- USB 2.0 port or above
- CPU: Intel® Core™ 2 Duo E6750 (2.66GHz) or above
- Memory: 2GB or more is recommended
- Graphics Card: Intel® HD Graphics, AMD Radeon™ HD 5000, NVIDIA GeForce® 400 series and above
- Use HDCP Compatible display and VGA card to High Definition digital output
- Windows® 10/ Windows® 8.1/ Windows® 8/ Windows® 7
- Mac® OS X 10.6 and above
- High quality headphones or powered analog speakers

## 1.4 Specifications summary

General Specification	
Read Speed	DVD±R(SL/DL): 8X
	DVD±RW: 8X
	DVD-ROM(SL/DL): 8X
	DVD-RAM: 5X
	CD-R/RW/ROM: 24X
	DVD Video Playback: 4X
	VCD Playback: 16X
	Audio CD Playback: 10X
	DVD+R(M-DISC): 8X
Write Speed	DVD±R: 8X
	DVD+RW: 8X
	DVD-RW: 6X
	DVD±R(DL): 6X
	DVD-RAW: 5X
	CD-R: 24X
	CD-RW: 24X
	DVD+R(M-DISC): 4X
Audio Performance	
Output Signal-to-Noise Ratio (A-Weighted)	up to 114dB
Output Total Harmonic Distortion + Noise at 1kHz (A-Weighted):	up to 0.0005623% (-105dB)
Frequency Response (-3dB, 24-bit/192kHz format):	10Hz to 48kHz
Output Full-Scale Voltage	2 Vrms (5.65 Vp-p) for line out, 7 Vrms (19.8 Vp-p) for headphone out
Main Chipset	
Audio Processor	Cmedia 6631A High-Performance Sound Processor
D-A Converter of Digital Sources	Cirrus CS4398 x1
Sample Rate and Resolution	
Analog Playback Sample Rate and Resolution	44.1/48/96/192kHz @ 16/24bit
S/PDIF Digital Output	44.1/48/96/192kHz @ 16/24bit
ASIO 2.2 Driver Support	44.1/48/96/192kHz @ 16/24bit
Others	
Interface	USB 2.0
Dimensions	210 x 169 x 44 mm (L x W x H)
Weight	590g

## 1.5 Getting to know your device

### Front view

### Rear view

No.	Items	Description
1	Power on/off button	Press the button to switch on/off the device.
2	Power indicator	The LED will light up when powered on.
3	Optical drive bezel	Insert an optical disc here.
4	Eject button	Press the button to eject the optical disc.
5	Headphone out port	Connect your headphone to this port.
6	Volume control	Rotate to adjust the playback volume.
7	Front out port	For 2/5.1/7.1 channel speaker systems, connects to the front input on the powered speakers.
8	Rear out port	Connects to the rear surround input on 4/5.1/7.1 powered analog speakers.
9	Center/ subwoofer out port	Connects to the center/subwoofer input on 5.1/7.1 powered analog speakers.
10	Side surround out port	Connects to the side surround channel input on 7.1 powered analog speakers.
11	Toslink out port	Connects to an external digital decoder or digital speaker systems, Home Theater systems, AV receivers.
12	Gain switch	Pre-set low gain, you can switch to high gain when using high impedance headphone.
13	USB port	Connects to your computer using a USB 2.0 cable.
14	DC in	Connects to the adapter.

## 2. Setting up your device

### Step 1: Connecting to your computer

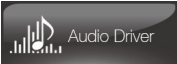

1. Connect the type A USB connector of the bundled USB 2.0 cable to your computer, and the Micro-B connector to the optical drive.
2. Connect the adapter to the main drive.
3. Connect one end of the power cord to the adapter and plug the other end into a wall socket.

### Step 2: Installing the driver on Windows® OS

After connecting the drive to your computer, you need to install the device driver that enables the drive to work with Windows® operating system.

