4-CHANNEL

*Highly Sophisticated 4-Channel Wavematching Full Logic SQ Decoder Circuitry

*Also Plays All Stereo Records and FM Stereo Broadcasts With Outstanding Audio Quality

Lafayette's LR-4000 produces a more spectacularly true-to-life sound than any receiver we have ever designed! The reason is simple. We took the best features from our best receivers, then improved upon each. To our finest SQ decoder we added wavematching full logic circuits, giving SQ encoded music far wider front-to-rear and left-to-right separation and a much more dramatically beautiful sound than almost anyone had believed possible. To our best 4-channel amplifiers we added a lot more power so that even in the largest room in your home you'll be totally immersed in the sound. And, to our most sensitive FM tuner, we added Phase Locking FM Multiplex decoding circuitry to optimize FM stereo separation and minimize distortion. The FM tuner also includes dual-gate MOSFET RF transistors for superior AGC action and cross modulation rejection.

POWER RATINGS: 228 Watts RMS (4 x 57 Watts) at 4 ohms, THD 1% at 1 kHz; 290 Watts IHF at 4 ohms.

tion. The AM/FM signal strength and FM center scale tuning meters make precision fine tuning a breeze. Pushbuttons put you in control of Speakers (main and remote), Inputs (five choices), and Modes (including two tape monitor, loudness, high filter, and FM mute). Rotary switches let you choose the Function and Tuner Mode. Tape and stereo mike inputs and stereo tape and two headphone outputs allow use with any and all components. And, dual concentric Volume and Tone controls permit you to tailor the superb sound to your personal taste. Meticulously designed with a brushed aluminum front panel, in a handsome walnut-finished wood cabinet. Size: 21W x 5 1/4" H x 13" D. For 117 VAC, 60 Hz. Imported.
