large amount of air to remain in the fuel tank causing potential for condensation. This will cause the internal tank liners to break down much quicker over time.

**E**

## ***OVER HEATING***

Overheating of fuel pumps occurs when the pump is subjected to severe loads with minimal cooling. This can occur when the pump flow is restricted or if foreign debris gets jammed in the pump mechanisms. Overheating can cause damage to fuel pump connectors and associated wiring and electrical components. In severe cases, the fuel pump armatures can get so hot that the plastic armature material can melt.

### ***Did You Know?***

To prevent connector overheating, it is always recommended to replace the wiring connector when replacing a fuel pump. This is especially important for vehicles over 10 years old. USMW assemblies include improved harnesses and pigtail connectors to replace the OE harness when required.

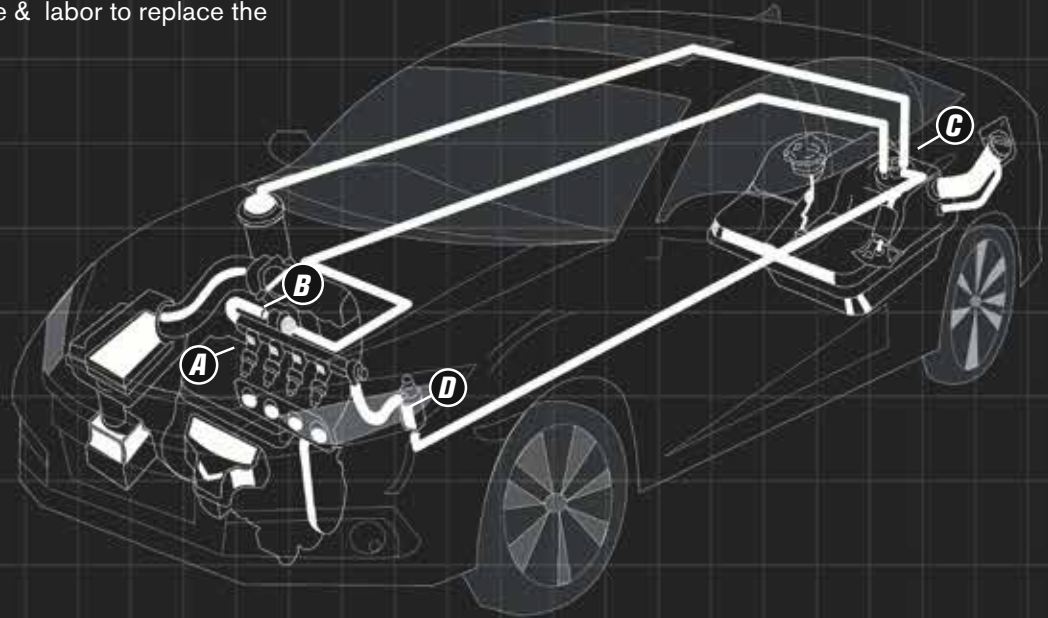

# BEST PRACTICES

## TROUBLESHOOTING YOUR FUEL SYSTEM & REPLACING YOUR FUEL PUMP

Low fuel pressure and low fuel flow-rate at the engine are the most common characteristics that are found in a faulty fuel system. It is a common misconception that these are caused by a faulty fuel pump or fuel pump module, which is usually not the case. The automotive fuel system is made up of several components that should be checked and tested before expending the time & labor to replace the fuel pump.

- A.** Fuel injectors
- B.** Fuel pressure regulator
- C.** Fuel pump
- D.** Fuel filter

## Fuel System Overview

The fuel system begins with **Voltage**.

Without battery/alternator voltage an electric fuel pump will not operate.

This voltage is normally switched on by a **relay** or controlled directly by the **ECU**.

The **wires** from the relay or ECU carry the power to the fuel pump.

These wires may be connected through several **connectors** before actually reaching the fuel pump.

The **fuel pump** is the heart of the fuel system. Its job is to deliver fuel from the tank to the engine.

The fuel pump sends fuel out of the **fuel tank** at the proper flow-rate and correct pressure for the engine to run at all RPMs and throttles positions.

Depending on the type of fuel system that the vehicle has, (return vs. non-return) there will be differences in configuration at this point.

For return type fuel systems, the fuel will be sent out through **fuel lines** and normally through an **external fuel filter** before reaching the engine.

For non-return type systems the fuel would be sent through a **pressure regulator** and then through the **fuel lines** and **external fuel filter** before reaching the engine.

Once at the engine the fuel is normally fed into the **fuel rails** that supply the fuel to each individual **fuel injector**. At this point we will also see additional differences between a return and non-return type fuel system.

For a return type fuel system, the **fuel pressure regulator** will be found after the fuel rail.

An **additional fuel line** will “return” bypassed fuel from the pressure regulator back to the fuel tank.

On a non-return fuel system, there will only be a **feed line** to the fuel rail.

There is no additional return line back to the tank since the fuel pressure has already been regulated at the fuel pump or fuel tank before reaching the engine.

## ***SAFETY FIRST!***

- A.** Work on a level surface
- B.** Use safety stands for support, not a jack
- C.** Keep an ABC fire extinguisher close by
- D.** Wear approved safety glasses
- E.** Work in a well-ventilated area
- F.** Do not smoke or allow open flames near vehicle
- G.** Disable fuel pump before servicing by removing fuse or battery cables
- H.** Relieve fuel system pressure before servicing pump

## ***WARNING!***

Gasoline is extremely flammable, so take extra precautions when you work on any part of the fuel system. Don't smoke or allow open flames or bare light bulbs near the work area, and don't work in a garage where a natural gas appliance is located. Gasoline is also carcinogenic, take the proper precautions and wear latex gloves when spills are possible. If fuel does come into contact with your skin, rinse it off immediately with soap and water. Mop up all fuel spills and do not store any fuel-soaked rags where they could ignite.

