**FOR ASHES.** It is not safe to keep furnace ashes in the cellar or kitchen ashes near the house, unless put in Witt's Can, which is fire-proof. Indispensable to a neat yard, contents kept out of sight—can't scatter.

**FOR GARBAGE.** Dogs can't nose off lid and scatter contents. Witt's Can keeps the garbage where neither eye nor nose can detect it.

**CORRUGATED**—That's another word for triple strength. The All-Steel Witt Cans and Pails have their strength tripled along the lines of strain. That's because they're corrugated. Last for years.

# POWELL VALVES

*(Especially The "White Star" Valve)*

## Five Points of Efficiency Combined in the Powell White Star Globe Valve

OBSERVE THIS  
ILLUSTRATION.

1. Body symmetrically designed and well proportioned. Metal distributed to meet the most wear. Threads on outside of body where steam can not reach them.
2. Union bevel ground joint connection between body and bonnet. Red lead or cement unnecessary to make it tight.
3. Disc cast of "Powellium" Metal, an invaluable feature found only in the Powell White Star Valves. Makes them almost everlasting.
4. Stem can be repacked under pressure, and has an Acme thread, which is admitted the best for severe usage.
5. All working parts are made to gauge and are interchangeable.

Horse-shoe disc-holder "R" easily removed from stem when necessary for repair. Notice protecting disc shield.

Non-Corrosive Powellium Disc "V" has two wearing faces—if one side is worn out, simply turn it over. Finally when both faces are worn out, just procure a new disc—you won't need a new valve.

Lock-Nut "S" has a ground face with hexagon bottom which securely holds disc in place.

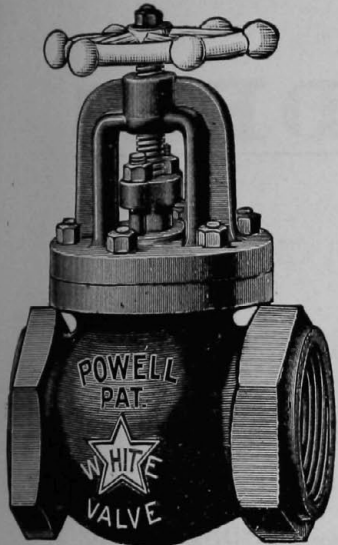

SPECIFY "POWELL VALVES" TO YOUR JOBBER, CONTRACTOR, ARCHITECT,  
ENGINEER—AND INSIST ON GETTING WHAT YOU SPECIFY.

**QUALITY.                      PREPARATION.                      SERVICE.**

It is the highest heat producing coal mined.

It is practically smokeless and sootless and produces less ash and clinkers than any other coal.

It gives greater satisfaction because it requires less attention and holds fire longer.

It is a natural cokeing coal and this places its merits far above other fuels for domestic use.

We would appreciate an inquiry so that we may discuss with you your requirements.

In it originated the method of teaching by thoroughly organized business communities.

From the first day until the last, students in the business department are engaged in actual business transactions.

The students are drilled daily in business arithmetic, penmanship and bill making. After engaging in business on his own account, each student is permitted to keep the books in two or three of the large offices connected with the business department of the school.

The Nelson College employs only first-class teachers in all departments. Each member of the faculty is especially educated and trained for the branches he teaches.

If she should die before receiving a monthly income for twenty years, we would continue that income to her children until twenty years from the time of your death, at which time they would be able to care for themselves. **Special Dispatch to the American Banker:—**  
St. Louis, Mo., Oct. 21.—The Victor Safe & Lock Co., of Cincinnati, received to-day the Highest Award—Grand Prize and Gold Medal—at the World's Fair, for their exhibit of solid Manganese Steel Bank Safes and general line of fire and burglar-proof safes and vaults; their magnificent display taking first prize over all competitors for modern improvements, construction, workmanship, design and finish.

So accurately is the door ground into the jamb of these safes with carborundum and oil that a metal to metal, air, water and steam tight joint is formed. No banker should purchase a safe without first investigating the Victor.

We carry a complete stock of fire-proof and burglar-proof safes at all times, and have some second-hand safes at great bargains.

## The Only One Piece Flanged Front and Back Air-Chamber Safe in the Market

We claim that we make the best Fire Proof Safe in the market today, and we base our claim on the following important features: A solid one piece back and front formed by flanging a square steel plate on our patented process which has been accomplished by years of study and experiment, although it was placed on record by scientists as impossible. The illustration and description of this SUPERIOR improvement will be sent on request, which gives you the various points of advantage of this new method over the old. Built in numerous styles and sizes.

