ENGINEER'S REPORT
DRAINAGE BENEFIT ASSESSMENT AREA NO. 29
QUARTZ HILL STORM DRAIN

Certification

In the matter of Drainage Benefit Assessment Area No. 29 for the design, construction, operation, and maintenance of a storm drain in 50th Street West, Quartz Hill Road, 45th Street West, Avenue M-4, Avenue M, and Avenue L-4 in the unincorporated County area of Quartz Hill, in the vicinity of the Cities of Palmdale and Lancaster of the County of Los Angeles, State of California, I, Robin Lynn Phillips, Senior Civil Engineer, Public Works, of said County, have prepared the following Engineer's Report pursuant to the provisions of the Benefit Assessment Act of 1982 (Division 2, Chapter 6.1 of the California Government Code of the State of California) and Article 13D of the California Constitution.

APPROVED AS TO FORM:

RAYMOND G. FORTNER, JR.
County Counsel

By  dated on this 29TH day of AUGUST 2005.
Deputy

ROBIN LYNN PHILLIPS
Senior Civil Engineer, Public Works
County of Los Angeles
State of California

By 

INTRODUCTION

The Quartz Hill area of the unincorporated County territory experienced severe flooding during the rainstorms, which occurred during the 2004-05 storm season. In consideration of the information obtained during several meetings, which took place between representatives of the County of Los Angeles and members of the community of Quartz Hill, to discuss the flooding problems and potential solutions, the County is proposing to construct a storm drain in Downtown Quartz Hill.

Benefit Assessment Act of 1982 (Government Code Section 54703 et seq) authorizes the County to impose a benefit assessment on parcels within the unincorporated areas of the County to finance the costs associated with provision of drainage and flood control services to these areas.

Government Code Section 54716 provides that, for the first fiscal year in which a benefit assessment is proposed to be imposed by a local agency, the legislative body of the local agency shall cause a written report pertaining to the proposed assessment to be prepared and filed with the clerk of the local agency.

Article 13D of the California Constitution, approved by the California voters in November 1996 as Proposition 218, requires that all proposed assessments be supported by a detailed engineer's report prepared by a registered professional engineer certified by the State of California. Article 13D of the California Constitution also provides for property owners to determine by assessment ballot whether or not they approve of the proposed assessment. The purpose of the proposed assessment is to finance a portion of the costs for design, construction, operation, and maintenance of a storm drain and appurtenant facilities, which provide special benefits to the properties within the proposed assessment district.

This Engineer's Report has been prepared pursuant to provisions of the Benefit Assessment Act of 1982 and Article 13D of the California Constitution as directed by the County of Los Angeles Board of Supervisors on August 2, 2005.

Part I sets forth the proposed improvements and services and the total of the design, construction, maintenance, and operational costs of the proposed improvements; Part II sets forth the Boundary Map, Assessment Diagram, and identification of the parcels to be included in the proposed assessment district; Part III sets forth special benefits to be conveyed on the identified parcels and the costs to the proposed assessment district; Part IV sets forth the basis upon which the proposed assessment was calculated; and Part V sets forth the proposed annual and proposed total assessments on the identified parcels.

**PART I
PROPOSED IMPROVEMENTS AND SERVICES
AND
THE TOTAL OF THE COSTS**

PROPOSED IMPROVEMENTS AND SERVICES

The proposed improvements and services consist of the design, construction, operation, and maintenance of a proposed reinforced concrete pipe storm drain to provide for storm water collection and conveyance within the unincorporated area of the County of Los Angeles known as Quartz Hill in the vicinity of the Cities of Lancaster and Palmdale.

The proposed improvements consist of a 51-inch-diameter lateral that begins with an inlet structure, connecting to an existing private drain on the south side of Avenue M-4, approximately 400 feet west of 50th Street West. This lateral joins the 51-inch-diameter mainline at the intersection of Avenue M-4 and 50th Street West and then turns northerly in 50th Street West to Avenue K-8. The mainline increases to 60 inches in diameter at Avenue M, to 63 inches in diameter approximately 175 feet south of Avenue L-14, to 66 inches in diameter at Avenue L-4, and to 69 inches in diameter approximately 300 feet south of Avenue L. The mainline will join downstream facilities to be constructed by others at 50th Street West and Avenue K-8. The capacity of the mainline gradually increases from 209 cubic feet per second at the intersection of Avenue M-4 and 50th Street West, the most southerly junction, to 349 cubic feet per second at the intersection of Avenue K-8 and 50th Street West, the most northerly junction.