## ***FUEL***

This is the first thing you should check if you are having problems with your fuel delivery system. Make sure that your gas tank is at least ½ full of fuel when diagnosing any fuel delivery problems.

## ***VOLTAGE***

This is the second thing to check when you are having issues with fuel delivery. Without the proper voltage reaching the fuel pump you will immediately have a low or no flow and/or pressure situation. It is important to check the voltage drop directly at the fuel pump connector. There should be less than .5 volt voltage drop from the battery to the positive fuel pump terminal.

### ***Things to check if you find no or low voltage at the pump connector:***

- A.** Check that battery and alternator are in proper working condition
- B.** Verify that ECU is properly functioning
- C.** Check fuel pump fuse
- D.** Check fuel pump and/or ASD relay for proper function
- E.** Check wiring harness for loose or broken connections
- F.** Check fuel pump ground location for good contact

## ***FLOW***

Next thing to check is to see that the fuel pump is actually sending fuel out of the tank. You can verify this by removing the test port cover from the fuel rail or disconnecting the fuel line from the in-line filter. Switch the ignition to the "ON" position and the fuel pump should operate for a few seconds. At this time you can look at the disconnected fuel line or open test port to verify if there is any flow from the fuel pump.

### ***Some common causes of low or no flow other than a faulty fuel pump are:***

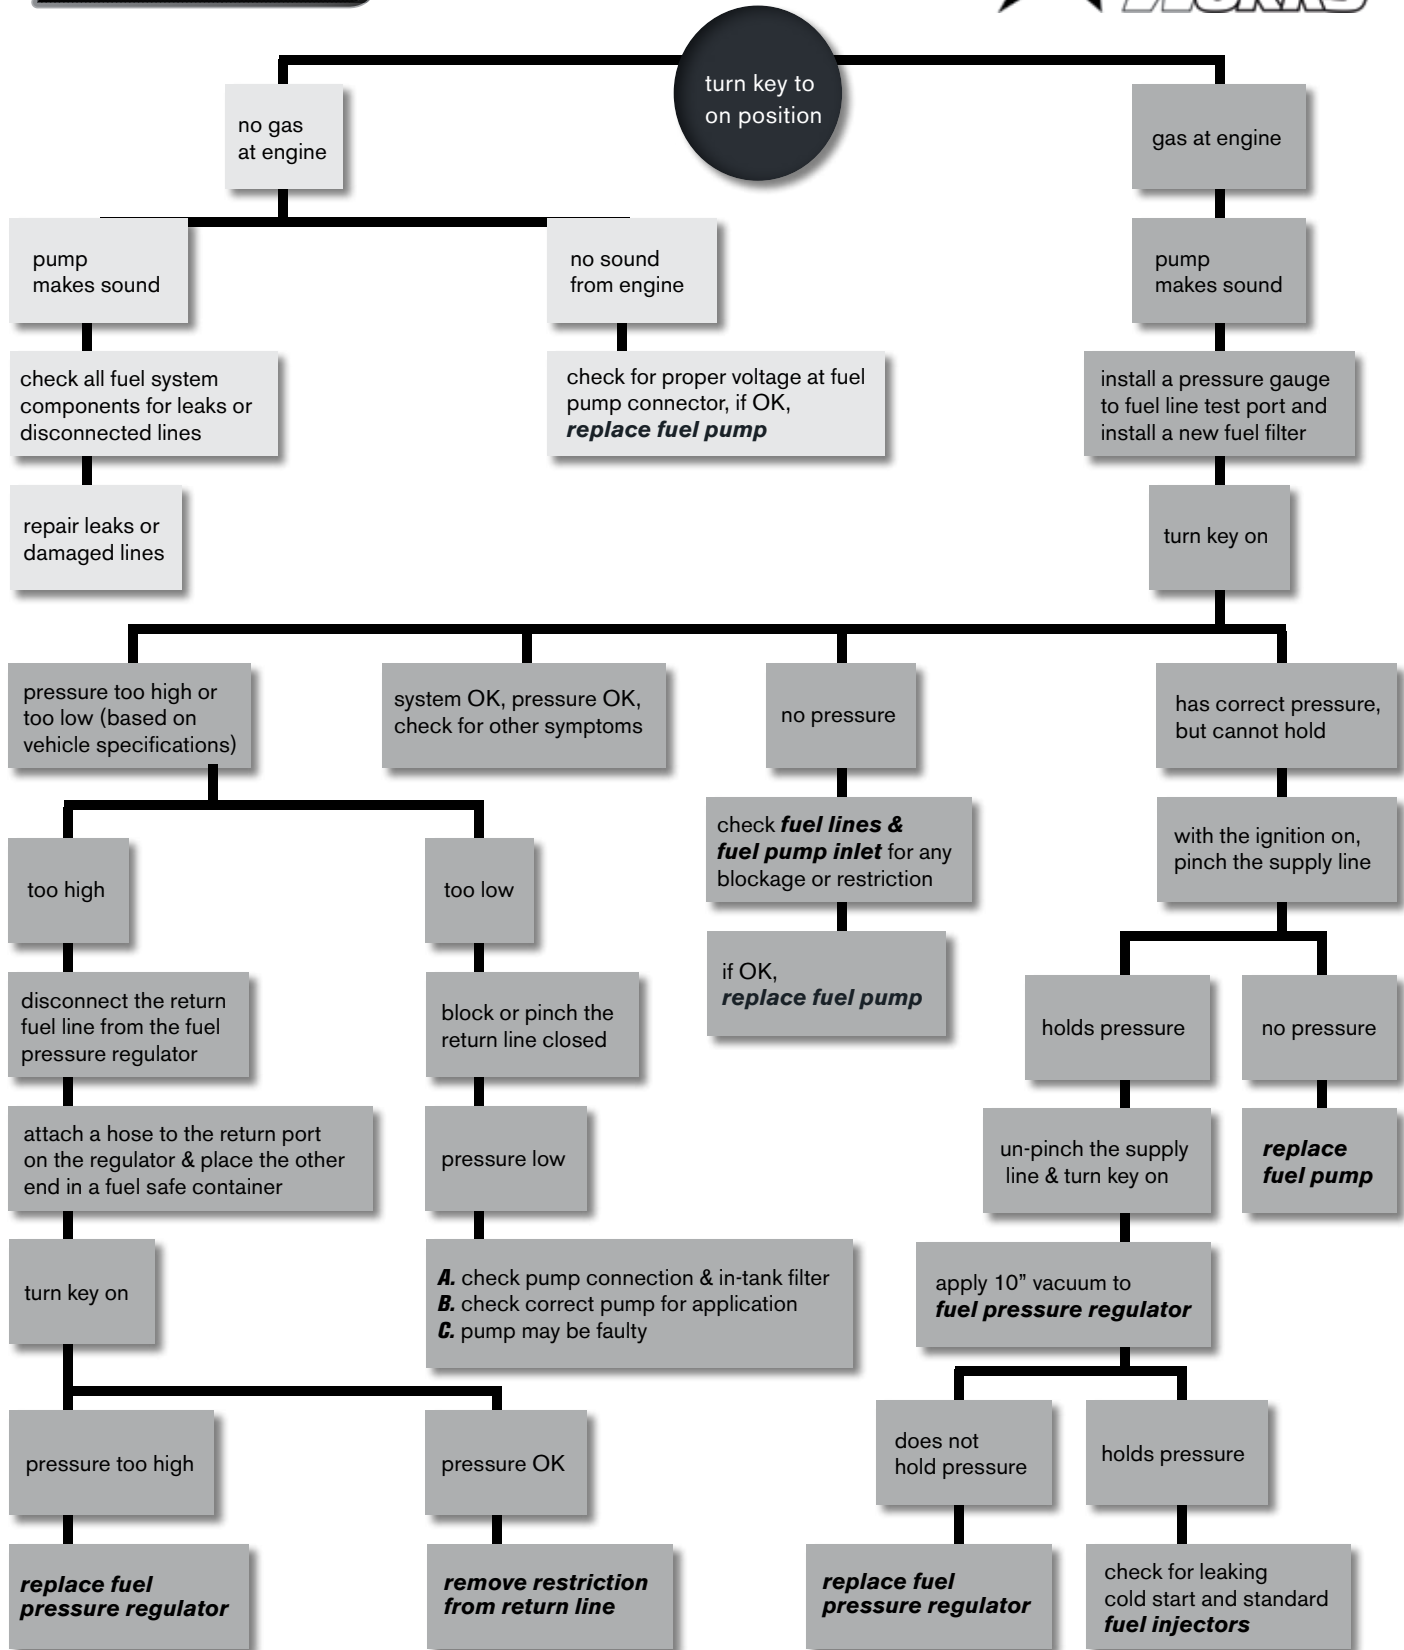

- A.** Leak in the fuel line
- B.** Clogged fuel line
- C.** Clogged in-line filter
- D.** Crimped or smashed metal fuel lines

