**RESOLUTION NO. 2022-22**

**RESOLUTION OF THE SOUTHEASTERN WISCONSIN REGIONAL PLANNING COMMISSION  
ENDORING THE URBAN TRANSPORTATION PLANNING PROCESS IN SOUTHEASTERN WISCONSIN,  
THE ADOPTED YEAR 2050 REGIONAL TRANSPORTATION PLAN, AND THE 2023-2026  
TRANSPORTATION IMPROVEMENT PROGRAM FOR SOUTHEASTERN WISCONSIN**

WHEREAS, the Southeastern Wisconsin Regional Planning Commission is charged with the responsibility of carrying out a long-range comprehensive planning program for the seven counties in the Southeastern Wisconsin Region and, as a part of that program, is presently engaged in a continuing, comprehensive, and cooperative areawide land use-transportation planning process pursuant to the provisions of the Federal Aid Highway Act of 1962 and the Federal Urban Mass Transportation Act of 1964, as amended, and

WHEREAS, the Southeastern Wisconsin Regional Planning Commission has been designated by the Governor of the State of Wisconsin as the official cooperative, comprehensive, continuing areawide transportation planning agency (Metropolitan Planning Organization, or MPO) under the rules and regulations promulgated by the U.S. Department of Transportation, Federal Highway Administration and Federal Transit Administration, with respect to the Kenosha, Milwaukee, Racine, West Bend, and Wisconsin portion of the Round Lake Beach urbanized areas, such rules and regulations being found in the *Federal Register*, dated Friday, May 27, 2016; and

WHEREAS, the aforesaid rules and regulations promulgated by the U.S. Department of Transportation, Federal Highway Administration and Federal Transit Administration, require that the MPO shall develop and update a transportation improvement program (TIP) in cooperation with State and local officials, transit operators, and other affected agencies and individuals; and

WHEREAS, the Southeastern Wisconsin Regional Planning Commission has, in carrying out its responsibilities as the MPO, prepared, in full cooperation with all concerned State and local officials, transit operators, and other interested parties, a document entitled, *A Transportation Improvement Program for Southeastern Wisconsin: 2023-2026*; and

WHEREAS, the subject program identifies transportation improvements recommended for advancement during the period 2023-2026, provides for a staging of improvements over the period 2023-2026 consistent with the regional transportation plan, includes estimates of costs and revenues for the period 2023-2026, and relates the improvements recommended in the program to the adopted transportation plan for the Region; and

WHEREAS, the Fiscally Constrained Transportation System, as amended, and transportation improvement program have been determined to conform with the 2006 24-hour fine particulate standard and the existing State of Wisconsin Air Quality Redesignation and Maintenance Plan for the year 2006 24-hour fine particulate standard, the 1997 eight-hour ozone standard and the existing State of Wisconsin Maintenance Plan for the 1997 eight-hour ozone standard, the 2008 eight-hour ozone standard and the existing State of Wisconsin Attainment Plan for the 2008 eight-hour ozone standard, and the 2015 eight-hour ozone standard and the budget tests described in 40 CFR 93.109 and 40 CFR 93.118 as required by the Federal Clean Air Act Amendments of 1990; and

WHEREAS, the transportation improvement program was taken to a virtual public hearing on Wednesday, November 16, 2022, and the comments received during that public hearing and in a comment period ending December 1, 2022, are documented in Appendix J of the aforereferenced document;

NOW, THEREFORE, BE IT RESOLVED:

FIRST: That in accordance with 23 CFR 450.336(a), the Southeastern Wisconsin Regional Planning Commission hereby certifies that the regional transportation planning process is addressing the land use and transportation planning issues of the metropolitan planning area, and is being conducted in accordance with all applicable Federal laws, regulations, and requirements, including:

1. 23 U.S.C. 134 and 49 U.S.C. 5303, and this subpart;

RESOLUTION NO. 2020-22

2. In non-attainment and maintenance areas, Sections 174 and 176 (c) and (d) of the Clean Air Act as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
3. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color creed, national origin, sex, or age in employment or business opportunity;
5. Section 11101(e) of the Infrastructure Investment and Jobs (IIJA) Act (P.L. 117-58) and 49 CFR Part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and 49 CFR Parts 27, 37, and 38;
8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR 27 regarding discrimination against individuals with disabilities.

SECOND: That the document entitled, *A Transportation Improvement Program for Southeastern Wisconsin: 2023-2026*, be, and hereby is, endorsed as the transportation improvement program for the seven-county Southeastern Wisconsin Region.

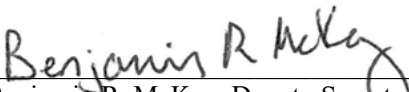

THIRD: That, to obviate the need to reconsider the transportation improvement program in the event that the air quality conformity findings for the regional transportation system plan and the TIP lapse, a revised program of projects would then be comprised of the projects identified as "Exempt" in Appendix A of the aforereferenced document, as well as those projects that have either: 1) completed the NEPA process at such time as the air quality conformity finding lapses, or 2) are identified in the Code of Federal Regulations (Table 3, 40 CFR 51.462).

FOURTH: That a true, correct, and exact copy of this resolution and the document entitled, *A Transportation Improvement Program for Southeastern Wisconsin: 2023-2026*, shall be forthwith transmitted through the Secretary of the Wisconsin Department of Transportation to the Governor, the Federal Highway Administration, and the Federal Transit Administration.

The foregoing resolution, upon motion duly made and seconded, was regularly adopted at the meeting of the Southeastern Wisconsin Regional Planning Commission held on the 7th day of December 2022, the vote being Ayes 15, Nays 0.

  
Charles L. Colman, Chairman

ATTEST:

  
Benjamin R. McKay, Deputy Secretary

## INTRODUCTION

This transportation improvement program (TIP) is the thirty-second such program prepared for the Southeastern Wisconsin Region. The TIP is a Federally required listing of all arterial highway and public transit improvement projects proposed to be carried out by State and local governments over the next four years (2023-2026) in the seven-county Southeastern Wisconsin Region.

The TIP was developed under the guidance of the Southeastern Wisconsin Regional Planning Commission's Advisory Committees on Transportation System Planning and Programming for the Kenosha, Milwaukee, Racine, Round Lake Beach, and West Bend Urbanized Areas, and in close cooperation with municipal, county, and State transportation implementation agencies. The rosters of these committees are listed in Appendix F of this report. Map 1 shows the Southeastern Wisconsin Region and the approved adjusted boundaries for the five Census-defined urbanized areas within the Region. The TIP contains 434 projects within the Region for the four-year programming period of 2023 through 2026. The TIP represents a total potential investment in transportation improvements and services of \$3.2 billion. Of this total, \$1.8 billion, or about 57.2 percent, is proposed to be provided in Federal aids; \$982 million or about 30.4 percent, in State funds; and \$399 million, or about 12.3 percent, in local monies.

The first year of the four-year program—2023—is significant as it constitutes an agreed to list of projects for project selection purposes and no further project selection action is required for the implementing agency to proceed with its project. Under Federal regulations, the Commission in consultation with WisDOT and area transit operators can advance a project from the remaining three years of the TIP following the request by the implementing agency, with the exception of projects on the National Highway System (NHS), which can be advanced by WisDOT in cooperation with the Commission from the remaining three years of the TIP. Proposed expenditures in the first year of the TIP total \$863 million.

The key elements of this TIP document are:

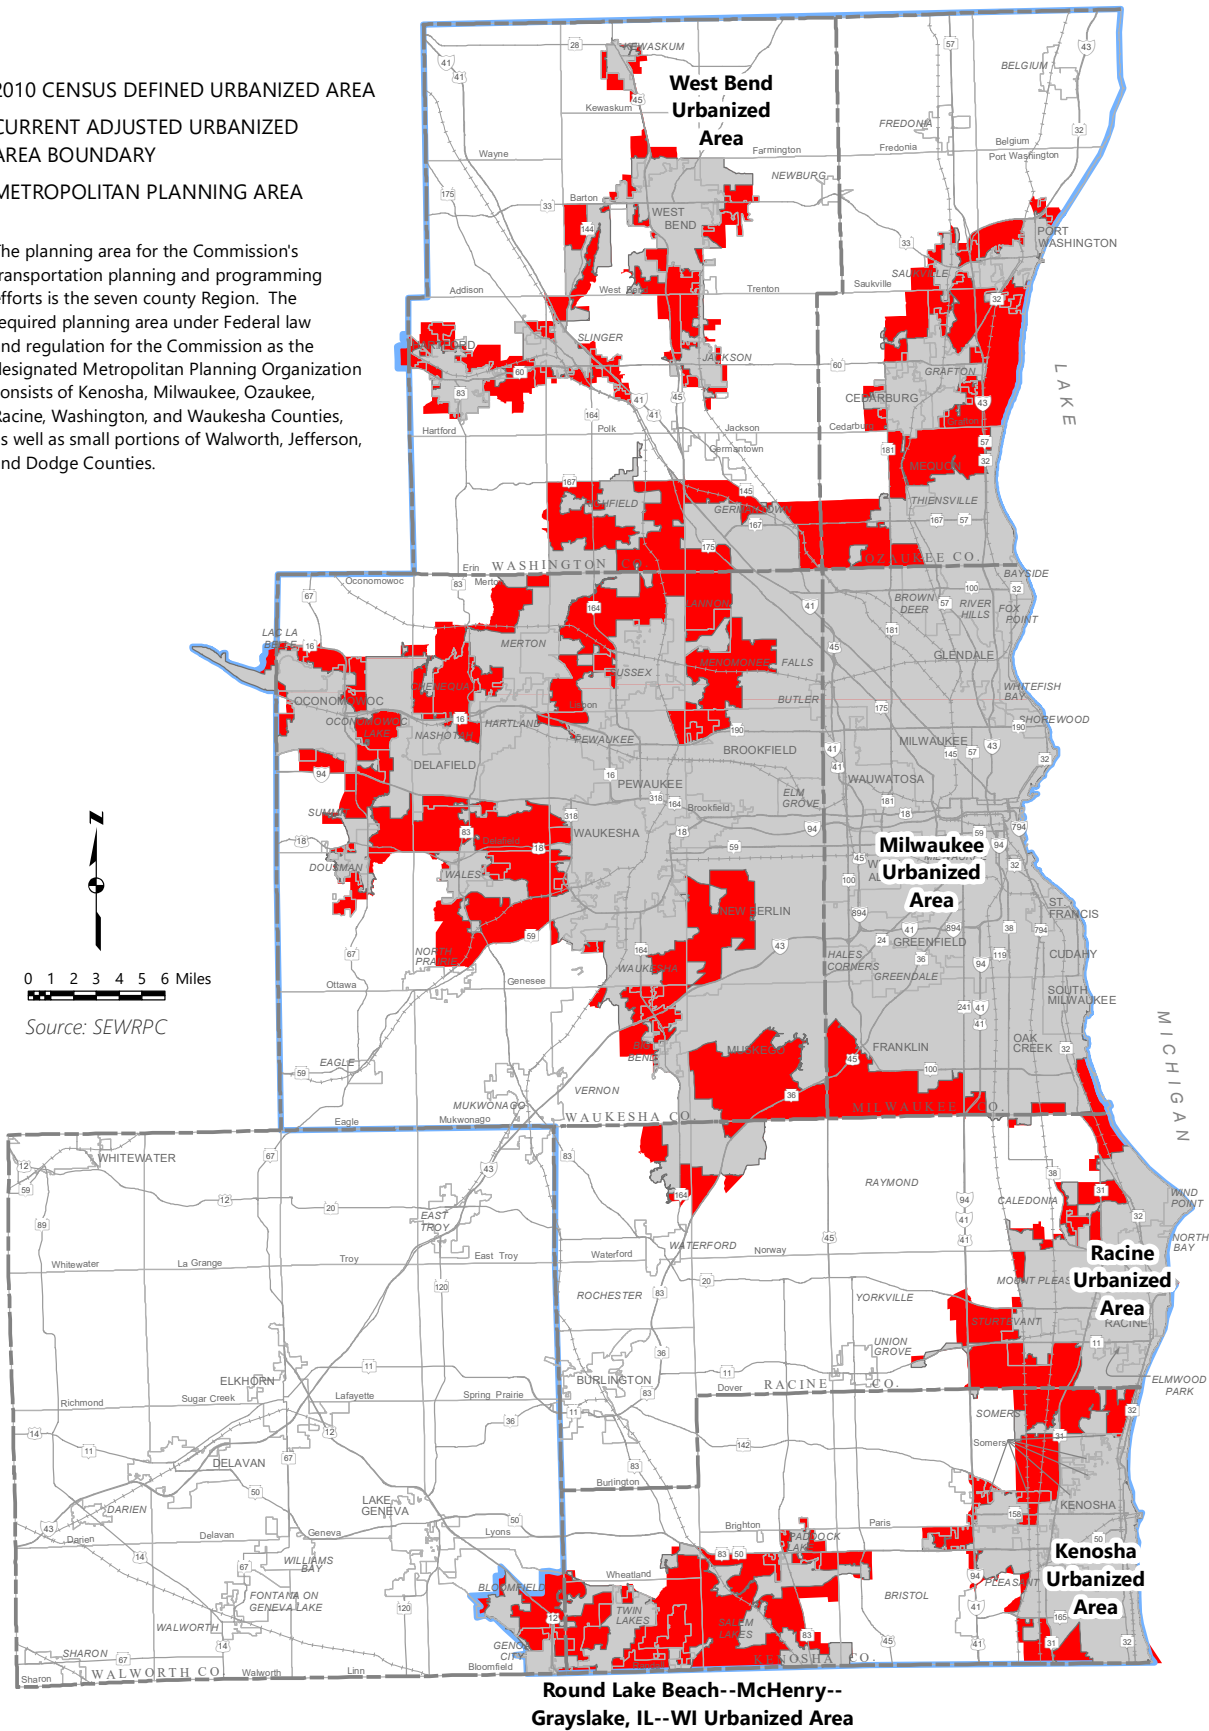

1. A project-by-project listing of the transportation improvement projects constituting the 2023-2026 transportation improvement program, including identification of the projects programmed for each of the four years of the TIP: 2023, 2024, 2025, and 2026 (Appendix A).
2. A list of the status of projects contained in the previous 2021-2024 TIP including an identification of projects which were completed or dropped from the TIP (Appendix B).
3. An assessment of conformity of the 2023-2026 TIP with the Wisconsin State Implementation Plan for air quality. (Appendix C).
4. An assessment of the ability of available funding to implement the 2023-2026 TIP (Appendix D).
5. An assessment of how the projects programmed in the 2023-2026 TIP contribute to the achievement of both the VISION 2050 performance goals and the targets established for the National performance measures (Appendix E).
6. A list of the membership of the Advisory Committees on Transportation System Planning and Programming (Appendix F).
7. A summary of the selection processes used for Federal funding sources for local highway and transit projects (Appendix G).
8. A tabular description of projected 2023 operations of the nine transit operators in the Region and a description of the financial capacity of the nine transit operators in the Region (Appendix H).
9. An assessment of the impacts of the regional TIP on minority and low-income populations in Southeastern Wisconsin (Appendix I).
10. A summary of the public comment received on the draft 2023-2026 TIP (Appendix J).

# Map 1

## The Southeastern Wisconsin Region and Census Defined and Adjusted Urbanized Area Boundaries: 2010

- 2010 CENSUS DEFINED URBANIZED AREA
- CURRENT ADJUSTED URBANIZED AREA BOUNDARY
- METROPOLITAN PLANNING AREA

Note: The planning area for the Commission's transportation planning and programming efforts is the seven county Region. The required planning area under Federal law and regulation for the Commission as the designated Metropolitan Planning Organization consists of Kenosha, Milwaukee, Ozaukee, Racine, Washington, and Waukesha Counties, as well as small portions of Walworth, Jefferson, and Dodge Counties.

Federal regulations require that transit and arterial highway improvement projects within the seven-county Southeastern Wisconsin Region be included in this TIP if these projects are to be eligible for capital or operating Federal funding. The program also includes non-Federally funded transit and arterial highway projects within the Region. The program provides information to identify each project; shows estimated total costs and the estimated amounts of Federal, State, and local funds proposed to be obligated during the program period against those costs; designates the proposed type of Federal funds to be used by the project; and identifies the State and local agencies responsible for carrying out each project. Federal regulations also require that the TIP be determined to be consistent with the adopted regional transportation plan and be approved by the Regional Planning Commission as the Metropolitan Planning Organization for the urbanized areas in Southeastern Wisconsin. Approval by the Governor of the State of Wisconsin, or his designee, the Secretary of the Wisconsin Department of Transportation, is also required. Specifically, the Southeastern Wisconsin TIP must be approved by the State and incorporated into the Statewide transportation improvement program, which is submitted by WisDOT to the Federal Transit Administration and Federal Highway Administration for approval and potential funding action by these agencies.

The TIP by definition indicates the transportation improvement priorities of State and local governments by their program of projects for implementation in each of the four years of the program. The TIP represents a stage of implementation of VISION 2050—the year 2050 regional land use and transportation plan.<sup>1</sup> The TIP includes an assessment of how the projects programmed contribute to the achievement of both the VISION 2050 transportation performance goals and the targets established for the National performance measure (NPM). The TIP also includes a demonstration that available funding sources are adequate to implement the TIP by comparing total TIP costs and revenues for the program period. Federal regulations allow projects eligible for a particular Federal and State funding source, but that are not approved for such funding, to be illustratively listed in the TIP for informational purposes. Illustrative projects would be added to the TIP, and included in the assessment of available funding, should they be approved for the Federal or State funds being sought.

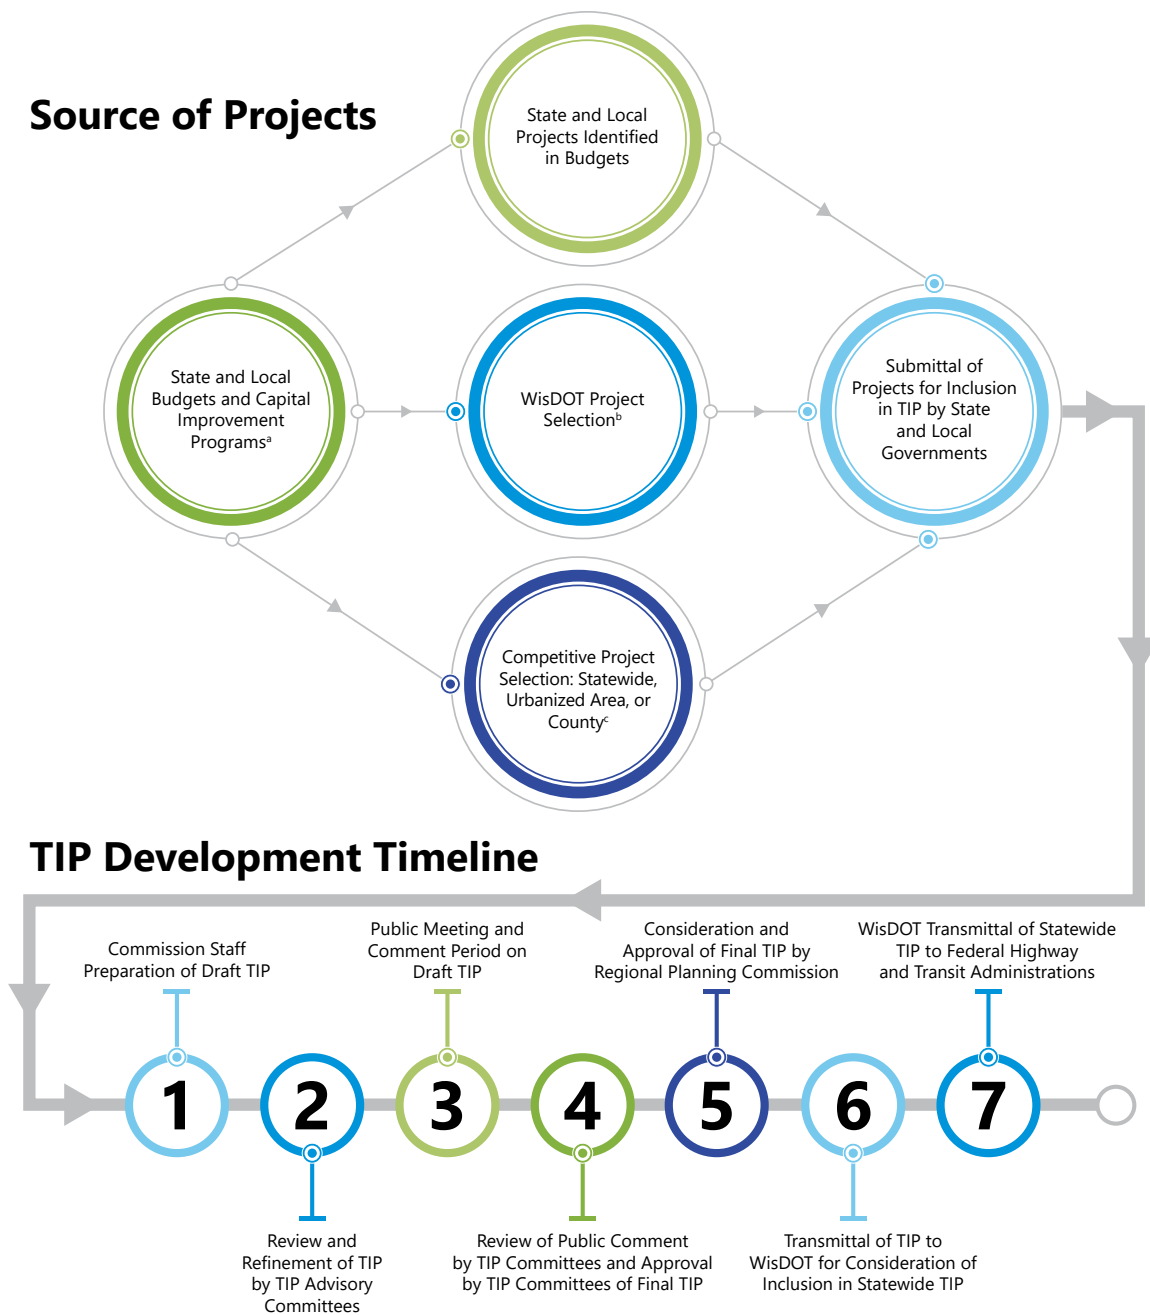

## **TIP DEVELOPMENT PROCESS**

Figure 1 shows the process used to develop the TIP every two years. The identification of proposed TIP projects is generally accomplished by the State and local governments in Southeastern Wisconsin ahead of the development of the four-year TIP. State and local government budgets identify levels of funding for specific programs, and typically also identify specific projects. While the TIP covers a four-year period, the State budget is only for a two-year period and local budgets are for one year. Generally, the levels of funding provided in current State and local budgets are anticipated to extend through the four-year time frame of the TIP. State and local multi-year capital improvement programs also provide guidance on potential budgets and identify projects over the four-year period of the TIP. For some categories of funding, such as Federal Highway Administration (FHWA) Surface Transportation Block Grant Program - Other (STP-O), FHWA National Highway Performance Program (NHPP) funding, and State funding, WisDOT selects projects for funding in addition to those specifically identified in the State budget. For other categories of funding, a competitive process is utilized to select projects for funding, including at the State level for FHWA Transportation Alternatives Program (TAP) and FHWA Safety Improvement Program funding (HSIP), at the urbanized area level for STP-Urbanized Area funding, and at the county level for Federal/State Bridge funding. The projects are typically selected for a multi-year period, which can extend beyond the four-year TIP period.

---

<sup>1</sup> See *SEWRPC Planning No. 55, VISION 2050: VISION 2050: A Regional Land Use and Transportation System Plan for Southeastern Wisconsin*.

**Figure 1**  
**Transportation Improvement Program Development Process**

<sup>a</sup> State and local government budgets identify levels of funding for specific programs, and typically also identify specific projects. While the TIP covers a four year period, the State budget is only for a two year period and local budgets are for one year. Generally, the levels of funding provided in State and local budgets are anticipated to extend through the TIP four year time frame. State and local multi-year capital improvement programs also provide guidance on potential budgets and identify projects over the TIP four year period.

<sup>b</sup> For some categories of funding, such as Federal Highway Administration (FHWA) Surface Transportation Program - Other (STP-O) and National Highway Performance Program (NHPP) funding and State funding, WisDOT selects projects for funding in addition to those identified in the State budget.

<sup>c</sup> For some categories of funding, a competitive project selection process selects projects for funding, including at the State level for FHWA Transportation Alternatives Program and FHWA Safety funding, at the urbanized area level for STP-Urbanized Area funding, and at the county level for Bridge funding. The projects are typically selected for a multi-year period which extends to or beyond the TIP four year period. Listed below for each category of Federal transportation funding is the level at which project selection processes are conducted:

Statewide

FHWA Highway Safety Improvement  
 FHWA Transportation Alternatives  
 FHWA Congestion Mitigation and Air Quality  
 FTA 5339 Bus and Bus Facilities Capital Funding  
 FTA 5310 Mobility for Seniors and People with Disabilities FTA 5307/5340 Transit Operating and Capital Funding for Urbanized Areas 50,000 - 200,000 Population (Funding Allocated to Transit Operators)  
 FTA 5311 Rural and Small Urban Operating and Capital Funding (Funding Allocated to Transit Operators)

Urbanized Area

FHWA Surface Transportation Program - Urbanized Area  
 FHWA Transportation Alternatives (Milwaukee Only)  
 FTA 5310 Mobility for Seniors and People with Disabilities (Only Milwaukee)  
 FTA 5339 Bus and Bus Facilities Capital Funding (Only Milwaukee)  
 FTA 5307/5340 Transit Capital and Capitalized Maintenance Funding (Milwaukee Only - Allocated to Transit Operators)

County

FHWA/State Bridge Replacement (WisDOT determines amount of funding available to each county)

As part of the development of the draft TIP, the Commission staff conducts a financial feasibility analysis by comparing the total amount of Federal, State, and local funding programmed in the TIP to an estimate of available revenues. The Commission staff also reviews the projects proposed to be included in the TIP for consistency with VISION 2050, specifically, the year 2050 fiscally constrained transportation system (FCTS).<sup>2</sup> In addition, an assessment is conducted of the contribution of projects listed in the draft TIP towards achieving the VISION 2050 performance goals and the targets established for the National performance measure. An assessment is also conducted of the impacts—positive and negative—on the minority populations and low-income populations within Southeastern Wisconsin.

The draft TIP is provided to the Advisory Committees established for each of the five urbanized areas for their review and refinement. The draft TIP is also made available to the public for review at a public meeting and on the Commission website. The public can provide comments on the draft TIP at the public meeting and during a public comment period. The Advisory Committees consider the proposed refinements to, and public comment on, the draft TIP when considering the recommendation of approval of a final TIP by the Commission. The approved final TIP is then provided to the Secretary of the Wisconsin Department of Transportation for review and consideration of approval for inclusion in the Statewide Transportation Improvement Program (STIP). Following WisDOT approval of the final TIP and inclusion into the STIP, the final STIP is transmitted to FHWA and FTA.

The following sections provide more detail on the preparation of the TIP, the Advisory Committees established to guide TIP development, public involvement for the TIP, and project selection.

### **Preparation of TIP**

The technical effort required to develop the TIP is provided by an interagency staff team composed of representatives of the WisDOT, Southeast Region; the Milwaukee County Department of Transportation; the Milwaukee County Transit System; the City of Milwaukee; and the Regional Planning Commission. Commission staff contact local engineers, planners, and transit operators within the Region to assure not only participation in, and understanding of, the program development process, but also to assure that all proposed State and local government transportation projects are considered for inclusion in the TIP. Requests were made to implementing agencies to provide Commission staff an update for all projects listed in the previous TIP and new projects to be considered for addition to the new TIP, including projects that were recommended for FHWA and FTA funding since the adoption of the previous TIP and that have not yet been added by amendment. In addition, pursuant to Federal regulations, transit operators provide Commission staff with a description of the operating assistance and planning elements of the FTA Section 5307 program of projects, a description of the justification for the transit capital projects to be included in the four years of the TIP, and financial data and nonfinancial operating statistics for their transit system, as set forth in Appendix H.

The information provided by the implementing agencies was used by Commission staff to prepare a project-by-project listing, provided in Appendix A, that includes for each project a brief description to identify the project, the estimated total costs and the estimated amounts of Federal, State, and local funds proposed to be obligated during the program period against those costs, the proposed type of Federal funds to be used by the project, and the State and local agencies responsible for carrying out the project. Commission staff reviewed each project proposed to be listed in the TIP for consistency with the adopted year 2050 (FCTS). In addition, an assessment was made of the contribution of the projects programmed in the TIP towards achievement of both the VISION 2050 performance goals and the NPM targets. This assessment is provided in Appendix E.

---

<sup>2</sup> An important aspect related to implementing VISION 2050 relates to funding. The amount of public funding needed to construct, operate, and maintain the transportation component of VISION 2050 has been compared to the amount of funding expected to be available. Federal metropolitan planning regulations (23 CFR Part 450) and conformity regulations (40 CFR Part 93.108) require that the Region's transportation plan be "fiscally constrained"—only including projects that can be funded with expected funds, taking into account the limitations placed on these funding sources by Federal and State law. Therefore, only the portion of VISION 2050 that can be funded with these revenues is considered the "fiscally constrained" regional plan by the Federal Government and is titled the Fiscally Constrained Transportation System (FCTS). The FCTS is used in the determination of conformity and in the development of the transportation improvement program.

The Commission staff also compared the total costs of the proposed projects in the TIP to estimates of available Federal, State, and local funding to ensure that available funding sources are adequate to implement the TIP (see Appendix D). The estimate of available funding is based upon authorized Federal funding levels and historical State and local funding sources. Federal regulations allow projects eligible for a particular Federal and State funding source, but that are not approved for such funding, to be illustratively listed in the TIP for informational purposes. These projects would not be required to be included in the assessment of available funding. Such projects would be added to the TIP, and included in the assessment of available funding, should they be approved for the Federal or State funds being sought.

The information provided by the implementing agencies was also used to prepare a list of the status of projects contained in the previous TIP, including an identification of projects that were completed or dropped from the TIP, as provided in Appendix B.

In addition, the Commission staff conducted an evaluation assessing the impact of the projects programmed in the TIP on minority populations and low-income populations—both positive and negative—and evaluated whether minority populations and low-income populations may be expected to receive a proportionate share of TIP benefits, and not receive a disproportionate share of TIP negative impacts. Specifically, the evaluation included identifying the magnitude and location of minority populations and low-income populations within the Region; a comparison of the mode of travel used by minority populations and by white (non-Hispanic) populations; and a comparison of the programmed transit, arterial highway, and bicycle/pedestrian projects with locations of concentrations of minority populations and low-income populations. This evaluation is documented in Appendix I.