Catch basins are planned on the east and west sides of 50th Street West, immediately south of the intersections with Avenue M, Avenue L-14, Avenue L-12, Avenue L-4, and Avenue L. At Avenue L-8, the two existing catch basins at the southeast corner of 50th Street West and Avenue L-8 will be connected to the 63-inch-diameter mainline in 50th Street West.

A 30-inch-diameter lateral is proposed in 50th Street West from 120 feet south of Avenues M-8 to M-4, which will connect to the 60-inch-diameter mainline at the intersection of 50th Street West and Avenue M-4. Catch basins are planned on the east and west sides of 50th Street West, immediately south of Avenues M-4 and M-8.

A 30-inch-diameter lateral is proposed in Avenue M/Quartz Hill Road easterly from 50th Street West to 45th Street West and then southerly in 45th Street West to join with the existing overflow drain from the Quartz Hill Basin. Catch basins are planned on the north and south sides of Avenue M immediately east of the intersection with 50th Street West, and at the "Y" intersection of Avenue M and Quartz Hill Road.

A 24-inch-diameter lateral is proposed in Avenue M westerly from 50th Street West to approximately 560 feet west of 50th Street West. One catch basin is planned for the south side of Avenue M.

A 24-inch-diameter lateral is proposed in Avenue L-4 westerly from 50th Street West to the vicinity of 52nd Street West. Two catch basins are planned on the south side of Avenue L-4.

The general nature, location, and extent of the proposed improvements are set forth in Figure 1. Preliminary plans for the "Quartz Hill Drain" are on file in the Executive Office of the Board of Supervisors and the Department of Public Works and are incorporated herein by reference.

The Total of the Costs:

The total of the costs is set forth in Table 1 at the end of this discussion. The basis of three categories (design, construction, and operation and maintenance) is discussed below.

Design:

The estimated design cost and the years in which this cost is expected to be incurred are set forth in Section 1 of Table 1.

Construction:

The estimated construction cost and the year in which this cost is expected to be incurred are set forth in Section 2 of Table 1.