## ***PRESSURE***

After you have confirmed that you have flow in the fuel system then you can move on to checking if there is proper pressure in the system. The best way to check fuel pump output pressure is to connect a pressure gauge to the fuel pump output line before the in-line fuel filter. This will allow you to test the direct output pressure of the fuel pump without additional components in the system such as a fuel pressure regulator.

### ***Some common reasons for low pressure other than a faulty fuel pump are:***

- A.** Low voltage at the pump
- B.** Bad fuel pressure regulator
- C.** Clogged in-line fuel filter
- D.** Leaking injectors
- E.** Leaking fuel line connectors
- F.** Clogged or damaged fuel lines

**Keep your work area clean!**

The number 1 cause of fuel pump failures is from fuel pump contaminants such as dirt, rust, & moisture. If the fuel system is not cleaned, then these contaminants will cause the replacement fuel pump to fail prematurely. Make sure to clean your fuel tank & keep your work area clean to prevent this type of contamination.

# BENCHTOP FUEL PUMP TESTER

Part# USEPTEST1

## BENEFITS:

- Compact Bench-top design with Internal fuse-protected Power supply
- Tests Fuel Pumps and Modules
- Large, High Precision, Glycerin Filled pressure Gauge (230psi max)
- Large Heavy Duty Stainless Steel fluid tank with cover
- Removable pump / module holder with integrated splash shield
- Circuit breaker protected front mounted output terminals
- High Precision/ High Volume Flow Meter (250LPH max)
- DIGITAL Volt Meter and Ammeter
- Test harness and adapter leads included
- Drain port in bottom of tank
- Full operating instruction booklet with Pressure and flow specifications

## FUEL PUMP GENERAL INSTALLATION INSTRUCTIONS AND PRECAUTIONS

Please read these instructions completely before starting the installation.