### **Advisory Committees**

To assist in, and guide, the preparation of the TIP, the Commission has established advisory committees in each of the urbanized areas of the Region—Advisory Committees on Transportation System Planning and Programming for the Kenosha, Milwaukee, Racine, Round Lake Beach, and West Bend Urbanized Areas (TIP Committees). These committees include local technical staff and elected officials and State and Federal agency representatives responsible for transportation system improvement, operation, and maintenance within each urbanized area. The TIP Committees are charged with the responsibility of reviewing and approving the TIP as it is prepared biennially for submission to the Commission and then to the State and Federal governments. In addition, the TIP Committees, as necessary, provide guidance in the development of procedures for the evaluation and recommendation of projects for various Federal funding programs, including FHWA Surface Transportation Program-Milwaukee Urbanized Area (STP-M) funding. Rosters of the TIP Committees are set forth in Appendix F.

The Milwaukee TIP Committee which guides the development of the TIP for the Milwaukee urbanized area is established on a population-proportional basis reflecting the population proportionality of each County and municipality within the Milwaukee urbanized area. The 22 members of the Milwaukee TIP Committee include local technical staff and elected officials typically appointed by the community/county's chief elected official, and include five members representing Milwaukee County (with four members appointed by the County Executive and one member appointed by the County Board Chairman) and six members representing the City of Milwaukee (with five members appointed by the Mayor and one member appointed by the City Council President). The Milwaukee TIP Committee also includes representation from each of the five public transit operators within the Milwaukee urbanized area—Milwaukee County, Waukesha County, City of Waukesha, Washington County, and Ozaukee County. The Milwaukee TIP Committee guides the development and application of procedures to evaluate, prioritize, and recommend projects for FHWA Surface Transportation Program – Milwaukee Urbanized Area (STP-M) funding.

### **Public Involvement**

There is public involvement attendant to each project in the TIP. The TIP is consistent with, and drawn from, the regional transportation plan and the Commission conducts extensive public involvement efforts as part of that planning process. Also, each project as proposed by State and local governments likely has had, or will have, public involvement as part of the preparation of preliminary engineering, environmental assessment, annual government budget, and/or a capital improvement program.

During the development of the 2023-2026 TIP, the Commission staff prepared a draft copy of the TIP that was made available to the public on the Commission's website. Hard copies of the draft TIP were also available upon request. There was a 30-day comment period on the draft TIP, and a public meeting was held on the draft TIP, consistent with the Commission's public participation plan. The public meeting was held virtually to increase the opportunity for local officials and residents in the Region to attend and offer comment and input on the draft 2023-2026 TIP. Formal announcement of the public meeting and comment period was provided through paid notices appearing in the regional Milwaukee Journal-Sentinel newspaper and two minority newspapers—the Milwaukee Community Journal and El Conquistador—as well as the Commission's website.

Under the Commission's outreach to minority and low-income populations outlined in its public participation plan, the Commission staff provided the draft TIP—including an evaluation of impacts (positive and negative) of the draft TIP on minority and low-income populations—to members of the Commission's Environmental Justice Task Force (EJTF) for review and comment. Members were invited to attend the public informational meeting and to provide additional comment, either at the meeting or during the 30-day comment period. In addition, the Commission staff maintains a list of approximately 90 minority and low-income groups and organizations that are consulted regarding the most effective means and materials for interacting with their membership and/or populations, and are informed of the Commission's public participation opportunities for its planning and programming activities, including the TIP. During the preparation of the TIP, the Commission staff sent a letter to each of these groups and organizations briefly describing the purpose of the TIP, and informing them of the availability of the draft TIP, the evaluation of impacts of the draft TIP on minority populations and low-income populations, and the public information meeting. The Commission staff offered to meet with each group and organization to further explain the TIP and obtain their comments.

Commission staff prepared a formal record of the public meeting and comments received on the draft TIP, including responses to each comment received, as documented in Appendix J. The response to comments received may result in changes to the draft TIP that are recommended by Commission staff to be included in the final TIP. The record of public meeting and comments, including any potential changes to the draft TIP, was reviewed by the TIP Committees and the Commission when considering approval of the TIP. In addition, the public participation process for the TIP satisfies the public participation process for the Program of Projects, as prescribed in accordance with Chapter 53 of Title 49, United States Code, and the current metropolitan and statewide planning regulations, for the following Transit Administration grantees: the City of Hartford, City of Kenosha, Kenosha County, the City of Milwaukee, Milwaukee County, Ozaukee County, the City of Racine, Walworth County, Washington County, Waukesha County, and the City of West Bend.

### **Project Selection for Federal and State Transportation Funding**

Federal and State transportation funding have specific project eligibility, and other limitations and requirements. Funding may be limited to a specific transportation mode, program, or geographic area, or may require funding to be used only for capital projects and not operating costs. Federal law allows the transfer, or flexing, of FHWA funds, such as Surface Transportation Block Grant Program (STP), National Highway Performance Program (NHPP), and Congestion Mitigation and Air Quality Improvement Program (CMAQ) funding, to fund transit capital projects, and in the case of CMAQ to also fund the operation of transit improvement or expansion projects for a limited number of years. With regard to State funding for transportation projects, the amount of State and Federal funding that is available for State and local transportation projects is established in the State biennial budget. The biennial budget is very prescriptive with respect to the State and Federal funding available for different types of transportation projects throughout the State. For example, the State budget establishes the amount of State and Federal funding that will be available for transit operating expenses, and also for the maintenance and reconstruction of the freeway system in Southeastern Wisconsin.

The process used for selecting projects for State and Federal funding, and inclusion in the TIP, varies by funding source. The level of the Commission's involvement in the evaluation and recommendation of projects for funding also depends on the funding source. With regard to State projects, WisDOT provides the Commission a listing of projects proposed to be included in the TIP for use of State and Federal funding, including FHWA NHPP funding and STP funding that are available to State projects statewide, including within Southeastern Wisconsin. The process of selecting State highway projects for implementation (and

inclusion in the TIP) varies depending on the size and complexity of the projects. Most State highway rehabilitation and reconstruction projects are funded under the State Highway Rehabilitation (SHR) program. The WisDOT determines which projects are implemented based on various factors, such as condition, physical characteristics, rate of crashes, and traffic characteristics. Larger projects are generally funded under the State Majors Program.<sup>3</sup> Potential Majors projects in the Region have to compete for Majors Program funding against other large projects statewide based on the basis of economic impact, traffic flow, safety, and environmental considerations. The evaluation of the potential Majors projects is considered by the State's Transportation Projects Commission in recommending projects for enumeration in the State biennial budget. The funding for large freeway reconstruction projects in Southeastern Wisconsin is specifically enumerated in the State biennial budget under the Southeast Wisconsin Freeway Megaproject Program.<sup>4</sup> Historically, this has included the projects to reconstruct the Marquette Interchange, the Zoo Interchange, and IH 94 from the Mitchell Interchange to the State line.

With respect to local projects, WisDOT solicits highway, transit, and other projects for all FHWA funding programs and transit projects for some FTA funding programs. The solicitations typically occur annually or biennially, depending on the funding source. The Commission is directly involved with the selection of projects for FHWA funding specifically allocated to the Milwaukee urbanized area, such as FHWA STP and TAP funding. The Commission staff has also been asked from time-to time to assist in evaluating and prioritizing projects for FHWA STP funding allocated to the other four urbanized areas within the Region (Kenosha, Racine, Round Lake Beach, and West Bend) and for FHWA STP/State Bridge Replacement funding available for local projects within counties. WisDOT evaluates and recommends local projects on a statewide basis for FHWA/State Bridge and FHWA HSIP funding. WisDOT, the Wisconsin Department of Natural Resources (WDNR), and the Commission work cooperatively to prioritize and recommend projects for FHWA CMAQ funding. Additional information on the project selection processes for FHWA funding is provided in Appendix G.

With regard to transit projects, the Commission works with the transit operators in the Milwaukee urbanized area on the distribution of FTA Section 5307/5340 Urbanized Area Formula Program, FTA Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities Program, and FTA Section 5339 Bus and Bus Facilities Program funding that is specifically allocated to the urbanized area. The designated recipients of these funds—each transit operator in the Milwaukee urbanized area in the case of Section 5307/5340 and Section 5339 funds and Milwaukee County in the case of Section 5310 funds—applies directly to FTA for the projects recommended for these funding sources. Since the Round Lake Beach urbanized area was extended from Illinois into Kenosha County based on the 2000 U.S. Census, and into Walworth County based on the 2010 Census, the FTA Section 5307/5340 funding allocated to the Wisconsin portion of the urbanized area has been transferred to transit operators located in the Illinois portion of the urbanized area due to a lack of an eligible local transit operator. WisDOT determines the distribution of FTA Section 5307/5340 funding to the other urbanized areas having a population between 50,000 and 200,000 within Southeastern Wisconsin. For the FTA Section 5339 funding available to bus and bus facilities projects statewide, WisDOT distributes a portion of the funding to the urbanized areas within the State with a population of 200,000 or more, such as the Milwaukee urbanized area. WisDOT solicits, evaluates, and recommends projects for the remaining FTA Section 5339 that is available for all of the urbanized areas within the State.

WisDOT also solicits, evaluates, and recommends mobility projects serving seniors and people with disabilities for FTA Section 5310 funding available to projects statewide and outside of the urbanized areas with populations of 200,000 or more. In addition, WisDOT distributes Section 5311 Non-Urbanized Area Formula Grant funds to transit systems outside of the urbanized areas, such as the shared-ride taxi systems in the City of Whitewater and Walworth County. The State also distributes State operating assistance funds

---

<sup>3</sup> Based on Wisconsin State Statutes, Major projects include projects with a total cost of \$35.7 million or more (adjusted with inflation) and involve 1) constructing a new highway 2.5 miles or more in length; 2) reconstructing or reconditioning an existing highway by relocating 2.5 miles or adding 5 or more miles in length; or 3) improving to freeway standards 10 or more miles of an existing divided highway having two or more lanes in either direction. Major projects also include SHR projects with a cost of at least \$89.2 million (adjusted with inflation)—that do not otherwise meet the other statutory requirements for the State Majors Program.

<sup>4</sup> Based on Wisconsin State Statutes, projects in the Southeast Wisconsin Freeway Reconstruction Megaproject Program include the freeway reconstruction projects that have a minimum cost of \$596.8 million (adjusted with inflation).

to the transit operators in Southeastern Wisconsin to supplement the FTA funding used by the transit operators for the operation and maintenance of their systems. Additional information on the project selection processes for FTA funding is provided in Appendix G.

The Region also receives FTA Section 5337 – State of Good Repair Program funding for maintaining two existing fixed-guideway transit systems—Waukesha County Transit System’s bus service operated in a reserved lane on W. Bluemound Road and the City of Kenosha’s streetcar system. Projects recommended for Section 5337 funds are provided by the operators of these two systems for inclusion in the TIP. Based on the implementation of the Milwaukee streetcar system in 2018, it is expected that the City of Milwaukee will become a recipient of these funds beginning in Federal Fiscal Year 2026. Similarly, the East-West Bus Rapid Transit is anticipated to begin revenue service in 2023, and become eligible for FTA Section 5337 funding starting in Federal Fiscal Year 2031.

## **TIP AMENDMENT PROCESS**

Following approval of a TIP by the Commission and appropriate State and Federal agencies, changes to projects listed in the TIP, and the addition or deletion of projects within the TIP, are requested periodically by the various levels of governments and agencies. Figure 2 summarizes the criteria used to determine if a proposed change to the TIP is considered a major amendment, minor amendment, or an administrative modification.

In general, amendments to the TIP are used for adding projects to, or removing projects from, the TIP and for changes to projects already listed in the TIP that would substantially modify project scope, cost, or timing. Major amendments to the TIP involve the addition or deletion of a transportation capacity expansion project, the addition or deletion of a project of more than \$3 million in construction costs, or a significant change in project scope, cost, or timing. Public review and comment are formally solicited for major amendments, which is noticed with a 14-day comment period on the Commission’s website ([www.sewrpc.org](http://www.sewrpc.org)) and for such amendments that do not also require an amendment to the FCTS of the regional transportation plan. Per the Commission’s public participation plan, full notification and a 30-day public review and comment period would occur for any amendment to the TIP that would also require an amendment to the regional transportation plan. While public review and comment is not formally solicited for minor amendments, such amendments are posted on the Commission’s webpage and sent to interested parties that have indicated that they would like to receive all TIP-related information. Amendments typically occur bimonthly and are generally noticed on the Commission’s website during the first or second week of those months. Proposed amendments are reviewed by the TIP Committee(s) where the projects contained within the proposed amendment are located prior to being approved by the Commission.

Administrative modifications are used for modest changes to the TIP—such as modest changes in project cost, a change in funding source of non-discretionary funds, and changes in project timing within the four years of the program—that do not require the solicitation of public comment, air quality conformity determination, and demonstration of fiscal constraint. Administrative modifications are also used to correct data entry or typographical errors, splitting or combining projects, and changing or clarifying elements of the project description, as long as these changes would not modify the original scope of the project. The Commission and the TIP Committees are not required to approve administrative modifications to the TIP.

The above TIP amendment procedures would also be utilized for adding projects illustratively included in the TIP— as Federal funding has not yet been awarded—that are subsequently approved for full or partial Federal funding. However, as the project information for the illustrative projects are already included in the TIP (and have been reviewed by the Committees and the public), formally adding illustrative projects to the TIP, which do not also require other changes necessitating a minor or major amendment (as outlined in Figure 2), would be done through an administrative modification.

Like the TIP document, approved amendments and processed administrative modifications to the TIP are submitted for approval to the appropriate State and Federal agencies. All pending and approved amendments, and all processed administrative modifications, to the TIP are posted on the Commission’s webpage, and sent to interested parties that have indicated that they would like to receive all TIP related information.

**Figure 2**  
**Types of Changes to the Transportation Improvement Program (TIP)**

<p><b>MAJOR AMENDMENT</b></p> <ul style="list-style-type: none"> <li>▶ Adding or deleting a project of more than \$3 million in construction costs</li> <li>▶ Adding or deleting a capacity expansion project</li> <li>▶ A significant change in cost (\$3 million or more)</li> </ul>	<p>Requires formal public comment period<sup>a</sup></p>
<p><b>MINOR AMENDMENT</b></p> <ul style="list-style-type: none"> <li>▶ Adding or deleting a project of less than \$3 million in construction costs</li> <li>▶ Adding or deleting non-capacity expansion project</li> <li>▶ Minor changes in cost (less than \$3 million)</li> </ul>	<p>Does not require formal public comment period<sup>a</sup></p>
<p><b>ADMINISTRATIVE MODIFICATION</b></p> <ul style="list-style-type: none"> <li>▶ Modest changes in TIP that do not require the solicitation of public comment, air quality conformity determination, and demonstration of financial constraint:             <ul style="list-style-type: none"> <li>&gt; Modest changes in cost (less than \$200,000)</li> <li>&gt; Changes in non-discretionary funding sources (for example changing State funding to NHPP funding for state highway projects)</li> <li>&gt; Changes in project timing within the four years of the program</li> </ul> </li> <li>▶ In addition, administrative modification can be used to correct data entries or typographical errors, splitting or combining projects, and changing clarifying elements of the project description as long as these changes do not modify the original scope of the project.</li> </ul>	<p>Does not require formal public comment period<sup>b</sup></p>

<sup>a</sup> Amendments to the TIP require approval by the appropriate TIP Advisory Committee and the Commission. All potential amendments are posted on the Commission's website and sent to a listing of interested parties regardless of whether the TIP amendments require a formal comment period.

<sup>b</sup> Administrative modifications can be made without formal approval by the TIP Advisory Committees and the Commission. Completed administrative modifications are posted on the Commission's website.

Source: SEWRPC

## LIST OF OBLIGATED PROJECTS

Each year, the Commission staff, in coordination with staffs from WisDOT, area transit operators, FHWA, and FTA, prepares a listing of projects that were obligated for FHWA or FTA funding during the previous calendar year. The obligation of funds for a project by the appropriate Federal agency—FHWA or FTA—indicates the Federal government's commitment to fund the approved Federal share of the cost of a project. The listing of obligated projects is completed within the first three months of the year and made available to the public on the TIP webpage of the Commission's website. It should be noted that projects for which funds have been obligated are not necessarily initiated or completed in the four program years of the TIP. Further, the Federal funding for projects, or elements of projects, which have been previously obligated are not required to be listed in the TIP.

## **THE TRANSPORTATION IMPROVEMENT PROGRAM AND REGIONAL TRANSPORTATION PLANNING**

Since 1961, the Regional Planning Commission has carried out the planning necessary to guide transportation improvement programming within the Region. The adopted regional land use and transportation plan for the year 2050 (VISION 2050) is documented in SEWRPC Planning Report No. 55, *VISION 2050: A Regional Land Use and Transportation System Plan for Southeastern Wisconsin*.

VISION 2050 includes recommendations for which arterial facilities require preservation or improvement (widening to provide additional lanes) and new arterial facilities proposed as system expansion. VISION 2050 recommends those transit facilities and services that should be preserved, improved, and expanded. Demand and traffic management actions are also recommended to increase the capacity of the existing transportation system at low costs and disruption. VISION 2050 also recommends bicycle accommodations on surface arterial streets and off-street bicycle facilities. Appendix E includes an assessment of how the projects programmed in the 2021-2024 TIP contribute to the achievement of VISION 2050 performance goals.

As described previously, implementation of VISION 2050 relies on adequate funding for transportation infrastructure and services. The amount of public funding needed to construct, operate, and maintain the transportation component of VISION 2050 has been compared to the amount of funding expected to be available. Federal metropolitan planning regulations (23 CFR Part 450) and conformity regulations (40 CFR Part 93.108) require that the Region's transportation plan be "fiscally constrained"—only including projects that can be funded with reasonably available funds, taking into account the limitations placed on these funding sources by Federal and State law. Therefore, only the portion of VISION 2050 within the FCTS (which can be funded within these revenue limitations) is considered the regional plan by the Federal Government. The FCTS is used in the determination of conformity and in the development of the TIP.

To establish a consistent nationwide process for monitoring the effectiveness of Federal transportation investments, MAP-21, enacted in 2012, created a framework for a national performance management (NPM) approach to transportation decision-making on investments with Federal highway and transit funding. In implementing the NPM approach, FHWA and FTA have developed 1) specific highway and transit NPMs and 2) requirements for States, transit operators, and Metropolitan Planning Organizations (MPOs) in establishing and reporting targets, along with the monitoring of achievement of the targets, for each NPM. The Commission is responsible for establishing baseline data and performance targets for all of the NPMs for Southeastern Wisconsin, and is required to report, in VISION 2050, the established baseline data and the NPM targets. In addition, the Commission is required to include in the TIP a description of how the projects programmed in the TIP promote the achievement of the NPM targets. Appendix E provides a summary of the targets established by the Commission, and an evaluation of how the projects programmed in the TIP are expected to contribute to the achievement of the targets.

## **THE 2023 THROUGH 2026 TRANSPORTATION IMPROVEMENT PROGRAM**

Table 1 summarizes the total funds required to implement the projects located in each of the seven counties in Southeastern Wisconsin within each of the four years of the TIP. The total funds required to implement the projects contained within the first year—2023—of the TIP are \$862,995,500; and, Federal funding sources would supply \$509,116,700; State sources, \$242,195,700; and local sources, the remaining \$111,683,100. A more detailed program cost summary by Federal aid program, area, and project category is presented for the year 2023 in Tables 2 through 4.

Appendix A presents a project-by-project listing of the TIP. Sufficient information is provided to identify the type of project; the termini and length of the project; the estimated total cost and amount of Federal, State, and local funds proposed to be obligated during the program year<sup>5</sup>; the proposed Federal funding program; and the recipient or agency responsible for implementing the project. Table A.1 of Appendix A sets forth the TIP for the Milwaukee area, including Milwaukee, Ozaukee, Washington, and Waukesha Counties, one table for each county; and, Table A.2 of Appendix A sets forth the TIP for the Kenosha-Racine-Walworth

---

<sup>5</sup> The costs shown in Appendix A are as provided by project sponsors. These cost estimates were treated as constant dollars for purposes of the assessment (Appendix D).

area. Each table is structured to indicate the TIP projects listed by order of implementing agency and, for each implementing agency, in ten categories: highway system preservation, highway system improvement, highway system expansion, transit system preservation, transit system improvement, transit system expansion, bicycle and pedestrian, highway safety, environmental enhancement, and off-system highway. Descriptions of each category are provided below.

- Highway Preservation: Projects that result in little or no increase in the traffic-carrying capacity of the existing arterial street system, but are necessary to maintain existing capacity and structural adequacy of the arterial facility for which the project is proposed. These projects which are described as resurfacing or reconstruction may also provide bicycle and pedestrian accommodations and incorporate modernization of the existing arterial facility to address safety and other concerns, by including intersection improvements, shoulder widening, and vertical and horizontal alignment improvements.
- Highway Improvement: Projects generally involve roadway reconstruction (similar to highway preservation), but also include in the reconstruction an increase in the traffic carrying capacity of the existing arterial highway system, typically through the addition of traffic lanes.
- Highway Expansion: Projects that increase the traffic carrying capacity of the arterial highway system through development of new arterial streets or highways.
- Transit Preservation: Projects that are necessary to maintain the current quality and level of service on the existing transit system.
- Transit Improvement: Projects that improve the quality and level of service on the existing transit system.
- Transit Expansion: Projects that either expand the existing transit system or create new transit systems or subsystems.
- Bicycle/Pedestrian: Projects that involve preservation, improvement, and expansion of bicycle and pedestrian accommodations along arterial streets and highways, or on adjacent roadway corridors or off-roadway locations.
- Highway Safety: Projects designed to improve or eliminate existing unsafe conditions on the Federal aid highway system, as it currently exists, and are candidates for special Federal safety program funding.
- Environmental Enhancement: Projects that can reduce air, noise, or visual pollution, and provide some benefit to highway system operation or capacity.
- Highway Off-System: Projects on streets or highways that are not on the arterial street and highway system and are candidates for special Federal funding.

Figure 3 graphically presents the proposed expenditures in the first year of the TIP by each of the ten project categories for each of two areas, the Milwaukee Transportation Management Area including Milwaukee, Ozaukee, Washington, and Waukesha Counties, and the Kenosha, Racine, and Walworth Transportation Management Area including Kenosha, Racine, and Walworth Counties. Certain expenditure patterns are apparent from an examination of Figure 3. These include the following:

- A significant portion of financial resources programmed for 2023 are to be devoted to the preservation of the existing transportation facilities and services—both highway and transit—about \$692.6 million, or 80.3 percent of expenditures in the Region. This allocation of resources does not involve routine highway operations and maintenance activities—snowplowing, ice control, grass cutting, and power for traffic control and street lighting.

**Figure 3**  
**Distribution of Expenditures in 2023 of the 2023 Through 2026**  
**Transportation Improvement Program by Project Category**

Note: For 2023 through 2026, no expenditures are expected to be incurred for transit improvement or highway expansion for the Milwaukee Area. No expenditures are expected to be incurred for highway improvement, highway expansion, transit improvement, and environmental enhancement for the Kenosha, Racine, Walworth Area. However, one of the transit expansion projects for the Kenosha, Racine, Walworth Area also includes transit improvement activities.

Source: SEWRPC

- The expenditures for highway improvement in 2023 are approximately \$115.8 million, or 13 percent of total expenditures. A vast majority of these funds—over 99 percent—are programmed for the two freeway reconstruction projects—IH 43 between Silver Spring Drive and STH 60 and IH 94 between N. 70th Street and N. 16th Street. (It should be noted that much of the cost of a highway improvement project is due to the reconstruction of the existing highway facility. The cost of additional traffic lanes provided may only represent 10 to 20 percent of the total costs of a highway improvement project.) In 2023, no expenditures are programmed for highway expansion projects.
- About \$223.2 million, or 27 percent of the total financial resources in 2023, is devoted to public transit projects. Of the total year 2023 programmed resources for public transit, \$194.7 million, or 87 percent, is for preservation and \$28.5 million, or 13 percent, is for service expansion. However, one of the transit expansion projects also includes transit improvement activities.

Similar programmed funding patterns exist for the full four years of the 2023-2026 TIP. About \$2.37 billion, or about 73 percent of the total \$3.2 billion 2023-2026 programmed funding, is for highways. Of the total 2023-2026 programmed resources for highways, \$1.4 billion, or 58 percent, is for highway preservation and \$984.7 million, or 42 percent, is for highway improvement. There are no highway expansion projects programmed in the 2023-2026 TIP. About \$743.7 million, or about 23 percent, of the 2023-2026 programmed funding is for transit. Of the total 2023-2026 programmed resources for transit, \$712.2 million, or about 96 percent, is for transit preservation, and \$31.6 million, or about 4 percent, is for transit expansion. However, one of the transit expansion projects also includes transit improvement activities.

## **STATUS OF PROJECTS IDENTIFIED WITHIN ANNUAL ELEMENT OF THE 2021 THROUGH 2024 TRANSPORTATION IMPROVEMENT PROGRAM**

Appendix B of the TIP reports on the status of projects contained within the 2021-2024 TIP. These projects have been completed; are currently underway and are intended to continue or be completed within the time period of this 2023-2026 transportation improvement program; are on schedule to be initiated during the time period of the 2023-2026 TIP; were deferred from the 2021-2024 TIP and are contained in the 2023-2026 TIP; are not included in the 2023-2026 TIP due to the project no longer being considered for implementation or the project being combined with another project in the 2023-2026 TIP; or were programmed in the 2021-2024 TIP, but have no work scheduled until beyond the last year of the 2023-2026 TIP.

### **SUMMARY**

This TIP sets forth, in tabular format in Appendix A, the list of projects for improving transportation facilities and services proposed for the years 2023 through 2026 by State and local governments within Southeastern Wisconsin. All projects have been determined to be in conformance with the adopted regional transportation plan.

# APPENDICES

**2023 THROUGH 2026 TRANSPORTATION IMPROVEMENT  
PROGRAM FOR SOUTHEASTERN WISCONSIN**

**APPENDIX A**

Appendix A is the list of projects constituting the transportation improvement program for the seven county Southeastern Wisconsin Region.

Table A.1: The TIP for the Milwaukee Transportation Management Area (Milwaukee, Ozaukee, Washington, and Waukesha Counties)

Table A.2: The TIP for the Kenosha County, Racine County, and Walworth County Transportation Management Area

Within each table, projects are listed in order by implementing agency—the State of Wisconsin first, then the appropriate county in alphabetical order; and then by municipality in alphabetical order within the county. The TIP projects of each implementing agency are arranged in order by the following project categories: highway preservation, highway improvement, highway expansion, transit preservation, transit improvement, transit expansion, bicycle and pedestrian projects, highway safety, off-system highway improvement, and highway-related environmental enhancement.

An explanation of the abbreviations used in the appendix follows:

**SOURCE OF FUNDS (FEDERAL AND STATE FUND CODES)**

ARPA	American Rescue Plan Act
BUILD	Better Utilizing Investments to Leverage Development Grant Program
CMAQ	Congestion Mitigation and Air Quality Improvement Program
COMB	Combination of FHWA and FTA Funds
CRRSAA	Federal Coronavirus Response and Relief Supplemental Act
FTA 5307	FTA Section 5307 Funds—Urban Formula Program
FTA 5309	FTA Section 5309 Funds—Capital Investment Grants Program
FTA 5310	FTA Section 5310 Funds—Enhanced Mobility of Seniors and Individuals with Disabilities Program
FTA 5311	FTA Section 5311 Funds—Nonurban Area Formula Program
FTA 5337	FTA Section 5337 Funds—State of Good Repair Grant Program
FTA 5339	FTA Section 5339 Funds—Bus and Bus Facilities Formula Program
HSIP	Highway Safety Improvement Program
IH-C/S	Interstate Highway Cost Estimate Funds - Completion or Substitution
INFRA	Infrastructure for Rebuilding America Grant Program
LRIP	Local Road Improvement Program
NHPP	National Highway Performance Program
OTHER FED	Federal funding programs not sponsored by FHWA or FTA (Economic Development Funds and Community Development Block Grants are examples)
OTHER FHWA	FHWA funding program other than those listed (includes certain limited demonstration funds)
PL	FHWA Public Law Funds (Federal Metropolitan Planning Funds)
STP-B	FHWA Surface Transportation Block Grant Program - Bridge
STP-M	Surface Transportation Block Grant Program – Milwaukee Urbanized Area Funds
STP-O	Surface Transportation Block Grant Program – Other Funds (Rural, other urban and urbanized areas, discretionary)
TAP	Transportation Alternatives Program
TIGER	Transportation Investment Generating Economic Recovery Program

## PROJECT NO.

1	Project number for project in 2023-2026 TIP
(1)	2021-2024 TIP project number for project contained in 2023-2026 TIP
I	Indicates that the project is being shown in the TIP for informational purposes, and is not included in the evaluation of fiscal constraint

## PROJECT DESCRIPTION

CTH	County trunk highway
IH	Interstate highway
STH	State trunk highway
M or MI	Miles

"C/" represents "City of"

"V/" represents "Village of"

"T/" represents "Town of"

## PROJECT TYPE

HP	Highway Preservation
HI	Highway Improvement
HE	Highway Expansion
TP	Transit Preservation
TI	Transit Improvement
TE	Transit Expansion
BP	Bicycle/Pedestrian
EE	Environmental Enhancement
HS	Highway Safety
OH	Off Arterial Highway System

## COST<sup>6</sup>

PE	Preliminary engineering
ROW	Right-of-way
CONST	Construction
OTHER	Purchase and/or installation of equipment, operation of transit services, and planning activities (not related to preliminary engineering work)
REMAINING	The remaining estimated project costs expected to occur beyond the four years of the TIP. (Does not include estimated costs for annual expenditures, such as operating costs.)

## AIR QUALITY STATUS

EXEMPT	Project implementation is exempt from air quality conformity assessment. Such projects are considered to have no impact on air quality.
NON-EXEMPT AIR QUALITY NEUTRAL	Project implementation requires air quality conformity assessment. However, project is considered to have a minimal impact on air quality and does not need to be included in a regional emissions analysis supporting an air quality conformity assessment.
NON-EXEMPT	Project implementation requires air quality conformity assessment. Project is considered to have an impact on air quality and must be included in a regional emissions analysis supporting an air quality conformity assessment.

---

<sup>6</sup>The costs shown in Appendix A are as provided by project sponsors. For purposes of the comparison of programmed costs and available revenues (Appendix D), they are treated as constant dollars.

