

eGPU Breakaway Box 750ex (eGPU Expansion System)

sonnetstore.com/products/egpu-breakaway-box-750ex

Pro Power Graphics – Add a High-performance Video Card to Create Your Own Personal eGPU Workstation

Whether you're editing, rendering, color grading, animating or creating special effects, many of the pro applications you use rely on desktop and workstation graphics (GPU) cards to do the heavy lifting in processing data. Unfortunately, many popular computers are equipped only with integrated graphics or low-power discrete GPUs that bottleneck performance when performing these tasks. Happily, there's a simple path to greater productivity—add a Sonnet external GPU (eGPU). The eGPU Breakaway™ Box 750 Thunderbolt 3 to GPU PCIe card expansion systems boost your eGPU-compatible computer's graphics performance by connecting a high-performance GPU card to your computer via a single cable.

Designed for GPU Cards, Also Supports Other Demanding PCIe Cards

The Breakaway Box's single x16 PCIe 3.0 slot accommodates full-length, double-width cards, and its 750W power supply supports trouble-free operation. Its single-port 40Gbps Thunderbolt 3 interface ensures the full 2750 MB/s of PCIe bandwidth is dedicated to the installed card.

Why Sonnet?

Sonnet maintains a working relationship with Thunderbolt and graphic cards partners, and is one of the first eGPU enclosures recommended by Apple®. Apple demonstrated eGPU connectivity over Thunderbolt 3 with Sonnet's eGFX Breakaway Box at Apple's 2017 WWDC (World Wide Developers Conference). The Breakaway Box was provided as an eGPU kit to developers to assist in the development of eGPU on Mac® computers.

eGPU Breakaway Box 750ex Key Features:

- Includes two 8-pin (6+2 pin) auxiliary power connectors
- 750W power supply; supports cards requiring up to 375W of continuous power plus an additional 100W peak power
- Provides 85W of upstream power (useful for charging your notebook)
- AMD approved for the air-cooled editions of the AMD Radeon RX Vega 64, Radeon Pro WX 8200, and WX 9100
- Designed to also support overclocked NVIDIA cards with high peak power requirements
- See [Graphics Card Compatibility Chart \(PDF\)](#) for List of Compatible AMD and NVIDIA GPU Cards
- **750ex Model Includes:** Integrated hub with four USB 3.2 Gen 1 Type A ports and one Gigabit Ethernet Port

Product Overview

- One x16 Mechanical (x4 Electrical, Thunderbolt 3 Spec) PCIe 3.0 Slot
- Supports One Full-length, Full-height, Double-width PCIe Card
- Maximum GPU card size 312mm x 160mm x 55mm; See [Graphics Card Compatibility Chart \(PDF\)](#) for Supported Video Cards
- Quiet, Temperature-controlled Fan
- One Thunderbolt 3 Port
- 0.7-meter Thunderbolt 3 (40Gbps, 100W) Cable
- Eco-friendly Power Features
- Thunderbolt Certified
- Mac and Windows Compatible
- 2-year Product Warranty
- Free Lifetime Customer Technical Support
- Designed in the USA