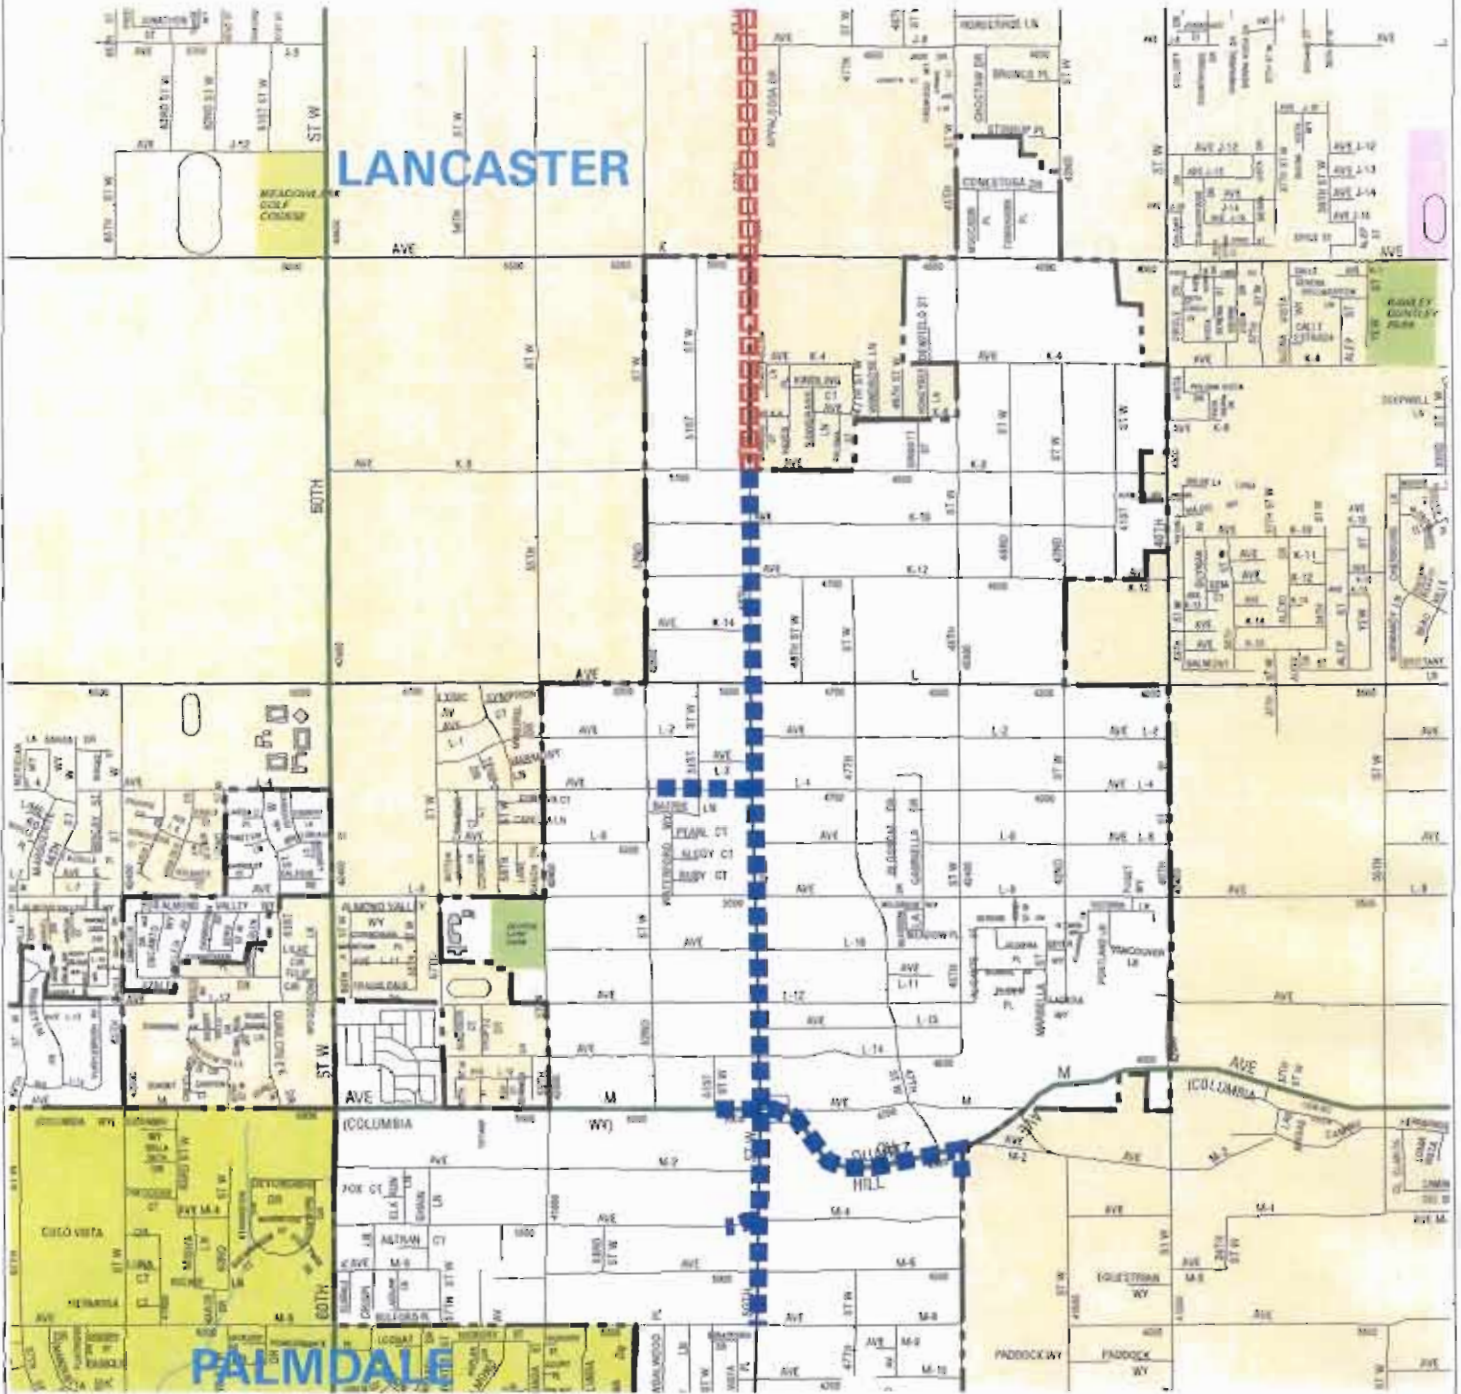

Operation and Maintenance:

The estimated operation and maintenance costs and the year in which these costs are expected to begin are set forth in Section 3 of Table 1. Operation and maintenance costs will be incurred until such time as the appropriate legislative body finds alternate funding sources and rescinds/disbands the proposed assessment district.

To account for the effects of inflation, operation and maintenance costs will be annually adjusted using the Los Angeles-Riverside-Orange County Consumer Price Index for all Urban Consumers. For the purposes of clarity, the Consumer Price Index adjustments of the operation and maintenance costs have not been specifically included in the estimated annual assessments.

Total		\$154,606	\$154,606	\$6,890,788	\$115,000		\$115,000	\$115,000	\$18,470,000

PART II
BOUNDARY MAP, ASSESSMENT DIAGRAM, AND PARCELS IDENTIFIED TO BE INCLUDED IN THE ASSESSMENT DISTRICT

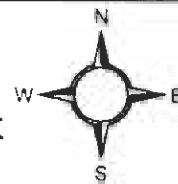

The Boundary Map (Map No. 1), entitled "Boundary Map for Proposed Drainage Benefit Assessment Area No. 29" and the Legal Description (Exhibit A) set forth the boundaries of the proposed assessment district. In accordance with Section 4 of Article 13D of the California Constitution, publicly owned parcels within the proposed assessment district will be assessed unless there is clear and convincing evidence that a publicly owned parcel receives no special benefit.

The Assessment Diagram (Map No.2), entitled "Assessment Diagram for Proposed Drainage Benefit Assessment Area No. 29, County of Los Angeles, State of California," sets forth each individual parcel of land to be assessed. Each parcel is identified by its Assessor Parcel Number (APN), which property owners can find on their Annual Property Tax Bills. An assessment number has been assigned to each parcel as set forth in the Assessment Roll at the end of this discussion. Said Assessment Diagram references the Los Angeles County Assessor's Maps, Books 3101, 3102, 3103, 3111, and 3204, for particular dimensional information pertaining to each Assessor's Parcel.