## VAULT FRONTS.

Entire front made of one piece, with no mitered corners, making a one-piece continuous frame all around.

The strongest and most rigid vault front on the market.

Standard size made to fit opening 77 inches high 34 inches wide, for an 18-inch wall.

Inside clearance of door 28 inches wide x 74 inches high.

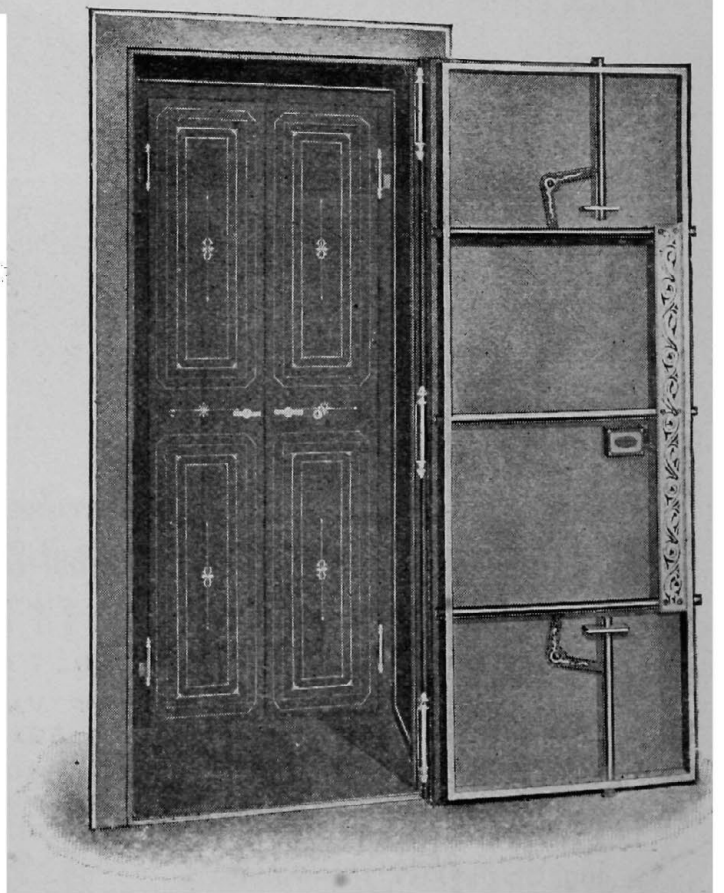

Door hung on two or three strong hinges, to suit purchaser.

Boltwork in different styles.

Description sent on application.

Inner doors made in two folds, batten-barred and fitted with flat up and down bolts. Locked with a flat key lock.

Rear flanges can be unscrewed and vault placed in position and leveled. To complete setting, it is but necessary to fill up all crevices after leveling, then place on back flanges and the vault is ready for use.

Books.	<p>5. The rate of postage on parcels of books weighing 8 ounces or less shall be 1 cent for each 2 ounces or fraction thereof, and on those weighing more than 8 ounces the pound rates shown in the table shall apply.</p>	<p>5½. When the sender desires that a parcel of fourth-class matter on which the postage is fully prepaid, with stamps affixed, at the rate for that class, be accompanied with a communication, which is not a permissible inclosure at the fourth-class rate, the communication may be placed in an envelope, and after the full amount of postage at the first-class rate is affixed to the envelope it may be tied to or otherwise securely attached to the outside of the parcel in such manner as to prevent its separation therefrom and not to interfere with the address on the parcel. The envelope shall be addressed to correspond with the address on the parcel. Parcels to which such communications are attached shall in all cases be treated as fourth-class mail.</p>	
Gold Coin.	<p>6. The rate of postage on gold coin, gold bullion, and gold dust offered for mailing between any two points in Alaska, or between any point in Alaska and any point in the United States or its possessions, shall be 2 cents an ounce or fraction thereof, regardless of distance. Such gold coin, gold bullion, or gold dust shall be inclosed in sealed packages not exceeding 11 pounds in weight and sent by registered mail.</p>	<p>Sec. 457. Seeds, cuttings, bulbs, roots, scions, and plants, shall hereafter be embraced in and carried as fourth-class matter, and for the same rates of postage. (Act of March 9, 1914.)</p> <p>The rate of postage on parcels of seeds, cuttings, bulbs, roots, scions, and plants, weighing eight ounces or less, is one cent for each two ounces or fraction thereof, regardless of distance; on parcels weighing more than eight ounces the pound rates apply. These rates apply whether the articles are for planting or other purposes.</p>	<p>Sec. 458½. On and after September 1, 1915, the Postmaster at the mailing office may, on payment of one cent, give the sender of an ordinary parcel of fourth-class mail a receipt therefor. A postage stamp to cover the charge for the receipt shall be affixed thereto. The name and address of the addressee of the parcel shall</p>

