Custom Keyed Solutions are the most popular option for any business or institution. They give you more control over equipment while safeguarding employees from laptop and data theft. Choose from one of the distinct options for the kind of access and control that is right for you:

Master Keyed

Unique, individual keys and locks for devices; master key opens all locks. Allows individuals access to own equipment while IT manager has control of all the equipment and data.

Single Keyed

All locks are alike; only one master key will open locks. No individual keys provided. Designed to reduce risk in classroom, lab, or library environments. Computer can be locked in place with IT manager access only.

Like Keyed

All locks are alike; all users can open all locks. The ideal solution for companies where the risk of internal theft of data and devices is low. All employees have access to all devices.

Master Coded

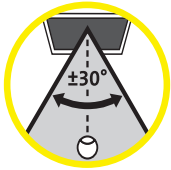

Combination locks are ideal for field based staff or remote locations where keyed locks aren't practical. ClickSafe® Master Coded locks allow users to set their own unique combination code. Administrators can overcome the users code using a ClickSafe® ComboGenie.

... Docking Solution

Please refer to individual product specifications on pages 42 - 48

Why Choose a Kensington Universal Docking Station?

You Are Not Locked In

Kensington Universal Docks work with all device brands and models. Proprietary OEM docks tend only to work with one device or brand.

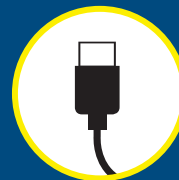

Improved ROI, Lower TCO

Since a Kensington Universal Dock can be used time and again with different laptop brands and models, you get the best Return On Investment and lower overall Total Cost of Ownership.

Fully Functional

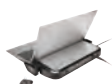

Every Kensington Universal Dock is engineered to be fully compliant with industry-wide technical standards, giving access to all features without having to make any compromises.

One Cable Connection

Whether Thunderbolt™ 3, USB-C™ or USB 3.0, every Kensington Universal Dock connects to a device via a single cable.

Hot Desking Connectivity is No Longer a Gamble

Connectivity is a key requirement of a successful hot desking strategy. But how can administrators accommodate a mixed estate of USB-C™ and USB 3.0 devices using a single solution?

Regardless of whether a laptop uses USB-C or USB 3.0 connectivity, the **SD4700P Docking Station** enables users to connect to multiple monitors, a wired network and get working quickly and easily.

With multiple USB ports for peripherals including a mouse, keyboard and Power Delivery for compatible USB-C devices, the SD4700P has been engineered for flexible and roaming workspaces.

Trackballs. Work.

Remarkably precise, extremely comfortable - Kensington trackballs are a favourite among power users. Requiring less desk space since the unit itself remains stationary, trackballs require less wrist movement and are ideal for people who experience discomfort with traditional mice.

Kensington offers a wide selection of Trackballs including wired and wireless models, all incredibly customisable via the free TrackballWorks™ software suite.