To install the driver on your computer:

1. Power on your device.
2. Insert the bundled driver CD into the optical drive bezel.
3. On the AutoPlay window, click **Run setup.exe**.
3. On the next screen, click  and follow the on-screen instructions to complete the installation.
4. After the installation is complete, restart your computer.

---

#### NOTES:

- The driver works only when you connect SDRW-S1 LITE to a desktop PC or notebook PC.
  - The version and contents of the support CD are subject to change without notice.
  - The driver is for Windows® operating system only. Driver installation is not required for Mac OS.
-

### Step 3: Connecting output devices

There are three options to connect output devices.

#### A. Connecting stereo headphones

#### B. Connecting powered analog speaker systems

Connecting 2-channel speakers

#### C. Connecting 7.1 or 5.1-channel speakers

7.1-channel speakers

5.1-channel speakers

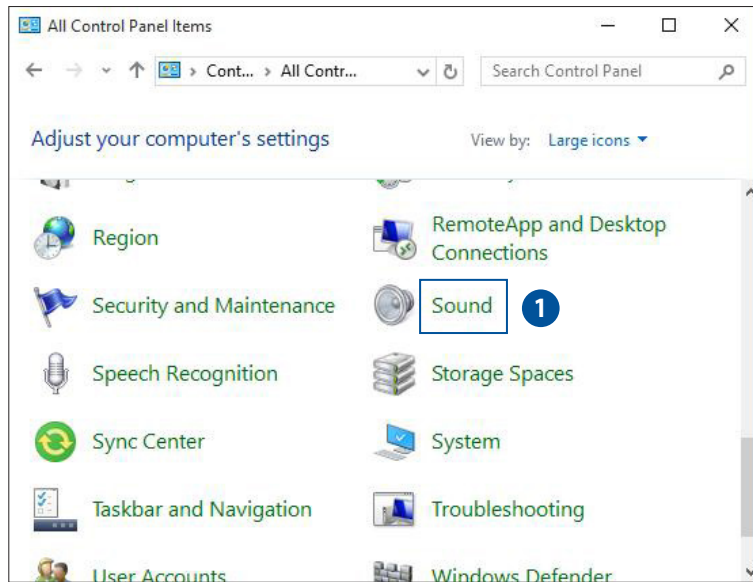

## Step 4: Configuring the audio settings

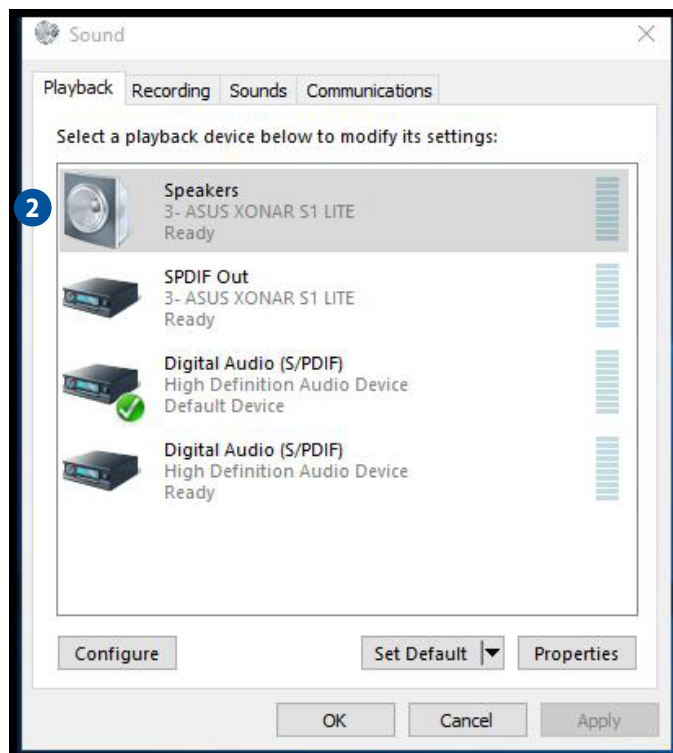

### On Windows® OS

Follow these steps to configure the audio settings:

