SUBMISSION OF PSE DATA AND ESTIMATES

European Communities

In accordance with paragraph 3 of MTN.GNG/NG5/7, the following PSE data and estimates have been received from the European Communities. It should be noted that these data and estimates are provisional and subject to revision.

European Communities : Communication of PSEs established by OECD

At the last meeting of the GATT Agricultural Negotiating Group, those Contracting Parties, in respect of which the OECD had established PSEs, were invited to communicate PSE data to the GATT Secretariat.

The attached tables 1 to 13 contain the Producer Subsidy Equivalent in respect of the EC of 10 (Spain and Portugal not included) for the period 1979-1986 as established by the Secretariat of the OECD. The PSEs are preliminary and may be subject to amendments before definitive approval in the framework of OECD. At this stage, the PSEs can therefore only be used for the purpose of achieving a better understanding of the system of PSEs. The measures applied by the EC are described in document L/6111 Add. 19.

Notes to Table 3

PSE : PADDY RICE

Definitions
and Notes:

Production: Paddy Rice, total of long grain and round grain rice grown in Italy, Greece and France.

Producer Price: Paddy rice, price from producer to cooperative or trade in Italy and Greece.

Reference Price: Long grain rice, rice equivalent to EEC-produced long-grain standard (Ribe), cif Rotterdam husked converted to paddy by dividing 1.25 (= Paddy Rice equivalent).

Sources:

Production: Eurostat -- Supply Balance Sheets, various years.

Producer Price: Eurostat -- Agricultural Price Statistics, (Code A.08).

Reference Price: EEC -- The Agricultural Situation in the Community.

Notes to Table 4

PSE : SOYABEANS

Definitions
and Notes:

Production: Soyabeans (oilseeds).

Producer Price: Soya (oilseeds). Minimum Prices (EEC).

Reference Price: Soybeans, cif Rotterdam.

Deficiency Payments Calculation: $[(\text{Adjusted value of production})/(\text{Level of Production}) - (\text{Reference Price})] \times (\text{Level of Production})$. (To estimate the part of the deficiency payment received by producers.)

The principal means of support is through a system of production aids, which are calculated as the difference between target prices and world market prices, paid to oilseed crushers and which is effectively a deficiency payment. In order to conform to the standard presentation of PSE tables and to avoid double-counting of deficiency payments, the producer price is shown as the reference price in the table, to which is added the estimated deficiency payment, resulting in the adjusted value of production which equals the actual value of producer receipts. For example, in 1985, the reference price was 286.7 ECU/T, the deficiency payment was 219.9 ECU/T (75.4 M.ECU/0.343 M.Tonnes) and the actual producer price received was 506.6 ECU/T.

Sources:

Production: Eurostat -- Supply Balance Sheets, various years.

Producer Price: EEC -- The Agricultural Situation in the Community, various years.

Reference Price: EEC Commission.

Notes to Table 6A

PSE : SUGARBEET

Definitions
and Notes:

Production: Sugar beet used for white sugar.

Producer Price: White sugar-crystallised, prices from industry to the trade and from refineries to retail outlets. Sugar beet -- standard quality 16% sugar content, from producer to refinery.

Reference Price: White sugar, Bourse de Paris, fob, EEC.

Production Levies on Producers: Only the 60% of levies paid by producers are included. The remaining 40% which is paid by processors is not included in the calculations.

Sources:

Production: Eurostat -- Supply Balance Sheets, various years.

Producer Price: Eurostat -- Agricultural Price Statistics 1973-1984 and 1976-1985, Code C.02 (Sugar Beet), Code K.02 (White Sugar) and Eurostat.

Levies: EEC, Annual Financial Report on the EAGGF -- Guarantee Section, 1984 and 1986.

Reference Price: F.O. Licht, International Sugar Report, various issues.

Notes to Table 7

PSE : WHOLE MILK

Definitions
and Notes:

Production: Whole milk (raw material) from cows, excluding suckled milk.

Producer Price: Farmgate price, whole milk 3.7% fat, adjusted for average fat content, including coresponsibility levy.

Non-marketing Premium: included under "non-marketing" (diversion, VI.B.4).

Market Development, Improvement of Milk Quality and Small Producers' Measures: included under "Other" (VI.B.6).

Co-Responsibility Levies: Levy on milk delivered to dairies, with the exception of mountain and hill farms, fixed at a flat rate of the target price.

Method of calculation of whole milk reference price is given in the following table.

Sources:

Production: EEC, The Agricultural Situation in the Community, 1986 Report.

Producer Price: European Commission.

Producer levies/subsidies: EEC Annual Financial Report on the EAGGF -- Guarantee Section, various years.

PSE : BEEF AND VEAL

Definitions
and Notes:

Production: Total cattle, carcass weight, gross indigenous production (excludes net domestic meat production from trade in live animals).

Producer Price: Market price (wholesale), liveweight converted to carcass equivalent by applying a coefficient of 1.85 to liveweight price.

Reference Price: Export price of live animals free-at-Community frontier offer price, liveweight converted to carcass equivalent. This price is not necessarily representative of all beef and veal exports from the EEC.

Deficiency payments: Slaughter premium for full-grown cattle other than cows (United Kingdom). Community payments (40 per cent) plus national payments (60 per cent).

EEC Premiums for calving and for suckler cows included under "Other" (VI.B.6).

Sources:

Production: Eurostat -- Supply Balance Sheets, various years.

Producer Price: GATT, Arrangement Regarding Bovine Meat, The World Market for Bovine Meat, various issues; GATT, The International Markets for Meat, various years.

Reference Price: Information provided by the EEC to GATT in connection with the arrangement regarding bovine meats.

Deficiency Payments, Premiums for Calving and Premiums for Suckler Cows: EEC, Annual Financial Report on the EAGGF -- Guarantee Section, various years.

Notes to Table 9

PSE : PIGMEAT

Definitions
and Notes:

Production: Pork, carcass weight, gross indigenous production (excludes trade in live animal equivalent).

Producer Price: Pigs, class II, carcass weight (for France, delivered to the slaughter house, for Italy, ex-farm or market and for the remaining countries, ex-slaughterhouse or market).

Reference Price: Market price support is based on the excess costs of feed used in pigmeat production. As a representative EEC export price for pigmeat is not available an implicit price has been calculated as follows. It is assumed that 4.2 tonnes of cereals (1.4t of wheat and 2.8t of barley) are used to produce 1 tonne of pigmeat. Excess feed costs per tonne of pigmeat are calculated as the difference between the EEC producer and world prices for wheat, multiplied by 1.4 plus the same calculation for barley, multiplied by 2.8. The resulting excess feed cost for each tonne of pigmeat is then deducted from the producer price of pigmeat to derive the implicit reference price. All prices are taken from the relevant PSE tables. This additional cost corresponds to the excess feed costs used in calculating net PSEs.