More Ports, Additional Functionality: eGPU Breakaway Box 750ex

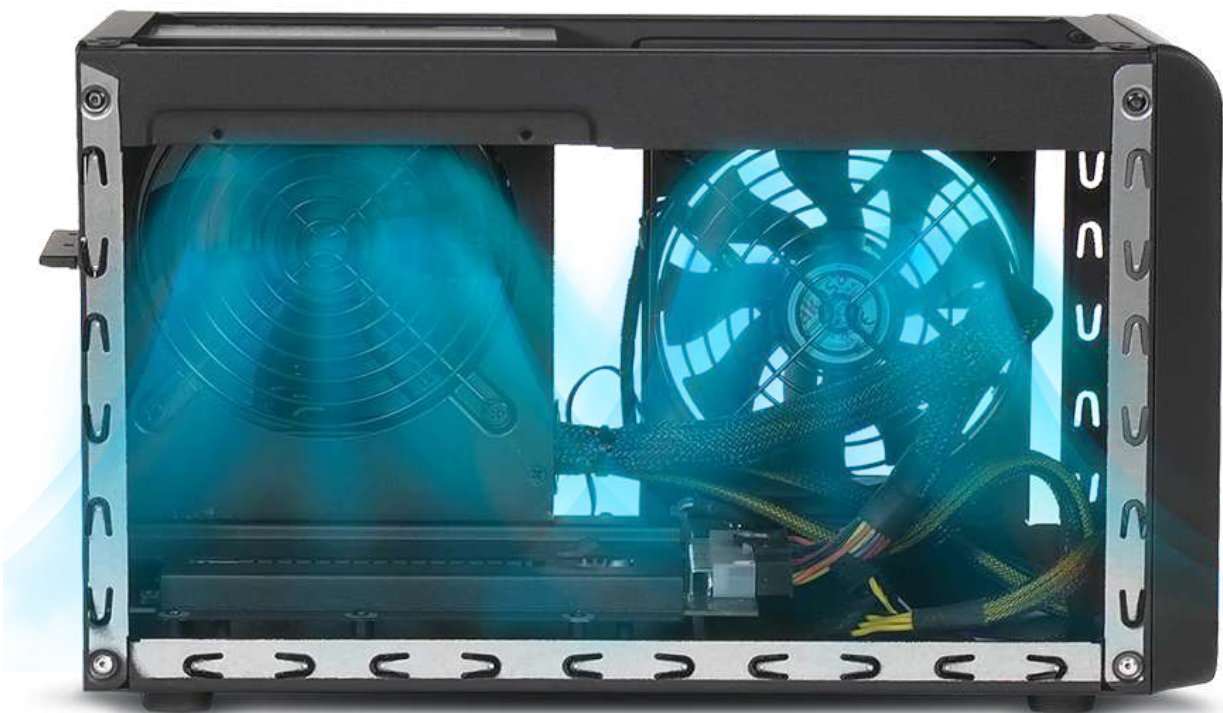

Is your computer short on ports for basic connectivity? Step up to the eGPU Breakaway Box 750ex to add four 5Gb/s USB 3.2 Gen 1 Type A ports to connect peripherals, plus an RJ45 Gigabit Ethernet port for a wired network connection. The 750ex features a dual

Thunderbolt controller design, enabling it to support both peripherals and GPU card through the single Thunderbolt connection to your computer.

Coollest and Quietest Add-your-own-card eGPU System Available

With its large variable-speed temperature-controlled fan that quietly and effectively cools the installed card, the eGPU Breakaway Box can be comfortably used in noise-sensitive working environments.

Eco-friendly Thunderbolt 3 Power Features

Thunderbolt 3 provides eco-friendly power features to help save power and energy: the enclosure powers on when your computer is on and powers off when the computer is put to sleep, shut down, or disconnected. In addition, Thunderbolt 3 Power Delivery (PD) allows the Breakaway Box to power and charge notebook computers when the computer is sleeping.

For complete Mac, Windows, Monitors, and Graphics cards compatibility please visit product's [technical specifications](#).

4K to 8K Workflows – Connect Two or More Breakaway Boxes

Many task times on supported applications—such as Adobe® Premiere® Pro, DaVinci Resolve™, and Maxon Cinema 4D™, to name a few—can be cut significantly with one eGPU Breakaway Box connected. But, for computers with multiple Thunderbolt ports, times can be slashed when two, three, or four Breakaway Boxes are employed. Connecting one or more eGPUs can multiply your computer’s graphics processing power, enabling it to handle 4K, 5K, 6K, and 8K workflows more efficiently. Plus, a computer’s onboard discrete GPU also contributes to the aggregate performance.

Multi-GPU Support

eGPU Breakaway Box 750ex

- Includes two 8-pin (6+2 pin) auxiliary power connectors
- 750W power supply; supports cards requiring up to 375W of continuous power plus an additional 100W peak power
- Provides 85W of upstream power (useful for charging your notebook)
- AMD approved for the air-cooled editions of the AMD Radeon RX Vega 64, Radeon Pro WX 8200, and WX 9100
- Designed and qualified to also support overclocked NVIDIA cards with high peak power requirements
- See the list of [Supported GPU Cards \(PDF\)](#).

Integrated hub with four USB 3.2 Gen 1 Type A ports and one Gigabit Ethernet port

Footnotes:

1. RX 560 and RX 590 require macOS 10.14.6+.
2. Radeon VII requires macOS 10.14.6+ (to be mostly functional); or Windows 10 Build 20H2 with latest AMD drivers. The Radeon VII has a few anomalies under macOS and is not supported by AMD, Apple or Sonnet. In a Thunderbolt chassis, the Radeon VII fans run normally during operation, but during sleep or shutdown, the Radeon VII fans rev up to full speed, so the user must power down or unplug a Breakaway Box 650. This is an issue with the Radeon VII fan control firmware, and we do *not* expect an AMD update to fix this.
3. Radeon RX 5500, 5500 XT, 5600, 5600 XT, 5700 and 5700 XT require macOS 10.15.7+. (Radeon 5500 and 5600 models may not identify correctly in macOS.)
Radeon RX 6800, 6800 XT and 6900 XT and Radeon Pro W6800 require macOS 11.6+.
Radeon RX 6600, 6600 XT require macOS 12.2+
4. Under macOS 10.14.6+, a 2018 Mac mini must be booted with a monitor connected to the Mac mini's HDMI port. If you have a Mac mini, you must either (a) Connect an HDMI display emulator plug to the Mac mini HDMI port and mirror displays; or (2) Connect a monitor to the Mac mini's HDMI port to log in, and then move the HDMI monitor connection to the eGPU. This issue has been resolved since macOS 10.15.7+.
5. If you have File Vault turned on under macOS, then only the internal display or a display connected directly to the Mac will light until you have logged in.
6. Breakaway Box maximum card size is 312mm x 160mm x 55mm. DuoModo eGPU maximum card size is 312mm x 140mm x 58mm. These cards do not fit one or both of these eGPU
7. Sonnet Radeon 6800 XT and 6900 XT requires macOS 11.6+. USB-C port Supports Apple Pro Display XDR and other Thunderbolt Displays with macOS 12+.