1. Go to Control Panel and click **Sound**.

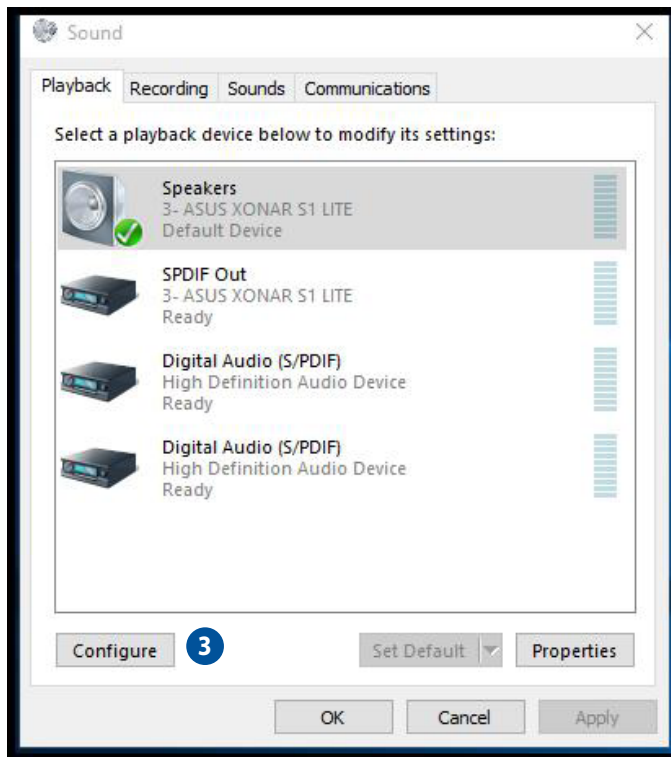

2. Select ASUS XONAR S1 LITE and click **Set Default** to set ASUS XONAR S1 LITE as the default audio output.

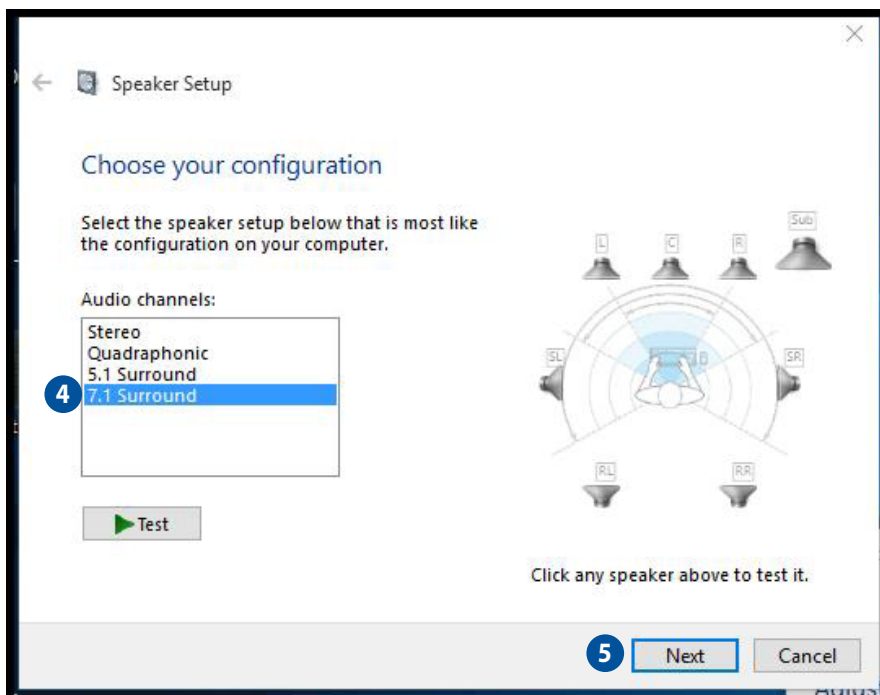

**NOTE:** Skip the following steps when using a headphone.

3. If you want to connect your device to multi-channel speakers, click **Configure** to set up your speaker.

4. Choose the appropriate configuration according to the type of your speaker.
5. Follow the on-screen instructions to complete the setup.

