RDI 120

The 120 High Side System is a high efficiency air-cooled refrigeration condensing unit designed specifically to operate on Walk-ins over a wide range of ambient temperatures.

Features and benefits of the 120 System:

Operates effectively from -20°F to +120°F without exceeding the design and safety criteria of components.

Ease of service with all components conveniently arranged on a heavy duty base to be accessible for adjustments and repairs when necessary.

Provides an efficient balance between compressor, condenser surface, air movement and controls. The units are equipped with extra condensing surface, oversized fan blades and PSC fan motors. The oversized fan blade powered by the PSC motor moves air more efficiently to use less electricity.

High accuracy pressure switches are used in place of capillary tubes to eliminate possible leakage points.

The RDI "PCL" system is supplied completely charged and tested. The condensing unit assembly is designed to be remotely located. Installation involves securing the evaporator assembly on the interior of the walk-in, locating the condensing unit in a suitable area near the walk-in, and running the pre-charged refrigerant lines between the condensing unit assembly and the evaporator assembly. An electrician must bring power to both the condensing unit assembly and the evaporator assembly. On low temperature systems the time clock is shipped loose and is to be field installed in a convenient location outside of the walk-in.

Weatherproof housing included

"PCL" System Consists Of:

- Condensing Unit (high side assembly) ETL Listed to UL Standard 1995
- Evaporators (low side assembly)
- Pre-Charged Lines Sets (10', 20', 30', 40')
- All necessary controls for proper operation of condensing unit and evaporators.
- Quick Couples for easy connection of refrigerant lines
- Time Clock (low temperature application) shipped loose.
- Energy efficient PSC motors.

Standard Installed Components Include:

Condensing Unit Assembly

- Drier
- Sight Glass
- Pressure Control
- Weatherproof Housing
- Low Ambient Controls (outdoor)
- Crankcase Heater (outdoor)
- Base Valve
- Full Charge of Refrigerant
- Valve at Receiver

Evaporator Assembly

- Thermostatic Expansion Valve
- Solenoid Valve
- Temperature Control

*Adequate for line runs up to 50 ft. For longer line runs, more refrigerant may be required.

The RDI "PC" system offers you many advantages. By eliminating the pre-charged line sets and quick connects, available on the "PCL" system, we are able to provide the "PC" condensing units with a full charge of refrigerant* in units up to 15hp. Installer must provide refrigerant lines between the evaporator assembly and the condensing unit assembly. Once the evaporator and lines are evacuated and leak checked, the base valve, provided on the PC condensing unit, can be opened to supply refrigerant to the system. The electrician must bring power to both the condensing unit assembly and evaporator assembly. On low temperature systems the time clock is shipped loose and is to be field installed in a convenient location outside the walk-in.

"PC" System consists of:

- Condensing Unit (high side assembly) ETL Listed to UL Standard 1995.
- Evaporator Assembly (low side assembly).
- All necessary controls for proper operation of condensing unit and evaporator assembly.
- Time Clock (low temperature application) shipped loose.
- Energy efficient PSC fan motors.

Standard Installed Components Include:

Condensing Unit Assembly

- Drier
- Sight Glass
- Pressure Control
- Weatherproof Housing
- Low Ambient Controls (outdoor)
- Crankcase Heater (outdoor)
- Base Valve
- Full Charge of Refrigerant
- Valve at Receiver

Evaporator Assembly

- Thermostatic Expansion Valve
- Solenoid Valve
- Temperature Control

*Adequate for line runs up to 50 ft. For longer line runs, more refrigerant may be required.

PC PRE-CHARGED REMOTE - AIR-COOLED

The RDI "PR" system is designed to allow for remote location of the condensing unit in applications where pre-charged lines would be difficult to run or the distance between the evaporator and the condensing unit is too great for pre-charged lines. All components are installed and wired, but the system contains only a holding charge of dry nitrogen. Installation involves securing the evaporator assembly on the interior of the walk-in and the condensing unit in a suitable location. Refrigerant lines must be run between the evaporator assembly and the condensing unit assembly. The system must be leak checked, evacuated and charged with refrigerant. The electrician must bring power to both the condensing unit assembly and the evaporator assembly. On low temperature systems the time clock is shipped loose and is to be field installed in a convenient location outside the walk-in.

Weatherproof housing included

"PR" System Consists Of:

- Condensing Unit (high side assembly) ETL Listed to UL Standard 1995
- Evaporators (low side assembly)
- All necessary controls for proper operation of condensing unit and evaporators.
- Time Clock (low temperature application) shipped loose.
- Energy efficient PSC fan motors.