### PRECAUTIONS

- Work on a level surface
- Use safety stands for support, not a jack
- Keep an ABC fire extinguisher close by
- Wear approved safety glasses
- Work in a well-ventilated area
- Do not smoke or allow open flames near vehicle
- Disable fuel pump before servicing by removing fuse or battery cables
- Relieve fuel system pressure before servicing pump

**WARNING:** Gasoline is extremely flammable, so take extra precautions when you work on any part of the fuel system. Don't smoke or allow open flames or bare light bulbs near the work area, and don't work in a garage where a natural gas appliance is located. Gasoline is also carcinogenic, take the proper precautions and wear latex gloves when spills are possible. If fuel does come into contact with your skin, rinse it off immediately with soap and water. Mop up all fuel spills and do not store any fuel-soaked rags where they could ignite.

**NOTE:** Physical configuration of replacement pump may not be identical to the pump being removed, but replacement pump will function the same as the pump being removed.

In some applications the new pump may not mount in the same location as the pump being removed. This kit may service more than one vehicle, so there may be some parts left over after installation. This pump will not remedy malfunctions of the filter, regulator, injectors, or other fuel system components. Diagnose fuel pump using procedures in service manual to confirm pump failure before proceeding with pump replacement.

**CAUTION:** This fuel pump is not approved for aircraft or marine use. Do not run pump dry or damage could result to pump. Do not reuse fuel strainer. Dirt is the major cause of pump failure, keep pump and component parts clean and free of dirt.

### FUEL PUMP REPLACEMENT

Installation of replacement pump may require that some of the mounting or electrical hardware be reused. Do not destroy any hardware that might need to be reused on replacement pump.

- |                                                          |                                                                                                                                                                                                 |
|----------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Verify that the pump has failed.                      | *Check all related fuel system components to verify that the fuel pump is the failed component.                                                                                                 |
| 2. Relieve vehicle fuel pressure.                        | *Consult the vehicle specific repair manual for proper procedure.                                                                                                                               |
| 3. Disconnect the negative terminal from the battery     |                                                                                                                                                                                                 |
| 4. Empty fuel from gas tank.                             | *Drain fuel into approved containers and dispose of per local regulations                                                                                                                       |
| 5. Remove fuel tank from vehicle (if required)           | *Consult vehicle specific repair manual for proper procedures.                                                                                                                                  |
| 6. Remove old fuel pump                                  | *Consult vehicle specific repair manual for proper procedures.                                                                                                                                  |
| 7. Clean inside of fuel tank                             | *Fuel contamination is the leading cause for fuel pump failure.<br>*Fuel tank must be clean and a new strainer must be installed with new fuel pump                                             |
| 8. Inspect wiring and hoses on vehicle.                  | *Inspect all original equipment wiring and hoses for damage.<br>*Wiring harness must be replaced if included with fuel pump kit.<br>*Replace all worn or deteriorated hoses and fittings.       |
| 9. Install new fuel pump / Fuel Pump Module and strainer | *Always replace strainer with new parts when replacing fuel pump                                                                                                                                |
| 10. Re-install fuel tank (if required)                   | *Consult vehicle specific repair manual for proper procedures                                                                                                                                   |
| 11. Replace fuel filter                                  | *Clogged fuel filter will reduce fuel pump life and produce low fuel pressures                                                                                                                  |
| 12. Fill tank completely with clean fuel                 | *Complete Fuel pump / Fuel Pump Module must be submerged in order for fuel pump / fuel system to prime.<br>*Wait a minimum of 5 minutes for Fuel Pump Modules to prime before starting vehicle. |
| 13. Start engine and check for leaks                     | *Reconnect battery cable<br>*Key may need to be switched on and off several times before proper fuel system pressure is achieved.<br>*Check for leaks                                           |

**NOTE:** A loss of oil pressure or defective oil pressure switch may cause the fuel pump to be inoperative.

## INSTALACION DE LA BOMBA DE COMBUSTIBLE ELECTRICA HOJA DE INSTRUCCIONES

### PRECAUCIONES DE SEGURIDAD

- Trabaje sobre una superficie nivelada
- Use soportes de seguridad, no use un gato hidráulico
- Mantenga un extinguidor ABC a la mano
- Use gafas de seguridad adecuadas
- Trabaje en un área bien ventilada
- No fume ni permita llamas abiertas cerca del vehículo
- Desconecte la bomba de combustible antes de darle mantenimiento quitando el fusible o los cables de la batería
- Deje escapar la presión del sistema de combustible antes de dar mantenimiento o cambiar la bomba

**ADVERTENCIA:** La gasolina es extremadamente inflamable, así que tome todas las precauciones adicionales cuando usted trabaje en cualquier parte del sistema de combustible. No fume ni permita las llamas abiertas y no use bombillas descubiertas cerca del área de trabajo, no trabaje en un garage donde haya un equipo de gas natural. La gasolina es también carcinógena, tome las precauciones apropiadas y use guantes del látex cuando haya un derrame de gasolina. Si el combustible entra en contacto con su piel, enjuague inmediatamente con jabón y agua. Absorba todos los derrames del combustible y no guarde ningún trapo empapado de gasolina porque podría prenderse.

