Fixes

Release 3.0.512.5424 fixes BMR incompatibility with recovery points created with code release 3.0.512.4320. It also includes all of the fixes listed below from code release 3.0.512.5393:

- Added support for Windows 64–bit OS
- Added support for eject functionality.

> **NOTE:**
>
> You must verify that you have the latest HP RDX Utility installed. The HP RDX Utility version 2.20 (Equivalent to HP RDX Tools 1.44) or later may be downloaded at https://www.hp.com/support/rdx. Depending on the production date of your product, the HP StorageWorks CD shipped with your RDX product will have the latest version of the RDX utility.

- Corrections to the Properties Dialogue
- Additional Localization Corrections
- BMR improvements

Prerequisites

Install the HP RDX Utility 2.20 (HP RDX Tools 1.44) or later.

Installation instructions

Previous versions of HP RDX Continuous Data Protection Software on the system must be uninstalled and the system restarted before installation. Use **Add/Remove Programs** in the Control Panel to uninstall earlier versions of the software. An HP RDX Installer is supplied with this release, as described below. See also the 'Quick Start Guide' supplied with the software, or which may be downloaded from http://www.hp.com/support/rdx.

HP RDX Installer instructions

1. If your RDX Storage Device has an assigned drive letter skip to step 3. If not, add a drive letter. Select **Start — Run...** and enter **diskmgmt.msc**. (On Vista **Start — Search — diskmgmt.msc**. Right click on the chosen RDX drive letter and select **Paths... — Add — OK.**.
2. Double click on the `HP-RDX-Installer.exe` file.
3. Read and Accept the End User License Agreement.
4. Click **OK** (or Cancel to Exit).
5. Upon completion of software installation, the software will display; "Completing RDX-Protection Setup Wizard".
6. Click **Finish**.

7. The software will then prompt for the labeling of the HP-RDX cartridge to begin the Continuous Data Protection Phase.

Making a physical CD from an ISO image file

Download the ISO image to a temporary directory.

In order to create a CD from this ISO image, you must use a software utility capable of writing an ISO file to a recordable media such as CD-R.

NOTE:

Simply copying the ISO file to a CD-R will NOT result in a usable CD. HP recommends that you turn the verify feature "ON".

Compatibility/Interoperability

None

Determining current version

Navigate to the **About HP RDX** option in the **HP RDX** menu.

Effective date

May 15, 2009