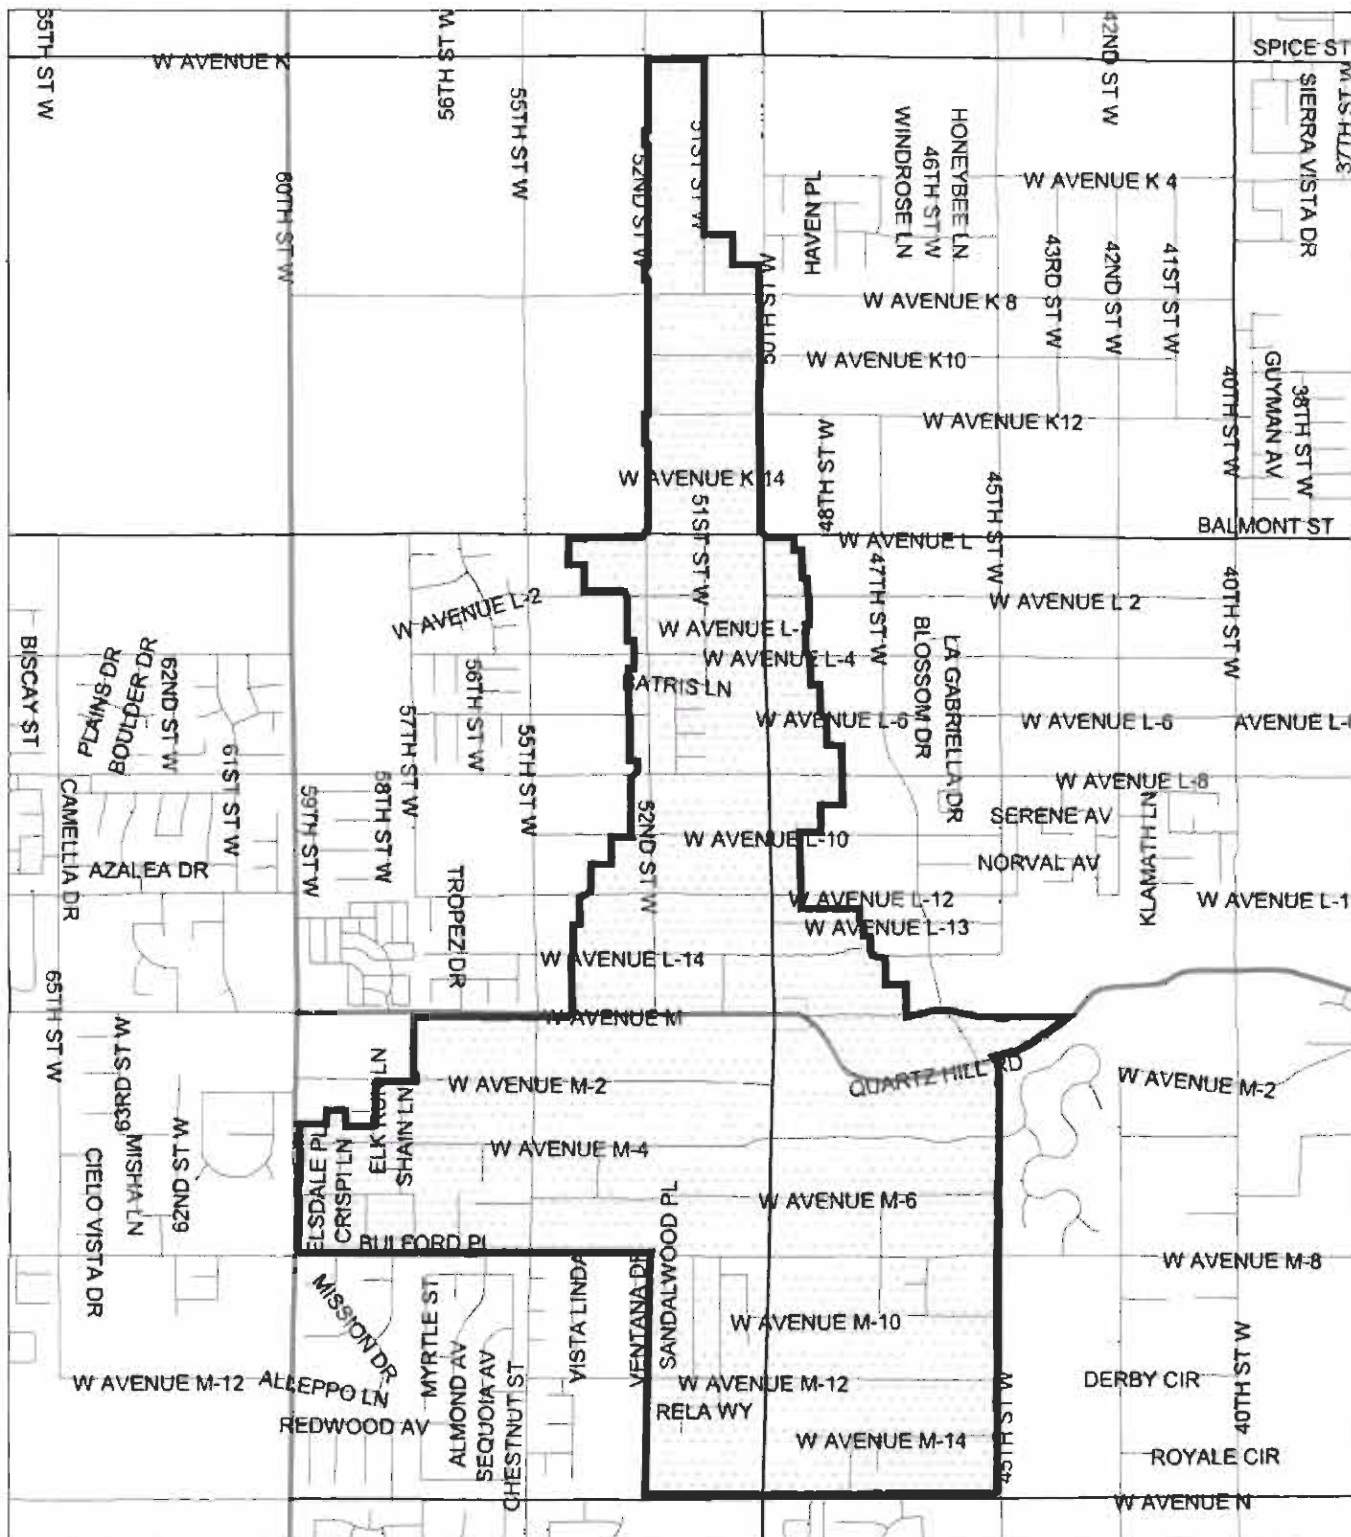

No existing properties or facilities are to be acquired as part of the project; however, the storm drain in 50th Street West will connect to a proposed storm drain to be constructed by others, and the storm drain lateral in 45th Street West will connect to the existing Quartz Hill Basin box outlet structure. The connection to the private drain on the south side of Avenue M-4 will be constructed within an existing public drainage easement. All facilities are proposed to be constructed within public street rights of way.

PART III SPECIAL BENEFITS TO BE CONVEYED

Article 13D of the California Constitution requires the separation of general benefits from special benefits as only special benefits are assessable. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the design, construction, maintenance, and operational costs of the proposed improvement/service.

Special benefit is defined by Article 13D as "a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large." General enhancement of property value does not constitute a special benefit; however, the specific enhancement of property value is a special benefit. In essence, an assessment, levy, or charge on a parcel must be based on a special and distinct benefit to the parcel and shall not include any general benefits conferred on the public at large including real property within the assessment district.

The total of the costs for the proposed improvements and services have been separated as either a special benefit or a general benefit on a proportional basis. The special and general benefit proportionate share ratio for the construction cost was applied uniformly to the design, operational, and maintenance costs to determine the total amount to be assessed for special benefits conferred on the identified parcels within the proposed assessment district for each assessment year. This information is summarized in Table 5 at the end of this discussion.

SPECIAL BENEFITS

