SAT	10	51	88	9	55	8	21	65	80	31	52	23

Notes: These random numbers are for use for all sea routes and residual airports

Set the clicker at the number given for the month and day of the week according with your shift date. The first selection is the first number after that which is divisible by the sample interval

Example: Thursday in August - random start = 28

Interval = 10                      First selection = 30                      Second selection = 40

Interval = 20                      First selection = 40                      Second selection = 60

Interval = 25                      First selection = 50                      Second selection = 75

Interval = 33                      First selection = 33                      Second selection = 67

**For crossings**, continue the count on the return journey - do not reset the clicker. Team Leaders must make a note on the Daily Return of the clicker numbers at the end of the outward count.

**At Quayside**, use separate clicker counts for Departures and Arrivals. Continue the count across all Departures and, likewise, across all arrivals.