## TABLE A ENDNOTES

- 11<sup>a</sup> Project is to be funded with \$9,972,400 in Federal Highway Administration National Highway Performance Program (NHPP) funds and with \$11,106,000 in Federal Coronavirus Response and Relief Supplemental Appropriations Act (CRRSAA) funds in 2023. The remaining project costs will be funded with FHWA NHPP funds.
- 66<sup>b</sup> The Wisconsin Department of Transportation (WisDOT) is currently reassessing alternatives developed as part of the National Environmental Policy Act (NEPA) process previously conducted for the project, including alternatives with and without additional travel lanes. Following the completion of the reassessment and a preferred alternative is selected, WisDOT will seek a new Record of Decision from the Federal Highway Administration (FHWA).
- 199<sup>c</sup> Project is to be funded with \$127,200 in Federal Transit Administration - Bus and Bus Facilities Formula Program (FTA Section 5339), \$44,800 in Federal Transit Administration - Urban Area Formula Program (FTA Section 5307), and with local funds per year.
- 216<sup>d</sup> Project is to be funded with \$2,484,500 in Federal Highway Administration National Highway Performance Program (NHPP) funds and with \$2,128,800 in Federal Highway Administration Highway Safety Improvement Program (HSIP) funds.
- 218<sup>e</sup> Project is to be funded with \$85,600 in Federal Highway Administration Highway Safety Improvement Program (HSIP) funds and with \$1,273,400 in Federal Highway Administration Surface Transportation Program - Other (STP-O) funds.
- 236<sup>f</sup> The Federal Transit Administration (FTA) Section 5339-Bus and Bus Facilities program funding approved for this project was transferred by WisDOT to the FTA Section 5307 program. However, the funding requirements and limitations of the FTA 5339 program remain.
- 245<sup>g</sup> Project is to be funded with \$173,200 in Federal Highway Administration - Highway Safety Improvement Program (HSIP) funds and \$20,027,400 in Federal Highway Administration - National Highway Performance Program (NHPP) funds.
- 249<sup>h</sup> Project is to be funded with \$302,300 in Federal Highway Administration Highway Safety Improvement Program (HSIP) funds and with \$3,835,600 in Federal Highway Administration National Highway Performance Program (NHPP) funds.
- 253<sup>i</sup> Project is to be funded with \$447,200 in Federal Highway Administration Highway Safety Improvement Program (HSIP) funds and with \$6,357,100 in Federal Highway Administration National Highway Performance Program (NHPP) funds.
- 257<sup>j</sup> Project is to be funded with \$1,516,100 in Federal Highway Administration Highway Safety Improvement Program (HSIP) funds and with \$10,632,400 in Federal Highway Administration National Highway Performance Program (NHPP) funds.
- 265<sup>k</sup> Project is to be funded with \$122,900 in Federal Highway Administration - Highway Safety Improvement Program (HSIP) funds and \$3,143,600 in Federal Highway Administration - National Highway Performance Program (NHPP) funds.
- 358<sup>l</sup> While this project is categorized as transit expansion, it includes both expansion of new transit services and improvement to existing transit services.
- 370<sup>m</sup> Project is to be funded with \$2,735,400 in Federal Highway Administration Surface Transportation Program-Other (STP-O) funds in 2023 and with \$1,788,000 in Federal Highway Administration National Highway Performance Program (NHPP) funds in 2026.

- 372<sup>n</sup> Project is to be funded with \$1,668,200 in Federal Highway Administration Highway Safety Improvement Program (HSIP) funds and with \$6,204,000 in Federal Highway Administration Surface Transportation Program - Other (STP-O) funds.
- 410<sup>o</sup> Project is to be funded with \$94,900 in Federal Highway Administration - Highway Safety Improvement Program (HSIP) funds and \$10,350,800 in FHWA Surface Transportation Program-Other (STP-O) funds.
- 421<sup>p</sup> Project is to be funded with \$1,217,800 in Federal Highway Administration - Highway Safety Improvement Program (HSIP) funds and \$487,400 in Federal Highway Administration - National Highway Performance Program (NHPP) funds.
- 424<sup>q</sup> Project is to be funded with \$382,800 in Federal Highway Administration - Highway Safety Improvement Program (HSIP) funds and \$387,700 in Federal Highway Administration - National Highway Performance Program (NHPP) funds.

**IMPLEMENTATION STATUS OF PROJECTS IN THE  
2021 THROUGH 2024 TRANSPORTATION IMPROVEMENT  
PROGRAM FOR SOUTHEASTERN WISCONSIN**

**APPENDIX B**

Appendix B is the listing of the 615 projects, which were included in the 2021-2024 Transportation Improvement Program (TIP). Of these projects, 223 projects have been completed; 326 projects have been initiated and are intended to continue or be completed within the time period of the 2023-2026 TIP; 22 projects were not initiated during the period of the 2021-2024 TIP, but are either on schedule for implementation or have been delayed and subsequently retained in the 2023-2026 TIP; 34 projects have no work scheduled until beyond the last year of the 2023-2026 TIP; and 10 projects have been dropped from consideration.

Appendix B:

Table B.1: Milwaukee Transportation Management Area—Milwaukee County

Table B.2: Milwaukee Transportation Management Area—Ozaukee County

Table B.3: Milwaukee Transportation Management Area—Washington County

Table B.4: Milwaukee Transportation Management Area—Waukesha County

Table B.5: Kenosha, Racine, and Walworth Transportation Management Area—Kenosha County

Table B.6: Kenosha, Racine, and Walworth Transportation Management Area—Racine County

Table B.7: Kenosha, Racine, and Walworth Transportation Management Area—Walworth County

In each table, projects are listed by county with projects that have been completed listed first; followed by projects from the 2021-2024 TIP that are retained in the 2023-2026 TIP; followed by projects that have no work scheduled until beyond the last year of the TIP; followed by the projects which have been dropped, or are no longer being considered for implementation. Within each category of project implementation, projects are in order by project type category: highway preservation, highway improvement, highway expansion, transit preservation, transit improvement, transit expansion, highway safety, bicycle and pedestrian, off-system highway improvement, and highway related environmental enhancement. An explanation of the abbreviations used in the appendix follows:

## PROJECT STATUS

BEYOND TIP	This category includes projects that have work underway with additional work not scheduled for the project until beyond the last year of the 2023-2026 TIP, and projects that were not initiated as programmed during the 2021-2024 TIP and have been postponed until beyond the last year of the 2023-2026 TIP.
COMPLETED	Project has been completed, or all Federal funds for the project have been obligated during the period of the 2021-2024 TIP and are no longer required to be listed in the TIP.
DEFERRED	Implementation of the project was postponed, or deferred, from the 2021-2024 TIP to the 2023-2026 TIP.
DROPPED	Project not included in the 2021-2024 TIP due to being dropped from consideration, or combined with another project in the 2023-2026 TIP.
ON-SCHEDULE	Work on the project is on-schedule to be initiated during the time period of the 2023-2026 TIP. (For example, PE for a project programmed for year 2023 in the 2021-2024 TIP, is programmed for year 2023 in the 2023-2026 TIP.)
UNDERWAY	Work on the project has been initiated prior to or during the 2021-2024 TIP, and work on the project is intended to continue or be completed within the time period of the 2023-2026 TIP as part of the established sequence of project development.

## PROJECT DESCRIPTION

CTH	County trunk highway
IH	Interstate highway
STH	State trunk highway
M or MI	Miles

"C/" represents "City of"

"V/" represents "Village of"

"T/" represents "Town of"

## **PROJECT TYPE**

HP	Highway Preservation
HI	Highway Improvement
HE	Highway Expansion
TP	Transit Preservation
TI	Transit Improvement
TE	Transit Expansion
BP	Bicycle and Pedestrian
OH	Off Arterial Highway System
HS	Highway Safety
EE	Environmental Enhancement

**Table B.1  
Implementation Status of Projects in the 2021-2024 Transportation Improvement Program  
for the Milwaukee Transportation Management Area—Milwaukee County 2023-2026**

STATUS	NO	PROJECT DESCRIPTION	TYPE	PROJECT SPONSOR
COMPLETED	5	BRIDGE MAINTENANCE AT VARIOUS LOCATIONS IN SE WISCONSIN	HP	STATE OF WISCONSIN
	10	REHABILITATION OF IH 41 BRIDGES FROM MILWAUKEE COUNTY LINE TO STH 100 (B40-800-804, 807, C30) IN MILWAUKEE COUNTY	HP	
	11	DIAMOND GRINDING OF IH 41 FROM GOOD HOPE ROAD TO WAUKESHA COUNTY LINE IN MILWAUKEE COUNTY (1.12 MI)	HP	
	12	REHABILITATION OF THE IH 41/94 BRIDGES OVER OAK CREEK (B40-805, B40-808) AND STH 100 BRIDGE OVER IH 41/94 (B40-809) IN THE CITY OF OAK CREEK	HP	
	16	RESURFACING OF IH 43 FROM MITCHELL INTERCHANGE TO MARQUETTE INTERCHANGE AND THIN POLYMER OVERLAY OR DECK SEAL TO BRIDGES ALONG THE CORRIDOR (3.55 MI) (LIST AVAILABLE UPON REQUEST)	HP	
	21	REHABILITATION OF THE IH 43 BRIDGES AT 124TH ST AND 116TH ST B40-376 & B40-377 IN THE VILLAGE OF HALES CORNERS	HP	
	23	LANDSCAPING ALONG USH 45 FROM MAYFAIR RD TO BURLEIGH ST AND IMPROVEMENTS TO THE RAILROAD TRACKS AT THE UP RAILROAD CROSSING OVER IH 41 IN MILWAUKEE COUNTY	HP	
	24	CONSTRUCTION OF NOISE WALL ALONG IH 94 FROM COLD SPRING RD TO HOWARD AVE IN THE CITY OF MILWAUKEE (0.5 MI)	HP	
	25	RESURFACING OF LAKE PARKWAY (STH 794) FROM E LINCOLN AVE TO S PENNSYLVANIA AVE, NOISE WALL REPAIR TO WALLS 029-032, AND BRIDGE REHABILITATION TO THE IH 794 BRIDGE AT UP RR (B40-609) IN MILWAUKEE COUNTY (3.82 MI)	HP	
	26	REHABILITATION OF THE USH 18 BRIDGE OVER STH 175 AND THE STH 175 BRIDGE OVER STATE ST IN THE CITY OF MILWAUKEE	HP	
	28	DECK OVERLAY OF THE BRIDGES ALONG IH 41 BETWEEN BURLEIGH ST AND GOOD HOPE ROAD (5.03 MI) (B248/9, B354/5, B369, B939/40, B333/4)	HP	
	36	IMPROVEMENTS AT INTERSECTION OF STH 57 (GREEN BAY RD) AND TEUTONIA AVE IN THE VILLAGE OF BROWN DEER	HP	
	39	REHABILITATION OF THE BROWN DEER RD (STH 100) BRIDGES OVER THE MILWAUKEE RIVER IN MILWAUKEE COUNTY (B40-504 & B40-505)	HP	
	41	RESURFACING OF STH 100 (BROWN DEER RD) FROM 91ST ST TO DEERBROOK TRAIL IN MILWAUKEE COUNTY (3.19 MI)	HP	
	45	RESURFACING OF STH 145 FROM GOOD HOPE RD TO N 68TH ST AND BRIDGE PAINTING OF THE STH 145 AND GRANDTOSA BRIDGES (B40-280/281) IN THE CITY OF MILWAUKEE (4.1 MI)	HP	
	46	RESURFACING OF THE SHOULDER OF STH 145 FROM GOOD HOPE RD TO W COUNTY LINE RD IN THE CITY OF MILWAUKEE (0.73 MI)	HP	
	47	BRIDGE REHABILITATION OF THE GRANTOSA DR BRIDGE (B40-280 & B40-281) AND THE FLAGG AVE BRIDGE (B278/9) OVER STH 145 IN THE CITY OF MILWAUKEE	HP	
	48	BRIDGE DECK REPLACEMENT OF FOND DU LAC AVE (STH 145) AT 107TH ST IN THE CITY OF MILWAUKEE ( B-40-252)	HP	
	50	THIN POLYMER OVERLAY TO THE BRIDGES ON STH 175 AT LITTLE MENOMONEE RIVER, CTH S, & 91ST ST (B40-271/2,274/5,276/7), ON STH 175 AT CTH E (B40-328), & ON STH 181 AT CTH E (B40-766), & CULVERT REPAIRS (C40-005/6/8/9)	HP	
	52	RESURFACING OF CAPITOL DR FROM 124TH ST TO STH 100 & BRIDGE DECK OVERLAY OF CAPITOL DR BRIDGE OVER THE MENOMONEE RIVER (B335) & MENOMONEE RIVER PKWY (B336), & RETAINING WALL REHABILITATION IN THE CITY OF WAUWATOSA	HP

Federal regulations require a conformity determination of the regional transportation plan and improvement program for Southeastern Wisconsin with respect to the applicable State of Wisconsin air maintenance plans or interim emissions analyses. The conformity determination for the regional transportation plan and improvement program requires a finding that travel and emission forecasts for the years 2022, 2025, 2030, 2035, 2040, and 2050 under the regional transportation plan and improvement program for the three-county fine particulate (PM<sub>2.5</sub>) maintenance area, the six-county 1997 ozone NAAQS maintenance area, and the Wisconsin portion of the Chicago-Naperville, IL-IN-WI 2008 and 2015 ozone nonattainment areas do not exceed the applicable emission budgets in the State maintenance plans or applicable interim emission/tests when emission budgets are not applicable. Map C.1 shows the nonattainment and maintenance areas within southeastern Wisconsin.

The 2023-2026 transportation improvement program (TIP) is fully consistent with the year 2050 fiscally constrained transportation system<sup>7</sup> (FCTS). The TIP includes projects which should be initiated to implement the year 2050 FCTS, and no project programmed in the TIP is not included in the year 2050 FCTS. The TIP is an update and extension of the 2021-2024 transportation improvement program as amended to date. On December 6, 2022, U.S. Department of Transportation Federal Highway and Transit Administrations determined that the year 2050 regional transportation plan and 2023-2026 transportation improvement program are in conformity with the 2006 24-hour fine particulate standard and the existing State of Wisconsin Air Quality Redesignation and Maintenance Plan for the year 2006 24-hour fine particulate standard, the 2008 eight-hour ozone standard and the State of Wisconsin Maintenance Plan for the 2008 eight-hour ozone standard, and the 2015 eight-hour ozone standard and the budget tests described in 40 CFR 93.109 and 40 CFR 93.118 as required by the Federal Clean Air Act Amendments of 1990. The basis for the determination is fully documented in SEWRPC Memorandum Report No. 267 entitled: *Assessment of Conformity of the Year 2050 Fiscally Constrained Transportation System and Transportation Improvement Program*.

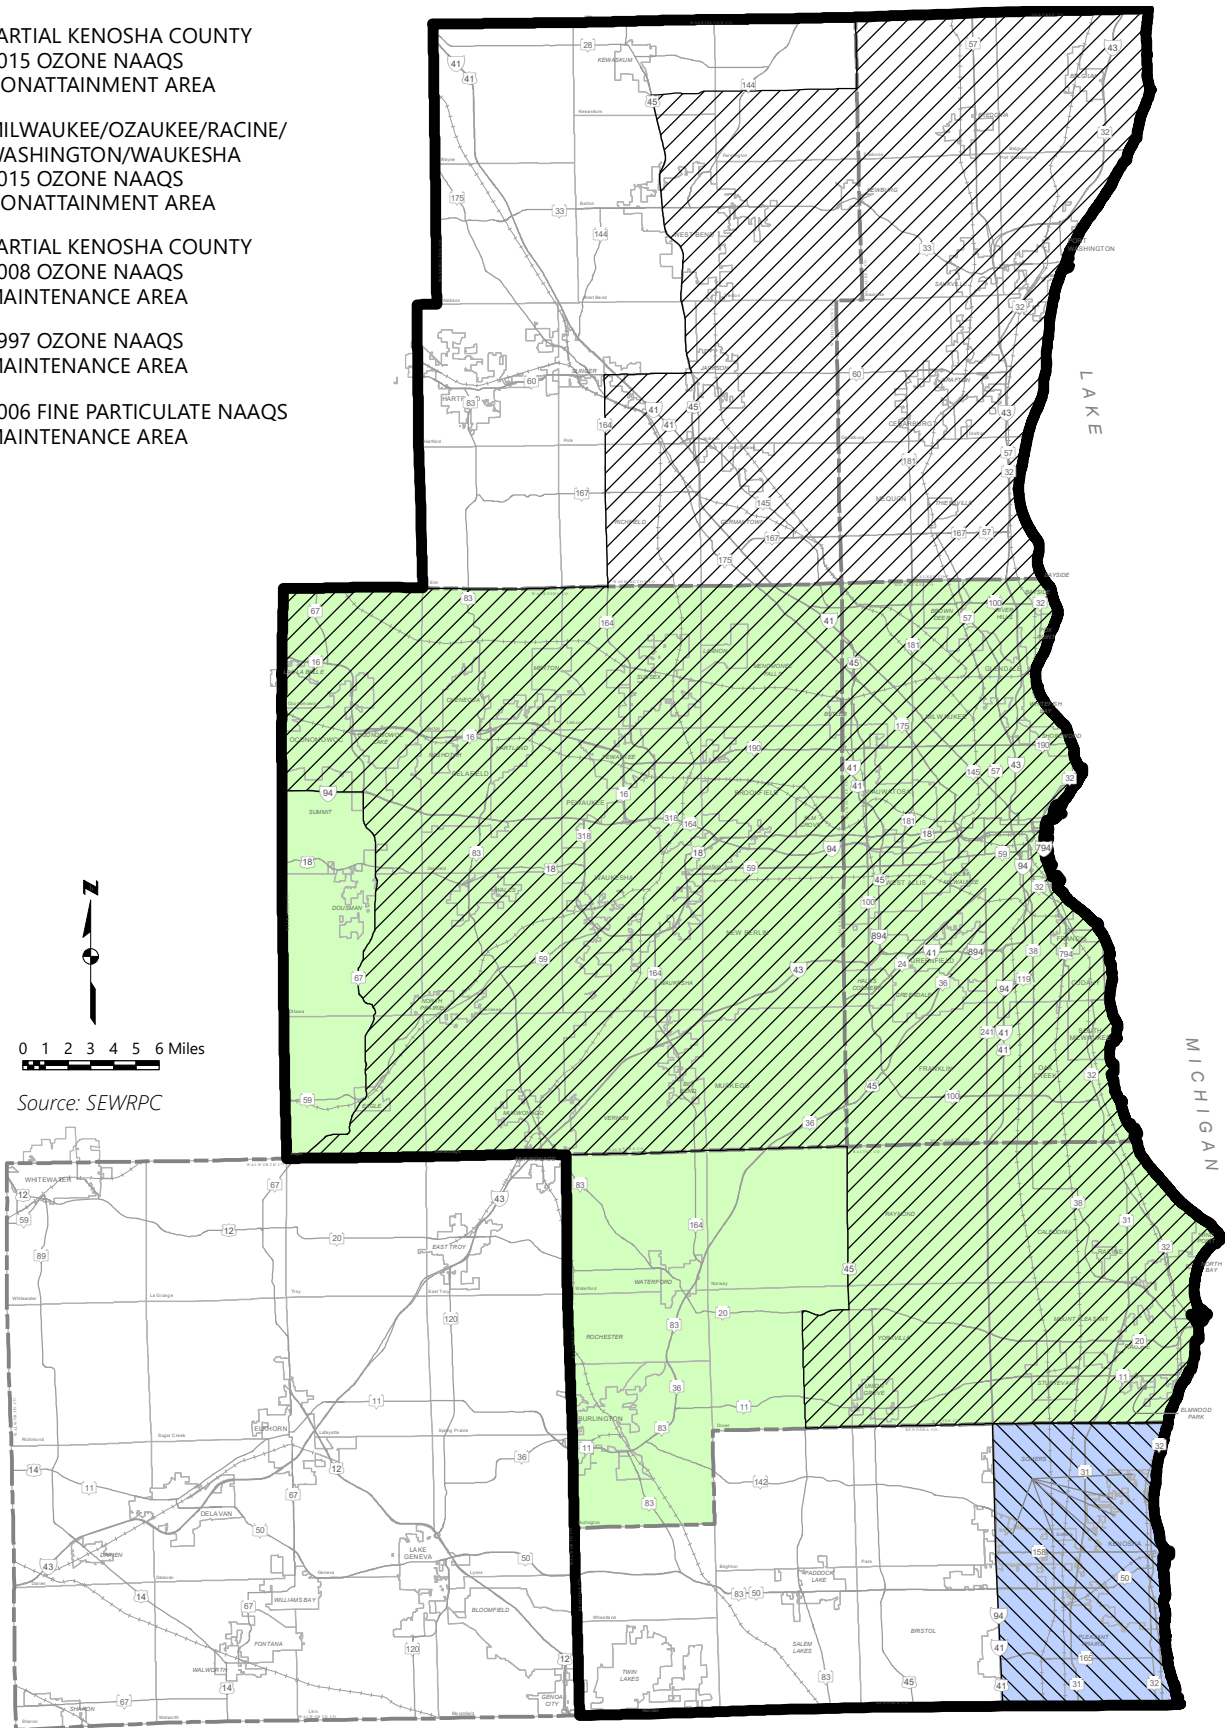

---

<sup>7</sup>An important aspect related to implementing the year 2050 regional transportation plan (VISION 2050) relates to funding. The amount of public funding needed to construct, operate, and maintain the transportation component of VISION 2050 has been compared to the amount of funding expected to be available. Federal metropolitan planning regulations (23 CFR Part 450) and conformity regulations (40 CFR Part 93.108) require that the Region's transportation plan be "fiscally constrained"—only including projects that can be funded with expected funds, taking into account the limitations placed on these funding sources by Federal and State law. Therefore, only the portion of VISION 2050 that can be funded with these revenues is considered the "fiscally constrained" regional plan by the Federal Government and is titled the Fiscally Constrained Transportation System (FCTS). The FCTS is used in the determination of conformity and in the development of the transportation improvement program.

The 2023 through 2026 Transportation Improvement Program (TIP) project costs are compared in Table D.1 to estimates of available Federal and State funding. The estimates of available funding are based upon appropriated Federal funding levels and historical State and local funding levels. It was assumed the Federal, State, and local funding levels estimated for the year 2023 would be increased for the years 2024 through 2026 at an inflation rate of 2.0 percent.<sup>8</sup> The estimate of costs shown in Table D.1 utilized the estimated costs provided by project sponsors. For the years 2024 through 2026, the provided estimated costs were adjusted by an annual inflation rate of 1.89 percent<sup>1</sup> to provide an estimate of year of expenditure dollars in those years. The estimated highway system costs included in the TIP shown on Table D.1 are for capital projects, and do not include arterial system annual operating and maintenance costs. Such costs would represent annually an additional \$79 million in 2023 constant dollars—\$47 million for State maintained facilities and \$32 million for local and county facilities—based on historical local, county, and State funding levels. The results of the comparison of 2023-2026 TIP project costs to estimated available Federal and State funding generally indicate that adequate funding is available to implement the TIP.

With respect to Federal highway funding levels shown in Table D.1, the estimates of available funding are based on the funding levels appropriated to the State for each Federal funding program. The Federal highway funding levels shown for the Federal Highway Administration (FHWA) Surface Transportation Program-Milwaukee Urbanized Area (STP-M) funds and FHWA Transportation Alternatives Program-Milwaukee Urbanized Area funds are based on the Federal funding that is specifically allocated to the Milwaukee urbanized area. The Federal funding level estimated for the FHWA Congestion Mitigation and Air Quality Improvement Program (CMAQ) funds is based on the amount of such funding that is made available in the State budget. The available funding for the remaining FHWA funding programs are generally based on the amount of Federal funding that is appropriated to the State and available statewide. Historically, the Southeastern Wisconsin Region has generally received 25 to 40 percent of that funding.

With respect to Federal transit funds, the available funding estimates are based on recent levels of funding that have been appropriated to the State. The available funding shown for Federal Transit Administration (FTA) Section 5307 Urbanized Area Formula Grant funding, FTA Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities – Milwaukee Urbanized Area funding, FTA Section 5337 State of Good

<sup>8</sup> *The inflation used to adjust the estimated costs for the projects and available funding levels in the TIP from constant dollars to year of expenditures for the years 2024 through 2026 is provided by WisDOT staff for the preparation of TIPs and regional transportation plans statewide, and is periodically reviewed and updated.*

**Table D.1  
Assessment of Available Funding for the 2023 Through 2026 Transportation Improvement Program**

<sup>a</sup> Inflation was applied to years 2024 through 2026 estimates of programmed expenditures at a rate of 1.89 percent. The cost estimates shown in Appendix H, as provided by project sponsors, were treated as constant dollars for purposes of this assessment.

<sup>b</sup> It was assumed that Federal, State, and local funding levels would be maintained at an inflation rate of 2.0 percent, which was applied to the years 2024 through 2026. For Federal highway funds, the estimates of available funding is based on funding levels appropriated to the State. The Federal highway funding levels, with the exception of Surface Transportation Program-Milwaukee Urbanized Area funds, Congestion Mitigation and Air Quality Improvement Program, Transportation Alternatives Program-Milwaukee Urbanized Area funds, and Metropolitan Planning Funds, are statewide funding levels and Southeastern Wisconsin has generally received 25 to 40 percent of that funding. For Federal transit funds, the available funding estimates are based on recent levels of funding that have been appropriated to the State. The available funding shown for urbanized area Section 5307, Section 5310, Section 5337, and Section 5339 funding programs are the urbanized area funding levels, and for the remaining funding programs are statewide funding levels. It may generally be expected that Southeastern Wisconsin transit systems would receive about 10 to 15 percent of FTA Section 5310 and 3 to 4 percent of FTA Section 5311 funding. For State funds, the estimate of available funding is based on historical funding levels that are generally received by the Region. Local funds are based on historical funding levels within each county in Southeastern Wisconsin.

Source: SEWRPC

Repair funding, and FTA Section 5339 Bus and Bus Facilities – Milwaukee Urbanized Area funding is the amount of Federal transit funding that is allocated to the specific urbanized area identified. The amount of FTA 5339 funds shown available to the Milwaukee urbanized area includes the portion of FTA 5339 funds available statewide that the State has historically suballocated to the urbanized area. The amount of available Federal transit funding shown for the remaining FTA funding programs is based on the amount of Federal transit funding appropriated to the State and is available statewide. It may generally be expected that eligible Southeastern Wisconsin transit systems would receive about 10 to 15 percent of FTA Section 5310 and 3 to 4 percent of FTA Section 5311 funding levels.

With respect to State funds, the estimate of available funding is based on historical funding levels that are generally received by the Region for highway capital and transit operating projects. The amounts of available local funds shown are based on historical local funding levels for transit capital and operating projects and highway capital projects on the arterial street and highway system within each county in Southeastern Wisconsin.

There are a few instances where programmed funding appears to exceed estimated available funding. With respect to Surface Transportation Program – Milwaukee Urbanized Area (STP-M) funds, Mitigation/Air Quality (CMAQ) funds, and Federal Transit Administration Section 5339 funds, programmed funding appears to exceed available funding, but this is generally because projects selected and programmed in a previous TIP have not yet been completed and remain programmed in this TIP, but do not require additional funding. For example, the amount of CMAQ funding that would be obligated for transit capital and operating projects in a particular calendar year could have been transferred from FHWA to FTA in a previous year. In addition, Federal transit funding that is not obligated in a previous year can be carried over and utilized for transit projects in a later year. With respect to STP-M and CMAQ projects, well-established procedures exist to select and program STP-M and CMAQ projects consistent with estimated available funding. Following the selection of these projects for funding, WisDOT works with the project sponsors to schedule implementation of the projects based on the amount of available funding each year. As well, the years shown in the TIP represent calendar years, but the State fiscal year begins on the first day of July of a year and ends on the last day of June of the following year. Thus, depending on what proportion of available Federal funding is scheduled in the two halves of the State fiscal year, it could appear that more funding is being scheduled for obligation than what is estimated for a particular calendar year.

With respect to Federal Highway Administration National Highway Performance Program funding, programmed funding slightly exceeds the historic Region share (or about 25 to 40 percent) of Statewide funding levels, but this may be expected as larger projects are implemented in a particular year. This is particularly the case as WisDOT reconstructs the Southeastern Wisconsin freeway system, which began with the completed Marquette Interchange project, IH 94 North-South project between Milwaukee and the State line, and Zoo Interchange project, and is continuing with the reconstruction of IH 43 between Silver Spring Drive and STH 60 and IH 94 between S. 70th Street and S. 16th Street programmed in this TIP.

This appendix documents the expected contribution of projects programmed in the 2023-2026 transportation improvement program for Southeastern Wisconsin (TIP) towards achieving the performance goals of VISION 2050—the year 2050 regional land use and transportation plan—and the targets for the National performance measures (NPM). Per Federal requirements, targets have been established by the Commission for the transit state-of-good-repair and highway safety, pavement/bridge condition, system and freight reliability, and congestion mitigation and air-quality (CMAQ) performance measures; and targets have been established by area transit operators and the Commission for the transit safety performance measures.

### **CONTRIBUTION OF PROJECTS IN THE 2023-2026 TIP TOWARDS ACHIEVEMENT OF VISION 2050 PERFORMANCE GOALS**

Performance measures have long been utilized by the Commission in the development of, and in the monitoring the implementation of, its regional transportation plans, including VISION 2050. Specifically, regional performance measures based on plan goals and objectives were established and used during the development of VISION 2050 to evaluate the effectiveness of alternative regional land use and transportation plans and the preliminary and final recommended plans. Thus, implementation of the various transportation elements of VISION 2050—transit, bicycle/pedestrian, transportation systems management, travel demand management, arterial roadways, and freight facilities—would contribute to the achievement of the overall plan goals. VISION 2050 also identified a number of measures for the monitoring of the performance of the transportation system as transportation projects are implemented.<sup>9</sup> Examples of transportation performance measures that are monitored include pavement/bridge condition, level of traffic congestion and delay, vehicle and pedestrian/bicycle crashes, air-quality emissions, and transit quality.

The 2023-2026 TIP includes about \$3.2 billion in expenditures for transit, arterial roadway, bicycle/pedestrian, and other transportation-related projects in Southeastern Wisconsin. Figure E.1 shows the expenditures programmed in the 2023-2026 TIP for each of the TIP categories. These TIP projects are consistent with, and serve to implement, the transportation-related goals and recommendations of VISION 2050, including recommendations related to transit, bicycle/pedestrian facilities, transportation system management, travel demand management, arterial streets and highways, and freight facilities.

<sup>9</sup> Table 3.11 of Chapter 3 of Volume III (2nd Edition) of the VISION 2050 report identifies the performance measures that are monitored and the frequency of their monitoring—annually as part of the Commission’s annual report, every four years as part of an interim plan update, or every 10 years as part of a major plan update.

