## FUJITSU Image Scanner fi-6400

Cost efficient high volume production scanner

The fi-6400 scans A4 landscape documents at high speeds of 100 ppm/200 ipm (200/300 dpi). It is capable of scanning up to A3 sized portrait documents and can load up to 500 sheets at a time.

### Increased productivity with boosted usability

Easily and comfortably scan, even while sitting down in your office, thanks to fi-6400's low profile design and extremely silent running. Keep track of scanner operations such as document scanning settings, number of sheets scanned, as well as any existing error statuses, using the LCD operation panels. Load documents with ease and reduce your workload before and after scanning, with the scanner's independent side guides helping you align edges of variously sized documents. Maintenance and cleaning is also easier than ever with the scanner's wide flip-up cover.

### Hassle-free operation with excellent scanning mechanisms

The fi-6400 possesses stable paper feeding mechanisms such as the Paper Protection function minimizing the risk of document damage, the Stacking Control function controlling paper output speed, and the Elevator Stacker ensuring all scanned documents are neatly stacked.

### Environment-friendly compact design

Utilizing a high quality lens and extra-bright LED light source, enclosed in a heavy-duty resin frame constructed with minimal and lightweight raw materials, the fi-6400's compact design makes it the smallest in its class\*. This enables low power consumption of less than 3.2 W (when in sleep mode) and a short recovery time of less than 6 seconds.

### Advanced software for maximized efficiency

Bypass the inconvenience of making fine adjustments to OCR settings with the PaperStream IP scanner driver, supporting both TWAIN and ISIS. The software automatically converts scanned images into exceptionally clean images, supporting OCR accuracy even when scanning documents with background patterns or wrinkled and soiled documents. Seamlessly linked to PaperStream IP, PaperStream Capture effectively and efficiently feeds information into your organization workflow with its various batch scanning capture features. Automatically utilizing data extracted from barcodes and patch codes, the software also determines your preferred saving destinations and eliminates time allocated to routine tasks.

\* Applies to business scanners priced between US\$10,000 and US\$34,999. True as of Aug. 1, 2009 (PFU Limited).
