LOGITECH ROOM SOLUTIONS FOR GOOGLE MEET

Google Meet™ transforms any space to a collaborative meeting place with one-touch join, easy content sharing, and center of room control for online meetings. Now, Logitech® makes it easy for IT to deploy these benefits to rooms of all shapes and sizes with pre-configured systems and expert support resources.

Logitech Room Solutions for Google Meet include everything you need to build out conference rooms with one or two displays. Available in small, medium, and large configurations, these pre-configured systems include a Logitech conferencecam, Chromebox and mount with cable retention, and the Logitech Tap touch controller.

Systems arrive neatly packaged and ready for installation. A setup guide shows how components fit together, while an online wizard guides you through configuration step-by-step.

With quality components, commercial-grade cabling, and innovations that automate a better user experience, Logitech Room Solutions for Google Meet make it easy to deploy video collaboration throughout the workplace.

SMALL ROOMS

Designed for focus rooms and smaller conference rooms, the small Tap bundle minimizes cabling and saves space with Logitech MeetUp, a compact, all-in-one solution that mounts neatly above or below a display. Place Logitech Tap on the table, or add a wall mount to save even more space.

MEDIUM ROOMS

As rooms get bigger, tables grow longer and people sit farther from the camera. That's why the medium Tap bundle features Logitech Rally, a premium conferencecam that pairs an advanced ultra-HD camera with modular audio that scales to support a wide range of room sizes and layouts.

LARGE ROOMS

The large Tap bundle upgrades to Rally Plus with two speakers for clear audio throughout the room. Dual mic pods expand audio coverage for up to 16 people, and the complete system supports up to 7 mic pods for rooms with up to 46 seats.

FEATURED COMPONENTS

Logitech Tap

Touch controller for workplace collaboration

Responsive 10.1" touch screen

Fan-free for silent operation

Commercial-grade cabling and cable management

HDMI input for instant local content sharing

Logitech MeetUp
