

SLOT-IN PC WITH INTEL® CORE i3 PROCESSOR (4TH GENERATION)

OPS Core i3 4100E 4-32-WS7E i3001A ORDER CODE: 100013894

OPS Slot-in PC

The Slot-In PC is a complete PC solution, compatible with all NEC Large Format Displays featuring the OPS Slot and NEC PX and PH Series installation projectors.

Ideal for demanding Signage applications, the new Intel Core i3 2 x 2.4 GHz processor (4th generation "Haswell") Slot-in PC not only delivers an amazing dual-core performance perfect for crisp content playback it also features a wide range of connectivity options, including 3 x USB, DisplayPort out, RJ45 and Audio, so it can be easily integrated into your network architecture. The OPS concept provides a compact and fully embedded solution ensuring that all connectors are integrated including Power, Video & Audio Signals and RS232. No External Cables are required and these devices are much less vulnerable to potential theft. Alternative external solutions may require special safe and secure mounting solutions, racking up additional costs.

NEC OPS CONCEPT: A SIMPLE PLUG IN TO THE FUTURE

The NEC Slot-in Option Board concept means that your display device has a versatile upgrade path for the future. Your Option Board can be exchanged between any NEC display or high end NEC projector fitted with an OPS compatible option slot, meaning that a single device can be used in different products in different locations on a simple plug in and play basis.

With no cables required due to internal connection for power, video, audio and control, the option board fits neatly within the display or projector profile for a more elegant installation.

SINGLE SERVICE POINT

An NEC Display Solution that incorporates an Slot-in Option Board uniquely gives the customer one service contact and matching warranties for the display and the board. Should servicing be required, an Option Slot product can easily be removed and serviced separately with the display remaining intact.

FUTURE PROOFING YOUR DISPLAY

Future savings are possible by upgrading only your OPS device or your display and not needing to change all hardware. Devices are exchangeable between compatible products either directly, or in certain cases, using a cradle.