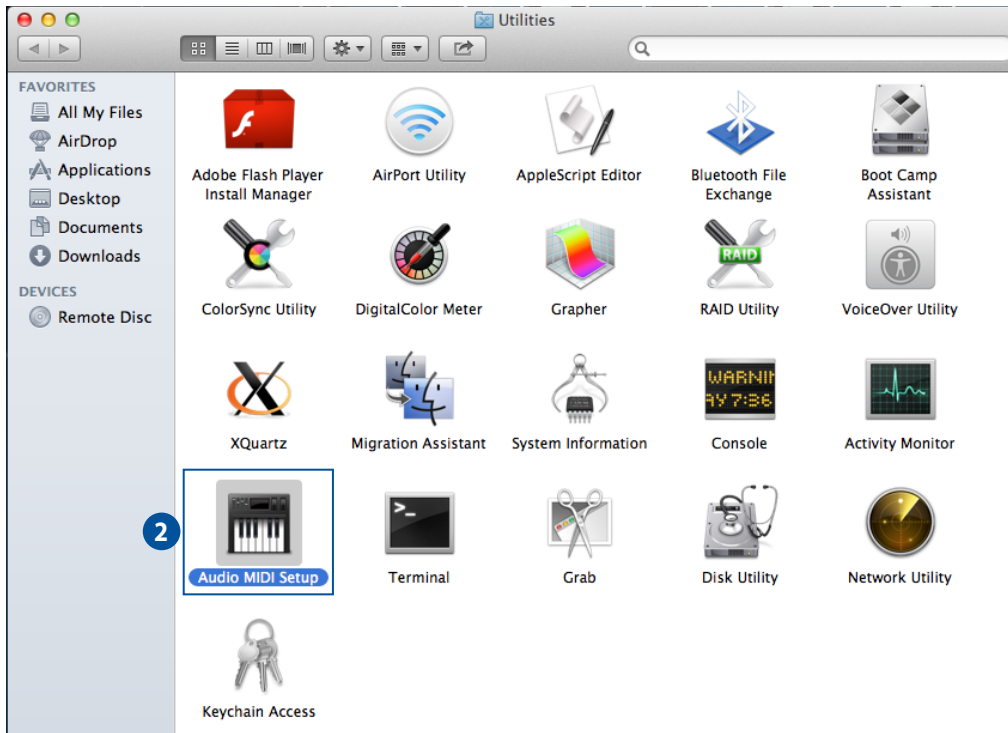

## On Mac OS

Follow these steps to configure the audio settings:

