# fi-7030
# Information Card

This document is intended for partners looking for material to create Fujitsu product pages.  In this document, we will tell you where to find pictures, videos, logos, brochures and manuals.

We will also provide you with the basic elements that most of you are using to create product pages, such as a product title, marketing description, technical specifications and what's in the box.

## Toolkit

A complete tool kit for these latest models can be found  within our Imaging Channel portal, typically this will include company and product logos, literature, imagery of both the static product and lifestyle shots as well as any associated videos,  product powerpoints and web banners.

Register or visit now at www.imaging-channel-program.com

## Scanner Pictures

A complete Image Library can be found at the following address:
www.imaging-channel-program.com

Choose the model you are interested in and the type of shots you are looking for.  We recommend the action shots that make the use of the product clearer to the end user.

## Scanner Videos

If you are interested in placing a product video tour on your web site, please contact :
Andrew Cowling – andrew.cowling@uk.fujitsu.com - + 44 (0)208 606 4463

We are working with Flixmedia which host the videos so that you never have to update the video yourself.  If a new version is available, it will automatically be updated on your website. For more information on the integration with Flixmedia, please visit www.flixmedia.tv/retailer.

## Web Content

We are working closely with syndication houses who are hosting a variety of our product content in text form but also rich form (embedded video, imagery and documentation). These companies are Web Collage for English content, CNET for English content and ICECAT for English, German, French, Italian and Dutch content.

If you already work with one of these companies then you need just to load the MPN on to your system and the content will be pulled over, equally if you would like to utilise any of these companies then contact Andrew Cowling at andrew.cowling@uk.fujitsu.com.

## Scanner Documentation

All manuals and brochures are located at the following links:
http://www.fujitsu.com/global/support/computing/peripheral/scanners/manual/
www.imaging-channel-program.com

shaping tomorrow with you

FUJITSU

**Product Title**
Fujitsu fi-7030 A4 ADF document scanner with PaperStream Capture 1.5

**Top Highlights**
• Instant document capture; fast processing: 27 ppm / 54 ipm full speed
• Entry-level professional document capture solution for public and commercial organisations
• Includes newly developed high performance document capture solution 'PaperStream Capture 1.5 licence' for improved batch scanning efficiency
        • Simplified and intuitive user interface incorporating "one click capture"
        • Design and fine tune document workflow at every step
        • Streamlines repetitive operations and provides step-by-step workflows
• Includes PaperStream IP which prepares digitised data for OCR processing and connects with a TWAIN or ISIS interface
• Includes an integrated bar code module that facilitates mixed batch scanning with automated processing
• Compact and robust with reliable feeding mechanisms

## Marketing Description

The fi-7030 is  the ideal entry point to professional information capture. It is equipped with PaperStream Capture Version 1.5  that offers a new ergonomic, touch compatible user interface which improves efficiency and interactions across the entire enterprise capture process. The fi-7030 is based on PFU's proven superior image quality technology, combined with improved image processing and capture software, offering everything that users need to start their digital transformation journey.

### Intuitive scanning and feeding functions

The fi-7030 captures A4 documents at a speed of 27 double sided sheets per minute (portrait, colour, 300 dpi) and can comfortably process mixed batches that can also include embossed cards, long paper scanning of up to 5 meters through the 50 page ADF is also possible as well as A3 documents utilising an optional carrier sheet.

The scanner additionally makes use of an ultrasonic sensor that accurately detects multifeed errors where two or more sheets are fed through the scanner at once plus intelligent multifeed function that is designed for documents that intentionally feature paper attachments of defined sizes or locations such as sticky notes or photos. The scanner can automatically recognise the location of the attachment and will then exclude that zone from triggering alert conditions.

### Skew Reducer helps ensure straight paper feeding

Should you be scanning mixed batches of differing thicknesses of documents then the "skew reducer" eliminates the risk of physical skew being carried over from one sheet in a mixed batch to the next ensuring that each document is captured with the utmost precision and simplicity. Multi-segmented pick rollers that rotate independently ensure that if a document goes through skewed then this will not affect the alignment of the next document.

