ALFAXAN - ANAESTHETIC SOLUTION FOR DOGS AND CATS

Alfaxan® is a registered trademark of Jurox Pty Limited.

Code Description
424-509310 10ml

Alfaxan® consists of the active ingredient alfaxalone in an aqueous solution with a pH of 6.5-7, and is registered for use in dogs and cats for both the induction and maintenance of anaesthesia. Alfaxalone is a neuroactive steroid molecule, with central effects. Despite being an analogue of progesterone, alfaxalone does not bind to sex hormone, glucocorticoid, or mineralocorticoid receptors.

SERUM ALLERGY TESTING AND HYPOSENSITIZATION

VETERINARIANS

Spectrum becSCREEN

becSCREEN™ is a biofilm susceptibility test which allows Veterinarians with the help of Spectrum Labs, to determine whether the tested clinical isolate from a chronic relapsing infection will be susceptible or resistant to a given antibiotic in the biofilm state, which exists in the body.

Spectrum RESPIT

Respit is only for those veterinary clients who cannot afford Spectrum's traditional allergy testing and Hyposensitization treatment. Developed by a board-certified veterinary dermatologist as the "no-test" immunotherapy alternative for pets. Instead of relying on allergy testing, Respit is formulated to include the most significant allergens in each geographic region. Hyposensitization is the only treatment for atopic dermatitis that can change the course of the disease. Available in Injectable and Oromucosal Spray formulations.

ALLERGY SOLUTIONS

Code	Description
187-0016	Allerpet Single Solution for Cats, Dogs & Birds - 473 ml

Now.... A single, reformulated, more effective allerpet solution that may be safely used on cats, dogs, kittens, puppies, small furry pets and birds to remove their pet-related allergens.

Allerpet cleans the hair of dander, saliva, sebaceous gland secretions and urine residue. These allergens are the prime causes of allergic reactions to pets.

LEVOXINE

Levothyroxine is a synthetic thyroid hormone. It usually needs to be given for the life of the horse when the horse is not producing enough thyroid hormone and to correct conditions associated with hypothyroidism.

XXTERRA™

An herbal formulation of bloodroot powder and zinc chloride solution, combined and stirred into a smooth brown paste. Bloodroot contains sanguinarine (the primary component), chelarathrine and protopine, all of which are alkaloids. Zinc chloride promotes inflammation of the sarcoids surface and with the alkaloids, alters the sarcoid cells so they become antigenic to the host. Accordingly, XXTERRA™ alters the antigenicity of a sarcoid to stimulate the host's immune system and result in an immune rejection reaction of the sarcoid.