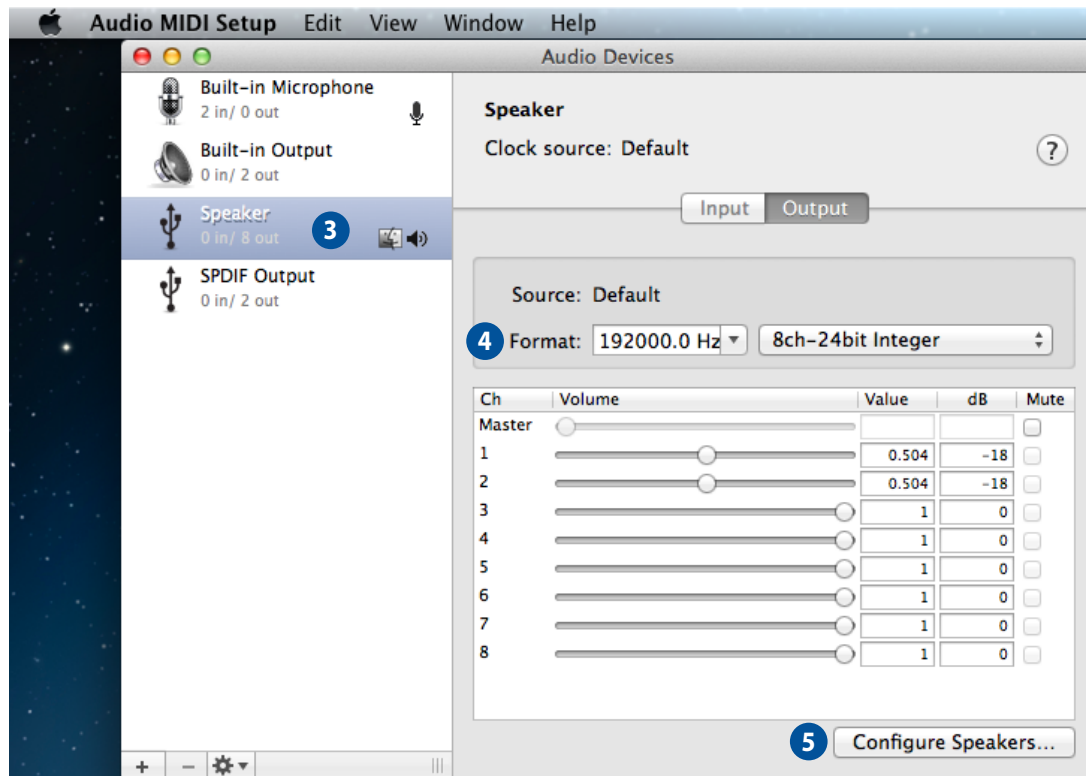

1. Click **Go** on the control bar then select **Utilities**.

2. Double-click **Audio MIDI Setup**.

- From the Audio MIDI Setup screen, select **Speaker**.
- Select an output format according to your speakers.
- Click **Configure speakers** and follow the on-screen instructions to complete the setup.

### 3. Using your device

#### 3.1 Installing CyberLink software on Windows® OS

CyberLink includes the following utilities:

- Power2Go 8
- PowerBackup 2.5

---

**NOTE:** Click  on the right-upper corner of the CyberLink screen to see the detailed instructions on how to use CyberLink.

---

#### To install CyberLink software on your computer:

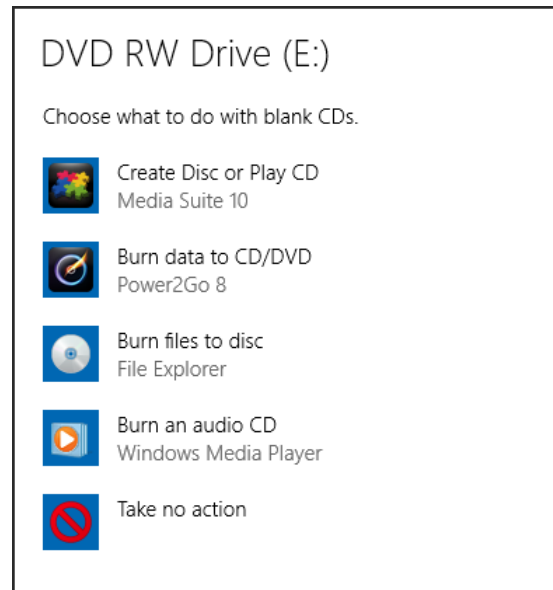

- Power on your device.
- Insert the bundled driver CD into the optical drive bezel.
- On the AutoPlay window, click **Run setup.exe**.
- On the next screen, click  or  and follow the on-screen instructions to complete the installation.
- After the installation is complete, restart your computer.