be written in the receipt by the sender. Postmasters desiring additional information on this subject should address the Third Assistant Postmaster General, Division of Registered Mails.

The purpose of this receipt is to provide senders of fourth-class parcels, when desired, a record evidencing their mailing for which a fee of one cent is charged. Their issuance does not in any way insure the parcels against loss while in the mails and no receipt is obtained from the addressee upon delivery. Patrons who desire either of these latter facilities must be advised to insure their parcels.

Receipt will be given on tag form 3817, an initial supply of which will be furnished to all Postmasters prior to September 1, 1915, the date this service is inaugurated. The name and address of the addressee shall be written on the tag by the sender, who may place his own name thereon if he desires, and affix on the tag a one-cent postage stamp in the space provided. The tag shall be tied to the parcel before mailing. The postal employee accepting the article shall compare the address on the tag with that on the parcel, postmark the stamp to show the date of acceptance, detach the receipt and deliver it to the sender.

The Firm Registration Book must be modified to provide such receipts when they are desired by firms and individuals mailing a number of parcels at one time. Each sheet must have affixed postage stamps at the rate of one cent for each parcel listed thereon, which stamps shall be postmarked and the sheet returned to the sender. These sheets are to be filled out by the sender and a carbon copy must not be filed at the post office.

When such receipts are desired by patrons residing on rural routes, the parcel should be delivered to the rural carrier, payment being made at the time at the rate of one cent for each parcel, in addition to the postage. The carrier will obtain receipts at the post office to which he is attached, affix stamp, postmark, and deliver the receipts to the senders on his next trip.

#### EXAMINATION OF PARCELS.

Sec. 469. Postmasters must examine parcels when presented for mailing to ascertain that the postage is fully prepaid.

**Parcels closed against inspection, etc.**

2. When any parcel offered for mailing is sealed or otherwise closed against inspection, or contains or bears writing not permissible, it is subject to postage at the first class rate and shall be treated as first class matter. If such a parcel exceeds four pounds in weight it is unmailable.

Sec. 463. The limit of weight for miscellaneous printed matter constituting third-class mail, the rate of postage on which is one cent for each two ounces or fraction thereof, is four pounds. Parcels of miscellaneous printed matter weighing more than four pounds, but which are within the limit of weight and size for matter of the fourth class, come within that class and are mailable at the pound rates of postage prescribed for fourth-class matter.

Sec. 460. When the postmaster at the office of mailing is satisfied that the sender of a parcel has knowingly concealed matter of a higher class therein, he must report the case to the Third Assistant Postmaster General, giving all the circumstances, including the name of the sender, if known, the name of the addressee, the office and date of mailing, and a description of the parcel and of the matter concealed therein.

2. When the postmaster at the office of address is satisfied that matter of a higher class has been knowingly concealed in a parcel, he shall deliver the parcel to the addressee on payment of the proper postage and report the facts to the Third Assistant Postmaster General. If the proper postage is not paid, the parcel shall be retained by the postmaster to be used as evidence, and he should be able to establish its identity.

Sec. 14. Postmasters at offices of address shall examine incoming parcels, and if any are found subject to postage in excess of the amount prepaid thereon, shall charge them with the deficient postage and collect it on delivery. If the addressee objects to the payment of the additional postage he may deposit the amount with the postmaster, who shall give a receipt therefor and submit to the Third Assistant Postmaster General a full statement of the facts. Should it be held that the parcel was prepaid at the proper rate, the postmaster will be directed to refund the deposit. If the parcel is not withdrawn by either the sender or addressee within thirty days, the postmaster shall report the facts to the Fourth Assistant Postmaster General (Division of Dead Letters) and await instructions.

#### LIMIT OF WEIGHT AND SIZE.

Sec. 464. If a parcel exceeds in weight or is greater in size than eighty-four inches in length and girth combined, it must be refused, no matter how small the excess may be in either case. (See sec. 1.)