**THE 2023-2026 TRANSPORTATION IMPROVEMENT PROGRAM CONTRIBUTION TOWARDS ACHIEVING THE PERFORMANCE GOALS OF VISION 2050 AND THE ESTABLISHED TARGETS FOR THE NATIONAL PERFORMANCE MEASURES**

# **APPENDIX E**

**Figure E.1**  
**Total Funding in the 2023-2026 TIP**

Note: For 2023 through 2026, no expenditures are expected to be incurred for transit improvement or highway expansion. However, one of the transit expansion projects also includes transit improvement activities.

Highway Preservation projects result in little or no increase in the traffic-carrying capacity of the existing arterial street system, but are necessary to maintain existing capacity and structural adequacy of the arterial facility for which the project is proposed. These projects, which are described as resurfacing or reconstruction, may also incorporate modernization of the existing arterial facility to address safety and other concerns by including intersection improvements, shoulder widening, and vertical and horizontal alignment improvements.

Highway Improvement projects involve roadway reconstruction and include in the reconstruction an increase in the traffic carrying capacity of the existing arterial highway system, typically through the addition of traffic lanes.

Highway Expansion projects involve increasing the traffic carrying capacity of the arterial highway system through development of new arterial streets or highways.

Transit Preservation projects involve the necessary maintenance of the current quality and level of service on the existing transit system.

Transit Improvement projects involve improving the quality and level of service on the existing transit system.

Transit Expansion projects involve either expanding the existing transit system or creating new transit systems or subsystems.

Bike and Pedestrian projects involve preserving, improving, or expanding off-street facilities or enhanced bicycle facilities, the implementation of bike sharing systems, and coordination of safe routes to school programs.

Highway Safety projects involve improving or eliminating existing unsafe conditions on the Federal aid highway system as it currently exists, and they are candidates for special Federal safety program funding.

Environmental Enhancement projects involve materially reducing air, noise, or visual pollution, but do not significantly affect highway system operation or capacity (including traffic flow and alternative fuel projects).

Highway Off-System projects involve projects on streets or highways which are not on the arterial street and highway system and are candidates for special Federal funding, such as funds for bridges.

Source: SEWRPC

Table E.1 shows the potential contribution of the projects programmed to be implemented (constructed or operating) within the period of the 2023-2026 TIP towards achieving select transportation goals and performance measures identified in VISION 2050. Some projects programmed to be implemented in the 2023-2026 TIP are more focused in their impact toward achievement of VISION 2050 goals, such as safety projects, congestion mitigation and air quality (CMAQ) projects, and bicycle/pedestrian projects. However, other programmed projects have much broader contributions toward the achievement of the VISION 2050 goals. For example, projects involving arterial resurfacing, reconditioning, and reconstruction, while primarily addressing the condition of pavement, could also address safety, provide bicycle/pedestrian accommodations, and address congestion and air quality by improving traffic flow (such as providing signal coordination).

## **CONTRIBUTION OF PROJECTS IN THE 2023-2026 TIP TOWARDS ACHIEVMENT OF NATIONAL PERFORMANCE MEASURE TARGETS**

To establish a consistent nationwide process for monitoring the effectiveness of Federal transportation investments, MAP-21, enacted in 2012, created a framework for a national performance management approach to transportation decision-making on investments with Federal highway and transit funding. In implementing the performance management approach, the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) have developed specific highway and transit performance measures, and requirements for States, transit operators, and Metropolitan Planning Organizations (MPOs) to establish and report targets, along with the monitoring of achievement of the targets, for each performance measure. Table E.2 shows the performance measures established by FHWA and FTA. The Commission is responsible for establishing performance targets for all of the performance measures for Southeastern Wisconsin and is required to report in VISION 2050 the established performance targets. In addition, the Commission is required to include in the TIP a description of how the projects programmed in the TIP promote the achievement of the performance targets. Depending on the performance measure, targets are established for the Southeastern Wisconsin metropolitan planning area or for a specific urbanized area—such as the Milwaukee urbanized area. Map E.1 shows the metropolitan planning area and the urbanized areas in Southeastern Wisconsin.

The Commission has established regionwide targets per Federal regulations for the performance measures relating to transit safety, transit asset management, highway safety, pavement and bridge condition, system reliability along the NHS, freight reliability along the Interstate, and CMAQ. The congestion-related CMAQ performance targets were established jointly with WisDOT staff, which were updated in 2022. The current emission-related CMAQ performance targets were established by WisDOT in 2022. The performance targets for the FHWA safety, NHS condition and reliability, and freight reliability measures were initially established based on the methodology developed for VISION 2050. Subsequent to completion of the 2023-2026 TIP, the Commission staff will review the performance targets that the Commission is solely responsible for and potentially develop updated performance targets for inclusion in VISION 2050 at its next update in 2024 and in the TIP by amendment.

The projects listed in the 2023-2026 TIP include a number of projects programmed to be implemented (constructed or operating) within the period of the TIP that would be expected to contribute to the achievement of these targets. The remainder of this section summarizes the targets established for each of the performance measures, and how the 2023-2026 TIP contributes to the targets established for the national performance measures.

### **Transit Asset Management Targets**

Table E.3 shows the short-term targets for the transit asset management performance measures that were established by the Commission. The \$174 million of funds programmed for implementing capital-related transit preservation projects<sup>10</sup> (such as vehicle capitalized maintenance and replacement projects and facility repair and upgrade projects) within the period of the 2023-2026 TIP are expected to contribute to the achievement of these targets. The capital-related transit preservation projects programmed in the TIP were provided by transit operators based on their processes for monitoring the condition of their vehicles and facilities and prioritizing their maintenance and replacement (given the level of available

---

<sup>10</sup> Of the \$712 million programmed for transit preservation in the 2023-2026 TIP, \$538 million, or 76 percent, is for operating-related projects and \$174 million, or 24 percent, is for capital-related projects.

**Table E.1**  
**Potential Contribution of Projects Towards Achieving VISION 2050 Goals**

Select VISION 2050 Goal	Associated Performance Measures	Projects Programmed in 2023-2026 TIP <sup>a</sup>		
		Project Types	Quantity	Amount of Total Funds Programmed (\$)
Maintain State of Good Repair of Transit System	--	Capital Transit Preservation Projects <sup>b</sup>	76 Projects	174,217,100
Expand and Improve Transit Service	Transit Service Area and Quality	Transit Improvement and Expansion Projects	231,000 People Served with Improved Transit	31,578,700
Expand Bicycle/Pedestrian Facilities	Miles of Bicycle and Pedestrian Facilities	Expansion of Pedestrian/Bicycle Facilities <sup>c</sup>	21 Miles	17,146,100
Maintain State of Good Repair of Arterial Roadways	Pavement Condition	Resurfacing, Reconditioning, and Reconstruction <sup>d</sup> of Arterial Roadways	495 Miles	2,050,905,200
Maintain Bridge Condition	Bridge Condition	Rehabilitation and Replacement of Bridges	282 Bridges	206,994,400
Reduce Vehicular Congestion	Miles of Arterials Experiencing Congestion and Excessive Delay	Reconstruction of Arterials with Additional Lanes and New Arterials	19 Miles	984,691,500
Reduce Vehicular Crashes	Number and Rate of Crashes	Highway Safety Projects <sup>e</sup>	51 Projects	74,703,100
Reduce Air-Quality Emissions	Transportation Emission Levels	Congestion Mitigation and Air-Quality Projects	27.5 Kilograms (kg) Per Day Emission Reduction <sup>f</sup>	58,206,900

<sup>a</sup> Includes only projects that have construction programmed within the 2023-2026 TIP.

<sup>b</sup> Does not include the \$538 million in operating funds programmed in the 2023-2026 TIP to maintain the existing transit service.

<sup>c</sup> Does not include the bicycle lanes, paved shoulders, and other bicycle accommodations that could be provided as part of the 383 miles of programmed resurfacing, reconditioning, and reconstruction projects.

<sup>d</sup> Includes both reconstruction to same capacity and reconstruction with additional traffic lanes.

<sup>e</sup> Represents stand-alone safety projects and does not include the safety improvements associated with other projects, such as those potentially included in reconstruction, resurfacing and reconditioning projects.

<sup>f</sup> Includes estimated reductions for the ozone precursors nitrogen oxides (NO<sub>x</sub>) and volatile organic compounds (VOCs) and for fine inhalable particles (PM<sub>2.5</sub>)

Source: SEWRPC

funding). Per Federal requirements, since 2018 all of the transit operators in Southeastern Wisconsin have developed, and updated quadrennially, transit asset management plans to assist in maintaining a state-of-good repair for their vehicles and facilities.<sup>11</sup> These plans were updated by the transit operators in 2022.

### Transit Safety Targets

Table E.4 shows the regional transit safety targets by mode of transit service established by the area transit operators and the Commission. Similar to the transit asset management targets, it is expected that many of the transit preservation-related projects programmed in the TIP would contribute towards maintaining or improving the safe operation and use of transit vehicles and facilities by minimizing exposure and risk of the public and transit operator personnel to potentially unsafe vehicles, equipment, and facilities. Per Federal requirements, all of the appropriate transit operators in the Region developed transit safety plans to assist the operators in the safe operation of their systems.

<sup>11</sup> The Commission staff assisted a number of transit operators in Southeastern Wisconsin in achieving the transit asset management plan requirements. Principally, the Commission is working with the smaller transit operators (those having less than 100 vehicles) in the Region to prepare group transit asset management plans.

**Table E.2**  
**National Performance Measures**

<b>Performance Measure Areas</b>	<b>Performance Measures</b>
FHWA Highway Safety Improvement Program (HSIP)	
Rate of Fatalities and Serious Injuries	Rate of Fatalities per 100 Million Vehicle Miles Travelled (MVMT) Rate of Serious Injuries per 100 MVMT
Number of Fatalities and Serious Injuries	Number of Fatalities Number of Serious Injuries Number of Non-Motorized Fatalities and Non-Motorized Serious Injuries
FHWA National Highway Performance Program (NHPP)	
Condition of Pavements on the Interstate System	Percentage of Pavement of the Interstate System in Good Condition Percentage of Pavement of the Interstate System in Poor Condition

Transit Asset Management	Percentage of Revenue Vehicles Exceeding the Useful Life Benchmark (ULB) Percentage of Non-Revenue Service Vehicles Exceeding the ULB Percentage of Facilities Exceeding the Transit Economic Requirements Model (TERM) Scale Percentage of Track Segments Having Performance Restrictions
Public Transportation Safety Program	Number of Reportable Fatalities Rate of Reportable Fatalities Per Vehicle Revenue Miles Rate of Reportable Fatalities Per Vehicle Revenue Miles Number of Reportable Injuries Rate of Reportable Injuries Per Vehicle Revenue Miles Number of Reportable Events Rate of Reportable Safety Events Per Vehicle Revenue Miles Mean Distance Between Major Mechanical Failures

Source: Federal Highway Administration and Federal Transit Administration

### Highway Safety Targets

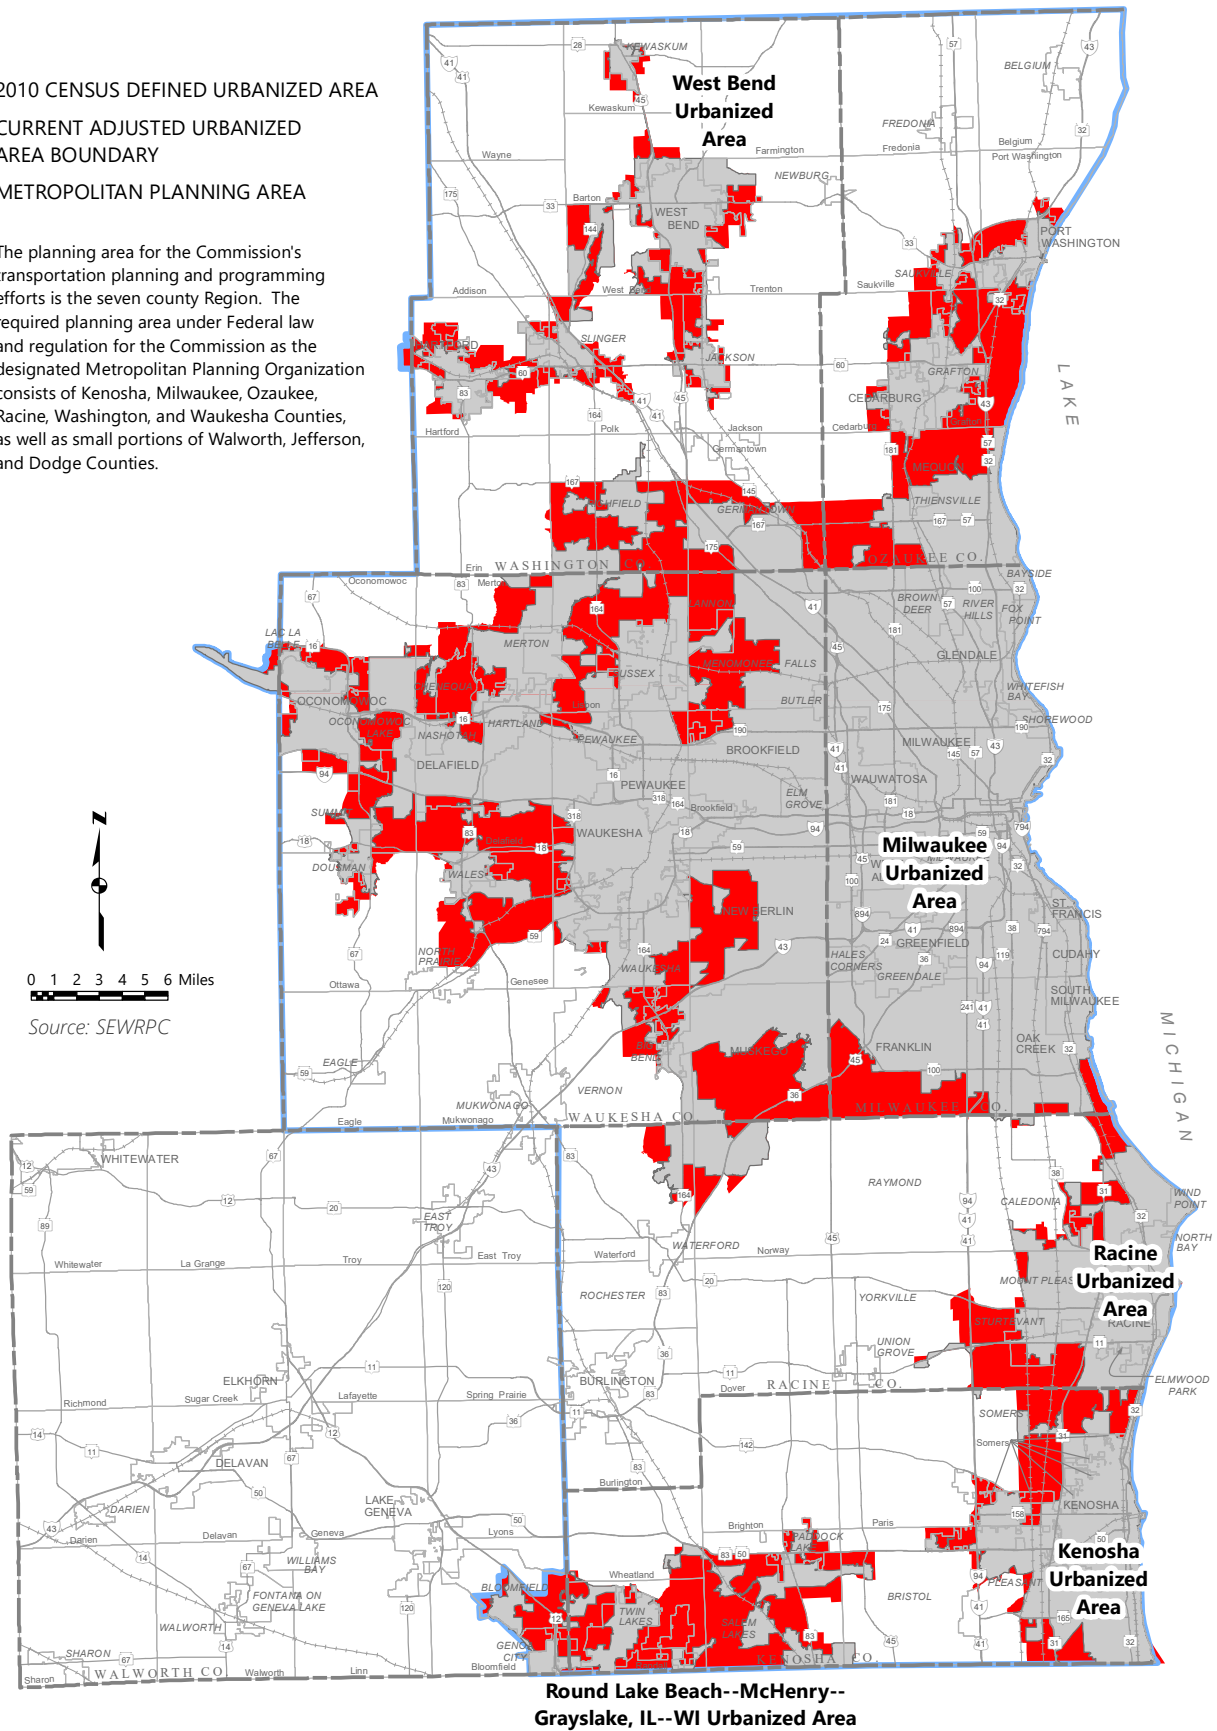

Table E.5 shows the short-term targets for each of the four years of the TIP that have been established by the Commission for the five national highway safety performance measures. In particular, the \$75 million of highway safety projects programmed for implementation would particularly serve to assist in the achievement of these targets. This includes about \$62 million of FHWA Highway Safety Improvement Program (HSIP) funds. The projects approved for HSIP funds are reviewed and prioritized based on their ability to reduce crashes and their achievement of the goals of the State’s Strategic Highway Safety Plan. Other projects listed in the TIP—such as transit improvement and expansion, bicycle/pedestrian projects, and highway projects—can also contribute to the achievement of the safety targets. For example, the programmed arterial resurfacing, reconditioning, and reconstruction projects can include elements that reduce the number of crashes, such as improving the roadway cross-section and the horizontal/vertical alignments, adding/modifying signage and pavement markings, and controlling access. In addition, the TIP projects related to the improvement and expansion of transit services and bicycle/pedestrian facilities are expected to reduce the growth in vehicle travel, conflicts, and crashes, as they encourage increased travel on safer facilities and safer services while reducing travel by automobile and demand on the Region’s roadways.

# Map E.1

## The Southeastern Wisconsin Region and Census Defined and Adjusted Urbanized Area Boundaries: 2010

-  2010 CENSUS DEFINED URBANIZED AREA
-  CURRENT ADJUSTED URBANIZED AREA BOUNDARY
-  METROPOLITAN PLANNING AREA

Note: The planning area for the Commission's transportation planning and programming efforts is the seven county Region. The required planning area under Federal law and regulation for the Commission as the designated Metropolitan Planning Organization consists of Kenosha, Milwaukee, Ozaukee, Racine, Washington, and Waukesha Counties, as well as small portions of Walworth, Jefferson, and Dodge Counties.

**Table E.3**  
**Transit Asset Management Baseline and Targets**

Asset Class	Asset Examples	Performance Measure	2019 Baseline Data	Target
Rolling Stock				
Buses, Other Passenger Vehicles, and Railcars	Bus, Cutaway, Van, Minivan, and Streetcars	Percent of revenue vehicles that have either met or exceeded their useful life benchmark	9%	<30%
Equipment				
Non-revenue service vehicles and equipment over \$50,000	Route Supervisor Vehicles, Maintenance Trucks, Pool Vehicles, DPF Cleaning System, Bus Wash Systems, Fare Collection systems, Vehicle Lifts	Percent of vehicles and equipment that have either met or exceeded their useful life benchmark	51%	<30%
Facilities				
Support	Maintenance and Administrative Facilities	Percent of facilities within an asset class, rated below 3 on condition reporting system	50%	<15%
Passenger	Rail Terminals, Bus Transfer Stations	Percent of facilities within an asset class, rated below 3 on condition reporting system	0%	0%
Parking	Park-and-Ride Lots with Direct Capital Responsibility	Percent of facilities within an asset class, rated below 3 on condition reporting system	0%	0%
Infrastructure				
Fixed Guideway	Track Segments, Exclusive Bus Rights-of-Way, Catenary Segments, and Bridges	Percent of segments that have performance restrictions	0%	0%

Source: SEWRPC

### Pavement and Bridge Condition Targets

Table E.6 shows the short-term targets that have been established by the Commission for the performance measures related to pavement and bridge conditions on the NHS within the Region’s metropolitan planning area. Of the \$1.73 billion of programmed resurfacing, reconditioning, and reconstruction<sup>12</sup> projects that would potentially contribute to improving pavement condition of NHS roadways, about \$1.20 billion is programmed for about 81 miles, or about 38 percent, of the Interstate portion of the NHS in Southeastern Wisconsin (as shown in Table E.7). This includes the IH 43 north-south and the IH 94 east-west freeway reconstruction projects. Another \$411 million is programmed for about 161 miles, or about 15 percent, of the non-Interstate portion of the NHS in Southeastern Wisconsin. In total, about 242 miles, or about 19 percent, of the NHS in Southeastern Wisconsin will be resurfaced, reconditioned, or reconstructed within the next four years, improving the pavement conditions along the NHS.

With respect to the bridge condition performance measures, of the \$152 million of programmed bridge rehabilitation and bridge replacement projects that would potentially contribute to improving the condition of NHS bridges. This includes about \$124 million<sup>13</sup> programmed for the rehabilitation of 240 NHS bridges and about \$27 million programmed for the replacement of 4 bridges, as shown on Table E.8.

### System Reliability and Freight Reliability Targets

Table E.9 shows the short-term targets that have been established by the Commission for the performance measures related to system reliability on the statewide NHS and the interstate freight reliability within the Region’s metropolitan planning area. The \$985 million associated with reconstruction of arterials with

<sup>12</sup> Includes both reconstruction to same capacity and reconstruction with additional traffic lanes.

<sup>13</sup> Some projects programmed in the TIP include multiple bridges, with some of those bridges being along the NHS and some of those bridges not along the NHS. As the total funds programmed is listed by each project and not each bridge, the total funds programmed may include funding for those bridges that are not on the NHS.

**Table E.4  
Regional Transit Safety Five-Year Average Performance and Targets**

Mode of Transit Service	Number of Fatalities	Number of Fatalities per 1 Million VRM	Number of Injuries	Number of Injuries per 1 Million VRM	Number of Safety Events	Number of Safety Events per 1 Million VRM	Mean Distance Between Major Mechanical Failure (Miles) <sup>b</sup>
Five-Year Average Annual Regional Transit Safety Performance: 2015-2019							
Fixed Route	0.6	0.0	119.6	5.9	102.8	5.1	10,235
Fixed Route Rail <sup>a</sup>	0.0	0.0	2.0	17.8	3.2	28.5	4,751
Non-Fixed Route Rail	0.0	0.0	44.6	7.6	45.6	7.8	100,030
Regional Transit Safety Targets: Years 2021 and 2025							
Fixed Route	0.5	0.0	107.6	5.3	92.5	4.6	11,258
Fixed Route Rail <sup>a</sup>	0.0	0.0	1.8	16.1	2.9	25.7	5,226
Non-Fixed Route Rail	0.0	0.0	40.1	6.9	41.0	7.0	110,033

Note: Transit safety targets represent a 10 percent improvement from the previous regional five-year safety performance averages.

<sup>a</sup> The data and targets for fixed-route rail are based on the five-year average annual data for the City of Kenosha's streetcar plus one year of data for the City of Milwaukee's streetcar from 2019, the system's first full year of revenue service. The targets do not pertain to Metra commuter rail service because Metra is regulated by the Federal Railroad Administration (FRA).

<sup>b</sup> Rural or reduced reporters, including Western Kenosha County Transit, Walworth County, and the Cities of Hartford, West Bend, and Whitewater, are not required by the Federal Transit Administration to report data on major mechanical failures, and are therefore not included in the five-year annual average.

<sup>c</sup> The targets for system reliability represent a 10 percent increase in the mean distance between major mechanical failures, to reflect anticipated maintenance improvements.

**Table E.6**  
**NHS Pavement and Bridge Condition**

Performance Measure	Baseline Data (2017)	Four-Year Target (2025)
Interstate NHS Pavement Condition		
Percentage of Pavement in Good Condition	61.1	≥62.6%
Percentage of Pavement in Poor Condition	4.4	≤4.3%
Non-Interstate NHS Pavement Condition		
Percentage of Pavement in Good Condition	17.6	≥18.0%
Percentage of Pavement in Poor Condition	6.8	≤6.6%
NHS Bridge Condition		
Percentage of NHS Bridges by Deck Area in Good Condition	58.3	≥59.7%
Percentage of NHS Bridges by Deck Area in Poor Condition	1.3	≤1.3%

Source: WisDOT and SEWRPC

additional lanes and for new arterials being implemented within the period of the 2023-2026 TIP would potentially contribute to the achievement of these targets. Specifically, as shown in Table E.10, about \$977 million is programmed for about 17 miles, or about 8 percent, of the Interstate portion of the NHS and about \$7 million is programmed for about 1.1 miles, or 0.1 percent, of the non-Interstate portion of the NHS. The highway improvement projects (involving the providing of additional travel lanes) programmed for NHPP funds being implemented within the period of the TIP would be expected to maintain or improve NHS reliability. Similarly, the IH 43 and IH 94 freeway reconstruction projects would be expected to maintain or improve the reliability for freight travel on the interstate system. In addition, the traffic flow-type environmental enhancement projects programmed in the TIP, such as the optimization of traffic signal timing along corridors, would likely also contribute to system reliability along the non-Interstate portion of the NHS by reducing delay at intersections along higher volume corridors.

Other projects programmed for implementation within the period of the TIP, such as transit improvement, transit expansion, and bike and pedestrian projects, have secondary effects on system reliability and freight reliability. Such projects promote alternatives to driving for residents, thereby reducing the number of vehicles on a roadway. Highway safety projects can also contribute to system reliability and freight reliability by reducing non-recurring congestion resulting from vehicle crashes. Other spot safety improvements, such as additional turn lanes or access management, can improve traffic flow as well.

**Table E.7**  
**Potential Contribution of Highway Preservation, Improvement, and Expansion Projects Towards Pavement Condition Performance Measures**

Facility and Project Type	Number of Projects <sup>a</sup>	Number of Miles	Percent of Facility/NHS <sup>b</sup>	Total Funds Programmed (\$) <sup>d</sup>
Interstate				
Reconstruction <sup>c</sup>	2	17.5	8.2	977,355,500
Resurfacing/Reconditioning	14	63.2	29.5	338,825,400
Interstate Subtotal	16	80.7	37.7	1,316,180,900
Non-Interstate				
Reconstruction <sup>c</sup>	16	21.3	2.0	157,552,300
Resurfacing/Reconditioning	46	139.9	13.4	253,499,500
Non-Interstate Subtotal	62	161.2	15.4	411,051,800
NHS Total	78	241.9	19.3	1,727,232,700

<sup>a</sup> Includes only projects that have construction programmed within the 2023-2026 TIP.

<sup>b</sup> There are 214.0 miles of Interstate NHS and 1,040.6 miles of non-Interstate NHS in Southeastern Wisconsin.

<sup>c</sup> Includes both reconstruction to same capacity and reconstruction with additional traffic lanes.

<sup>d</sup> Includes the programmed funds for bridges that are part of larger highway rehabilitation or reconstruction projects. In addition, some projects programmed in the TIP along the NHS may include portions of highway that are not on the NHS. include multiple bridges, with some of those bridges being along the NHS and some of those bridges not along the NHS. As the total funds programmed is listed by each project, the total funds programmed may include funding for sections of highway that are not on the NHS.

Potential Contribution of Highway Improvement and Expansion Projects Programmed in the 2023-2026 TIP Towards the Travel Time and Freight Reliability Performance Measures**

Facility Type	National Highway System (NHS)			
	Number of Projects <sup>a</sup>	Number of Miles	Percent of Facility/NHS <sup>b</sup>	Total Funds Programmed <sup>c</sup> (\$)
Interstate	2	17.5	8.2	977,355,500
Non-Interstate	1	1.1	0.1	7,336,000
Total	3	18.6	1.5	984,691,500

<sup>a</sup> Includes only projects that have construction programmed within the 2023-2026 TIP. Environmental enhancement projects that contribute to traffic flow are also included.

<sup>b</sup> There are 214.0 miles of Interstate NHS and 1,040.6 miles of non-Interstate NHS in Southeastern Wisconsin.

<sup>c</sup> Some projects programmed in the TIP include optimization of traffic signals at intersections across various corridors, with some of those corridors being along the NHS and some of those corridors not along the NHS. As the total funds programmed is listed by each project and not each corridor, the total funds programmed may include funding for those corridors that are not on the NHS.

Source: SEWRPC

### CMAQ Targets

Table E.11 shows the short-term targets that have been established jointly by the Commission and WisDOT for the congested-related CMAQ performance measures in the Milwaukee urbanized area. Table E.12 shows the short-term targets that have been established by the State for the emission-related CMAQ performance measure for the State. The Commission has until June 14, 2023 to either accept these targets or establish targets for the Region’s metropolitan planning area. The \$58 million of CMAQ funding programmed for projects within the period of the 2023-2026 TIP would contribute to the achievement of each target. Specifically, it is estimated that these projects, once initiated, would reduce volatile organic compounds (VOCs) emissions in Southeastern Wisconsin by 8.593 kilograms (kg) per day, Nitrogen Oxides (NOx) emissions by 16.778 kg per day, and particulate matter (PM2.5) emissions by 2.17 kg per day. However, emissions reductions are not limited to CMAQ projects. Other bus replacement, transit improvement and expansion, bicycle, pedestrian, and environmental enhancement projects including projects that optimize traffic signal timing along corridors, the purchase of alternative fuel buses or trucks, and the construction of alternative fuel facilities and equipment, that are programmed in the TIP with other funding sources can be expected to contribute to meeting the emissions reduction performance measure.

With respect to the congestion-related measures, traffic flow projects programmed with CMAQ and other funds are expected to contribute to the achievement of the Peak Hour Excessive Delay (PHED) target. Additionally, the transit improvement and expansion projects and bicycle/pedestrian projects would be expected to provide some relief to system delay. With respect to the performance measure relating to non-single occupancy vehicles (SOV), it is expected that transit improvement, transit expansion, and bicycle/pedestrian projects would contribute to the achievement of this target, as such projects promote alternatives to automobile travel. As shown on Table E.13, about \$29 million is programmed for such projects, including the implementation of a bus rapid transit line for the Milwaukee County Transit System and the completion of a City of Milwaukee streetcar project. Additionally, it is expected that bicycle and pedestrian accommodations that are integrated along arterial streets and highways would also contribute to the achievement of this target.