**NOTA:** Es posible que la apariencia física de la bomba de repuesto no sea idéntica a la de la bomba que sustituye, pero la bomba de repuesto funcionara igual a la bomba que va a cambiar.

En algunas aplicaciones la bomba nueva no quedara instalada en el mismo sitio que la bomba que sustituye. Esta bomba se adapta a mas de un modelo de vehículo. Pueden sobrar algunas piezas al terminar la instalación. Esta bomba no soluciona los problemas en el filtro, regulador, inyectores o de otros componentes del sistema de combustible. Use los procedimientos indicados en el manual de servicio para confirmar la falla de la bomba antes de reemplazarla.

**PRECAUCION:** Esta bomba de combustible no esta autorizada para uso marítimo o en aeronaves. No opere la bomba en seco, puede causarle daños. No utilice el cedazo usado. Las impurezas son la causa principal del mal funcionamiento de la bomba. Mantenga limpia la bomba y demas piezas.

### REEMPLAZO DE LA BOMBA DE COMBUSTIBLE

Es posible que deba volver a utilizar piezas de montaje o eléctricas durante la instalación de la bomba de repuesto. No destruya las piezas que pudiera necesitar en la instalación de la bomba de repuesto nueva.

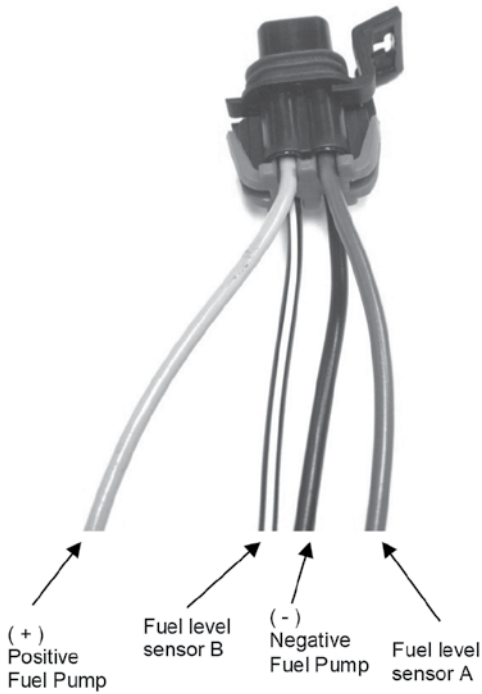

1. Verifique que la bomba ha fallado. \*Compruebe todos los componentes relacionados del sistema de combustible para verificar que el surtidor de gasolina es el que causo la falla.
2. Deje escapar la presión del combustible del vehículo. \*Consulte el manual de reparaciones específico del vehículo para el procedimiento apropiado
3. Desconecte el cable del poste [terminal] negativo de la batería
4. Vacíe el combustible del tanque [depósito de gasolina]. \* Drene el combustible en envases apropiados y siga todas las regulaciones locales.
5. Quitar el depósito [tanque] de gasolina del vehículo (si se requiere) \* Consulte el manual de reparaciones específico del vehículo para los procedimientos apropiados.
6. Quite la bomba de gasolina vieja \* Consulte el manual de reparaciones específico del vehículo para los procedimientos apropiados.
7. Limpie bien dentro del depósito de gasolina \* La contaminación del combustible es la causa principal que ocasiona la falla de la bomba de gasolina.  
\* El depósito de gasolina debe estar limpio y un nuevo filtro se debe instalar con la nueva bomba de gasolina
8. Examine los cables y las mangueras en el vehículo. \* Examine todo el cableado y mangueras del equipo original para saber si hay daños.  
\* El amés del cableado debe ser substituido si está incluido en el kit de la bomba de gasolina.  
\* Reemplace todas las mangueras gastadas o deterioradas.
9. Instale la nueva bomba y el nuevo módulo con el filtro nuevo de la bomba de gasolina \* Substituya siempre el filtro con las piezas nuevas al cambiar la bomba de gasolina
10. Reinstale el tanque de gasolina (si se requiere) \*Consulte el manual de reparaciones específico del vehículo para los procedimientos apropiados
11. Substituya el filtro de combustible \*El filtro de combustible sucio y viejo reducirá la vida de la bomba de gasolina y producirá presiones de combustible bajas
12. Llene el tanque totalmente con combustible limpio \* La bomba completa de gasolina /el modulo completo se deben sumergir completamente dentro del tanque para que el sistema se prepare a cargar.  
\* Espere un mínimo de 5 minutos para que la bomba de gasolina se prepare a cargar antes de encender el vehículo.
13. Encienda el motor y asegúrese de que no haya fugas \* Vuelva a conectar el cable de la batería  
\* La llave en el switch puede necesitar ser cambiado en on y off por varias veces antes de que se alcance la presión apropiada del sistema de combustible.  
\* Asegúrese nuevamente para saber si hay escapes

**NOTA:** Una perdida de presión de aceite o un interruptor de presión de aceite defectuoso, pueden dejar la bomba fuera de servicio.

