

YA2624 - Heavy Duty 12, 24, 36 Volt Tester...

...for Battery, Starting & Charging Systems

Basic 12 Volt version
also available YA2612A

The color-coded **LED BARGRAPH** will show **GOOD** (Green) **MARGINAL** (Yellow) or **REPLACE** (Red).

For **AUTO** batteries (390 to 650 CCA) **no size selection is necessary** (default size). The Auto indicator LED will be on.

For **TRUCK** batteries (>650 to 1700 CCA) press selector switch once. The LED indicator will switch to the **TRUCK** position.

The **DIGITAL DISPLAY** shows **PERCENT AVAILABLE CAPACITY**. The Display and Bargraph will remain on until the Test Button is

Press and **hold down** the Test Button until the final reading is displayed.

Individual Connection

Series Connection

Charging System Test

With engine running and lights on, the real time alternator output voltage will be displayed. The reading should display between 13.0 and 15.0 volts for 12V charging systems.

Starting System Test

Disengage the ignition. Read the avoltage displayed while cranking the starter. Normal cranking voltage at battery should be greater than 9.6 volts.

Features and Benefits

- Tests 12V heavy-duty auto, truck, commercial and marine batteries
 - 390 CCA TO 1700 CCA
 - Bad Cell Detection
- Tests 12/24/36 volt starter and charging systems
- Features a testing method that does not require the battery size to be entered.
 - Simply choose between automotive or truck battery type batteries for testing.
 - Eliminates tester input errors and allows the testing of batteries of unknow size
- Includes long reach 4 ft. heavy-duty abrasion & chemical resistant cables.
- Features fast & accurate conductance technology
- **PATENTED**
- Made in USA.

EU - GB

WARNING • Read & follow instructions before use.