### Hassle free monitoring and administering

The fi-7030 comes with Scanner Central Admin tools that includes functions that system administrators can use to manage the installation and operation of multiple scanners, monitor operating status and update drivers and software from one location. This ability dramatically reduces the cost and work that goes into setting up, operating and maintaining many scanners in an organisation and also in expanding the scanner network to multiple locations.

### PaperStream IP and PaperStream Capture 1.5

The fi-7030 comes bundled with PaperStream IP, an integrated  scanner driver and image enhancement module that is built on TWAIN/ISIS standards offering user friendly operability, intuitive high quality image creation and real time processing that will benefit post scan routines like OCR. PaperStream Capture 1.5 introduces detailed scanning routine information next to related profile pictograms, facilitating the capture process and allowing users to choose between fully transparent in-depth details for experts, or simplified easy processing for general users. A new "browse view" functionality, which displays both thumbnails and previews on one screen, enables the user to confirm scanned images during scanning. This saves time when users validate, classify and verify data. Other highlights include the display of batch jobs in process for more transparency and an on-the-fly batch release process. Once users have scanned a batch they can verify the data, alternate orders, collect documents in a joint file, index and automatically release to local or distant repositories, feed workflows, business applications or ECM systems.

FUJITSU

## Service and Support

A one year Advance Exchange is offered as a standard warranty and this includes online support along with parts/labour and shipping costs. Advance Exchange involves the delivery of a refurbished scanner which replaces the faulty scanner.

Service upgrades are available that extends the warranty period from between 1 to 5 years and additionally offers the possibility for items like onsite service with impressive response and repair times, accidental damage cover and remote desktop support.

## Part Numbers

| Scanner Model and Options | Part Number |
|---|---|
| fi-7030 | PA03750-B001 |
| Scanner Consumable Kit | CON-3706-001A |
| Scanner Cleaning Kit | SC-CLE-WGD |
| Carrier Sheets (5 sheets) | PA03360-0013 |
| 2D Barcode module for PaperStream | PA43404-A433 |
| Bronze Service Upgrade | UP-36-BRZE-7030 |
| Silver Service Upgrade | UP-36-SILV-7030 |
| Gold Service Upgrade | UP-36-GOLD-7030 |
| Platinum Service Upgrade | UP-36-PLAT-7030 |

# fi-7030 Information Card

## Tech Specs

- Scanner type: ADF
- Scanning modes: Colour / Greyscale / Monochrome / Automatic Detection
- Image sensor: Colour CIS x 2
- Light source: 3 Colour LED x 2
- Optical resolution: 600dpi
- Scanning speed (A4 portrait): 27ppm / 54ipm (200 and 300 dpi)
- ADF capacity – 50 sheets
- Document size / Document weight: Min: 50.8 x 50.8 mm, Max ADF: 216 x 355.6 mm / 40 to 209 g/m2
- Interface: USB 2.0 (USB 1.1 compatible)
- Driver: PaperStream IP
- Power requirement: AC 100V to 240V,
- Operation environment: Temperature: 5°C to 35°C, Relative humidity: 20 to 80% (non-condensing)
- Power consumption: Operating: 17W or less; Sleep mode: 1.1W or less
- Dimensions (W x D x H): 290 x 146 x 130 mm
- Device weight: 2.9kg
- Environmental compliance: ENERGY STAR® compliant / RoHS
- Compatibility – See http://emea.fujitsu.com/fiscannerfaqs/ for further information

- Software included (or available for download):

  - PaperStream IP
  - PaperStream Capture 1.5
  - Software Operation Panel
  - Error Recovery Guide
  - Scanner Central Admin tools
  - ScanSnap Manager for fi Series
  - Scan to Microsoft SharePoint
  - ABBYY FineReader for ScanSnap

}  DOWNLOAD

## What's in the box

- fi-7030 scanner
- ADF paper chute
- Getting started and safety precautions
- AC cable (varies depending on the country)
- AC adapter, USB cable
- Set up DVD-ROM