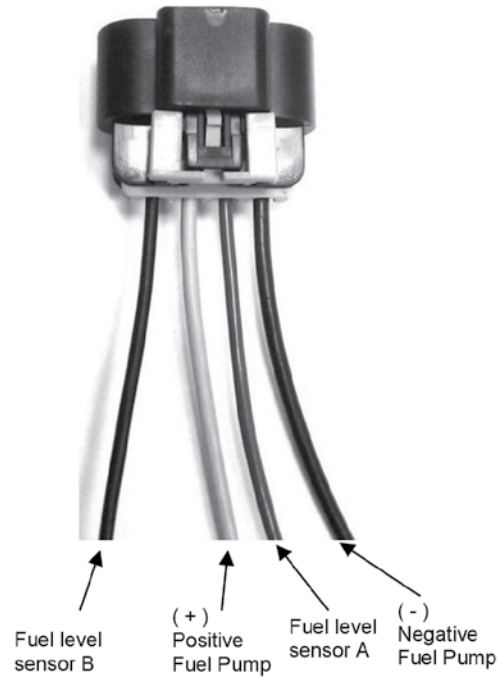

## SUPPLEMENTAL “FLAT-4” CONNECTOR WIRING INSTRUCTIONS

The OE wire harness connector should be cut and replaced with the new style connector for improved performance and reliability.

The new connector should be wired to the vehicle harness as noted in the below diagram:

A. E “OLD” HARNESS

B. NEW “FLAT-4” STYLE HARNESS

1. The (+) positive fuel pump wire should be connected to the positive output wire on the vehicle wire harness.
2. The (-) negative fuel pump wire should be connected to the negative output wire on the vehicle wire harness.
3. The A and B Fuel level sensor wires are non-polarized and can be connected to the vehicle wire harness fuel level sensor wires in either direction.

### Notes:

- A. *The positive and negative fuel pump wires in the included harness are a larger gauge than the fuel level sensor wires. Please take note of the wire sizes when installing the new connector.*
- B. *OE Harness wire colors may not be the same on all vehicles.*

# WARRANTY EXCLUSIONS

USMW Professional Series a brand of US Motor Works, LLC warrants products to be free from defects in material and manufacturing, under normal use and service. The following images are indications of damage caused by improperly maintained systems and modifications.

- A.** Modified parts
- B.** Broken parts
- C.** Dark, clogged, or contaminated strainers
- D.** Units with corrosion, rust, or discoloration from contamination
- E.** Units with burned wiring or connector

# ***INTERNAL PUMP TYPES***

## ***Roller Vane***

This pump uses a steel rotating disk with sliding rollers that move outward and suck fluid through the pump. Roller vane pumps can tolerate fuel contamination much better than other pumps but create more noise.

## ***Gerotor***

This pump has a steel gear type pumping mechanism. Gerotor is quieter than roller vane but cannot tolerate fuel contamination.

## ***Turbine (single and double stage)***

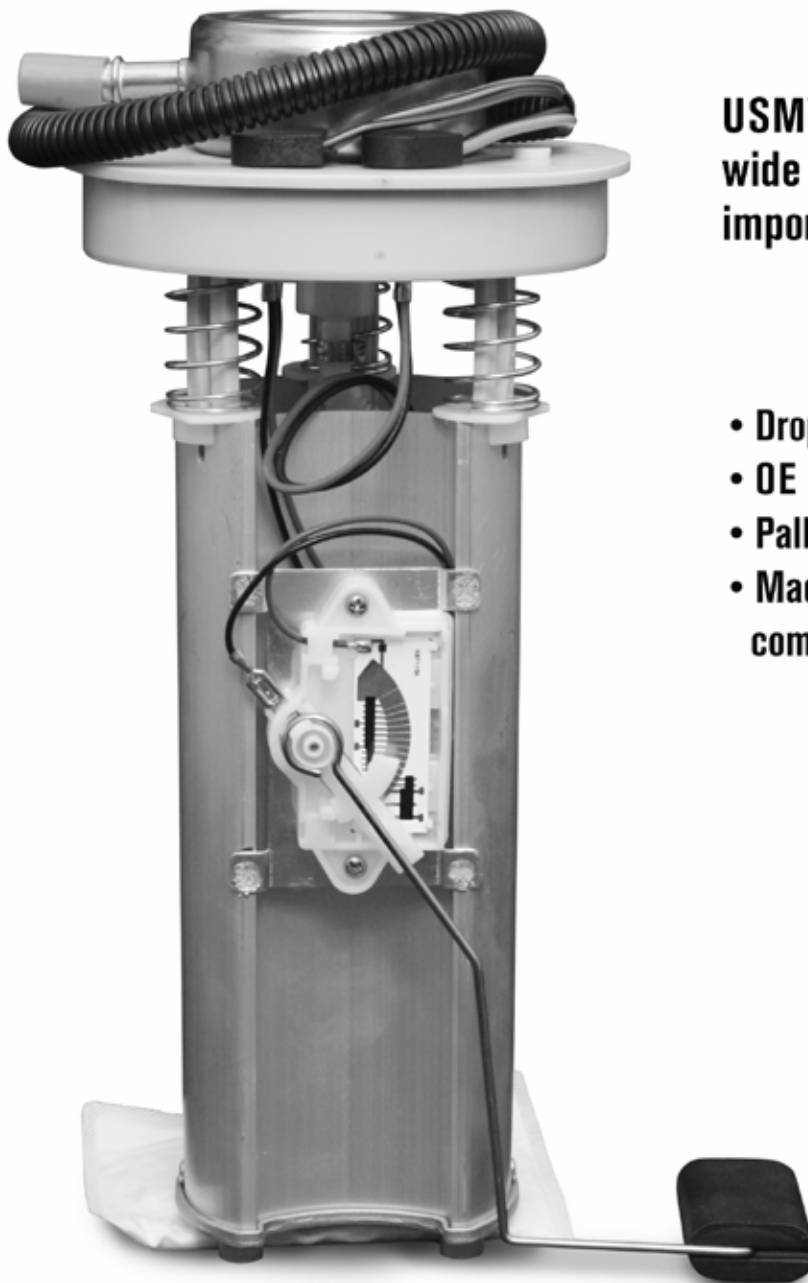

The spinning of the turbine causes fluid to flow through the fins moving the fuel through this pump. The turbine turns at a higher speed than the other pump types and requires tighter tolerances to operate. Because of the tight tolerances required on turbine pumps, they are very susceptible to debris and fuel contamination.