## 3.2 Burning files to disc on Windows® OS

### Burning data to CD/DVD using Power2Go 8

#### To burn data to CD/DVD using Power2Go 8

1. While your system is on, insert a blank disc into the optical drive bezel with the label side up.
2. Click **Burn data to CD/DVD** from the AutoPlay window.

3. Click an icon to create a data disc.

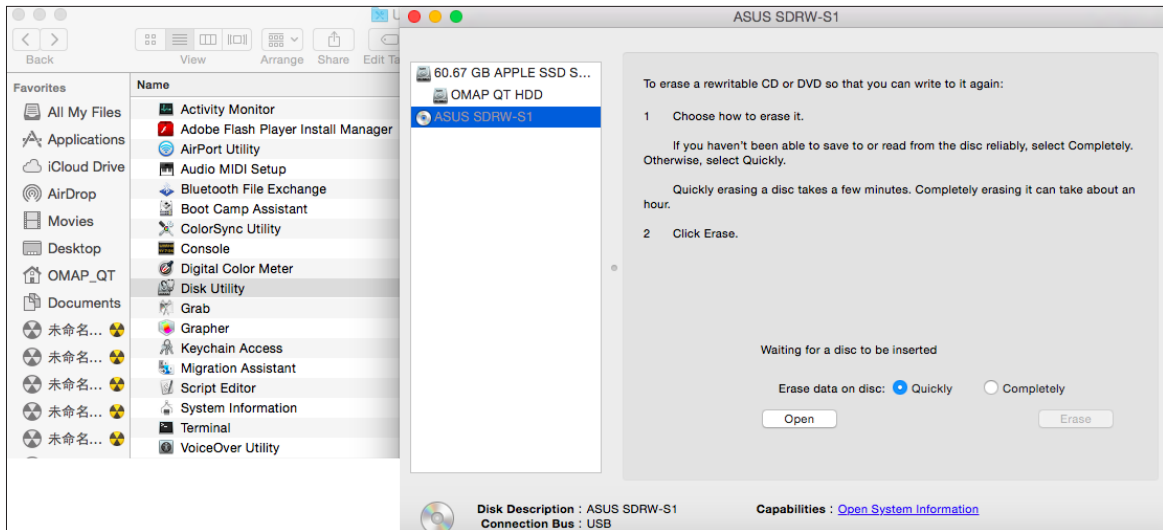

**NOTE:** Click  on the right-upper corner of the Power2Go screen to see the detailed instructions on how to use Power2Go 8.

### 3.3 Playing a disk and burning files on Mac OS

#### Checking if your Mac has detected the ODD

1. Click **Go** on the control bar then select **Utilities**.
2. Double-click **Disk Utility**. You can find the optical drive in the list.

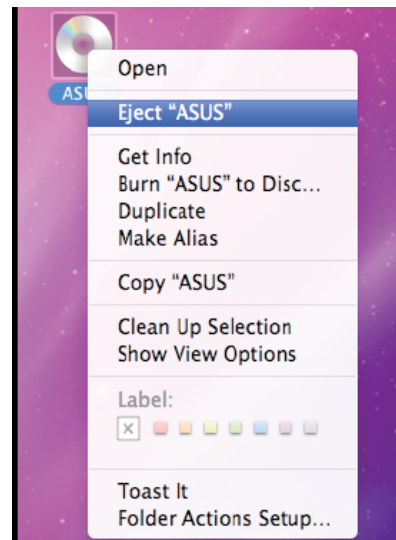

#### Playing a disc

1. Insert a disc that contains files. A disc icon appears on the desktop when you insert a disc.
2. Double-click the disc icon to play the disc.

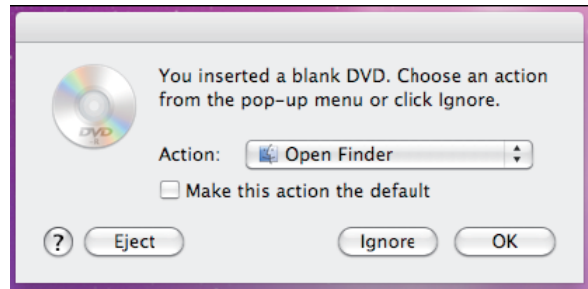

To eject the disc, right-click the disc icon then select **Eject [Disc Name]**.