The proposed improvements and services will provide for the collection of stormwater runoff generated by each identified parcel within the proposed assessment district and conveyance of this runoff through the proposed assessment area in a controlled manner to appropriate downstream drainage facilities such that the potential for flooding within the proposed assessment area is reduced.

SPECIAL BENEFITS NOT ALLOCATED TO THE PROPOSED ASSESSMENT AREA

The proposed improvements and services will also provide for the collection and conveyance of stormwater runoff from a subwatershed in the City of Palmdale that does not have sufficient facilities to limit the storm flows to predevelopment conditions and the conveyance of periodic dewatering flows from the City of Lancaster's Quartz Hill Basin, located outside of the proposed assessment area.

Dewatering Flows from Quartz Hill Basin

The proposed storm drain will convey a dewatering flow of 20 cubic feet per second, which represents 7 percent of the main line capacity of 279 cubic feet per second at the intersection of Avenue M and 50th Street West, which is the point where the dewatering

flows enter the main line. Therefore, 7 percent of the storm drain construction cost is considered a benefit cost that will not be allocated to the proposed assessment area. This information is summarized in Table 2, below.

TABLE 2	DEWATERING VOLUME VS. CAPACITY	PERCENTAGE
Dewatering Volume—Quartz Hill Basin	20 cubic feet per second	7 percent
Main Line Capacity	279 cubic feet per second	

Subwatershed in the City of Palmdale

The proposed storm drain will convey 24 cubic feet per second of stormwater from a portion of the City of Palmdale subwatershed that does not have structures to limit the stormwater runoff to predevelopment conditions, which represents 11 percent of the main line capacity of 209 cubic feet per second at the intersection of Avenue M-4 and 50th Street West, which is the point where the flow enters the main line. Therefore, 11 percent of the storm drain construction cost is considered a benefit cost that will not be allocated to the proposed assessment area. This information is summarized in Table 3, below.