# FUEL PUMP MODULES

*Trusted by professionals around the world*

USMW Professional Series offers a wide range of fuel pump modules for import and domestic applications.

- Drop-in replacement
- OE Style internal fuel pumps
- Palladium Silver fuel level sensor
- Made with modern materials that are compatible with today's fuel blends

Designed, tested and inspected in the USA

# FUEL PUMP MODULES

*USMW Professional Series fuel pump modules are manufactured with quality components*

- POM plastic used for strength and durability
- Thicker connector pins for increased reliability
- Teflon insulated wires for superior chemical resistance
- Nitrile or Viton used for rubber components for long life and fuel resistance
- Stainless steel used for all metal components
- Foam fuel float for increased reliability over molded type
- Dual strainers for superior filtration. Mounted internally and externally

## OE Style internal fuel pumps

USMW uses OE style fuel pumps rather than less expensive turbine units (where applicable). This ensures quality and performance that meets or exceeds OE standards.

## Palladium Silver fuel level sensor

The Palladium Silver is resistant to corrosion from Ethanol and Ethanol blended fuels.

## Bifurcated Contacts

Level sensors also feature bifurcated contacts for long life and accurate fuel reading.

# FUEL PUMP KITS

*Trusted by professionals around the world*

USMW Professional Series offers a wide range of fuel pump kits for import and domestic applications.

FUEL PUMP KITS

- **Designed to OE dimensions**
- **All items included for proper module rebuild**
- **100% functional tested**

Designed, tested and inspected in the USA

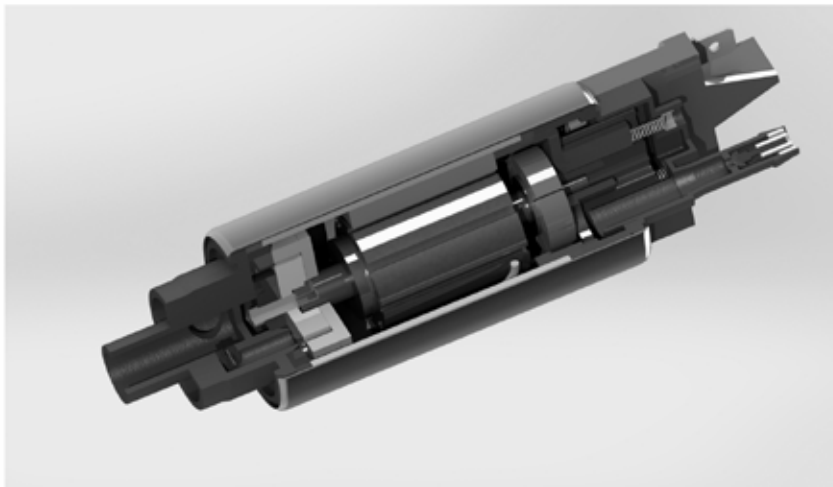

# FUEL PUMP KITS

***Trusted by professionals around the world***

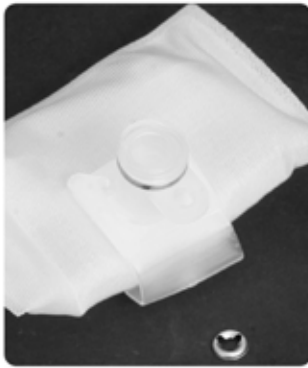

## ***OE Style internal fuel pumps***

USMW uses OE style fuel pumps rather than less expensive turbine units (where applicable). This ensures quality and performance that meets or exceeds OE standards.

***New Wiring***

***New Strainer***

***New Fuel Lines***

USMW Professional Series fuel pump kits for Domestic and Import applications include all components required to rebuild your existing fuel pump module or hanger assembly. All fuel pump kits include strainers and are manufactured using quality components, wiring and gaskets. All units are manufactured using the highest quality raw materials that are compatible with today's fuel blends.

**Designed, tested and inspected in the USA**

# MECHANICAL FUEL PUMPS

***Trusted by professionals around the world***

**USMW Professional Series offers a wide range of mechanical fuel pumps for import and domestic applications.**

Designed, tested and inspected in the USA

- **High precision castings**
- **Reinforced diaphragms**
- **All gaskets and Hardware included for proper installation**

# MECHANICAL FUEL PUMP APPLICATION GUIDE

# FUEL PUMP STRAINERS

***Trusted by professionals around the world***

USMW Professional Series offers a wide range of replacement fuel pump strainers for our complete line of fuel pump modules and kits

- **High Quality Multi-density material**
- **All materials compatible with modern fuel blends**
- **Precision molded pump interfaces**

Quality made strainers help protect your fuel pump from contamination, this helps ensure longer lasting fuel pump performance.

