- (a) On November 1, 2000, the University entered into an agreement with the New York City Industrial Development Agency (the "Agency") to finance costs of acquisition, construction, renovation, equipping and furnishing of various facilities (the "Project") used by the University. The facilities primarily consist of a new academic/athletic facility, a new

(dollars in thousands)

dormitory, laboratory improvements and the upgrade of the wide area network infrastructure. The facilities are located at the University's main campus in Brooklyn. The Agency issued \$90,000 Civic Facility Revenue Bonds to finance these costs. Concurrently with the issuance of the bonds, the Agency and the University entered into a lease agreement whereby the University leased the facilities to the Agency for the term of the bonds. Both parties also simultaneously executed a lease agreement whereby the Agency subleased its leasehold interest in the facilities back to the University for the term of the bonds.

The payment of the principal and interest on the bonds is guaranteed by the University. The bonds are not collateralized by any mortgage lien on, or security in, any of the facilities or property of the University. The University has covenanted not to create mortgage liens on, or security interests in, University facilities or other property.

The Bonds are subject to optional redemption prior to maturity on or after November 1, 2010, in whole at any time or in part on any Interest Payment Date at the option of the Agency (which option shall be exercised upon the giving of notice by the University) under certain circumstances. Additional bonds may be issued for the purpose of completing the project. These completion bonds in the aggregate, together with any long-term debt incurred for the purpose of completing the project, may not exceed ten percent of the original principal amount of the bonds.

Under the lease agreement, the University may incur additional long term indebtedness only if (A) the debt service coverage ratio with respect to all existing long term indebtedness of the University and proposed additional long term indebtedness shall be equal to not less than 1.20 for each of the two most recent complete fiscal years preceding the incurrence of the proposed additional long term indebtedness and (B) maximum annual debt service with respect to all existing long term indebtedness of the University and the proposed additional long term indebtedness shall be equal to or less than 10% of Unrestricted Revenues for the most recent fiscal year preceding the incurrence of the additional long term indebtedness.

In connection with the lease agreement, the University is subject to certain rate and liquidity covenants. Under the lease agreement, the University is required to maintain in each fiscal year, commencing with the fiscal year ending June 30, 2005, tuition and fees and other unrestricted revenues sufficient to produce in each fiscal year a debt service coverage ratio equal to or greater than 1.10 with respect to all outstanding long term debt of the University. The University is also required, through and including June 30, 2006, to have on hand unrestricted assets held in cash or securities in the unrestricted quasi endowment at least equal to \$15 million at June 30 and December 31 during each fiscal year. At June 30, 2004, the University held cash and securities in the unrestricted quasi endowment of approximately \$15.2 million. Commencing December 31, 2006, the University is required to have unrestricted quasi endowment at least equal to \$20 million at June 30 and December 31 during each fiscal year thereafter.

- (b) In February 1999, the University received a loan from Koch Financial for \$3,023 which was used for software application costs. The loan bears interest at 5.30% and is due in monthly installments from October 1999 through September 2004.