TABLE 3	STORMWATER VOLUME VS. CAPACITY	PERCENTAGE
Stormwater Flow—City of Palmdale	24 cubic feet per second	11 percent
Main Line Capacity	209 cubic feet per second	

GENERAL BENEFIT

The proposed improvements and services will also improve vehicular access within and through the proposed assessment area by reducing the potential for flooding on several of the public streets within the proposed assessment area. This is considered a general benefit to the proposed assessment area and the public at large. There are 95 acres of County road right of way within the proposed assessment area. The proposed assessment area is 1,108 acres. The County road right-of-way area is 8.6 percent of the total area of the proposed assessment district. Therefore, 8.6 percent of the storm drain cost is considered a general benefit cost that will not be allocated to the proposed assessment area. This information is summarized in Table 4, below.

TABLE 4	ACREAGE	PERCENTAGE
County Public Road Right of Way	95	8.6 percent
Proposed Assessment Area	1,108	

The proportionate share of the total construction cost, which is not allocated to the proposed assessment area, is \$1,832,950 or 26.6 percent. The special benefit proportionate share of the total construction cost to be allocated to the proposed assessment area is \$5,057,838 or 73.4 percent. This information is summarized in Table 5, below.

TABLE 5	PROPORTIONATE SHARE OF TOTAL CONSTRUCTION COST	PERCENTAGE OF TOTAL CONSTRUCTION COST
Special Benefit conveyed on Identified Parcels within the Proposed Assessment District	\$5,057,838	73.4 percent
Stormwater Flow—City of Palmdale	\$ 757,987	11 percent
Dewatering Flow—Quartz Hill Basin	\$ 482,355	7 percent
County Public Road Right of Way	\$ 592,608	8.6 percent
Total	\$6,890,788	100 percent

The special benefit proportionate share ratio for the construction cost was applied uniformly to the design to determine the total amount to be assessed for special benefits conferred on the identified parcels within the proposed assessment district for each assessment year. This information is summarized in Table 6 at the end of this section.

DESIGN AND CONSTRUCTION COSTS

The current prevailing assessment practice is to assess the special benefit design costs as the costs are incurred and finance the special benefit portion of the construction costs with conventional municipal bonds. The current municipal bond market would finance the special benefit construction costs of the proposed storm drain at 5.3 percent for a 20-year term and would incur additional costs of \$1,011,568 for the sale of municipal bonds. The principal and interest payments for \$5,057,838 at 5.3 percent annual interest would result in annual principal and interest payments of \$416,242. With the additional costs of \$1,011,568, the total costs incurred by the proposed assessment district for design and construction would total \$9,336,408 as shown in Table 7, at the end of this section.

To reduce the total costs to the proposed assessment district, it is proposed that the Fifth District Special Road District Fund pay the proposed storm drain design and construction costs, estimated to total \$7.2 million, as they are incurred; and the proposed assessment district would reimburse the Fifth District Special Road District Fund in the amount of \$7.2 million. This amount, \$7.2 million, is less than the amount that would be incurred by the assessment district if current prevailing assessment practices were to be used. To reduce the annual costs to the proposed assessment district, the proposed assessment district will be allowed to reimburse the Fifth District Special Road District Fund at the rate of \$72,000 per year for 100 years. Section 1 of

Table 8, at the end of this section, sets forth the proposed annual and proposed total costs related to this funding plan for the proposed assessment district.

Operation and Maintenance Costs

The special benefit proportionate share ratio for the construction and design cost was applied uniformly to the operation and maintenance costs of the proposed improvement. The operation and maintenance costs will be paid in the year incurred. The portion of the operation and maintenance costs not allocated to the proposed assessment district will be paid by Fifth District Special Road District Fund. The operation and maintenance costs will not be incurred until the proposed drain is operational. The operation and maintenance costs will be incurred until such time as the appropriate legislative body finds alternate funding sources and rescinds/disbands the proposed assessment district.