**Table E.11**  
**Congestion-Related CMAQ Targets**

Performance Measure	Baseline Data (2017)	Two-Year Target (2023)	Four-Year Target (2025)
Annual Hours of Peak Hour Excessive Delay (PHED) per Capita	5.7	≤8.6 <sup>a</sup>	≤8.4 <sup>a</sup>
Percent of Non-SOV Travel	20.3 <sup>b</sup>	≥20.5 <sup>a</sup>	≥20.5 <sup>a</sup>

<sup>a</sup> Per Federal regulations, this target was established jointly by the Wisconsin Department of Transportation and SEWRPC.

<sup>b</sup> From the 2012-2016 American Community Survey Journey to Works data.

# ADVISORY COMMITTEE MEMBERSHIPS

## APPENDIX F

**ADVISORY COMMITTEE ON TRANSPORTATION SYSTEM PLANNING AND  
PROGRAMMING FOR THE KENOSHA URBANIZED AREA**

- Clement Abongwa, *Chair* ..... Director of Highways/Highway Commissioner, Kenosha County
- Benjamin McKay, *Secretary* ..... Interim Executive Director, SEWRPC
- David Bizot ..... Program and Policy Analyst, Bureau of Air Management,  
Wisconsin Department of Natural Resources
- Karl Buck ..... Community Transportation Planner, Federal Highway Administration,  
U.S. Department of Transportation
- Tim Casey ..... Director, Department of Community Development and Inspections, City of Kenosha
- Brian Cater ..... Director/City Engineer, Department of Public Works, City of Kenosha
- Tom Dieckelman ..... President, Wisconsin Coach Lines, Inc.
- Matthew Fineour ..... Village Engineer, Village of Pleasant Prairie
- Roberto Gutierrez ..... Deputy Director, Southeast Region, Wisconsin Department of Transportation
- John Holloway ..... Chairman, Town of Paris
- Randall Kerkman ..... Administrator/Public Works Director, Village of Bristol
- Cheryl L. Newton ..... Environmental Protection Specialist, U.S. Environmental Protection Agency, Region V
- Nelson Ogbuagu ..... Director, Department of Transportation, City of Kenosha
- Jason Peters ..... Administrator, Town and Village of Somers
- Charles Wade ..... Director, Bureau of Planning and Economic Development,  
Division of Transportation Investment Management,  
Wisconsin Department of Transportation
- William Wheeler ..... Community Planner, Federal Transit Administration - Region 5,  
U.S. Department of Transportation
- Vacant ..... City of Kenosha

## ADVISORY COMMITTEE ON TRANSPORTATION SYSTEM PLANNING AND PROGRAMMING FOR THE MILWAUKEE URBANIZED AREA

### Voting Members

Donna Brown-Martin, *Chair*.....Commissioner, Southeastern Wisconsin Department of Transportation,  
Director, Milwaukee County Department of Transportation

Robert J. Bauman .....Alderman, City of Milwaukee

Daniel A. Boehm.....President and Managing Director, Milwaukee County Transit System

Scott Brandmeier .....Director of Public Works and Village Engineer, Village of Fox Point

Karen Braun..... Manager of Engineering Services, Department of Public Works, Waukesha County

Allison M. Bussler.....Director, Department of Public Works, Waukesha County

Alex Damien ..... Interim Director, Department of Public Works, City of Waukesha

Jon Edgren.....Director of Public Works/Highway Commissioner, Ozaukee County

Julie Esch ..... Deputy Director, Milwaukee County Department of Transportation

Thomas M. Grisa ..... Director, Department of Public Works, City of Brookfield

Thomas J. Hafner.....Administrator/Director of Public Works, City of Delafield

Robert Hutter..... Interim City Engineer, City of West Allis

Nik Kovac ..... Budget and Management Director, Budget and Management Division,  
Department of Administration, City of Milwaukee

Jerrel Kruschke .....Commissioner of Public Works, City of Milwaukee

Sam Leichtling.....Planning Manager, Department of City Development, City of Milwaukee

Kimberly R. Montgomery.....Legislative Liaison Director, City of Milwaukee

Kevin Muhs..... City Engineer, Department of Public Works, City of Milwaukee

Scott Rewolinski.....Director, Department of Public Works, Village of Hales Corners

Scott M. Schmidt.....Highway Commissioner/County Engineer, Washington County

Andrea Weddle-Henning.....Transportation Engineering Manager,  
Milwaukee County Department of Transportation

William T. Wehrley.....City Engineer, City of Wauwatosa

Vacant.....Supervisor, Milwaukee County Board of Supervisors

### Nonvoting Technical Staff Members

Benjamin McKay, *Secretary* .....Interim Executive Director, SEWRPC

David Bizot.....Program and Policy Analyst, Bureau of Air Management,  
Wisconsin Department of Natural Resources

Karl Buck.....Community Transportation Planner, Federal Highway Administration,  
U.S. Department of Transportation

Tom Dieckelman .....President, Wisconsin Coach Lines, Inc.

Roberto Gutierrez ..... Deputy Director, Southeast Region, Wisconsin Department of Transportation

Charles Wade.....Director, Bureau of Planning and Economic Development,  
Division of Transportation Investment Management,  
Wisconsin Department of Transportation

William Wheeler .....Community Planner, Federal Transit Administration - Region 5,  
U.S. Department of Transportation

### Jefferson County Liaison

Brian Udovich .....Highway Operations Manager, Jefferson County Highway Department

**ADVISORY COMMITTEE ON TRANSPORTATION SYSTEM PLANNING AND  
PROGRAMMING FOR THE RACINE URBANIZED AREA**

- Julie Anderson, *Chair*.....Director of Public Works and Development Services, Racine County
- Benjamin McKay, *Secretary* .....Interim Executive Director, SEWRPC
- David Bizot.....Program and Policy Analyst, Bureau of Air Management,  
Wisconsin Department of Natural Resources
- Karl Buck.....Community Transportation Planner, Federal Highway Administration,  
U.S. Department of Transportation
- Anthony Bunkelman .....Director of Public Services, Village of Caledonia
- Tom Dieckelman .....President, Wisconsin Coach Lines, Inc.
- Amanda Gain .....Village Administrator, Village of Sturtevant
- Roberto Gutierrez .....Deputy Director, Southeast Region, Wisconsin Department of Transportation
- Trevor Jung .....Transit and Parking System Manager, City of Racine
- Douglas Nelson .....President, Village of Yorkville
- Cheryl L. Newton..... Environmental Protection Specialist, U.S. Environmental Protection Agency, Region V
- John Rooney .....Commissioner of Public Works/City Engineer, City of Racine
- Ernie Rossi..... Village President, Village of Elmwood Park
- Susan Sanabria..... President, Village of Wind Point
- Mark Schall ..... President, Village of North Bay
- Charles Wade.....Director, Bureau of Planning and Economic Development,  
Division of Transportation Investment Management,  
Wisconsin Department of Transportation
- Linsey Weber.....Deputy Director of Public Works, Village of Mount Pleasant
- William Wheeler .....Community Planner, Federal Transit Administration - Region 5,  
U.S. Department of Transportation

**ADVISORY COMMITTEE ON TRANSPORTATION SYSTEM PLANNING AND  
PROGRAMMING FOR THE ROUND LAKE BEACH-MCHENRY-GRAYSLAKE,  
IL-WI URBANIZED AREA (WISCONSIN PORTION)**

Clement Abongwa, *Chair*.....Director of Highways/Highway Commissioner, Kenosha County  
Benjamin McKay, *Secretary* .....Interim Executive Director, SEWRPC  
Dan Aronson.....President, Village of Bloomfield  
David Bizot.....Program and Policy Analyst, Bureau of Air Management,  
Wisconsin Department of Natural Resources  
Karl Buck.....Community Transportation Planner, Federal Highway Administration,  
U.S. Department of Transportation  
Terry Burns .....President, Village of Paddock Lake  
Susan Crane .....Chairwoman, Town of Brighton  
Tom Dieckelman .....President, Wisconsin Coach Lines, Inc.  
William M. Glembocki ..... Chairman, Town of Wheatland  
Roberto Gutierrez ..... Deputy Director, Southeast Region, Wisconsin Department of Transportation  
Richard Hough.....Director of Public Works/Highway Commissioner, Walworth County  
Randall Kerkman .....Administrator/Public Works Director, Village of Bristol  
Cheryl L. Newton..... Environmental Protection Specialist, U.S. Environmental Protection Agency, Region V  
Ken Parker.....President, Village of Genoa City  
Daniel Schoonover ..... Chairman, Town of Bloomfield  
Howard K. Skinner .....President, Village of Twin Lakes  
Robert Stoll..... Chairman, Town of Randall  
Diann Tesar .....President, Village of Salem Lakes  
Charles Wade.....Director, Bureau of Planning and Economic Development,  
Division of Transportation Investment Management,  
Wisconsin Department of Transportation  
William Wheeler .....Community Planner, Federal Transit Administration - Region 5,  
U.S. Department of Transportation

**ADVISORY COMMITTEE ON TRANSPORTATION SYSTEM PLANNING AND  
PROGRAMMING FOR THE WEST BEND URBANIZED AREA**

- Scott Schmidt, *Chair* .....Highway Commissioner/County Engineer, Washington County
- Benjamin McKay, *Secretary* .....Interim Executive Director, SEWRPC
- Karl Buck..... Community Transportation Planner, Federal Highway Administration,  
U.S. Department of Transportation
- Adam Gitter..... Village Administrator, Village of Kewaskum
- Joseph Gonnering.....Chairman, Town of Trenton
- John Griffin ..... City Engineer, Engineering Department, City of Hartford
- Roberto Gutierrez ..... Deputy Director, Southeast Region, Wisconsin Department of Transportation
- Robert Hartwig.....Chairman, Town of Jackson
- Jen Keller ..... Village Administrator, Village of Jackson
- Ryan Lippert.....Chairman, Town of Hartford
- Max Marechal.....City Engineer, City of West Bend
- Albert Schulteis.....Chairman, Town of Polk
- Kris Turner.....Chairman, Town of Barton
- Charles Wade.....Director, Bureau of Planning and Economic Development,  
Division of Transportation Investment Management,  
Wisconsin Department of Transportation
- William Wheeler .....Community Planner, Federal Transit Administration - Region 5,  
U.S. Department of Transportation
- Margaret Wilber .....Village Administrator, Village of Slinger
- Scott Wollner .....Chairperson, Town of Kewaskum
- Troy Zigel.....Chairman, Town of West Bend
- Dodge County Liaison**
- Brian R. Field .....Highway Commissioner, Dodge County

The appendix provides summaries of processes used to recommend local highway, transit, and bicycle/pedestrian projects for available Federal Transit Administration (FTA) and Federal Highway Administration (FHWA) funding. The process used for selecting projects, along with project eligibility, differs for the various Federal funding sources. Also, the level of the Commission’s involvement in the evaluation and recommendation of projects for funding depends on the funding source.

### **Federal Transit Administration Funding Sources**

- FTA Section 5307/5340 Urbanized Area Formula Funding: FTA Section 5307/5340 funding is available for transit operators within urbanized areas to fund transit capital, or capitalized maintenance, projects, and the operation of the transit systems in urbanized areas having a population under 200,000 and transit systems operating less than 100 buses in urbanized areas having a population of 200,000 or more. The FTA announces annually the amount of FTA Section 5307/5340 funding that will be available to the State for urbanized areas under 200,000 in population and that will be allocated specifically to urbanized areas having a population of 200,000 or more, including the Milwaukee urbanized area. The Commission staff has worked with the transit operators in the Milwaukee urbanized area—Milwaukee County, Ozaukee County, Washington County, Waukesha County, the City of Waukesha, and the City of Milwaukee—to develop procedures to distribute FTA Section 5307/5340 funding allocated to the Milwaukee urbanized area. The distribution of funds is based on transit ridership carried and service provided by each transit operator, ensuring that each unit of transit service and rider receives equal Federal transit assistance. Specifically, the FTA Section 5307/5340 funding is distributed based on revenue vehicle miles of transit service, revenue vehicle hours of transit service, revenue passengers, and passenger miles, with 25 percent of the allocation distributed using each criteria (as reported by each operator in the FTA National Transit Database). This distribution method has been used since 2007, as agreed to by the five Milwaukee urbanized area transit operators. In 2021, the distribution methodology was updated to provide the City of Milwaukee, now a designated recipient, with the increment of MUA Section 5307/5340 funds attributable to the transit services it provides. With respect to urbanized areas with population less than 200,000, the FTA allocates the Section 5307 funding to transit operators based on the population and population density of the urbanized area from the most recent U.S. Census. Following distribution of FTA Section 5307/5340 funding, each transit operator prioritizes and recommends capital or capitalized maintenance projects for the funding distributed to their systems. The projects recommended for FTA Section 5307/5340 are provided by each transit operator for review and comment, and consideration of inclusion in the TIP.

- FTA Section 5337 State of Good Repair Funding:The FTA typically announces annually the amount of FTA Section 5337 funding to assist transit operators in maintaining their fixed-guideway transit systems (rail or bus on dedicated lane). The FTA Section 5337 funds allocated to the Region are attributable to the bus service operated by the Waukesha County Transit System in the reserved bus lane on W. Bluemound Road in Waukesha County and the City of Kenosha's streetcar system. As a result, the Waukesha County and Kenosha area transit systems are currently the only recipients of the FTA Section 5337 funding that is allocated to the Region. With the Milwaukee streetcar system initiating service in the fall of 2018, it is expected that the City of Milwaukee system will also become a recipient of these funds, starting in Federal Fiscal Year 2026. Similarly, the East-West Bus Rapid Transit is anticipated to begin revenue service in 2023, and become eligible for FTA Section 5337 funding starting in Federal Fiscal Year 2031.
- FTA Section 5339 Bus and Bus Facilities Program Funding: The FTA typically announces annually the amount of FTA Section 5339 funding available to capital bus and bus facilities projects statewide and to the urbanized areas with populations of 200,000 or more, such as the Milwaukee urbanized area. In addition to the FTA Section 5339 funding that is allocated to the Milwaukee urbanized area, the State distributes a portion of the FTA Section 5339 funding available to projects statewide to the Milwaukee urbanized area. Following the creation of the FTA Section 5339 program in the Moving Ahead for Progress in the 21st Century Act (MAP-21) that was enacted in 2012, the Commission staff worked with the transit operators in the Milwaukee urbanized area—Milwaukee County, Ozaukee County, Washington County, Waukesha County, and the City of Waukesha—to develop procedures to distribute FTA Section 5339 funding allocated to the Milwaukee urbanized area. The transit operators agreed that the funds would be distributed utilizing the same methodology used for FTA Section 5307/5340 funding, that is, the available FTA Section 5339 funding would be distributed based on revenue vehicle miles of transit service, revenue hours of transit service, revenue passengers, and passenger miles, with 25 percent of the allocation distributed using each criteria. Following distribution of FTA Section 5339 funding, each transit operator prioritizes and recommends capital bus and bus facilities projects for FTA Section 5339 funding available to projects within the Milwaukee urbanized area. The projects recommended for FTA Section 5339 funding are provided by the transit operators for review and comment, and consideration of inclusion in the TIP. With regards to the remaining FTA Section 5339 funding available statewide, WisDOT solicits, evaluates, and recommends projects for these funds that are available to projects statewide.
- FTA Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities Program Funding: The FTA typically announces annually the amount of FTA Section 5310 funding available to mobility projects and programs statewide and to the urbanized areas with populations of 200,000 or more, such as the Milwaukee urbanized area. Following the enactment of MAP-21 in 2012 and continued through the enactment of the FAST Act in 2015, the FTA Section 5310 program requires the designation of at least one recipient in the urbanized area and the determination of a method for distributing the funding within the Milwaukee urbanized area. Milwaukee County agreed to be the designated recipient for the Section 5310 funding allocated to the Milwaukee urbanized area, upon request by the four transit operators in the urbanized area. The Commission staff worked with the Milwaukee urbanized area transit operators during 2014 to develop a competitive process to evaluate and recommend projects for funding throughout the urbanized area. The competitive process is conducted biennially in the Milwaukee urbanized area. WisDOT solicits, evaluates, and recommends mobility projects serving people with disabilities separately for FTA Section 5310 funding available to projects outside of the urbanized areas having a population of 200,000 or more.

## Federal Highway Administration Funding Sources

- FHWA Congestion Management and Air-Quality Improvement Program (CMAQ) Funding: WisDOT typically solicits projects biennially for FHWA CMAQ funding and forwards the eligible projects to the Commission and the WDNR. The type of projects that are eligible for CMAQ funding include transit capital projects, transit improvement operating projects (for a limited number of years), bicycle/pedestrian projects, projects involving alternative energy sources, diesel-retrofit projects, and traffic flow projects, such as coordinating traffic signals and the construction of intersection turn lanes and traffic signals. The Commission, with guidance from the TIP Committees; WisDOT; and the WDNR follow a cooperative procedure to select projects for CMAQ funding. As part of the procedure, the staffs of the Commission, WisDOT, and WDNR rate each candidate project seeking CMAQ funding. The Commission has worked with the TIP Committees to develop the scoring procedures used by the Commission staff and the TIP Committees. Under these procedures, projects providing an alternative to the automobile received the highest points, which resulted in transit projects being the highest rated projects and historically receiving over 50 percent of the available CMAQ funding in Southeastern Wisconsin. In addition, projects that do not involve reducing the use of the automobile were also evaluated based on housing-related criteria—job/housing imbalance and provision of transit—as recommended in the adopted regional housing plan. The three agencies along with the Chairs of the TIP Committees then considered the results of application of the three rating procedures to develop a listing of projects recommended for CMAQ funding. The listing of recommended projects is first presented to the WisDOT Secretary for his consideration and approval. If approved, the projects recommended for funding were then forwarded to the TIP Committees for their review and consideration in recommending projects for CMAQ funding and inclusion into the TIP.
- FHWA Surface Transportation Block Grant Program – Milwaukee Urbanized Area (STP-M) Funding: WisDOT typically solicits projects biennially for FHWA STP-M funding and forwards the eligible projects to the Commission for the evaluation and recommendation of projects for funding. Since the early 1990s, the Commission staff and the Milwaukee TIP Committee together with the local governments in the Milwaukee urbanized area have developed and utilized guidelines for the eligibility, evaluation, and the selection of projects for FHWA STP-M funding. In 2013, the Commission staff worked with the Milwaukee TIP Committee, along with the communities within the urbanized area, to revise the procedures used to evaluate, prioritize, and recommend projects for FHWA STP-M funding. The revised procedures were approved by the Milwaukee TIP Committee and were used to evaluate and recommend projects for years 2015-2018 STP-M funding. The procedures developed for the 2015-2018 funding cycle were reviewed and updated in 2015, in 2019, and slightly in 2021.

In terms of project eligibility, CMAQ-type, safety and intersection improvement, and bridge projects, while eligible for STP-M funding, have been recommended by the Milwaukee TIP Committee to not be funded with STP-M funding, as they have their own specific FHWA funding sources. With respect to highway and transit projects, the Milwaukee TIP Committee recommended continuing its policy that highway projects on the planned arterial street and highway system contained in the regional transportation plan and transit capital projects would be eligible for STP-M funding. The Milwaukee TIP Committee further determined that combined Milwaukee area FHWA STP funds and FTA section 5307/5340 funds would be allocated between highway and transit projects based upon their relative capital project needs, as set forth in the adopted regional transportation plan. Typically, Milwaukee area county and local arterial highway capital project needs represent an estimated 63 percent of total area capital project needs, and Milwaukee area public transit capital project needs represent 37 percent of total area capital project needs. Historically, this resulted in \$10.7 million in FHWA STP-M funding being transferred, or flexed, to transit projects. Most of this transfer/flexing occurred throughout the 1990s when Milwaukee area FHWA STP-M funding substantially exceeded FTA Section 5307/5340 funding. However, in recent years, the amount of FHWA STP-M and FTA Section 5307/5340 has been about the same, which would under this process result in FTA Section 5307/5340 funding being transferred to highway projects. However, the Milwaukee TIP Committee historically recommended that no transfer of FTA Section 5307/5340 funds be made to streets and highways, and now Federal law no longer allows such transfers. In addition, the Committee recommended that, should no transfer of STP-M funding to transit capital projects be calculated to occur, 10 percent of the available highway funding would be transferred to transit capital projects.

The Milwaukee TIP Committee recommended that 10 percent of the STP-M funding available to

highway projects be first allocated to a set-aside of funding that is made available to projects from smaller sponsors. In addition, the committee recommended that the available STP-M funding for highway projects would be allocated to the three highway project types based on historical proportions of types of projects approved for STP-M funding and the proportion requested for projects of each type having areawide significance.<sup>14</sup> These allocations are used as targets for how the available highway funding should be allocated, assuming there would be enough candidate projects for each project type. Should the funding levels being requested by each of the project types not be exceeded, the amount of available highway funding allocations for each project type would need to be adjusted by the Milwaukee TIP Committee.

As part of the evaluation procedures, the Milwaukee TIP Committee recommended that candidate projects be evaluated with criteria reflecting the performance desired from the transportation system in the Milwaukee urbanized area, including serving to improve pavement conditions of county and local arterial streets and highways, with priority given to routes with greater use measured by the number of automobiles and transit riders that travel along the length of the project on an average weekday, greater length and function of the roadway facility, and higher average crash rates. In addition, projects receive bonus points based on the level of proposed transit, bicycle, and pedestrian accommodations proposed to be provided along the length of the project. In the case of capacity expansion projects (widening and new facilities), priority is also given based on the level of existing congestion, the job/housing balance in a community, and the extent of existing transit service in a community (as recommended in the adopted regional housing plan).

Under the procedures developed by the Milwaukee TIP Committee, candidate resurfacing/reconditioning projects, reconstruction to same capacity projects, and capacity expansion projects (widening and new facilities) would be evaluated separately. Resurfacing/reconditioning projects and reconstruction to the same capacity projects could receive a maximum of 10 points from the six criteria. Candidate capacity expansion projects consistent with the year 2050 FCTS could receive up to a maximum of 10 points with up to 10 bonus points received by candidate capacity expansion projects located in a community or communities that have a projected balance of jobs and housing and that have the provision of transit.

The results of the application of the procedures to evaluate candidate projects for STP-M funding are presented to the Milwaukee TIP Committee for its review and consideration in recommending projects for funding.

- FHWA Surface Transportation Program (STP) Funding Allocated to the Other Urbanized Areas in Southeastern Wisconsin: Unlike for the Milwaukee urbanized area, formal procedures have not been developed to evaluate, prioritize, and recommend projects for STP funding allocated to the other urbanized areas within Southeastern Wisconsin—Kenosha, Racine, Round Lake Beach, and West Bend urbanized areas. WisDOT typically biennially solicits projects for STP funding in these urbanized areas, and forwards the projects, along with the amount of allocated STP funding, to the Commission and the counties that contain the urbanized areas. The counties and communities located within these urbanized areas work cooperatively to recommend projects for STP funding allocated to their respective urbanized areas, with the Commission staff assisting these communities when requested. A listing of projects recommended for STP funding allocated to the other urbanized areas is provided by each urbanized area for review and comment, and inclusion in the TIP.

---

<sup>14</sup> Candidate resurfacing/reconditioning projects and reconstruction to same capacity projects that receive a minimum of 73 points and capacity expansion projects that receive a minimum of 64.5 points are identified as having areawide significance.

- FHWA STP Transportation Alternatives Program Funding: WisDOT solicits and selects projects for TAP funding available statewide. In addition, TAP funding is also allocated directly to urbanized areas with populations over 200,000, such as the Milwaukee urbanized area. Commission staff worked with the Milwaukee TIP Committee in 2014, 2016, 2018, 2020, and 2022 to prioritize and recommend projects for TAP funding allocated to the Milwaukee urbanized area. WisDOT provides to the Commission for review and inclusion in the TIP a listing of the projects in Southeastern Wisconsin recommended for FHWA TAP funding that is available to projects statewide.
- FHWA Bridge Funding: WisDOT typically solicits biennially local bridge projects for FHWA/State funding made available statewide for local bridge replacement and rehabilitation projects. WisDOT evaluates and recommends projects for FHWA/State bridge funding based on procedures specified in Wisconsin Administrative Code Trans 213.03 (04). As part of these procedures, WisDOT rates and ranks projects based on a system whereby each county is credited bridge funds available in the respective funding cycle based on their relative need represented by their proportionate share of the total estimated replacement cost of eligible bridges (sufficiency ratings of less than 50) identified throughout the State. These need-based credits are accumulated with debits occurring from each county's balance as projects are selected for implementation. Each candidate project is rated and prioritized under the evaluation and selection process based on each governmental unit's credit balance and the estimated project cost in the order of the priorities indicated by each county. WisDOT provides a listing of the projects within Southeastern Wisconsin recommended for FHWA/State Bridge Replacement funding to the Commission for review and consideration of inclusion in the TIP.
- FHWA Highway Safety Improvement Program (HSIP) Funding: WisDOT solicits annually projects for FHWA HSIP funding available to local projects statewide. WisDOT is responsible for evaluating and recommending local projects, as well as State projects, for HSIP funding. WisDOT provides a listing of the local and State safety projects in Southeastern Wisconsin recommended for HSIP funding to the Commission for review and consideration of inclusion in the TIP.

**Table H.9  
Public Transit Operator Report for Milwaukee County Transit System: 2023-2026**

<b>2023 Projected Operating Budget</b>			
Total Federal Operating Assistance	\$42,109,218		
Total State Operating Assistance	\$68,624,797		
Total Local Operating Assistance	\$23,563,864		
Total Farebox and Other Revenue	\$27,938,387		
<b>Total Operating Budget</b>	<b>\$162,236,266</b>		

<b>2023 Projected Operation Characteristics</b>			
<b>Basic Transit System</b>	<b>Weekdays</b>	<b>Saturdays</b>	<b>Sundays/Holidays</b>
Number of Routes	40	37	37
Total Route Miles (both directions)	54,836	41,473	35,938
Headway Range (average)	15-25	25-30	27-32
Vehicle Hours (average)	4,118	3,006	2,481
Vehicles in Service	264	181	158
Operating Budget (average)	\$69,556,371	\$50,773,786	\$41,906,109

<b>2023 Projections</b>	
Operating Characteristics Specialized Service for Elderly and Handicapped Total Operating Budget: \$17.3 million	<p>The Transit Plus program subsidizes the cost of personal transportation for individuals designated as disabled under the ADA. The program is designed to approximate mass transit for individuals who are unable to utilize the fixed-route service of MCTS. Private van and taxi companies are contracted to provide all paratransit service.</p> <p>No constraints are placed on the nature of trip or number of trips taken. Service hours approximate the hours of fixed-route service. With few exceptions, the service area is Milwaukee County and all trips must originate and terminate within the service area. Milwaukee County subsidizes each one-way trip. The individual taking the trip is required to make an initial co-pay, currently \$4. Per ADA law, the client co-pay may not exceed twice the standard adult bus fare (currently \$2). In 2023, it is estimated that 413,000 paratransit trips will be taken at a total program cost of \$17.3 million.</p>
Implementation of New or Restructured Transit Services	In June 2023, MCTS will launch its first Bus Rapid Transit (BRT) system utilizing battery electric buses in the east-west corridor currently serviced predominantly by the Goldline. The Goldline and other services will be modified to accommodate for this route, as well as connections and transfers coordinated with Waukesha Metro service.
Planning for New or Restructured Transit Services	MCTS is in the initial planning phases for a North-South BRT route along the area currently serviced by the PurpleLine.

**Public Transit Operator Capital Project Justification for**  
**Milwaukee County Transit System: 2023-2026**

<b>TIP Project Number</b>	<b>Description</b>	<b>Year</b>	<b>Costs (\$)</b>	<b>Justification</b>
87	Contract services for MCTS paratransit operations	2023	2,250,000	Eligible operating expenses for Milwaukee County's paratransit program (Transit Plus).
		2024	2,250,000	
		2025	2,250,000	
		2026	2,250,000	
90	Capitalization of transit vehicle maintenance activities	2023	20,000,000	FTA allows vehicle maintenance costs to be considered an eligible capital project.
		2024	20,000,000	
		2025	20,000,000	
		2026	20,000,000	
92	Support, service and maintenance equipment.	2023	1,250,000	Replace maintenance vehicles and other equipment that have reached the end of their useful life. Refer to Attachment A for equipment list and justification.
		2024	1,250,000	
		2025	1,250,000	
		2026	1,250,000	
93	Milwaukee Urbanized Area Section 5310 Administration	2023	130,000	Milwaukee County will administer the regional Section 5310 program.
		2024	130,000	
98	Replacement of interior lighting at the Kinnickinnic Garage	2023	101,500	Replace lighting to improve efficiency
		2025	693,600	
99	Tire leasing services for MCTS.	2023	560,000	Annual cost of tire leasing services – proven to be more cost effective than purchasing tires.
		2024	570,000	
		2025	580,000	
		2026	590,000	
101	Lighting upgrades at the Fond du Lac Garage	2024	1,545,500	Replace lighting to improve efficiency
104	Replacement of garage doors at fleet maintenance garage	2023	750,000	Replace aging doors
105	KK Storage fire alarm system upgrades	2023	120,000	Current system is beyond useful life.
106	KK Maintenance Building air compressors	2023	120,000	Current system is beyond useful life.
107	KK Maintenance Building natural gas upgrades	2023	160,000	Current system is beyond useful life.
108	KK Maintenance Building sprinkler upgrades	2023	410,000	Current system is beyond useful life.
109	KK Maintenance Building water distribution renewal	2023	230,000	Current system is beyond useful life.
110	KK Storage Natural Gas System Upgrades	2023	530,000	Current system is beyond useful life.
111	KK Storage Sprinkler Upgrades	2023	1,370,000	Current system is beyond useful life.
112	KK Washhouse Building heating system upgrades	2023	200,000	Current system is beyond useful life.
113	Lighting upgrades for the large fleet maintenance garage	2024	324,000	Replace lighting to improve efficiency
114	KK Garage HVAC control system upgrades	2023	500,000	Current system is beyond useful life

## Attachment A

### Milwaukee County Transit System Support, Service and Maintenance Equipment

---

#### **New Fencing at FDL facility – 850,000**

Replacement of fencing at the FDL facility.

#### **Hydraulic Shear and Bead Blaster for fleet maintenance – 130,000**

New equipment to aid in bus maintenance and repairs.