2. The law prescribes that a package to be admitted to the parcel post shall not exceed eighty-four inches in combined length and girth. In measuring the length the greatest distance in a straight

All such matter, when deposited in a post office or found in the mails, shall be withdrawn and sent to the Division of Dead Letters, with a statement of the facts. Postmasters must not give opinions as to the mailable of any matter mentioned above, but must submit all such questions to the Assistant Attorney General for the Post Office Department.

10. Mailable hides and pelts shall be thoroughly wrapped to prevent grease soaking through the package and damaging other mail matter.

#### UNMAILABLE ARTICLES.

Liquids, poisons, explosive and inflammable articles, fatty substances easily liquefiable, live or dead animals (not stuffed), insects and reptiles, fruits or vegetable matter, confectionery pastes or confections, and substances exhaling a bad odor; and every letter upon the envelope of which, or postal card upon which indecent, lewd, obscene or lascivious delineations, epithets, terms of language may be written or printed, and all matter concerning lotteries, so-called gift concerts, or other similar enterprises offering prizes, or concerning schemes devised and intended to defraud the public, or for the purpose of obtaining money under false pretenses.

#### GENERAL SUGGESTIONS.

Postal cards spoiled in printing or otherwise, which have not been used will be redeemed.

Postal cards may be forwarded at the request of the party named in the address, the same as letters.

Never send money or anything valuable through the mail except by means of a money order or by registering.

Always put the name of the county on the envelope, and write or print a request for the return of the letter to your address if not deliverable. Write your name plainly; always give name of the street and number of the house in the address, and insert the name of the State in full, as the initials of a number of States are similar.

A subscriber to a newspaper should promptly notify the publisher if he changes his residence.

Avoid using cheap envelopes and thin paper for wrappers, thereby insuring certainty and safety.

All losses and irregularities should be promptly reported to the Postmaster, that the interests of the public and the efficiency of the service may be promoted.

**THE OHIO HUMANE SOCIETY.**

(For the Prevention of Cruelty to Children and Animals.)

Office and Headquarters, 24 E. 9th; Telephone Canal 5223. Rev. Wm. A. Robinson, President; Mrs. Theodore Workum, Vice President; O. A. Trounstein, Secretary and Treasurer. All complaints of cruelty and neglect to children and animals should be sent to the office of the Society, 24 E. 9th. The name of the informer will be held in

confidence and only used in case prosecution becomes necessary. The Society is one of the active out-door agencies for the protection and rescue of children. In the care of these unfortunate children, the society co-operates with the numerous houses of refuge, children's homes, orphan and other asylums, hospitals, nurseries, charities, etc. Its agents seek out and investigate cases of abuse and neglect of children, hunt up truant and criminal parents, and compel them to care for their children, and gather up homeless and dependent children. Offenders are prosecuted when necessary, and the little waifs are turned over to the permanent care of other organizations and institutions. In 1883 the Society secured the passage of a law providing a fine of \$200 and imprisonment for six months for parents failing to provide for their children. The enforcement of this law is having a most salutary effect. Hardly a day passes in which one or more cases are not reported of dissipated and licentious fathers who have deserted their families, leaving the wife to eke out a scanty existence as best she can at the wash-tub or with the needle, or to live upon public charity. The courts have co-operated earnestly in the enforcement of this law. Whenever an offender of this kind is brought before them, a heavy sentence is put over his head, and he is allowed to go on his good behavior. It is seldom necessary to bring him in a second time. It is gratifying to be able to state that, with this law to aid their efforts, the agents of the Society are able, in many cases, to bring about a satisfactory reunion and re-establishment of families without an appearance in court. It is always desirable to avoid publicity in such cases if possible. The law compels children to support their parents, when old and infirm, to which cases the society also attends. During 1915 258 sons and daughters were compelled to provide for their aged parents. We assist financially after prompt and personal investigation and pay rent for abandoned families. During 1915 this Society collected \$82,363.15 for the support of 3,290 minor children from truant fathers, and this entire amount was paid to their families without any cost to them. In the Animal Department the number of complaints amounted to 3,679 of which 1,377 related to horses and mules and 2,300 to other animals, 1,274 owners, drivers, shippers and custodians of horses and other animals, were officially warned as to the care of stock in the custody. During the year 1915, 38,065 animals were inspected.
