Epson **EB-Z8050W**

Looking for brilliant performance, innovative features and high-end technology? The Epson EB-Z8050W gives you that and more.

Introducing the first-ever 3LCD WUXGA projector
Epson brings you the new WXGA Epson EB-Z8050W, which features 7000 lumens, dual lamp system and 3LCD technology suitable for any large venue or event.

Bringing together 3LCD and optical technology
Epson brings 20 years of technology to a unique range of high brightness projectors. All 3LCD projectors use a 3-chip, solid-state optical engine to deliver incredibly bright, true-to-life colour, creating an astonishing level of realism. The three colour images are combined using a prism to form

Colour Light Output, the new metric for projector brightness
Bringing together 3LCD and optical technology
Epson provides Colour Light Output specification data. Colour Light Output measures a projector's ability to deliver colour, providing users with a simple, accurate and easy way to evaluate projector colour performance.

Outstanding quality, impressive size
The EB-Z8050W has 1280 x 800 pixels, and features Epson's most advanced C²Fine (Crystal

Outstanding quality, impressive size
Clear Fine) 3LCD inorganic panels with an inorganic alignment layer and vertically aligned liquid crystal. The result is smooth and uniform images with perfect contrast for high image quality.

Get superb digital cinema colour
When the Epson Cinema Filter technology, the Epson EB-Z8050W colour space even covers the DCI colour standard used in digital cinema, enabling accurate and faithful reproduction of colour content the way film producers originally intended.

See the difference
Epson's innovative optical technology delivers exceptional picture quality and the projector's auto iris brings out every shade of contrast. In addition, the colour light output of 7000 lumens and 5,000:1 contrast ratio give great greyscale for small print and figures as well as shadows and light.
