Introduction

The catalogue of documents lists the COM Documents of the Commission of the European Communities, the Reports of the European Parliament and the Opinions and Reports of the Economic and Social Committee prepared during the reference period by the Office for Official Publications of the European Communities for distribution to the public.

The COM Documents and the Opinions of the ESC are available on paper and microfiche, whereas the Reports of the European Parliament are available only on microfiche.

This version of the catalogue takes account only of documents of which English language texts have been prepared. There are parallel catalogues covering documents in each of the eight other official languages of the European Community.

Presentation

The catalogue is divided into three parts.

Part I — The classified index provides a classification by subject, of the titles, under 17 headings (see 'List of headings' on page 8).

Each complete entry is preceded by a sequence number, which appears only once for each document title. The title of a document, however, may sometimes appear under more than one heading by virtue of the subject matter, and in this case the sequence number is given on the right-hand side of these secondary entries but without a bibliographic reference (see detailed explanation on page 7).

Part II — The alphabetical index comprises all the keywords or key expressions appearing in the document. The index, compiled using the Eurovoc thesaurus (multilingual list of Community terminology), is based mainly on analysis and subsequent redefinition of the document using keywords or key expressions contained in the Eurovoc thesaurus. This thesaurus will be supplied to subscribers or users on request.

The index contains from one to five keywords for each document, set out in alphabetical order with as many permutations as there are keywords which makes research easier. The keywords are followed by a reference number which refers to the sequence number in the catalogue (see detailed explanation on page 7).

Part III — The numerical index comprises all the documents in ascending numerical order.

Frequency and cumulation

Cumulative catalogues are published regularly. These, together with an annual catalogue, complement the monthly lists which only contain the thematic index.

Due to production constraints it has been necessary to produce an Annual catalogue covering the months from January 1992 until June 1993.

Subscription system

An attractive system of selective subscriptions is on offer for the paper versions of the COM Documents and the Opinions of the ESC covered by this catalogue either individually or in combination.

Microfiche subscriptions are also available, but only for entire series, either individually or in combination.

More information can be obtained from the sales offices whose addresses are given on the inside back cover.

Other publications

Other European Community monographs — whether classed as publications or documents — as well as periodicals are listed in the catalogue *Publications of the European Communities*.