**NOTE:** The Eject button does not work on Mac OS.

## Burning files

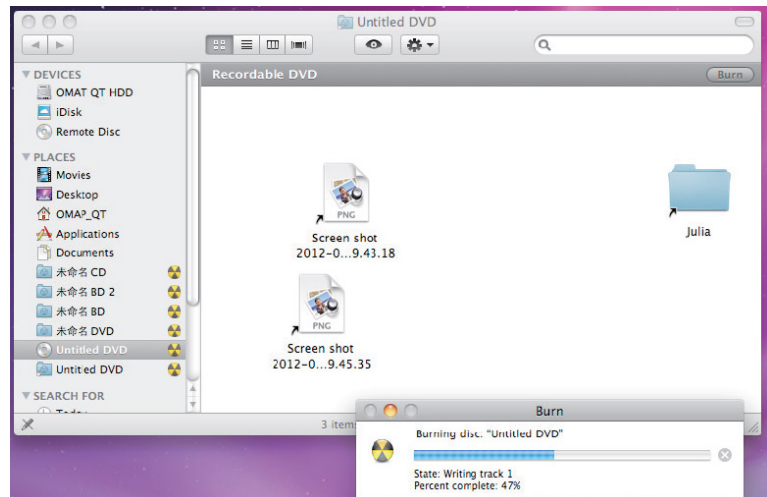

1. A menu will pop-up when you insert a blank disc. Select an action and click **OK**.

2. A disc icon will be created on your desktop.

3. Click on the disc icon to open the disc burning application.
4. Drag the files that you wish to burn into the application.
5. Click **Burn**.

---

### NOTES:

- Mac OS supports DVD burning and playback.
  - Does not support BOOTCAMP INSTALL Windows® OS.
-

## 4. Troubleshooting

### 1. I cannot install the driver in my PC.

- a) Ensure that you have connected SDRW-S1 *LITE* properly to the USB port of your computer and powered it on.
- b) Ensure that your computer has Windows® 10/ Windows® 8.1/ Windows® 8/ Windows® 7 installed.
- c) Restart your computer.

### 2. My computer failed to detect the external optical drive.

- a) Shut down your computer.
- b) Ensure that the USB cable and the power adapter are connected properly, the device is powered on, and the LED light up.
- c) Turn on your computer.

### 3. I cannot find ASUS XONAR S1 LITE from Windows® Control Panel > Sound.

- a) Ensure that you have connected SDRW-S1 *LITE* properly to the USB port of your computer and powered it on.
- b) Ensure that you have installed the driver properly.
- c) Ensure that your computer has Windows® 10/ Windows® 8.1/ Windows® 8/ Windows® 7 installed.
- d) Restart your computer.

### 4. I cannot hear any sound from my analog speakers.

- a) Ensure that you have connected speakers properly and have powered on your speakers.
- b) Go to Windows® **Control Panel > Sound** to check if the playback default device is set to Speakers of ASUS XONAR S1 LITE. If not, set it to Speakers of ASUS XONAR S1 LITE.
- c) Restart your computer.

### 5. I cannot hear any sound from the S/PDIF output.

- a) Ensure that you have powered on the S/PDIF device and properly set it up.
- b) If you are using 192kHz PCM output, make sure that your decoder can support 192kHz decoding. Try changing it to 44.1k or 48kHz first.
- c) Go to Windows® **Control Panel > Sound** to check if the playback default device is set to S/PDIF Out of ASUS XONAR S1 LITE. If not, set it to S/PDIF Out of ASUS XONAR S1 LITE.
- d) Restart your computer.
