HOW TO USE THIS MANUAL

This manual simplifies the task of ordering parts for your Gillig Low Floor. Each page illustrates and lists the break-down of parts for a component or system on your coach. This enables maintenance and service personnel to identify and order parts quickly and efficiently. The new two-page format presents parts lists and illustrations on facing pages, facilitating parts identification by providing larger and sharper text and illustrations. Please refer to the illustration on the following page for an explanation of all the common elements used on each page of this manual.

Parts information in this manual is arranged in the same order as the Gillig bill of material. Each page represents a sub-bill from the bill of material. A page may represent more than one bill. Occasionally a single bill can be broken down on more than one page. A list of all bills used on a page appears in the lower right corner of the illustration page. Page numbers, located at the bottom each page, consist of a prefix at the outside, which corresponds to a bill number, and a page number in the center. An extensive table of contents and index is included in this manual to help you identify the part you need. The index lists parts both alphabetically by part name and numerically by part number.

The abbreviations A/R (As Required), and N/S (Not Shown) appear frequently throughout the manual. As Required indicates that a part should be replaced in measurements or quantities determined by the customer. The other abbreviations that appear throughout this manual are taken from the American National Standards Institute (ANSI).

Information in this manual is for the Gillig Low Floor coaches listed in this manual only. Do not use this manual as a basis for ordering parts for any other Gillig coaches in your fleet. Additional copies of this or any other Gillig publication may be purchased by contacting the Gillig Parts Department. We hope you find this manual user-friendly, and we welcome your comments, questions, or suggestions regarding this manual or your Low Floor coach. You may contact the Gillig Corporation by phone, fax, or letter.

USE OF NON-OEM PARTS

CAUTION

Use of non-OEM “will-fit” parts can lead to costly failures! For example, a low-cost switch could result in a high-cost fire; a low-cost filter could result in a high-cost transmission rebuild. Please remember that parts of lesser quality often fail, and can lead to costly problems that could compromise the safe operation of the coach.
