

Power quality solutions

Eaton IT racks

Unmatched reliability to store, power, manage and secure mission-critical electronics and servers

Store

- Flexible platform ensures quick reconfigurations, minimized downtime and protection of initial investment
- Industry leading weight capacity of up to 2,200 pounds (998kg)
- Full complement of accessories available to handle non-rackmount devices
- Guaranteed compatibility with EIA-310 standard size equipment

Power

- Basic, monitored and switched rack power distribution to fit today's ever-changing requirements
- Wide variety of custom and standard options allow for planning of increasing and unpredictable power densities
- Uninterruptible power supply (UPS) solutions address growing need for power availability

Manage

- Standard features and optional accessories provide a wide variety of cable management options
- Unobstructed front, rear and top cable access as well as ample cable management on the sides eliminates cumbersome pass-through holes for increasing copper and fiber cable loads
- Comprehensive environmental devices provide advanced detection of emerging problems

Secure

- Wide variety of device offerings to minimize damage and unauthorized access, while offering various levels of security
 1. **Mechanical lock** – Mechanical key options with master key (standard)
 2. **HID proximity electronic locking system** – HID proximity electronic locks using HID technology found in most data centers (optional)
 3. **Keypad friction lock** – self-powered electronic locks that provide audit trails without requiring batteries or line power (optional)

GRNDPMT	Grounding Kit	n/a	n/a	n/a	n/a	Green

*Integrated airflow management features come standard with this rack.

**Includes quantity of two side panels for end of rows.

Standard Features

Fully-welded frame

Accommodates high-density server equipment from tower to blade servers and offers multiple, unobstructed cable access points. Static weight load rating of 2,200 pounds. Includes tool-less 19-inch EIA-310 rails.

Integrated trough

Allows overhead cable distribution in an integrated and enclosed trough

Lifetime warranty

Eaton IT racks are backed by a limited lifetime warranty.

Optional Accessories

Solid side panel

A solid side panel kit (qty. 2) is available to further enclose your rack where end of row or single rack aesthetics is necessary

Heavy-duty fixed shelf

Supports non-rackmounted equipment. Four point mounting and 400 pound weight capacity

Grounding kit

Comply with National Electric Code (NEC) Article 250 – Grounding

Cable rings

Flexible mounting to multiple points for vertical cable management

Blanking panels

Tool-less plastic blanking panels prevent air recirculation