#### **Generator upgrades at FDL – 150,000**

Generator upgrade to ensure proper operation of facility/equipment.

#### **Overhead Doors at FDL and KK facility – 200,000**

Replacement of overhead doors at two storage facilities.

#### **Miscellaneous Voice/Data Systems – 100,000**

Routine ongoing replacement of office/computer equipment.

#### **Procurement/Acct Software – 500,000**

New software to support procurement services.

#### **Computer network (SAN) and Access Point replacement – 300,000**

To replace existing computer storage capacity and access points.

**Public Transit Operator Report for RYDE (City of Racine Transit System): 2023-2026**

<b>2023 Projected Operating Budget</b>	
Total Federal Operating Assistance	\$5,512,336
Total State Operating Assistance	\$2,070,068
Total Local Operating Assistance	\$1,649,000
Total Farebox and Other Revenue	\$1,375,295
<b>Total Operating Budget</b>	<b>\$10,606,699</b>

<b>2023 Projected Operation Characteristics</b>			
<b>Basic Transit System</b>	<b>Weekdays</b>	<b>Saturdays</b>	<b>Sundays</b>
Number of Routes	10	5	5
Total Route Miles (both directions)	157	101	94
Headway Range (average)	30-60 minutes	60 minutes	60 minutes
Vehicle Hours (average)	300	120	75
Vehicles in Service	29	9	9
Operating Budget (average)	\$29,800	\$15,133	\$9,429

<b>2023 Projections</b>	
Operating Characteristics	None
Implementation of New or Restructured Transit Services	An additional route will be reinstated. The route was stopped while local public schools were virtual.
Planning for New or Restructured Transit Services:	None

**Table H.18**  
**Public Transit Operator Capital Project Justification for RYDE**  
**(City of Racine Transit System): 2023-2026**

<b>TIP Project Number</b>	<b>Description</b>	<b>Year</b>	<b>Costs (\$)</b>	<b>Justification</b>
390	Operating assistance for the City of Racine Transit System	2023	9,231,500	Operating costs have traditionally been covered by a combination of federal, state, local governments and rider fares, all of which are critical to providing the service.
		2024	7,409,400	
		2025	7,427,100	
391	Replace aging transit equipment as it wears out	2023	50,000	Replace equipment that is no longer functional.
		2024	50,000	
		2025	50,000	
392	Purchase of 2 replacement paratransit vehicles	2025	160,000	Minibuses buses will have exceeded their useful life benchmark in terms of miles, years, condition and life cycle cost.
393	Purchase of 4 all-electric buses to replace diesel buses	2023	4,450,000	Meet zero emission goals and buses will have exceeded their useful life benchmark in terms of miles, years, condition and life cycle cost.
394	Purchase of 4 all-electric buses to replace diesel buses	2025	4,500,000	Meet zero emission goals and buses will have exceeded their useful life benchmark in terms of miles, years, condition and life cycle cost.
395	Replacement of a maintenance vehicle	2023	60,000	Maintenance vehicle (1997) has exceeded its useful life in terms of miles, years, condition and life cycle cost.
396	Replacement of a supervisor van	2024	80,000	Supervisor van (2017) has exceeded its useful life in terms of miles, years, condition and life cycle cost.
397	Reconstruction of dispatch offices, drivers room, and storage area	2023	1,875,000	Improve functionality and address ADA and structural issues.
398	Replacement of transit facility apron and parking lot	2023	400,000	The pavement at the transit garage and office facility is crumbling. Requires replacement with concrete.
399	Replacement of fencing at the Kentucky St Transit Garage	2024	50,000	Fence surrounding transit garage is aging and falling apart.
400	Upgrades to the fare purchasing technology	2023	200,000	Expand options for purchasing passes for passengers at transit center and on buses.

**Table H.29**  
**Public Transit Operator Report for City of Waukesha Metro Transit System and Waukesha County Transit System: 2023-2026**

<b>2023 Projected Operating Budget</b>	
Total Federal Operating Assistance	\$2,471,538
Total State Operating Assistance	\$3,785,665
Total Local Operating Assistance	\$2,279,307
Total Farebox and Other Revenue	\$1,003,655
<b>Total Operating Budget</b>	<b>\$9,540,165</b>

<b>2023 Projected Operation Characteristics</b>				
<b>Basic Transit System</b>	<b>Weekdays</b>	<b>Saturdays</b>	<b>Sundays</b>	<b>Holidays</b>
Number of Routes	14	8	5	1
Headway Range (average)	15-60	30-60	30-60	30
Vehicles in Service	28	10	7	2
Operating Budget (average)	\$31,485	\$18,734	\$9,321	\$3,477

<b>2023 Projections</b>	
Operating Characteristics	All 10 City transit routes & Gold Line will continue operation. The tentative plan for Commuter service is to end the suspensions and make permanent changes. It is highly likely the Route 79 Commuter route will be either eliminated or have reduced service due to very low ridership. Routes 901/904/905 will also likely have some reductions in service. Paratransit services will operate as current.
Implementation of New or Restructured Transit Services	As noted above, Commuter service will likely be reduced. In addition, when the MCTS BRT starts in May or June 2023 (estimated), Route 1 is planned to be extended to the Milwaukee Regional Medical Center and the Gold Line will be eliminated.
Planning for New or Restructured Transit Services	It is anticipated that the TDP will be finished by Fall 2022. The City will likely implement the route restructuring of the routes that serve the eastern half of the Waukesha Metro area when Route 1 is extended in Spring 2023. Changes outlined in the TDP for the western half are more significant and the timeline is unknown. Waukesha County may consider supporting on demand service in 2023 if there are viable options and demand for the service. There is some consideration to review changes to Waukesha County paratransit.

**Public Transit Operator Capital Project Justification for City of Waukesha Metro**  
**Transit System and Waukesha County Transit System: 2023-2026**

<b>TIP Project Number</b>	<b>Description</b>	<b>Year</b>	<b>Costs (\$)</b>	<b>Justification</b>
281	Capital Cost of 3rd Party Contracting	2023	750,000	Partially funds the operation of contracted service
		2024	750,000	
		2025	750,000	
		2026	750,000	
260	Senior/Disabled Transportation for Waukesha County (85.21)	2023	1,267,300	Funds operation of Waukesha County specialized transportation services
		2024	1,281,000	
		2025	1,293,800	
		2026	1,306,800	
300	Operating Assistance for City/County of Waukesha	2023	8,500,000	Funds needed to operate City and County of Waukesha systems
		2024	8,500,000	
		2025	8,500,000	
		2026	8,500,000	
301	Replacement of Six Bus Shelters	2025	100,000	Replaces shelters in operation for over 30 years
302	Local Marketing for Waukesha Metro	2024	50,000	Provides funding for marketing activities including public information & technology
		2025	50,000	
305	Tire Lease for Waukesha Metro	2023	36,000	Funds tire lease for transit buses
		2024	36,000	
		2025	36,000	
		2026	36,000	
304	Replacement of Fixed Route Bus (1)	2026	575,000	2015 bus will reach each of useful life
306	Preventative maintenance of Waukesha Metro	2023	750,000	Partially funds the preventive maintenance activities for Waukesha Metro
		2024	750,000	
		2025	750,000	
		2026	750,000	
307	Mid-Life bus rehab for Waukesha Metro	2023	250,000	Funds the mid-life rehab of fixed route buses
		2024	100,000	
		2025	100,000	
309	Replacement of Two ADA Doors at Transit Center	2024	50,000	Replace ADA doors that will be 20 years old
310	Replace Boiler at Admin/Maintenance Facility	2025	20,000	Replace the original boiler that will be 40 years in 2025
311	Replacement of Bus Washer	2025	260,000	Replace aging system that is more water efficient
312	Purchase of Automatic Passenger Counters & Other AVL Improvements	2023	125,000	Automates collection of ridership. Provides more robust and accurate data to better plan system. Track non-revenue vehicles & live look in on cameras on bus
313	Passenger Sign Replacement at the Transit Center	2024	300,000	Provides real time bus arrival information to passengers. Current signs no longer work.
314	Purchase of Scheduling/Runcutting software	2023	50,000	Automates a very manual process that will greatly reduce time and potential errors
315	Replacement of a Driver Relief Vehicle	2024	40,000	Replaces a 10 year old vehicle
316	Purchase a second Maintenance Vehicle	2023	50,000	Improve functionality of maintenance staff
317	Replace Supervisor Van	2026	85,000	2019 will be seven years old in 2026. Accessible and supplements paratransit fleet
318	Administration Facility remodeling	2024	150,000	Improve the functionality of the facility for current needs
319	Replacement of the air conditioning condenser unit at the Transit Center	2025	50,000	Existing unit will be 21 years old in 2025.
320	Replacement of the Shop Compressor	2023	20,000	Existing unit will be 19 years old in 2023. Unit is starting to fail and is critical for maintenance operations.

## INTRODUCTION

The regional transportation improvement program (TIP) lists the public transit, transportation systems management, demand management, bicycle and pedestrian, and arterial street and highway projects that each level and unit of government—State, county, and municipal—have programmed for implementation in Southeastern Wisconsin in the years 2023 through 2026. This appendix evaluates the benefits and impacts of programmed projects in the 2023-2026 TIP on minority populations, low-income populations, and people with disabilities. This evaluation includes the identification of the existing location and travel of minority populations, low-income populations, and people with disabilities in Southeastern Wisconsin. In addition, it includes a comparison of the programmed expenditures in the 2023-2026 TIP to the locations of minority populations and low-income populations to identify if these populations would receive a disproportionate share of the impacts—both costs and benefits—of the transit, highway, and the bicycle and pedestrian projects programmed in the 2023-2026 TIP.

## LOCATION AND TRAVEL PATTERNS OF MINORITY POPULATIONS, LOW-INCOME POPULATIONS, AND PEOPLE WITH DISABILITIES IN SOUTHEASTERN WISCONSIN

The magnitude and location of the minority populations in the Region may be obtained from data available from the most recent year 2020 decennial U.S. Census of Population (2020 Census). Based upon the 2020 Census, the magnitude and location of minority populations in the Region are shown on Maps I.1 through I.7 and in Table I.1. The magnitude and location of the low-income population—families with income below the Federally-defined poverty levels, and families with income less than twice the poverty level—within Southeastern Wisconsin, based upon the 2016-2020 U.S. Census American Community Survey (ACS), are shown on Maps I.8 and I.9 and are summarized in Tables I.2 through I.4. The magnitude and location of people with disabilities in the Region are shown in Map I.10 and Table I.5 and is based upon the 2016-2020 ACS.

Data from the National Household Travel Survey indicate that automobile travel is the dominant mode of travel for all trips by both the Southeastern Wisconsin area minority population—76 percent—and white population—86 percent. Unfortunately, data by County (from the ACS) are only available for travel to and from work. In Milwaukee County, these data indicate that different minority populations use the automobile for 81 to 89 percent of their travel to and from work. This compares to approximately 85 percent of the white population. The mode of travel reported in the year 2016-2020 ACS for travel to and from work for minority and white populations of the Region is shown in Table I.6.

# Map I.1

## Concentrations of Black/African American People in the Region: 2020

**CENSUS BLOCKS WHEREIN THE PERCENTAGE OF BLACK/AFRICAN AMERICAN PEOPLE EXCEEDS THE REGIONAL AVERAGE OF 16.1 PERCENT BASED ON THE 2020 U.S. CENSUS**

- 500 OR MORE BLACK/AFRICAN AMERICAN PEOPLE
- 200 TO 499 BLACK/AFRICAN AMERICAN PEOPLE
- 100 TO 199 BLACK/AFRICAN AMERICAN PEOPLE
- 25 TO 99 BLACK/AFRICAN AMERICAN PEOPLE
- 10 TO 24 BLACK/AFRICAN AMERICAN PEOPLE
- 1 TO 9 BLACK/AFRICAN AMERICAN PEOPLE

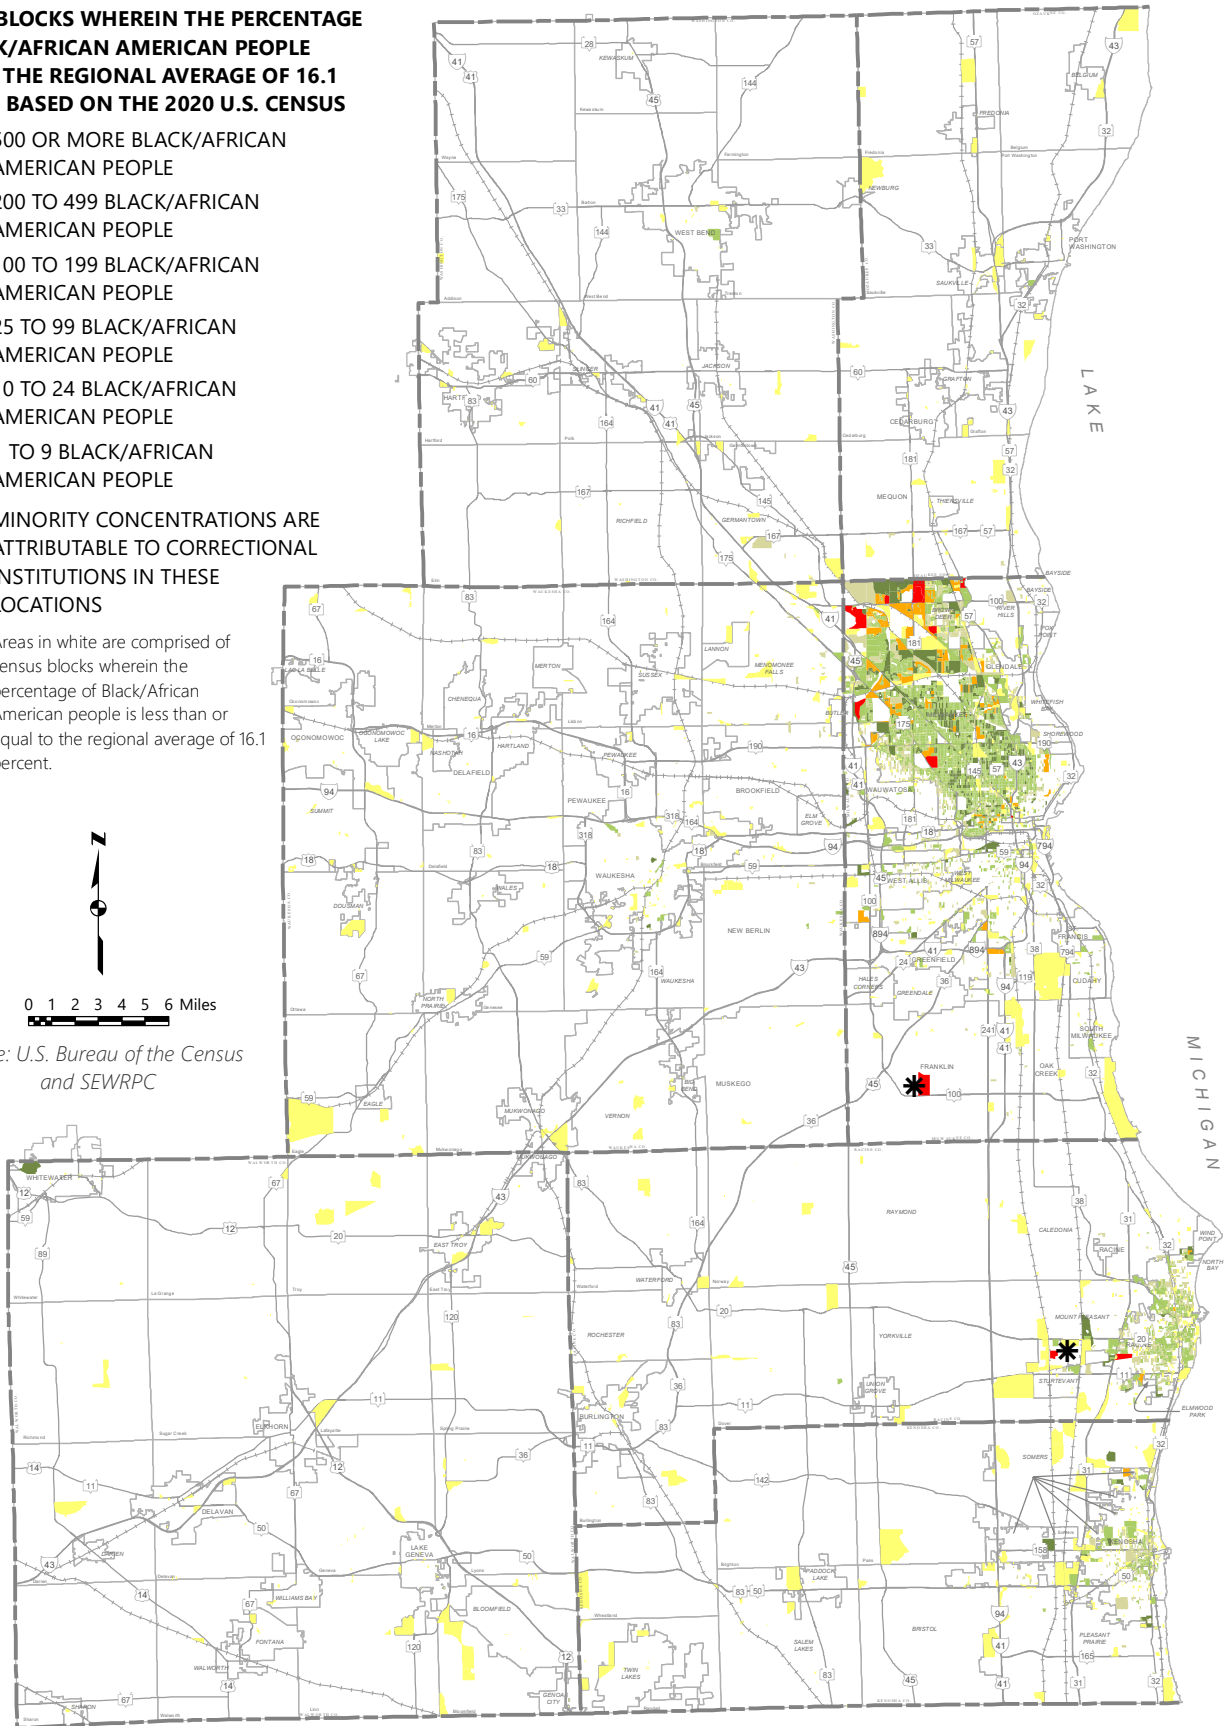

**\*** MINORITY CONCENTRATIONS ARE ATTRIBUTABLE TO CORRECTIONAL INSTITUTIONS IN THESE LOCATIONS

Note: Areas in white are comprised of census blocks wherein the percentage of Black/African American people is less than or equal to the regional average of 16.1 percent.

Milwaukee	456,520	48.6	269,335	28.7	21,494	2.3	55,919	6.0	117,641	12.5	153,017	16.3	939,489
Ozaukee	81,410	89.0	2,217	2.4	1,090	1.2	3,146	3.4	2,994	3.3	3,098	3.4	91,503
Racine	135,333	68.4	28,115	14.2	4,199	2.1	3,782	1.9	21,072	10.7	27,911	14.1	197,727
Walworth	88,104	82.7	1,958	1.8	1,954	1.8	1,627	1.5	10,481	9.8	12,550	11.8	106,478
Washington	123,855	90.6	2,756	2.0	1,886	1.4	2,931	2.1	4,260	3.1	4,827	3.5	136,761
Waukesha	347,922	85.5	10,147	2.5	5,570	1.4	19,639	4.8	19,150	4.7	21,835	5.4	406,978
Region	1,355,080	66.2	330,103	16.1	39,960	2.0	91,587	4.5	193,955	9.5	247,784	12.1	2,048,087

Note: As part of the 2020 Federal census, individuals could be reported as being of more than one race. In addition, people of Hispanic ethnicity can be of any race or combination of races. The figures in this table indicate the number of people reported as being white alone and non-Hispanic (non-minority) and those of a given minority race or Hispanic ethnicity (as indicated by the column heading), including those who were reported as that race exclusively and those who were reported as that race and one or more other races. Accordingly, the population figures by race and Hispanic ethnicity sum to more than the total population for each County and the Region.

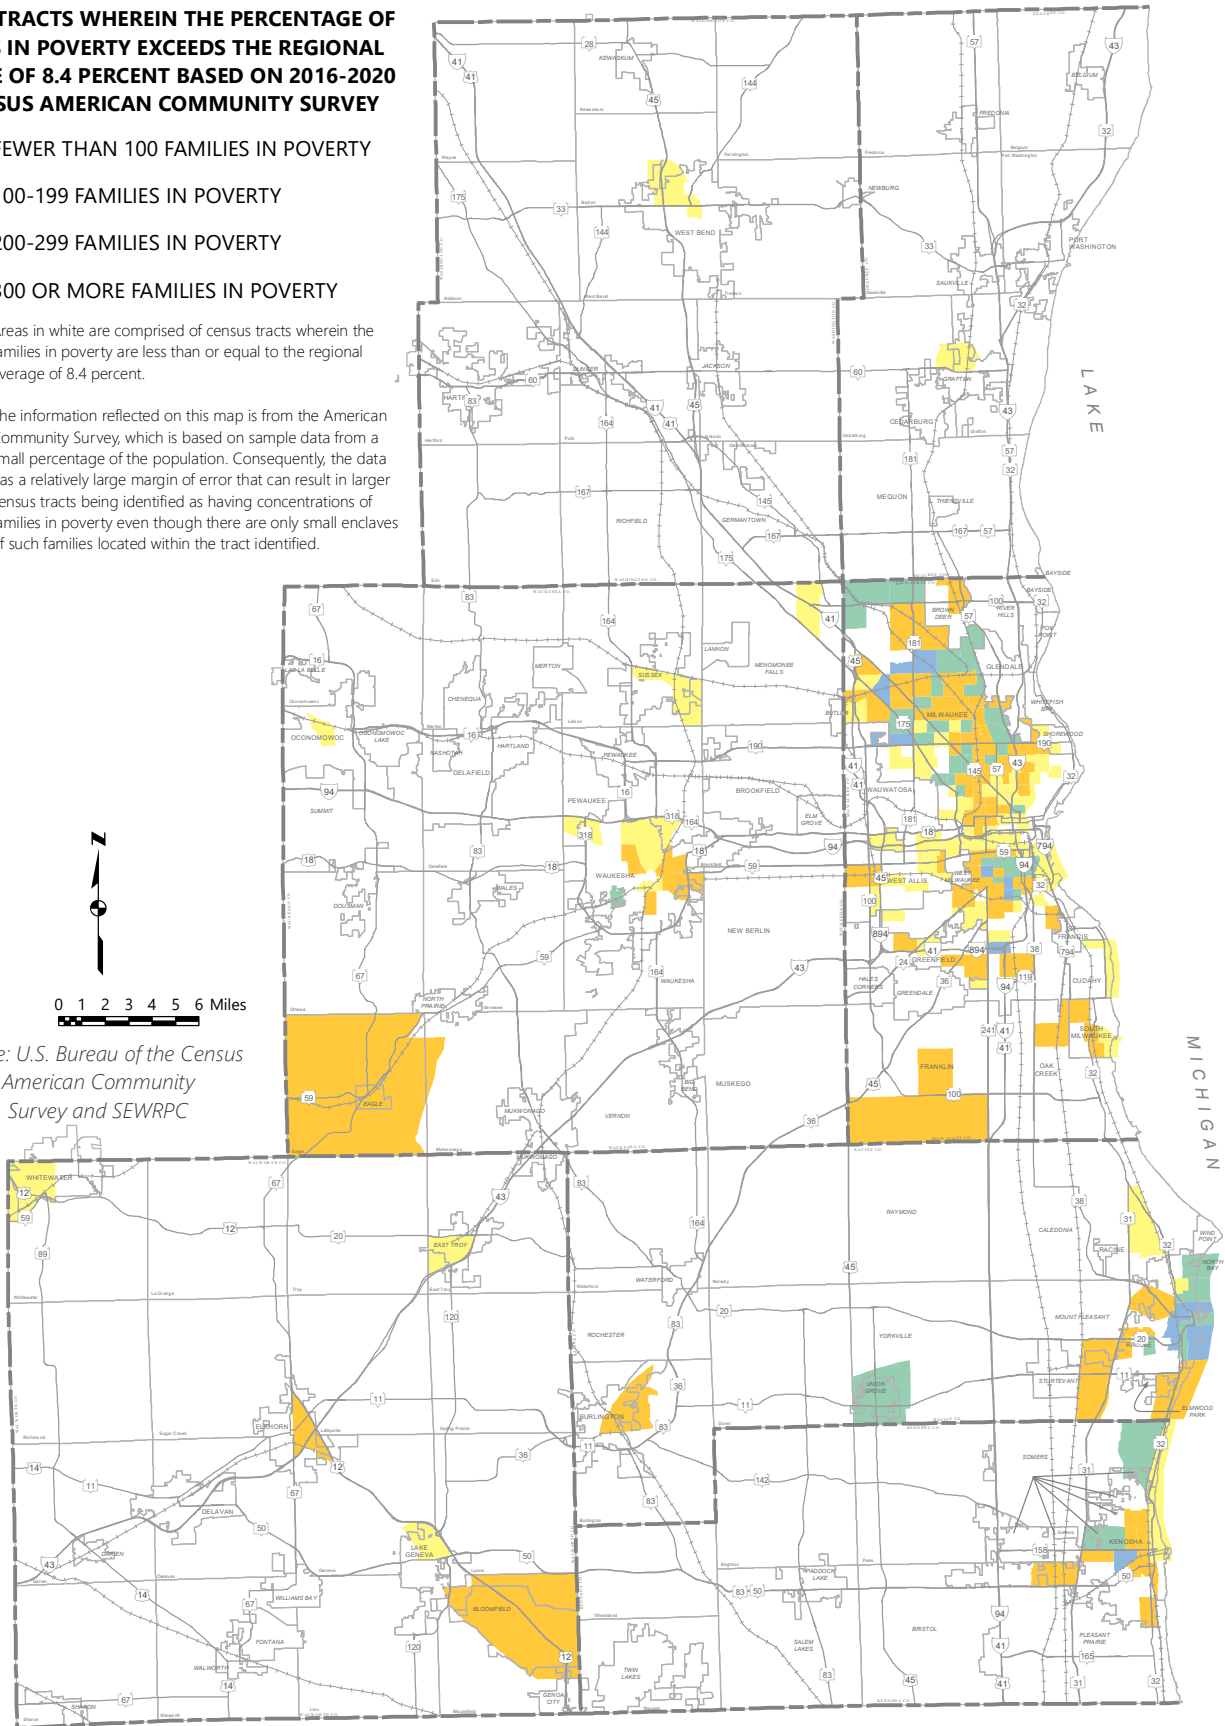

## Map I.8 Concentrations of Families in Poverty in the Region: 2016-2020

**CENSUS TRACTS WHEREIN THE PERCENTAGE OF FAMILIES IN POVERTY EXCEEDS THE REGIONAL AVERAGE OF 8.4 PERCENT BASED ON 2016-2020 U.S. CENSUS AMERICAN COMMUNITY SURVEY**

- FEWER THAN 100 FAMILIES IN POVERTY
- 100-199 FAMILIES IN POVERTY
- 200-299 FAMILIES IN POVERTY
- 300 OR MORE FAMILIES IN POVERTY

Note: Areas in white are comprised of census tracts wherein the families in poverty are less than or equal to the regional average of 8.4 percent.

The information reflected on this map is from the American Community Survey, which is based on sample data from a small percentage of the population. Consequently, the data has a relatively large margin of error that can result in larger census tracts being identified as having concentrations of families in poverty even though there are only small enclaves of such families located within the tract identified.