Standard Installed Components Include:

Condensing Unit Assembly

- Drier
- Sight Glass
- Pressure Control
- Weatherproof Housing
- Low Ambient controls (outdoor)
- Crankcase Heater (outdoor)
- Base Valves
- Valve at Receiver

Evaporator Assembly:

- Thermostatic Expansion Valve
- Solenoid Valve
- Temperature Control

PR PRE-ASSEMBLED REMOTE - AIR-COOLED

DROP-IN REFRIGERATION

Flush fit ceiling coil design allows full use of walk-in interior for storage. Top-mount self-contained refrigeration package significantly reduces refrigeration labor costs. Installation is quick and easy and can be completed without the services of a plumber or refrigeration technician. Plumbing is not required. Standard automatic condensate evaporator eliminates need for a drain line on indoor units. Plug and play design. Available in cooler, freezer, or combination cooler/freezer. Now available in 3/4 HP freezer. Top or side-mount refrigeration package configuration. New Roof-curb Technology allows for trouble-free outdoor installation. Refrigeration package is wired and run-tested at the factory.

Top-mount refrigeration is flush to the interior.

Drop-In Refrigeration Consists of:

- 100% usable storage space
- Quick & cost-saving installation
- Design flexibility
- Outdoor applications
- Dependable performance

QUICK PRICING GUIDE

Economy & Premium Models

Economy Models (part number ending in E) have the same components and price as the base models listed in the price list.

Premium Models (part number ending in P) have additional components added at a reduced price including headmaster, suction filter, mounted time clock and, on low temp models, a suction accumulator.

RDI PARTS AND LABOR WARRANTY (3-18-10)

All invoices submitted for consideration under RDI's parts and labor warranty must include the product serial number and must be received by RDI within 60 days of the date of service.

PARTS COVERAGE

One (1) year from original start-up date but no more than eighteen (18) months from ship date RDI will at its option repair, replace, or reimburse for local purchase of parts or assemblies found to be defective in material or workmanship. Reimbursement for local purchase will require a copy of the wholesale invoice and a maximum 20% markup. During the first year defective compressors shall be exchanged over the counter by the compressor manufacturer's wholesaler.

LABOR COVERAGE

RDI including PR, Multi-Pak, Rack, Large Room systems are covered by a 30-day labor warranty for the replacement of component parts which are defective in material or workmanship. The warranty period begins at the earliest of, the original start-up date or 60 days after ship date from the factory. RDI reserves the right to pay maximum hourly rates equal to the average commercial hourly rates within that territory or region of the country.

RDI "PCL"/"PC" systems are covered by a one (1) year labor warranty for the replacement of component parts which are defective in material or workmanship. The warranty period begins at the earliest of, the original start-up date or 60 days after ship date from the factory. RDI reserves the right to pay maximum hourly rates equal to the average commercial hourly rates within that territory or region of the country.

EXTENDED COMPRESSOR COVERAGE

If the optional four (4) year compressor warranty is purchased and the original compressor fails after the expiration of the one (1) year parts warranty, RDI will provide a replacement compressor for the condensing unit assembly. RDI will at it's option provide directly or authorize local purchase of the replacement compressor.

If local purchase is authorized the wholesale invoice along with the serial tag from the original defective compressor shall be sent to RDI for reimbursement. In some instances the entire failed compressor may be required. Labor, freight/transportation, and additional parts/supplies are not covered.

GENERAL CONDITIONS

This warranty is issued only to the original purchaser-user at the original installation location and is in lieu of all other warranties expressed or implied.

Following the expiration of the basic parts warranty, replacement parts purchased from RDI shall be warranted for parts replacement and shipping only for a period of ninety days from ship date.

EXCLUSIONS FROM WARRANTY COVERAGE

1. Normal maintenance and adjustments such as temperature controls, thermal expansion valves, defrost timers and cleaning.
2. Repairs due to unauthorized modifications of warranted equipment.
3. Damage or failure caused by improper installation, improper electrical supply, fire, flood, or other natural disasters, acts of terrorism or war.
4. Damage or delays occurring in transit.
5. Parts or assemblies subject to misuse, abuse, neglect or accidents.
6. Damage or loss of any products, property, loss of income or profit due to malfunctioning of sold unit.

SOLUTIONS

RDI provides many of the operational solutions from Maniowoc Foodservice, a global company dedicated to bringing value to foodservice operators by equipping them with highly individualized real-world answers that enhance menus, service, profits and efficiency.

FINANCE

Maniowoc Foodservice offers low-rate, fast approval financing on all our leading brands through Maniowoc Finance. Preserve capital, simplify budgeting and get the equipment you need, today.

To learn how Maniowoc Foodservice and its leading brands can equip you, visit our global web site at www.manitowocfoodservice.com then find the regional or local resources available to you.
