

From the foregoing statement it is seen that all the departments are operated at a financial loss, the farm being debtor \$5,600.39, the creamery \$1,916.73, and the mechanical department \$9,003.39. While the foregoing figures may be somewhat misleading, being taken from the financial books of the college without reference to the amount of stock or material on hand at the beginning or close of the biennial period, it must be borne in mind that all these departments are educational, operated for the benefit of the students in practical work, and with the salaries paid teachers, and cost of material, apparatus, etc., it could not be expected the receipts would equal the expenditures.

We cannot too highly commend the excellent and thorough business manner in which the financial books of the college are kept, the attention given to the smallest detail, the accuracy of all accounts, and the full information in regard to the source of all receipts, and the reason for all expenditures were so promptly produced when asked for, together with the vouchers for every expenditure, as to leave no doubt in regard to the painstaking and efficient work of the officers of the financial department.

With the assurance that no expenditure of funds will be made, the legality, or even the propriety, of which can be questioned, and with all money received paid directly to the treasurer, under a system of proper checks, as a means of self protection to those handling the funds of the institution, there can be no cause for complaint in regard to the financial management of the Agricultural college.

TRUSTEES OF STATE INSTITUTIONS.

Table XVII—Statement of expenses of the trustees of state institutions from July 1, 1889, to July 1, 1899.

BOARD OF CONTROL.

Table XVIII—Expense account of the Board of Control.

The tables in Chapter I are made up from the records of the several institutions and their reports, which cover the biennial period, and lack uniformity, even in some respects in institutions of the same character.

The first year of the period each institution kept such statistics as it deemed proper, hence it was impossible to attain that uniformity which is always desirable. It is to be remembered that we had no control over the institutions until July 1, 1898, when one-half of the biennial period had expired, and it was then too late to inaugurate a new and better system relating to statistics for the entire period. We hope to inaugurate a complete and, so far as practicable, uniform system of keeping statistical information in the near future.

PART III.

Part III of this report contains the reports of the several institutions covering the biennial period ending June 30, 1899.

Some superintendents have covered the entire period in one report; others have made two separate reports, one for each year.