Source: U.S. Bureau of the Census  
American Community Survey and SEWRPC

## Map I.9

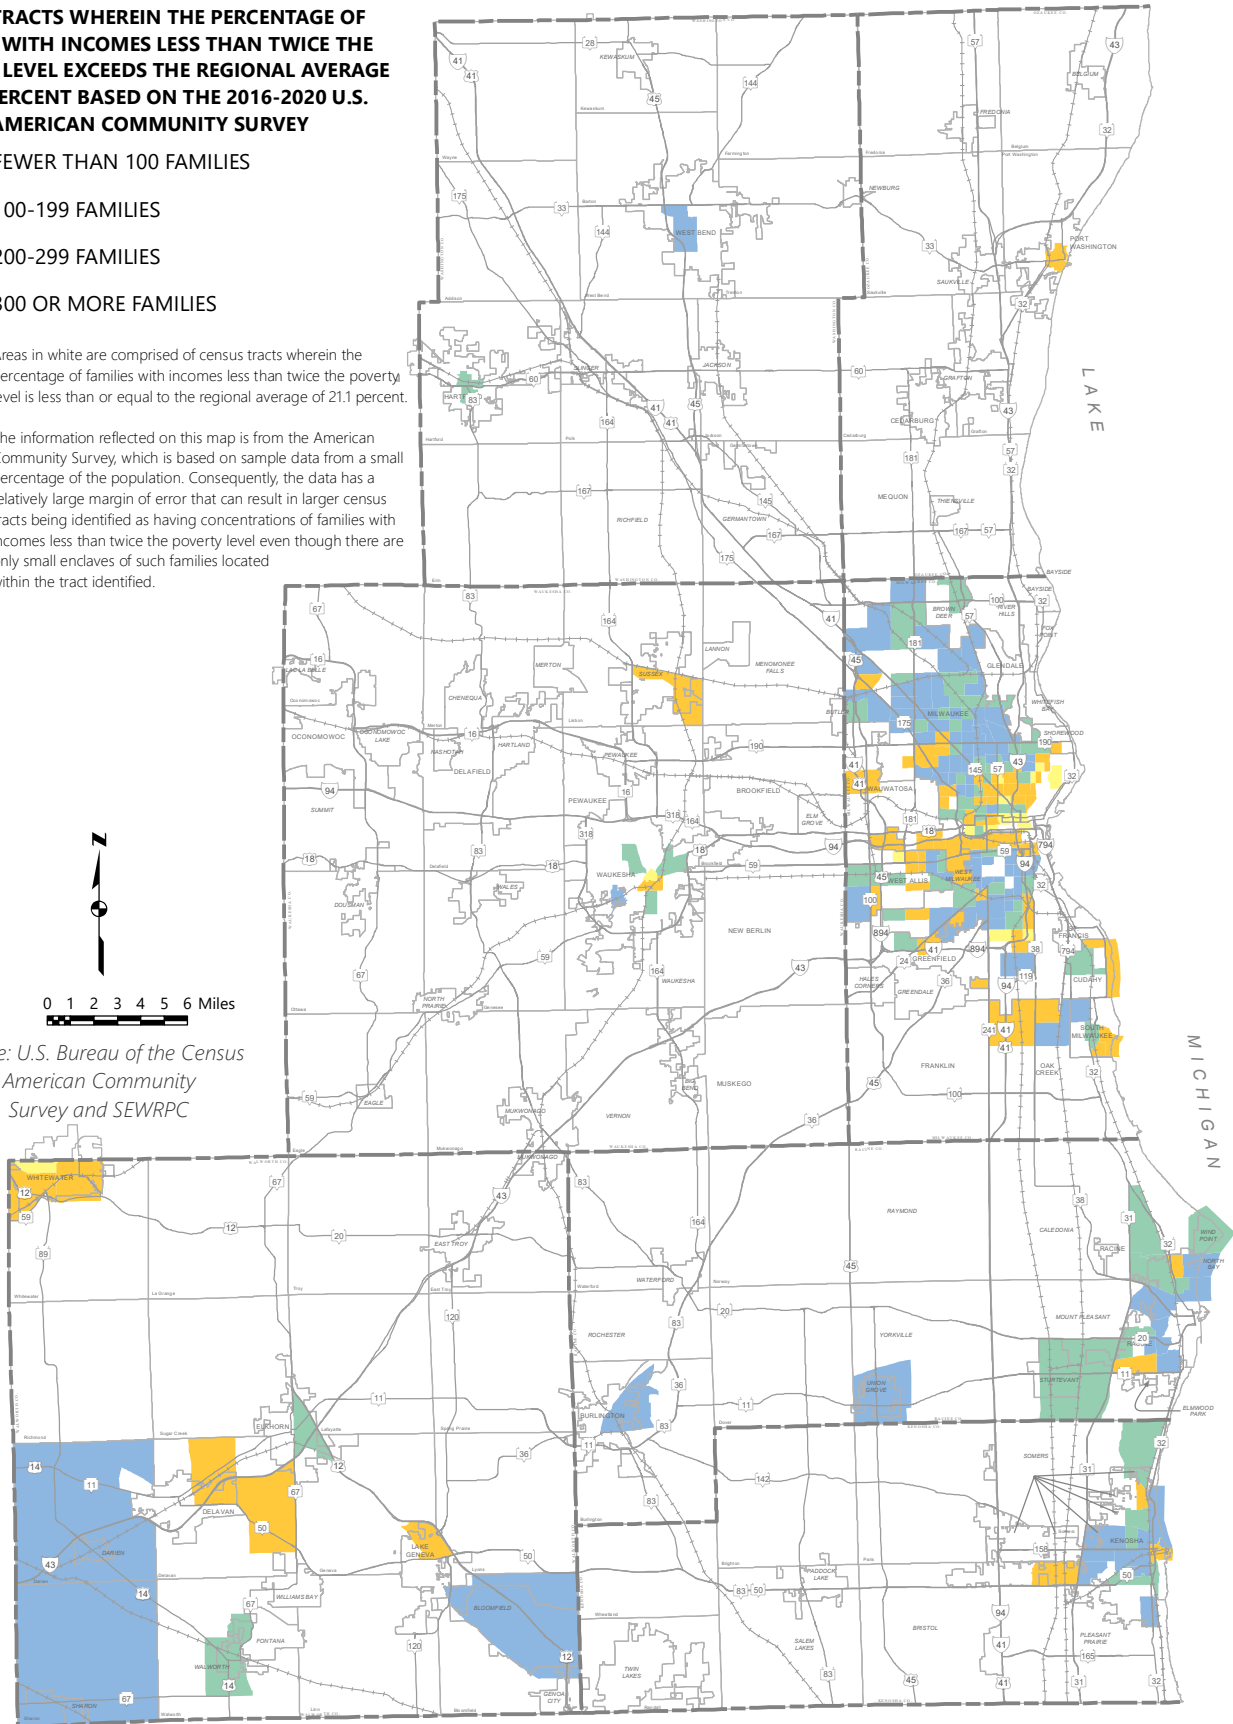

### Concentrations of Families with Incomes Less Than Twice the Poverty Level: 2016-2020

**CENSUS TRACTS WHEREIN THE PERCENTAGE OF FAMILIES WITH INCOMES LESS THAN TWICE THE POVERTY LEVEL EXCEEDS THE REGIONAL AVERAGE OF 21.1 PERCENT BASED ON THE 2016-2020 U.S. CENSUS AMERICAN COMMUNITY SURVEY**

Note: Areas in white are comprised of census tracts wherein the percentage of families with incomes less than twice the poverty level is less than or equal to the regional average of 21.1 percent.

The information reflected on this map is from the American Community Survey, which is based on sample data from a small percentage of the population. Consequently, the data has a relatively large margin of error that can result in larger census tracts being identified as having concentrations of families with incomes less than twice the poverty level even though there are only small enclaves of such families located within the tract identified.

Although most minority residents use the automobile for their travel, minority residents also utilize public transit at a higher proportion relative to other modes of travel than white populations in the Region. The minority population in Southeastern Wisconsin utilizes public transit for more of its travel across all types of trips—6 percent—compared to the white population in the Region—one percent. In addition, based on the transit travel surveys conducted as part of the Commission's 2011 travel survey for Southeastern Wisconsin, the minority population represents a greater proportion of total transit ridership than it does of total population, as shown in Table I.7. The County-to-County commuting patterns of the minority and white populations in the Region are very similar, as shown in Table I.8.

In Milwaukee County, between 4 and 11 percent of the minority population uses public transit to travel to and from work, with the highest proportion—approximately 11 percent—by the African American population. Only about 3 percent of the white population uses public transit for work travel in Milwaukee County. Also in Milwaukee County, about 15 percent of the low-income population (residing in a family with an income below the poverty level) uses public transit to travel to and from work compared to five percent of the population with higher wages. In addition, about 10 percent of people with disabilities in Milwaukee County utilize transit for travel to and from work. Data as robust as the 2016-2020 ACS data are not available for modes of travel for trips other than work within Southeastern Wisconsin by race and ethnicity. Data available from the 2017 National Household Travel Survey for Southeastern Wisconsin also shows a similar pattern for all trips in Southeastern Wisconsin.

Low-income households and a number of minority populations are particularly dependent upon transit, as a significant proportion of these populations have no private vehicle available for travel. Driver's license data demonstrate that about 72 percent of Milwaukee County Black/African American households indicate they have an automobile available for travel, and an estimated 60 percent of Black/African American adults have a driver's license. About 88 percent of Milwaukee County Hispanic households indicate they have an automobile available for travel, with only 50 percent of Hispanic adults having a driver's license. By comparison, about 91 percent of non-minority households indicate that they have an automobile available for travel, and an estimated 80 percent of non-minority adults have a driver's license. Similarly, only about 64 percent of Milwaukee County families in poverty indicate that they have an automobile available for travel, compared to 91 percent of families not in poverty.

## **TRANSPORTATION IMPROVEMENT PROGRAM**

As stated above, the TIP is a listing of all arterial highway, public transit, and other transportation improvement projects proposed to be carried out by State and local governments over the next four years (2023-2026) in the seven county Southeastern Wisconsin Region. Figure I.1 displays the expenditures in the first year of the TIP by the following project categories:

- Highway Preservation: Resurfacing, reconstruction, and other projects that result in little or no increase in the traffic-carrying capacity of the existing street system, but that are necessary to maintain existing capacity and structural adequacy of the arterial facility for which the project is proposed. These projects may also include modernization of the existing arterial facility by addressing safety and other concerns.
- Highway Improvement: Projects that typically involve roadway reconstruction, but also include an increase in the traffic carrying capacity of the existing arterial highway system, typically through the addition of traffic lanes.
- Highway Expansion: Projects that increase the capacity of the arterial highway system through development of new arterial streets or highways.
- Transit Preservation: Projects that are necessary to maintain the current quality and level of service on the existing transit system.
- Transit Improvement: Projects that improve the quality and level of service on the existing transit system.

**Table I.7**  
**Comparison of the Percentages of Minority Populations and Minority Population Transit Ridership in Milwaukee, Ozaukee, Washington, and Waukesha Counties, and the Cities of Kenosha, Racine, and Waukesha**

- **Transit Expansion:** Projects that either expand the existing transit system or create new transit systems or subsystems.
- **Bicycle/Pedestrian:** Projects that involve preservation, improvement, and expansion of bicycle and pedestrian accommodation along arterial streets and highways, or on adjacent roadway corridors or off-roadway locations.
- **Highway Safety:** Projects designed to improve or eliminate existing unsafe conditions, including candidates for special federal safety program funding.
- **Environmental Enhancement:** Projects that can affect highway system operation or capacity (for example, traffic signal coordination projects), or have the objective of encouraging alternative modes of travel, and reducing air, noise, or visual pollution.
- **Highway Off-System:** Projects on streets or highways that are not on the arterial street and highway system and are candidates for special federal funding.

**Figure I.1**  
**Distribution of Expenditures in 2023 of the 2023-2026 TIP by Project Category**

Note: For 2023 through 2026, no expenditures are expected to be incurred for transit improvement or highway expansion. However, one of the transit expansion projects also includes transit improvement activities.

Source: SEWRPC

Of the total \$863.0 million in programmed expenditures in the year 2023 by local and State governments, approximately \$613.7 million, or 71 percent, are for arterial street and highway system projects and \$223.2 million, or 26 percent, are for the public transit system. The bulk of the public transit expenditures, \$194.7 million or 87 percent of transit expenditures, programmed in the year 2023 in the 2023-2026 TIP are for system preservation, or maintaining existing services.

**EVALUATION OF THE BENEFITS AND IMPACTS OF THE TRANSIT, HIGHWAY, AND BICYCLE AND PEDESTRIAN EXPENDITURES PROGRAMMED IN THE 2023-2026 TIP ON MINORITY POPULATIONS, LOW-INCOME POPULATIONS, AND PEOPLE WITH DISABILITIES**

The following sections provide a summary of an evaluation conducted of the effect—positive and negative—of the transit, highway, and bicycle and pedestrian projects programmed in the 2023-2026 TIP. With respect to transit projects, the transit preservation projects and the transit improvement and expansion projects were evaluated separately. Similarly, separate evaluations were conducted of the highway preservation and the highway improvement projects.

## Evaluation of the Effect of the Programmed Transit Preservation Projects on Minority Populations, Low-Income Populations, and People with Disabilities

About 87 percent, or \$195 million, of total transit expenditures programmed in 2023 are for transit system preservation projects that will largely maintain existing service levels across the Region. Map I.11 shows the existing routes and service areas for the public transit systems in Southeastern Wisconsin. In general, the transit preservation activities programmed in the 2023-2026 TIP are intended to maintain the extent and level of service—quality and accessibility—of these transit systems.

Most, but not all, of the existing transit services, including the programmed expansion and improvement projects, serve the principal concentrations of minority populations, low-income populations, and people with disabilities residing in Southeastern Wisconsin, as shown on Maps I.12 through I.16. Specifically, 521,200 minority persons (or 75 percent of total minority population) and 483,700 non-minority persons (or 36 percent of total non-minority population) are served by existing public transit. With respect to lower income populations, 30,800 (or 72 percent of) families in poverty and 182,200 (or 39 percent of) families not in poverty are served by existing public transit. Similarly, there were 70,300 (or 66 percent of) families with incomes less than twice the poverty level served by existing public transit and 142,700 (or 36 percent of) families with incomes greater than twice the poverty level served by existing transit. Lastly, there were 123,300 (or 52 percent of) people with disabilities and 827,800 (or 46 percent of) people without disabilities served by existing public transit.

With respect to the quality of the transit service, the transit preservation projects programmed in the TIP are intended to maintain the quality of transit service for those residing in the existing service area, including for minority populations, low-income populations, and people with disabilities. The existing level of transit quality—Excellent, Very Good, Good, and Basic<sup>15</sup>—provided by the transit systems is shown on Map I.17. Based on a comparison of transit quality to concentrations of minority populations, low-income populations, and people with disabilities, most of the quality service—Excellent, Very Good, or Good service—provided by the existing transit systems serve areas with concentrations of minority population, low-income population, and people with disabilities, as shown on Maps I.18 through I.21. Specifically, about 300,700 minority persons (or 43 percent of total minority population) and 209,200 non-minority persons (or 15 percent of total non-minority population) are served by quality transit service under existing conditions. With respect to lower income populations, 18,400 (or 43 percent of) families in poverty and 85,000 (or 18 percent of) families not in poverty are served by quality transit service under existing conditions.

With respect to high quality transit service (Excellent or Very Good), about 56,600 minority persons (or 8 percent of the total minority population) and 67,400 non-minority persons (or 5 percent of the total non-minority population) are served by high quality transit service under existing conditions. With respect to lower income populations, 3,500 (or 8 percent of) families in poverty and 15,800 (or 3 percent of) families not in poverty are served by high quality transit service under existing conditions. About 6,900 (or 6 percent of) families with incomes less than twice the poverty level and 12,300 (or 3 percent of) families with incomes more than twice the poverty level are served by high-quality transit service under existing conditions. With respect to people with disabilities, 15,300 (or 7 percent of) people with disabilities and 107,100 (or 6 percent of) people not having a disability are serviced by high-quality transit service under existing conditions.

---

<sup>15</sup> Areas with “Excellent” transit service are areas that are typically within walking distance of at least one rapid transit station, and also within walking distance of multiple frequent local or express bus services. A resident living in an area of the Region with Excellent transit service has a high likelihood of not needing to own a car.

Areas with “Very Good” transit service typically include parts of the Region that are within walking distance of a rapid transit or commuter rail station, but may have fewer local or express bus routes nearby than an area with Excellent service. Alternatively, areas with Very Good service may not be within walking distance of a rapid transit or commuter rail station, but may instead be near multiple frequent local and express bus routes.

To have “Good” transit service, an area would be within walking distance of one local or express bus route that provides service at least every 15 minutes all day, or may be near three or more local bus routes that do not provide frequent, all-day service. An area with Good transit service typically would not have access to a rapid transit line.

If a part of the Region is served by “Basic” transit service, it is within walking distance of at least one local bus route, but generally not more than two routes. The routes are not likely to have service better than every 15 minutes all day.

## Comparison of Concentrations of Families in Poverty to Existing Public Transit

### CENSUS TRACTS WHEREIN THE PERCENTAGE OF FAMILIES IN POVERTY EXCEEDS THE REGIONAL AVERAGE OF 8.4 PERCENT BASED ON 2016-2020 U.S. CENSUS AMERICAN COMMUNITY SURVEY

- FEWER THAN 100 FAMILIES IN POVERTY
- 100-199 FAMILIES IN POVERTY
- 200-299 FAMILIES IN POVERTY
- 300 OR MORE FAMILIES IN POVERTY

Note: Areas in white are comprised of census tracts wherein the families in poverty are less than or equal to the regional average of 8.4 percent.

The information reflected on this map is from the American Community Survey, which is based on sample data from a small percentage of the population. Consequently, the data has a relatively large margin of error that can result in larger census tracts being identified as having concentrations of families in poverty even though there are only small enclaves of such families located within the tract identified.

In addition, the programmed transit preservation projects are intended to maintain the level of transit accessibility. Map I.22 shows the number of jobs available within 30 minutes by transit under existing conditions. As shown in Table I.9, under current conditions about 4 percent of the existing minority population, 3 percent of families in poverty, 2 percent of families with less than twice the poverty level, and 2 percent of people with disabilities have access to at least 100,000 jobs. Table I.10 shows that about 8 percent of the existing minority population, 7 percent of families in poverty, 5 percent of families with less than twice the poverty level, and 5 percent of people with disabilities have access to at least 25,000 lower-wage jobs within 30 minutes by transit. Table I.11 shows the existing minority populations, low-income populations, and people with disabilities that would have reasonable access (within 30 minutes) by transit to various activity centers under existing conditions. Currently, reasonable access to activity centers ranges depending on the type of activity center within each population category. For example, about 7 percent of the minority population has reasonable access to a major park by transit, while about 81 percent of the minority population has reasonable access to grocery stores.

### **Evaluation of the Benefits and Impacts of Programmed Transit Improvement and Expansion Projects in the 2023-2026 TIP on Minority Populations, Low-Income Populations, and People with Disabilities**

About 13 percent, or \$29 million, of total transit expenditures programmed in 2023 are for transit system expansion, including Milwaukee County's two bus rapid transit projects, the City of Milwaukee Lakefront extension streetcar project, and the City of Kenosha bus service expansion. In addition to transit expansion activities, the City of Kenosha project also includes improvement to some of the existing transit routes.

An evaluation was conducted of the effect—positive and negative—of these projects on existing minority populations, low-income populations, and people with disabilities within the Region. Maps I.23 through I.26 show the programmed transit improvement and transit expansion projects for the years 2023 through 2026 compared to areas of minority populations, low-income populations, and people with disabilities. The programmed transit system expansion projects includes the Milwaukee County bus rapid transit project, a City of Milwaukee streetcar project, and changes to several City of Kenosha Transit System routes. The streetcar project involves completion of the Lakefront extension of the City of Milwaukee streetcar system and operating expenses. It is located near, but not within, areas of concentrations of minority populations and low-income populations. The Lakefront extension streetcar project is funded with Federal Transportation Investment Generating Economic Recovery (TIGER) funds and its operation will be funded with CMAQ funds flexed to transit use.

In 2020, Milwaukee County received confirmation of federal funding (FTA 5309 Small Starts) for the East-West bus rapid transit project that will be predominately located along Wisconsin Avenue and Bluemound Road between downtown Milwaukee and the Regional Medical Center. This project will directly serve minority populations and low-income populations. Construction began in 2021, with service expected to begin in summer of 2023.

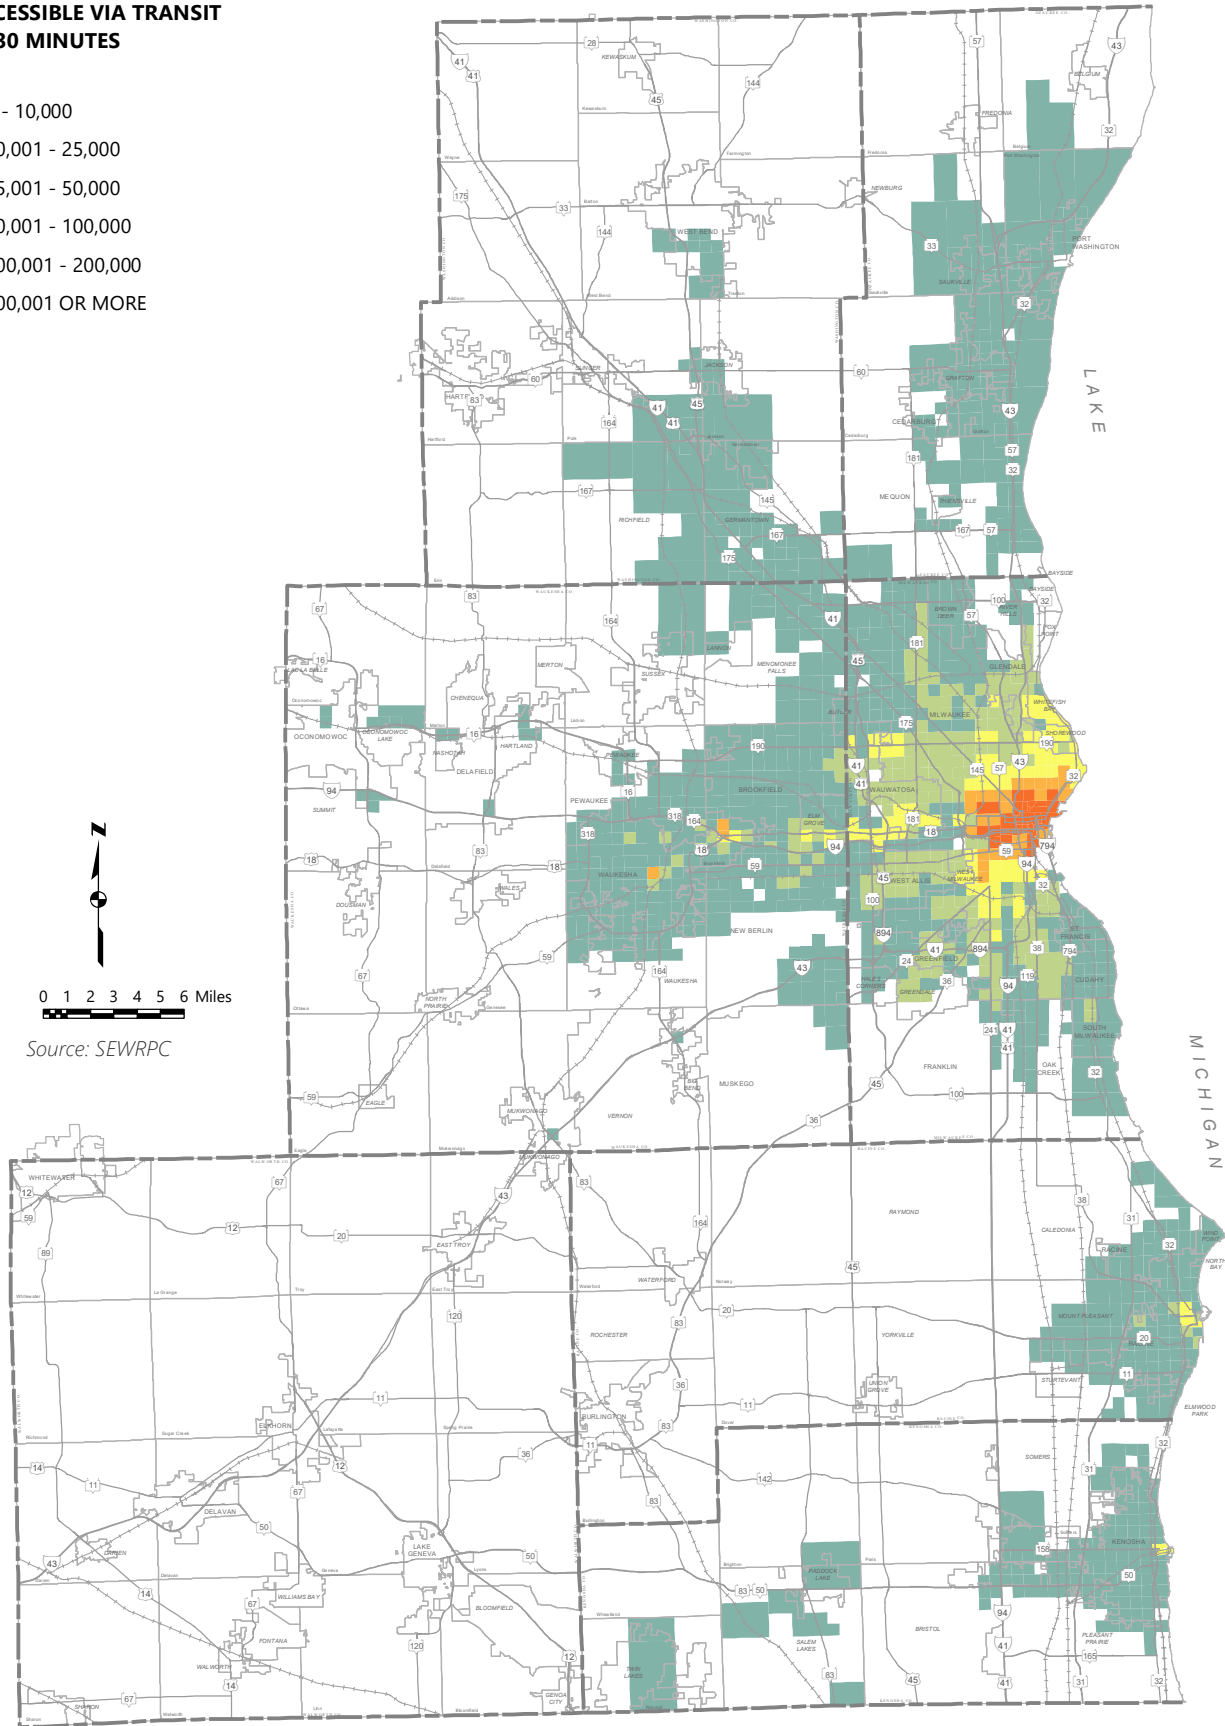

In 2022, a preliminary study on transit enhancement options for the 27th Street corridor recommended a North-South bus rapid transit project. People of color make up approximately 73 percent of the population in the corridor, which is comprised of concentrated areas of both Black/African American populations and Hispanic populations. These areas also have particularly high proportions of families in poverty and households without access to a car. Specifically, 25 percent of the families in poverty and nearly 1 in 5 of the households without access to a car in all of Milwaukee County reside within this corridor.

An expansion project affecting several City of Kenosha Transit System routes is being funded with CMAQ funds flexed to transit use. This project includes funding for the City's new Lakefront Trolley route; an expansion of Route 31 which serves major employers including Amazon, Gordon Foods, and Aurora; and route improvements to four routes (2, 4, 5, and 31), in the form of extended service hours. Service expansions and improvements under this project would directly serve minority populations and low-income populations.

## **Evaluation of the Benefits and Impacts of Programmed Highway Preservation Projects on Minority Populations and Low-Income Populations**

About 81 percent, or \$497.9 million, of the programmed highway expenditures for 2023 are for highway preservation (resurfacing and reconstruction to the same capacity).<sup>16</sup> As the dominant mode of travel for all population groups in Southeastern Wisconsin is the automobile, highway preservation projects would maintain the roadway quality, level of safety, and help to preserve the level of accessibility to jobs and other activities by automobile, likely benefiting a significant proportion of minority populations and low-income populations. With respect to the level of accessibility, the number of jobs accessible by automobile in 30 minutes or fewer under existing conditions is shown on Map I.27. Similarly, Table I.12 shows that about 65 percent of minority populations and 62 percent of low-income populations have access to at least 500,000 jobs within 30 minutes by automobile. Similarly, about 65 percent of minority populations and 62 percent of low-income populations have access to at least 200,000 lower-wage jobs by automobile, as shown in Table I.13. Furthermore, Table I.14 shows that nearly all of the existing minority population and families in poverty of the Region currently have reasonable access by automobile to the activity centers, with reasonable access defined as the ability to travel by automobile within 60 minutes to Milwaukee Mitchell International Airport and the Milwaukee Regional Medical Center and within 30 minutes to all other activities.

Comparing the highway preservation projects programmed in the 2023-2026 TIP to concentrations of minority populations and low-income populations, as shown on Maps I.28 through I.30, indicates that the benefits and impacts of programmed highway preservation projects are shared by all residents of the Region, including minority populations and low-income populations. Highway preservation projects are located in, and adjacent to, portions of Milwaukee County, Racine County, and Kenosha County that have concentrations of minority populations and low-income populations that exceed the regional averages.

## **Evaluation of the Benefits and Impacts of Programmed Highway Improvement Projects in the 2023-2026 TIP on Minority Populations and Low-Income Populations**

About 20 percent, or \$115 million, of the programmed highway expenditures in 2023 are for highway improvement projects, typically involving arterial reconstruction projects that include additional traffic lanes. Nearly all of the programmed expenditures for highway improvement projects are programmed for reconstruction with additional traffic lanes of IH 43 between Silver Spring Drive and STH 60 in Milwaukee and Ozaukee Counties and the potential reconstruction with additional traffic lanes of IH 94 (east-west freeway) between S. 70th Street and S. 16th Street.<sup>17</sup> The implementation of highway improvement projects typically occurs when an existing facility requires reconstruction, but also includes a widening with additional traffic lanes. The majority of the cost for these projects is for the reconstruction of the existing roadway, and the additional traffic lanes may only represent about 10 to 20 percent of the overall project cost. There are not any highway expansion projects programmed in the 2023-2026 TIP.

An evaluation was conducted to determine how programmed highway improvement projects in the TIP benefit and impact minority populations and low-income populations. Maps I.31 and I.32 show the percentage of automobile trips within each TAZ that would utilize the segments of surface arterials and freeway improvements programmed in the 2023-2026 TIP. These maps were compared to locations of current concentrations of minority populations and low-income populations. With respect to surface arterials, the areas that would have the greatest use of these proposed improved arterials are largely adjacent, or near, the proposed improved surface arterials. The proposed improved surface arterials are located outside of existing areas of high concentrations of minority populations and low-income populations. With respect to

---

<sup>16</sup> Similar programmed funding patterns exist for the full four years of the 2023-2026 TIP. About \$2.38 billion, or 73.4 percent of the total \$3.23 billion 2023-2026 programmed funding, is for highways. Of the total 2023-2026 programmed resources for highways, \$1.39 billion, or 58.4 percent, is for highway preservation and \$985 million, or 41.4 percent, is for highway improvement. There are not any highway expansion projects programmed in the 2023-2026 TIP. About \$744 million, or 23 percent, of the 2023-2026 programmed funding is for transit. Of the total 2023-2026 programmed resources for transit, \$712 million, or 95.7 percent, is for transit preservation, and \$32 million, or 4.3 percent, is for transit expansion. There are not any highway expansion and transit improvements projects programmed in the 2023-2026 TIP.

<sup>17</sup> The Wisconsin Department of Transportation (WisDOT) is currently reassessing alternatives developed as part of the National Environmental Policy Act (NEPA) process previously conducted for the project, including alternatives with and without additional travel lanes. Following the completion of the reassessment and a preferred alternative is selected, WisDOT will seek a new Record of Decision from the Federal Highway Administration (FHWA).

**Map I.27**

	Families	Percent	Families	Percent	Families	Percent	
Families in Poverty	26,400	62.0	31,200	73.2	38,600	90.6	42,600
Families Not in Poverty	163,900	35.4	277,800	60.0	388,400	83.9	463,200

<sup>a</sup> Minority and non-minority population are based on the 2020 U.S. Census and families in poverty and families not in poverty are based on the 2016-2020 American Community Survey.

Source: U.S. Bureau of the Census, U.S. Census and American Community Survey; and SEWRPC

freeways, the segments of freeway proposed to be improved in 2023 through 2026 are largely not directly adjacent to areas with high concentrations of minority and low-income populations, but are expected to be utilized by automobile trips from those areas. As a result, it is expected that minority and low-income populations would be utilizing and experiencing benefit from the proposed improvements.

Maps I.28 through I.30 show a comparison of the minority populations and low-income populations to the arterial street and highway system preservation and improvement projects programmed for years 2023 through 2026. This comparison indicates that there is a balance of programmed highway projects, located within and outside areas of minority populations and low-income populations. Specifically, preservation and improvement projects are located in portions of Milwaukee County, Racine County, and Kenosha County that have concentrations of minority populations and low-income populations that exceed the regional averages. The highway system preservation and improvement projects would be expected to maintain access to jobs for the portions of the area’s minority populations and low-income populations with access to an automobile.