Designed, tested and inspected in the USA

# UNIVERSAL FUEL PUMPS

***Trusted by professionals around the world***

**US Motor Works offers a complete line of Universal Fuel Pumps to fit all your custom fuel delivery needs.**

**Our Universal Fuel Pumps are compatible with a range of modern fuels, for carbureted and fuel injection applications**

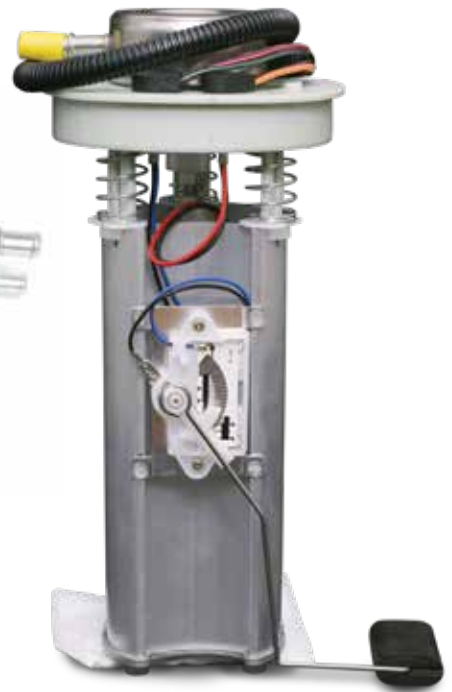

- Multiple mounting configurations
- Low and High pressure
- 100% Tested in the USA

## Product Development

With our 6 simple steps in new product development process, US Motor Works sits in the driver's seat when it comes to quick and precise product development. From product definition to design, production planning and preparations, prototype production and final production run, it's a mere 120 days or less. US Motor Work's OPEX mentality enables us to be on the leading edge of product development.

## E.I.T. Electronic Information Technology

US Motor Works utilizes proprietary Electronic Information Technology as a communication and information platform for new product releases, bulletins, technical updates and general client correspondence. USMW E.I.T. is internet based with 24/7 365 days a year access to keep our clients up to date in the most efficient and expedient format possible.

As part of our E.I.T. Platform we have also added the Pro Tech Center to the [www.usmotorworks.com](http://www.usmotorworks.com) website. The US Motor Works PRO Tech Center is designed to keep you up to date with the latest articles, product releases, tech tips and videos.

## A.E.T.S. Advanced Engineering & Technical Support

US Motor Works has created an engineering and technical environment from the design process to the final production product. Starting with CAD/CAM 3-D projections, computerized testing, a complete manufacturing plan and ending with a reliable distribution network. US Motor Works is able to track and control all related design, quality processes and packaging with specifications and manufacturing excellence in mind.

## Manufacturing

Our State-of-the-art manufacturing utilizes our four principles; Supply Chain (improved flow), Quality Management (robust quality assurance), Production (pull & flow and 5S) and Measurements by KPI's (Key performance indicators). With these manufacturing principles and our continuous improvement ideology under the OPEX umbrella, US Motor Works continues to be the front runner among the industry leaders.

## In-House Marketing & Graphic Design

Our In-house marketing and graphic design department helps to ensure our branding is at the forefront of the automotive industry. Working closely with category managers allows us to create powerful advertisement campaigns, marketing sales tools and educational pieces.

Along with the printed media, our team also works on a digital platform via brand specific websites and social media. Through social media we are able to connect with the end users and get genuine testimony of our products, thus making each brand recognizable and a name they can trust.

Trusted by professionals around the world

US Motor Works, LLC and its employees are committed to providing an extensive line of consistent high quality products and the finest customer service and satisfaction.

95

- US Motor Works Established in Commerce, Ca.

97

- Scaled up Manufacturing of Water Pumps to 30,000/Month

99

- Moved to a 30,000 sq. ft. facility in Cerritos, Ca.
- Purchased Fan Clutch Division

05

- Entered Joint Venture with Chinese Casting Manufacturer

06

- 40% Annual growth
- Expanded Facility to 50,000 sq. ft.

07

- Production reached 1,000,000 Water Pumps per year
- Opened Engineering Facility in China

08

- Development & Distribution of Electric Fuel Pumps

09

- Moved to a 80,000 sq. ft. facility in Santa Fe Springs, Ca.

10

- Became ISO 9001:2008 Certified

11

- Timing Kits w/ Water Pumps added to the product line
- Approved Vendor by APA & Viper HD

12

- Launched HD product lines
- Approved Vendor by ADN Silver
- Expanded the facility to 100,000 sq. ft.

13

- Approved Vendor by Alliance & ADN Gold

14

- Expanded HD offering into Oil Pumps & Mechanical Transfer Pumps

15

- Celebrated 20th Anniversary
- First Automotive aftermarket company certified as ISO 9001:2015
- AASA top 100 Automotive Aftermarket suppliers

16

- Purchased Pacer Performance, est.1965
- Derale Performance, est.1975
- Introduced Max Cooling Kits
- USMW Professional Series undergoes re-branding
- Expanded Facility adding 50,000 sq. ft of Manufacturing & Warehouse

17

- Campaign launch for USMW HD
- Operating out of two facilities in CA (Los Angeles & Santa Fe Springs)
- More than 150,000 SQ FT of Manufacturing and Distribution

18

- Performance Division certified as ISO 9001:2015
- Introduction of mechanical fuel pumps to the line
- Auto Care Association recognizes Max Cooling Kit as an official part type (56846) water pump with fan clutch

19

- Opening of US Motor Works S. de R.L. de C.V. in Santa Caterina N.L. Mexico