To account for the effects of inflation, operation and maintenance costs will be annually adjusted using the Los Angeles-Riverside-Orange County Consumer Price Index for all Urban Consumers. For the purposes of clarity, the Consumer Price Index adjustments of the operation and maintenance costs have not been specifically included in the estimated annual assessments.

Section 2 of Table 8, at the end of this section, sets forth the proposed annual costs related to the operation and maintenance of the proposed storm drain for the proposed assessment district.

The Total of the Costs to the Proposed Assessment District

The total of the costs to the proposed assessment district are set forth in Section 3 of Table 8, at the end of this section. During Assessment Years 2009 to 2105, inclusive, the proposed annual assessments are comprised of two components. The first component, 46 percent of the annual assessment, is the proportionate share of the design and construction costs to be reimbursed to the Fifth District Special Road District Fund, as previously discussed on page 96 of this Report. The second component, 54 percent of the annual assessment, is the proportionate share of the annual operation and maintenance costs.

**PART IV
BASIS OF ASSESSMENT**

The proposed assessment is based on proportionate stormwater runoff from each identified parcel in accordance with the Benefit Assessment Act of 1982. The proportionate share for each identified parcel has been conveyed as an Equivalent Dwelling Unit. One Equivalent Dwelling Unit is assigned for each unit of stormwater runoff equal to the stormwater runoff produced by a Single-Family Residential Parcel that has an area of 0.1526 acre. The Equivalent Dwelling Unit that has been calculated for each parcel is set forth in the Assessment Number and Equivalent Dwelling Unit Roll at the end of this discussion.

The Equivalent Dwelling Unit figure is calculated using the following formula.

$$\text{Equivalent Dwelling Unit} = \frac{\text{Area of Parcel (Acres)} \times \text{Runoff Factor of Parcel}}{\text{Area of Median Single-Family Residential Parcel (Acres)} \times \text{Runoff Factor of Median Single-Family Residential Parcel}}$$

Table 9 is the listing of runoff factors for the various zoning designations used for the proposed assessment area. The runoff factors designate the estimated proportionate stormwater runoff on the basis of impervious area within each parcel. The runoff factors used in this Engineer's Report were extracted from the County's Benefit Assessment Runoff Factor Study, which is incorporated herein by reference.

The sum total of all Equivalent Dwelling Units for the proposed assessment district is 3871 as shown in the following Assessment Number and Equivalent Dwelling Unit Roll.

PART V TOTAL ASSESSMENTS

The Benefit Assessment Act of 1982 and Article 13D of the California Constitution require that assessments be based on the special benefits that properties within the assessment district receive from the improvements. The statutes do not specify the allocation method or formula. The Assessment Engineer analyzes the facts and determines the allocation of the assessment, and the legislative body, by confirming the Engineer's Report, determines the special benefit to each parcel within the assessment district. The final authority and finding of special benefit action rests with the County of Los Angeles Board of Supervisors. After hearing all testimony and evidence presented at a public hearing, the Board must determine whether or not the assessment allocation has been made in direct proportion to the special benefits received.

Part I sets forth the total of the costs of the proposed improvements and services. Part II sets forth the identified parcels. Part III sets forth the total of the costs to the proposed assessment district. Part IV sets forth the Basis of Assessment.

This Part sets forth the Total Assessments. The proposed annual assessment rate for each assessment year was determined in accordance with the following formula.

$$\text{Proposed Annual Assessment Rate} = \frac{\text{Annual Proposed Assessment District Costs}}{\text{Sum Total of All Equivalent Dwelling Units}}$$

Table 10, at the end of this section, indicates the proposed assessment rate for each assessment year.

The annual assessment for each identified parcel was determined in accordance with the following formula.

$$\text{Annual Assessment for Parcel} = \text{Proposed Annual Assessment Rate} \times \text{Equivalent Dwelling Unit for Parcel}$$

Table 11, at the end of this section, indicates the proposed annual and total assessment for each identified parcel over 101 years. Table 11 also indicates the weighted value of the ballot for each identified parcel as a percentage of the total.