**Table I.14**

<sup>a</sup> Reasonable access is defined as the ability to travel by automobile within 60 minutes to Milwaukee Mitchell International Airport and the Milwaukee Regional Medical Center and within 30 minutes to all the other activity centers.

<sup>b</sup> Minority population is based on the 2010 U.S. Census and families in poverty are based on the 2014-2018 American Community Survey.

Source: U.S. Bureau of the Census, U.S. Census and American Community Survey; and SEWRPC

### **Evaluation of the Benefits and Impacts of Programmed Bicycle and Pedestrian Improvement and Expansion Projects in the 2023-2026 TIP on Minority Populations, Low-Income Populations, and People with Disabilities**

Maps I.33 through I.36 show a comparison of the minority populations, low-income populations, and people with disabilities to the locations of bicycle and pedestrian facility projects programmed for the years 2023 through 2026. Reviewing the programmed projects indicates that the benefits and impacts of programmed bicycle and pedestrian improvement and expansion projects are shared by all residents of the Region, including minority populations, low-income populations, and people with disabilities. Specifically, the bicycle and pedestrian preservation and improvement projects proposed within Milwaukee County are near or within areas with concentrations of minority populations, low-income populations, and people with disabilities that exceed regional averages. In addition, programmed highway and arterial projects could incorporate bicycle and pedestrian amenities as enhancements or adding new accommodations. Therefore, it can be expected that access to bicycle and pedestrian amenities will increase for minority populations, low-income populations, and people with disabilities.

### **Transportation-Related Air Pollution Impacts on Minority Populations and Low-Income Populations**

Automobiles and trucks traveling on arterial streets and highways emit air pollutants that generally exist in higher concentrations in the atmosphere near the arterial streets and highways with the most traffic, such as the Region’s freeways. The lower speeds and starting/stopping of vehicles associated with congested conditions increases the level of transportation air pollutant emissions. Individuals living in close proximity to the Region’s freeways may be exposed to higher levels of transportation-related air pollutants.

Due in large part to past, current, and future Federal fuel and vehicle fuel economy standards and improved emissions controls, transportation-related air pollution emissions in the Region have been declining and are expected to continue to decline in the future. As stated in SEWRPC Planning Report No. 55 (2nd Edition), *VISION 2050: A Regional Land Use and Transportation Plan*, 2020, this decline is expected to continue in the future, even with the projected increase in vehicle-miles of travel. In addition, the percentage of

## Map I.28

## Map I.29

# Comparison of Existing Concentrations of Families in Poverty to the Highway Preservation, Improvement, and Expansion Projects Programmed for the Years 2023 Through 2026

### CENSUS TRACTS WHEREIN THE PERCENTAGE OF FAMILIES IN POVERTY EXCEEDS THE REGIONAL AVERAGE OF 8.4 PERCENT BASED ON 2016-2020 U.S. CENSUS AMERICAN COMMUNITY SURVEY

Note: Areas in white are comprised of census tracts wherein the families in poverty are less than or equal to the regional average of 8.4 percent.

The information reflected on this map is from the American Community Survey, which is based on sample data from a small percentage of the population. Consequently, the data has a relatively large margin of error that can result in larger census tracts being identified as having concentrations of families in poverty even though there are only small enclaves of such families located within the tract identified.

### PROJECTS PROGRAMMED FOR THE YEARS 2023, 2024, 2025, OR 2026

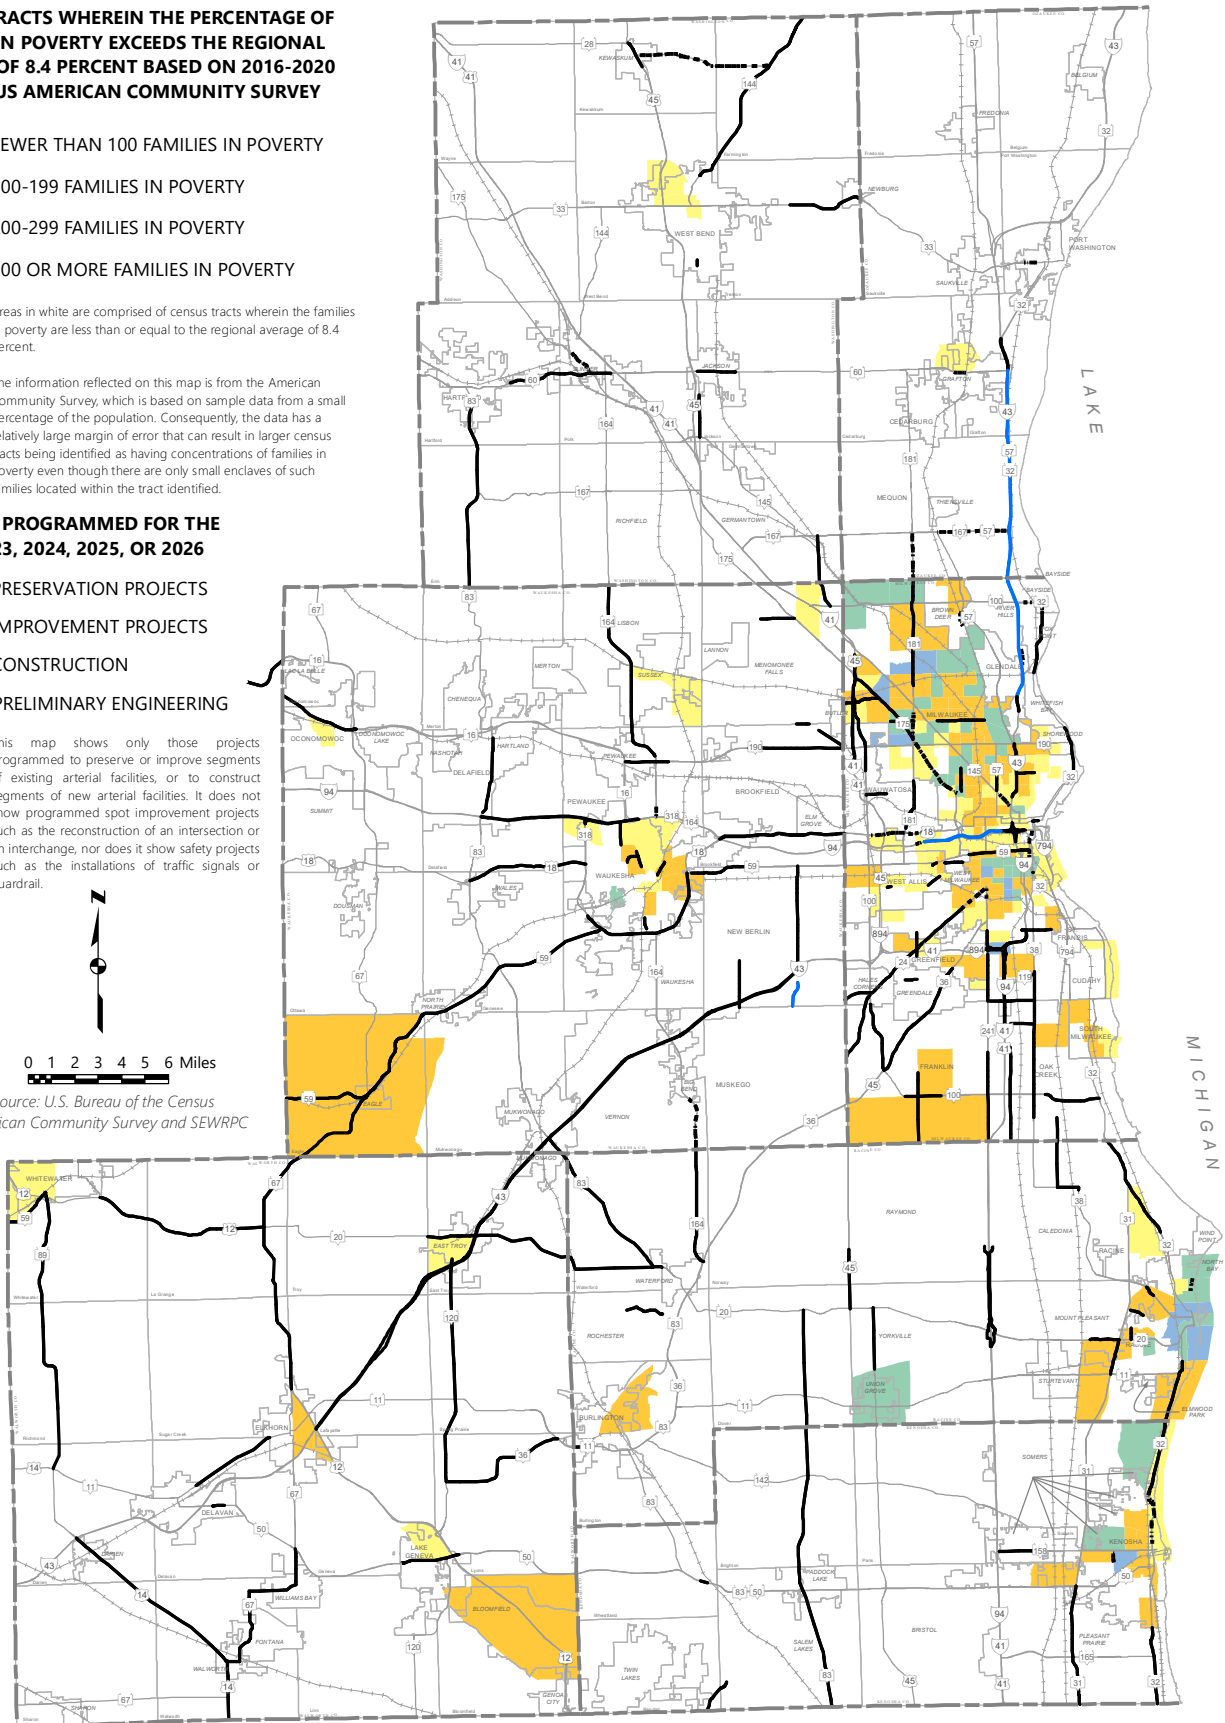

Note: This map shows only those projects programmed to preserve or improve segments of existing arterial facilities, or to construct segments of new arterial facilities. It does not show programmed spot improvement projects such as the reconstruction of an intersection or an interchange, nor does it show safety projects such as the installations of traffic signals or guardrail.

American Community Survey and SEWRPC

minority populations or of low-income populations located in proximity to the freeway system under the Fiscally Constrained Transportation System (FCTS) in VISION 2050 are generally similar (equal or within a few percentage points lower or higher) relative to the percentage of the total minority population and low-income population residing within each county.

## **TRANSPORTATION PROJECT IMPLEMENTATION AND FUNDING STATUS**

The year 2050 regional transportation plan—VISION 2050—was completed in 2016 and updated in 2020. As part of 2020 Review and Update of VISION 2050, plan implementation was reviewed. Although it is early in the 35-year outlook of the plan and implementation has been somewhat mixed, in general, implementation is lagging for the public transit portion of the plan, somewhat lagging for the arterial streets and highway portion of the plan, and relatively on track for the bicycle and pedestrian portion of the plan.

As anticipated based on the financial analyses prepared for VISION 2050, the Region has not experienced a significant transit expansion since the plan was initially adopted. Altogether, average weekday service increased slightly between 2014 and 2018, the most recent year for which data are available from the National Transit Database. While commuter bus hours have stayed consistent, revenue miles of commuter service decreased. Express bus service has also increased, although between 2018 and 2019, the Region has experienced reductions in transit service, particularly MCTS service. As service has declined, the Region has also experienced a reduction in ridership on local bus and commuter bus services since the adoption of VISION 2050, due to a variety of reasons, including the impacts of the pandemic. The Milwaukee County bus rapid transit route between downtown Milwaukee and the Regional Medical Center (which received FTA Small Starts funding) and the planned transit enhancements to the 27<sup>th</sup> Street corridor represent a first step in the implementation of the rapid transit network envisioned for the Region in VISION 2050.

As it relates to the bicycle and pedestrian portion of the plan, 108 additional miles of bicycle lanes and wide, paved shoulders have been implemented on the existing 3,300-mile arterial system, bringing the total of standard on-street bicycle accommodations up from 815 miles in 2015 to 923 miles in 2021. Off-street bicycle paths have continued to be expanded, with an addition of 24.4 additional miles since 2015. Similarly, 21.1 additional miles of buffered and protected bicycle lanes have been implemented since 2015.

Similar to the public transit portion of the plan, implementation of the arterial streets and highways portion of the plan has aligned with the financial analysis prepared for VISION 2050. Approximately eight miles, or 11 percent, of new arterial facilities and 51 miles, or 18 percent, of arterial facilities planned to be widened with additional traffic lanes have been constructed since VISION 2050 was adopted or are currently under construction in 2020. In addition, the expected preservation and maintenance activities have continued to largely align with the financial analysis prepared for VISION 2050.

Funding availability has affected implementation of both highway and transit projects. When expected revenues are insufficient, the implications for highways differ from transit as highway expenditures are largely capital expenditures and transit expenditures are largely operating expenditures. The effect on highways is a reduction in the amount of highways and surface arterials that can be reconstructed with additional lanes or can be newly constructed. The principal effect on transit is a lack of transit improvement and expansion, reductions in transit service, and passenger fare increases beyond the rate of inflation.

Transit operators in Southeastern Wisconsin are heavily dependent upon Federal and State operating funds, which typically represent about 70 to 80 percent of transit annual operating assistance. Under Federal law, the use of Federal transit funds for operating funding is limited, particularly in the Milwaukee urbanized area. Transit operators are, and have been, making maximum use of all available Federal Transit Administration (FTA) funds for operating funding. While some Federal highway funds may be flexed, or transferred, to public transit, these funds are principally limited to capital funding. Transit operators have used FHWA funds flexed to transit use for capital projects, including FHWA CMAQ funds, FHWA Surface Transportation Program – Milwaukee Urbanized Area funds, and FHWA ICE funds. (The only FHWA funds that may be used for transit operating funding are CMAQ funds, and they may only be used for new or improved transit service and are limited to the first three to five years of such transit service). Making Federal highway funds available for operating funding, as well as increasing the level of Federal operating funding available for public transit, is dependent upon the actions of the U.S. Congress and President. With regards to State transit funding,

the State Legislature and Governor establish the level of State funding available for public transit, and also establish whether regional transit authorities and dedicated local funding are permitted. State legislation for dedicated local funding has been considered by the State Legislature and Governor as recently as 2010 but was not enacted. Neither the Regional Planning Commission nor local government elected officials, the latter being the current operators of public transit, are enabled to make more Federal and State funding available for the operation of transit systems in Southeastern Wisconsin. While local government elected officials establish the level of local funding of public transit, as well as set the level of transit fares and establish improvement and expansion or reduction of transit service, their ability to replace Federal and State funds with local property taxes is limited by property tax levy caps established by the State.

## BACKGROUND AND CONTEXT

This appendix constitutes the formal record of public involvement for the preparation and review of the 2023-2026 transportation improvement program (TIP). As part of developing the TIP, local engineers, planners, and transit operators within the Region were contacted in an attempt to include all proposed State and local government transportation projects in the TIP. The TIP is reviewed by the Commission's Advisory Committees for Transportation System Planning and Programming for the Kenosha, Milwaukee, Racine, Round Lake Beach, and West Bend urbanized areas. These committees are comprised of local elected and appointed officials and agency representatives responsible for transportation system improvement, operation, and maintenance within each urbanized area and of representatives of Federal and State transportation and environmental protection agencies. The TIP is reviewed by the Commission for consistency with the regional transportation plan.

The public comment period on the draft TIP extended from November 2, 2022, through December 1, 2022. A virtual public meeting was held on the draft TIP on November 16, 2022, during the comment period. Formal announcement of the public meeting was provided through paid notices appearing in the *Milwaukee Journal Sentinel* on November 2, 2022, in the *Milwaukee Community Journal* on November 2, 2022, and in *El Conquistador* on November 3, 2022. Copies of these notices are included in Figure J.1 of this appendix. An email announcing the public meeting was sent to the Commission's email distribution list on November 9, 2022. A copy of the email is also included in Figure J.1 of this appendix.

In addition, beginning on November 2, 2022, copies of the draft *Transportation Improvement Program for Southeastern Wisconsin: 2023-2026* were posted on the Commission's website and were available for review at the Commission offices during normal business hours of 8:00 a.m. to 4:30 p.m., Monday through Friday. A summary description of the draft TIP, notice of the public meeting on the draft TIP, and opportunity to submit comments electronically were also available on the Commission's website. A copy of the webpage posted on the Commission's website for the draft TIP, along with the webpages summarizing the TIP development and approval process, are included in Figure J.1 of this appendix. Comments on the TIP could also be submitted by fax, electronically via email, or via the U.S. mail.

Additional outreach, including outreach to minority and low-income populations, included the Commission staff emailing members of the Commission's Environmental Justice Task Force (EJTF) describing the purpose of the TIP, informing them of the availability of the draft TIP and the public meeting, and inviting them to comment on the draft TIP either at the meeting or during the 30-day comment period.

# SUMMARY OF RECORD OF PUBLIC INVOLVEMENT APPENDIX J

In addition, the Commission staff maintains a list of over 100 groups and organizations that represent minority populations and low-income populations that are consulted regarding the most effective means and materials for interacting with their constituents, and that are informed of the Commission's public participation opportunities for its planning and programming activities, including the TIP. The Commission staff sent a letter to each of these groups and organizations briefly describing the purpose of the TIP, informing them of the availability of the draft TIP and the public information meeting, and inviting them to comment on the draft TIP. The Commission staff offered to meet with each group and organization to further explain the TIP and obtain their comments. Announcements of the availability of the draft TIP and of the public comment period and meeting on the draft TIP were sent via email to over 2,500 individuals who have signed up to receive electronic notices and newsletters.

Since the TIP is consistent with, and serves as a stage of implementation of, the regional transportation plan, most of the projects in the TIP receive public involvement and comment as part of the regional transportation planning process. Many projects in the TIP also receive public involvement and comment as part of a local annual or State biennial budget, capital improvement program or program of projects, and preliminary engineering and environmental process.

Figure J.2 provides a summary of, and attendance record for, the virtual public meeting. During the public comment period, Commission staff received two comments electronically via email, one comment via letter, and one comment provided directly via telephone. Figure J.3 provides the comments received on the draft TIP.

## SUMMARY OF COMMENTS

### Summaries of the Comments Provided on the Draft TIP

- One person (a public official) expressed support for the improvements the projects in the TIP would have the transportation system in Southeastern Wisconsin and expressed support for the creation of a Regional Transit Authority.
- One person provided comment that the draft TIP should include more spending on transit, like passenger rail, and less spending on highway projects.

Response: The TIP is a list of all transportation projects that State and local governments propose to implement in the next four years with Federal U.S. Department of Transportation funding. Therefore, the TIP reflects the priorities of State and local governments in Southeastern Wisconsin. During the compilation of the TIP, each implementing agency submits its projects for inclusion, and they are then reviewed by Commission staff for consistency with the recommendations of the regional transportation plan.

By State law, the Commission is an advisory regional planning agency, and cannot ensure funding for, or implementation of, any element of the regional transportation plan. However, VISION 2050—the current regional land use and transportation plan—recommends significant improvement to, and expansion of, public transit in the Region, including eight rapid transit lines, four commuter rail lines, and significantly expanded local bus, express bus, commuter bus, and shared-ride taxi services.

With respect to transit projects in the TIP, a substantial proportion of programmed expenditures in the draft TIP is for transit (\$744 million, or 23 percent), most of which is programmed for maintaining the existing transit systems in the more urban or suburban portions of the Region. Maintaining a well-functioning transit system is important to the areas it serves in order to expand the traffic carrying capacity in the Region's heavily travelled corridors (helping to mitigate traffic congestion), to provide mobility access to the 1 in 10 households in the Region without access to a car, and to provide employers with access to a larger labor force.

Of the \$744 million, about \$32 million (or four percent) is programmed in the draft TIP for transit expansion and improvement activities, including projects related to a bus rapid transit system in Milwaukee County, the new streetcar system in the City of Milwaukee, and expansion and improvement to the City of Kenosha's transit system. While these programmed expenditures are modest compared to the level of system expansion recommended in VISION 2050, such projects can further assist in traffic congestion mitigation, encourage economic development, reduce automobile dependence, and provide economic resilience, particularly in the corridors that they are located. Because transit operators are utilizing most of the available transit funding to maintain existing systems, future improvement and expansion requires action by the State and Federal governments to provide additional transit funds or allow local governments the ability to generate additional funds on their own (which they are currently not allowed to do).

In addition, two comments were not necessarily specific to the draft TIP. One person expressed concern of perceived safety issues with the intersection of STH 145 and Freistadt Road in the Village of Germantown and one person expressed concern of distracted driving and bicyclist safety on roadways.

**Notice of Virtual Public Meeting and Review Period**

## JOIN us at a **VIRTUAL PUBLIC MEETING**

**You are invited to review and comment on the draft *Transportation Improvement Program for Southeastern Wisconsin: 2023-2026 (TIP)*.** The TIP lists State and local public transit and roadway projects within Kenosha, Milwaukee, Ozaukee, Racine, Walworth, Washington, and Waukesha Counties proposed by State and local governments to use Federal Transit and Highway Administration funding over the next four years.

Copies of the draft TIP are available electronically at the Regional Planning Commission's website—[www.sewrpc.org/tip](http://www.sewrpc.org/tip)—or from the Commission offices. Commission staff are available weekdays by appointment between 8:00 a.m. and 4:30 p.m. to meet with the public and to answer any questions concerning the TIP. Public comments are encouraged and invited.

Comments are being sought pertaining to the draft 2023-2026 TIP. Public comment can be provided by the following:

- **Virtual Public Meeting (Wednesday, November 16, 2022, 5:00 – 6:00 p.m.).** This meeting will begin with a brief presentation by Commission staff on the draft TIP, followed by an opportunity for participants to ask questions and provide written or oral comment in real time.

Those interested in participating in the meeting will need to register in advance. More information on the virtual public meeting and on how to register can be found at [www.sewrpc.org/TIP](http://www.sewrpc.org/TIP). Individuals without internet access can register by calling the Commission's office at 262-953-3252.

- **Written Comments** – Comments may be provided via U.S. mail, email, phone, or fax through **December 1, 2022**, to:

## ÚNASE a nosotros en una REUNIÓN PÚBLICA VIRTUAL

**Está invitado a revisar y comentar sobre el borrador del Programa de mejora del transporte para el sureste de Wisconsin: 2023-2026 (TIP).** El TIP enumera los proyectos de carreteras y transporte público estatales y locales dentro de los condados de Kenosha, Milwaukee, Ozaukee, Racine, Walworth, Washington y Waukesha propuestos por los gobiernos estatales y locales para utilizar los fondos de la Administración Federal de Tránsito y Carreteras durante los próximos cuatro años.

Las copias del borrador del TIP están disponibles electrónicamente en el sitio web de la Comisión de Planificación Regional—[www.sewrpc.org/tip](http://www.sewrpc.org/tip)—o en las oficinas de la Comisión. El personal de la comisión está disponible los días de semana con cita previa entre las 8:00 a. m. y las 4:30 p. m. reunirse con el público y responder cualquier pregunta relacionada con el TIP. Los comentarios públicos son alentados e invitados.

Se piden comentarios relacionados con el borrador del TIP 2023-2026. Los comentarios públicos pueden ser proporcionados por los siguientes:

- **Reunión Pública Virtual (miércoles 16 de noviembre de 2022, 5:00 – 6:00 pm)**. Esta reunión comenzará con una breve presentación del personal de la Comisión sobre el borrador del TIP, seguida de una oportunidad para que los participantes hagan preguntas y proporcionen comentarios escritos u orales en tiempo real.

Los interesados en participar en la reunión deberán registrarse previamente. Puede encontrar más información sobre la reunión pública virtual y cómo registrarse en [www.sewrpc.org/TIP](http://www.sewrpc.org/TIP). Las personas sin acceso a Internet pueden registrarse llamando a la oficina de la Comisión al 262-953-3252.

- **Comentarios escritos:** los comentarios pueden enviarse por correo postal, correo electrónico, teléfono o fax de EE. UU. hasta el 1 de diciembre de 2022 a:  
P.O. Box 1607

## COMMENT ON THE DRAFT TIP NOW THROUGH DECEMBER 1

### SOUTHEASTERN WISCONSIN REGIONAL PLANNING COMMISSION

#### DRAFT 2023-2026 TRANSPORTATION IMPROVEMENT PROGRAM

The Commission has prepared a draft regional transportation improvement program (TIP) listing all arterial highway, public transit, and other transportation improvement projects proposed to be carried out by State and local governments over the next four years (2023-2026) in the seven-county Southeastern Wisconsin Region. The TIP indicates the transportation system improvement priorities of State and local governments in Southeastern Wisconsin by their programming of projects to be undertaken in each of the next four years. The draft 2023-2026 TIP contains 404 projects representing a total potential investment in transportation improvements and services of \$3.2 billion over the next four years.

#### HEAR MORE AND TELL US WHAT YOU THINK

The draft 2023-2026 TIP is available for review and comment through December 1, 2022. Comments can be provided during the virtual public informational meeting or by submitting written comments, as detailed below.

- **Virtual Public Informational Meeting** – A virtual public meeting on the draft 2023-2026 TIP will be held Wednesday, November 16, 2022, from 5:00 p.m. to 6:00 p.m. This meeting will begin with a brief presentation by Commission staff on the draft TIP, followed by an opportunity for participants to ask questions and provide comments in real time.

Figure J.1 (Continued)

Those interested in participating in the meeting will need to register in advance. Individuals without internet access can register by calling the Commission's office Monday-Friday between 8:00 am and 4:30 pm at 262-953-3252.

## Draft Regional Transportation Improvement Program: 2023–2026

The Commission has prepared a [draft 2023–2026 regional transportation improvement program](#) (TIP). The TIP is a listing of all arterial highway, public transit, and other transportation improvement projects proposed to be carried out by State and local governments over the next four years (2023–2026) in the seven county Southeastern Wisconsin Region. The TIP indicates the transportation system improvement priorities of State and local governments in Southeastern Wisconsin to be undertaken in each of the next four years. Transit, arterial highway, and other improvement projects proposed to be implemented in the next four years with Federal U.S. Department of Transportation funding should be included in this program.

Commission staff reviewed each project proposed to be listed in the TIP for consistency with the adopted year 2050 fiscally constrained transportation system (FCTS). The Commission staff also compared the total costs of the proposed projects in the TIP to estimates of available Federal, State, and local funding to ensure that available funding sources are adequate to implement the TIP. In addition, the Commission staff conducted an evaluation assessing the impact of the projects programmed in the TIP on minority populations and low-income populations—both positive and negative—and evaluating whether minority populations and low-income populations may be expected to receive a proportionate share of TIP benefits and not receive a disproportionate share of TIP negative impacts. An evaluation was also conducted of the contributions of the projects listed in the TIP toward achieving VISION 2050 performance goals and the established targets for the national performance measures.

The draft TIP along with public comment on the draft TIP will be reviewed by the Commission's Advisory Committees for Transportation System Planning and Programming for the [Kenosha, Milwaukee, Racine, Round Lake Beach–McHenry–Grayslake, Illinois–Wisconsin](#), and [West Bend](#) urbanized areas. These committees are comprised of local elected and appointed officials and agency representatives responsible for transportation system improvement, operation, and maintenance within each urbanized area.

The project-by-project listing of the draft 2023–2026 TIP includes for each project a brief description; estimated costs; estimated levels of Federal, State, and local funding; and the State or local unit of government sponsor responsible for project implementation.

Southeastern Wisconsin Regional Planning Commission

P.O. Box 1607

W239 N1812 Rockwood Drive

Waukesha, Wisconsin 53187-1607

Dear Southeastern Wisconsin Regional Planning Commission:

I am pleased to support the Transportation Improvement Program (TIP) 2023-2026 for Southeastern Wisconsin. Your efforts to support improvements to the transportation system in Southeastern Wisconsin are commendable and complement my goal of increasing access to high-quality, sustainable transportation options.

The city of Racine is a prime example of how lack of investment in transportation infrastructure leads to broader inequality. Racine, is a diverse community where 49.1% are non-White. According to the Southeastern Wisconsin Regional Plan Commission Regional Performance Monitoring Report, Black/African American populations are three to four times less likely to have access to a vehicle than the white, non-Hispanic population in the region. Additionally, according to the 2020 American Community Survey data, 20.7% of residents live in poverty and 16% of residents live with a disability. The plans for improvement, preservation, and expansion of the Southeastern transportation system would largely serve vulnerable populations in the City of Racine, improve health outcomes, and increase mobility options for these vulnerable populations.

As a state representative, I also fully support the creation of a Regional Transit Authority that will aid in the completion of the TIP and expand access to vital transportation for Wisconsinites across the state. A segregated and dedicated source of revenue is needed for communities to grow a transit system that meets residents' needs and allows the economy of a region to prosper.

I respectfully request that full consideration be given to the 2023-2026 TIP and to the creation of a Regional Transit Authority. Thank you for your thoughtful consideration of this request.

Sincerely,

Wisconsin State Representative

Greta Neubauer

66th Assembly District

Phone Conversation with Richard Yahr  
November 8, 2022

Mr. Yahr mentioned he believed the intersection of STH 145 and Freistadt Rd is one of the most dangerous intersections in the Region. The intersection is at an approximate 30 degree angle and is obstructed by a hill that causes some sight distance issues. He is suggesting that signage alerting or warning drivers about the dangerous intersection or flashing warning lights should be installed. He also suggested reducing the 45mph speed limit in STH 145 and possibly making Freistadt Rd right turns only. He encouraged Commission staff to inform the Village of Germantown and WisDOT about these safety concerns.

**Subject:** comment on TIP for MKE

TIME FOR PUBLIC TRANSPORTATION OPTIONS LIKE PASSENGER RAIL NO MORE HIGHWAY PROJECTS Cindy Carter, Appleton, WI

**From:** Joseph Schlaefler  
**Sent:** Friday, November 18, 2022  
**To:** tip <tip@sewrpc.org>  
**Subject:** To whom it may concern,

I did not get a chance to ask about safety issues.

My concern being a bike rider and a driver is that so many people are on their phones that "it is an accident waiting to happen". I would like to help anyone that is interested.

Also, I do not like the fact that a lot of bike trails "share the sidewalks and streets".

Especially in Grafton the Interurban trail is on many busy streets. There was talk about

"connecting the trails" in Southeastern WI. I do not know if that is still reality. The issue

with being on streets is driveways and cross streets and "vehicle parking" because people

do open the doors and do not always watch for bike riders or pedestrians. I do like the Glacial Drumlin trail and I would

be interested in more benches if possible. I do understand that getting the old railroad right of way is not always possible.

Thank You
